rious; at times, it is very trifling; at others, sufficient to induce great debility, and even death. It is announced and accompanied by the same symptoms, as precede and attend hemorrhoidal tumours. Like other hemorrhages it may be *active or passive; accidental or constitutional*. The prognosis is rarely unfavourable. The affection may, almost always, be relieved by properly adapted means. These resemble such as are necessary in hemorrhages in general. Perfect quietude,—mental and corporeal,—light diet, cooling drinks; bleeding, if the symptoms indicate it; astringents, (if the disease be protracted and passive,) such as the *Tinctura Ferri Chloridi*; aspersions of cold water on the anus; astringent injections; plugging and compression. Such will be the principal remedial agents. When the hemorrhage has become habitual or is vicarious, some caution may be required in checking it; and, if inconvenience arise from a sudden suppression, its return may be solicited by the semicupium, sitting over warm water; aloetic purgatives, glysters, irritating suppositories, &c.; or leeches may be applied to the anus.

Some authors have described a species of *LEUCORRHE'IA ANA'lis*; or whitish discharge from the anus, which often attends ordinary hæmorrhoids. This they have called, *Proctica maris'ca muc'o'sa*, *Hæmorrhoids alba*, *Hæmorrhæ'gia muc'o'sa*, *Leucorrhoids*, &c. It requires no special mention.

HÆMORRHOIS AB EXAN'IA, *Proctocèle*—h. *Procedens*, *Proctocèle*.

HÆMORRHOSCOPIA, *Hæmorrhoscop'ia*, *Hæmat'ica*, from *αἷμα*, 'blood,' *ρεω*, 'I flow,' and *σκοπεω*, 'I view.' The art of forming a judgment of the state of the system from blood drawn.

HÆMOSPASTIC, (F.) *Hémospasique*, from *αἷμα*, 'blood,' and *σπaw*, 'I draw.' An agent which draws or attracts blood to a part; as a cupping-glass. The operation is termed *Hæmospasia*, (F) *Hémospasie*.

HÆMOSTASIA, *Hæmostasis*, *Epid'esis*, from *αἷμα*, 'blood,' and *στασις*, 'stagnation.' Stagnation of blood. This name has, also, been given to any operation, the object of which is to arrest the flow of blood.

HÆMOSTATICS, *Hæmatostatica*.

HÆMOTROPHY, *Hæmotroph'ia*; from *αἷμα*, 'blood,' and *τροφη*, 'nourishment.' Excess of sanguineous nourishment—Prout.

HÆMOURESIS, *Hæmaturia*.

HÆVEA GUIANENSIS. See *Caoutchouc*.

HAGARD, *Haggard*.

HAGENIA ABYSSINICA. An Abyssinian tree, which the natives plant round their habitations, as an ornament. The infusion of its flowers mixed with beer is employed by them as an anthelmintic. It is called, there, *Cusso*.

HAGGARD, (F.) *Hagard*. The French use the term, *Air Hagard*, *Eil hagard*, '*Haggard air*,' '*Haggard eye*,' for a physiognomy, in which there is at once an expression of madness and terror.

HAGIOSPERMUM, *Artemisia Santonica*

HAGIOXYLUM, *Guaiaicum*.

HAIL, *Chalaza*.

HAIR, *Sax. hep*, *Crines*, *Pilus*, *Tarix*, (F.) *Poil*. A conical, corneous substance; issuing to a greater or less distance from the skin, to the tissue of which it adheres, by a bulb seated

in the cellular membrane,—where alone it is sensible. The hair receives various names in different parts—*as Beard, Cilia, Eyebrows, Hair of the head (Capilli), &c.*

HAIR, FALLING OFF OF THE, Alopecia—h. Matted, Plica—h. Plaited, Plica.

HAIR-WORM, Seta equina—h. Muscular, Dracunculus.

HAL, Salt.

HALCHE'MIA. The alchymists so called the art of fusing salts: from 'αλς,' salt, and χεω, 'I pour out.'—Libavius.

HALCYON, Alcyon.

HALCYONIUM ROTUNDUM, Pila marina.

HALE, Ephelides.

HALEINE, Breath—h. Courte, Dyspnœa.

HALEL'ON, Haleb'um, from 'αλς,' salt, and ελαιον, 'oil.' Oleum Sal mixtum. A mixture of oil and salt, for removing swellings of the joints—Galen.

HALETÉRATION, Alteration.

HALICA, Alica.

HALICACALUM, Physalis.

HALICES, Pandiculation.

HALINA'TRUM. A name, given by the ancients to subcarbonate of soda, containing a little subcarbonate of ammonia, which is found ready formed on the plaster of damp walls, in places inhabited by man or animals; from 'αλς,' salt, and natrum or natron.

HALINITRUM, Potassæ nitras.

HALITUOUS, Halituo'sus, from hal'itus, 'vapour,' (F.) Halitueux. The skin is said to be halitueuse, when covered with a gentle moisture. The vapour, exhaled in all the cavities of the body, so long as the blood is warm, is called Hal'itus. The odorous vapour, exhaled by the blood itself whilst warm, is called Halitus Sanguinis.

HALITUS, Breath—h. Sanguinis, Gaz sanguinis.

HALL, MINERAL WATERS OF. The springs of Hall, in Upper Austria, contain iodine.

HALLUCINATIO HYPOCHONDRIASIS, Hypochondriasis—h. Vertigo, Vertigo.

HALLUCINA'TION, Hallucina'tio, Alu'sia, Illu'sion, Allucina'tio, Parora'sis, Waking dream, Phan'tasm, Ido'lum, from hallucinari, 'to err,' 'to be deceived.' A morbid error in one or more of the senses. Perception of objects, which do not in fact exert any impression on the external senses. Hallucination, almost always, if not always, depends on disorder of the brain, but is not an index of insanity, unless the patient believes in the existence of the subjects of the hallucination.

HALME, Muria.

HALMYRO'DES, Salsugino'sus, from 'αλμυρις,' 'αληη,' 'sea-water,' 'αλς,' salt, 'a salt liquor.' An epithet given to any affection, in which the heat feels acrid under the finger of the physician.—Hippocrates.

HALO SIGNA'TUS. The impression made by the ciliary processes on the anterior surface of the vitreous humour. So called from its consisting of a circle of indentations.—Sir C. Bell. Called by Haller, Striæ retinæ subjectæ ligamento ciliari.

HALOGENE, Chlorine.

HALOIDUM OXYGENATUM, Potassæ Murias hyperoxygenatus.

HALS, 'αλς,' salt; (q. v.) hence Halogene, Haloid, &c.

HALYSIS MEMBRANACEA, Bothriocephalus latus—h. Solium, Tænia solium.

HAM, Poples.

HAMAME'LIS VIRGINIA'NA. The witch hazel. The bark of this tree, which is a native of the United States, is somewhat bitter and sensibly astringent; but it has not been much used. A cataplasm of the inner rind of the bark is said to have been found efficacious in painful inflammations of the eyes.

HAM'MA, Nodus, 'a tie.' A knot, used for retaining bandages on any part.—Hippocr.

HAMPSTEAD, MINERAL WATERS OF. These waters, situate in the neighbourhood of London, are a good chalybeate.

HAM'ULUS. Diminutive of hamus, 'a hook.' A hook or crook; Ancistrum. Also, any hook-like process; as the hamulus of the pterygoid process.

HANCHE, Haunch.

HAND, Manus.

HANDS, DROPPED. A popular term for the paralysis of the hands, induced by the action of lead.

HANGERS, Crusta genu equinæ.

HANNEBANE, Hyoscyannus.

HAPHÉ, 'αφη,' 'feeling, touch,' (q. v.) Hence:

HAPHON'OSI, Haphon'osi; from 'αφη,' 'the touch.' Morbi tactûs. Diseases of the sense of touch.

HAPLOTOM'IA, Simplex sectio, from 'απλός,' 'simple,' and τομη, 'incision.' A simple incision.

HAPSIS, Touch.

HARD, (G.) ha rt, Durus, Scleros, (F.) Dur. That, which offers much resistance. In Anatomy, the hard parts are those which compose the osseous basis of the body: in other words, the skeleton. See Pulse, hard.

HARDESIA, Hibernicus lapis.

HARDHACK, Spiræa tomentosa.

HARE-LIP. Lagochel'ius, Lagos'toma, La'bium Lepor'inum, Olophi'nia Labii Loba'ta, Lepor'ina labia, Lepor'inum rostrum, (F.) Bec de Lièvre. A fissure or perpendicular division of one or both lips. It has been so called, in consequence of the upper lip of the hare being thus divided. Hare-lip is generally congenital; at other times it is accidental, or produced by a wound, the edges of which have not been brought into contact, and have healed separately. It is simple, when there is but one division; double, when there are two; and complicated, when there is, at the same time, a division or cleft of the superior maxillary bone and of the palate: or projection of the teeth into the separation of the lip.

In the Hare-lip Operation, there are two indications to be fulfilled. First, To pare, with the knife or scissors, the edges of the cleft, and, afterwards, to preserve them in contact; in order to cause adhesion. This last object is accomplished by means of pins, passed through the edges of the division; in other words, by the twisted suture. The projecting teeth must, of course, be previously removed. If there be separation of the palate, it will become less and less after the union of the lip, or the operation of staphyloraphy may be performed upon it.

HARE'S EAR, Bupleurum rotundifolium.—h. Eye, Lagophthalmia.

HARGNE, Hernia—*h. Anérysmales*, Cirsomphalus.

HARICOT, *Phaseolus vulgaris*—*h. Grand de Perou*, *Jatropha curcas*.

HARMONY, *Harmonia*, *Harmos*, primarily from *ago*, 'I adjust.' Anatomists have called—*Suture by Harmony*, or simply *Harmony*, *False* or *superficial suture*,—an immovable articulation, in which the depressions and eminences, presented by the bony surfaces, are but slightly marked; so that it might be presumed, that the junction of the bones took place by simple apposition of their surfaces. An instance of harmony occurs in the union of the superior maxillary bones with each other.

HARMOS, Harmony.

HARROGATE, MINERAL WATERS OF.

The villages of High and Low Harrogate are situate in the centre of the county of York, near Knaresborough, twenty miles from York, and fifteen from Leeds. Here are several valuable sulphureous and chalybeate springs. The sulphureous springs contain chloride of sodium, chloride of calcium, chloride of magnesium, bicarbonate of soda, sulphohydric acid, carbonic acid, carburetted hydrogen and azote. The chalybeate springs contain protoxide of iron, chloride of sodium, sulphate of soda, chloride of calcium, chloride of magnesium, carbonic acid, azote and oxygen. For the former, Harrogate is celebrated and frequented.

ARTIFICIAL HARROGATE WATER may be formed of common salt ζv , reuter Oij. impregnated with the gas from sulphate of potass and sulphuric acid, aa ζiv . The following form has also been recently recommended. *g. Sulphat. Potass cum sulph.* (Pl. Ed.) ζj ; *Potass. bitart.* ζss ; *Magnes. sulphat.* ζvj ; *Aquæ destillat.* Oij. One half to be taken for a dose.

The ARTIFICIAL HARROGATE SALTS are much employed, and not unfrequently by those who drink the genuine water for the purpose of increasing its aperient power. They may be made as follow:—*Sulph. Potass. cum sulph.* ζvj ; *Potass. bitart.* ζj ; *Magnes. Sulph.* in pulv. ζvj . M. The usual dose is a tea-spoonful in a small tumblerful of tepid water early in the morning.

HARTFELL, MINERAL WATERS OF. Hartfell Spa is about five miles from Moffat, in Scotland. The water is a chalybeate, and is much used.

HARTSHORN, *Cervus*, *Cornu cervi*, *Liquor cornu cervi*—*h. Red*, *Spiritus lavandulæ compositus*—*h. and Oil*, *Linimentum ammoniæ carbonatis*.

HARTS' TONGUE, *Asplenium scolopendrium*.

HARTWORT OF MARSEILLES, *Seseli tortuosum*.

HASTA, Penis—*h. Virilis*, Penis.

HASTECLA, Splint.

HASTINGS, CLIMATE OF. This place has the reputation of being one of the mildest and most sheltered winter residences on the south coast of England. Owing to its low situation, and the height of the neighbouring cliffs, it is protected in a great degree from all northerly winds; and hence is found a favourable residence generally for invalids labouring under diseases of the chest.

HASTULA REGIS, *Asphodelus ramosus*.

HAUNCH, *Coxa*, *Coxen'dix*, of the Latins; $\alpha\chi\chi\eta$, or $\iota\sigma\chi\iota\omega\varsigma$, of the Greeks, *Ancha*, *Ischion*,

Hip, *Cossa*, (F.) *Hanche*. The region of the trunk which is formed by the lateral parts of the pelvis and the hip joint, including the soft parts. In woman, on account of the greater width of the pelvis, the haunches are more marked and prominent than in men.

HAUSTUS. A Draught. A liquid medicine, which can be taken at a draught.

HAUSTUS NIGER. See *Infusum sennæ compositum*.

HAUT MAL, Epilepsy.

HAVANNAH, CLIMATE OF. The climate of Cuba is often selected for the phthisical invalid during the winter months, and so far as regards elevation and comparative equability of temperature, it is more favourable for those of weak lungs, than that of the United States. The mean annual temperature is high (78°,) but the difference between the mean temperature of the warmest and coldest months is twice as great as at Madeira.

HAWKNUT, *Bunium bulbocastanum*.

HAWTHORN, WHITE, *Mespilus oxyacantha*.

HAY, CAMEL'S, *Juncus odoratus*.

HAY-ASTHMA, Fever, Hay.

HAYRIF, *Galium aparine*.

HAZEL CROTTLES, *Lichen pulmonarius*—*h. Nut tree*, *Corylus avellana*—*h. Witch*, *Hamanelis Virginiana*.

HEAD, *Sax.* $\eta\epsilon\alpha\tau\omicron\varsigma$, *hears*, *heaved*; the past participle of $\eta\epsilon\alpha\tau\alpha\iota$, 'to heave up.' *Caput*, *Cephalē*, $\kappa\epsilon\phi\alpha\lambda\eta$, $\kappa\upsilon\beta\eta$, *Cy'bē*, (F.) *Tête*. The head forms the upper extremity of the body, and tops the skeleton. It consists of the cranium and face. The first, which comprises all the superior and posterior part, has the encephalon in its cavity: the latter forms only the anterior part; and serves as the receptacle for the greater part of the organs of the senses.

HEAD, WATER IN THE, *Hydrocephalus*—*h. Ache*, *Cephalæa*, *Cephalalgia*—*h. Ache*, sick, *Cephalæa spasmodica*.

HEADY, same etymon. (F.) *Capiteux*. That which inebriates readily. An epithet, applied to wines, which possess this quality.

HEALTH, *Sanitas*.

HEARING, **HARDNESS OF**, Deafness—*h. Perverse*, *Paracusis perversa*.

HEART, *Sax.* $\eta\epsilon\alpha\tau\epsilon$, *Germ.* *Herz*, *Cor*, *Cear*, *Cer*, *Cardia*, $\kappa\epsilon\alpha\tau\omicron$, $\kappa\epsilon\alpha\tau\omicron\delta\iota\alpha$, (F.) *Cœur*. An azygous muscle, of an irregularly pyramidal shape; situate obliquely and a little to the left side, in the chest;—resting on the diaphragm by one of its surfaces;—suspended by its base from the great vessels; free and movable in the rest of its extent, and surrounded by the pericardium. The right side of the body of the heart is thin and sharp, and is called *Margo acutus*: the left side is thick and round, and termed *Margo obtusus*. It is hollow within, and contains four cavities; two of which, with thinner and less fleshy walls receive the blood from the lungs and the rest of the body, and pour it into two others, with thick and very fleshy parietes, which send it to the lungs and to every part of the body. Of these cavities, the former are called *auricles*, the latter *ventricles*. The right auricle and right ventricle form the *Palmonic* or *right* or *anterior heart*, (F.) *Cœur du poulmon*, *C. du sang noir*, *C. droit*, *C. antérieur*: and the left auricle and ventricle the *systemic*, *corporeal*, *left*, or *aortic heart*, (F.) *Cœur du corps*, *C.*

gauche, C. aortique, ou C. rouge. In the adult, these are totally distinct from each other, being separated by a partition;—the *septum Cordis*. Into the right auricle, the venæ cavæ,—superior and inferior,—and the coronary vein, open;—the pulmonary artery arises from the right ventricle—the four pulmonary veins open into the left auricle, and the aorta arises from the left ventricle. The mean weight of the heart, in the adult, from the twenty-fifth to the sixtieth year, is, according to Bouillaud, from eight to nine ounces. The dimensions, according to Lobstein and Bouillaud, are as follow:—Length, from base to apex, five inches six lines; breadth, at the base, three inches; thickness of the walls of the left ventricle, seven lines; at a fingers' breadth above the apex, four lines; thickness of the walls of the right ventricle, two and a quarter lines; at the apex, half a line; thickness of right auricle one line; of the left auricle, half a line. The heart is covered, externally, by a very thin, membranous reflection from the pericardium. The muscular structure of which it is constituted is much thicker in the parietes of the ventricle than in that of the auricles. Its cavities are lined by a very delicate membrane, the endocardium, which is continuous with the inner membrane of the arteries, as regards the left cavities; and with that of the veins, as regards the right. Its arteries—the *coronary*—arise from the commencement of the aorta. Its nerves proceed, chiefly, from the pneumogastric and the cervical ganglions of the great sympathetic. The heart is the great agent in the circulation. By its contraction, the blood is sent over every part of the body. The heart's action does not seem to be *directly* owing to nervous influence, received from the brain or spinal marrow or from both. The circulation may, indeed, be kept up, for some time, if both brain and spinal marrow be destroyed.

When the ear is applied to the chest, a dull, lengthened sound is heard, which is synchronous with the arterial pulse. This is instantly succeeded by a sharp, quick sound, like that of the valve of a bellows or the lapping of a dog, and this is followed by a period of repose. The first sound appears to be mainly produced by the contraction of the ventricles; the second by the reflux of the blood against the semilunar valves. These are what are called the *Sounds of the Heart*. Dr. C. J. B. Williams thinks that the word *lup-dup*, conveys a notion of the two sounds. The *Beating or Impulse of the heart*, against the parietes of the chest is mainly caused, perhaps, by the systole of the heart, which tends to project it forwards. It is doubted by some, whether the impulse be produced by the dilatation or the contraction of the ventricles.

The heart is subject to different organic diseases; the chief of which are *aneurism, contraction of the apertures, and rupture of its parietes*.

HEART, ATROPHY OF THE. A condition of the organ in which there is a diminution in the thickness of the parietes of the organ, rather than smallness of the whole organ.

HEART, DILATATION OF THE. See *Aneurism*—h. Neuralgia of the, Angina Pectoris.

HEART, HYPERTROPHY OF THE. *Hypertroph'ia Cordis, Hypercordia.* (F.) *Hypertrophie du Cœur.*

Supernutrition of the muscular parietes of the heart, which are thicker than usual; the cavities being generally diminished. The *physical signs* which indicate it are the following. In cases of long standing, the præcordial region is generally prominent; the pulsations of the heart are visible over a greater extent than natural; and a marked vibration is communicated to the hand when placed on the cardiac region. The dull sound on percussion is more extensive than natural; and on auscultation there is a permanent increase of the force and extent of the heart's action; there is no increase, however, of frequency, and the rhythm is regular. The pulse is generally strong, full, and hard.

HEART, HYPERTROPHY WITH DILATATION OF THE. *Active an'eurism, Eccentric hypertrophy.* In this affection, the pulsations can be seen and felt over a larger space, and the apex is more to the left and lower down than natural. The impulse is less steady, but at times more violent than what accompanies simple hypertrophy. Percussion gives more distinct evidence of the enlargement, the sound being more extensively dull. On auscultation, the impulse is often violent, but irregular: in extreme cases it produces the sensation of a large mass of flesh rolling or revolving beneath the ear. The pulse is strong, full and vibratory. The shock of the heart's action is often transmitted to the whole person, and to the bed on which he is lying.

CONCENTRIC HYPERTROPHY, Cardiacætie, is when the parietes augment at the expense of the cavities.

HEART'S EASE, *Viola tricolor*—h. Lymph, Lymphatic hearts—h. Lymphatic, Lymphatic hearts.

HEARTBURN, *Ardor ventriculi, Cardialgia.*

HEARTWORT, *Laserpitium album.*

HEAT, past participle of Sax. hæran, 'to make warm.' *Calor, Thermē, θερμ.* (F.) *Chaleur.* The material cause, which produces the sensation,—or the particular sensation itself produced by a body of an elevated temperature, on our organs, especially on the organs of touch. Modern chymists have given the name *Caloric* to the principle, whatever may be its nature, which is the cause of heat. When we touch a body of a temperature superior to our own, a portion of caloric passes from the body to the hand, and produces the sensation of *heat*. If, on the contrary, we touch a body of a temperature inferior to our own, we communicate a portion of our caloric to it, and experience the sensation of *cold*. Our own sensations are but imperfect indexes of temperature. Two men meeting at the middle of a mountain,—the one ascending, the other descending,—will experience different sensations. The one ascending, passes from a warmer to a colder atmosphere;—the one descending from a colder to a warmer. The chief instrument for measuring heat used in Medicine, is the thermometer. Of this there are three kinds;—that of Fahrenheit, that of Réaumur, and that of Celsius or the *Centigrade*. The following Table exhibits the correspondence of these different thermometric scales.

a Water boils *Barom.* 30 inches.)

b Heat of a stove, borne by Dr. Solan.

c Heat of a stove, borne for 10 minutes by Sir Joseph Banks and Dr. Solan.

d Water simmers.

e Alcohol boils.

f Ve y pure ether distils.

g Bee wax melts.

h Spermaceti melts.

i Temperature at which liquids are often drunk.

j Heat observed in Scarlatina.

k Temperature of the human body.

l Temperature of arterial blood (?)

m Temperature of venous blood.

n Phosphorus melts.

o Ether boils. *p* Nitric ether boils.

q Medium temperature of the globe.

r Ice melts.

s Milk freezes.

t Vinegar freezes.

u Strong wine freezes.

v A mixture of one part of alcohol and three of water freezes.

w Cold at the battle of Eylau 1807.

x A mixture of equal parts of alcohol and water freezes.

y A mixture of two parts of alcohol and one of water freezes.

z Melting point of quicksilver.

The human body can bear a high degree of heat diffused in the atmosphere. There are cases, on record, where air of 400° and upwards of Fahrenheit's scale, has been breathed with impunity for a short time. It can likewise withstand very severe cold. In the expedition of Capt. Back to the Arctic regions, the thermometer was as low as -70° of Fahr. Excessive heat disposes the body to gastric and intestinal diseases, and particularly to inflammation and enlargement of the liver; hence, the frequency of such affections within the torrid zone. Heat is often used therapeutically: the actual cautery, at a white heat, disorganizes the parts to which it is applied: a lesser degree occasions violent inflammation. Heat higher than that of the human body, is exciting; of a lower degree, sedative. Excessive cold acts as a powerful sedative—inducing sleep, the tendency to which, after long exposure, becomes irresistible. See Cold. Many of the topical applications—as cataplasms—act wholly by virtue of their warmth and moisture.

In Pathology;—INTERNAL HEAT, (F.) *Chaleur interne*, is a sensation of heat felt by the patient, but not sensible to the touch. *External heat*, (F.) *Chaleur extérieure*, that which can be felt by others. Heat, *Ardor*, is called *moist*, (F.) *haliteuse*, when accompanied with moisture, like that felt after bathing; *dry*, (F.) *sèche*, when the skin has not its ordinary suppleness. It is called *acrid* and *pungent*, (F.) *âcre et mordicante*, when it conveys a disagreeable tingling to the fingers. The French employ the terms *nervous heat* and *erratic heat*, *Chaleur nerveuse* and *Chaleur erratique*, for that which comes by flushes, alternating with chills, and which moves rapidly from one part to another. M. Double has used the term *septic heat*, (F.) *Chaleur septique*, for that which produces a *puante* sensation on the hand, similar to that of the acrid heat, but milder and more uniform, and which is accompanied with feebleness and frequency of pulse, &c.

HEAT, ACRID, see Acrid—h. Prickly, Lichen tropicus.

HEATH, COMMON, *Erica vulgaris*.

HEAVINESS, Somnolency.

HEAVY, *Gravis*, (F.) *Gravatif*, from Sax. heapan, 'to heave.' An epithet given to any pain, which consists in a sensation of weight or heaviness, or is accompanied by such sensation.

HEBDOMADARIA, Octanea.

HEBE, ἡβη. This word has been employed to designate, 1. The hair which grows on the pubes. 2. The pubic region, and 3. Puberty. (q. v.)

HEBETUDO DENTII, Hæmodia—h. Visus, Amblyopia, Caligo.

HEBREWS, MEDICINE OF THE. Medicine seems to have been at a very low ebb with the ancient Hebrews. Of anatomy they knew nothing. Their physiology was imperfect and filled with superstitions, and their therapeutics unsatisfactory. Hygiene appears to have been most attended to. Of the other departments of medicine we cannot judge of their knowledge.

HECTEUS, ἑκτεὺς. A Greek measure, containing about 72 chopines or pints.

HECTIC FEVER, *Febris hectica*, *Hecticopyra*, *Hecticopyretos*, *Hectica*, *Amphimerina hectica*, *Febris phthisica*, *Syntecopyra*, *Syntectico-*

pyra, *Febris marasmodes*, *Fièvre Hectique*, *F. Étique*, *Febris tabida*, *Leucopyria*, *Epanctus hectica*, *Febris lenta*, *F. amphimerina hectica*, *Febris amatoria*, *Chlorosis amatoria*, from ἑξίς, 'habit of body;' because in this disease every part of the body is emaciated; or perhaps, from ἐτιχω, 'I consume,' 'I am exhausted.' The name of a slow, continued, or remittent fever, which generally accompanies the end of organic affections, and which has been esteemed idiopathic, although it is probably always symptomatic. It is the fever of irritability and debility; and is characterized by progressive emaciation; frequent pulse; hot skin; especially of the palms of the hands and soles of the feet; and, towards the end, colliquative sweats and diarrhæa. Being symptomatic, it can only be removed by getting rid of the original affection. This is generally difficult and almost hopeless in the disease, which it most commonly accompanies—consumption.

HECTICA, Hectic Fever—h. Phthisis, Ph. pulmonalis.

HECTICOPYRA, Hectic fever.

HECTICOPYRETOS, Hectic fever.

HECTISIS, (F.) *Etisie*. Same etymon. The state of those who have hectic fever.

HECTOGRAMME, *Hectogramma*, from ἑκατον, 'a hundred,' and γραμμα. A measure of 100 grammes, i. e. 3 ounces, 1 drachm, and 44 grains, Troy.

HECTOLITRE. A measure, containing 100 litres or 26.42 wine pints.

HEDEOMA, *Hedeoma pulegioides*, *Cuni-la pulegioides*, *Pennyroyal*. *Scz. Syst. Diandria Monogynia*; *Nat. Ord. Labiata*. An indigenous plant, common in all parts of the United States, and which, where it is abundant, perfumes the air for a considerable distance. It is employed in the same cases as the mints and the English pennyroyal. In popular practice, it is used as an emmenagogue.

The *Oleum Hedeomæ* (Ph. U. S.) or Oil of Pennyroyal is used as a stimulating carminative, dropped on sugar. Dose, 2 to 6 drops.

HERERA ARBOREA, H. Helix.

HERERA HELIX, *Hedera arboorea*, *Bacchica*, *Cissos*, κισσός, *Cittos*, κίττος, *Ed'era*, *Corymbetra*, *Corymbos*. The ivy. (F.) *Lierre*. The taste of ivy leaves is bitter, styptic, and nauseous. They are not used in medicine. According to Haller, they were recommended in Germany against the atrophy of children; and the common people of England sometimes apply them to running sores and to keep issues open. The berries were supposed, by the ancients, to have an emetic and purgative quality; and a watery extract was made from them, called by Quercetanus—*Extractum purgans*. From the stalk of the tree a resinous juice exudes in warm climates, called—*Gummi Hederæ*, *Gomme de lierre*, *Resine de lierre*. It is possessed of tonic and astringent properties, but is not used.

HERERA TERRESTRIS, *Glecoma hederacea*.

HERERULA, *Glecoma hederacea*.

HEDISARUM ALKAGI, Agul.

HEDRA, ἑδρα, ἑδρη, 'a vestige.' A fracture of the bones of the cranium, in which the trace of the fracturing instrument is still perceptible. It was, also, used, by the ancients, for the anus, (q. v.) excrement, (q. v.) and for the bottom of an abscess.

HEDYSMA, Condiment.

HELCODES, Ulcerous.

HELCOMA, Ulcer.

HEL/COS, from *ἔλκος*, 'an ulcer,' (q. v.)

Hence:

HEL/COSIS, Elcosis.

HELCTICA, Epispastics.

HEL/CYD'RION, *Helcyd'rion*, *ἡλκυδριον*, *ukus'culum*, a small ulcer.—Galen, Paulus, Fœsius.

HEL/CYST'ER, from *ἔλκω*, 'I draw.' An iron hook or crotchet for extracting the fœtus. See Crotchet.

HELENIUM, *Inula helenium*.

HEL/ICINE, from *Helix*, 'the tendril of the vine.'

HELICINE ARTERIES of the penis, as described by Müller, are short vessels given off from the larger branches as well as from the finest twigs of the artery of the organ; most of those come off at a right angle, and project into the cavity of the spongy substance, either terminating abruptly or swelling out into a club-like process without again subdividing. Almost all these vessels are bent like a horn, so that the end describes half a circle or somewhat more. They have a great resemblance to the tendrils of the vine, whence their name. A minute examination of them, either with the lens or the microscope, shows that, although they at all times project into the venous cavities of the corpora cavernosa, they are not entirely naked, but are covered with a delicate membrane, which, under the microscope, appears granular.

HEL/ICIS MAJOR. A muscle of the ear, which originates from the anterior, acute part of the helix, upon which it ascends and is inserted into the helix. It pulls the part into which it is inserted a little downwards and forwards.

HELICIS MINOR. This muscle originates from the under and fore part of the helix, and is inserted into the helix, near the fissure in the cartilage, opposite the concha. Its use is to contract the fissure.

HELICOTRE'MA, from *ἑλιξ*, 'helix, cochlea,' and *τρημα*, 'a foramen.' The hole by which the two scales of the cochlea communicate at the apex.

HELIKIA, Age.

HELIOSIS, Insolation.

HELIOTROPE, *Heliotropium Europæum*.

HELIOTROPION, *Cichorium intybus*.

HELIOTROP'ION EUROPÆ'UM, *Verrucaria*. The *Heliotrope*. (F.) *Tournesol*, *Herbe aux verrues*. This plant is considered to possess aperient properties; and to be capable of destroying cutaneous excrescences; hence one of its names.

HELIX, *Capréolus*, from *εἰλεῖν*, 'to envelop,' 'surround.' The fold is thus called, which forms the outer circumference or ring of the external ear.

HELIX, Limax.

HELIX POMATIA. A large kind of snail, transported from the south of Europe to England by Sir Kenelm Digby for his lady, when in a decline. It was considered highly restorative.

HELLEBORASTER, *Helleborus fœtidus*.

HELLEBORE, AMERICAN, *Veratrum viride*—h. Black, *Helleborus niger*—h. Blanc, *Veratrum album*—h. Noir, *Helleborus niger*—

h. Stinking, *Helleborus fœtidus*—h. Swamp, *Veratrum viride*—h. White, *Veratrum album*.

HELLEBORIS'MUS or ELLEBORIS'MUS.

The method of treating diseases, amongst the ancients, by hellebore. This comprised not only the choice, preparation, and administration of the medicine, but, likewise, the knowledge and employment of preliminary precautions and remedies, proper for aiding its action, and preventing the pernicious effects which it might occasion.

HELLEBORUS, H. Niger—h. Albus, *Veratrum album*.

HELLEBORUS FÆTIDUS, *Helleboraster*, *Elleboraster*, *Stinking Hellebore* or *Bear's Foot*. (F.) *Hellébore ou Ellébore fétide*, *Pied de Griffon*. The leaves of this plant are said to be anthelmintic. The smell of the fresh plant is extremely fetid, and the taste bitter and acrid. It usually acts as a cathartic.

HELLEBORUS NIGER, *Melampodium*, *Ec'tomon*, *εκτομον*, *Black Hellebore*, *Christmas Rose*. (F.) *Hellébore noir*. The root of this European plant—*Helleborus*, (Ph. U. S.)—has a disagreeable odour, and bitter, acrid taste. It is possessed of cathartic properties, and has been recommended as an emmenagogue. It has been given in mania, melancholia, dropsy, suppressed menses, &c. Dose, gr. x. to ℥j, as a cathartic.

HELMIN'THAGOGUES, *Helminthago'ga*, *Helmin'thics*, from *ἑλμινς*, 'a worm,' and *αγν*, 'I expel.' Remedies, used against intestinal worms;—*Anthelmin'thics*, *Ver'mifuges*.

HELMINTHI, Worms.

HELMINTHIA, Helminthiasis—h. Alvi, Worms.

HELMINTHIA ERRAT'ICA. Worms, introduced by accident and without finding a proper habitation in the stomach or intestines; producing spasmodic colic, with severe tormina, and occasionally vomiting or dejections of blood; the 12th genus of the order *Enterica*, class *Caliaca*, of Good.

HELMINTHIA PODICIS, Worms.

HELMINTHIASIS, from *ἑλμινς*, 'a worm.'

A generic name for the condition which gives occasion to the presence of intestinal worms. It is, also, called *Helmin'thia*, *Vermina'tio*, *Morb'us vermino'sus*, *Status vermino'sus*, *Sabur'ra vermino'sa*, *Scolec'i'asis*, *Parasitism'us intestind'lis*, *Worm disease*, *Invermination*. See Worms.

HELMINTHICS, Helminthagogues.

HELMINTHO-CORTON, *Corallina Corsicana*.

HELMINTHOL'OGY, *Helmintholog'ia*, from *ἑλμινς*, 'a worm,' and *λογος*, 'a description.' A treatise on worms.

HELMINTHOPYRA, *Helminthopyr'et'os*, from *ἑλμινς*, 'a worm,' and *πυρ*, 'a fever.' Fever occasioned by worms. See Fever, verminous.

HELMINTHOPYRETOS, *Helminthopyra*.

HELMINTHUS GORDII, *Seta equina*.

HELODES, Elodes.

HELOPYRA, *Elodes* (febris.)

HELOPYRETOS, *Elodes* (febris.)

HELOS, *Clavus*, Marsh.

HELO'SIS, *Helot'is*: from *εἰλω*, 'I turn.' Inversion of the eyelids, and convulsions of the muscles of the eye.

HELOTIS, *Helosis*, *Plica*.

HELXINE, *Parietaria*.

HEMACHROIN, Hæmatin.

HÉMAPERITONIRRHAGIE, *Hæmaperitonirrha'gia*; from *αἷμα*, 'blood,' *peritonæum*, and *ρηγνύμι*, 'I break forth.' Hemorrhage into the peritoneum.

HEMATIN, Hæmatin.

HÉMATONCIE, *Hæmatoncus*, see *Hæmatodes Fungus*—*h. Fongoïde*, *Hæmatodes fungus*.

HEMATOPISIE, *Hæmatops*.*HEMATOSIN*, Hæmatin.

HEMERA, *ἡμερα*, 'a day,' Dies. (q. v.) Hence:

HEMERALOPIA. See *Nyctalopia*.

HEMERALOPIA, from *ἡμερα*, 'the day,' and *οπτομαι*, 'I see.' *Dys'opia Tenebra'rum*, *Call'go tenebra'rum*, *Parop'sis Noctif'uga*, *Visus diurnus*, *Nyctalopia*, (of some,) *Ambly'opia crepuscularis*, *Cæcitas crepuscularis*, *Acies diurna*, *Day-sight*, *Day vision*, *Hen blindness*. *Night blindness*. (F.) *Vue diurne*, *Areuglement de Nuit*. A disease, in which the eyes enjoy the faculty of seeing, whilst the sun is above the horizon: but are incapable of seeing by the aid of artificial light. Its causes are not evident. The eye, when carefully examined, presents no alteration, either in its membranes or humours.

HEMERALOPS, *Dorea*. One labouring under hemeralopia.

HEMEROPATHIA from *ἡμερα*, 'a day,' and *πάθος*, 'an affection.' A disease, which continues only a day; or, which is only observed during the day.

HEMI, *ἡμι*, *ἡμισυς*, 'half,' 'semi.' Hence: *HEMICEPH'ALUS*, from *ἡμι*, 'half,' and *κεφαλή*, 'head.' One who has half a head.

HEMICRA'NIA, *Migra'na*, *Grana*, *Hemip'gia*, *Hemipe'gia*, *Heterocra'nia*, *Monopa'gia*, *Cephala'ia Hemicra'nia*, *Megrim*, from *ἡμισυς*, 'half,' and *κρανιον*, 'cranium.' (F.) *Migraïne*. Pain, confined to one half the head. It is almost always of an intermittent character;—at times, continuing only as long as the sun is above the horizon; and hence sometimes called *Sun pain*,—and is cured by cinchona, arsenic, and the remedies adapted for intermittents.

HEMICRANIA IDIOPATHICA, Neuralgia, facial.

HEMIEC'TON, *HEMIEC'TEON*, *Semisæx'tum*. A vessel, capable of containing 36 chopines or pints, and in which fumigations were made in diseases of the uterus and vagina.—Hippocr.

HEMIMERION, from *ἡμισυς*, and *μερος*, 'a part.' 'One half.'—Foësius. Also, half a drachm.—Erolian.

HEMINA. A Greek measure, answering to the *Cotyle*, *ζωτυλη*, i. e. one half the sextarius, or about half a pint. English.

HEMIOB'OLION, or *HEMIOB'OLON*. Half the obolus. A weight of about five grains. Gortæus.

HEMIO'LION. A weight of 12 drachms, or oz. 13.—Galen. See *Sescuncia*.

HEMIO'PIA, *Hemio'pis*, *Visus dimidia'tus*, *Marmor'ygè Hippoc'ratis*, from *ἡμισυς*, 'one half,' and *οπτ'μαι*, 'I see.' Depraved vision, in which the person sees only one half of an object.

HEMIOPSIS, *Hemiopia*.

HEMIPAG'ES, *Dicor'uphus dihypogast'rius*, *Octopus synaphecephalus*, from *ἡμι*, 'half,' and *πηγνυμι*, 'I fasten.' A monstrosity, in which twins are united from the navel to the vertex.—I. G. Saint Hilaire.

HEMIPAGIA, *Hemicrania*.*HEMIEGIA*, *Hemicrania*.

HEMIPLE'GIA, *Hemiple'gia*, *Paral'ysis Hemiplegia*, *Epiple'gia*, from *ἡμισυς*, 'one half,' and *πλίσσω*, or *πλῆττω*, 'I strike.' Paralysis of one side of the body. See *Paralysis*. One, so palsied, is said to be *hemiple'gic*, *semi-sidera'tus*.

HEMIPLEXIA, *Hemiplegia*.

HEM'ISPHERE, *Hemisph'rium*; from *ἡμισυς*, 'one half,' and *σφαῖρα*, 'a sphere.' One half of a sphere or of a body having a spheroidal shape. The *hemispheres of the brain* are the upper spheroidal portions of the brain, separated from each other by the *falx cerebri*.

HÉMITE, *Hæmitis*.

HEMITRITÆ'IA, *Semi-tertia'na*, *Fièvre demitierce*, *Febris sesquial'tera*. (F.) *Semi-tierce*. A semi-tertian fever, so called because it seems to possess both the characters of the tertian and quotidian intermittent.—Galen, Spigelius.

HEMIUN'GION, *Semun'cia*. Half an ounce.

HEMLOCK, *Conium maculatum*—*h. Bastard*, *Chærophyllum sylvestre*—*h. Common*, *Conium maculatum*—*h. Dropwort*, *Ænanthe*—*h. Pitch*, see *Pinus Canadensis*—*h. Water*, fine-leaved, *Phellandrium aquaticum*—*h. Water*, *Cicuta aquatica*.

HEMLOCK GUM, see *Pinus Canadensis*.

HEMLOCK SPRUCE, *Pinus Canadensis*.

HÉMO-ENCEPHALORRHAGIE, *Apoplexy*.

HÉMOHÉPATORRHAGIE, *Hepatorrhagia*.

HÉMOMYELORRHAGIE, *Apoplexy*, *spinal*.

HÉMOPTYSIE, *Hæmoptysis*.

HEMORRHAGE, *Hæmorrhagia*—*h. From the bladder*, *Cystirrhagia*—*h. From the pituitary membrane*, *Epistaxis*—*h. Spinal*, *Apoplexy*, *spinal*—*h. Uterine*, *Metrorrhagia*.

HEMORRHAGIC PLEURISY, *Hæmatothorax*.

HÉMORRHAGIE BUCCALE, *Stomatorrhagia*—*h. Cérébrale*, *Apoplexy*—*h. du Foie*, *Hepatorrhagia*—*h. des Intestins*, *Hæmatocœzia*—*h. de la Matrice*, *Metrorrhagia*—*h. Nasale*, *Epistaxis*—*h. de la Vessie*, *Cystirrhagia*.

HÉMORRHOIDES, *Hæmorrhôis*—*h. Aveugles*, *Cæcæ hæmorrhoides*.

HÉMOSPASIE, *Hæmospasia*.*HÉMOSPASIQUE*, *Hæmospastic*.

HEMP, *INDIAN*, *Apocynum cannabinum*, *Bangæ*.

HEMPSEED. See *Cannabia sativa*.

HEN-BLINDNESS, *Hemeralopia*.

HENBANE, *Hyoscyamus*.

HENNÉ, *Lawsonia inermis*.

HENRICEA PHARMACEARCHA, *Gentiana Chirayita*.

HENRICUS RUBENS, *Colcothar*.

HEPAR, *ἥπαρ*, 'genitive,' *ἥπατος*, 'liver,' (q. v.) The ancient name for the *liver of sulphur*, *Hepar sulphuris*; which is sometimes a compound of sulphur and potassium; at others, of sulphur and potassa. See *Potassæ Sulphuretum*.

HEPAR ANTIMONIA'TUM is a compound of a sulphuret of antimony and an alkali. See *Oxydum Stibii Sulphuretum*.

HEPAR MARTIA'LE. A compound of sulphuret of potass and an oxide of iron.

HEPAR SANGUINIS, see *Blood*—*h. Sulphuris salinum*, *Potassæ sulphuretum*—*h. Sulphuris volatile*, *Ammonix sulphuretum*—*h. uterinum*, *Placenta*.

HEPATAL'GIA, from *ἥπαρ*, 'liver,' and *άλγος*, 'pain.' Pain in the liver. Neuralgia of the liver, (F.) *Névralgie du Foie*.

HEPATALGIA PETITIANA, Turgescentia vesiculæ felleæ—h. Phlegmonoides, Hepatitis.

HEPATAPOSTE'MA, from *ἥπαρ*, 'the liver,' and *ἀποστήμα*, 'an abscess.' Abscess of the liver.

HEPATARIUS, Hepaticus.

HEPATEMPHRAX'IS, from *ἥπαρ*, 'liver,' and *ἐμφράσσειν*, 'I obstruct.' Hepatic obstruction.—Ploucquet.

HEPATEROS, *Hepaticus, Jecora'rius*. A variety of diarrhœa, *Fluxus hepaticus*.—Gorræus.

HEPAT'IC, *Hepaticus, Hepat'arius, Jecora'rius*, from *ἥπαρ*, 'the liver.' Belonging or relating to the liver.

HEPATIC AR'TERY, *Artēria Hepat'ica*, one of the three branches given off by the celiac. It passes towards the inferior surface of the liver; where it divides into two branches, a *right* and *left*, which proceed towards the corresponding parts of that organ. The right branch gives off the cystic artery. Before dividing, the hepatic artery sends off two considerable branches, the *A. pylorica* and *A. Gastro-epiploica dextra*.

HEPATIC DUCT, (F.) *Canal hépatique, Ductus hepaticus*, is about three fingers' breadth in length, and of the size of a quill. It is formed by the union of the biliary ducts, and joins the cystic duct at a very acute angle, to form the ductus choledochus. Its function is to convey the bile from the liver towards the duodenum.

HEPATIC PLEXUS, *Plexus hepaticus*, consists of nervous filaments, sent by the celiac plexus to the liver, which accompany the hepatic artery.

HEPATIC VEINS or *Supra hepatic veins, Vena cava hepatica, Intra-lobular veins*, do not follow the course of the arteries of the same name. They arise in the substance of the liver; converge towards the posterior margin of that viscus, and open into the vena cava inferior. They convey away the blood carried to the liver by the hepatic artery and vena porta.

HEPATICA. A name formerly given to medicines which were believed capable of removing diseases of the liver.

HEPATICA, *Anemone hepatica*, see *H. triloba*—h. *Americana*, *H. triloba*—h. *Fontana*, *Marchantia polymorpha*—h. *Nobilis*, *Anemone hepatica*—h. *Stellata*, *Asperula odorata*.

HEPATICA TRIL'OBÆ, *H. America'na, Trifolium aurum, Liverwort*, (F.) *Hépatique des jardins*. This plant—*Hepatica* (Ph. U. S.)—is a gentle astringent, but not possessed of much virtue.

HEPATICUS, *Hepateros*—h. *Flos, Anemone hepatica*.

HEPATIQUE ÉTOILÉE, *Asperula odorata*—h. *des Fontaines*, *Marchantia polymorpha*—h. *des Jardins*, *Hepatica triloba*.

HEPATIRRHO'E'A, *Fluxus hepaticus, Dysenteria hepatica, Diarrhœa hepatica, Hepatorrhœgia, Hemat'era, Aimat'era*, (F.) *Flux hépatique*; from *ἥπαρ*, 'the liver,' and *ῥέω*, 'I flow.' A species of diarrhœa in which the excreted matters seem to come from the liver, or are much mixed with bile, &c.

HEPATIS EUNCTORIA, *Inguen*—h. *Suspensorium, Ligament, suspensory*, of the liver.

HEPATIT'IS, *Empres'ma hepati'tis, Inflam-*

mat'io hep'atis, I. Jecind'ris, Febris hepatica inflammato'ria, Hepat'algia phlegmonoides, Inflammation of the liver. (F.) *Hépatite, Inflammation du foie, Pîcèe (Prociual)*. It may be seated either in the peritoneal covering, *Sero-hepatis*, or in the substance of the liver, or in both, *Puro-hepatis*, and may be acute or chronic. The peculiar symptoms are;—pain in the right hypochondrium, shooting to the back and right shoulder, and increased on pressure; difficulty of lying on the left side; sometimes jaundice and cough, and synocha. Its termination is generally by resolution: in tropical climates it often runs on to suppuration; the abscess breaking either externally, or forming a communication with the intestines or chest, or breaking into the cavity of the abdomen. The causes are those of inflammation in general. Heat predisposes to it; hence its greater frequency in hot climates. On dissection of those who have died of it, the liver has been found hard and enlarged; colour of a deep purple; or the membranes have been more or less vascular: or adhesions, or tubercles, or hydatids, or abscesses, or biliary calculi have been met with. The treatment must be bold. Bleeding, general and local fomentations, blisters, purgatives, and the antiphlogistic regimen. In hot climates especially, a new action must be excited by mercury as early as possible.

CHRONIC HEPATITIS, *Hepati'tis chron'ica, Inflammatio hep'atis lenta, Hepatitis occulta, Chrono-hépatite, or Chronic liver disease*, is not as common as is believed. It may be suspected from the existence of the symptoms above mentioned, but in a minor degree; with enlargement and constant dull pain in the region of the liver; sallow countenance; high-coloured urine; clay-coloured fæces, &c. The great object of treatment is, to excite a new action by mercury and counter-irritants, and to keep the liver free by cathartics.

HEPATITIS OCCULTA, *H. chronic*.

HEPATIZA'TION, *Hepatisa'tio*, from *ἥπαρ*, 'the liver.' Conversion into a liver-like substance. *Spleniza'tion*. Applied to the lungs when gorged with blood or plastic matters, so that they are no longer pervious to the air. In such state they are said to be *hepatized*.

HEPATOCE'LE, from *ἥπαρ*, 'the liver,' and *κῆλη*, 'a tumour.' *Hernia of the Liver*. The liver has never been found entirely out of the abdominal cavity. Increase of its bulk or injuries of the parietes of the abdomen have been the sole cause of the protrusions, which have been occasionally met with, especially in infants, in whom the upper part of the linea alba is very weak, and indeed scarcely seems to exist. Sauvages has distinguished two species of hepatocèle:—the *ventral* (in the linea alba), and the *umbilical* or *hepatomphalum*.

HEPATOCO'LICUM. A ligament of the liver, described by Haller, as passing from the gall-bladder and contiguous sinus portarum, across the duodenum to the colon. Another, termed *Hepato-renal*, descends from the root of the liver to the kidney. They are both peritoneal.

HEPATOGASTRIC, *Gastrohepatic*.

HEPATOG'RAPHY, *Hepatogra'phia*; from *ἥπαρ*, 'the liver,' and *γραφειν*, 'a description.' The part of Anatomy which describes the liver.

HEPATOHÆ'MIA, *Hyperæ'mia hep'atis,*

Hepatic Engorgement, (F.) *Hyperémie du Foie*, from 'ἥπαρ, 'the liver,' and 'αἷμα, 'blood.' Congestion of the liver.

HEPATOL'OGY, *Hepatology*, from 'ἥπαρ, 'the liver,' and 'λογος, 'a discourse,' 'treatise.' A treatise on the liver.

HEPATOMALAC'IA, *Malaco'sis hepatis*, (F.) *Ramollissement du Foie*. Softening of the liver.

HEPATON' CUS, from 'ἥπαρ, 'the liver,' and 'ογκος, 'a tumour.' Tumefaction of the liver.

HEPATOPAREC'TAMA, from 'ἥπαρ, 'the liver,' and 'παρεκταμα, 'considerable extension.' Augmentation of the liver.

HEPATOPATHIE CANCÉREUSE, *Hépatosarcomie*—*h. Tuberculeuse, Hépatostrombosie*.

HEPATORRHAGIA, *Hepatirrhæa*, (q. v.) Also Hemorrhage from the liver, *Hæmorrhag'ia hepatis*, *Apoplex'ia hepatica*, (F.) *Hémorrhagie du Foie, Hémohépatorrhagie*.

HEPATOSARCOMIE, from 'ἥπαρ, 'the liver,' and *Sarcoma* (q. v.), *Hépatopathie cancéreuse, Encephalosis of the liver, Carcinoma of the liver*, (F.) *Cancer du Foie*. Cancer of the liver.

HEPATOSTROMOSIE, *Tubercula hepatis*, (F.) *Tubercules du Foie, Hépatopathie tuberculeuse*; from 'ἥπαρ, 'the liver,' and *struma*, 'a tumour,' 'a scrophulous tumour.' Tubercles of the liver.

HEPATOT'OMY, from 'ἥπαρ, 'the liver,' and 'τεμνω, 'I cut.' Dissection of the liver.

HEPIALOS, *Epialos*.

HEPS. See *Rosa canina*.

HEPTAPHARMACUM, from 'ἑπτα, 'seven,' and 'φάρμακον, 'a remedy.' A medicine, composed of seven substances; cerusse, litharge, pitch, wax, colophony, frankincense, and bullock's fat. It was regarded as laxative, suppurative, and healing.

HERACLEUM, see *H. lanatum*—*h. Gummi-ferum*. See *Ammoniac gum*.

HERACLE'UM SPONDYL'IUM, *Branca ursina Germanica, Spondylium, Cow Parsnep, All-heal*, (F.) *Berce, Branc-ursine, bâtarde, Fausse Acanthe*. Family, Umbelliferae. Sex. Syst. Pentandria Digynia. The root of this plant has a strong, rank-smell; and a pungent, almost caustic taste. It has been given as a tonic, stomachic, and carminative; both in powder and in decoction. The Russians, Lithuanians, and Poles obtain from its seeds and leaves, by fermentation, a very intoxicating spirituous liquor, which they call *Parst*.

The root of the HERACLE'UM LANA'TUM or *Masterwort*,—*Heracleum* (Ph. U. S.)—is in the secondary list of the Pharmacopœia of the United States.

HERB. *Herba*.

FIVE CAPILLARY HERBS, *Quinque herbæ capillares*, were hart's tongue, black, white, and golden maiden-hair, and spleenwort.

FIVE EMOLLIENT HERBS, *Quinque herbæ emollientes*, were, anciently;—beet, mallow, marsh-mallow, French mercury, and violet.

HERB OF GRACE, *Gratiola officinalis*—*h. Mastich*, common, *Thymus mastichina*—*h. Mastich*, Syrian, *Teucrium marum*—*h. Robert*, *Geranium Robertianum*—*h. of Saint Cune-gonde*, *Eupatorium Cannabinum*—*h. Sophia*, *Sisymbrium sophia*—*h. Trinity*, *Anemone Hepatica*.

HERBA ALEXANDRINA, *Smyrniolum olusatrum*—*h. Benedicta*, *Geum Urbanum*—*h. Britannica*,

Rumex hydrolapathum—*h. Canni*, *Artemisia santonica*—*h. Cardiaca*, *Leonurus cardiaca*—*h. Cardui veneris*, *Dipsacus fullonum*—*h. Dorea*, *Solidago virgaurea*—*h. Felis*, *Nepeta*—*h. Genipi*, *Achillea atrata*—*h. Ignis*, *Lichen pyxidatus*—*h. Melancholifuga*, *Fumaria*—*h. Militaris*, *Achillea millefolium*—*h. Papillaris*, *Lapsana*—*h. Patæ lapinæ*, *Leonurus cardiaca*—*h. Pulicaris*, *Plantago psyllium*—*h. Quercini*, *Lichen plicatus*—*h. Sacra*, *Verbena officinalis*—*h. Salivaris*, *Anthemis pyrethrum*—*h. Sideritidis*, *Galeopsis grandiflora*—*h. Tabaci*, *Nicotiana tabacum*—*h. Trinitatis*, *Anemone hepatica*—*h. Trinitatis*, *Viola tricolor*—*h. Ventis*, *Anemone Pulsatilla*—*h. Zazarhendi*, *Origanum*.

HERBÆ PRO ENEMATE, *Glyster herbs*—*h. pro fotû*, Fomentation herbs.

HERBALIST, Herborist.

HERBARIUS, Herborist.

HERBE AUX CHANTRES, *Erysimum*—*h. aux Charpentiers*, *Justitia pectoralis*—*h. aux Chats*, *Nepeta*, *Teucrium marum*—*h. au Coq*, *Tanacetum balsamita*—*h. aux Cuillers*, *Cochlearia officinalis*—*h. aux Écrouelles*, *Scrophularia nodosa*—*h. aux Ecus*, *Lysimachia nummularia*—*h. à Eternuer*, *Achillea ptarmica*—*h. aux Gueux*, *Clematis vitalba*—*h. à la Houette*, *Asclepias Syriaca*—*h. aux Mamelles*, *Lapsana*—*h. aux Mouches*, *Conyza squarrosa*—*h. au Pauvre homme*, *Gratiola officinalis*—*h. aux Perles*, *Lithospermum officinale*—*h. à la Poudre de Chypre*, *Hibiscus abelmoschus*—*h. aux Poux*, *Delphinium staphisagria*—*h. aux Puces commune*, *Plantago psyllium*—*h. à Robert*, *Geranium Robertianum*—*h. de Sainte Barbe*, *Erysimum barbarea*—*h. de Saint Étienne*, *Circæa lutetiana*—*h. de Saint Jean*, *Artemisia vulgaris*—*h. de Saint Roch*, *Inula dysenterica*—*h. aux Sorciers*, *Circæa Lutetiana*—*h. aux Verrues*, *Heliotropium Europæum*.

HERBIV'OROUS, *Herbiv'orus*, from *herba*, 'grass,' and *oro*, 'I eat.' An epithet applied to animals which feed on herbs.

HERBORIST, *Herbarius*. One who deals in useful plants. An *Herbalist* or *Herbarist*.

HERBORIZATION, *Herbarum inquisitio*. An excursion, made with the view of collecting plants. Such excursions are directed by the Apothecaries' Company of London, for the use of their apprentices, &c.

HERCULES ALLHEAL, *Pastinaca opoponax*.

HERED'ITARY, *Heredita'rius*, *Gentilius Symphytos*, *Syn'genes*, from *hæres*, 'an heir.' An epithet given to diseases, communicated from progenitors. Such diseases may exist at birth; or they may supervene at a more or less advanced period of existence.

HERMAPHRODITE, *Hermaphrodis'mus*, *Hermaphrodis'm*; from 'Ερμης, 'Mercury,' and Αφροδιτη, 'Venus.' Appertaining to Mercury and Venus. Union of the two sexes in the same individual.

HERMAPH'RODITE. Same etymon. *Hermaphroditus*, *Gyn'da*, *Androg'ynus*. One, who possesses the attributes of male and female: who unites in himself the two sexes. A term, applied to an animal or plant which is, at the same time, both male and female. True hermaphrodites are only met with in the lower degrees of the animal scale, amongst the zoophytes, mollusca, or gasteropodes. The individuals of the human species, regarded as her-

maphrodites, owe this appearance to a vicious conformation of the genital organs: a kind of monstrosity, which renders them unfit for generation, although an attentive examination may exhibit the true sex. Hermaphrodites have, likewise, been described, who, instead of uniting the attributes of both sexes, cannot be considered male or female. These have been called *neutral hermaphrodites*.

HERMETICA DOCTRINA, (F.) *Hermétique*. The doctrine of Hermes, a celebrated Egyptian philosopher, who is considered the father of Alchemy. That part of chymistry, whose object was the pretended transmutation of the metals.

HERMODACTYLUS, *Dactylus*, *Anima articulorum*, from *Ἑρμης*, 'Mercury,' and *δακτύλος*, 'a finger;' or rather from *Hermus*, a river in Asia, upon whose banks it grows, and *δατύλος*, 'a date;' or from *Ἑρμης*, 'Mercury,' and *δατύλος*, 'a date.' (F.) *Hermodactyle*, *Hermodule* ou *Hermodate*. The root of the *Hermodactyl* was formerly used as a cathartic. By some it is supposed to be identical with the *Iris tuberosa*. The best testimony seems to be in favour of its being a variety of the colchicum,—the *Colchicum Illyricum*.

HERMODATE, *Hermodactylus*.

HERNIA, *Rumex*, *Ruptura*, *Crepatura*, *Ectopia herniosa*, *Celē*, *Rupture*. (F.) *Hirgne*, *Descente*, *Effort*, *Greveure*, *Rompure*. Any tumour, formed by the displacement of a viscus or a portion of a viscus, which has escaped from its natural cavity by some aperture and projects externally. *Herniæ* have been divided into,—1. *Hernia of the Brain*; *Encephalocele*; 2. *Hernia of the Thorax*; *Pneumocele*; 3. *Hernia of the Abdomen*.

Abdominal Herniæ are remarkable for their frequency, variety, and the danger attending them. They are produced by the protrusion of the viscera, contained in the abdomen, through the natural or accidental apertures in the parietes of that cavity. The organs, which form them most frequently, are the intestines and the epiploon. These *herniæ* have been divided, according to the aperture by which they escape, into:

1. *Inguinal Hernia* or *Supra-Pubian*. These issue by the inguinal canal; they are called *Bubonocele*, when small; and *Scrotal Hernia* or *Oscheocele*, in man, when they descend into the scrotum;—*Vulvar Hernia* or *Pudenda* or *Labial Hernia*, *Episiocele* in women, when they extend to the labia majora. 2. *Crural* or *Femoral Hernia*, *Mérocele*, when they issue by the crural canal. 3. *Infra-Pubian Hernia*, (F.) *Hernia souspubienne*, where the viscera escape through the opening, which gives passage to the infrapubian vessels. 4. *Ischiatic Hernia*: when they take place through the sacro-sciatic notch. 5. *Umbilical Hernia*, *Emphalus*, *Omphalocele*; which occurs at the umbilicus or near it. 6. *Epigastric Hernia*;—occurring through the linea alba, above the umbilicus. 7. *Hypogastric* or *Infra umbilical Hernia*, *Celiocele*, *Hypogastrocele*,—which occurs through the linea alba, below the umbilicus. 8. *Perineal Hernia*; *Mesoscelocele*,—which takes place through the levator ani, and appears at the perineum. 9. *Vaginal Hernia*;—through the parietes of the vagina. 10. *Diaphragmatic Hernia*: which passes through the diaphragm.

Herniæ are likewise distinguished,—accord-

ing to the viscera forming them.—into *Enterocèle*, *Epiplocele*, *Enteron epiplocele*, *Gastrocele*, *Cystocèle*, *Hepatocele*, *Splenocèle*, &c.

CONGENITAL HERNIA, *Hernia congenita*, is a protrusion of some of the contents of the abdomen into the *Tunica vaginalis testis*, owing to a want of adhesion between its sides, after the descent of the testicle.

When a hernia can be restored to its natural cavity, by the aid of pressure, &c., properly applied, it is said to be *reducible*. It is, on the contrary, *irreducible*, when adhesion, bulk, &c. oppose its return. When the aperture, which has given passage to the hernia, occasions more or less constriction on the protruded portion, the hernia is said to be *incarcerated* or *strangulated*: and, if the constriction be not removed, constipation, hicough, vomiting, and all the signs of violent inflammation, followed by gangrene, supervene, with alteration of the features, small pulse, cold extremities, and death.

The therapeutical indications are,—1. *As regards reducible hernia*;—to replace the viscera in the abdomen by the taxis; and to retain them there by the use of a truss, which, if properly adapted, may effect a radical cure. 2. *As regards irreducible hernia*;—to support the tumour by an appropriate suspensory bandage. 3. *As regards strangulated hernia*;—to have recourse to the taxis; blood-letting; warm bath; tobacco glysters; ice to the tumour; and, if these should not succeed, to perform an operation, which consists in dividing the coverings of the hernia, and cutting the aponeurotic ring, which causes the strangulation;—reducing the displaced viscera, unless their diseased condition should require them to be retained without;—dressing the wound appropriately, restoring the course of the feces by means of gentle glysters;—preventing or combating inflammation of the abdominal viscera;—conducting the wound to cicatrization, by appropriate means; and afterwards supporting the cicatrix by a bandage.

HERNIA ANEURISMAL, *Cirsomphalus*—h. *Arteriarum*, see *Aneurism*—h. of the Bladder, *Cystocele*—h. *Bronchialis*, *Bronchocele*—h. *Carnosa*, *Sarcocele*—h. of the Cerebellum, *Parocephalocele*—h. *Cerebri*, *Encephalocele*—h. *Cornæ*, *Ceratocele*—h. *Crural*, *Merocele*—h. *Epiploicæ*, *Epiplocele*—h. *Femoral*, *Merocele*—h. *Guttræ*, *Bronchocele*.

HERNIA HUMORALIS, *Empresma Orchitis*, *Didymitis*, *Orchitis*, *Inflammatio testium*, *Inflammatio of the Testicle*, *Scalld Testicle*, *Hernia venæris*, *Orchiocele*, *Orchidocele*, *Orchiduncus*, *Inflammation du testicule*. Swelling and inflammation of the testicle is a common symptom of gonorrhœa; but it may arise from external injuries, or from other causes. It is a disease, which cannot be mistaken, and the treatment must obviously be strongly antiphlogistic, supporting the testicle during the treatment, and for some time afterwards: methodical compression has also been found useful. The disease is not generally of a serious character, going off as suddenly as it comes on. As it affects the epididymis more especially, when supervening on gonorrhœa or blennorrhœa, it is sometimes termed *blennorrhagic epididymitis*.

HERNIA INGUINALIS, *Bubonocele*—h. *Intestinalis*, *Enterocèle*—h. *Ischiatica*, *Ischiocele*—h. of the Liver, *Hepatocele*—h. *Omental*, *Epiplocele*—h. *Parorchido-enterica*, *Parorchido-ente-*

rocele.—h. Pharyngis, Pharyngocele.—h. Phrenic, Diaphragmatic hernia.—h. of the Pleura, Pleurocele.—h. Pudendal, Pudendal hernia.—h. Sacci lacrymalis, Lachrymal hernia.—h. Scrotalis, Scrotocele.—h. Seminalis scroti, Spermatocele.—h. of the Stomach, Gastrocele.—h. Suprapubic, H. inguinal.—h. of the Tongue, Glossocele.—h. Umbilicalis, Epiplophalon, Exomphalos.—h. Varicose, Cirsocele.—h. Varicosa, Varicocele.—h. Venarum, Varix.—h. Veneris, Hernia humoralis.—h. Ventosa, Physocele.—h. Ventriculi, Gastrocele.—h. Zirbalis, Epiplocele.

HERNIA LITRICA, *H. e Diverticulo Intestini*. Hernia first described by Litre, in which the proper caliber of the intestinal canal is not included in the hernial sac, the protruded portion of intestine consisting of a digital prolongation of the ilium, which Litre concluded was formed by the gradual extension of a knuckle of the bowel, that had been engaged in the inguinal canal.

HERNIAIRE, Hernial, Herniaria glabra.

HERNIAL, *Herniarius*, (F.) *Herniaire*. Belonging to, or concerning, hernias:—as *Hernial Bandage*, *Hernial Sac*, &c.

The (F.) *Hernie*, is applied to a part enveloped in a hernial sac; *Hernieux* means one affected with hernia; and *Chirurgien herniaire*, one who devotes himself to the treatment of hernia.

HERNIA'RIA GLABRA, *Milligrana*, *Em'petrum*:—*Ruptur-e-wort*, from *hernia*, 'rupture.' (F.) *Herniaire*, *Tarquette*, *Herniole*. This plant, which, as its name imports, was formerly considered efficacious in the cure of hernia, seems destitute of all virtues.

HERNIE CHARNUE, Sarcocoele.—h. de l'Epiploon, Epiplocele.—h. de l'Estomac, Gastrocele.—h. Inguinale, Bubonocoele.—h. du Nombril, Exomphalos.—h. Omphalique, Exomphalos.—h. de la Vessie, Cystocoele.

HERNIE, Hernial.

HERNIEUX, Hernial.

HERNIOLE, Herniaria glabra.

HERNIOT'OMY, *Herniotomia*, from *hernia*, and *τεμνω*, 'I cut.' The operation for hernia.

HERPES, *Erpes*, from *εργω*, 'I creep;' because it creeps and spreads about the skin. *Ephylis Herpes*, *Cytis'ma Herpes*, *Tetter*, *Fret*, (F.) *Dartre*, *Olophlyctide*. A vesicular disease, which, in most of its forms, passes through a regular course of increase, maturation, decline, and termination in about 10 or 14 days. The vesicles arise in distinct, but irregular clusters, which commonly appear in quick succession, and near together, on an inflamed base; generally attended with heat, pain, and considerable constitutional disorder. The term, like all others which refer to cutaneous diseases, has not been accurately defined. The ancients had three varieties; the *miliary*, *κεχρηταιος*; *vesicular*, *φλυκταινωδης*; and *eru'ding*, *εσθιομενος*. Bateman has the following varieties. 1. HERPES PHLYCTEROIDES, *Herpes miliaris*, *Ephylis Herpes Miliaris*, (F.) *Dartre phlyctenoïde*, in which the vesicles are millet-sized; pellucid; clusters commencing on an uncertain part of the body, and being progressively strewed over the rest of the surface; succeeded by fresh crops. 2. HERPES

ZOSTER, *Zoster*, *Zona ignea*, *Z. serpiginea*, *Ignis Per'sicus*, *Cinzilla*, *Sacer ignis*, *Ephylis Herpes zoster*, *Herpes peris'celis*, *Erysip'elas zoster*, *Erysip'elas phlyctanoïdes*, *E. pustulosa*, *Zona*, (F.) *Ceinture*, *C. dartreuse*, *Feu Persique*, *Erysipèle pustuleux*, *Shingles*: in which the vesicles are pearl-sized; the clusters spreading round the body, like a girdle: at times confluent, and occasionally preceded by constitutional irritation. 3. HERPES CIRCINATUS, *Formica ambulato'ria*, *An'nulus repens*, *Herpes Serpigo*, *Serpigo*, *Ephylis Herpes Circinatus*, *Ringworm*, consisting of vesicles with a reddish base, uniting in rings: the area of the rings slightly discoloured, often followed by fresh crops. 4. HERPES LABIALIS. 5. HERPES PRÆPUTIALIS, appearing, respectively, on the lips and prepuce:—6. HERPES IRIS, *Iris*, *Rainbow-worm*,—occurring in small circular patches, each of which is composed of concentric rings of different colours. To these may be added, HERPES EX'EDENS, *Ephylis Herpes exedens*, *Herpes esthiom'enus*, *H. depas'cens*, *Agria*, *H. esthiom'enus*, *Lupus vorax*, *Formica corrosiva*, *Pap'ula fera*, *Ulcerative Ringworm*, *Nirles*, *H. ferus*, (F.) *Dartre rongcante*, in which the vesicles are hard; clusters thronged; fluid dense, yellow or reddish, hot, acrid, corroding the subjacent skin, and spreading in serpentine trails.

All the varieties demand simply an antiphlogistic treatment, when attended with febrile irritation. The *herpes circinatus*, alone, requires the use of astringent applications, which have the power of repressing the eruption.

HERPES DEPASCENS, *H. exedens*—*H. Esthiom'enus*, *H. exedens*—*H. Esthiom'enus*, *H. exedens*—*H. Farinosus*, *Pityriasis*—*H. Ferus*, *H. exedens*—*H. Furfuraceus*, *Pityriasis*—*H. Furfuraceus circinatus*, *Lepra*, *H. exedens*—*H. Miliaris*, *H. phlyctenoides*—*H. Periscelis*, *H. zoster*—*H. Serpigo*, *H. circinatus*.

HERPETIC, *Herpeticus*, (F.) *Dartreux*. Possessing the nature of herpes.

HERP'ETON, *Herpeticon*, from *εργειν*, 'to creep.' A creeping eruption or ulcer.—Hippoc.

HERPYLOS, *Thymus serpyllum*.

HERPERIS ALLIARIA, *Alliaria*.

HETEROCLITE. See Homology, and Tissues.

HETEROCRANIA, Hemicrania.

HETEROCRIN'IA, from *ετερος*, 'other,' and *κρινω*, 'I separate.' Modification in the situation of secretions.—Andral.

HETEROGEN'ESIS. See Generation.

HETEROLOGOUS TISSUES. See Tissues.

HETEROMORPHISM, *Heteromorphis'mus*, from *ετερος*, 'other,' and *μορφη*, 'shape.' A deviation from the natural shape of parts.

HETEROPATHIC, Allopathic.

HETEROPHON'IA, from *ετερος*, 'other,' and *φωνη*, 'voice.' A cracked or broken voice.

HETEROPLASTY, *Heteroplast'icē*: from *ετερος*, 'other,' and *πλασσω*, 'I form.' Irregular plastic operations, that do not admit of exact classification.

HETEROPROSOPUS, from *ετερος*, 'different,' and *προσωπον*, 'countenance.' A monster having two faces.—Gurlt.

HETEROREXIA, Malaria.

HETERORRHYTH'MOS, 'having another rhythm.' An epithet given to the pulse, when it is such, in any individual, as is usually felt at a different age.

HETEROS, from *ετερος*, 'the one of two,' 'the other.' Hence:

HETEROSARCOSES, from *ετερος*, 'other,' and *σαρξ*, 'flesh.' A class of diseases which

consists in the formation of accidental tissues.
—Gendrin.

HETEROTAXIA, (F.) *Heterotaxie*: from *ἑτερος*, 'order.' A malformation, which consists in the general transposition of organs.

HETRE, *Fagus sylvatica*.

HEUCHERA, see *H. Cortusa*.

HEUCHE'RA CORTU'SA, *H. America'na*, *Alum Root*, *American Sanicle*. The root, *Heuchera*—(Ph. U. S.)—is a powerful astringent, and is the basis of a *cancer powder*. The American Indians apply the powdered root to wounds, ulcers, and cancers. It is said to have been sold for the colchicum.

HEX'IS, *ἑξίς*, habit, (q. v.,) habit of body, (q. v.,) constitution. Hence—*hectic*, *cachectic*, &c.

HIA'TUS, from *hīa're*, 'to gape,' 'to open.' A foramen or aperture. The vulva. Also, yawning, (q. v.)

HIATUS FALLOPII, see *Aquæductus Fallopii*; *h. Occipito-pétreux*, *Lacerum posterius foramen*; *h. Spéno-pétreux*, *Lacerum anterius foramen*.

HIATUS or FORA'MEN OF WINSLOW, is an opening—situate behind the lesser omentum, and behind the vessels and nerves of the liver—which forms a communication between the peritoneal cavity and that of the omenta.

HIBERNICUS LAPIS, *Teg'ula Hiber'nica*, *Arde'sia Hiber'nica*, *Harde'sia*, *Irish Slate*. A kind of slate or very hard stone, found in different parts of Ireland, in masses of a bluish-black colour, which stains the hands. It has been taken, powdered, in spruce beer, against inward contusions.

HIBISCUS, *Althæa*.

HIBIS'CUS ABELNOS'CHUS. The name of the plant whose seeds are called *Grana Moschi* or *Muskseed*. It is the *Belmus'chus*, *Abelmos'chus*, *Granum Moschi*, *Ket'mia Ægyptiaca*, *Moschus Arabum*, *Ægyptia moscha'ta*, *Bamix moscha'ta*, *Aleca*, *Aleca Indica*, *Aleca Ægyptiaca Villosa*, *Abelmosch*, *Abelmusk*, *Musk-mallow*, (F.) *Graine de Musc*, *Herbe à la poudre de Chypre*, *Ambrette*, *Guimauve veloutée*. It is indigenous in Egypt and the Indies. The seeds are chiefly used as perfumes; and especially in the formation of the *Cyprus Powder*.

HIBIS'CUS POPEL'US, *Balimbu'go*. A small Molucca tree. The fruit is full of a juice similar to camboe. The root is emetic. It is used in chronic diarrhæa, colic, dyspepsia, &c.

HICCUGH, *Singultus*.

HICCUP, *Singultus*.

HIDROA, *Desudatio*, *Échauboultures*, *Hydroa*, *Sudamina*.

HIDRONOSOS, *Sudor anglicus*.

HIDROPHOROUS, *Sudoriferous*.

HIDROS, *ἰδρῶς*, *Sudor*, (q. v.,) 'sweat.' Hence—*Hidrop'ya*, *Hidrosis*, &c.

HIDROTERION, *Achicolum*.

HIDROTICUM, *Sudorific*.

HIEBLE, *Sambucus ebulus*.

HIERA DIACOLCYN'THIDOS, from *ἱερός*, 'holy.' *Hiera* of *Col'orynth*. An electuary, composed of 10 parts of *colocynth*, as much *agaric*, *germander*, *white horehound*, *stæchas*:—5 parts of *opoponax*, as much *sagapenum*, *parsley*, *round birthwort root*, and *white pepper*:—4 parts of *spikenard*, *cinnamon*, *myrrh*, and *saffron*; and 3 pounds, 3 ounces, and 5 drachms of *honey*.

HIERA OF COLOCYNTH, *H. Diacolocynthidos*.

HIERA LOGADII, *Hiera picra*.

HIERA PICRA, from *ἱερός*, 'holy,' and *πικρός*, 'bitter.' *Holy bitter*, *Pulsis aloë'ticus*, formerly called *Hiera loga'dii*, when made into an electuary with honey. It is now kept in the form of dry powder;—prepared by mixing *socotrine aloes* one pound, with 3 ounces of *canella alba*. See *Pulsis aloes cum Canella*.

HIERA SYRINX, *Vertebral column*, *Epilepsy*.

HIERAC'TES, *ἱερακίτης*, from *ἱεραξ*, 'a hawk,' *Lapis accipit'rum*. The ancient name of a precious stone; believed to be capable of arresting the hemorrhoidal flux.—Pliny, Galen, Paulus.

HIERACIUM MURO'RUM, *Pulmonaria Gall'ica*, *Auric'ula mur'is major*, (F.) *Épercière des murailles*, *Pulmonaire des Français*. A European plant, which is a slight tonic.

HIERACIUM PILOSEL'LA. The systematic name of the *Auric'ula Muris*, or *Mouse-ear*, *Pilosel'la*, *Myosot'is*, (F.) *Piloselle*, *Oreille de Souris*. This plant contains a bitter, lactescent juice: which has a slight degree of astringency. The roots are more powerful than the leaves.

HIERAX, *Accipiter*.

HIEROBOTANE, *Verbena officinalis*.

HIEROGLYPHICA, from *ἱερός*, 'holy,' and *γλυφω*, 'I carve.' A name given to the signs employed in medicine; and also to the folds in the hands, feet, and forehead, which afford Chiromanancy its pretended oracles.

HIEROPYRUS, *Erysipelas*.

HILL FEVER, see *Fever hill*.

HIMANTOSIS, *Himas*.

HIMAS, *ἱμας*, 'a thong of leather.' The uvula; likewise, elongation and extenuation of the uvula. It is also called *Himantosis*, *Himantoma*.

HIP, *Haunch*—*h. Bone*, *Ischium*—*h. Joint*, *Coxofemoral articulation*—*h. Tree*, *Rosa canina*.

HIP'PACE, *ἵππακ*, from *ἵπλος*, 'a horse.' A cheese prepared from mare's milk. *Ca'seus Equ'us*.

HIPPANTHRO'PIA, from *ἵπλος*, 'a horse,' and *ἄνθρωπος*, 'a man.' A variety of melancholy, in which the patient believes himself changed to a horse. The Greek word *ἵππα-θροπος* means the fabulous Centaur.

HIPPASIA, *Equitation*.

HIPPEIA, *Equitation*.

HIPPEUSIS, *Equitation*.

HIPPIATRI'A, from *ἵπλος*, 'a horse,' and *ιατρική*, 'medicine,' (F.) *Hippiatrique*. A science, whose object is the knowledge of the diseases of the horse, and of other domestic animals.

HIPPOCAM'PUS MINOR, *Unguis*, *Un'ci-form En'linence*, *Collic'ulus cereæ posterio'ris ventriculo'rum latera'lium*, *Calcar avis*. (F.) *Ergot*, *Eperon*. A medullary tubercle or projection, observed in the posterior cornu of the lateral ventricle of the brain.

HIPPOCRATIC, *Hippocrat'icus*. Relating to Hippocrates, or concerning his doctrine,—as *Hippocratic doctrine*, *Hippocratic face*, &c.

HIPPOCRATIST. A partisan of the Hippocratic Doctrine.

HIPPOPATHOLOGY, *Hippopatholog'ia*, from *ἵπλος*, 'a horse,' *παθος*, 'a disease,' and *λογος*, 'a discourse.' A knowledge of the diseases of the horse. Pathology of the horse.

HIPPOSTEOLOGY, *Hipposteolog'ia*, from

ἵππος, 'a horse,' ὀστέον, 'a bone,' and λόγος, 'a discourse.' Osteology of the horse.

HIPPOTOMY, *Hippotom'ia*, from ἵππος, 'a horse,' and τέμνειν, 'to cut.' Anatomy of the horse.

HIPPURIC ACID, see Acid, hippuric.

HIPPU'RI'S VULGA'RIS, from ἵππος, 'a horse,' and οὐρα, 'a tail.' The systematic name of the *Horse's Tail* or *Mare's Tail*, *Equisetum minus*, *Equisetum*, (F.) *Prêle*, *Presle*, *Asprêle*. It is an astringent, and frequently used, by the vulgar, as tea, in diarrhœa and hemorrhage. The same virtues are attributed to the *Equisetum arven'se*, *fluvial'ile*, *limo'sum*, &c.

HIPPUS, from ἵππος, 'a horse.' A disease of the eyes, in which, from birth, they perpetually twinkle, like those of a man on horse-back. Also, a tremulous condition of the iris, which occasions repeated alternations of contraction and dilatation of the pupil.

HIPPIATRIQUE, Hippiatría.

HIPPOCAMPE GRANDE, Cornu ammonis.

HIPPOCAMPUS MAJOR, Cornu ammonis.

HIPPOCRAS, Claret.

HIPPOCRATES, CAP OF, *Bonnet d'Hippocrate*—h. Sleeve, *Chausse*.

HIPPOLAPATHUM, *Rumex patientia*.

HIPPOMARATHRUM, *Peucedanum silaus*.

HIPPOS, Equus.

HIPPOSELINUM, *Smyrniolum olusatrum*.

HIPS, Sax. heopa. The fruit of the dog-rose, *Rosa Cani'na*, (q. v.): chiefly used as a confection. See Confectio Rosæ Caninæ.

HIRCUS, Tragus.

HIRQUUS, *Canthus* (greater.)

HIRSU'TIES, *Hair'iness*, *Tricho'sis* *Hirsu'ties*. Growth of hairs in extraneous parts, or superfluous growth in parts; as in cases of bearded women.—Good.

HIRU'DO, *The Leech*, *Sanguisuga*, *Bdella*. In medicine, the *Hiru'do Medicinalis*, *Bdella Medicinalis* or *Medicinal Leech* is employed. (F.) *Sangsue*. It lives in fresh water, and feeds on the blood of animals, which it sucks, after having pierced the skin with its three sharp teeth. This habit has been taken advantage of, to produce local blood-letting. In applying the leech, the part must be wiped dry; and if there be difficulty in making the leech bite, a little milk or cream may be applied. When satiated, it will drop off, and by applying a little salt to its head it will disgorge the blood. A good English leech will take about half an ounce of blood, including that which flows by fomenting the part subsequently. The American takes less.

HIRUNDINARIA, *Lysimachia nummularia*.

HIRUN'DO, *Chel'idon*, from *heren'do*, 'sticking;' because it sticks its nests against the houses. (?) *The Swallow*. The nests of the swallow were once employed as rubefacients, boiled in vinegar.

HISPANICUM VIRIDE, *Cupri subacetatis*.

HISPIDITAS, *Dystechiasis*, *Phalangosis*.

HISPIDULA, *Antennaria dioicum*.

HIST'OS, ἵστος, 'the organic texture.' Hence:

HISTOGEN'IA, *Histog'eny*, from ἵστος, 'the organic texture,' and γενεσις, 'generation.' The formation and development of the organic textures.

HISTOLOGY, Anatomy (general.) The

term is also more particularly appropriated to the minute anatomy of the tissues.

HISTORY, MEDICAL, *Histo'ria Medicinæ*. A narration of the chief circumstances, and the persons connected with them, in the progress of medicine.

HIVE-SYRUP, *Syrupus scillæ compositus*.

HIVES, *Cynanche trachealis*. See *Varicella*.

HORSENESS, *Raucedo*.

HOG-LICE, *Onisci aselli*.

HOLCĒ, ὀλκή, 'a dram.'—Galen.

HOL'CIMOS, ὀλκίμος, from ὀλκή, 'a weight.' A tumour of the liver.

HOLCUS SORGHUM, *Panicum Italicum*.

HOLERA, Cholera.

HOLLANDS, Gin.

HOLLY, COMMON, *Ilex aquifolium*—h. Dahoon, *Ilex vomitoria*—h. Ground, *Pyrola umbellata*—h. Sea, *Eryngium maritimum*.

HOLLYHOCK, COMMON, *Alcea rosea*.

HOLMICOS, *Alveolus*.

HOLMOS, Mortar.

HOLOCYRON, *Teucrium chamæpitys*.

HOLOPHLYCTIDES, *Phlyctæna*.

HOLOSTEUM ALSINE, *Alsine media*.

HOLOSTEUS, *Osteocolla*.

HOLOTONTICUS, ὅλος, 'the whole,' and τενω, 'I stretch.' A spasm of the whole body. A variety of tetanus, (q. v.)—Sauvages.

HOLYWELL, MINERAL WATERS OF. Holywell is a town in Wales; and takes its name from the famous well of St. Winifred. It is a simple cold water, remarkable for its purity.

HOMAGRA, Omagra.

HOMEOPATHY, *Homœopathy*.

HOMIOSIS, *Homioiosis*.

HOMME, Homo.

HOMO, (F.) *Homme*, Man, the chief and most perfect of the mammalia; in Greek, ἀνθρωπος, from ἀνα, 'upwards,' and ἄγω, 'I turn,' because man, alone, of all animals, possesses the natural power of standing erect. He is, also, the only animal whose incisor teeth, wedged in a projecting jaw, are absolutely vertical. Man is especially distinguished from other mammalia by the faculty, which he possesses, of classing his ideas; comparing them with each other; and connecting, representing and transmitting them by signs and articulate sounds. He possesses, in the highest degree, all the attributes of intelligence, memory, judgment, and imagination. He inhabits all countries,—the burning regions of the torrid zone, and the chilling atmosphere of the polar climes. In different situations, he presents, in his figure, colour, and stature, some differences, which have caused the human race to be divided by naturalists into different races or varieties. The number of such races can only be approximated. Cuvier admits but three, the *Caucasian*, *Negro*, *Mongolian*; to these may be added the *American*. Every division must necessarily be arbitrary, and the individuals composing each variety are far from being alike.

HOMŒOPATH, *Homœopathist*.

HOMŒOP'ATHIST, *Homœopath*. One who follows *Homœopathy*.

HOMŒOPATHY, *Homœop'athy*, from ὁμοίως, 'like,' and παθος, 'affection.' A fanciful doctrine, which maintains, that disordered actions in the human body are to be cured by inducing other disordered actions of the same kind, and this to be accomplished by infinitesimally small

doses, often of apparently inert agents; the decillionth part of a grain of charcoal, for example, is an authorized dose.

HOMŒOZYGY, from *ὁμοιος*, 'like,' and *ζυγω*, 'I join together.' The law of association of organs, by which like parts adhere to like parts.—Serres.

HOMOETHNIA, Sympathy.

HOMOGENESIS, see Generation.

HOMOIOPATHIA, Sympathy.

HOMOIOSIS, *Homio'sis*, from *ὁμοιω*, 'I resemble,' 'I assimilate.' An elaboration of the nutritious juice, by which it becomes proper for assimilation. (q. v.)

HOMOLINON. See Apolinosis.

HOMOLOGY, from *ὁμοιος*, 'like,' and *λογος*, 'a description.' The doctrine of similar parts. Thus, the two sides of the body are said to be 'homologous.' *Homologous* tissues, are those that resemble others; in opposition to *heterologous* or *heteroclit*, which are new formations.

HOMONOPAGIA, Cephalalgia.

HOMOPHAGUS, from *φωμος*, 'raw,' and *φαγω*, 'I eat.' One who eats raw flesh.

HOMOPLATA, Scapula.

HOMOTONOS, *Jequalis*, from *ὁμος*, 'equal,' and *τονος*, 'tone.' That which has the same tone. Continued fevers, whose symptoms have an equal intensity during the whole course of the disease, have been so called. See *Ac-masticos* and *Synocha*.

HONESTY, *Lunaria* rediviva.

HONEWORT, FIELD, *Sison animum*.

HONEY, Mel—h. Balsam of, Hill's, see Mel—h. of Borax, Mel boracis—h. Clarified, Mel despumatum—h. Prepared, Mel preparatum—h. of Roses, Mel rosæ—h. of Squill, compound, Syrupus Scillæ Compositus.

HONEYCOMB-BAG, Reticulum.

HONGLANE, *Coptis teeta*.

HONTEUX, *Pudic*.

HOOK, Sax. hocce, hooc, Dutch, h o e c k, *Uncus*, *Uncinus*, *And'ra*, (F.) *Érigne*, *Airigne*, ou *Erine*. An instrument, consisting of a steel wire, flattened at the middle, and having the extremities crooked and pointed. Some hooks are furnished with a handle at one extremity—the other having one or two hooks;—constituting the *single* and *double hook*. The Hook is used by anatomists and surgeons, to lay hold of, and raise up, certain parts, the dissection of which is delicate, or which would slip from the fingers.

The *Tenaculum* is a variety of the Hook.

The **BLUNT HOOK** is an instrument which is passed over the flexures of the joints to assist in bringing down the fetus in parturition.

HOOPING-COUGH, Pertussis.

HOOPING COUGH, *Roche's EMBROCATION FOR THE*, see *Roche*.

HÔPITAL, Hospital.

HOP PILLOW, see *Humulus Lupulus*.

HOP PLANT, *Humulus lupulus*.

HOPLOCHRYSDIA, from *ὅπλον*, 'a weapon,' and *χρυσμα*, 'salve.' *Unguentum armarium*, *Armatory Unguent*. A salve which was supposed to cure wounds by sympathy;—the instrument with which the wound was inflicted being anointed with it.

HÖPLOMACHLION, *ὅπλομαχλιν*, from *ὅπλον*, 'a weapon,' and *μαχλος*, 'a lever.' The name of an iron machine or apparatus, which

embraced the whole body like armour; and the figure of which is given by Fabricius ab Acquapendente.

HOQUET, Singultus.

HORDEOLUM, diminutive of *Hordeum*, 'Barley,' *Sclerophthalmia*, *Crithæ*, a *Stye*, a *Styan*, *Crithid'ion*, *Crythæ*. (F.) *Orgelet*, *Orgeolet*. A small, inflammatory tumour, of the nature of a boil, which exhibits itself near the free edge of the eyelids, particularly near the inner angle of the eye.

HORDEUM, *Crithæ*. The seeds of *Hordeum vulgare*, or *Scotch Barley*, are ranked amongst the *Cerealia*. (F.) *Orge*. They afford a mucilaginous decoction, which is employed as a diluent and antiphlogistic. The seeds of the *Hordeum distichon* and *H. hexastichon* possess similar properties. Barley is freed from its shells in mills; and, at times, is rubbed into small, round grains, somewhat like pearls, when it is called *Hordeum perlatum*, or *Pearl Barley*, (F.) *Orge perlé*, and forms the *Hordei semina tunnicis nuda'ta*, of the pharmacopœias, *Hordeum* (Ph. U. S.)

HORDEUM CAUSTICUM, *Veratrum sabadilla*.

HOREHOUND, *Marrubium*—h. Black, *Bal-lota fœtida*—h. German-leaved, *Eupatorium teucrifolium*—h. Stinking, *Ballota fœtida*—h. Wild, *Eupatorium teucrifolium*.

HORMINUM, *Salvia horminum*.

HORN, Cornu.

HORNSEED, *Ergot*.

HORN Y EXCRESCENCES, *Lepido'sis Ichthyiasis cornig'era*, *Cornua cutanea*. (F.) *Cornes de la peau*. Certain excrescences, which occasionally form in some part of the skin, and resemble, in shape, the horns of animals.

HORRIDA CUTIS, *Goose-skin*, *Cutis asserina*. A state of the skin accompanying the rigor of an intermittent.

HORRIPILATION, *Horripilatio*, *Horror*, *φριξίς*, *Phric's mus*, from *horre*, 'to bristle up,' and *pilus*, 'hair.' (F.) *Horripilation*, *Frisonnement*. General chilliness, preceding fever, and accompanied with bristling of the hairs over the body.

HORROR, *Horripilation*.

HORSE-CHESTNUT, *Æsculus hippocastanum*.

HORSE CRUST, *Crusta genu equinæ*.

HORSE RADISH, *Cochlearia armoracia*.

HORSE'S TAIL, *Hippuris vulgaris*.

HORTULUS CUPIDINIS, *Vulva*.

HORTUS, *Vulva*.

HOSPITAL, primarily from *hospes*, 'a guest,' *Nosocomium*, *Infirmarium*, *Infirmarium*, *Infirmatorium*, *Nosodochium*. (F.) *Hôpital*. An establishment for the reception of the sick, in which they are maintained and treated medically. Hospitals were first instituted about the end of the 4th century; a period at which the word νοσοκομειον was employed, for the first time, by St. Jerome.

HOSPITAL GANGRENE, *Phagedæna gangræ-nosa*; *Putrid* or *Malignant Ulcer*, *Gangræna Nosocomi'um*, *Hospital Sore*, *Gangræna contagiosa*, *Putredo*, (F.) *Pourriture* ou *Gangrène d'hôpital*. Gangrene, occurring in wounds or ulcers, in hospitals, the air of which has been vitiated by the accumulation of patients, or some other circumstance. Hospital gangrene—many different varieties of which are met

with, and always preceded or accompanied by fever—commonly commences with suppression of the suppuration of the wound, which becomes covered with a grayish and tenacious sanies. The gangrene then manifests itself. It extends from the centre of the ulcerated surface towards the edges; these become swollen, painful, and everted; and the patient dies with all the signs of typhus. The treatment must be varied, according to circumstances. Sometimes, it requires the use of stimulating, acid, caustic, and antiseptic applications; with, occasionally, the actual cautery, aided by the exhibition of tonics, internally:—at others, the antiphlogistic regimen and emollient applications may be necessary.

HOSTIARIUS, Pylorus.

HOTSPRINGS, see Virginia, Mineral Waters of.

HOUBLON, *Humulus lupulus*.

HOUGH, Poples.

HOUNDS' TONGUE, *Cynoglossum*.

HOUPPE NERVEUSE, see *Papilla—h. du Menton*, Depressor labii inferioris, Levator labii inferioris.

HOUSELEEK, *Sempervivum tectorum*.

HOUSEMAID'S KNEE, see Knee, Housemaid's.

HOUSE-SURGEON, *Resident Surgeon*. Usually a senior pupil or graduate, who attends in an hospital, to every accident and disease, in the absence of the regular physician or surgeon. It answers, in the British hospitals, to the *Elève interne* of the French.

HOUX, *Ilex aquifolium—h. petit*, *Ruscus—h. Apalachine*, *Ilex vomitoria*.

HUACO, Guaco.

HUDSON'S PRESERVATIVE FOR THE TEETH AND GUMS. See *Tinctura Myrrhæ*.

HUILE, Oil—*h. d'Absinthe*, *Artemisia absinthium* (oil of,)—*h. d'Acajou*, see *Anacardium occidentale*.

HUILE ACOUSTIQUE, (F.) *Oleum acusticum*, Acoustic oil. An oil for deafness, prepared of *olive oil*, $\mathfrak{z}\mathfrak{i}$, garlic, *ox-gall* and *bay-leaves*, each $\mathfrak{z}\mathfrak{i}$; boiled for a quarter of an hour, and strained.

HUILE D'AMANDES, *Oleum amygdalarum—h. d'Aneth*, see *Anethum graveolens—h. Animale*, *Oleum animale—h. Animale de Dippel*, *Oleum animale Dippelii—h. Animalisée par infusion*, *Oleum animalizatum per infusionem—h. Anis*, see *Pimpinella anisum—h. Aromatique*, *Oleum animalizatum per infusionem—h. d'Aurone*, *Artemisia abrotanum* (oil of)—*h. de Cacao*, Butter of cacao—*h. de Carvi*, Carum (oil)—*h. de Cédrat*, *Oleum cedrinum—h. de petits chiens*, *Oleum animalizatum per infusionem—h. de Corne de Cerf*, *Oleum animale Dippelii—h. de Gabian*, *Petrolæum—h. de Gérofle*, see *Eugenia caryophyllata—h. de Laurier*, *Unguentum laurinum—h. de Lis*, see *Lilium candidum—h. de Morelle*, see *Solanum—h. de Morue*, *Oleum jecionis aselli—h. d'Éillette*, *Papaver* (oil)—*h. de Ricin*, see *Ricinus communis—h. de Succin*, see *Succinum—h. Verte*, Balm, green, of Metz—*h. de Vin, douce*, *Oleum æthereum*.

HUILES ANIMALES, *Olea animalia—h. Emphyreumatiques*, *Olea empyreumatica—h. Essentielles*, *Olea volatilia—h. Fixes ou grasses*, *Olea fixa—h. Fugaces*, *Olea fugacia—h. Médicinales*, *Olea medicinalia—h. Volatiles*, *Olea volatilia*.

HUIT DE CHIFFRE. Figure of 8. A bandage in which the turns are crossed in the form of the figure 8. Such is the bandage used after bleeding from the arm.

HUITRE, *Ostrea*.

HUM, VENOUS, *Bruit de diable*.

HUMECTANTIA. A name formerly given to drinks, which appeared to possess the property of augmenting the fluidity of the blood.

HUMÉRAL, *Humera'lis*. That which belongs to, or is connected with, the arm or humerus.

HUMÉRAL AR'TERY, *Arte'ria humera'lis*. See Brachial Artery.

HUMÉRO-CUBITAL, *Brachialis anterior—h. Sus-métacarpien*, see *Radialis—h. Sus-radial*, *Supinator radii longus*.

HUMERUS, *Scap'ula*, *Omos*, *Armus*, (F.) *Épau'le*. The most elevated part of the arm. The bones, which concur in forming it, are;—the scapula, head of the humerus and the clavicle, united together by strong ligaments, and covered by numerous muscles.

HUMERUS, *Os Hu'MERI*, *Os bra'chii*, *Os adjuto'rium*, *Os brachia'le*, *Brachium*, is the cylindrical, irregular bone of the arm; the upper extremity of which has a hemispherical head connected with the scapula; and two *tuberosities* or *tubercles*, a *greater* and *lesser*, for the attachment of muscles, between which is the *Bicip'ital groove* or *Fossa*. At the inferior extremity may be remarked—the *inner condyle*, the *outer condyle*; the *small head*, which is articulated with the radius; the *trochlea* articulated with the ulna, &c. The humerus is developed by seven points of ossification;—one for the body; one for the head; one for the greater tuberosity; one for the trochlea; one for the epitrochlea; one for the epicondyle, and another for the lesser head.

HUMERUS SUMMUS, Acromion.

HUMEUR AQUEUSE, Aqueous humour—*h. Hyaloïde*, *Corpus vitreum*.

HUMEURS FROIDES, Scrofula.

HUMIDE RADICALE, Humidum radicale.

HUMIDUM NATIVUM ARTICULORUM, Synovia—*h. Primigenium*, *H. radicale*.

HUMIDUM RADICALE, *Hu'midum primig'num*; *Rad'ical Moisture*, (F.) *Humide radicale*. This name was formerly given to the liquid, which, by means of the circulation, was conceived to give flexibility and proper consistence to the different organic textures.

HUMILIS, Rectus inferior oculi.

HUMOR GENITALIS, SEU SEMINALIS SEU VENEREUS, Sperm—*h. Albugineous*, Aqueous humour—*h. Articularis*, Synovia—*h. Ceruminous*, Cerumen—*h. Doridis*, Water, sea—*h. Genitalis seu seminalis*, Sperm—*h. Glacialis*, Crystalline, *Corpus vitreum—h. Hyaloïdes*, *Corpus vitreum—h. Ovatus*, Aqueous humour—*h. Ovi-formis*, Aqueous humour—*h. Purulentus*, Pus—*h. Vitreus*, *Corpus vitreum*.

HU'MORAL, *Humora'lis*, from *humere*, 'to moisten.' Proceeding from, or connected with, the humours.

HU'MORISM, *Hu'moral Pathology*. A medical theory, founded exclusively on the part which the humours were considered to play in the production of disease. Although traces of this system may be found in the most remote antiquity, the creation, or at all events, the ar-

range of it, may be attributed to Galen, who enveloped it in metaphysical subtleties, relating to the union between the elements and the four cardinal humours.

HUMORIST. The Galenical physicians, who attributed all diseases to a depraved state of the humours, or to vicious juices collected in the body.

HUMOUR. Every fluid substance of an organized body;—as the blood, chyle, lymph, &c. The *Humours*, *χυμοί*, *Chymi*, *Humor'es*, differ considerably, as to number and quality, in the different species of organized beings; and even in the same species, according to the state of health or disease. The ancients reduced them to four; which they called *cardinal humours*;—the blood, phlegm, yellow bile, and atrabilis or black bile. The modern classification of the humours is given under *Fluid*.

HUMP. Perhaps from *umbo*, 'the boss of a buckler.' *Hunch*, *Gibbus*, *Gibba*, *Tuber*, (F.) *Bosse*. A prominence, formed by a deviation of the bones of the trunk. Commonly, it is formed by the spine or sternum, and is seated at the posterior or anterior part of the trunk. It may, also, be produced by deviation of the ribs or pelvis. The spine may be curved in three principal directions. 1. *Backwards*, and this is the most common case; but the ancients called *κυφωσις*, *Cypho'sis*, *gibbositas*. 2. *Forwards*, *λοφωσις*, *Lordo'sis*, *recurvatio*; and, 3. *Laterally*, *σκολιωσις*, *Scolio'sis*, *obstipitatio*. Most curvatures occur at a very early age, and are caused by scrofula, rickets, &c.; and, not unfrequently, they are accompanied by caries of the vertebræ. See *Vertebral Disease*.

HUMULUS LU'PULUS, *Convolvulus perennis*; the *Hop-plant*. *Nat. Ord. Urticæ*. (F.) *Houblon*, *Vigne du nord*. Its cones or strobiles, *Hu'muli strobili* (Ph. L.) *Humulus*, (Ph. U. S.), have a fragrant odour; and bitter, aromatic taste, depending on a peculiar principle, named *Lu'pulin*, extractive and essential oil; which may be extracted, equally by water and spirit, from the dried strobiles. The Hop is employed as a tonic and hypnotic, and enters into the composition of ale and beer.

The *Hop pillow*, *Pulvi'nar Hu'muli*, has long been used for producing sleep.

HUNCH, *Hump*.

HUNGER, Anglo-Saxon, hunger, *Fames*, *Limos*, *Peinē*, *Esuries*, *Jeju'nium*, *Jeju'nitas*, *Esuri'tio*, *Esuri'go*. (F.) *Faim*. The necessity for taking food. Hunger is an internal sensation, which some authors have attributed to the friction between the sides of the stomach in its empty state; others, to the compression of the nerves, when the organ is contracted; others, to the action of the gastric juice, &c. It is dictated by the wants of the system: farther we know not. See *Appetite*.

HYACINTHUS MUSCARI, *Bulbus vomitorius*.

HYALINE SUBSTANCE, *Cytoblastema*.

HY'ALOID, *Hyaloid'es*, *Hyaloid'es*, *Vit'reus*, from *υαλός*, 'glass,' and *ειδος*, 'resemblance.' Resembling glass.

HYALOID FOSSA, *Fossa hyaloid'a*, is a cup-like excavation in the vitreous humour, in which the crystalline is imbedded.

HY'ALOID MEMBRANE, *Tunica Hyaloid'ea*, *Membr'na Arachnoid'ea*, *T. vitrea*, is the extremely delicate membrane, which forms the

exterior covering of the vitreous humour, and transmits within it prolongations, which divide it into cells. Fallopius discovered this membrane, and gave it the name *Hyaloid*. On a level with the entrance of the optic nerve into the eye, the hyaloid membrane forms, by reflection, a cylindrical canal, which pierces the vitreous humour from behind to before, as far as the posterior part of the crystalline. To this, its discoverer gave the name—*Canal hyaloidien* or *Hyaloid Canal*.

HYALOS, *Vitrum*.

HYBOMA, *Gibbositas*.

HYDARTHROSIS, *Hydrarthrus*.

HYDARTHROS, *Hydrarthrus*.

HY'DATID, *Hy'datis*, *Bulla*, *Aquila*, *Hydro'a*, *Tænia hydatig'ena*, *Echinococcus hum'anus*, from *υδωρ*, 'water.' This name was long given to every encysted tumour which contained an aqueous and transparent fluid. Many pathologists, subsequently, applied it to vesicles, softer than the tissue of membranes, more or less transparent, which are developed within organs, but without adhering to their tissue. It is by no means clear, that these formations are really entozoa. They have been found in various parts of the body; sometimes in the uterus, occasioning signs nearly similar to those of pregnancy, but being sooner or later expelled. The expulsion is generally attended with more or less hemorrhage. See *Acephalocystis*.

Hydatis, *Aquila*, *Phlyctænula*, *Verru'ca Palpebra'rum*, *Milium*, also, meant small, transparent tumours of the eyelids.—Galen, C. Hoffmann.

HYDATIDES CERVICIS UTERI, *Nabothi glandulæ*.

HYDATIDOCE'LE, *Hydatocel'e*, from *υδατις*, 'hydatid,' and *κελη*, 'a tumour.' A tumour, formed by hydatids. Oscheoceles, containing hydatids. The *Oscheocel'e hydatido'sa*, of Sauvages.

HYDATISMUS, from *υδωρ*, 'water.' The noise caused by the fluctuation of pus contained in an abscess.—Aurelian, *Foësius*.

HYDATOCLE, *Hydatidoccele*.

HYDATOCHE'LOS, from *υδωρ*, 'water,' and *χολη*, 'bile.' *Aquoso-bilious*. An epithet given to evacuated matters, when mixed with water and bile.—Hippocr., *Foësius*.

HYDATODES, *Aqueous*.

HYDATOID, *Hydatoid'es*, *A'queous*, *Aquosus*, *Hydatoid'es*, from *υδωρ*, 'water,' and *ειδος*, 'resemblance.' Resembling water. This name has been given to the membrane of the aqueous humour; and, also, to the aqueous humour itself.

HYDATOIDES, *Aqueous humour*.

HYDEROS, *Anasarca*, *Hydrops*.

HYDOR, *υδωρ*, 'genitive,' *υδατος*, 'water.'

Hence:

HYDRACHNIS, see *Varicella*.

HYDRÆMIA, *Hydromia*.

HYDRAGOGUES, *Hydrago'ga*, *Hydrop'ica*, *Hydro'ica*, *Aquid'uca*, from *υδωρ*, 'water,' and *αγω*, 'I expel.' Medicines, believed to be capable of expelling serum effused in any part of the body. These are generally cathartics or diuretics.

HYDRAGOGUM BOYLEI, *Argenti nitras*.

HYDRALLANTE, *False Waters*.

HYDRAM'NIOS, from *υδωρ*, 'water,' and

'amnios.' An excessive quantity of the liquor Amnii.

HYDRARGYRANATRIPSIS, from 'ὑδραργυρος,' 'quicksilver,' and *ατραπις*, 'rubbing in.' The rubbing in of an ointment of quicksilver.—*Hydrargyrotropis*.

HYDRARGYRI ACETAS, *Hydrargyrus acetatus*—h. Borussias, H. cyanuretum—h. Bromidum, see Bromine—h. Calx alba, *Hydrargyrum præcipitatum*.

HYDRARGYRI CHLORIDUM CORROSIVUM, H. oxyurias—h. chloridum mite, H. submuriar.

HYDRARGYRI CYANURETUM, H. Borussias, *Hydrargyrum Cyanogenatum*, H. Hydrocyanicum, Prussias *Hydrargyri, Cyanuret* or *Prussiate of Mercury*. (F.) *Cyanure de Mercure*. (Ferri *Ferro-cyanuret*, ζ iv; *Hydrarg. oxid. rubr.* ζ iiij, vel q. s.; *aquæ destillat.* Oij. Put the Ferro-cyanuret and three ounces of the oxide of mercury, previously powdered and thoroughly mixed together, into a glass vessel, and pour on two pints of the distilled water. Boil the mixture, stirring constantly; and if, at the end of half an hour, the blue colour remain, add small portions of the oxide of mercury, continuing the ebullition until the mixture becomes of a yellowish colour; then filter through paper. Wash the residue in a pint of the distilled water, and filter. Mix the solution and evaporate till a pellicle appears, and set the liquor aside that crystals may form. To purify the crystals, subject it to re-solution, evaporation, and crystallization.—Ph. U. S.) This preparation has been strongly recommended as a powerful antisyphilitic, and is admitted into the Parisian codex. Twelve to twenty-four grains may be dissolved in a quart of distilled water, and three or four spoonfuls of the solution be taken daily, in a glass of any appropriate liquid.

HYDRARGYRI DEUTO-IODURETUM, see Iodine—h. hyperoxodes, *Hydrargyri nitrico-oxydum*.

HYDRARGYRI IODIDUM, *Iodide of Mercury*, (*Hydrarg. Jj, Iodin. ζ v, Alcohol q. s.* Rub the Mercury and Iodine together, adding sufficient Alcohol to form a soft paste, and continue the trituration till the globules disappear. Dry the Iodide in the dark, with a gentle heat, and keep it in a well stopped bottle, the light excluded.—Ph. U. S.) For properties and doses, see Iodine.

HYDRARGYRI IODIDUM RUBRUM, *Red Iodide of Mercury*. (*Hydrarg. corros. chlorid. ζ ij; Potassii Iodd. ζ x, aquæ destillat. Oij.* Dissolve the chloride in a pint and a half, and the Iodide of Potassium in half a pint of distilled water, and mix the solutions. Collect the precipitate on a filter, and having washed it with distilled water, dry it with a moderate heat, and keep it in a well stopped bottle.—Ph. U. S.) For properties and doses, see Iodine.

HYDRARGYRI MURIAS BASI OXYDI IMPERFECTI, H. oxyurias—h. Muriar corrosivum, H. oxyurias—h. Muriar dulcis sublimatus, H. submuriar—h. Muriar oxygenatus, H. oxyurias—h. Muriar spirituosus liquidus, *Liquor hydrargyri oxyuriatis*—h. Muriar suboxygenatus præcipitatione paratus, *Hydrargyrum præcipitatum*.

HYDRARGYRI NITRAS, *Nitras hydrargyri in crystallos concretus*,—*Nitrate of Mercury*. It is employed in syphilis, and, externally, in fungous, obstinate ulcers.

It is used in the formation of the *Soluble Mercury* of Hahnemann.

Ward's White Drops,—a once celebrated, antiscorbutic nostrum,—were prepared by dissolving mercury in nitric acid; and adding a solution of carbonate of Ammonia; or, frequently, they consisted of a solution of sublimate with carbonate of ammonia.

HYDRARGYRI NITRICO-OXYDUM, *Hydrargyrus nitrat'us ruber, Mercurius corrosivus ruber, Mercurius præcipitatus corrosivus, M. præcipitatus ruber, Arcanum corallinum, Mercurius corallinus, Pulvis principis, Præcipitatus ruber, Oxydum hydrargyri completum, O. hydrargyricum, Panacea mercurii rubra, Pulvis Joan'nis de Vigo, Oxo'des hydrargyri rubrum, Hyperoxo'des hydrargyri, Nitric oxide of mercury, Red præcipitate, Oxydum hydrargyri nitricum, Oxydum hydrargyri rubrum per ac'idum nitricum*, (F.) *Oxide nitrique de mercure*. It is a stimulant and escharotic, and used as such in foul ulcers; being sprinkled on the part, in fine powder, or united with lard into an ointment.

HYDRARGYRI OXYDI MURIAS AMMONIACALIS, *Hydrargyrum præcipitatum*—h. Oxodes rubrum, *Hydrargyri nitrico-oxydum*—h. *Oxydulum nigrum, H. Oxydum cinereum*—h. *Oxydum nigrum, H. oxydum cinereum*.

HYDRARGYRI OXYDUM CINEREUM, *Oxydum hydrargyri nigrum, Jæthiops per se, Mercurius niger Moscati, Oxydum hydrargyro'sum, Oxydum hydrargyricum præcipitatum, Oxydulum hydrargyri nigrum, Pulvis mercurialis cinereus, Mercurius cinereus, Turpethum nigrum, Mercurius præcipitatus niger, Gray or black oxide of Mercury*, (F.) *Oxide de mercure cendré, Oxide gris ou noir de mercure*. This oxide is made in various ways. It may be formed by boiling submuriate of mercury in lime water. The dose of this, *Pulvis hydrargyri cinereus*, is from two to ten grains. There are four other preparations of it in estimation, viz: *Plenck's solution*, made by rubbing mercury with mucilage. 2. By rubbing equal parts of sugar and mercury together. 3. A compound of honey or liquorice and purified mercury. 4. The blue pill and ointment. All these possess the usual properties of mercury.

The *Hydrargyri Oxidum Nigrum* of the Ph. U. S. is made as follows:—*Hydrarg. chlorid. mit. Potassa aa, ζ iv, aquæ Oj.* Dissolve the Potassa in the water, allow the dregs to subside, and pour off the clear solution. To this add the chloride, and stir constantly till the black oxide is formed. Pour off the supernatant liquor, wash the black oxide with distilled water, and dry with a gentle heat.

The *Mercurius solubilis* of Hahnemann is formed from a black oxide of mercury. It is the *Mercurius solubilis Hahnemanni seu oxydum hydrargyri nigri median'te ammo'niâ ex protonitrat'e hydrargyri præcipitatum*. It is used in the same cases as the *Hydrargyri Oxydum cinereum*.

HYDRARGYRI OXYDUM NIGRUM MEDIANTE AMMONIA EX PROTONITRATE HYDRARGYRI PRÆCIPITATUM, H. *Oxydum cinereum*—h. *Oxydum nitricum, Hydrargyri nitrico-oxydum*.

HYDRARGYRI OXYDUM RUBRUM, *Mercurius calcinatus, Hydrargyrus calcinatus*, (F.) *Oxide de mercure rouge, Red oxide of mercury. Hydrarg. ζ xxxvj; acid. nitric. f ζ xiv; aquæ Oij.*

Dissolve the mercury, with a gentle heat, in the acid and water previously mixed, and evaporate to dryness. Rub into powder, and heat in a very shallow vessel till red vapours cease to rise.—Ph. U. S.)

It is stimulant and escharotic; and, in large doses, emetic. Owing to the violence of its operation it is seldom given internally, but is chiefly used as an escharotic.

HYDRARGYRI OXYDUM RUBRUM PER ACIDUM NITRICUM, *Hydrargyri nitrico-oxydum*.—h. *Oxydum saccharatum*, *Hydrargyrum saccharatum*.—h. *Oxydum sulphuricum*, *Hydrargyrum vitriolatum*.

HYDRARGYRI OXYMURIAS, *H. Chlo'ridum Corrosivum*, (Ph. U. S.) *Hydrargyrum muriatum*, *Murias hydrargyri corrosivus*, *Murias hydrargyri oxygenatus*, *Sublimatus corrosivus*, *Mercurius corrosivus*, *Mercurius corrosivus sublimatus*, *Bichloride of mercury*, *Hydrargyri permurias*, *Supermurius hydrargyri*, *Murias hydrargyri basi oxydi imperfecti*, *Murias hydrargyri corrosivum*, (F.) *Muriate oxygéné de Mercure*, *Sublimé corrosif*, *Oxymuriatic of mercury*, *Corrosive sublimate*. (*Hydrarg.* *Biij. Acid. Sulphur.* *Biij. Sodii Chlorid.* *℥ss.*) Boil the mercury with the sulphuric acid until the sulphate of mercury is left dry. Rub this, when cold, with the chloride of sodium, in an earthenware mortar; then sublime with a gradually increasing heat.—Ph. U. S.) It is used as an antisyphilitic stimulant, in venereal complaints; old cutaneous affections, &c. gr. iij to ℥j of water forms a good gargle in venereal sore throats, or an injection in gonorrhœa. Externally, it is applied in cases of tetter, and to destroy fungus, or stimulate old ulcers. Dose, gr. 1-16 to gr. 1-8 in pill, once in twenty-four hours. White of egg is the best antidote to it, when taken in an over-dose.

HYDRARGYRI PERMURIAS, *Hydrargyri oxymurias*.—h. *Proto-ioduretum*, see *Iodine*.—h. *Proto-tartras*, *H. tartras*.—h. *Prussias*, *H. cyanuretum*.—h. *Saccharum vermifugum*, *Hydrargyrum saccharatum*.

HYDRARGYRI SUBMURIAS, *H. Chlo'ridum mitè*, *Calomelas*, *Draco mitigatus*, *Submurias hydrargyri mitis*, *Submurias hydrargyri sublimatum*, *Mercurius dulcis*, *M. dulcis sublimatus*; when precipitated, *M. dulcis precipitatus*, *Panacea Mercurialis* (when nine times sublimed,) *Murias hydrargyri dulcis sublimatus*, *Mercurius sublimatus dulcis*, *Aquila*, *Manna Metallo'rum*, *Panchymagogum mineralè*, *P. Quercetanus*, *mild Chloride of Mercury*, (F.) *Mercurè doux*, *Protochlorure de mercure*. The mild chloride of mercury is thus directed to be prepared in the Pharmacopœia of the United States. *Mercury* *℥iv*; *Sulphuric Acid*, *℥iij*. *Chloride of Sodium*, *℥ss*. *Distilled water*, a sufficient quantity. Boil two pounds of the mercury with the sulphuric acid, until the sulphate of mercury is left dry. Rub this, when cold, with the remainder of the mercury, in an earthenware mortar, until they are thoroughly mixed. Then add the chloride of sodium, and rub it with the other ingredients till all the globules disappear; afterwards sublime. Reduce the sublimed matter to a very fine powder, and wash it frequently with boiling distilled water, till the washings afford no precipitate upon the addition of *Liquor Ammonie*; then dry it. *Properties*. Antisyphilitic and sialagogue; in large doses, purgative. Dose, one or two grains given at night gradually excite

ptyalism. Gr. v to xx, purge. Children bear larger doses than adults.

The BLACK WASH, *Lotio Hydrargyri nigra*, is formed of *calomel* ℥ij, *Lime water* ℥j. Used to syphilitic sores.

HYDRARGYRI SÆMURIAS AMMONIATUM, *Hydrargyrum præcipitatum*.—h. *Subsulphas flavus*, *Hydrargyrum vitriolatus*.—h. *Subsulphas peroxidati*, *Hydrargyrum vitriolatus*.—h. *Sulphas*, *Hydrargyrum vitriolatus*, *H. S. flavus*, *Hydrargyrum vitriolatus*.

HYDRARGYRI SULPHURETUM NIGRUM, *Hydrargyrum vel mercurius cum sulphurè*, *Æthiops mineralis*, *Hydrargyrum e sulphurè*, *Pulvis hyponitricus*, *Æthiops narscolicus*, (F.) *Sulphure de mercure noir*, *Black sulphuret of mercury*, *Æthiops mineral*. (*Hydrarg.*, *Sulphur.* *aa* *℥ij*. Put together till the globules disappear.) Used chiefly in scrofulous and cutaneous affections. Dose, gr. x. to ℥ss.

HYDRARGYRI SULPHURETUM RUBRUM, *Hydrargyrum sulphuratus ruber*, *Medium purum*, *Minium Græcorum*, *Magnes Epilepsie*, *Ammon*, *Purpurisum*, *Cinnabaris*, *Mercurius Cinnabarinus*, *Cinabaris*, *Cinabarium*, *Red Sulphuret of Mercury*, *Cinnabar*, *Vermilion*, (F.) *Sulphure de Mercure rouge*, *Cinabre*. (*Hydrarg.* *℥xl*; *Sulphur*, *℥viiij*. Mix the mercury with the sulphur melted over the fire; and as soon as the mass begins to swell, remove the vessel from the fire, and cover it with considerable force to prevent combustion. Rub the mass into powder and sublime. Ph. U. S.)

It is antisyphilitic, but is chiefly used in fumigation against venereal ulcers of the nose, mouth and throat;—℥ss being thrown on a red hot iron. This preparation is the basis of a nostrum, called *Boerhaave's Red Pill*.

HYDRARGYRI SUPERMURIAS, *H. oxymurias*.

HYDRARGYRI TARTRAS, *H. Proto-Tartras*, *Tartrate of mercury*. Antisyphilitic. Dose, one or two grains twice a day.

HYDRARGYRI ET ARSENICI IODIDUM, *Arsenic and Mercury, iodide of*.

HYDRARGYRIA, *Eczema mercuriale*.

HYDRARGYRIASIS, *Eczema mercuriale*.

HYDRARGYROSIS, *Eczema mercuriale*.

HYDRARGYROTRIPSIS, *Hydrargyranatripsis*.

HYDRARGYRUM, *Hydrargyrum*, from ὑδωρ, 'water,' and ἀργυρος, 'silver'; *Mercurius*, *Argentum vivum*, *A. mobile*, *A. fusum*, *A. fugitivum*, *Fumus albus*, *Arca arcanorum*, *Dædalus*, *Mercury*, *Quicksilver*, (F.) *Mercurè*, *M. cru.*, *Vif Argent*, *Mater Metallo'rum*. A fluid, brilliant metal; of a slightly bluish white colour; fluid above—39° of Fahr. and under 656°. S. G., when liquid, 13.568 (Cavendish;) easily oxidized. Metallic quicksilver does not act on the body, even when taken into the stomach. When oxidized and combined with acids, it acts powerfully. It has been exhibited in cases of constriction of the bowels and in intussusception, from a notion that it must certainly pass through the bowels by its gravity. The water, in which mercury has been boiled, has been recommended as a vermifuge; but it probably enjoys no such property, as chymical tests do not exhibit the presence of the metal. When the crude metal is distilled in an iron retort, it forms the *Hydrargyrum purificatum*.

HYDRARGYRUM AMMONIATO-MURIATICUM, *H.*

præcipitatum—h. Cyanogenatum, Hydrargyri cyanuretum.

HYDRARGYRUM CUM CRETÂ, (Ph. U. S.) *Hydrargyrum cum cretâ, Mercurius alkalizatus, Mercury with chalk*, (F.) *Mercuré avec la craie, Æthiops alkalizatus*. (Hydrarg. ζ ij; *Cretæ præparat.* ζ v. Rub them together till the globules disappear. Ph. U. S.) A protoxide of mercury, formed by trituration with carbonate of lime. It is somewhat uncertain; and consequently not much employed as a mercurial. It possesses the properties of the black oxide of mercury, and may be advantageously exhibited in cases of diarrhœa in children, dependent upon acidity and vitiated secretions. Dose, gr. v to ζ ss, twice a day, in any viscid substance.

HYDRARGYRUM CUM MAGNE'SIÂ of the Dublin Pharmacopœia resembles it in properties.

HYDRARGYRUM HYDROCYANICUM, Hydrargyri cyanuretum—h. Iodatium, see Iodine—h. Iodatium flavum, see Iodine—h. Iodatium rubrum, see Iodine—h. Iodidulatum, see Iodine—h. Periodatum, see Iodine.

HYDRARGYRUM PRÆCIPITATUM, *H. ammoniatum*, (Ph. U. S.) *Hydrargyrum ammoniatum, muriaticum, Mercurius cosmeticus, Murias oxidihydrargyri ammoniacalis, Submurius ammoniacohydrargyricus, Calx Hydrargyri alba, Submurius Hydrargyri ammoniatum*—S. H. *Præcipitatum*—*Murius hydrargyri suboxygendus præcipitatus paratus, Præcipitatum album, White precipitate of Mercury, White precipitate, Calcina'tum majus Poterii*, (F.) *Sous-muriate de mercure précipité ou Précipité blanc*. (Hydrarg. chlorid. corros. ζ vj, aquæ destillat. cong., *Liquor ammoniæ f.* ζ vij.) Dissolve the chloride in the water, with the aid of heat, and to the solution, when cold, add the solution of ammonia, frequently stirring. Wash the precipitate till it is tasteless, and dry it—Ph. U. S.)

A peroxide, combined with muriatic acid and ammonia, forming a triple salt. It is used, in powder, to destroy vermin; and, united with lard, for the same purpose, as well as in scabies and some other cutaneous affections.

HYDRARGYRUM SACCHARATUM, *Æthiops saccharatus, Mercurius saccharatus, Oxidum hydrargyri saccharatum, Saccharum hydrargyri vermiculatum*. A mild mercurial formula in several of the Pharmacopœias of Continental Europe; formed by triturating one part of mercury with two of white sugar. It is used in the venereal affections of children.

HYDRARGYRUS, Hydrargyrum.

HYDRARGYRUS ACETATUS, *Sperma mercurii, Terra foliata mercurii, Mercurius acetatus, Hydrargyri Acetatus, Acetas vel Proto-acetatus Hydrargyri, Acetate of mercury*. This was the basis of *Keyser's pills*, and was once much celebrated in the cure of the venereal disease. The dose is from three to five grains, but it is not much used.

The formula for *Keyser's Anti-venereal pills* was as follows: *Hydrarg. Acet.* ζ iv, *Mannæ* ζ xxx, *Amyl.* ζ ij, *Muc. G. Trag.* q. s. into pills of gr. vj. each. Dose, two pills.

HYDRARGYRUS CALCINATUS, Hydrargyri oxydum rubrum—h. cum Cretâ, Hydrargyrum cum cretâ—h. Muriatus, Hydrargyri oxymurius—h. Nitratus ruber, Hydrargyri nitricooxydum.

HYDRARGYRUS PHOSPHORATUS, *Phosphuret-*

ted mercury. This preparation has been recommended in cases of inveterate venereal ulcers, but it is now scarcely used.

HYDRARGYRUS SULPHURATUS RUBER, Hydrargyri sulphuretum rubrum—h. cum Sulphure, Hydrargyri sulphuretum nigrum—h. e sulphure, Hydrargyri sulphuretum nigrum.

HYDRARGYRUS VITRIOLATUS, *Turpe'tum minerdle, Mercurius emeticus flavus, Calx mercurii vitriolata, Mercurius causticus flavus, M. luteus, Hydrargyri sulphus, H. S. flavus*, (Ph. U. S.) *Subsulphas Hydrargyri flavus, Oxidum hydrargyri sulphuricum, Subsulphas hydrargyri peroxidati, Turbith mineral.* (F.) *Sous-sulfate de mercure on turbith minéral.* (Hydrarg. ζ iv, *Acid. Sulph.* ζ vj. Mix in a glass vessel and boil in a sand bath, till a dry white mass remains. Rub this into powder, and throw it into boiling water. Pour off the liquor, and wash the yellow precipitated powder repeatedly with hot water; then dry it.—Ph. U. S.) Two grains of this mercurial act on the stomach violently. It is sometimes recommended as an errhine in amaurosis.

HYDRARTHROS, *Hydarthrus, Hydrarthros synocialis, Hydrops articulo'rum, Hydrarthron, Hydrarthros, Meliceria, Spina vento'sa* of Rhazes and Avicenna, *Arthritis Hydrarthros, Hydrarthrosis, Emmyxium articula're, Tumor albus*;—*White swelling*; from $\psi\delta\omega\varsigma$, 'water,' and $\alpha\theta\rho\omicron\nu$, 'a joint.' (F.) *Tumeur blanche, T. lymphatique des articulations*. The French surgeons apply the term *Hydarthrus* to dropsy of the articulations. White swelling is an extremely formidable disease. It may attack any one of the joints; but is most commonly met with in the knee, the haunch, the foot, and the elbow, and generally occurs in scrofulous children. It consists, at times, in tumefaction, and softening of the soft parts and ligaments, which surround the joints; at others, in swelling and caries of the articular extremities of bones; or both these states may exist at the same time. The treatment consists in the employment of counter-irritants: the use of iodine internally and externally, &c.

HYDRAS'TIS CANADENSIS, *Yellow Root*. It is used in Kentucky as a *mouth water*, and as an outward application in wounds, and local inflammations.

HYDRELÆON, *Hydrolæum*, from $\psi\delta\omega\varsigma$, 'water,' and $\epsilon\lambda\alpha\iota\omicron\nu$, 'oil.' A mixture of water and oil.

HYDRELYTRON. See Hydrocele.

HYDRENCEPHALOCÉLE, *Hydrocephalus chronicus*.

HYDRENCEPHALOID, from $\psi\delta\omega\varsigma$, 'water,' $\epsilon\gamma\kappa\epsilon\alpha\lambda\omicron\varsigma$, 'the brain,' and $\epsilon\iota\delta\omicron\varsigma$, 'resemblance.' Resembling hydrocephalus. *Spurious hydrocephalus*. Diseases of the bowels, and exhaustion are at times attended with hydrocephaloid symptoms.

HYDRENCEPHALUS, *Hydrocephalus internus*.

HYDRENTEROCELE, from $\psi\delta\omega\varsigma$, 'water,' $\epsilon\pi\tau\epsilon\epsilon\omicron\nu$, 'intestine,' and $\chi\lambda\eta\nu$, 'a tumour.' Intestinal hernia, the sac of which encloses fluid.

HYDRIATRIA, *Hydrosudotherapia*.

HYDRIODAS KALICUS. See Potassæ hydriodas.

HYDRO'A, *Hidro'a, Aq'ula, Boa*, from $\psi\delta\omega\varsigma$, 'water.' An affection, which consists in an

accumulation of water or serous fluid under the epidermis. Some have used *hydro'a* synonymously with *sudamina*; (q. v.) others with *pemphigus*. In the first case, it has generally, however, been written *hidro'a*, from *ἵδρω*, 'sweat,' and in the latter *hydro'a*. See Hydatid.

HYDRO.ÆMIA, *Hydræmia*; from *ὑδωρ*, 'water,' and *αἷμα*, 'blood.' The state of the blood in which the watery constituents are in a morbid proportion.

HYDRO.ÆROPLEURIE, *Hydropneumothorax*.

HYDRO.ÆRION, *Hydrops ovariū*, *Ascites ovarii*, *A. sacculus*, (F.) *Hydropisie de l'ovaire*, from *ὑδωρ*, 'water,' and *ωοῖον*, 'ovarium.' Dropsy of the ovarium.

HYDROBLEPHARON, *Hydrops Palpebræ*, *Blepharadema aquosum*. An œdema or watery swelling of the eyelids; from *ὑδωρ*, 'water,' and *πλεγαρον*, 'eyelid.'

HYDROCARDIA, *Hydropericardium*.

HYDROCELE, *Hydrops Scroti*, *Oscheocèle*, *Oscheophyma*, *Hydroorchis*, from *ὑδωρ*, 'water,' and *κῆλη*, 'a tumour.' A collection of serous fluid in the cellular texture of the scrotum or in some of the coverings, either of the testicle or spermatic cord. To the first of these varieties the names—*External Hydrocele*, *H. adematodes*, (F.) *H. par infiltration* have been given; and to the second, those of *Hydrocèle interna*, *H. tunica vaginalis testis*, *Hydrel'ytum*, (F.) *H. par épanchement*. When the collection occurs in the envelope of the testicle, it is called *H. of the tunica vaginalis*; and the epithet *congenital* is added, when the interior of the membrane, in which it is situate, still communicates freely with the cavity of the abdomen. When it exists in the spermatic cord, it is called *encysted*, or *diffused Hydrocele of the spermatic cord*, as the case may be. The tumour of the distended scrotum is oblong; greater below than above; indolent and semi-transparent. When it becomes inconveniently large, the fluid may be evacuated by puncturing with a trocar, but, as the fluid collects again, this operation can only be considered palliative. The radical cure consists, usually, in injecting, through the canula of the trocar, which has been left in, after puncturing, some irritating liquid, as wine. This is kept in the tunica vaginalis for a few minutes, and then withdrawn. The coat inflames; adhesion takes place, and the cavity is obliterated.

HYDROCELE PERITONÆI, *Ascites*—h. *Spinalis*, *Hydrorachis*.

HYDROCÉPHALE AIGU, *Hydrocephalus internus*.

HYDROCEPHALOECTASIE, *Hydrocephalus chronicus*.

HYDROCEPHALUS, *Hydrocephalum*, *Hydrocephalè*, from *ὑδωρ*, 'water,' and *κεφαλή*, 'the head.' *Water in the head*, *Dropsy of the head*, *Hydrops Capitis*, *Dropsy of the brain*. A collection of water within the head. It may be *internal* or *external*.

HYDROCEPHALUS ACUTUS, *H. internus*—h. *Externus*, *H. chronicus*—h. *Meningeus*, *H. internus*.

HYDROCEPHALUS CHRONICUS, *Hydrocephalocèle*, *Hydrops Capitis*, *Hydrocephalus externus*, (F.) *Hydrocéphale*, *Hydrocéphalocétasie*, of some, commonly commences at an early period of existence, and the accumulation of

fluid gradually produces distention of the brain, and of the skull, with separation of the sutures. It commonly proves fatal before puberty.

HYDROCEPHALUS EXTERNUS of some is a mere infiltration into the subcutaneous cellular tissue of the cranium.

HYDROCEPHALUS INTERNUS, *Hydrocephalus acutus*, *H. meningeus*, *Hydrops cerebri*, *Encephalalgia hydrophica*, *Encephalitis exsudatoria*, *Phrenicula hydrocephalica*, *Hydroencephalus*, *Febbris Hydrocephalica*, *Apoplexia hydrocephalica*, *Curus hydrocephalus*, is generally seated, according to modern observers, in the meninges and surface of the encephalon, and is a *tubercular meningitis*. It is observed particularly in childhood. Its march is extremely acute and often very rapid; admitting, generally, however, of division into three stages. The symptoms of the *first stage* are those of general febrile irritation, with head-ache, intolerance of light and sound, delirium, &c. Those of the *second*, which generally denote, that the inflammation has ended in effusion, are, great slowness of pulse, crying out as if in distress, moaning, dilated pupil, squinting, &c.; and lastly, in the third stage;—profound stupor, paralysis, convulsions, involuntary evacuations, quick pulse, and frequently death. The disease is of uncertain duration; sometimes, destroying in two or three days; at others, extending to two or three weeks. The prognosis is unfavourable. The treatment must be most active during the stage of excitement, and precisely that necessary in phrenitis. In the second stage, the indication is;—to promote the absorption of the effused fluid. This must be done by counter-irritants, and mercury, chiefly. On dissection, in these cases, water is generally found in the ventricles, or at the base of the brain; or there are signs of previous, vascular excitement, effusions of coagulable lymph, &c. (F.) *Hydrocéphale aigu*, *Fièvre cérébrale des Enfants*.

HYDROCEPHALUS SPURIUS, *Hydroencephaloid*, (disease.)

HYDROCHLORATE D'OR. See Gold.

HYDROCHLORINAS NATRICUS, *Soda*, *muriate of*.

HYDROCIRSOCELE, from *ὑδωρ*, 'water,' *κίρκος*, 'varix,' *κῆλη*, 'tumour.' A tumour, formed by the varicose distention of the veins of the spermatic cord, and by the accumulation of serous fluid in the cellular texture of the scrotum.—*Hydrocirsocele*.

HYDROCOTYLE UMBELLATUM, *Acari-coba*.

HYDROCYANIC ACID, *Ac'idum Hydrocyanicum*; from *ὑδωρ*, 'water,' and *κυανός*, 'blue,' *Prussic Acid*, *Acidum Prussicum*, *A. Borussicum*, *A. Zoölicum*, *A. Zoölinicum*, *Cyanohydric Acid*, *Cyanhydric Acid*. This acid exists in a great variety of native combinations in the vegetable kingdom, and imparts to them certain properties, which have been long known and esteemed; as in the bitter almond, Cherry laurel, leaves of the Peach tree, kernels of fruit, pips of apples, &c. When concentrated, it is liquid, colourless, of a strong smell and taste, at first cool, afterwards burning. Its s. g. at 70° centigrade, is 0.7058. It is very volatile, and enters into ebullition at 260.5, Cent. It speedily undergoes decomposition, sometimes in less than an hour, and consists of a peculiar gaseous and

highly inflammable compound of carbon and azote, to which the name *Cyanogen* has been assigned; and of hydrogen, which acts as the acidifying principle—hence its name *Hydrocyanic acid*. In the Pharmacopœia of the United States, (1842,) two formulæ for its preparation are given,—the one from the Ferro-cyanuret of Potassium; the other from the Cyanuret of Silver. According to Magendie, the acid, prepared after Scheele's method—the one in common use—is of irregular medicinal power; he, therefore, recommends Gay Lussac's acid, diluted with 6 times its volume, or 8.5 times its weight of distilled water, for medicinal purposes, and this he calls *Medicinal Prussic Acid*. Dr. Ure has proposed, that the specific gravity should indicate that which is proper for medicinal exhibition; and, after comparative experiments of the gravity of the acids, obtained by different processes, he states, that the acid, usually prescribed, is of s. g. 0.936 or 0.997. Great caution is, however, necessary. One drop of pure prussic acid instantly destroys, and the animal shows hardly any traces of irritability, a few moments after death. It has been advised in tracheal phthisis, in tubercular phthisis, pulmonary inflammation and irritation, dyspepsia, uterine affections, hectic cough, cancer, chronic rheumatism, and mania, and as a local remedy in impetiginous affections; but, although possessed of powerful sedative properties, it is so unmanageable and the preparation so uncertain, that it is not much used. The *Dose* of Scheele's *Acid*, or of the *Medicinal Prussic Acid* is from a quarter of a drop to two drops.

HYDROCYSTIS, from *ὑδωρ*, 'water,' and *κυστις*, 'a bladder.' A cyst containing a watery or serous fluid.

HYDRODES, Aqueous.

HYDRO-ENCEPHALORRHÉE, Apoplexy, serous.

HYDRO-ENTERO-EPIPOCELE, *Hydro-epiplo-enterocele*; from *ὑδωρ*, 'water,' *εντερον*, 'intestine,' and *επιπλον*, 'omentum.' Entero-epiplocele, the sac of which contains a serous fluid.

HYDRO-ENTERO-EPILOMPHALUM, from *ὑδωρ*, 'water,' *εντερον*, 'an intestine,' *επιπλον*, 'the caul,' and *ομφαλος*, 'the navel.' Umbilical hernia, the sac of which contains intestine, epiploon, and serum.

HYDRO-ENTEROMPHALUM, *Hydrenteromphalum*; from *ὑδωρ*, 'water,' *εντερον*, 'an intestine,' and *ομφαλος*, 'the umbilicus.' Hernia umbilicalis; the sac of which contains intestine and serum.

HYDRO-EPIPLO-ENTEROCELE, Hydro-entero-epiplocele.

HYDRO-EPIPOCELE, from *ὑδωρ*, 'water,' *επιπλον*, 'omentum,' and *κηλη*, 'a tumour.' Hernia, formed by omentum; the sac of which contains serum.

HYDRO-EPILOMPHALUM, from *ὑδωρ*, 'water,' *επιπλον*, 'the omentum,' and *ομφαλος*, 'the umbilicus.' Umbilical hernia; the sac of which contains epiploon and serum.

HYDROGALA, from *ὑδωρ*, 'water,' and *γαλα*, 'milk.' 'A mixture of water and milk.

HYDROGASTER, Ascites.

HYDROGEN, *Hydrogenium*, *Inflam-mable air*, *Phlogiston*, *Principium*, *hydrogeneticum*, *P. hydroticum*, from *ὑδωρ*, 'water,' and *γεννω*, 'I

produce.' This gas, when breathed, kills the animal, by depriving it of oxygen. When diluted with two-thirds of atmospheric air, it occasions some diminution of muscular power and sensibility, and a reduction of the force of the circulation. It has been respired in catarrh, hæmoptysis, and phthisis.

CARBURETTED HYDROGEN,—obtained by passing the vapour of water over charcoal, at the temperature of ignition, in an iron tube—has been found possessed of similar properties, when diluted, and has been used in like cases.

SULPHURETTED HYDROGEN, *Hydrothion*, *Gaz hepaticum*, *Gaz hydrogenium sulphuratum*, *Melphitis hepatica* may be disengaged from any of the sulphurets by the addition of a strong acid. It is a violent poison, but has been recommended to be inhaled, diluted, to allay the increased irritability which occasionally exists after diseases of the lungs. See *Hydro-sulphuretted Water*.

HYDROGENÈSES. Baumes gives this name to diseases which he fancifully considers to depend upon disturbed *hydrogenation*. In it he includes intermittent and remittent fevers.

HYDROGENO-SULPHURETUM AMMONIACÆ LIQUIDUM, Ammoniac sulphuretum.

HYDROGLOSSA, Ranula.

HYDROLÆUM, Hydrelæon.

HYDROLAPATHUM, *Rumex hydrolapathum*.

HYDROLATA, *Aquæ destillatæ*.

HYDROLATS, *Aquæ destillatæ*.

HYDROLOGY, *Hydrologia*; from *ὑδωρ*, 'water,' and *λογος*, 'a discourse.' A treatise on waters. By the term *Medical Hydrology* is meant that part of physics, whose object is the study of water, considered as it respects medicine; and consequently embracing that of mineral waters. *Medical Hydrography* comprises the study of the influence exerted by the sea or by navigation on the health of man.

HYDROLOTIF, Lotion.

HYDROMANIA, from *ὑδωρ*, 'water,' and *μανια*, 'mania.' A name given by Strambi to Pellagra, in which the patient has a strong propensity to drown himself.

HYDRO-MEDIASTINA. Effusion of serous fluid into the mediastinum.

HYDROMELI, from *ὑδωρ*, 'water,' and *μελι*, 'honey.' *Aqua mulsa*, *Melitis*, *Mulsum*, *Meliceratum*, *Braggart*, *Medo*. A liquid medicine, prepared with an ounce and a half of honey and a pint of tepid water. It is used as a demulcent and laxative, and is generally known under the name *Simple hydromel*, *Vinous hydromel*, *Mead*. *Hydromeli vinosum* is a drink made by fermenting honey and water. It is much used in some countries.

HYDROMETER, Areometer.

HYDROMETRA, *Hydrops uteri*; from *ὑδωρ*, 'water,' and *μητρα*, 'the womb.' *Dropsy of the womb*. A disease characterized by circumscribed protuberance in the hypogastrium,—with obscure fluctuation,—progressively enlarging, without ischury or pregnancy. If it ever occur, it must be a rare disease.

HYDROMPHALUM, *Hydrops umbilicalis*, *Exomphalus aquosus*, from *ὑδωρ*, 'water,' and *ομφαλος*, 'the navel.' A tumour, formed by the accumulation of serum in the sac of umbilical hernia; or simply by distention of the vel in cases of ascites.

HYDROMYRINGA, from *ὕδωρ*, 'water,' and *myringa* or *myrina*, 'the membrana tympani.' Dropsy of the drum of the ear; giving rise to difficulty of hearing,—the *Dyscœcia hydropica*.

HYDRONEPHROSIS; from *ὕδωρ*, 'water,' and *νεφρός*, 'kidney.' A cyst in the kidney, filled with urine, and formed, owing to the obstruction of the tubes of the papillæ.—Rayer.

HYDRONOSUS, Hydrops.

HYDROPATHY, Hydrosudotherapeia.

HYDROPEDESIS, from *ὕδωρ*, 'water,' and *πρίδαμ*, 'I break out.' *Ephidrosis*, (q. v.) Excessive sweating.

HYDROPEGE, Water, spring.

HYDROPERICARDITIS, Hydropericardium.

HYDROPERICARDIUM, *Hydropericardia*, *Hydropericarditis*, from *ὕδωρ*, 'water,' and *pericardium*; *Hydrops Pericardii*, *Hydrocardia*.—*Dropsy of the pericardium*. (F.) *Hydropisie du Péricarde*. This is not a common disease. Palpitations; irregular or intermitting pulse; excessive dyspnœa, amounting often to orthopnœa, and dulness over a larger space on percussion, will cause the pericardium to be suspected.

The treatment is that of dropsies in general. It is, usually, however, of the active kind.

HYDROPERIONE, from *ὕδωρ*, 'water,' *περί*, 'around,' and *ωόν*, 'an egg, or ovum.' The sero-albuminous substance secreted in the uterus, prior to the arrival of the impregnated ovum in that cavity.—Breschet.

HYDROPERITONIE, Ascites.

HYDROPHOBIA, *Paraphobia*, *Phobodipsoman*, *Phenygdrom*, *Phreugophobia*, *Cynolysia*, *Aerophobia*, *Phrenitis latrans*, *Lyssa canina*, *Pantophobia*, *Rabies canina*, *Erethismus hydrophobia*, *Clonus hydrophobia*, *Hygrophobia*, *Canine madness*, (F.) *Rage*, from *ὕδωρ*, 'water,' and *φοβός*, 'dread.'

The term *Rabies* is more appropriate for the aggregate of symptoms resulting from the bite of rabid animals. *Hydrophobia* literally signifies, a 'dread of water;' and, consequently, ought to be applied to one of the symptoms of rabies, rather than to the disease itself. It is a symptom which appears occasionally in other nervous affections. Rabies is susceptible of spontaneous development in the dog, wolf, cat, and fox, which can thence transmit it to other quadrupeds or to man; but it has not been proved that it can supervene,—without their having been previously bitten,—in animals of other species; or that the latter can, when bitten, communicate it to others. Many facts induce the belief, that the saliva and bronchial mucus are the sole vehicles of the rabid virus; the effects of which upon the economy appear, sometimes, almost immediately after the bite, and are, at others, apparently dormant for a considerable period. The chief symptoms are—a sense of dryness and constriction of the throat; excessive thirst; difficult deglutition; aversion for, and horror at, the sight of liquids as well as of brilliant objects; red, animated countenance; great nervous irritability; frothy saliva; grinding of the teeth, &c. Death most commonly happens before the fifth day. *Hydrophobia* has hitherto resisted all therapeutical means. Those which allay irritation, are obviously most called for. In the way of prevention, the bitten part

should always be excised, where practicable; and cauterized.

In some cases, symptoms like those which follow the bite of a rabid animal, are said to have come on spontaneously. This affection has been termed *nervous* or *spontaneous hydrophobia*.

HYDROPHOBUS, *Lyssodectus*.

HYDROPTHALMIA, from *ὕδωρ*, 'water,' and *οφθαλμός*, 'the eye.' *Dropsy of the Eye*, *Hydrops Oculi*, *Buphthalmus*, *Oculus Bovinus*, *Oculus Bulbulus*, *Oculus Elephantinus*, *Ophthalmoptosis*, *Paropsis*, *Staphyloma simplex*, (F.) *Hydrophthalmie*, *Hydropisie de l'œil*. This affection is caused, at times, by an increase in the quantity of the aqueous, at others, of the vitreous, humour. In the former case, the iris is concave anteriorly, and pushed backwards:—in the latter, it is convex, and pushed forwards. Most commonly, the disease seems to depend on both humours at the same time. *Hydrophthalmia* sometimes affects both eyes; at others, only one. Children are more exposed to it than adults or old persons. The treatment must vary according to the causes; its longer or shorter duration; greater or less extent, &c. Hence, according to circumstances, hydragogue medicines, purgatives, general and local blood-letting, blisters, setons, moxa, cupping-glasses, fomentations, collyria, and fumigations of different kinds have been employed. When all means fail, and the disease continues to make progress, the fluid may be evacuated, by a puncture made with a cataract needle at the lower part of the transparent cornea.

HYDROPTHALMION. Same etymon. An œdematous swelling of the conjunctiva in hydropic persons.

HYDROPTHALMUS CRUENTUS, *Hæmophthalmia*.

HYDRO-PHYSOCELE, *Hydropneumatocœle*, from *ὕδωρ*, 'water,' *πύσσω*, 'wind,' and *κύλη*, 'a tumour.' Hernia, which contains a serous fluid and gas.

HYDROPHYSOMETRA; from *ὕδωρ*, 'water,' *φύσσω*, 'I inflate,' and *μήτρα*, 'the womb.' A morbid condition of the womb in which both fluid and air are contained in it.

HYDROPIIC, *Hydropicus*,—*Hyphydros*, *ὕφυδρος*, (F.) *Hydropique*. One labouring under dropsy.

HYDROPICA, Hydragogues.

HYDROPIPER, Polygonum hydropiper.

HYDROPSIE, Hydrops—*h. du Bas-ventre*, *Ascites*—*h. de l'œil*, *Hydrophthalmia*—*h. de l'Oaire*, *Hydroarion*—*h. du Péricarde*, *Hydropericardium*—*h. des Plèvres*, *Hydrothorax*—*h. de Poitrine*, *Hydrothorax*—*h. de la Vésicule du Fiel*, *Turgescencia vesicæ fellæ*.

HYDROPLEURIE, *Hydrothorax*.

HYDROPNEUMATOCELE, *Hydrophysocœle*.

HYDROPNEUMONIA, *Hydrops*, *Pulmonum*, from *ὕδωρ*, 'water,' and *πνευμων*, 'the lung.' Infiltration of the lungs. See *Œdema of the Lungs*.

HYDROPNEUMOSARCA, from *ὕδωρ*, 'water,' *πνευμα*, 'wind, air,' and *σὰρξ*, 'flesh.' An abscess, containing water, air, and matters similar to flesh.—M. A. Severinus.

HYDROPNEUMOTHORAX, *Hydroæthorax*, *pleuric*, from *ὕδωρ*, 'water,' *πνευμων*, 'the lung,'

and *θώραξ*, 'the chest.' Pneumothorax with effusion of fluid into the chest.

HYDROPOIDES, from *ὑδωρ*, 'water,' and *ποιεω*, 'I make.' Watery excretions, such as sometimes take place in Hydropics.

HYDROPOTA, *Pota'tor Aquæ*, from *ὑδωρ*, 'water,' and *ποτις*, 'a drinker.' A *Water Drinker*. One who drinks only water, or drinks it in an extraordinary quantity.

HYDROPS, from *ὑδωρ*, 'water,' *Phlegma'tia*, *Dropsy*, *Hy'deros*, *Affectus hydero'des*, *Hydropisis*, *Hydron'osus*, (F.) *Hydropsie*. A preternatural collection of a serous fluid in any cavity of the body, or in the cellular texture. When the cellular texture of the whole body is more or less filled with fluid, the disease is called *Anasarca* or *Leucophlegmatia*;—and when this variety is local or partial, it is called *Edema*. The chief dropsies, designated from their seat are:—*Anasarca*, *Hydrocephalus*, *Hydrorachitis*, *Hydrothorax*, *Hydropericardium*, *Ascites*, *Hydrometru*, *Hydrocele*, &c. *Encyst'ed Dropsy*, *Hydrops sacca'tus*, *in carcerat' vel cyst'icus*, is that variety, in which the fluid is enclosed in a sac or cyst; so that it has no communication with the surrounding parts. *Dropsy of the Ovarium*, *Hydrops Ova'rii*, *Ascites Ova'rii*, *Ascites sacca'tus*, is an instance of this variety. Dropsy may be active or passive. The former consists in an increased action of the exhalants, so that those vessels pour out much more fluid than is absorbed: the latter arises from a state of atony of the absorbent vessels, which allows of an accumulation of fluid. It may also be *mechanical*, or produced by obstructions to the circulation, as in cases of diseased liver. Active dropsy, occurring accidentally in a sound individual, generally ends favourably. That which supervenes on other diseases, or is symptomatic of some internal affection, is rarely curable. The treatment consists in the use of all those remedies, which act on the various secretions: so that the demand being increased, the supply will have to be increased accordingly; and in this manner some of the collected fluid may be taken up by the absorbents. To this end, bleeding, if the dropsy be very active; purgatives, diuretics, sudorifics, sialagogues, &c., are the remedies chiefly depended upon.

HYDROPS ABDOMINIS, *Ascites*—h. *Abdominis aereus*, *Tympanites*—h. *Articulorum*, *Hydrarthrus*—h. *Capitis*, *Hydrocephalus*—h. *Cavitatis columnæ vertebralis*, *Hydrorachis*—h. *Capitis*, *Hydrocephalus chronicus*—h. *Cellularis artuum*, *Edema*—h. *Cellularis totius corporis*, *Anasarca*—h. *Cerebri*, *Hydrocephalus internus*—h. *Glottidis*, *Edema of the Glottis*—h. *ad Matulam*, *Diabetes*—h. *Medullæ spinalis*, *Hydrorachis*—h. *Metellæ*, *Diabetes*—h. *Oculi*, *Hydrophthalmia*—h. *Ovarii*, *Hydrooarion*—h. *Palpebræ*, *Hydroblepharon*—h. *Pectoris*, *Hydrothorax*—h. *Pericardii*, *Hydropericardium*—h. *Pulmonis*, *Hydrothorax*—h. *Pulmonum*, *Hydropneumonia*, *Edema of the Lungs*—h. *Sacci lachrymalis*, *Fistula lachrymalis*—h. *Scroti*, *Hydrocele*—h. *Siccus et flatulentus*, *Tympanites*—h. *Spinæ Hydrorachis*—h. *Thoracis*, *Hydrothorax*—h. *Tympanites*, *Tympanites*—h. *Umbilicalis*, *Hydromphalum*—h. *Uteri*, *Hydrometra*—h. *Vesicæ fellæ*, *Turgescentia vesiculæ fellæ*.

HYDROPYRETOS, from *ὑδωρ*, 'water,' and *πυρετος*, 'fever.' Fever with sweating.

Hydropyretos would be more proper, from *ἰδρωσ*, 'sweat.' See *Sudor Anglicus*.

HYDRORACHIS, from *ὑδωρ*, 'water,' and *ραχis*, 'the spine.' *Hydrorachitis*, *Hydrorrhachia*, *Hydrops Cavitatis Columnæ Vertebralis*, *Spina bifida*, *Hydrops medullæ spinæ*, *Hydrocele spinæ*, *Spinola*. A soft, frequently transparent, tumour; formed by the membranes of the spinal marrow being distended and projecting backwards from the vertebral canal, the posterior paries of which is wanting to a certain extent. The disease is often accompanied with paralysis of the lower extremities. It is congenital, and situate in the lumbar or sacral regions. It is almost always fatal:—the tumour rupturing, and death occurring instantaneously. On *dissection*, a simple separation or complete absence of the spinous processes of the vertebræ is perceived, with, at times, destruction or absence of spinal marrow. The treatment is the same as in *hydrocephalus chronicus*; and, as in it, advantage seems occasionally to have been derived by puncturing with a fine needle.

HYDRORACHITIS, *Hydrorachis*.

HYDRORCHIS, *Hydrocele*.

HYDROSACCHARUM, *Aqua sacchara'ta*, (F.) *Eau sucrée*. Sugared water.

HYDROSARCA, from *ὑδωρ*, 'water,' and *σαρξ*, 'flesh.' A tumour, containing a fluid, as well as portions of flesh. Also, *Anasarca*, (q. v.)

HYDROSARCOCE/LĒ, from *ὑδωρ*, 'water,' *σαρξ*, 'flesh,' and *κελη*, 'a tumour.' *Sarcocydrocele*. A tumour, formed by a sarcocoele, complicated with dropsy of the tunica vaginalis.

HYDROSUDOPATHY, *Hydrosudotherapeia*.

HYDROSUDOTHERAPEIA, *Hydrop'athy*, *Hydrosudop'athy*, *Hydriatri'a*, from *ὑδωρ*, 'water,' *sudo*, 'I sweat,' and *θεραπευω*, 'I remedy.' A badly compounded word, formed to express the mode of treating diseases by cold water, sweating, &c.

HYDROSULPHURET'ED WATER, *Aqua hydrosulphura'ta simplex*, *Aqua hepatica*, (F.) *Eau hydrosulphurée simple*. (Sulphuret of iron 1000 parts, sulphuric acid 2000 parts, distilled water 4000 parts; add the water to the acid, and put the sulphuret of iron into a retort, to which a Wolff's apparatus of 5 or 6 vessels is adapted; the last containing about an ounce of potassa, dissolved in a quart of water. Pour the diluted acid gradually on the sulphuret: and, ultimately, throw away the water in the last vessel. *Ph. P.*) It is stimulant, diaphoretic, and deobstruent, (?) and is used in rheumatism, diseases of the skin, &c.

It has been, also, called *Ac'idum Hydrothion'icum liq'uidum*.

HYDROSULPHURETUM AMMONIACUM AQUOSUM, *Ammonia sulphuretum*—h. *Ammonicum*, *Ammonia sulphuretum*.

HYDROTHION, *Hydrogen*, sulphuretted.

HYDROTHORAX, from *ὑδωρ*, 'water,' and *θώραξ*, 'the chest,' *Hydrops Thoracis*, *Hydrops pectoris*, *Hydrops pulmonis*, *Dyspnœa et Orthopnea hydrothoracica*, (F.) *Hydropisie de Poitrine*, *H. des Plèvres*, *Dropsy of the Chest*. Idiopathic Hydrothorax, termed by Laënnec, *Hydropisie des plèvres*, *Dropsy of the Pleuræ*, by Piorry *Hydropleurie*, is a very rare disease, and very difficult of diagnosis. It generally exists

only on one side; which, if the fluid effused be considerable, projects more than the other. Dyspnœa, and fluctuation perceptible to the ear, are characteristic symptoms. When the chest is examined with the stethoscope, respiration is found to be wanting every where, except at the root of the lung. The sound is also dull on percussion.

Effusion into the chest, as a result of inflammation of some thoracic viscus, is as common as the other is rare. It is usually a fatal symptom. It has been called *symptomatic hydrothorax*.

In Hydrothorax, the course of treatment, proper in dropsies in general, must be adopted. Diuretics seem, here, to be especially useful; probably on account of the great activity of pulmonary absorption. Paracentesis can rarely, if ever, be serviceable.

HYDROTHORAX CHYLOSUS, Chylorhorrax—h. Purulentus, Empyema.

HYDROTICA, Hydragogues.

HYDROTIS, from 'ὕδωρ, 'water,' and *ως*, gen. *ωτος*, 'the ear.' Dropsy of the ear.

HYDRURESIS, Diabetes.

HYDRURIA, Diabetes. See Urine.

HYÈRES. This small town, agreeably situated on the declivity of a hill, about 2 miles from the Mediterranean, and 12 from Toulon, is the least exceptionable residence in Provence for the pulmonary invalid. It is in some measure protected from the northerly winds; but not sufficiently so from the *mistral* to render it a very desirable residence for the phthisical. Sir James Clark.

HYGEIA, Sanitas.

HYGIEIA, Hygiène, Sanitas.

HYGIEINOS, Salutary.

HYGIEIOLOGIA, Hygiène.

HYGIENE, (generally Anglicised and pronounced *Hy'geen*.) from 'ὑγιεία, 'health.' *Hygie'sis*, *Hygie'a*; *Conservat'va medic'na*; *Hygioc'log'ia*, from 'ὑγιής, 'healthy.' The part of medicine whose object is the preservation of health. It embraces a knowledge of healthy man, both in society and individually, as well as of the objects used and enjoyed by him, with their influence on his constitution and organs. See Regimen.

HYGIENIC. Same etymon. Relating to Hygiène—as 'hygienic precautions, hygienic rules,' &c. &c.

HYGIESIS, Hygiène.

HYGRA, from 'ὕδωρ, 'water,' or 'ὕγρος, 'humid.' Liquid plasters. *Hygreplast'ra*.

HYGREPLASTRA, Hygra.

HYGROBLEPHARICI, from 'ὕγρος, 'humid,' and *βλεφαρον*, 'eyelid.' *Hygrophthalmici*. The excretory ducts of the lachrymal gland have been so called.

HYGROL'OGY, *Zoöch'ymy*; from 'ὕγρος, 'humid,' and *λογος*, 'a discourse.' The anatomy of the fluids of the body.

HYGRO'MA, from 'ὕγρος, 'humid.' *Tumorcysticus ser'us*, *Cyst'is ser'us*. Dropsy of the bursa mucosæ.

HYGROMETRY, *Hygromet'ria*, *Hygrosco'pia*; from 'ὕγρος, 'humid,' and *μετρον*, 'measure.' The part of physics which concerns the measurement of the dryness or humidity of the atmosphere. It is probable, that diseases are as frequently caused by the varying moisture of the atmosphere, as by changes in its weight or

temperature. The *hygrometer* ought, consequently, to form part of every apparatus for medical meteorological observations.

HYGRON, Liqueor.

HYGROPHOBIA, Hydropobia.

HYGROPHITHALMICI, Hygroblepharici.

HYGROPISSOS. See *Pinus sylvestris*.

HYGROSCOPIA, Hygrometry.

HYGROTES, Liqueor.

HY'LE, 'ὕλη, *Mate'ria*, 'Matter.' *Materia Medica*; also, the Philosopher's Stone.

HYLE IATRICE, *Materia medica*.

HYLOPH'AGOUS, from 'ὕλη, 'wood,' and *φαγω*, 'I eat.' One that feeds upon the young shoots of trees, roots, &c. Hylophagous tribes yet exist in some parts of Africa.

HYMASTATICS, Hæmastatice.

HYMEN, 'ὑμην, which signifies 'marriage,' 'nuptial song,' 'membrane or pellicle.' *Clastrum*, seu *Flos*, seu *Sigillum*, seu *Custodia*, seu *Columna*, seu *Zona virgin'it'is*, *Circulus membran'us*, *Bacton*, *Intersep'tum virgin'al'e*, *Cento virgin'al'is*, *Argumentum Integr'it'is*, *Munimen'tum* seu *Zona Costit'it'is*, *Pannic'ulus hymen'us*, *Eugon*, *Valvula vag'inæ*, *Membran'ula lunat'a vaginæ*. The semilunar, parabolic, or circular fold, situate at the outer orifice of the vagina in virgins, especially during youth, and prior to menstruation. This membrane is ordinarily ruptured by the first venereal act, and is effaced by accouchement; some irregular flaps remaining, to which the name *Carun'culæ Myrtifor'mes* has been given, by reason of their resemblance to the leaves of the myrtle. Many circumstances of an innocent character may occasion a rupture or destruction of this membrane. It is often, indeed, found absent in children soon after birth; whilst it may remain entire after copulation. Hence, the presence of the hymen does not absolutely prove virginity; nor does its absence, incontinence; although its presence would be *primâ facie* evidence of continence.

HYMEN, Membrane—h. *Diaphratton*, *Mediastinum*.

HYMENÆA COURBARIL. See Anime.

HYMENODES, Membranous.

HYMENOG'RAPHY, *Hymenogra'phia*, from 'ὑμην, 'a membrane,' and *γραφω*, 'I describe.' That part of anatomy whose object is the description of the different membranes.

HYMENOL'OGY, *Hymenolog'ia*, from 'ὑμην, 'a membrane,' and *λογος*, 'a description.' A treatise on the membranes.

HYMENOR'RHAPHY, ! *Hymenorrha'phia*; from 'ὑμην, 'the hymen,' and *ραφην*, 'a suture.' A form of Elytrorrhaphy, (q. v.) in which the operation is performed in the natural situation of the hymen.

HYMENOT'OMY, *Hymenotom'ia*, from 'ὑμην, 'a membrane,' and *τομον*, 'I cut,' 'I dissect.' The part of anatomy which treats of the dissection of membranes. The term has also been applied to the incision of the hymen, practised in certain cases of imperforation of the vagina, in order to give exit to the blood, retained and accumulated in the cavity of the uterus.

HYOBASIOGLOSSUS, BasioGLOSSUS.

HYOCHONDROGLOSSUS, Hyoglossus.

HYODEOGLOSSUS, Hyoglossus.

HYO-EPIGLOT'TICUS. Belonging to the os hyoides and epiglottis. Some anatomists

have given the name *Hyo-epiglottic ligament* to a bundle of condensed cellular tissue, which passes from the posterior part of the body of the hyoid bone to the base of the epiglottic fibro-cartilage.

HYO-GLOSSO-BASI-PHARYNGIEN, Constrictor pharyngis.

HYOGLOSSUS, *Hyodeo-glossus* *Hyo-chondro-glossus*, *Hypsiloglossus*, *Cerato-glossus* of Douglas and Cowper: *Basio-Cerato-Chondro-glossus*. A large, thin, quadrilateral muscle, situate at the anterior and superior part of the neck. Its insertions, at three different points of the os hyoides, permit it to be divided into three portions:—the first (*Cerato-glossus* of Albinus) is attached to the great cornu of the os hyoides; the second, (*Basio-glossus* of Albinus,) arises from the superior part of the body of the same bone; and the third, (*Chondro-glossus* of Albinus,) arises from the lesser cornu and the cartilage, situate between the body and the greater cornu. The fibres of these three bundles are inserted into the lateral and inferior parts of the tongue. This muscle depresses the base of the tongue, or raises the os hyoides, when the tongue is fixed.

HYOID BONE, *Hyoides*, os.

HYOIDES, OS, *Os Bicornē*, *Os hypseloides*, *Os Lamboides*, *Os Gutturis*, *Os Linguae*, *Os Lingualē*, *Upsiloides*, *Ypsiloides*. The *Hyoid Bone*; from the Greek υ, and εἶδος, 'shape': having the form of the 'upsilon.' The hyoid bone is a very movable, osseous arch; of a parabolic shape; convex before, and suspended horizontally in the substance of the soft parts of the neck, between the base of the tongue and the larynx. This bone, separated entirely from the rest of the skeleton, is composed of five distinct portions, susceptible of motion on each other. The first and most central is the *body of the hyoid*, *Ossiculum médium Hyoidis*, which affords attachment to several muscles; the two others are lateral, and bear the name of *branches or greater cornua*. The last two are smaller, situate above the other, and are known under the name *lesser cornua*. The os hyoides is ossified from five points.

HYOIDES PRIMUS, *Sterneo-hyoideus*.

HYOIDES QUARTUS MUSCULUS, *Omo-hyoideus*.

HYOSCYAMUS, from υς, 'a swine,' and ζυκος, 'a bean.' *Faba suilla*, *Bengi*, *Jusquiamus*, *Henbane*, *Hyoscyamus niger*, *Apollina'ris altercum*, *Altercum*, *Agonē*, *Altercagenon*. (F.) *Jusquiamine*, *Fève a Cochon*, *Hannebane*, *Potellée*. The leaves and seeds are the parts used in medicine. Their odour is narcotic and peculiar; taste insipid and mucilaginous. The virtues are yielded to proof spirit. The *hyoscyamus* is narcotic, anodyne, antispasmodic, and slightly stimulant. It is used as a substitute for opium, where the latter disagrees; and is applied, externally, as a cataplasm in cancer and glandular swellings. Dose, gr. iij to x of the powder.

HYOSCYAMUS ALBUS or *White Henbane*, possesses similar virtues.

HYOSCYAMUS LUTEUS, *Nicotiana rustica*—h. *Peruvianus*, *Nicotiana tabacum*.

HYPACTICUS, Cathartic.

HYPÆMIA, from ὑπο, 'beneath,' and αἷμα, 'blood,' *Oligæmia*, *Anæmia*. Deficiency of blood.—Andral. Also, Extravasation of blood.

HYPAGOGÉ, Dejection.

HYPALÉIP'TRON, ὑπαλείπτρον, *Hypaleip'trum*, *Specillum*, *Spatha*. A sort of spatula for spreading ointments.—Hippocr.

HYPAMAURO'SIS, from ὑπο, 'under,' and *amaurosis*. Imperfect amaurosis, *Meramauro'sis*.

HYELATOS, Cathartic.

HYPE'NĒ, ὑπηνή. The beard, which grows under the chin, according to some. Also, the upper lip.—Vesalius.

HYPER, ὑπερ, 'above,' 'in excess.' Hence:

HYPERACU'SIS, *Hyperac'ose*, from ὑπερ, 'above,' and ακοή, 'audition.' Excessive sensibility of the organ of hearing.

HYPERÆ'MIA, *Hyperhæ'mia*, (F.) *Hyperémie*, *Angiohémie*, from ὑπερ, 'above,' and αἷμα, 'blood.' Prematural accumulation of blood in the capillary vessels. Congestion. (q. v.)—Andral.

HYPERÆMIA ACTIVA, Inflammation—h. *Hepatic*, *Hepatohæmia*.

HYPERÉMIE, *Hyperæmia*—h. *du Cerveau*, *Encephalohæmia*—h. *du Foie*, *Hepatohæmia*—h. *de la Moëlle épinière*, *Hypermyelohæmia*.

HYPERÆSTHESIS, *Hyperæsth'esia*, (F.) *Hypæresthésie*, from ὑπερ, 'above,' and αἴσθησις, 'the faculty of feeling.' Excessive sensibility.

HYPERAPH'IA, from ὑπερ, 'in excess,' and ἀφή, 'touch.' Excessive acuteness of touch.

HYPERAUXE'SIS, from ὑπερ, 'over,' 'above,' and αὐξησις, 'augmentation.' *Hyper-epidosis*. Excessive increase or enlargement of a part:—as *Hyperauxe'sis Ir'idis*, an excessive enlargement of the iris, so as to stop up the pupil.

HYPERBOL'IC (*Attitude*), ὑπερβολικός, 'excessive.' Galen, by this term, designates certain extraordinary attitudes, in which the limbs and vertebral column are in a state of complete extension or flexion.

HYPERBORE'AN, from ὑπερ, 'beyond,' and βορρæas, 'the north wind.' A race of men, found at the extreme north of the two continents, in the vicinity of the polar circle. It includes the Tibetans, Ostiaks, Kamtschadales, Laplanders, Samoiedes, Esquimaux, &c.

HYPERCARDIA, Heart, hypertrophy of the.

HYPERCATAR'IS, *Hyperine'sis*, *Hyperinos*, *Superpurgatio*, from ὑπερ, 'in excess,' and καθαρισ, 'purgation.' Superpurgation.

HYPERCERATOSSES, *Staphyloma* of the cornea.

HYPERCINESIA NERVOSA, see Irritable—h. *Uterina*, *Hysteria*.

HYPERCINESIS GASTRICA, *Hypochochondriasis*.

HYPERCONJUNCTIVITE, see Ophthalmia.

HYPERCORYPHO'SIS, ὑπερ, 'above,' and κορυφή, 'the vertex'; 'the extreme point of any thing.' The lobes of the liver and lungs.—Hippocr.

HYPERCRIN'IA, from ὑπερ, 'above,' and κρίνω, 'I separate.' A morbid increase in the quantity of the secretions.

HYPER'CRISIS, *Hyperdiac'risis*, same etymon. *Supercrê'tio*, *Superevacua'tio*. An excessive crisis, or evacuation; a flux.—A very violent, critical effort, or too copious critical evacuations.—Galen.

HYPERDIACRISIS, *Hypercrisis*.

HYPERDYNAMIA, *Hypersthenia*.

HYPERENCEPHALOTROPHIE; from *ὑπερ*, 'in excess,' *εγκεφαλον*, 'the encephalon,' and *τροφη*, 'nourishment.' Hypertrophy of the encephalon—Piorry.

HYPERENCEPHALUS, from *ὑπερ*, 'above,' and *κεφαλή*, 'the head.' A monster whose brain is situate in the skull.—G. St. Hilaire.

HYPERENDOSMOSE, Inflammation.

HYPEREPHIDROSIS, Ephidrosis.

HYPEREPIDOSIS, Hyperæuxesis.

HYPERERETHIS'IA, from *ὑπερ*, 'in excess,' and *ερεθίζω*, 'I excite.' Excessive irritability.

HYPERES'IA, *ὑπέρησις*, 'a ministry.' This word is sometimes applied to the organs;—when it means function.

HYPERÆSTHESIA, Hyperæsthesia.

HYPERETRIA, Midwife.

HYPERGENESIS, from *ὑπερ*, 'in excess,' and *γενεσις*, 'generation.' The excess of formative power, which gives occasion to monstrosities by excess of parts.

HYPERGEUS'TIA, *Hypergeus'is*, from *ὑπερ*, 'above,' and *γεύσις*, 'taste.' Excessive sensibility of the organ of taste.

HYPERHEMATOSIS, Inflammation.

HYPERHÆ'MIA, Hyperæmia.

HYPERHEPATOTROPHIE, *Hypertrroph'ia hep'atis*, (F.) *Hypertrrophie du Foie*; from *ὑπερ*, 'in excess,' *ἥπαρ*, 'the liver,' and *τροφη*, 'nourishment.' Hypertrophy of the liver.

HYPERICUM BACCIFERUM, *Arbus'cula gunnif'era Brazilien'sis, Cua-opia*. A Brazilian tree, whose bark emits a juice, when wounded, which resembles Camboe.

HYPERICUM PERFORATUM, *Herba Dæmonum, Andros'mum, Co'rion, Perforat'ed or Common St. John's Wort, Hyper'icum*, (F.) *Millepertuis ordinaire*. It is aromatic and astringent, and enters into a number of aromatic preparations; and, amongst others, into the *Palltranks*. The *Oil of St. John's Wort, O'leum hyper'ici, Balsamum hyper'ici simp'lex*, is made by infusing $\frac{3}{4}$ iv of the flowers in a quart of olive oil. It is vulnerary.

HYPERIDROSIS, from *ὑπερ*, and *ιδρώσις*, 'sweating.' Excessive sweating.

HYPERINESIS, Hypercatharsis.

HYPERINOS, Hypercatharsis.

HYPERMETROHÆMIE, Metrohæmia.

HYPERMYEOLOHÆ'MIA, (F.) *Hyperémie de la Moëlle Epinière*, from *ὑπερ*, 'in excess,' *μυελος*, 'marrow,' and *αἷμα*, 'blood.' Hyperæmia of the spinal marrow.

HYPERNEPHROTROPHIE, from *ὑπερ*, 'in excess,' *νεφρός*, 'kidney,' and *τροφή*, 'nourishment.' Hypertrophy of the kidney.

HYPERO-PHARYNGEUS, Palato-pharyngeus.

HYPERO'A, from *ὑπερ*, 'upon,' and *ωον*, 'a high place.' The palatine arch,—the base of the cranium.

HYPEROA, Palate.

HYPEROITIS, *Angi'na Palati'na*, (F.) *Inflammation du Palais*, from *Hyper'o'a*, 'the palate,' and *itis*, a suffix denoting inflammation. Inflammation of the velum palati.

HYPEROS, Pilum.

HYPEROSMIA, Hyperosphresia.

HYPEROSPHRES'IA, *Hyperos'mia*, from *ὑπερ*, and *οσφρησις*, 'smell.' Excessive acuteness of smell.

HYPEROSTOSIS, Exostosis.

HYPERPIMELE. See Polysarcia.

HYPERSARCHIDIOS, Physconia.

HYPERSARCO'MA, *Hypersarco'sis, Hypersarz'is*, from *ὑπερ*, 'above,' and *σὰρξ*, 'flesh.' A soft fungous excrescence, especially such as appears upon ulcerated parts.—Galen.

HYPERSARCOSIS, Excrescence, Fungosity.

HYPERSARXIS, Hypersarcoma.

HYPERSPLÊNOTROPHIE, Splenoncus.

HYPERSTHEN'IA, *Hyperdyna'mia, Hyperzoödyna'mia, Status inflammato'rius verus*; from *ὑπερ*, 'beyond,' and *σθένος*, 'strength.' Super-excitement. A morbid condition, characterized by over-excitement of all the vital phenomena.

HYPERSTHENICUS, Active.

HYPERTON'IA, *ὑπερ*, 'beyond,' and *τόνος*, 'tone.' Excess of tone in parts. It is opposed to atony.

HYPERTROPHÆ'MIA, from *ὑπερ*, 'above,' *τροφη*, 'nourishment,' and *αἷμα*, 'blood.' A state in which the plastic powers of the blood are increased.

HYPERTROPHIA CORDIS, Heart, hypertrophy of the—h. Hepatis, *Hyperhépatotrophie*—h. Lienis, Splenoncus—h. Splenis, Splenoncus.

HYPERTROPHIE DU CŒUR, Heart, hypertrophy of the—h. du Foie, *Hyperhépatotrophie*—h. de la Rate, Splenoncus.

HYPERTROPHY, *Hypertrroph'ia*, from *ὑπερ*, 'beyond,' and *τροφη*, 'nourishment.' The state of a part, in which the nutrition is performed with greater activity; and which, on that account, at length acquires unusual bulk.

HYPERURURESIS, Enuresis—h. Aquosa, Diabetes.

HYPERURORRHÉE, Diabetes—h. Saccharine, Diabetes (Mellitus.)

HYPERZOODYNAMIA, Hypersthenia.

HYPEX'ODOS, *ὑπεξόδος*, from *ὑπο*, 'beneath,' and *εξόδος*, 'passing out.' An alvine discharge or flux.—Hippocr.

HYPHÆMOS, Subcruentus.

HYPHYDROS, Hydropic.

HYPNOBASIS, Somnambulism.

HYPNOBATES, Somnambulist.

HYPNOBATESIS, Somnambulism.

HYPNO'DES, *ὑπνωδης*, from *ὑπο*, 'under,' and *ὑπνος*, 'sleep.' One, in a state of slumber or somnolency.

HYPNOLOG'TICA, *Hypnolog'icæ*. The part of Hygiène which treats of sleep.

HYPNOL'OGY, *Hypnolog'ia*, from *ὑπνος*, and *λογος*, 'a discourse.' Same etymon. A treatise on sleep.

HYPNOS, Sleep.

HYPNOTICUS, Anodyne, Somniferous.

HYPO, *ὑπο*, 'under,' 'sub.' Hence:

HYPO, Hypochondriasis.

HYPOCAPNISMA, Suffimentum.

HYPOCAPNISMOS, Fumigation.

HYPOCARO'DES, *Subsopora'tus*, from *ὑπὸ*, 'under,' and *καρὸς*, 'a heavy sleep.' One who is in a state approaching carus.—Hippocr.

HYPOCATHAR'SIS, from *ὑπο*, 'beneath,' and *καθάρσις*, 'purgation.' Too feeble purgation. A word opposed to hypercatharsis.—

HYPOCAUST'TUM, from *ὑπο*, 'beneath,' and *καίω*, 'I burn.' A name given to a stove, or any such contrivance, to sweat in. Also, a furnace in any subterraneous place, used for heating baths:—*ὑποκαυστον, Balnearium, Vaporarium*.

HYPOCERCHALEON, from *υπο*, and *κεχαλος*, 'hoarse.' Roughness of the fauces affecting the voice.—Hippocr.

HYPOCHLOROMELAS, *Sub pallide nigricans*, from *υπο*, *χλωρος*, 'green,' and *μελος*, 'black.' A term applied to one whose skin is pale, with a blackish hue.—Hippocr., Galen.

HYPOCHOILION, Abdomen.

HYPOCHONDRE, *Hypochondrium*, *Subcartilagineum*, *Regio Hypochondriaca*, *Hypochondriac Region*, from *υπο*, 'under,' and *χονδρος*, 'a cartilage.' Each lateral and superior region of the abdomen is so called, because it is bounded by the cartilaginous margin of the false ribs, which forms the base of the chest. There is a *right* and a *left hypochondrium*.

HYPOCHONDRIAC, *Hypochondriacus*; same etymon. Belonging to hypochondriasis. One labouring under hypochondriasis.

HYPOCHONDRIACISMUS, *Hypochondriasis*.

HYPOCHONDRIASIS. Same etymon. *Alusia hypochondriasis*, *Morbis hypochondriacus*, *Malum hypochondriacum*, *Hallucination hypochondriasis*, *Hypochondriacismus*, *Dyspepsia hypochondriasis*, *Pas'sio hypochondriaca*, *Affectio hypochondriaca*, *Anathymiasis*, *Hypercinetis gastrica*, *Splenes*, *Melancholia nervæ*, *M. flatulosa*, *Fomes ventriculi*, *Hypochondrism*, *Hypo*, *Splen*,—the *Vapours*, the *English Malady*, *Low Spirits*. (F.) *Hypochondrie*, *Maladie imaginaire*, *Maladie Anglaise*. This disease is probably so called, from the circumstance of some hypochondriacs having felt an uneasy sensation in the hypochondriac regions. The disease seems really to be, as Pinel has classed it, a species of neurosis, and of mental alienation, which is observed in persons, who, in other respects, are of sound judgment, but who reason erroneously on whatever concerns their own disease. *Hypochondriasis* is characterized by disordered digestion, without fever or local lesion; flatulence; borborygmi; extreme increase of sensibility; palpitations; illusions of the senses; a succession of morbid feelings, which appear to simulate the greater part of diseases; panics; exaggerated uneasiness of various kinds, chiefly in what regards the health, &c. Indigestion has, usually, been considered the cause of hypochondriasis. They are, unquestionably, much connected with each other: but there is every reason to believe, that the seat of the affection is really, though functionally, in the brain. The disease almost always appears at the adult age, most commonly in irritable individuals; and, in those exhausted, or rather in the habit of being exhausted, by mental labour, overwhelmed with domestic or public affairs, &c.

The treatment is almost entirely moral. The condition of the digestive function must, however, be accurately attended to.

HYPOCHONDRIISM, *Hypochondriasis*.

HYPOCHORESIS, Digestion.

HYPOCHYMA, Cataract.

HYPOCHYSIS HÆMATODES, *Hæmophthalmia*.

HYPOCISTUS, *Cytinus*.

HYPOCLEPTICUM, from *υπο*, 'beneath,' and *κλεπτω*, 'I steal.' A chymical vessel, formerly used for separating oil from water.

HYPOCOILON, from *υπο*, 'under,' and

κοιλον, 'a cavity.' A cavity, situate above the upper eyelid.

HYPOCOPHOSIS, Barycoia, Deafness.

HYPOCRANIUM, from *υπο*, 'under,' and *κρανιον*, 'the cranium.' A collection of pus between the cranium and dura mater.

HYPODERIS, Epideris.

HYPODERMATOMY, *Hypodermaton'ia*; from *υπερ*, 'under,' *δερμα*, 'the skin,' and *τομη*, 'incision.' The section of subcutaneous parts, as of tendons and muscles.

HYPODERMIS, Epideris.

HYPODESMIS, Bandage.

HYPOGALA, Hypopyon.

HYPOGAS'TRIC, *Hypogas'tricus*. Relating or belonging to the hypogastrium.

HYPOGASTRIC ARTERY, *A. Iliaca inter'na*, *A. Iliaca post'erior*, *A. pel'vienne*.—(Ch.) is the more internal of the two branches into which the primary iliac divides. It descends into the cavity of the pelvis, and gives off a considerable number of branches, which arise, at times, separately, at others, by common trunks. These branches are, 1. The *posterior*, i. e. the ilio-lumbar arteries, lateral, sacral, and gluteal. 2. The *anterior*, i. e. the umbilical, vesical, and obturator. 3. The *internal*, the middle hemorrhoidal arteries, uterine, and vaginal in women. 4. The *inferior*, i. e. the *ischiatric arteries*, and internal pudic.

HYPOGASTRIC OPERATION of lithotomy, (F.) *Taille hypogastrique*. The high operation, or that practised above the pubes.

HYPOGASTRIC PLEXUS, *Plexus sousmésentérique* of Winslow is situate at the lateral and posterior parts of the rectum and the *basfond* of the bladder. It is formed by the sacral nerves and the inferior mesenteric plexus, and gives off numerous filaments, which accompany the arteries, that pass to the rectum and genital organs.

HYPOGASTRIC VEIN furnishes nearly the same branches.

HYPOGASTRION, Abdomen.

HYPOGASTRIUM, *Hypogastrion*, from *υπο*, 'under,' and *γαστρι*, 'the stomach or belly;' *Etron*, *πτερον*, *Venter imus*, *V. parvus*, *Aqualiculus*, *Sumen*, *Rumen*. The lower part of the abdomen. The *Hypogastric region*, which extends as high as three fingers' breadth beneath the umbilicus, is divided into three secondary regions—one *middle* or *pubic*, and two *lateral* or *inguinal*.

HYPOGASTROCE'LE, from *υπο*, 'under,' *γαστρι*, 'the stomach or belly,' and *κληνη*, 'a tumour.' Hernia in the hypogastric region, occurring through the separated fibres of the lower part of the linea alba.

HYPOGASTROCELE, Hernia, hypogastric.

HYPOGASTRODIDY'MUS, *Did'y'mus Symphyohypogastricus*, *Ischiopages*, from *υπο*, 'under,' *γαστρι*, 'the belly,' and *διδυμος*, 'a twin.' A monstrosity in which twins are united by the hypogastrium.—Gurlt.

HYPOGASTRORIXIS, Eventration.

HYPOGLOSSIS, Ranula.

HYPOGLOSSUM, *Ruscus hypoglossum*, Ranula.

HYPOGLOSSUS, from *υπο*, 'under,' and *γλωσση*, 'the tongue.' That which is under the tongue.

HYPOGLOSSUS, **HYPOGLOSSAL NERVE**, *Nerv Hypoglosse* ou *Grand Hypoglosse*, *Hypoglossien*,

(Ch.) *Lingual N., Gustatory N., Lingualis Medius*, is the ninth pair of nerves of many anatomists. It arises by ten or twelve very fine filaments from the grooves, which separate the corpora pyramidalia from the C. olivaria; issues from the cranium by the foramen condyloideum anterius; and divides, near the angle of the jaw, into two branches; the one the *cervicalis descendens* or *descendens noni*. It forms, with the cervical plexus, a large anastomotic arch, and furnishes branches to several of the muscles of the neck. The other, the *lingual branch*, is the continuation of the principal trunk, and gives its numerous filaments to the muscles of the tongue and pharynx. The ninth pair communicates motion to the muscles to which it is distributed.

HYPOGLUTIS, from *υπο*, 'under,' and *γλουτος*, 'the nates.' The lower and projecting part of the nates.—Goræus.

HYPO'MIA, from *υπο*, 'under,' and *ωμος*, 'the shoulder.' The projecting part of the shoulder.—Castelli, Galen.

HYPO'MIA, Axilla

HYPONARTHECIE, *Hyponarthecia*, from *υπο*, 'under,' and *αρθριζ*, 'a splint.' A term used by M. Mayor for his mode of treating fractures by position only,—the limb resting upon a properly cushioned board or splint.

HYPONOMOS, *Ulcus subtile depascens*, from *υπο*, 'under,' and *νομω*, 'I feed.' A deep fistula or ulcer.

HYPONYCHON, from *υπο*, 'under,' and *ονυξ*, 'the nail.' *Echymo'ma Hyponychou*. Effusion of blood under a nail.

HYPOPE'DIUM, from *υπο*, 'under,' and *πους*, 'the foot.' A cataplasm for the sole of the foot.

HYPOPH'ASIS, from *υπο*, 'under,' and *φανω*, 'I appear.' That state of the eyes in which the white only is seen through the opening of the eyelids.—Hippocrates.

HYPOPHILEGMASIA, Subinflammatio.

HYPOPH'ORA, from *υπο*, 'under,' and *φερω*, 'I carry.' A fistulous ulcer.—Galen.

HYPOPH'THALMIA, Hypopyon.

HYPOPH'THALMION, from *υπο*, 'under,' and *οφθαλμος*, 'the eye.' That part under the eye where œdema generally commences in chronic diseases.—Hippocrates.

HYPOPHYSIS CEREBRI, Pituitary gland.

HYPOPLEURIOS, Pleura.

HYPOPO'DIA, from *υπο*, 'under,' and *πους*, 'the foot.' Remedies, as sinapisms, which are applied under the foot.

HYPO'PYON, *Hypopyum*, *Hypophthalmia*, *Pyophthalmus*, *Empy'e'is Oculi*, *Diap'y'e'is Oculi*, *Oculus purulentus*, *Luxella*, *Hypog'ala*, *Hypopyum lacteum*, *Pyo'sis*, *Abscessus Oculi*, *Paro'p'sis* *Staphylo'ma purulentum*; from *υπο*, 'under,' and *πυον*, 'pus;' because the pus is under the cornea. This name has been given to small abscesses between the laminae of the cornea, as well as to different purulent collections in the chambers of the eye; hence, some pathologists have distinguished *Hypo'pyon of the chambers*, and *Hypo'pyon of the Cor'nea*. In abscesses of the chambers, the purulent matter is mixed with the aqueous humour, which it renders turbid; and is deposited particularly at the lower part of the eye; forming behind the cornea a kind of whitish crescent, that rises more or less before the pupil, and closes

it entirely or in part. It requires the use of local and general antiphlogistics, and sorbefacients. At times, it is necessary to puncture the cornea and evacuate the pus.

HYPOPYUM LACTEUM, Hypopyon.

HYPORIN'ION, from *υπο*, 'under,' and *ριν*, 'the nose.' That part of the beard which grows beneath the nose. The mustaches. Also, the upper lip.

HYPOSAR'CA, from *υπο*, 'under,' and *σαρξ*, 'flesh.' *Hyposarcidios*, *Anasarca* (q. v.) In Linne's and in Cullen's Nosology, it is synonymous with *Physconia* (q. v.)

HYPOSARCIDIOS, *Anasarca*, *Hyposarca*.

HYPOSPA'DIAS, *Hypospadia*, from *υπο*, 'under,' and *σπαιω*, 'I draw.' A malformation, in which the canal of the urethra, instead of opening at the apex of the glans, terminates at its base, or beneath the penis, at a greater or less distance from the symphysis pubis. When the orifice of the urethra is very near the root of the penis, the scrotum is divided, as it were, into two great labia; and this malformation has often been taken for a case of hermaphroditism. *Hypospadias* is ordinarily incurable; and an idea has been entertained that it is the cause of impotence. It is not exactly so; but it renders impregnation less probable.

HYPOSPHAG'MA, from *υπο*, 'under,' and *σφαζω*, 'I kill.' The coagulated blood, which is collected when an animal is killed and used for food. Also, an effusion of blood, especially under the conjunctiva.

HYPOSPHAG'NA, *Hæmophthalmia*.

HYPOSTAPHYLE, *Staphylœdema*.

HYPOSTHENIC, Contrastimulant.

HYPOSTROPHE, *υποστροφη*, change of position, from *υπο*, and *στροφω*, 'I turn.' Act of a patient turning himself. Also, relapse, return of a disease.—Hippocrates, Foesius.

HYPOTH'ENAR, *Sub'vola*, from *υπο*, 'under,' and *θινω*, 'the palm of the hand or sole of the foot.'

HYPOTHENAR EMINENCE is the fleshy projection of the palmar surface of the hand, which corresponds with the little finger, and is supported by the fifth metacarpal bone. This eminence is formed by four muscles: the *Palmaris brevis*, *Adductor minimi digiti*, *Flexor brevis minimi digiti*, and *Opponens minimi digiti*. The name *Hypothenar* has also been given to different muscles of the hand. The *Hypothenar minimi digiti* of Riolan comprehended the *Abductor*, *Flexor brevis* and *Opponens minimi digiti*; and his muscle, *Hypothenar pollicis*, corresponded to the *Adductor*, and a portion of the *Flexor brevis pollicis*. Winslow called muscle *petit hypothenar* ou *hypothenar du petit doigt*, the *Adductor minimi digiti*.

HYPOTHENAR MINIMI DIGITI, *Flexor parvus minimi digiti*—h. Minor metacarpeus, *Abductor minimi digiti*—h. Riolani, *Flexor parvus minimi digiti*.

HYPOTHETON, Suppository.

HYPOTROPE, Relapse.

HYPOTROPIASMOS, Relapse.

HYPOUTRION, Abdomen.

HYPOZO'MA, from *υπο*, 'under,' and *ζωω*, 'I bind round.' *Membrana succin'gens*. A membrane or septum, as the mediastinum, diaphragm, &c.

HYPOOCRAS, Claret.

HYPSELOGLOSSUS, *Basioglossus*.

HYSILOGLOSSUS, Hyoglossus.

HYPNOSIS, Sublimation.

HYPTIASMA, Supination.

HYPTIAS'MOS, from *ὑπτιάζω*, 'I lie with the face upwards.' Lying in a supine posture. Also, inversion of the stomach, as in nausea, regurgitation, or vomiting.—Hippocrates, Galen.

HYSSOP, HEDGE, *Gratiola officinalis*.

HYSSOPITES. Ancient name of a wine, of which *Hyssop* was the chief ingredient, and which Dioscorides extolled in chronic inflammation of the chest. It was regarded as diuretic and emmenagogue.

HYSSOPUS, from the Hebr. *Azob*, *Cassia*, *Hyssopus officinalis*, Common *hyssop*. It has been chiefly used as an aromatic, stimulant, and pectoral, in the form of infusion.

HYSTERA, *ὑστερα*, *ὑστερη*, 'the uterus.' (q. v.) Hence:

HYSTERA, Secundines.

HYSTERAL'GIA, (F.) *Fortraiture*, from *ὑστερα*, 'the uterus,' and *αλγος*, 'pain.' Pain in the uterus. Irritable uterus, (F.) *Neuralgie de l'utérus*. Hippocrates uses the epithet *Hysteralgæ*, *ὑστεραλγίης*, for any thing that excites uterine pain; and, especially, for vinegar.

HYSTERALGIA LOCHIALIS, Dyslochia.

HYSTERELOSIS, Hysteroloxia.

HYSTERIA, *Hysterici'smus*, *Hysteris'mus*, *Hyperic'nia uteri'na*, *Utero adscensus*, *Suffocatio hyster'ica*, *Præfocatio matric'is*, *Syspa'sia hysteri*, *Malum hyster'icum*, *Vapo' res uteri'ni*, *Vapours*, *Hyster'ics*, *Hyster'ic fit*, *Affectio hyster'ica*, *Passio hysterica*, *Morbus hyster'icus*, *Strangulatio uteri'na*, from *ὑστερα*, 'the uterus.'

(F.) *Hystérie*, *Mal de Mère*, *Maladie imaginaire*. A species of neurosis, classed amongst the spasms by Sauvages and Cullen, and in the *Névroses de la génération*, by Pinel. It received the name *hysteria*, because it was reputed to have its seat in the uterus. It generally occurs in paroxysms; the principal characters of which consist in alternate fits of laughing and crying, with a sensation as if a ball set out from the uterus and ascended towards the stomach, chest, and neck, producing a sense of strangulation. If the attack be violent, there is, sometimes, loss of consciousness (although the presence of consciousness generally distinguishes it from epilepsy) and convulsions. The duration of the attacks is very variable. It appears to be dependent upon irregularity of nervous distribution in very impressible persons, and is not confined to the female; for well marked cases of hysteria are occasionally met with in men. During the fit:—dashing cold water on the face; stimulants, applied to the nose or exhibited internally, and antispasmodics form the therapeutical agents. Exercise, tranquillity of mind, amusing and agreeable occupations constitute the prophylactics.

HYSTERICISMUS, Hysteria.

HYSTERICIS, Hysteria.

HYSTÉRIE, Hysteria.

HYSTERISMUS, Hysteria.

HYSTERITIS, Metritis.

HYSTEROCELE, from *ὑστερα*, 'the womb,' and *κῆλη*, 'hernia.' *Hernia of the womb*. This is a rare disease. The womb may protrude through the inguinal or the crural canal, or through the lower part of the linea alba.

HYSTEROCELE NUDA, *Prolapsus uteri*.

HYSTERO-CYSTIC, *Hys'terocys'ticus*, from *ὑστερα*, 'the uterus,' and *κύστις*, 'the bladder.' Relating to the uterus and bladder. Some authors have called *Hystero-cystic Retention of urine*, that which is caused by the compression of the bladder by the uterus, during pregnancy.

HYSTERO-CYSTOCELE, from *ὑστερα*, 'the womb,' *κύστις*, 'the bladder,' and *κῆλη*, 'a tumour.' Hernia of the uterus complicated with displacement of the bladder.

HYSTEROID, *Hystero'ides*, *Hysteroi'des*, from *hysteria*, and *ειδός*, 'resemblance.' Resembling hysteria;—as a hysteroid disease, symptom, &c.

HYSTEROLOX'IA, *Hysterelo'sis*, *Obliq'uitas u'teri*, *Situs obli'quus uteri*, *Flexio seu versio incomple'ta uteri*, *Inclina'tio uteri*, *Metrolox'ia*, *Uterus Obli'quus*, *U. Inclina'tus*; from *ὑστερα*, 'the uterus,' and *λοξος*, 'oblique.' An oblique position of the uterus, occurring during pregnancy. *Anteversion of the uterus*, *Hysterolox'ia anterior*, *Antever'sio u'teri*, *Prona'tio uteri*, *Venter propendens*, and *Retroversion of the uterus*, *Hysterolox'ia posterior*, *Retrover'sio uteri*, *Reflex'io uteri completa*, are varieties.

HYSTEROMALA'CIA, *Hysteramalaco'sis*, *Malaco'sis uteri*, *Putrescent'ia u'teri gravidi*, from *ὑστερα*, 'the uterus,' and *μαλακία*, 'softness.' Softness of the uterus, during pregnancy, which renders it liable to rupture in labour.

HYSTEROMANIA, Nymphomania.

HYSTERON'CUS, from *ὑστερα*, 'the uterus,' and *ογκος*, 'tumour.' A tumour of the uterus.

HYSTEROPHYSE, *Physometra*.

HYSTEROPHYSIS, from *ὑστερα*, 'the uterus,' and *φύσις*, 'wind.' Distention of the uterus with air. *Emphysema uteri*.

HYSTEROPTOPHIA, *Physometra*.

HYSTEROPTO'SIS, from *ὑστερα*, 'the womb,' and *πτωσις*, 'fall.' *Prolapsus uteri*. Also *Inversio uteri*. In a general sense, a protrusion of any of the genital organs or of excrescences from them into the genital passages: *Ædoptosis*.

HYSTEROPTOSIS, *Prolapsus uteri*—h. *Vaginæ prolapsus*, *Prolapsus vaginæ*.

HYSTEROSTOMAT'OMUS, from *ὑστερα*, 'the womb,' *στόμα*, 'orifice,' and *τεμνειν*, 'to cut.' An instrument invented by Couthouly, for dividing the os uteri, when it is important to deliver immediately, as in cases of convulsions.

HYSTERO'TOMATOCIA, *Cæsarean section*.

HYSTERO'TOMIA, *Cæsarean section*.

HYSTERO'T'OMUS, from *ὑστερα*, 'the womb,' and *τεμνειν*, 'to cut.' An instrument for dividing the womb by the vagina. It is a kind of *Bistouri caché*, and is intended to divide the cervix uteri.

HYSTRIASIS, *Hystri'ciasis*.

HYSTRICIASIS, *Hystri'ciasis*, *Hys'trix*, *Hystri'cis'mus*, *Cerostro'sis*, *Tricho'sis seto'sa*, from *ὑστερις*, 'a hedgehog or porcupine.' A disease of the hairs, in which they stand erect like the quills of a porcupine.

HYSTRICISMUS, *Hystri'ciasis*.

HYSTRIX, *Hystri'ciasis*.

I.

IAMATOLOGY, *Materia medica.*

IASIMOS, Curable.

IASIS, Curation.

IATERIA, *Medicina.*

IATRALEIP'TICE, *ιατραλειπτική τέχνη*, *Iatraliptic method*, same etymon. The method of treating diseases adopted by the Iatraliptes, that is, by friction chiefly.

IATRALEP'TES or IATRALEIP'TES, *Iatralipta*, *Medicus Unguentarius*; from *ιατρος*, 'a physician,' and *αλειφω*, 'I anoint.' One who treats diseases by unguents, frictions, and by external means generally. Prodicus, a disciple of Æsculapius, was the chief of the Iatraliptes.

IATREUSIOLOG'IA, from *ιατροεσις*, 'the exercise of the art of healing,' and *λογος*, 'a description.' The doctrine of the exercise of the healing art.—Reil.

IATREU'SIS, *ιατροεσις*. The exercise of the healing art.

IATRICE, *Medicina.*

IATR'INE, *ιατρίνη*. A female practitioner of medicine.

IATRON, *Iatre'on*, *Iatron*. The house of a physician or surgeon. Also, the physician's fee or *honorarium*.

IATROCHYMIA, *Chymiatría*, *Chemistry*, *medical*.

IATROGNOM'ICA, *Iatrognom'icé*; from *ιατρος*, 'a physician,' and *γινωσκω*, 'I know.' A knowledge of medical objects.—Hufeland.

IATRO-MATHEMATICAL PHYSICIANS, *Mechanical physicians*.

IATRON, *Iatron*.

IATROPHYSICS, *Physics*, *medical*.

IATROS, *Physician*.

IATROTECHNICE, *Medicina*, *Therapeutics*.

IBERIS, *Lepidium iberis*—i. *Sophia*, *Cardamine pratensis*.

IBICUIBA, *Becuibá*, or *Becuibá nux*. A species of nut from Brazil, the emulsive kernel of which is ranked amongst balsamic remedies.

IBIS, *ἰbis*. A bird held sacred by the Ægyptians. When sick, it is asserted, that it was wont to inject the water of the Nile into its fundament; whence, according to Langius, was learned the use of glysters.

IBISCHA MISMAI'VA, *Althæa*.

IBIXUMA, *Saponaria*.

ICE, *Sax. is*, *Glacies*, *Frozen water*. (F.) *Glacé*. Iced water is much used internally, as the best refrigerant in fever. It is, also, applied externally, in cases of external inflammation, as well as in phrenitic, and hernial affections, &c.

ICE-COLD, *Icy cold*, (F.) *Froid glacial*. A very strong morbid sensation of cold, compared by the patient to that which would be produced by the application of pieces of ice.

ICELAND, MINERAL WATERS OF. Hot springs are found in every part of Iceland. The most noted of these is one called Geyser, two days' journey from Hecla, and near Skalholt. The diameter of the basin is 50 feet; and the height, to which the water is thrown, often more than 100. The heat of the water is 212°.

ICEPLANT' *Mesembryanthemum crystallinum*.

ICHOR, *ἰχρὸς*, *Sanies*, (q. v.) *Sordes*, *Virus*,

Pus malignum, *Tabum*. A thin, aqueous, and acrid discharge.

ICHOROIDES, *Ichorous*.

ICH'OROUS, *Ichoro'sus*, *Ichoroï'des*. Belonging to or resembling ichor.

ICHTHYOCOL'IA, from *ἰχθυος*, 'a fish,' and *κόλλα*, 'glue.' *Colla Piscium*, *Fsinglass*, *Fish-glue*. (F.) *Icthyocolle*, *Colle de Poisson*. A name given to the dried fish bladder of the *Acipenser huso*, and other species of acipenser, which is almost wholly composed of gelatin, and is employed in medicine in the formation of nutritive jellies. It is, also, occasionally, used in anatomical injections. The *English Court Plaster* is made with it.

ICHTHYOPH'AGIST, *Icthyoph'agus*, from *ἰχθυος*, 'a fish,' and *φαγο*, 'I eat.' People, who feed habitually on fish;—generally the most uncivilized of mankind.

ICHTHYO'SIS, from *ἰχθυος*, 'a fish,' from the resemblance of the scales to those of a fish—*Lepido'sis Icthyi'sis*, *Lepra Icthyo'sis*, *Lepido'sis Icthyo'sis*, *Fishskin*, *Porcupine Disease*. A permanently harsh, dry, scaly, and, in some cases, almost horny texture of the integuments of the body, unconnected with internal disorder. Willan and Bateman have two varieties, *I. simplex*, and *I. cornea*. Alibert has three, the *I. nacrée* or *pearly*, the *I. cornée*, and the *I. pellagre* or *pellagra*.

ICHTHYOSIS PELLAGRA, *Pellagra*.

ICHTHYO'SIS SEBA'CEA, *Sebaceous Icthyo'sis*. A morbid incrustation of concreted sebaceous substance upon the surface of the epidermis, confounded, according to Mr. E. Wilson, with ichthyosis, to which it bears a close resemblance. In many cases there is neither redness nor heat, nor is the affection often accompanied by constitutional symptoms.

ICICA ARACOUCHINI. *Aracouchini* is a balsam extracted, by incision, from this tree in Guyana. The Galibis use it for healing wounds.

ICTERE, *Icterus*—i. *Bleu*, *Cyanopathy*—i. *des Nouveau-nés*, *Icterus Infantum*—i. *Noire*, *Melæna*.

ICTERITIA ALBA, *Chlorosis*—i. *Flava*, *Icterus*—i. *Rubea*, *Erysipelas*—i. *Rubra*, *Erysipelas*.

ICTERUS, *Icterus flavus*, *I. verus*, from *ἰκτις*, a species of weasel, whose eyes are yellow(?) *Morbus arcuatus vel aquatus*, *Aurigo*, *Aurigo*, *Morbus regius*, *Morbus luteolus*, *Cholelithia icterus*, *Cholihæmia*, *Suffusio auriginosa*, *Icteria flava*, *Ictus flavus*, *I. Icteroïdes*, *Cachexia icterica*, *Fellis suffusio*, *Fellis obstructio*, *F. Superfusio*, *Jaundice*, (F.) *Ictère*, *Jaunisse*, *Bile répandue*. A disease, the principal symptom of which is yellowness of the skin and eyes, with white feces and high-coloured urine. It admits of various causes; in fact, any thing which can directly or indirectly obstruct the course of the bile, so that it is taken into the mass of blood and produces the yellowness of surface; the bile being separated by the kidneys causes yellowness of urine, and its being prevented from reaching the intestine, occasions the pale-coloured feces. The *Prognosis*, in ordinary cases, is favourable;—when complicated with hepatic disease, unfavourable

The *treatment* is simple:—an emetic or purgative, given occasionally so as to elicit the return of the bile to its ordinary channels; light tonics; unirritating diet; cheerful company, &c.

ICTERUS ALBUS, Chlorosis.

ICTERUS INFANTUM, I. Neonatorum, or Yellow gum, Yellow gown, Pædicterus, Aurigo neophytorum, (F.) *ictère des nouveau-nés* is a common affection and frequently dependent upon obstruction of the choledoch duct, by the meconium. It requires time; and castor oil, occasionally.

ICTERUS MELAS, Melæna—i. Neonatorum, I. Infantum.

ICTODES FÆTIDUS, Dracontium fætidum.

ICTUS. 'A stroke or blow;' *Plege, Plaga, Ictus solis*, a stroke of the sun. See *Coup de soleil*. *Ictus*, also, means the pulsation of an artery; and the sting of a bee or other insect.

ICTUS, Blow—i. Cordis et arteriarum, Pulse—i. Solis, *Coup de soleil*.

IDEA, Ido'um, Ideach (? Paracelsus) (F.) *Idee*. The image or representation of an object in the mind; from *εἶδω*, 'I see.'

IDEACH, Idea.

IDEE, Idea.

IDENTITY (PERSONAL), Iden'titas, from *idem*, 'the same.' *Sameness*. It is sometimes a question in legal medicine to decide upon personal identity; that is, whether an individual be the same he represents himself to be. Physical marks form the great criteria.

IDEOL'OGY, Ideolog'ia, from *εἶδω*, 'I see,' and *λόγος*, 'a discourse.' The science of ideas. Intellectual philosophy.

IDIO-MIASMATA. See *Miasm*.

IDIOCRASIS, Idiosyncrasy.

IDIOCTONIA, Suicide.

IDIOPATH'IA or IDIOPATHE'IA, Protopath'ia, Pro'prio affectus, from *ἴδιος*, 'peculiar, proper,' and *πάθος*, 'an affection.' A primary disease; one not depending on any other.

IDIOPATH'IC, Pro'prio hab'itū; Constitutio'nē pro'pria pendens, Idiopath'icus. Primary affections and their symptoms are so denominated.

IDIOSYN'CRASY, Idiosyncrasis, Idiotro'phia, Idio'crasis, Idiosyncris'ia, from *ἴδιος*, 'peculiar,' *σύν*, 'with,' and *χρᾶσις*, 'temperament.' A peculiarity of constitution, in which one person is affected by an agent, which, in numerous others, would produce no effect. Thus shell-fish, bitter almonds, produce urticaria in some, by virtue of their idiosyncrasies. Others faint at the sight of blood, &c.

ID'IOT, Ido'ta, 'foolish, stupid, ignorant.' One who is fatuous or who does not possess sufficient intellectual faculties for the social condition, and for preserving himself from danger.

ID'IOTISM, ID'IOCY, ID'IOTCY, Idiotis'mus. Same etymon. *Mo'ria demens Ana'a, Mo'ria, Moro'sis, Fatu'itas, Amen'tia.* A species of unsound mind, characterized by more or less complete obliteration of the intellectual and moral faculties. It may supervene on mania and melancholia, when it is termed *Dementia*, but more commonly depends upon original conformation. It may, also, be symptomatic of organic disease of the brain, which has come

on after birth. Idiostism exists in various degrees. Some idiots are mere automata; exhibiting scarcely any sensibility to external impressions; others are capable of articulating a few words, and possess certain mental emotions to a limited extent. The physiognomy is usually vacant, step unsteady, and articulation imperfect or broken. The affection is almost always incurable.

IDIOTROPHIA, Idiosyncrasy.

IDOLUM, Hallucination, Idea.

IF, Taxis baccata.

IFFIDES, Plumbi subcarbonas.

IGNAT'IA AMA'RA. The systematic name of the plant, which affords *St. Ignatius's Bean, Faba Indica, Faba Sancti Ignatii, Faba febrifuga.* (F.) *Ignatie, Fève de Saint Ignace.* The seeds are bitter and poisonous; containing *Strychnia*, which see.

IGNATIE, Ignatia amara.

IGNAVIA, Inertia.

IGNIS, 'fire.' Hence:

IGNIS CAL'IDUS. 'A hot fire.' A violent inflammation, about to degenerate into gangrene.

IGNIS FRIG'IDUS. 'A cold fire,' a sphacelus.

IGNIS PERSICUS, Anthrax, Herpes zoster—i. Sacer, Erysipelas, Herpes zoster—i. Sancti Antonii, Erysipelas.

IGNIS SAPIEN'TIUM. The ancient name for the heat of horses' dung.

IGNIS SYLVAT'ICUS, I. sylvest'ris, I. volat'icus, I. vola'grius, Stroph'ulus sylvest'ris, S. volat'icus. (F.) *Feu sauvage, F. volage.* Probably, the *Porri'go larva'lis* or *crusta lactea* of infants. Also, a transient redness of the face and neck, sometimes observed in hysterical and chlorotic females.

IGNIS SYLVESTRIS, I. sylvaticus—i. Volagrius, I. sylvaticus—i. Volaticus, I. sylvaticus.

IGNIVORUS, Pyrophagus.

IGNYE, Poples.

IGNYS, Poples.

ILAPHIS, Arctium lappa.

ILECH, Y'lech, Ile'as, Ilias'ter, Ylid'ter, Elias'ter, Ilias'trum, Ile'ados, Ile'id'os, Ile'adum, Ili'adus. Terms, used by Paracelsus to designate the first matter:—the beginning of every thing.

ILEIADOS, Ilech.

ILEIADUM, Ilech.

ILEIAS, Ilech.

ILEIDOS, Ilech.

ILEITIS; from ileum, 'the intestine, ileum,' and *itis*, a suffix denoting inflammation. Inflammation of the jejunum.

ILEO-COLITIS, Enteritis.

ILEO-DICLIDITE. See *Typhus*.

ILEO-LUMBAR, Ileo-lumba'lis, or Ilio-lumbalis. Belonging to the ilium and lumbar region.

ILEO-LUMBAR or ILIO-LUMBAR ARTERY, Iliacomo'scular (Ch.), is given off by the hypogastric, opposite the base of the sacrum. It ascends behind the psoas muscle, and divides into two branches;—an ascending and transverse, which give off numerous ramifications to the neighbouring parts.

ILEO-LUMBAR LIG'AMENT, Ilio-lumbo-ver'tebral ligament, Vertebro-Iliac ligament, is a broad, membraniform, triangular ligament, extending horizontally from the transverse process of the 5th lumbar vertebra to the upper and posterior

part of the iliac crest. It unites the vertebral column with the pelvis.

IL'ION, Ileum, Eil'ion, Intest'num circumvolu'tum, from εἰλεω, 'to turn,' 'to twist.' Anatomists have given this name to the longest portion of the small intestine, which extends from the jejunum to the caecum. It was so called, from its forming a considerable number of convolutions.

ILEOSIS, Ileus.

ILES, Flanks.

ILEUS, Eil'eos, from εἰλεω, 'I twist or contract.' *Col'ica Ileus, Colica spasmod'ica, Ileus spasmod'icus, Chordap'sus, Passio Iliaca*,—the *Iliac Passion, Vol'eulus, Ile'o'sis, Misere'i'e mei, Colic'o'eulus, Tormen'tum*. (F.) *Colique de Misericorde, C. de Misere're*. A disease, characterized by deep-seated pain of the abdomen, stercoaceous vomiting, and obstinate constipation. It is often occasioned by hernia obstructing the passage of the faeces through a part of the intestinal canal. The term Ileus has been applied to various affections—to simple nervous colic, intussusception, and to strangulation of the small intestine, &c. Various remedies have been employed;—the majority for the purpose of procuring alvine evacuations: e. g. purgatives, in draught, pill, or glyster; suppositories, tobacco glysters; pure mercury; leaden bullets; antispasmodics and narcotics; blisters to the epigastrium; ice by the mouth or injected into the rectum. Some of these have, occasionally, succeeded,—especially the tobacco glyster, and ice to the tumour, where the disease has been occasioned by strangulated hernia. It is very dangerous.

ILEUS FLAVUS, Icterus—i. Icteroides, Icterus—i. Inflammatorius, Enteritis.

ILEX AQUIFOLIUM. The systematic name of the Common Holly, *Aquifolium, Agri-folium*. (F.) *Houx, H. commun ou Chêne vert*. The leaves of this plant have been recommended as tonic, astringent, and antiseptic, and have been prescribed in atonic gout; intermittents; dyspepsia, &c. The *Ilexine* or active principle has also been advised. It is obtained by dissolving the alcoholic extract of the leaves of the holly in water, and successively treating it with the subacetate of lead, sulphuric acid, and carbonate of lime. The filtered and evaporated product is then dissolved in alcohol: the mixture filtered and evaporated in shallow vessels.

ILEX MAJOR. From the berries of this tree, called by the Spaniards, *Bellotas*, a juice may be expressed, which forms a slightly astringent emulsion with water, and has been recommended by some Spanish physicians in humid cough, hæmoptysis, &c.

ILEX PARAGUENSIS. A native of Paraguay, which affords the celebrated *Matte*, or *Maté*, drunk in place of the Chinese tea by the people of Paraguay.

ILEX VOMITORIA, Ilex Cusi'ne, Cassi'na, Da-hoon holly, Apalachine Gallis, South-Sea Tea, Er'ergreen Cassi'né, Cassé'na, Yaupon, Yupon. (F.) *Thé des Apalaches, Houx Apalochine, Apalachine, Thé de la Mer du Sud*. A tree, indigenous in the southern parts of the United States. The leaves, when dried, are aromatic, stimulant, stomachic, and expectorant, and are used as tea. When fresh, they are emetic and cathartic.

ILIA, Flanks.

ILIAC, Ili'acus, from *Ili'a*, 'the flanks.' Relating to, or connected with, the flanks.

ILIAC ARTERIES, Art'erie Iliacæ. This term has been given to several arteries. The *Primary Iliacs*, (F.) *A. Iliacæ primitivæ*,—*Pelvicrurales*, (Ch.) arise from the bifurcation of the aorta, opposite the body of the 4th lumbar vertebra, and descend, in a divergent manner; until, opposite the sacro-iliac symphysis, they divide into two considerable trunks,—the *internal iliac* or hypogastric (which see) and the *external iliac*—*Portion Iliaque de la crurale*, (Ch.) This proceeds from the sacro-iliac juncture as far as the crural arch, when it assumes the name *Femoral Artery*. Before passing under the arch, it gives off two pretty considerable branches,—the *Epigastric* and the *Circumflexa Ilii*. This last, which is called, also, *anterior Iliac* by some anatomists,—*Circumflexe de l'Ilium*; (Ch.) leaves the external iliac at the crural arch. It ascends along the outer edge of the iliacus muscle, and divides into two branches,—an *internal* and *external*.

The *Iliaca Inter'na Minor* vel *Ilio-lumbalis* is a small artery, which sometimes arises from the hypogastric; at others, from the beginning of the gluteal. It is sent, chiefly, to the psoas and iliacus internus muscles.

ILIAC CREST, Crista Ilii, is the upper margin of the ilium. (F.) *Crête Iliaque*. It is very thick, and curved like the Italic S. It affords attachment to the broad muscles of the abdomen.

ILIAC FOSSÆ are two in number: the *internal*, the depression—presented by the ilium on its interior, and at the upper part—in which the *Iliacus internus* is lodged:—and the *external*, an excavation on the outer surface of the same bone, occupied by the *Glutei muscles*.

INTERNAL ILIAC MUSCLE, Iliacus Internus Muscle, Iliacus, Iliaco-trochanterien (Ch.); *Femur moven'tium septimus, Iliac muscle*, is situated in the fossa iliaca, and at the anterior and superior part of the thigh. It is broad, radiated, triangular; and is attached, *above*, to the two upper thirds of the fossa iliaca, and to the internal part of the iliac crest:—*below*, it terminates by a tendon, which is common to it and the psoas magnus, and is fixed into the lesser trochanter. When this muscle contracts, it bends the pelvis on the thigh, and conversely. It is also a rotator of the thigh outwards, and prevents the trunk from falling backwards.

ILIAC REGION is the side of the abdomen between the ribs and the hips.

ILIAC SPINES, or Spinous Prod'esses of the Ilium, are four in number. They are distinguished into *anterior* and *posterior*. Of the *anterior*, one is *superior*. It bounds the crista ilii anteriorly, and affords origin to the sartorius muscle. The other is *inferior*, and receives the tendinous origin of the rectus femoris.

The two *Posterior Iliac Spines* are divided, like the anterior, into *superior* and *inferior*. They afford insertion to strong ligaments, which unite the ilium with the sacrum.

ILIACO-TROCHANTERIEN, Iliacus internus.

ILIACUS, I. internus—i. *Externus, Pyramidalis*.

ILIADUS, Ilech.

ILIASTER, Ilech.

ILIASTRUM, Illech.

ILINGOS, Vertigo.

ILIO-ABDOMINAL, Obliquus internus abdominis—i. *Aponévrosi-fémoral*, Fascia lata muscle—i. *Costal*, Quadratus lumborum—i. *Cresti-tibial*, Sartorius—i. Femoral, Coxo-femoral—i. *Ischii-trochantérien*, Glutæus minimus—i. *Lombo-costo-abdominal*, Obliquus internus abdominis—i. Lumbalis, Ileo-lumbar, Iliaca interna minor arteria—i. *Lumbi-costal*, Quadratus lumborum—i. Lumbo-vertebral ligament, Ileo-lumbar ligament—i. *Pré-tibial*, Sartorius—i. *Pubo-costo-abdominal*, Obliquus externus abdominis—i. *Rotulien*, Rectus femoris—i. Sacral articulation, Sacro-iliac articulation—i. *Sacro-fémoral*, Glutæus major—i. *Trochantérien*, Glutæus medius—i. *Trochantérien petit*, Glutæus minimus.

ILIO-PECTINEA, belonging to the ilium and to the pecten or pubis.

ILIO-PECTINEAL EMINENCE is so called, from being formed by the junction of the ramus of the ilium with that of the pubis. It affords attachment to the psoas minor.

LINEA ILIO-PECTINEA, or *Linea innomina'ta*, is the projecting line or ridge of the ilium and pubis, which forms part of the brim of the pelvis.

ILIO-SCROTAL, *Ilio-scrotalis*. Professor Chaussier calls thus the external twig, furnished by the anterior branch of the first lumbar pair of nerves. It distributes its ramifications to the muscles of the abdomen, and to the integuments of the groin, pubes, and scrotum.

IL'ION, *Ilium*, *Haunch Bone*. The largest of the three bones, which constitute the os innominatum in the fetus and child. It was probably so called, from its seeming to support the intestine ileon; or, perhaps, because its crest is curved upon itself, from *εἰλεω*, 'I twist,' 'I roll.' This portion of the os innominatum is usually so called in the adult. The posterior surface is called *Dorsum*, the internal *Venter*. The upper semicircular edge is the *Crista* or *Spine*; at the anterior part of which is the *anterior and superior spinous process*; and, below, the *anterior and inferior spinous process*. At the back part of the spine are two *spinous processes*, the *posterior and superior*, and *posterior and inferior*. See Iliac.

ILITHY'IA, *εἰλεῦναι*, *Luci'na*, *Juno Lucina*. The Goddess who presided over parturient females, with the Greeks and Romans.

ILKESTON, MINERAL WATERS OF. Ilkeston is in Derbyshire, England, about eight miles from Nottingham. The water contains carbonates of lime and soda, chloride of calcium, sulphate of magnesia, sulphate of soda, carbonic acid, sulphohydric acid, and a little iron.

ILLACHRYMATIO, Epiphora.

ILLECEBRA, Sedum—i. Major, Sedum telephium.

ILLEGITIMATE, *Illegit'imus*, from *in*, 'negation or opposition,' and *legit'imus*, 'legitimate,' from *lex*, *legis*, 'law.' That which is contrary to law: which has not the conditions required by law,—as an illegitimate birth—one out of wedlock, sometimes requiring medico-legal discrimination.

ILLEGITIMATE OF BASTARD FEVERS, are those whose progress is anomalous.

ILL'CIUM ANISA'TUM, *Yellow-flow'ered*

Aniseed Tree, *Ani'sum stella'tum*, *Anisum Si-nen'se*, *Semen Badian*, (F.) *Anis de la Chine*, *A. étoilé*, *Badiane*. Fam. Magnoliaceæ. *Scz. Syst.* Polyandria Polygynia. The seeds are used like the aniseed. The same tree is supposed to furnish the aromatic bark, called *Cortex Anisi Stellati*, or *Cortex Lavola*.

ILLITIO, Inunction.

ILLOS, Eye.

ILLO'SIS, *ἰλλωσις*, from *ἰλλος*, 'the eye.' Distortion of the eyes. Strabismus, (q. v.)

ILLUSION, Hallucination.

ILLUSTRATIO, Illuminatum.

ILLUTA'TIO, from *in*, 'upon,' and *lutum*, 'mud.' A word used, by the ancients, for the act of covering any part of the body with mud, with therapeutical views.

IMAGINATION, *Imaginat'io*, *Figura'tio*, *Phanta'sia*, *Diamoe'na*, from *ima'go*, 'image.' The faculty of forming in the mind an assemblage of images and combinations of ideas, which are not always in connexion with external objects.

IMBALSAMATIO, Embalming.

IMBECILITY, *Imbecil'itas*. Weakness, especially of the intellect.

IMBERBIS. One devoid of beard.

IMBIBITIO, Absorption.

IMBIBITION, *Imbibit'io*, *Emp'tosis*, *Endosmose*, (q. v.) *Aspiration*, from *imbib'ere*, (*in*, and *bibere*), 'to drink, to imbibe.' The action, by which a body becomes penetrated by a liquid. See Endosmose. Many of the phenomena of absorption are owing to imbibition.

IMBEX NARIUM, Septum narium.

IMMERSUS, Subscapularis muscle.

IMMINENCE, *Imminen'tia*, from *im*, and *manere*, 'to stay,' staying over, or upon; impending. Some authors have designated, by this term, the period which precedes the invasion of a disease; and when certain indications foretell its approach.

IMMISSOR, Catheter.

IMMOBILITAS, Acinesia—i. Pupillæ, Amaurosis.

IMMOVABLE APPARATUS. See Apparatus, Immovable.

IMPAC'TION, *Impac'tio*, from *impin'gere*, (*im*, and *pangere*), 'to strike against.' A fracture of the cranium, ribs, or sternum, with depression of some of the fragments and projection of others externally. See Ecchyma.

IMPEDIMENTUM, Emphragma.

IMPERATORIA. 1. *Ostru'thium*, *Ostruthium*, *Astran'tia*, *Magistran'tia*, *Masterwort*, (old Fr.) *Austruche*. The roots of this plant were formerly considered *divinum remedium*. They are merely aromatic and bitter, and are not used.

IMPERFORA'TIO ANI, Atresia ani adnata.

IMPERFORA'TION, from *im*, 'in,' *per*, 'through,' and *forare*, 'to bore.' *Imperforat'io*, *Atre'sia*, *Atre'tismus*, *Cap'etus*. Absence of a natural aperture; as, of the mouth, anus, vulva, nostrils, &c. It is congenital, being dependent upon faulty conformation.

IMPERFORATION DE L'ANUS, Atresia ani adnata.

IMPETI'GO, from *impeto*, 'I infest.' *Darta*, *Der'bia*, *Im'petus*, *Peti'go*, *Ecpye'sis impeti'go*, *Phlysis impeti'go*, *Running Scall* or *Tetter*, *Crusted Tetter*, *Pustular* or *Humid Tetter*, *Scall*, *Cowrap*, (F.) *Dartre*, *D. crustacée*, *Lèpre humide*,

Meliagre. A word, used in various acceptations. In some writers, it is synonymous with itch. In others, it means a variety of herpes. Sauvages employs it as a generic term, under which he comprises syphilis, scorbutus, rachitis, elephantiasis, lepra, the itch, tinea, scrofula, &c. It forms, also, a genus in the class *Cachexia* of Cullen. In Bateman, it is the first genus of the 5th order, *Pustula*, and is defined—the humid or running tetter; consisting of small pustules, denominated *Psudrucia*. It is unaccompanied by fever; not contagious, or communicable by inoculation. He has five species:—the *I. figurata*, *I. sparsa*, *I. erysipelato'des*, *I. scab'ida*, and *I. rodens*. See *Psoriasis*.

IMPETIGO, *Figurata*, *Porrigio lupinosa*—*i. Pellagra*, *Pellagra*—*i. Ulcerata*, *Zerna*.

IMPETUS, *Impetigo*, *Paroxysm*.

IMPLIC'ITI MORBI, *Implic'iti, complic'iti Morbi*. Diseases, which exist in an organ; and produce, concurrently, disorders in other organs.

IMPLUVIUM, *Embrocation*. See *Bath*.

IMPOSTHUME, *Abscess*.

IMPOTENCE, *Acrati'a, Impotent'ia*, (F.) *Impuissance*, from *im*, 'priv,' and *potens*, 'able.' Loss of power over one or more of the members. Commonly, it means want of sexual vigour; incapacity for copulation, *Asty'sia, Asyno'dia, Adynamia viri'lis*. It has, also, been used synonymously with *sterility*. Impotence may be absolute or relative, constitutional or local, direct or indirect, permanent or temporary.

IMPOTENTIA, *Adynamia*.

IMPOVERISHED, *Eff'et'us, Depauperatus*, (F.) *Appauperi*. 'Having become poor,' originally from (L.) *pauper*, 'poor.' The Humorists applied this epithet to a humour, deprived of a part of its constituents, and particularly to the blood. This fluid was considered to be impoverished, when it was pale; without the proper consistence; and abounding in serum. It was, on the contrary, rich, in their opinion, when of a scarlet colour; possessing consistence, when it coagulated promptly, and the quantity of serum, compared with that of the clot, was by no means considerable. There is truth in these ideas.

IMPREGNATIO, *Pregnancy*.

IMPREGNATION, *Fecundation*.

IMPRESS'ION, *Impres'sio*, (in, and *premere, pressum*, 'to press,') *Pro's'bolé*, (F.) *Empreinte*. A more or less deep indentation which certain organs seem to make on others. The inequalities observable on the bones, which appear to be made by the suprajacent organs.

DIG'ITAL IMPRES'SIONS, are the depressions of various forms, observable at the inner surface of the cranium, which look, at first view, as if they were made with the fingers.

IMPU'BER, *Impu'bes, Impu'bis, Ane'bus, Capilla'tus*, from *in*, 'negation,' and *puber'tas*, 'puberty,' (F.) *Impubere*. One who has not attained the age of puberty.

IMPUBES, *Impuber*.

IMPUISSANCE, *Impotence*.

IMPULSE, **DIAS'TOLIC**, *Back stroke of the heart*. A jog or stroke, which has been termed the 'back stroke,' felt at the end of each pulsation, and which would seem to be owing to the refilling of the ventricles.

IMPULSE OF THE HEART, see *Heart*.

INANITION, *Inani'tio, Inanitas*, from *inanire*, 'to empty.' *Ceno'sis*. Exhaustion for want of nourishment. To die from inanition is to die from such exhaustion.

INAPPETENTIA, *Anorexia*.

INARTICULATIO, *Enarthrosis*.

INAURATION, *Inaura'tio*, from *in*, and *aurum*, 'gold.' The gilding of pills or boluses.

INCANTAMENTUM, *Charm*.

INCANTA'TION, *Incanta'tio, Incantamen'tum*, *Ep'odé*, from *in*, and *cantare*, 'to sing,'—for example, a magical song. A mode of curing diseases by charms, &c., defended by Paracelsus, Van Helmont, and others.

INCARCERATIO, *Chatonnement*—*i. Intestinorum interna, Enteremphrax*.

INCARCERA'TION, *Incarcera'tio*, from *in*, 'in,' and *carcer*, 'prison.' A hernia is said to be incarcerated, when, owing to constriction about the neck of the hernial sac or elsewhere, it cannot be reduced with facility. Incarceration is sometimes used in the same sense as strangulation.

INCARNANS, *Incarnati'vus, Sarcot'icus, Plero'ticus, Anaplero'ticus*, from *in*, and *caro, carnis*, 'flesh.' Medicines, which were fancied to promote the regeneration of the flesh. Certain bandages and the sutures have, also, been so called.

INCEN'DIUM, from *incen'dere*, (in, and *candere*,) 'to burn.' *Pyrex'ia, πυρεξια, Causis, Phlogo'sis*. A burning fever or any burning heat.—*Incen'dium febril'e, Incen'sio*.—Willis. Inflammation, (q. v.) *Phlegmon*, (q. v.)

INCENDIUM SPONTANEUM, *Combustion human*.

INCENSIO, *Incendium*.

INCERA'TION, *Incera'tio, Encero'sis*, from *cera*, 'wax.' The act of incorporating wax with some other body; or, rather, that operation whose object is to communicate to a dry substance the consistence of wax.

INCERNICULUM, from *incer'nere*, (in, and *cernere*,) 'to sift.' A strainer or sieve.

INCESSIO, *Bath, half, Semicupium*.

INCESSUS, *Walking*.

INCIDENTIA, from *incid'ere*, (in, and *cadere*,) 'to cut.' (F.) *Incisifs*. This name was formerly given to medicines to which was attributed the property of cutting thick or coagulated humours. The fixed alkalies, hydrosulphurets of alkalies, sulphurous water, &c. were considered to belong to this class.

INCISIFS, *Incidentia*.

INCISIO, *Cut*.

INCISION, *Incis'io, En'cope, Incisu'ra, Tome*, (F.) *Taillade*. A methodical division of the soft parts, with a cutting instrument.

INCISIVE, *Incisi'vus*. The *Fossa incisiva*, *F. myrtifor'mis*, is a depression in the superior maxillary bone, above the incisor teeth.

INCISIVE OR INCISOR TEETH, *Den'tes incisores, ton'ici, ctenes, dichasteres, gelasini, primo'res, raso'rii*. The teeth which occupy the anterior part of the upper and lower jaws are so called, because they are used for cutting the food in the manner of cutting instruments.

INCISIVUS, MUSCULUS, *Levator labii superioris proprius*—*i. inferior, Levator labii inferioris*—*i. Lateralis et pyramidalis, Levator labii superioris alæque nasi*—*i. Medius, Depressor alæ nasi*.

INCISORIUM, *Tom'on*. An operating table. A scalpel, (q. v.)

INCISURA, Incision.

INCISURES DE SANTORINI, Santorini, fissures of.

INCITABILITY, Irritability.

INCITAMENTUM, Stimulus.

INCITATIO, Stimulus.

INCLAVATIO, Gomphosis.

INCLINATIO, Decline.

INCLUSION, MONSTROSITY BY, *Emboîtement*.

INCLUSUS, Wedged.

INCOMPATIBLE, from *in*, 'negation,' and *competere*, 'to agree.' A substance, which cannot be prescribed with another, without interfering with its chemical composition or medicinal activity.

INCONTINENTIA, from *in*, 'negation,' and *contineo*, 'I contain.' 'Incontinence.' Inability to retain the natural evacuations. Abuse of the pleasures of love.

INCONTINENTIA ALVI, Diarrhœa—i. Urinæ, Enuresis.

INCORPORATION, *Incorporatio, Corporatio, Ensomato'sis*, from *in*, and *corpus*, 'a body.' An operation, by which medicines are mixed with soft or liquid bodies, in order to give them a certain consistence. Also, the thorough admixture of various substances.

INCRASSANTIA, *Incrassatio, Inviscantia, Spissantia, Epyctica, Condensantia, Pachynctica, Pycnotica*, from *in*, and *crassus*, 'thick.' Medicines, which were formerly believed to possess the power of thickening the humours, when too thin. All mucilaginous substances were so regarded.

INCRASSATIVA, Incrassantia.

INCREASE, *Incrementum, Auxesis*, from *in*, and *crescere*, 'to grow.' (F.) *Accroissement*. Augmentation of the size or weight of a body, by the application of new molecules around those which already exist.

INCREMENTUM, Augmentation, Increase.

INCRUSTATIO, Decussation.

INCRUSTATION, *Incrustatio*, from *in*, and *crusta*, 'a crust,' *Cominis*. The act of forming a crust on the surface of a body, as well as the crust itself. Also, the calcareous deposits or cartilaginous plates, which sometimes form in organs.

INCUBATION, *Incubatio*, from *incubare*, (*in*, and *cubare*), 'to lie upon.' This word, which is used in natural history for the sitting of birds upon their eggs, is employed, figuratively, in medicine, for the period that elapses between the introduction of a morbid principle into the animal economy and the invasion of the disease.

INCUBUS. Same etymon. *Ephialtes, Ephialtes nocturnus, Ephialtes, Epilepsia nocturna, Asthma nocturnum, Prurigo, Succubus, Onirotodynia gravis, Erethismus onirotodynia, Nocturna oppressio, Epibolê, Nightmare*. (F.) *Couchemar, Cauchemerie, Cochemar, Onirotodynie gravis*. Same etymon. A sensation of a distressing weight at the epigastrium during sleep, and of impossibility of motion, speech, or respiration; the patient at length awaking in terror, after extreme anxiety. The nightmare is, often, the effect of difficult digestion or of an uneasy position of the body. At other times, it occurs in consequence of severe emotions. The sensation of suffocation was

formerly ascribed to the person's being possessed, and the male spirits were called *incubæ*—the female, *succubæ*. The disease requires no particular treatment. The causes must be avoided.

INCUBUS VIGILANTIUM, *Ephialtes vigilantium, E. hypochondriaca, Daymare*. This is produced during wakefulness; the sense of pressure being severe and extending over the abdomen; respiration frequent, laborious, and constricted; eyes fixed; sighing, deep and violent; intellect undisturbed.

INCUNABULA, Swathing clothes.

INCUNEATIO. See Wedged.

INCURIA, Acedia.

INCURSUS ARTERIARUM, Pulse.

INCURVATIO, Gryposis.

INCUS, (*in*, and *cudo*, 'I hammer,') 'an anvil.' *Acmon, Os incudis simile, Ossiculum Incudi seu mola'ri denti comparatum*. (F.) *Enclume*. One of the small bones of the ear, so called from its fancied resemblance to a smith's anvil. It is situated in the cavity of the tympanum, between the malleus and orbiculaire. Its body is articulated with the malleus; its horizontal ramus which is the shortest, corresponds with the entrance of the mastoid cells, and its vertical ramus is articulated with the os orbiculaire. The incus is composed of a compact tissue, and is developed from a single point of ossification.

INDEX, *Digitus indicatorius, Lickanos, Deicticos*, from *indicare*, 'to point out.' The forefinger, index finger. See Digitus.

INDIAN'A, MINERAL WATERS OF. A medicinal spring, near Jeffersonville, is much frequented. Its waters are strongly impregnated with sulphur and iron.

INDICANT, *Indicans, Endeicticos*, (F.) *Indicatif*. Same etymon as *index*. Any thing which, in the course of a disease or in what precedes or accompanies it, concurs in pointing out the means to be used for its cure.

INDICATIF, Indicant.

INDICATING DAYS, *Dies Indices, D. Indicatio'rii, D. contemplantes*. (F.) *Jours indicateurs*. Hippocrates and others have thus called the middle day of the septenary; because they imagined, that indications were sometimes given, then, of the crises which would occur in the last day of the septenary.

INDICATION, *Indicatio, Accusatio, Delatio, Endeixis, Boethematicum Semeion*. The object proposed in the employment of any means, which are had recourse to for the cure of disease. It may also be defined—the manifestation afforded by the disease itself of what is proper to be done for its removal.

INDICATOR, Extensor proprius indicis. See Digitus.

INDICUS COLOR, Indigo.

INDIGENCE, Want.

INDIG'ENOUS, *Indig'ena*. Whatever is native in a country, in opposition to *exotic*; as an indigenous remedy, indigenous disease, &c.

INDIGESTION, Dyspepsia—i. Alkaline, see Dyspepsia—i. Neutral, see Dyspepsia.

INDIGITATIO, Intussusceptio.

INDIGNABUNDUS, Rectus externus oculi.

INDIGNATORIUS, Rectus externus oculi.

INDIGO, *Indigum, Indicus color, Pigmentum Indicum*. A dye-stuff, in small solid masses, of a deep azure blue colour, and devoid of smell and taste. It is obtained, by a fermentative

process, from the *Indigofera anil*, *I. argentea*, and *I. tinctoria*; and is sometimes used by the apothecary for colouring certain preparations. It has likewise been administered internally, of late, in spasmodic diseases, especially in epilepsy. The dose may be at first grains, but it may be elevated to drachms.

INDIGO, FAUX, *Galega officinalis*—i. Weed, *Sophora tinctoria*—i. Wild, *Sophora tinctoria*.

INDIGOFERA, *Sophora tinctoria*—i. Anil, see Indigo—i. *Argentea*, see Indigo—i. *Tinctoria*, see Indigo.

INDIGUM, Indigo.

INDISPOSITION, Mala dispositio. (F.) *Malaise*. A slight functional disturbance, which scarcely bears the name of disease.

INDOLENT, Indolens, from *in*, privative, and *dolere*, 'to be in pain.' Exhibiting little or no pain. An epithet, particularly applied to certain tumours.

INDOLENTIA, Anodynia.

INDUCTIO, Apagōgē, from *inducere*, *in*, and *ducere*, 'to lead.' It is used especially for the action of extending a plaster upon linen.

INDUCULA, Waistcoat, strait.

INDUMENTUM CORDIS, Pericardium—i. Nervorum, Neurilema.

INDURANS, (in, and duras,) *Scleroticus*. A medicine, which hardens the parts to which it is applied.

INDURATIO INTESTINORUM, Enteropathia cancerosa—i. *Maligna*, *Scirrhus*—i. *Telæ cellulose neonatorum*, see Induration.

INDURATIO, Induratio, Callositas, Indurescentia, (F.) *Endureissement*. That hardness, which supervenes, occasionally, in an inflamed part. It is one of the terminations of inflammation, and is owing to a change in the nutrition of the part. *Induration of the Cellular tissue, Induratio telæ cellulose neonatorum, Compact Œdéma, Callochus Infantum, Induratio cellulosa, Scleremia, Sclerema, Skinbound Disease*, (F.) *Endurissement du tissu cellulaire, Œdème du tissu cellulaire des nouveau-nés, Asphyxie lente des nouveau-nés*, is a disease which attacks infants a few days after birth, and which Chaussier has proposed to call *Sclérème*, from *σκληρός*, 'hard.'

INDURESCENTIA, Induration.

INDUSIUM, Chitoniscos. Strictly, 'a shirt,' 'a small tunic;' but some anatomists have so called the amnion, (q. v.)

INEDIA, Fasting.

INERTIA, from *in*, privative, and *ars, artis*, 'art,' (?) *Ignavia*. Sluggishness, inactivity.

INERTIA OF THE WOMB, (F.) Inertie de la matrice. The diminution and even total cessation of the contractions of the uterus during labour; as well as the species of languor into which it sometimes falls after the expulsion of the fetus.

INERTIE DE LA MATRICE, Inertia of the womb.

INESIS, Cenosis.

INETHMOS, Cenosis.

INFANCY, Infantia, from *in*, 'negation,' and *fans*, from *fari*, 'to speak.' Early childhood, Childhood, *Nepiotes, Paidia*. (F.) *Enfance*. It generally includes the age from birth till the seventh year.

INFANS, Paidion, Nepion, (F.) *Enfant*. An infant; a child; one in infancy.

INFANTICIDE, Infanticidium, Tecnoctonia, from *infans*, 'a child,' and *cedere*, 'to kill.

The murder of a child newly born, or on the point of being born. It may be perpetrated by the mother, or by some other person; either by *commission*, i. e. in consequence of a direct, voluntary act;—or by *omission* of those cares, which are necessary for the preservation of the new-born.

INFARCTUS INTESTINORUM, Enteremphraxis—i. *Lactei extremetatum*, Phlegmatic dolens.

INFECTION. See Contagion.

INFERNAL, Infernus; 'relating to hell.' A name applied to a caustic—*Lapis Infernalis*—on account of its strong, burning properties.

INFIBULATIO, Fibulatio, Infibulatio, Anteriorismus; from *fibula*, 'a clasp,' (F.) *Boucllement*. An operation, formerly practised, which consisted in passing a ring through the prepuce, after having drawn it over the glans;—in order to prevent coition. The ancients employed infibulation with their gladiators, to preserve all their strength by depriving them of venery. In the women, to preserve their chastity, the ring was passed through the labia majora.

INFILTRATION, Infiltratio, from *filtrare*, 'to filter.' Effusion (q. v.) The accumulation of a fluid in the cells of any texture, and particularly of the cellular membrane. The fluid effused is ordinarily serous;—sometimes blood or pus, fæces or urine. When infiltration of serum is general, it constitutes *anasarca*; when local, *œdema*.

INFIRMARIUM, Hospital.

INFIRMARY, Hospital.

INFIRMATORIUM, Hospital.

INFIRMIER, (F.) from *infirmus*, (*in*, negative, and *firmus*), *Infirmarius, Nosocomus, Curator infirmorum*. One employed in an hospital or infirmary to take care of the sick.

INFIRMITY, Infirmitas, Asthenia, Invalentudo. Any disease, which has become habitual, either owing to its chronic character, or its numerous relapses.

INFLAMMATIO, Phlegmon—i. *Abdominalis, Encelitis*—i. *Auris, Otitis*—i. *Bronchiorum, Bronchitis*—i. *Cæci, Typhlo-enteritis*—i. *Capitulæ lentis, Phacohymenitis*—i. *Conjunctivæ*, see *Ophthalmia*—i. *Corneæ, Ceratitis*—i. *Cystidis fellæ, Cholecystitis*—i. *Epiglottidis, Epiglottitis*—i. *Faucium, Cynanche, Isthmitis*—i. *Gastritis, Gastritis*—i. *Gingivæ, Ulitis*—i. *Hepatis, Hepatitis*—i. *Hepatis lenta, Hepatitis*, (chronic)—i. *Interna, Empresma*—i. *Intestinorum, Enteritis*—i. *Iridis, Iritis*—i. *Jecoris, Hepatitis*—i. *Laryngis, Laryngitis*—i. *Lienis, Splenitis*—i. *Medullæ Spinalis, Myelitis*—i. *Nervorum, Neuritis*—i. *Oculorum, Ophthalmia*—i. *Œsophagi, Œsophagitis*—i. *Omenti, Epiploitis*—i. *Ovarii, Oaritis*—i. *Pancreatis, Pancreatitis*—i. *Parotidum, Parotitis, Cynanche parotidæ*—i. *Pectoris acuta, Pneumonia*—i. *Pericardii, Pericarditis*—i. *Peritonæi, Peritonitis*—i. *Pharyngis, Cynanche pharyngææ*—i. *Phrenitis, Phrenitis*—i. *Pleuræ, Pleuritis*—i. *Pneumonica, Pneumonia*—i. *Pulmonum, Pneumonia*—i. *Renum, Nephritis*—i. *Retinæ, Dictyitis, Retinitis*—i. *Scleroticæ, Sclerotitis*—i. *Septi transversi, Diaphragmitis*—i. *Stomachi, Gastritis*—i. *Testium, Hernia tumoralis*—i. *Tonsillarum, Cynanche tonsillaræ*—i. *Tympani, Tympanitis*—i. *Urethræ, Gonorrhæa*—i. *Uteri, Metritis*—i. *Uteri cataractalis*, see *Metritis*—i. *Uvulæ, Uvulitis*—i. *Ventriculi, Gastritis*—i. *Vesicæ, Cystitis*—i. *Vesicæ, fellæ, Cholecystitis*.

INFLAMMATION, *Inflammati'o*, from *in*, 'within,' and *flamma*, 'flame,' 'fire;' *Phlegmonë*, *Phlogosis*, *Phlegmasia*, *Causo'ma*, *Hyperendosmose* (Dutrochet), *Incendium*, *Hyperhæmatosis*, *Hyperæmia act'va*, *Phlebotero'sis ephratica*, *Angiite*, is so called in consequence of the acute or burning pain, felt in a part affected with it. An irritation in a part of the body occasioned by some stimulus;—owing to which the blood flows into the capillary vessels in greater abundance than natural, and those vessels become over-dilated and enfeebled; whence result pain, redness, heat, tension, and swelling; symptoms, which appear in greater or less severity, according to the structure, vital properties, and functions of the part affected, and its connexion with other parts, as well as according to the constitution of the individual. The inflammations of the cellular and serous membranes greatly agree;—and those of the mucous and skin; the former being more active, and constituting the *phlegmonous* variety;—the latter, the *erythematic* or *erysipelatous*. Inflammation may end by resolution, suppuration, gangrene, adhesion, effusion, or induration. Each of the inflammations of internal organs has received a name according to the organ affected;—as, *gastritis*, *cephalitis*, *enteritis*, *hepatitis*, &c. Besides the inflammations, essentially morbid, there is an instinctive kind established for the union of parts, which have been divided; whether the union take place *immediately*, or by the aid of an intermediate body. This is the *adhesive inflammation*. See Adhesion, Callus, Cicatrix. Broussais considered that the term *inflammation* should include every local exaltation of the organic movements, which is sufficiently great to disturb the harmony of the functions, and disorganize the texture in which it is situate. He, farther, extended the name *inflammation* to irritations, which do not induce disorganization of the textures, and which had been previously, and are still, called *fevers*.

External inflammation is easily detected by the characters already mentioned:—*internal*, by disturbance of function and pain upon pressure; but the last sign is often not available. Both forms require the removal of all irritation, and the reduction of vascular excitement and nervous irritability; hence, blood-letting—local and general—sedatives, refrigerants, and counter-irritants become valuable remedies in almost all cases of inflammation.

INFLAMMATION DES AMYGDALES, *Cynanche tonsillaris*—*i. des Artères*, *Arteritis*—*i. of the bladder*, *Cystitis*—*i. de la Bouche*, *Stomatitis*—*i. des Bronches*, *Bronchitis*—*i. du Cæcum*, *Typhlo-enteritis*—*i. of the Cæcum*, *Typhlo-enteritis*—*i. du Cerveau et du Cervelet*, *Phrenitis*—*i. du Cœur*, *Carditis*—*i. du Colon*, *Colitis*—*i. de la Conjonctive*, see *Ophthalmia*—*i. of the Diaphragm*, *Diaphragmitis*—*i. Diphtheritic*, *Angina pellicularis*—*i. of the Ear*, *Otitis*—*i. de l'Epiglottite*, *Epiglottitis*—*i. de l'Estomac*, *Gastritis*—*i. of the Eye*, *Ophthalmia*—*i. du Foie*, *Hepatitis*—*i. des Gencives*, *Ullitis*—*i. General*, *Synocha*—*i. Internal*, *Empresma*—*i. des Intestins*, *Enteritis*—*i. of the Iris*, *Iritis*—*i. of the Kidney*, *Nephritis*—*i. de la Langue*, *Glossitis*—*i. of the Larynx*, *Laryngitis*—*i. of the Liver*, *Hepatitis*—*i. de la Luelle*, *Uvulitis*—*i. of the Lungs*, *Pneumonia*—*i. de la Matrice*, *Metritis*—*i. de la Membrane alvéolo-dentaire*, *Periodontitis*—*i. de*

Membrane séreuse céphalo-rachidienne, *Menigitis*—*i. of the Mesentery*, *Mesenteritis*—*i. de la Moëlle épinière ou rachidienne*, *Myelitis*—*i. of the Mouth*, *pseudomembranous*, *Stomatitis pseudomembranous*—*i. of the Mouth*, *pultaceous*, *Aphthæ*—*i. des Nerfs*, *Neuritis*—*i. de l'Œil*, *Ophthalmia*—*i. de l'Oreille*, *Otitis*—*i. de l'Ovaire*, *Oaritis*—*i. du Palais*, *Hyperoitis*—*i. du Parenchyme pulmonaire*, *Pneumonia*—*i. de la Parotide*, *Cynanche parotidæa*—*i. du Pericarde*, *Pericarditis*—*i. of the Pericardium*, *Pericarditis*—*i. du Péritoine*, *Peritonitis*—*i. of the Peritonæum*, *Peritonitis*—*i. of the Pleura*, *Pleuritis*—*i. de la Plèvre*, *Pleuritis*—*i. de la Rate*, *Splenitis*—*i. des Reins*, *Nephritis*—*i. Spongoid*, *Hæmatodes Fungus*, see also *Encephaloid*—*i. of the Stomach*, *Gastritis*—*i. de la Testicule*, *Hernia humoralis*—*i. of the Testicle*, *Hernia humoralis*—*i. des Tissus blancs*, *Angioteleucitis*—*i. of the Tongue*, *Glossitis*—*i. des Veines*, *Phlebitis*—*i. de la Vésicule du Fiel*, *Cholecystitis*—*i. de la Vessie*, *Cystitis*—*i. of the Womb*, *Metritis*.

INFLAMMATIUNCULA, *Subinflammatio* (q. v.) A superficial and often insignificant inflammation of the skin, as in many cutaneous affections.—Most.

INFLAMMATORY, *Inflammato'rius*; belonging to inflammation;—as, *inflammatory tumour*, *inflammatory fever*, &c. The blood is said to be *inflammatory* when cupped or buffy.

INFLATIO, *Emphysema*, Puffiness, Colica flatulenta—*i. Parotidum*, *Cynanche parotidæa*—*i. Uteri*, *Physometra*.

INFLEXIO, *Campsis*.

INFLUENZA. The Italian for 'Influence,' *Influenza Europæa*, *Catar'rhus epidemicus*, *Febris catarrhalis epidemicæ*, *Catar'rhus à cont'agio*, *Rheuma epidemicum*, *Morbus Verveci'na*, *M. Arietis*, *Cephalal'gia contagiosa* (epidemics of the 16th and 17th centuries:) (F.) *Tac*, *Ladendo*, *Quinte*, *Florion*, *Coqueluche*, *Baraquette*, *Générale*, *Grippe*, *Follette*, *Grenade*, *Coquette*, *Petite Poste*, *Petit Courier*, *Allure*, *Epidemic catarrh*. A severe form of catarrh occurring epidemically, and generally affecting a number of persons in a community. See *Catarrh*, *Epidemic*. Gluge, from his investigations, considers, that the following is the chronological order of the return of the influenza:—14th century, 1323, 1326—15th century, 1410, 1411, 1414—16th century, 1510, 1557, 1562, 1574, 1580, and 1593—17th century, 1658, 1669, 1675, 1693—18th century, 1708, 1712, 1729, 1732, 1733, 1742, 1743, 1761, 1762, and 1775—19th century, 1800, 1803, 1831, and 1833. To these may be added 1837, and 1843.

INFLUENZA EUROPEA, *Influenza*.

INFRA-ATLOIDÆUS, *Sub-atloidæus*.

INFRA-AXOIDÆUS, *Sub-axoidæus*.

INFRA-COSTALES. See *Intercostal muscles*.

INFRA-ORBITAR, *Sub-orbitar*.

INFRA-SCAPULARIS, *Subscapularis*.

INFRA-SPINATUS, from *infra*, 'beneath,' and *spina*, 'a spine.' Situate beneath the spine of the scapula.—*Infra-Spina'lis*.

INFRA-SPINA'TA FOSSA, (F.) *Fosse sous-épineuse*. A large excavation on the posterior surface of the scapula, beneath its spine. It is filled by the

INFRA-SPINATUS Muscle. *Grand Scapulo-trochitérien*, *Superscapula'ris inferior* (Ch.), (F.)

Sous-épineux, which is broad, flat, and triangular. It is attached, by its base, to the three inner quarters of the fossa; and is inserted, by a long tendon, in the middle part of the great tuberosity of the humerus, (*Trochiter*.) It turns the arm outwards, and, when the arm is elevated, carries it backwards.

INFRINGENS, Corrigent.

INFUNDIBULUM, (*in*, and *fundere*, 'to pour out.')

A Latin word signifying a *Funnel*:—*Choa'nē*, *Chonos*. (F.) *Entonnoir*. A name, given to many parts which, more or less, resemble a funnel. It is particularly appropriated to the following organs:—

INFUNDIBULUM OF THE BRAIN, (F.) *Pelvis seu Choana*, seu *Cyathus*, seu *Scyphus*, seu *Concha*, seu *Lacu'na*, seu *Em'bolum*, seu *Aquaduct'us*, seu *Labrum*, seu *Conca'r'itas conchula'ris*, seu *Processus orbicula'ris Cer'ebri*, *Entonnoir du ventricule moyen du cerveau*—*Tige pituitaire*, *Tige sphenoidale*. A depression in the inferior paries of the middle ventricle, above the pituitary gland. It was, anciently, regarded as a canal by which the fluid, collected in the ventricles of the brain, was evacuated and poured into the nasal fossæ.

INFUNDIBULUM OF THE COCHLEA, *Scyphus Vieussenii*, *S. auditor'ius*, *Cucull'us*, *Cuna'lis Scala'rum commun'is*. This, with the modiolus, forms the nucleus around which the gyri of the cochlea pass. It is an imperfect funnel, the apex of which is common with that of the modiolus; and the base is covered with the apex of the cochlea, termed *Cu'pola*.

In *Surgery*, infundibula are used to direct steam or vapours; to conduct the actual cautery to certain morbid parts, &c.

INFUNDIBULUM OF THE ETHMOID BONE. It is one of the anterior cells of that bone, which is broad and expanded above, and narrow below; opening, above, into the frontal sinus; below, into the anterior part of the middle meatus of the nasal fossæ.

INFUNDIBULA OF THE KIDNEYS. See *Calix*.

INFUNDIBULUM LACHRYMALE, Lachrymal Sac.—I. *Ventriculi*, *Œsophagus*.

INFUSION, *Infusio*, *En'chysis*, from *infundere*, (*in*, and *fundere*;) 'to pour in,' 'to introduce.' A pharmaceutical operation, which consists in pouring a hot or cold fluid upon a substance, whose medicinal virtues it is desired to extract. *Infusion* is, also, used for the product of this operation. In *Surgery*, infusion—*Chirurg'ia infusoria*, *Ars clysmatica nova*—is the act of introducing into the veins medicinal substances, by aid of an instrument called *Infusor*. This mode of introducing medicines was called the *Ars infusoria*.

INFUSION OF ANGUSTURA, Infusum Cuspariæ—i. of Buchu, Infusum Diosmæ—i. of Calumba, Infusum calumbæ—i. of Cascarilla, Infusum cascariellæ—i. of Catechu, Infusum catechu compositum—i. of Chamomile, Infusum anthemidis—i. of Cinchona, Infusum cinchonæ—i. of Cloves, Infusum caryophyllorum—i. of Cusparia, Infusum cuspariæ—i. of Foxglove, Infusum digitalis—i. of Gentian compound, Infusum gentianæ compositum—i. of Hops, Infusum Humuli—i. of Horseradish, compound, Infusum armoraciæ compositum—i. of Linseed, Infusum lini compositum—i. of Mint, compound, Infusum menthæ compositum—i. of Orange-peel, compound, Infusum aurantii com-

positum—i. of Pinkroot, Infusum Spigeliæ—i. of Quassia, Infusum quassiæ—i. of Khatany, Infusum Krameriæ—i. of Rhubarb, Infusum rhei—i. of the Rose, Infusum rosæ compositum—i. of Sarsaparilla, Infusum Sarsaparillæ—i. of Senna, Infusum sennæ compositum—i. of Simarouba, Infusum simaroubæ—i. of Slippery elm, Infusum ulmi—i. of Thoroughwort, Infusum Eupatorii—i. of Tobacco, Infusum tabaci—i. of Valerian, Infusum valerianæ—i. of Virginia Snakeroot, Infusum Serpentariæ—i. of Wild-cherry, Infusum Pruni Virginianæ.

INFUSUM, *En'chyma*. The product of an infusion.

INFUSUM ACACIÆ CATECHU, I. Catechu compositum—i. Amarum vinosum, Vinum gentianæ compositum—i. of Angustura; I. Cuspariæ.

INFUSUM ANTHEMIDIS, *Infusion of Chamomile*. (*Anthemid. flor.* $\frac{3}{4}$ ss *aq. fervent*. Oj. Macerate for ten minutes in a covered vessel, and strain. *Ph. L.*) Dose, f. $\frac{3}{4}$ j to f. $\frac{3}{4}$ iss.

INFUSUM ARMORACIÆ COMPOSITUM, *Compound Infusion of Horseradish*. (*Armorac. rad. concis.*, *sinapis* cont. sing. $\frac{3}{4}$ j, *aqua fervent*. Oj. Macerate for two hours, and strain. Dose, f. $\frac{3}{4}$ j to f. $\frac{3}{4}$ ij.

INFUSUM AURANTII COMPOSITUM, *Compound Infusion of Orange Peel*. (*Aurant. cort. sicca.* $\frac{3}{4}$ j. *limon. cort. recent.* $\frac{3}{4}$ j, *caryoph.* cont. $\frac{3}{4}$ ss. *aq. fervent*. Oss. Macerate for 15 minutes, and strain. *Ph. L.*) Dose, f. $\frac{3}{4}$ iss to f. $\frac{3}{4}$ j.

INFUSUM CALUMBÆ, I. *Calombæ*. I. *Colombæ*, *Infusion of Calumba*, (*Calumb. rad. concis.* $\frac{3}{4}$ ss. *aq. fervent*. Oj. Macerate for two hours, and strain. *Ph. U. S.*) Dose, f. $\frac{3}{4}$ iss to f. $\frac{3}{4}$ ij.

INFUSUM CARYOPHYLLI, *Infusion of Cloves*. (*Caryoph. contus.* $\frac{3}{4}$ j. *aq. fervent*. Oj. Macerate for two hours, and strain.) Dose, f. $\frac{3}{4}$ iss to f. $\frac{3}{4}$ j.

INFUSUM CASCARILLÆ, *Infusion of Cascarilla*. (*Cascarill. cont.* $\frac{3}{4}$ j. *aq. fervent*. Oj. Macerate for two hours, and strain. Dose, f. $\frac{3}{4}$ iss to f. $\frac{3}{4}$ j.

INFUSUM CASSIÆ SENNÆ, I. *Sennæ* compositum.

INFUSUM CATECHU COMPOSITUM, *Infusum Catechu*, I. *Acaciæ Catechu*; *Infusion of Catechu*. (*Catechu*, in pulv. $\frac{3}{4}$ ss. *cinnam.* cont. $\frac{3}{4}$ j) *aq. ferv.* Oj. Macerate for an hour, and strain.) Dose, f. $\frac{3}{4}$ iss to f. $\frac{3}{4}$ ij.

INFUSUM CINCHONÆ, I. *Cinchonæ lancifolix*, I. *Cinchonæ sinè caldrè*; *Infusion of Cinchona*. (*Cinch. contus.* $\frac{3}{4}$ j. *aq. fervent*. Oj. Macerate for two hours, and strain. This infusion may also be made from the same quantity of bark in coarse powder by the process of displacement. Dose, f. $\frac{3}{4}$ j to f. $\frac{3}{4}$ ij. The Pharmacopœia of the United States has an *Infusum Cinchonæ Compositum*, which is made as follows, (*Cinchon.* in pulv. $\frac{3}{4}$ j., *Acid. Sulph. aroni.* f. $\frac{3}{4}$ j. *aquæ* Oj. Macerate for twelve hours, occasionally shaking, and strain. Dose same as the last.

INFUSUM COLOMBÆ, I. *Calumbæ*.

INFUSUM CUSPARIÆ, I. *Angusturæ*, *Infusion of Cusparia*. (*Cuspar. cort. contus.* $\frac{3}{4}$ ss. *aq. ferr.* Oj. Macerate for two hours, and strain. Dose, f. $\frac{3}{4}$ j to f. $\frac{3}{4}$ ij.

INFUSUM DIGITALIS, I. *Digitalis purpuræ*; *Infusion of Foxglove*. (*Digital* $\frac{3}{4}$ j, *aq. ferv.* Oss. Macerate, and add *sp. cinnam.* Dose, f. $\frac{3}{4}$ j.

INFUSUM DIOSMÆ, *Infusion of Buchu*. (*Diosm.* $\frac{3}{4}$ j.; *aq. bullient*. Oj. Macerate for four hours in a covered vessel, and strain.—*Ph. U. S.*) Dose f. $\frac{3}{4}$ iss.

INFUSUM EUPATORII, *Infusion of Thorough-*

wort. (*Eupator.* ʒj; *aq. bullient.* Oj. Macerate for two hours, and strain.—Ph. U. S.) Dose f. ʒij.

INFUSUM GENTIANÆ COMPOSITUM, *Compound Infusion of Gentian.* (*Gentian.* contus. ʒss, *Aurant. cort., Coriandr.* contus. āā ʒj; *Alcohol dilut.* f. ʒiv, *Aquæ* f. ʒxij. First pour on the alcohol, and three hours afterwards, the water; then macerate for twelve hours, and strain.—Ph. U. S.) Dose, f. ʒj to f. ʒij.

Marsden's *Antiscorbutic Drops*, an empirical preparation, consist of a solution of *corrosive sublimate* in an *infusion of gentian*.

INFUSUM HUMULI, *Infusion of Hops.* (*Humul.* ʒss; *Aq. bullient.* Oj. Macerate for two hours, and strain.—Ph. U. S.) Dose, f. ʒiss to ʒij.

INFUSUM KRAMERIE, *Infusion of Rhatany.* (*Kramer.* contus. ʒj; *Aq. bullient.* Oj. Macerate for four hours, and strain.—Ph. U. S.) Dose f. ʒiss.

INFUSUM LINI, *I. L. compositum.*

INFUSUM LINI COMPOSITUM, *I. Lini*, (Ph. U. S.) *I. Lini usitatis simi*; *Infusion of Linseed.* (*Lini sem.* cont. ʒss, *glycyrrh. rad.* cont. ʒij, *aquæ fervent.* Oj. Macerate for four hours, and strain.) Dose, a teacupful, *ad libitum*.

INFUSUM MENTHÆ COMPOSITUM, *Compound Infusion of Mint.* (*Fol. menth. sat. sicc.* ʒij, *aq. fervent.* q. s. ut colentur. f. ʒvj. Macerate for half an hour; and, when cold, strain: then add—*sacch. alb.* ʒij, *ol. menth. sat.* gtt. iij, dissolved in *tinct. card. c. f.* ʒss. Ph. D.) Dose, f. ʒj to f. ʒij.

INFUSUM PICIS EMPYREUMATICÆ LIQUIDÆ. See *Pinus sylvestris*—*i. Picis liquidum*; see *Pinus sylvestris*.

INFUSUM PRUNI VIRGINIANÆ, *Infusion of Wild Cherry Bark.* (*Prun. Virginian.* contus., ʒss, *Aquæ.* Oj. Macerate for two hours, and strain. Ph. U. S.)

INFUSUM QUASSIÆ, *I. Quassiæ excel'sæ*; *Infusion of Quassia.* (*Quassiæ lign. conc.*, ʒij, *aq. ferr.* Oj. Macerate for two hours, and strain.) Dose, f. ʒj to f. ʒiv.

INFUSUM RHEI, *Infusion of Rhubarb.* (*Rhei* cont. ʒj, *aq. ferr.* Oss. Macerate for two hours, and strain.) Dose, f. ʒj to f. ʒiv.

INFUSUM ROSÆ COMPOSITUM, *I. Rosæ Gallicæ*; *Infusion of the Rose.* (*Ros. gallic. petal. exsic.* ʒiv, *aq. fervent.* Ojss, *acid. sulph. d. f.* ʒij, *sacch. purif.* ʒiss. Add the water, and afterwards the acid;—macerate for half an hour; strain, and add the sugar.) •Dose, f. ʒiss to Oss.

INFUSUM SARSAPARILLÆ, *Infusion of Sarsaparilla.* (*Sarsaparill.* contus. ʒj, *aquæ bullient.* Oj. Digest for two hours in a covered vessel, and strain.—Ph. U. S.) It may also be prepared by displacement. Dose, f. ʒij to f. ʒiv.

INFUSUM SENNÆ, *I. S. COMPOSITUM, I. Cassiæ Sennæ, I. Sennæ simplex*, *Infusion of Senna.* (*Sennæ ʒj, coriandr. contus.* ʒj, *aq. ferr.* Oj. Macerate for an hour, and strain.) Dose, f. ʒj to f. ʒiv.

The *Black Draught*, *Haustus niger*, is usually formed of this infusion. It may be made of *infus. sennæ* f. ʒv, *aq. cinnam.* f. ʒj, *mannæ ʒiv, magnes. sulph.* ʒvj. Dose, a wine-glass.

Sehay's *Prepared Essence of Senna* is a concentrated infusion of the leaves, in combination with an alkali.

INFUSUM SENNÆ COMPOSITUM, *I. sennæ.*

INFUSUM SERPENTARIÆ, *Infusion of Virginia*

Snakeroot. (*Serpentar.* ʒss, *aq. bullient.* Oj. Macerate for two hours, and strain.—Ph. U. S.) Dose, f. ʒiss.

INFUSUM SIMAROUBÆ, *Infusion of Simarouba.* (*Simaroub. cort.* cont. ʒss, *aq. fervent.* Oss. Macerate for two hours, and strain. Ph. L.) Dose, f. ʒij.

INFUSUM SPIGELIÆ, *Infusion of Pinkroot.* (*Spigel.* ʒss, *aq. bullient.* Oj. Macerate for two hours, and strain.—Ph. U. S.) Dose, f. ʒiv to Oss.

INFUSUM TABACI, *Infusion of Tobacco.* (*Tabaci. fol.* ʒj, *aq. ferr.* Oj. Macerate for an hour, and strain.)

INFUSUM ULMI, *Infusion of Slippery Elm.* This preparation, in the Pharmacopœia of the United States, is made by infusing one ounce of *slippery elm bark*, in a pint of *boiling water*.

INFUSUM VALERIANÆ, *Infusion of Valerian.* (*Rad. valerian.* in crass. pulv. ʒss, *aq. fervent.* Oj. Macerate for an hour, and strain. Ph. D.) Dose, ʒiss to ʒij.

INGENIUM, (*Morbi.*) The genius of a disease. This word is employed, especially by the French, synonymously with *nature*. They speak, for instance, of *Génie inflammatoire, bilieux, &c.* Some, also, use *génie* in the place of *type* of an intermittent.

INGESTA, from *in*, and *gerere, gestum*, 'to bear or carry into.' Substances, introduced into the body by the digestive passages; as food, condiments, drinks, &c.

INGLUVIES, *Aplestia, Victus intemperantia*:—Gluttony, Insatiableness; also, the *Crop* or *Craw* of Birds, and the Pharynx, (q. v.)

INGRASCIAS, APOPHYSES OF. The lesser alæ of the sphenoid bone.

INGUEN, *Bubon, ρουβων*, 'the groin,' *Ædœon, αδοιν, Hep'atis emunctoria.* (F.) *Aine.* The oblique fold or depression, which separates the abdomen from the thigh. It is only, properly speaking, a line that extends from the anterior and superior spinous process of the ilium to the middle part of the horizontal ramus of the pubis.

INGUINAL, *Inguinalis*, from *inguen*, 'the groin.' Belonging or relating to the groin. This epithet has been given to various parts. met with in the region of the groin or inguinal region.

INGUINAL ARTERY is that portion of the femoral artery, situate immediately beneath the crural arch in the inguinal region.

INGUINAL CANAL is a canal, about two inches in length, proceeding obliquely downwards, inwards, and forwards at the lower part of the abdomen; through which passes the spermatic cord, in man, and the round ligament of the uterus, in women. This canal is formed, inferiorly and anteriorly, by the aponeurosis of the greater oblique muscle; posteriorly, by the *fascia transversalis*, which is joined to the preceding aponeurosis, and forms with it a deep channel, into which are received the lesser oblique and transversalis muscles. The inguinal canal has two apertures: the one, the *lower* and *inner*, is called the *inguinal* or *abdominal ring*. It is bounded by two strong tendinous pillars, which fix it—the innermost to the symphysis, the outermost to the spine of the pubis. The *upper* and *outer aperture* is formed by the *fascia transversalis*. From the edge of this aperture arises a membranous funnel,—a prolongation of

the fascia transversalis,—which receives the spermatic vessels; forms their proper sheath, and accompanies them as far as the testicle. On its inside lies the epigastric artery. Above it, is the lower edge of the transversalis muscle; and, below, it is bounded by the channel of the greater oblique. By following the oblique direction of this canal, and passing, consequently, on the outside of the epigastric artery, the viscera are displaced, so as to constitute internal inguinal hernia.

INGUINAL OR ABDOM'INAL RING, *Anulus abdom'inis*, (F.) *Anneau inguinal*, is the inferior aperture of the inguinal canal.

INGUINO CUTANEUS. A name, given by Professor Chaussier to the middle ramus of the anterior branch of the first lumbar nerve: because it sends its numerous filaments to the groin, scrotum, and to the skin of the superior part of the thigh.

INHERENS, Inherent.

INHALATIO, Absorption.

INHALER, MUDGE'S. An apparatus for inhaling the steam of hot water, in affections of the air-passages. It consists of a pewter tankard, provided with a lid, into which a flexible tube is inserted. Through this, the vapour is inhaled.

INHERENT, *Inhærens*, (in, and hærens.) That which adheres, or which is joined or united to any thing.

INHERENT CAUTERY, (F.) *Cautère inhérent*, is the actual cautery, left in contact with a part until it is reduced to the state of a deep eschar.

INHUMATION, from *inhumo*, (in, and humus,) 'I put into the ground.' *Inhumatio*. The sepulture of the dead. This belongs to the subject of medical police.

INIODYMUS, Diprosopus.

INION, *ινιον*. Some of the Greek physicians gave this name to the occiput (q. v.); others, to the back part of the neck, and the muscles of the occiput. Blanchard says it is the commencement of the spinal marrow.

INITIS, from *ις*, gen. *ιτις*, 'a fibre,' and *itis*, a suffix denoting inflammation. Fibrous inflammation.

INITIUM, Arche—i. *Asperæ arteriæ*, Larynx.

INJACULATIO. A term employed by Van Helmont to designate an acute pain of the stomach, with rigidity and immobility of the body.

INJECTED, from *injie'ere*, (in, and jacere,) 'to throw into.' The face and other parts are said to be *injected*, when the accumulation of blood in the capillary vessels gives them an evident red colour. A subject or part of a subject is, also, said to be *injected*, when its vessels have been filled, by the anatomist, with an appropriate composition.

INJECTION, *Injec'tio*, *Eis'bolē*: same etymon. The act of introducing, by means of a syringe or other instrument, a liquid into a cavity of the body. The liquid injected is also called an *injection*. Anatomists use injections for filling the cavities of vessels, in order that they may be rendered more apparent, and their dissection be facilitated. For this purpose, they employ syringes of different dimensions, and various materials. The most common injections are made of soot, wax, and turpentine, coloured with lamp-black, vermilion, &c. There are

three kinds chiefly used by anatomists,—the *coarse*, the *fine*, and the *minute*. The following are formulæ for each.

COARSE INJECTION.

No. 1.

Pure yellow wax, oz. xvj.

Bleached rosin, oz. viij.

Turpentine varnish, by measure, oz. vj.

No. 2.

Yellow rosin, lb. ij.

Yellow wax, lb. j.

Turpentine varnish, a sufficient quantity to make the mixture flexible when cold.

No. 3.

Tallow, lb. ij.

White wax, oz. x.

Common oil, oz. vj.

Venice turpentine, oz. iv.

Mix and liquefy over a slow fire or over boiling water.

To make any of these mixtures

Red—add vermilion, oz. ij.

Yellow—King's yellow, oz. iiss.

White—best flake white, oz. vss.

Pale-blue { best flake white, oz. iiiss.
 { fine blue small, oz. iiiss.

Dark-blue—blue verditer, oz. xss.

Black—lamp-black, oz. j.

Green { powdered verdigris, oz. ivss.
 { best flake white, oz. iss.
 { powdered gamboge, oz. j.

FINE INJECTION.

Brown spirit varnish, oz. iv.

White spirit varnish, oz. iv.

Turpentine varnish, oz. j.

To make this mixture

Red—add vermilion, oz. j.

Yellow—King's yellow, oz. j½.

White—best flake white, oz. ij.

Light-blue { fine blue small, oz. iss.
 { best flake white, oz. j½.

Dark-blue—blue verditer, oz. iv.

Black—lamp black, oz. ss.

MINUTE INJECTION.

Take of transparent size, broken to pieces, or

Isinglass, oz. viij.

Water, lb. iss. Dissolve.

To make this mixture

Red—add vermilion, oz. v.

Yellow—King's yellow, oz. iv.

White—best flake white, oz. v.

Blue—fine blue small, oz. viij.

Green { powdered verdigris, oz. iiij.
 { best flake white, dr. ij.
 { powdered gamboge, dr. j.

Black—lamp black, oz. j.

COLD INJECTION.

White lead and red lead, each oz. iv; linseed oil, enough to form a thick paste, when they are rubbed well together. Liquefy this paste with turpentine varnish, oz. viij.

The advantage of this mixture is, that the subject need not be heated.

In order to inject the arteries, the injection must be forced from the great trunks towards their ultimate ramifications. To inject the veins, on the contrary, it is indispensable, on account of their valves, to send the injection from the smaller divisions towards the greater.

The lymphatics are usually injected with mercury. The practitioner injects, by forcing, with a syringe, liquids, such as emollient, narcotic, stimulant, and other decoctions or infusions, into different hollow organs, e. g. the rectum, vagina, nasal fossæ, urethra, tunica vaginalis, auditory canal, &c. to fulfil various therapeutic indications.

INJECTION, MATTHEWS'S. See *Tinctura cantharidis*.

INK, Atramentum.

INNATE, (*Diseases*.) from *in*, and *natus*, 'born.' *Morbi cognati, M. congeniti*, (F.) *Maladies innées*. Diseases, with which the infant is born. They are not always hereditary, as hereditary diseases are not always innate.

INNERLEITHEN, MINERAL WATERS OF. These springs, situate near the Tweed, and supposed to be the scene of "St. Ronan's well," contain chlorides of sodium and calcium, and carbonate of magnesia.

INNERVATION, *Innervatio*, from *in*, 'in,' and *nervus*, 'a nerve.' By this term is meant, —the nervous influence, necessary for the maintenance of life and the functions of the various organs;—an influence, of whose character and source we are ignorant. It seems to resemble the galvanic or electric agencies. See *Nerves*.

INNOMINATUM, *Anonymum*, from *in*, priv. and *nomen*, 'a name,' (F.) *Anonyme*. Having no name.

ARTE'RIA INNOMINATA, *A. brachio-céphalique*, (Ch.)—*Artéria anonyma*, *Right Subclavian*, (F.) *Artère innominée*, is the trunk common to the right primitive carotid and to the subclavian. It arises from the anterior part of the arch of the aorta; ascends obliquely to the right, along the trachea; and, after a course of about an inch in length, divides into two trunks, which go off at right angles. The one is *external*—the *right subclavian proper*; the other *superior*—the *primitive carotid*, of the same side.

CAVITAS INNOMINATA. A cavity of the outer ear, between the *helix* and *anthelix*.

FORAMEN INNOMINATUM. A foramen, near the middle of the anterior surface of the pars petrosa of the temporal bone, leading backwards, for the passage of the Vidian nerve, reflected from the 2d branch of the 5th to the portio dura of the 7th pair.

NERVI INNOMINATI vel ANONYMI. Some anatomists have thus called the nerves of the fifth pair.

OS INNOMINATUM, *Os Coxæ*, *Os Coxæ*, (F.) *Os innominé*, *Os Coxal*, *Os anonymæ*, &c. A very large, flat bone, which forms the anterior and lateral paries of the pelvis. It is curved upon itself in two opposite directions. In the first periods of life, it is composed of three portions;—the *ilium*, *ischium*, and *pubis*, which join each other in the acetabulum. It is articulated before with its fellow,—behind, with the sacrum; and laterally, with the femur.

OSSA INNOMINATA MINORA, —*Lesser Ossa innominata*. Some anatomists have given this name to the three cuneiform bones of the tarsus.

VENÆ INNOMINATÆ. Vieussens has given this name to two or three veins, which arise on the anterior surface and right margin of the heart; and open into the auricle, towards its right margin.

INNOMINATUS, Anonymous.

INOCULATION, *Inoculatio*, *Insitio*, from *inoculare*, (*in*, and *oculus*, 'an eye,') 'to ingraft.' Any operation by which small-pox, cow-pox, &c. may be artificially communicated, by introducing the virus of the particular disease into the economy, by means of a puncture or scratch made in the skin. When the word inoculation is used alone, it usually means that for the small-pox.

INOCULATION, COWPOX, Vaccination—i. Jennerian, Vaccination.

INORGANIC, *Inorganicus*; from *in*, priv. and *organum*, 'an organ.' A term applied to bodies which have no organs;—such as minerals. At the present day, naturalists admit of but two classes of bodies,—the *organized* and *inorganic*. Parts of the body, which, like the epidermis, are devoid of blood-vessels and nerves, have been called *anorganic*.

INOSCUATIO, Anastomosis.

INQUIETUDE, *Inquietudo*, *Jactitatio*, from *in*, priv. and *quies*, 'rest.' Agitation or trouble, caused by indisposition. Restlessness.

INQUINAMENTUM, Miasm.

INSALIVATION, *Insalivatio*, from *in*, and *saliva*. The mixture of the food with the saliva, and other secretions of the mouth.

INSALUBRIOUS, *Insalubris*, *Nosodes*, *Nosodes*. That which is unhealthy,—which injures the health.

INSANIA, Mania—i. Lupina, Lycanthropia.

INSANITY, *Insanitia*; from *in*, privative, and *sanus*, 'sound.' *Mental alienation*, *Alienatio Mentis*, *Arreptio*, *Unsound Mind*, *Derangement*, *Deranged intellect*, *Craziness*, *Aphrosyne*, *Ephronia*, *Deliria*, *Vesania*, *Delirium*, (Crichton,) *Insuperbia*. (F.) *Folie*, *Egarement d'Esprit*. This term includes all the varieties of unsound mind,—Mania, Melancholia, and *idiocy*, which see.

INSANITY, MORAL, Pathomania—i. Senile, Delirium senile.

INSCRIPTIONES TENDINEÆ MUSCULORUM, *Intersectiones tendinæ musculorum*. The tendinous portions which cross several muscles, and especially the straight muscles of the abdomen.

INSENSCENTIA, Agerasia.

INSENSIBILITY, *Insensibilitas*. Loss or absence of sensibility. It is very common in cerebral affections, and may extend to every part, or be limited to one or more. Some organs are much more sensible than others. The bones, cartilages, ligaments, &c., are insensible in health, but acutely sensible in disease.

INSENSIBLE, *Sensibilitatē carens*. That which is devoid of sensibility. This word is applied, also, to phenomena which cease to be appreciable to the senses. Thus, we say, the pulse becomes *insensible*.

INSERTION, *Insertio*, *Symphysis*, *Enosis*, from *inserere*, (*in*, and *serere*, 'to join or knit,') 'to ingraft,' (F.) *Attache*. The attachment of one part to another. Insertions occur chiefly on bones, cartilages, and fibrous organs; thus, we speak of the insertion of muscular fibres into a tendon or aponeurosis; the insertion of a tendon, aponeurosis, or ligament, into a cartilage or bone. The word *insertion* has likewise been used, by pathologists, for the act of inoculating or introducing a virus into the body.

INSESSIO, from *insidere*, (*in*, and *sedere*,)

'to sit in.' This term is, sometimes, applied to a vapour bath, the person being seated in a perforated chair, beneath which a vessel, filled with hot water, or the hot decoction of some plant, is placed. See *Semicupium*.

INSIDENTIA, *Epis'tasis*, (q. v.) Any thing which swims on, or in, the urine. It is opposed to the *Hypostasis*, or *subsidentia*.

INSIPIENTIA, Insanity.

INSISIO CILIORUM, Blepharoplastice.

INSITIO, Inoculation.

INSOLATION, *Insola'tio*, from *in*, and *sol*, 'the sun'; *Aprica'tio*, *Heli'o'sis*, *Siriasis*. Exposure to the sun. Exposure of a patient to the rays of the sun is, sometimes, had recourse to, with the view of rousing the vital forces, when languishing, or of producing irritation of the skin. It is occasionally used in the same sense as *coup de soleil*, (q. v.)

In *pharmacy*, *insolution* means the drying of chemical and pharmaceutical substances.

INSOLAZIONE DE PRIMIVERA, Pellagra.

INSOMNIA, *Insom'nium*, *Insom'nitus*, *Su'hara*, *Zu'ara*, *Pervigil'ium*, *Agryp'nia*, *αγρυπνια*, *Ahy'p'nia*, *αβνια*, *Anyp'nia*, *Typhoma'nia*, *Sleeplessness*, *Vigilance*; from *in*, privative, and *sonnus*, 'sleep,' 'absence of sleep.' This may exist alone, and constitute a true disease; or it may be connected with another affection. It is an unequivocal sign of suffering in some organ; even when the patient experiences no pain.

INSOMNIUM, Somnium.

INSPIRATEUR, Inspiratory.

INSPIRATION, *Inspira'tio*, *Empneumato'sis*, *Eisp'noē*, *Adspira'tio*, *Aspira'tio*, from *in*, 'in,' and *spiro*, 'I breathe.' Action by which the air penetrates into the interior of the lungs. A movement opposed to that of expiration. As regards the average quantity of air received into the lungs at each inspiration, there is much discrepancy amongst observers. The following table sufficiently exhibits this.

Cubic inches at
each inspiration.

Reil,	42 to 100
Menzies,	}40
Sauvages,	
Hales,	
Haller,	
Ellis,	
Sprengel,	
Sömmering,	
Thomson,	}
Bostock,	
Jurin,	
Fontana,	35
Richerand,	30 to 40
Dalton,	30
Herholdt,	20 to 29
Jurine,	20
Allen and Pepys,	16½
J. Borelli,	15 to 40
Goodwyn,	14
Sir H. Davy,	13 to 17
Abernethy and Mojon,	12
Keutsch,	6 to 12

INSPIRATION OF VENOUS BLOOD. By this is meant the aspiration of blood towards the heart, occasioned by the approach to a vacuum produced by the dilatation of the thorax during inspiration.

INSPIRATORY. Same etymon. *Inspira'tio'ni inser'vians*. (F.) *Inspirat'ur*. A name

given to muscles, which, by their contraction, augment the size of the chest, and thus produce inspiration. The diaphragm and intercostal muscles are the chief agents of inspiration. In cases where deep inspirations are necessary, the action of these muscles is aided by the contraction of the pectoralis major and pectoralis minor, subclavius, serratus major anticus, scaleni, serratus posticus superior, &c. Most of these muscles become inspiratory, by taking their fixed point at the part which they ordinarily move, and elevating the ribs.

INSTEP, (F.) *Coude-pied*. The projection at the upper part of the foot, near its articulation with the leg—the *metatarsus*, (q. v.)

INSTILLATIO, *Entalaxis*.

INSTILLATION, *Entalax'is*, *Instilla'tio*, from *in*, 'into,' and *stilla*, 'a drop.' The act of pouring a liquid drop by drop.

INSTINCT, (L.) *Instinctus*, 'inwardly moved,' *Brutia*. The action of the living principle, whenever manifestly directing its operations to the health, preservation, or reproduction of a living frame or any part of such frame. The law of 'instinct is, consequently, the law of the living principle, and instinctive actions are the actions of the living principle. It is natural. Reason is acquired.

INSTITUTES OF MEDICINE, see Theory of medicine.

INSUFFLATION, *Insuffla'tio*, from *in*, *sub*, and *flare*, 'to blow.' The act of blowing a gas or vapour into some cavity of the body; as when tobacco smoke is injected into the rectum; or when air is blown into the mouths of new-born children to excite the respiratory functions.

IN'SULA CEREBRI. The intermediate lobe of the brain. *Lobus interme'dius cerebri*.

INSULA SANGUINIS. See Blood.

INSULTUS, Attack, Paroxysm.

INTEGUMENT, *Integumen'tum*, *Tegumen'tum*, *Teg'umen*, *Involu'crum* seu *Velamen'tum corporis commu'nē*, from *in*, and *tegere*, 'to cover.' (F.) *Tégument*. Any thing, which serves to cover, to envelop. The *skin*, including the cuticle, rete mucosum, and cutis vera is the common *integument*, or *tegument* of the body.

INTELLECT, *Intellectus*, *Nous*, *Noe'sis*, *Syn'esis*, from *intelligere*, (*inter*, 'between,' and *legere*, 'to choose;') 'to understand,' 'conceive,' 'know.' (F.) *Entendement*, *Intelligence*. The aggregate of the *intellectual faculties*—perception, formation of ideas, memory, and judgment.

INTELLECT, DERANGED, Insanity.

INTELLIGENCE, Intellect.

INTERPERANCE, *Interperan'tia*; *Acra'sia*, *Acola'sia*, *Ples'monē*, *Amel'ria*, *Aples'tia*, from *in*, 'negation,' and *tempera're*, 'to temper.' Immoderate use of food and drink, especially the latter;—a fruitful source of disease.

INTEMPERIES. Same etymon. *Dyscrasia*. Derangement in the constitution of the atmosphere and of the seasons; bad constitution; derangement, or disorder in the humours of the body.

INTENSIVUS, *Entaticos*.

INTENTION, *Inten'tio*, from *in*, and *tendere*, 'to stretch,' *Propos'itum*. The object which one proposes. In *surgery*, a wound is said to heal by the *first intention*, when cicatrization occurs

without suppuration; union by the *second intention* being that, which does not occur until the surfaces have suppurated. To obtain union by the first intention, the edges of a recent wound must be brought in apposition and kept together by means of adhesive plasters and a proper bandage. Delpech has substituted for those expressions, *Réunion primitive*, and *Réunion secondaire*.

INTERARTICULAR, *Interarticula'ris*. Parts situate between the articulations are so called; as *interarticular* cartilages, *interarticular* ligaments, &c.

INTERCADENCE, *Intercaden'tia*, *Interciden'tia*, from *inter*, 'between,' and *cadere*, 'to fall.' Disorder of the arterial pulsations, so that, every now and then, a supernumerary pulsation occurs. The pulse, in such case, is said to be *intercurrent*.

INTERCALARY, *Intercala'ris*; from *intercalare*, 'to insert,' *Embol'imos*, *Interpolatus*, *Provocato'rius*. The days which occur between those that are critical. The term has, also, been applied to the days of apyrexia in intermittent fevers.

INTERCELLULAR SUBSTANCE, see *Cytoblastema*.

INTERCEPTIO, from *inter*, 'between,' and *capere*, 'to take.' A bandage, by the aid of which the ancients proposed to arrest the progress of the material cause of gout and rheumatism; and which consisted in covering the affected limbs with carded wool; surrounding them, afterwards, with broad bandages, applied from the fingers to the axilla, or from the toes to the groin.

INTERCERVICAUX, *Interspinales* colli.

INTERCIDENTIA, *Intercadence*.

INTERCLAVICULAR, *Interclavicula'ris*, from *inter*, 'between,' and *clavicula*, 'a clavicle.' That which is placed between the clavicles.

INTERCLAVICULAR LIGAMENT is a fibrous bundle, placed transversely above the extremity of the sternum, between the heads of the two clavicles. This ligament is flat. Its fibres, which are always longer above than below, are separated by small apertures, which are traversed by vessels. It prevents the separation of the two clavicles in the forced depression of the shoulder.

INTERCOSTAL, *Intercosta'lis*, from *inter*, 'between,' and *costa*, 'a rib,' *Mesopleu'rios*. That which is situate between the ribs. (F.) *Sous-costaux*.

INTERCOSTAL ARTERIES vary in number. There is constantly, however, a *superior*, *Arteria Intercosta'lis superior* vel *Intercosta'lis subclavia*, which is given off from the posterior part of the subclavian, and which sends branches to the first two or three intercostal spaces; and, generally, eight or nine *inferior* or *aortic intercostals*. These arise from the lateral and posterior parts of the pectoral aorta, and ascend obliquely in front of the vertebral column, to gain the intercostal spaces, where they divide into a *dorsal* branch and an *intercostal*, properly so called.

INTERCOSTAL MUSCLES are distinguished into *internal*,—*Inter-plévrocostaux* of Dumas,—and *external*. The former are inserted into the inner lip, the latter into the outer lip of the edge of the ribs. The fibres of the *external in-*

tercostals are directed obliquely downwards and forwards; and those of the *internal* downwards and backwards. Both are inspiratory or expiratory muscles, according as they take their point of support on the upper or lower rib. Some small, fleshy fibres, seen occasionally at the inner surface of the thorax, descending obliquely from one rib to another, have been called *Infracostales*.

INTERCOSTAL NERVE, *Trisplanchnic Nerve*.

INTERCOSTAL NERVES, *Branches souscostales*, (Ch.) *Costal* or *Dorsal nerves*, proceed from the anterior branches of the dorsal nerves. They are twelve in number; and are distributed, especially, to the muscles of the parietes of the chest and abdomen.

INTERCOSTAL SPACES are the intervals which separate one rib from that immediately above or below it.

INTERCOSTAL VEINS are distinguished like the arteries. The *right superior intercostal vein* is often wanting. When it exists, it opens into the back part of the subclavian. The same vein of the left side is very large. It communicates with the demi-azygos, receives the left bronchial vein, and opens into the corresponding subclavian. The *right inferior intercostal veins* open into the vena azygos; and those of the left into the demi-azygos.

INTERCURRENT, *Intercur'rens*, from *inter*, 'between,' and *currere*, 'to run.' Diseases are so called, which supervene at different seasons of the year; or which cannot be considered as belonging to any particular season.—Sydenham. A disease is likewise so called which occurs in the course of another disease, as *Intercurrent Pneumonia*.

INTERCUTANEUS, *Subcutaneous*.

INTERDENTIUM, from *inter*, 'between,' and *dens*, 'a tooth.' The interval between teeth of the same order.—Linden.

INTERDIGITUM, from *inter*, 'between,' and *digitus*, 'a finger.' The corns or warts, which grow between the fingers and toes, especially between the latter.—Pliny.

INTERÉPINEUX CERVICAUX, *Interspinales* colli.

INTERFEMINEUM, *Perinæum*, *Vulva*, *Genital organs*.

INTERFINIUM NARIUM, *Septum narium*.

INTERFORAMINEUM, *Perinæum*.

INTERMAXILLARY, *Intermaxilla'ris*,—from *inter*, 'between,' and *mazilla*, 'a jaw.' That which is situate between the maxillary bones.

INTERMAXILLARY BONE, *Incisive*, *Palatine*, or *labial bone*, is a bony portion, wedged in between the two superior maxillary bones, which supports the upper incisors. This bone is found in the mammalia; and, also, in the human fœtus.

INTERMÈDE, *Excipient*.

INTERMEDIATE VASCULAR SYSTEM, *Capillary system*.

INTERMISSION, *Intermis'sio*, *Dialeip'sis*, from *inter*, 'between,' and *mittere*, 'to put or send.' (F.) *Intermittence*. The interval which occurs between two paroxysms of an intermittent or other disease—during which the patient is almost in his natural state. There is said to be *intermission* of the pulse, when, in a given number of pulsations, one or more may be wanting.

INTERMITTENCE, Intermission.

INTERMITTENT, *Intermittens*. Same etymon. That which has intermissions.

INTERMITTENT FEVER, *Febris intermittens*, *Dialeptura*, *Intermittens*, *Anctus*, *Ague*, *Ague and Fever*, (F.) *Ficere intermittente*, *F. d'Accès*, is a fever chiefly produced by malarial miasms, and consisting of many paroxysms, there being a complete state of apyrexia in the intervals. The chief types are the *Quotidian*, *Tertian*, and *Quartan*. The symptoms of intermittents are those of a decided and completely marked *cold stage*: attended with paleness; collapse; impaired sensibility; and coldness, more or less diffused, followed by general rigors. After this occurs the *hot stage*; the heat returning partially and irregularly, and, at length, becoming universal, and much above the standard of health. The pulse becomes hard and strong; tongue white; urine high-coloured; thirst considerable. At length, the *sweating stage* makes its appearance; the moisture usually beginning on the forehead, face, and neck, and soon extending universally; the heat abating; thirst ceasing; the urine throwing down a sediment, and the functions being gradually restored to their wonted state. The tertian type is the most common, and the quartan the most severe. The quotidian more readily changes into a remittent and continued fever. The quartan has, generally, the longest cold stage, the tertian the longest hot. The *exciting causes* are malarial miasmata. *Ague*, also, occurs in districts where there are no marshy emanations. Such districts are, generally, of a volcanic nature; farther we know not. When the disease has once attacked an individual, it is apt to recur. The *prognosis* is, in general, favourable, as far as regards life; but long protracted intermittents are apt to induce visceral obstructions and engorgements, which may end in dropsy. In some countries, however, the disease is of a very pernicious character. The indications of treatment are, 1. To abate the violence of the paroxysm; and 2. To prevent its return. The first indication requires the adoption of the general principles and remedies required in ordinary fever. The *second* is the most important. The period of apyrexia is that for action. The means for fulfilling this indication are:—the use of emetics, purgatives, cinchona, quina, &c., arsenic, and forcible impressions made on the mind of the patient.

INTERMUSCULAR, *Intermuscularis*, from *inter*, 'between,' and *musculus*, 'a muscle.' That which is placed between muscles.

INTERMUSCULAR APONEUROSIS are aponeurotic laminæ or septa, situate between muscles to which they often give attachment.

INTERNAL, *Inner*, *Internus*. That which is placed on the inside. This epithet is given to parts that look towards an imaginary central plane, which divides the body into two equal and symmetrical portions, as well as to those which correspond with a cavity. Thus, we say the *inner surface of the arm or thigh*—the *inner surface of the skull*, &c.

INTERNAL DISEASES, *Morbi interni*, are those which occupy the inner parts of the body. Their investigation belongs to the physician; external diseases falling under the management of the surgeon.

INTERNODIA DIGITORUM MANUS,

Phalanges of the fingers—i. *Digitum pedis*, Phalanges of the toes.

INTERNUS AURIS, *Tensor tympani*—i. *Mallei*, *Tensor tympani*.

INTEROSSEI PEDIS, *Métatarso-phalangien-latéral*, (Ch.) The number, arrangement, shape, and uses of these are the same as in the case of the preceding muscles. Four are *dorsal*, and three *plantar*; six belong to the three middle toes and one to the little toe. The great toe is devoid of them. As in the hand, they are distinguished, in each toe, into abductor and adductor.

INTEROSSEOUS, *Interosseus*. That which is situate between the bones; from *inter*, 'between,' and *os*, 'a bone.'

INTEROSSEOUS ARTERIES OF THE FOREARM AND HAND. Of these there are several. 1. The *common interosseous artery* arises from the posterior part of the ulnar, a little below the bicipital tuberosity of the radius; passes backwards and divides into two branches: the one called *anterior interosseous* descends vertically, anterior to the interosseous ligament; the other, called *posterior interosseous*, passes above that ligament, appears at its posterior part and divides into two great branches,—the *posterior recurrent radial* and the *posterior interosseous*, properly so called. In the hand, are—1. The *dorsal metacarpal interosseous arteries*, given off by the *dorsalis carpi*, a division of the radial artery. 2. The *Palmar interosseous arteries*, which arise from the convexity of the deep palmar arch, and give off the *middle interosseous arteries*. 3. The *dorsal interosseous of the index*, proceeding directly from the radial artery. In the foot, are distinguished—1. The *dorsal interosseous arteries*, three in number, which arise from the artery of the metatarsus, a branch of the *dorsalis tarsi*. 2. The *plantar interosseous arteries*, which are, also, three in number, and arise from the plantar arch.

INTEROSSEOUS LIGAMENTS. Ligaments seated between certain bones, which they unite; such are the ligaments between the radius and ulna, and between the tibia and fibula.

INTEROSSEOUS MUSCLES. These occupy the spaces between the bones of the metacarpus and metatarsus; and, consequently, belong,—some to the hand, others to the foot.

INTEROSSEOUS NERVE is a branch, given off by the median nerve, which descends before the interosseous ligament, accompanying the artery of the same name.

INTEROSSEOUS VEINS have the same arrangement as the arteries.

INTEROSSEUS MANUS, (F.) *Muscle interosseux de la main*—*Métacarpo-phalangien-latéral sus-palmaire et métacarpo-phalangien latéral*, (Ch.) These muscles are seven in number; two for each of the three middle fingers, and one for the little finger. Four are situate on the back of the hand, and three only in the palm. They are inserted into the metacarpal bones, and send a tendon to the tendon of the extensor communis. According to their office, they are, to each finger, an *adductor* and an *abductor*. The *index* has a dorsal abductor and a palmar one. The *middle finger* has two dorsal muscles for adductor and abductor; the *ring finger* has a dorsal adductor and a palmar abductor; and the *little finger* has only one interosseous abductor, which is palmar. These muscles pro-

duce abduction and adduction of the fingers, which they can also extend, owing to their connexion with the extensor tendons.

INTEROSSEUS, SECUNDUS, Prior medii digiti—i. Quartus, Prior annularis.

INTEROSSEUX DE LA MAIN, Interosseus manus.

INTERPELLATUS (Morbus,) from *interpello*, 'I interrupt.' A term, by which Paracelsus designated those diseases whose progress is unequal, and paroxysms irregular.

INTERPLÉVRO-COSTAUX, Intercostal muscles.

INTERPOLATUS, Intercalary.

INTERSCAPULAR, *Interscapul'd'ris*, (inter, and *scapula*.) That which is between the shoulders; as the *interscapular region*.

INTERSCAPULIUM. The spine of the scapula.

INTERSECTION, *Dia'opē*, from *inter*, 'between,' and *seco*, 'I cut.' The point where two lines meet and cut each other. The name, *aponeurotic intersection*, is given to fibrous bands, which certain muscles present in their length, and by which they seem interrupted. Aponeurotic intersections are found in the recti muscles of the abdomen; in the semi-membranosus, complexus, sterno-thyroideus, &c.

INTERSECTIONES TENDINEÆ MUSCULORUM, Inscriptiones tendineæ. Musculorum.

INTERSEPTA HORIZONTALIA PACHIONI, Tentorium.

INTERSEPTUM, from *inter*, 'between,' and *septum*, 'a partition,' *Cion*, *κίον*. The uvula; (q. v.) also, the septum narium.

INTERSEPTUM NARIUM, Septum narium—i. Virginale, Hymen.

INTERSPINAL, *Interspinalis*, from *inter*, 'between,' and *spina*, 'the spine.' That which is seated between the spinous processes.

INTERSPINAL LIGAMENT, *Membrana interspinalis*, (F.) *Ligament interépineux*. These occupy the intervals between the spinous processes in the back and loins. In the neck, they are replaced by the muscles of the same name. They prevent the too great flexion of the spine, and keep the spinous processes *in situ*.

INTERSPINALES COLLI, *Spinales Colli minores*, *Spind'ti*, (F.) *Intérépineux-cervicaux*, *Intercervicaux*, (Ch.) These are twelve in number, and occupy, in two parallel rows, the intervals between the spinous processes of the cervical vertebrae, from that of the atlas and vertebra dentata to that between the last cervical and first dorsal vertebrae. They are flat, thin, and quadrilateral. These muscles contribute to the extension of the neck and to throwing the head backwards.

INTERSPINALES DORSI ET LUMBORUM; portions of the *Transversaire-épineux* of Boyer and the *sacro-spinal* of Chaussier. These muscles are of two kinds. The one (*Muscle grand épineux du dos*, of Winslow) representing fleshy bundles of different lengths, applied upon the lateral surfaces of the spinous processes, from the third dorsal vertebra to the second lumbar. The others (*Muscle petit épineux du dos*, Winslow) are covered by the preceding. They are situate on each side of the interspinal ligament, in the form of small, short, flat bundles, which pass from one spinous process to the second, third, or fourth above it. These muscles aid

in extending the vertebral column; and incline it a little to one side, when they act on one side only.

INTERSTICE, *Interstitium*, from *inter*, 'between,' and *sto*, 'I stand,' *Diastéma*, *Interval-lum*. Anatomists have given this name to the intervals between organs. The *iliac crest—crista ili*, for example, has two *lips* and an interstice between them, which affords attachment to the lesser oblique muscle of the abdomen.

INTERSTICE, Pore.

INTERINCTUS, Discreet.

INTERTRACHÉLIENS, Intertransversales colli.

INTERTRANSVERSAIRES DES LOMBES, Intertransversales lumborum.

INTER-TRANSVERSALIS, *Intertransversarius*. That which is placed between the transverse processes of the vertebrae.

INTERTRANSVERSALES COLLI, (F.) *Intertransversaires cervicaux*, *Intertrachéliens*, (Ch.) These are small, muscular bundles; quadrilateral; thin and flat; situate, in pairs, in the intervals between the transverse processes of the neck, except between the first and second, where there is only one. They are distinguished into *anterior* and *posterior*. The former are six in number; the latter five. These muscles bring the transverse processes of the neck nearer each other, and contribute to the lateral flexion of the neck.

INTERTRANSVERSALES LUMBORUM, *Musculi intertransversi lumborum*, (F.) *Intertransversaires des lombes*. These are almost entirely fleshy, and ten in number; five on each side. They are similar to the preceding in general arrangement; except that they are more marked, and not placed in two rows. Each intertransverse space contains only one. They are quadrilateral, and flat. The first occupies the space between the transverse processes of the first lumbar and last dorsal vertebra; and the last is between that of the fourth and fifth lumbar vertebrae. These muscles incline the lumbar region laterally; and straighten it when inclined to one side.

INTERTRIGO, Chafing.

INTERVALLUM, Interstice.

INTERVERTEBRAL, *Intervertebra'lis*, (inter, and *vertebra*.) That which is situate between the vertebrae.

INTERVERTEBRAL CARTILAGES, *Intervertebral fibro-cartilages—Ligamenta intervertebralia*. These organs are of a fibro-cartilaginous nature; sections of a cylinder; flexible; whitish; resisting; and situate between the bodies of the vertebrae,—from the space between the second and third as far as that between the last vertebra and sacrum. Their form is accommodated to that of the vertebrae with which they are in connexion; so that, in the neck and loins, they are oval, whilst in the dorsal region they are nearly circular.

INTESTABILIS, Castratus.

INTESTATUS, Castratus.

INTESTIN, Intestine.

INTESTINAL, *Intestina'lis*, from *intus*, 'within.' That which belongs to the intestines,—as *intestinal canal*, &c. Bordeu uses the term *Pouls intestinal* for a pulse, which he conceived to announce an approaching crisis by the intestines.

INTESTINAL JUICE, *Succus entericus*.

INTES'TINE, *Intesti'num, En'teron, Chorda. Gut, Nedyia, Pan'tices (pl.), (F.) Intestin, Boyau.* A musculo-membranous canal, variously convoluted, which extends from the stomach to the anus, and is situate in the abdominal cavity; the greater part of which it fills. In man, its length is six or eight times that of the body. It is divided into two principal portions, called *small intestine*, and *large intestine*. The former, (F.) *Intestin grêle, Intestinum tenuë, I. grac'ile*, constituting nearly four-fifths of the whole length, begins at the stomach and terminates in the right iliac region. It is divided into *duodenum, jejunum, and ileum*. Some anatomists give the name *small intestine* to the two latter only; which are kept in place by the mesentery, and form a large *paquet*, occupying the umbilical and hypogastric regions, a part of the flanks, of the iliac regions, and of the cavity of the pelvis. It is composed of, 1. A serous membrane, which is peritoneal. 2. Of a muscular coat, whose fibres are very pale, and are placed, in part, longitudinally; but the greater part transversely. 3. Of a whitish, mucous membrane; villous, and forming folds or valves—*valvule conniventes*—at its inner surface, and furnished with a considerable number of mucous follicles, called *glands* of Peyer. The arteries of the small intestine proceed from the superior mesenteric; its veins open into the vena porta. Its nerves proceed from the superior mesenteric plexus. The great intestine, *Intestinum crassum, (F.) Gros intestin, Megalocælia*, forms a sequence to the small. It is much shorter, and is solidly attached in the regions of the abdomen which it occupies. It begins in the right iliac region; ascends along the right flank; till, beneath the liver, it crosses the upper part of the abdomen, descends into the left iliac fossa, and plunges into the pelvic cavity, to gain the anus. The great intestine is usually divided into three portions,—the *cæcum, colon, and rectum*. It receives its arteries from the superior and inferior mesenterics. Its veins open into the vena porta. Its nerves are furnished by the mesenteric plexuses. Its lymphatic vessels, which are much less numerous than those of the small intestine, pass into the ganglions or glands seated between the different reflections of the peritoneum, which fix it to the abdominal parietes. The use of the intestines is,—in the *upper* part, to effect the chylification of the food and the absorption of the chyle;—in the *lower*, to serve as a reservoir, where the excrementitious portion of the food collects; and, also, as an excretory duct, which effects its expulsion.

INTESTINORUM LÆVITAS, Lientery.

INTESTINULA CEREBRI, Anfractuosités (cerebral.)

INTESTINUM CELLULATUM, Colon—i. Circumvolutum, Ileon—i. Crassum, Colon—i. Grande, Colon—i. Laxum, Colon—i. Majus, Colon—i. Medium, Mesentery—i. Plenum, Colon—i. Rectum, Rectum.

INTOXICATIO, Poisoning.

INTOXICATION DES MARAIS, see Miasm.

INTOXICATION SATURNINE PRIMITIVE. The aggregate of symptoms, which present themselves prior to an attack of lead colic.—Tanquerel des Planches.

INTRA-PELVIO-TROCHANTÉRIEN, Ob-turator internus.

INTRIN'SIC, *Intrin'secus*; from *intra*, 'with-in,' and *secus*, 'towards' Applied to the internal muscles of certain organs; as those of the ear, tongue, and larynx. Linnæus gave the name *Intrinseci* to internal diseases.

INTROSUSCEPTIO, Intussusceptio—i. Entropion, Entropion.

INTUBUM, Cichorium endivia—i. Erraticum, Cichorium intybus.

INTUMES'CENCE, *Intumescen'tia, Dionco'sis*, from *intumescere, (in, and tumescere)*, 'to swell.' Augmentation of size in a part or in the whole body. Sauvages uses the word *Intumescen'tia* for an order of diseases, in which he comprehends polysarcia, pneumatosis, anasarca, œdema, physconia, and pregnancy.

INTUMESCENTIA LACTEA MAMMARUM, Sparganosis—i. Lienes, Splenoncus.

INTUSSUSCEP'TIO, from *intus*, 'within,' and *suscip'io*, 'I receive,' *Introsusceptio*. In *physiology*;—the mode of increase peculiar to organized bodies. In *pathology*, like *Convolutus, Volvulus intestino'rum, Chordap'sus, Indigita'tio, Tormen'tum, and Invagina'tio*, it means the introduction of one part of the intestinal canal into another, which serves it as a sort of *vagina* or sheath. Generally, it is the upper part of the small intestine, which is received into the lower, when the intussusception is said to be *progres'sive*. At times, however, it is *retrograde*. As the disease cannot be positively detected by the symptoms, it must be treated upon general principles. At times, the invaginated portion has separated and been voided per anum,—the patient recovering. The disease is, however, of a very dangerous character.

INTYBUM, Cichorium endivia.

INTYBUS HORTENSIS, Cichorium endivia.

INULA, see i. Helenium—i. Common, Inula helenium.

IN'ULA DYSENTER'ICA. The systematic name of the Lesser *Inula, Conyza me'dia, Ar'nica Sueden'sis, Ar'nica spu'ria, Cun'ilamus'cula, Conyza, Cundla'go, (F.) Aunée antidysentérique, Herbe de Saint Roch. Nat. Ord. Compositæ*. This plant was once considered to possess great antidyenteric virtues. The whole plant is acrid and somewhat aromatic.

INULA HELE'NIUM. The systematic name of the *Elæcampane—En'ula camp'na, Helenium, Common Inula, (F.) Aunée*. The root, *Inula (Ph. U. S.)*, was formerly in high esteem in dyspepsia, cachexia, pulmonary affections, &c. It is now scarcely used.

INULA, LESSER, Inula dysenterica.

INUNCTIO, Liniment.

INUNCTION, *Inunc'tio, Illi'tio, Chrisis, Catach'risis, Diach'risis, Epich'risis, Unctio*. A liniment. Also, the act of rubbing in. (F.) *Onction*.

INUNDATIO, Depuration.

INUSTIO, Cauterization.

INUSTORIUM, Cauterium.

INVAGINATED, *Invaginatus*, from *in, and vagina*, 'a sheath.' Applied to a part, which is received into another, as into a sheath.

The *invaginated* or *slit and tail bandage* is one in which strips or tails pass through appropriate slits or button-holes.

INVAGINATIO, Intussusceptio.

INVALETUDO, Infirmity.

INVALID, Valetudinary.

INVASIO, Arche, Attack, Paroxysm.
INVERMINATION, Helminthiasis.
INVERSIO PALPEBRARUM, Entropion
—i. Uteri, Hysteroptosis, Uterus, inversion of the.

INVERSION DE LA MATRICE, Uterus, Inversion of the.

INVISCONTIA, Incrassantia.

INVISCONTIA OCULI. A morbid adhesion of the eyelids to each other, or to the globe of the eye.

INVOLUCRUM CORDIS, Pericardium—i. Corporis commune, Integument—i. Linguae, see Tongue—i. Membranaceum, Decidua reflexa—i. Nervorum, Neurilema—i. Reti comparatum, Retina.

INVOLVENTIA, Demulcents.

IODE, Iodine.

IODES, Æruginous.

IODIDE OF AMMONIUM, see Iodine—i. of Arsenic, see Iodine—i. of Iron, see Iodine—i. of Lead, see Iodine—i. of Potassium, see Iodine—i. of Quinine, see Iodine—i. of Starch, see Iodine—i. of Sulphur, see Iodine—i. of Zinc, see Iodine.

IODIDUM AMYLI, see Iodine—i. Hydrargyricum, see Iodine—i. Hydrargyrosium, see Iodine—i. Plumbi, see Iodine—i. Sulphuris, see Iodine.

IODINE, from ἰωδης, *ioda'ceus*, 'of a violet colour.' *I'odina*, *I'odinum*, *Iodin'um*, *I'o'dum*, *I'o'dium*, so called from the violet vapour it exhales when volatilized. (F.) *Iode*. It is contained in the mother waters of certain fuci, and is obtained by pouring an excess of concentrated sulphuric acid on the water, obtained by burning different fuci, lixiviating the ashes and concentrating the liquor. The mixture is placed in a retort to which a receiver is attached, and is boiled. The iodine passes over and is condensed. It is solid, in the form of plates; of a bluish gray colour, of a metallic brightness, and smell similar to that of the chloride of sulphur. Its sp. gr. is 4.946. When heated, it becomes volatilized, and affords the vapour which characterizes it. With oxygen, it forms the *Iodic acid*, and with hydrogen the *Hydriodic*. The tincture of iodine and the hydriodates have been employed, with great success in the treatment of goitre and of some scrofulous affections. It must be administered in a very small dose and for a long period. It is said to be apt, however, to induce cholera morbus, signs of great nervous irritability and emaciation of the mammae. When these symptoms, collectively termed *Iodism*, *Iodosis*, and *Iodin'ia*, are urgent, the dose may be diminished, or it may be wholly discontinued, and afterwards resumed.

Various preparations of Iodine are employed in medicine; as *The Iodide of Iron*, (*Ferri I'o'didum*, *F. Iodure'tum*, (F.) *Iodure de fer*, which is sorbefacient and tonic, in the dose of 3 or 4 grains: the *Proto-Iodide of Mercury*, (*Hydrar'gyri Proto-Iodure'tum*, *H. I'o'didum* (q. v.) *Hydrar'gyrum Ioda'tum flavum*, *H. Iodidula'tum*, *H. Ioda'tum*, *I'o'didum Hydrargyros'um*, *Hydrargyri Proto-I'o'didum*.) sorbefacient and antisyphilitic in the dose of 1-12th of a grain; the *Deuto-Iodide of Mercury*, (*Hydrargyri Deuto-Iodure'tum*, *H. I'o'didum rubrum*, *Hydrargyrum Ioda'tum rubrum*, *H. Perioda'tum*, *I'o'didum Hydrargyricum*, *Biniodide of Mercury*.) with simi-

lar virtues, in the dose of 1-16th of a grain; the *Iodide of Starch*, (*I'o'didum vel Iodure'tum Amyli*, *Am'yllum Ioda'tum*.) a weaker preparation than the usual forms of iodine; the *Iodide of Quinia*, (*Iodidum Quinæ*.) used in scrofulous cases, where iodine and tonics are indicated: the *Iodide of Lead*, (*Plumbi I'o'didum*, *P. Iodure'tum*.) used externally in strumous swellings; the *Iodide of Potassium* (in solution, *Hydriodate of Potassa*.) see *Potassæ Hydriodas*;—the *Iodo-hydrargyrate of Potassium*, (*Potassii Iodo-hydrar'gyras*, *P. Hydrargyro-iodidum*.) made by adding 8 grains of iodide of potassium, dissolved in 10 or 15 minims of water, to 11 grains of the deuto-iodide of mercury,—the properties of which are like those of the iodides of mercury; the *Iodide of Sulphur*, (*Iodure'tum Sulph'uris*, *Sulph'uris I'o'didum*, *Sulphur Ioda'tum*.) used externally in cutaneous diseases, (gr. x. to cerate ʒj.) and the *Iodide of Zinc*, (*Zinci I'o'didum*, *Z. Ioda'tum*.) externally, (ʒi to lard ʒi.) The *Iodide of Ammonium*, (*I'o'didum*, see *Iodure'tum Ammonizæ*, *Hydriodate of ammonia*, (*Iodide of ammonia*) used in lepra, psoriasis, &c. in the form of ointment, (ʒj—ʒi ad adipis ʒi.) and the *Iodide of Arsenic*, (*Arsenici I'o'didum*.) given internally in similar affections gr. 1-10th three times a day; or used externally (gr. iij ad adipis ʒj.)

IODINIA. See Iodine.

IODINIUM, Iodinè.

IODINUM, Iodine.

IODISM. See Iodine.

IODIUM, Iodine.

IODO-HYDRARGYRATE OF POTASSIUM. See Iodine.

IODOSIS. See Iodine.

IODUM, Iodine.

IODURETUM AMMONIÆ, see Iodine—i.

Amyli, see Iodine—i. Sulphuris, see Iodine.

IODYMUS, Dicephalus.

ION, Viola.

IONIA, Teucrium chamæpitys.

IONIDIUM MARCUCCI, *Cinchunchulli*—a South American plant. *Sex. Syst.* Pentandria Monogynia. *Nat. Ord.* Violariæ: said to be extremely efficacious in the Mal de San Lazaro of Colombia.

IONTHUS, *Varus*, *Violet Eruption*, from ἰον, 'the violet,' and ἄθος, 'a flower,' or ὄθος, 'foulness.' An unsuppurative, tubercular tumour; stationary; chiefly on the face. A genus in the class *Hæmatica*, order *Phlogotica* of Good.

IONTHUS CORYMBIFER, *Gutta rosea*—i. *Varus*, *Aene*.

IOTACIS'MUS, from the Greek letter *Iota*. Defective articulation,—the patient not being able to pronounce the palatais *j* and *g* soft.

IPECACUAN'HA. In common parlance, often abridged to *Ipecac*. The pharmacopœial name of the *Cephæ'tis ipecacuan'ha*, or *Calli-co'ca ipecacuan'ha*, *Cngosanga*, *Ipecacuan'ha* root, *Ipecacuan'hæ radix*, *Radix Brazilien'sis*. *Nat. Ord.* Cinchonaceæ. It is also obtained from the *Psycho'tria emet'ica* of Peru. The odour of the root—*Ipecacuanha*, (Ph. U. S.)—is faint and peculiar; taste bitter, subacid and mucilaginous: both water and alcohol extract its virtues, which depend on a peculiar principle, called *Emetia*. It is emetic in large doses; sudorific in smaller. *Dose*, as an emetic, gr. xx to xxx, alone; or united with tartarized antimony, gr. i or ij.

WHITE IPECACUAN'HA is obtained from different species of *Richardsonia* and *Ionidium*. The *Vio'la ipecacuan'ha* also affords it. It is weaker than the gray.

IPECACUAN'HA, *Euphorbia corollata*—i. Bastard, *Triosteum perfoliatum*—i. *Blanc de l'Île de France*, *Asclepias asthmatica*—i. *Blanc de St. Domingue*, *Asclepias curassavica*—i. of the Isle of France, *Cynanchum vomitorium*.

IPO, Upas.

IPOMEA JALAPA, *Convolvulus Jalapa*.

IRA, Rage.

IRACUNDUS, *Rectus externus oculi*.

IRALGIA; from *ἰρις*, 'the iris,' and *αλγος*, 'pain.' Pain in the iris.

IRASCIBLE, *Rectus externus oculi*.

IRANCIS'TRON, *Iridancistr'on*, from *ἰρις*, and *αγκιστρον*, 'a hook.' A hooked instrument, used by Schlagintweit in the formation of an artificial pupil.

IRID'E'A EDU'LIS. One of the Algæ, eaten in Scotland and the south-west of England.

IRIDANCISTRON, *Iridancistr'on*.

IRIDECTOMEDIALYSIS, see *Coretomia*.

IRIDECTOMIA, *Coretomia*.

IRIDENCELSIS, see *Coretomia*.

IRIDERE'MIA, from *ἰρις*, and *ἐρημος*, 'deprived of.' Absence of iris, either apparent or real.

IRIDODIALYSIS, *Coretomia*.

IRIDOPERIPHAK'TIS; from *ἰρις*, 'the iris,' *περι*, 'around,' and *phacitis*, inflammation of the lens. Inflammation of the anterior hemisphere of the capsule of the lens.

IRIDOTOMIA, *Coretomia*.

IRIS, *ἰρις*, *Grammè*. So called from its resembling the rainbow in variety of colours. A membrane, stretched vertically at the anterior part of the eye, in the midst of the aqueous humour, in which it forms a kind of circular, flat partition, separating the anterior from the posterior chamber. It is perforated by a circular opening, called the *pupil*, which is constantly varying its dimensions, owing to the varying contractions of the fibres of the iris. Its posterior surface has been called *uvea*, from the thick, black varnish which covers it. The greater circumference of the iris is adherent to the ciliary processes and circle. It has an external plane of radiated fibres and an internal one of circular fibres: which serve—the one to dilate, the other to contract the aperture of the pupil. The iris receives the irian nerves. Its arteries are furnished by the long ciliary arteries, which form two circles by their anastomoses; the one very broad, near the great circumference; the other, smaller, and seated around the circumference of the pupil. The veins of the iris empty themselves into the *Vasa vorticosa*, and into the long ciliary veins. The use of the iris seems to be:—to regulate, by its dilatation or contraction, the quantity of luminous rays, necessary for distinct vision. The different colours of the iris occasion the variety in the colours of the human eye.

IRIS. See *Herpes Iris*—i. common, i. Germanica—i. *Commun*, i. Germanica—i. *de Florence*, i. *Florentina*.

IRIS FLORENTINA, *Flo'rentine iris* or *orris*. (F.) *Iris de Florence*. The rhizoma of this plant is extremely acrid in its recent state; and, when chewed, excites a pungent heat in the mouth, that continues for several hours. When dried,

the acrimony is lost, or nearly so, and the smell is very agreeable. It is indebted to its agreeable flavour for its retention in the pharmacopœias, although it is ranked as an expectorant.

IRIS FÆTIDIS'SIMA, *Spath'ula fæt'ida*, *Xyris*, —the stinking iris. (F.) *Iris puant*, *Glayeul puant*. The root has been held antispasmodic and narcotic.

IRIS GERMAN'ICA. The systematic name of the *Floicer-de-Luce*, *Iris nostras*, *Aier'sa*, *Iris vulgaris*, *Common iris* or *orris*, *Gladi'olus cæruleus*, (F.) *Iris common*, *Flambe*. The fresh roots have a disagreeable smell and an acrid, nauseous taste. They are powerfully cathartic, and are given in dropsies, where such remedies are indicated.

IRIS DES MARAIS, i. *pseudacorus*—i. *Nostras*, i. Germanica—i. *Palustris*, i. *pseudacorus*.

IRIS PSEUDACORUS. The systematic name of the *Yellow water-flag*, *Iris palustris*, *Gladi'olus luteus*, *Ac'orus vulgaris*, *Ac'orus adulteri'nus*, *Pseudac'orus*, *But'omon*, *Ac'orus palus'tris*. (F.) *Iris des marais*, *Faux uore*, *Flambébâtard*, *Ac'ore bâtard*. The root has an acrid, styptic taste. It is an emrhine, sialogogue, and acrid astringent. The expressed juice is diuretic, and said to be a useful application to serpiginous and other cutaneous affections. Rubbed on the gums, or chewed, it is said to cure toothache.

IRIS PUANT, i. *fetidissima*—i. Stinking, i. *fetidissima*.

IRIS VERSICOLOR, *Blue flag*. The rhizoma of this is an active cathartic; and has been much used, as such, by the American Indians. It is reputed to be diuretic.

IRIS VULGARIS, i. Germanica.

IRISITIS, *Iritis*.

IRITIS, *Inflammation of the iris*, *Inflammatio Iridis*, *Iris'itis*. The chief symptoms are;—change in the colour of the iris; fibres less movable; tooth-like processes shooting into the pupil; pupil irregularly contracted, with the ordinary signs of inflammation of the eye. If the inflammation do not yield, supuration takes place; and, although the matter may be absorbed, the iris remains immovable. It is often caused by syphilis. The general principles of treatment are, to deplete largely and exhibit mercury freely; along with attention to other means advisable in ophthalmia. The free use of quinia is sometimes serviceable. When the inflammation is seated in the serous covering of the iris, it is termed *Iritis serosa*.

IRON, *Ferrum*—i. Ammoniated, *Ferrum ammoniatum*—i. Carburet of, *Graphites*—i. Black oxide of, *Oxydum ferri nigrum*—i. Citrate of, *Ferri citras*—i. Filings, purified, *Ferri limatura purificata*—i. Hydrated oxide of, *Ferrum oxydatum hydratum*—i. Hydrated peroxide of, *Ferrum oxydatum hydratum*—i. Hydrated trioxide of, *Ferrum oxydatum hydratum*—i. Hydro-oxide of, *Ferrum oxydatum hydratum*—i. Iodide of, see *Iodine*—i. Iodide of, *Ferri Iodidum*—i. lactate of, *Ferri Lactas*—i. Phosphate of, *Ferri phosphas*—i. Pills of, compound, *Pilulæ ferri compositiæ*—i. Protoxide of, lactate of, *Ferri lactas*—i. Protocarbonate of, *Ferri Protocarbonas*—i. Sulphate of, *Ferri sulphas*—i. Tartarized, *Ferrum tartarizatum*—i. Trito-hydroferrocyanate of, *Prussian blue*—i. and Potass, tartarate of, *Ferrum tartarizatum*.

IRREDUC'IBLE, (F.) *Irreducible*. An epithet

given to fractures, luxations, herniæ, &c. when they cannot be reduced.

IRRÉDUCIBLE, Irreducible.

IRREG'ULAR, *Irregularis*, ἀνωμαλός, from *in*, 'privative,' and *reg'ula*, 'a rule.' A term, chiefly applied to the types of a disease; and, also, to the pulse, when its beats are separated by unequal intervals.

IRREPTIO, Attack.

IRRIGA'TION, *Irriga'tio*: 'the act of watering or moistening.' The methodical application of water to an affected part, to keep it constantly wet.

IRRITABILITAS MORBOSA. See *Subsultus tendinum*—i. *Vesicæ*, *Cysterethismus*.

IRRITABILITY, *Irritabil'itas*, from *irri'to*, (*in*, 'privative,' and *ritus*, 'the usual manner,') (?) 'I provoke.' *Vis irritabilitatis*, *Vis Vitæ*, *Vis insita* of Haller, *Vis vitalis*, of Gorter, *Oscillatio* of Boerhaave, *Tonic power* of Stahl, *Inherent power*, *Contractility*, *Excitability*, *Irritability*, &c. A power, possessed by all living, organized bodies, of being acted upon by certain stimuli, and of moving responsive to such stimulation. It is the ultimate vital property.

IR'ITABLE, *Irritabilis*. That which is endowed with irritability. Every living organized tissue is irritable; that is, capable of feeling an appropriate stimulus, and of moving responsive to such stimulus. Irritable is often used in the same sense as *impressible*, as when we speak of an irritable person, or habit, or temper. This last condition has been variously termed—*Debilitas nervosa*, *D. Erethis'ica*, *Hypercin'esia nervosa*, *Neurasthen'ia*, *Neurosthen'ia*, *Sensibilitas anom'ala*, *S. morbo'sa*, *S. aucta*.

IRRITAMENTUM METALLICUM, Galvanism.

IR'ITANT, *Irritans*. That which causes irritation or pain, heat and tension; either *mechanically*, as punctures, acupuncture, or scarification; *chemically*, as the alkalies, acids, &c; or in a *specific manner*, as cantharides, &c.

Irritants are of great use in the treatment of disease.

IRRITATIO, Gargale.

IRRITA'TION, *Irrita'tio*, *Erethis'mus*. The state of a tissue or organ, in which there is excess of vital movement; commonly manifested by increase of the circulation and sensibility. Broussais defines irritation to be;—the condition of an organ, the excitation of which is carried to so high a degree, that the equilibrium resulting from the balance of all the functions is broken. In this signification, he also uses the word *sur-irritation*, which he considered as a higher degree, and as the essential cause of fever. Irritation is the precursor of inflammation.

MORBID IRRITA'TION or *constitutional irritation* is that excitement which occurs after injuries done to the body, or to any part thereof;—constituting cases of *diseased sympathy*.

IS, Fibre.

ISCA, *Boletus ignarius*.

ISCHÆ'MIA, from *ισχω*, 'I retain,' and *αἷμα*, 'blood.' Morbid retention or suppression of an habitual flux of blood, as of the hemorrhoidal or menstrual flux or of epistaxis. (q. v.) See *Hæmatostatica*.

ISCHÆ'MON. Same etymon. A medicine, which restrains or stops bleeding.

ISCHIA, MINERAL WATERS OF. In this

volcanic isle, five miles from Naples, there are several thermal waters: one of which—that of Gurgitello—raises the thermometer of Fahr. to 167°.

ISCH'TAGRA, from *ισχιον*, 'the haunch,' and *αἴσα*, 'a seizure.' A name given to ischiatic gout. *Femoro-popliteal neuralgia* (q. v.) has, also, been so called.

ISCHIALGIA. Neuralgia femoro-poplitæa.

ISCHIAS NERVOSA ANTICA, Neuralgia femoro-pretibialis—i. Nervosa Cotunnii, Neuralgia femoro-poplitæa—i. Nervosa digitalis, Neuralgia cubito-digitalis—i. Nervosa postica, Neuralgia femoro-poplitæa—i. à Sparganosi, Phlegmatia dolens.

ISCHIAT'IC or **ISCHIAD'IC**, *Ischiaticus*, or *Ischiad'icus*, from *ισχιον*, 'the haunch;' whence the word *Sciatic*. An epithet given to parts connected with the ischium. The **SCIATIC NOTCHES**, (F.) *Échancrures Ischiatiques*, are formed by this bone; the **ISCHIATIC SPINE** belongs to it, and gives attachment to the small sacrosciatic ligament. The **TUBEROSITY OF THE ISCHIUM**, *Os sedentarium*, *Tuber Ischi*, (F.) *Tuberosité sciatique*, is formed by it. It receives the insertions of different muscles of the thigh, and forms the projection on which the body rests when seated.

ISCHIATIC or **SCIATIC ARTERY**, *A. Femoro-Poplitée* (Ch.) arises singly from the hypogastric, or with the gluteal; and seems to be really a continuation of the trunk of the hypogastric. It issues from the pelvis, at the lower part of the great sciatic notch; and, afterwards, divides into a considerable number of branches, which are distributed particularly to the posterior and superior region of the thigh.

ISCHIATIC VEIN presents the same arrangement.

ISCHIATICUS, Sciatic.

ISCHIOCELE, Ischiocoele.

ISCHIDRO'SIS, from *ισχω*, 'I restrain,' and *ἰδρως*, 'sweat.' Suppression of perspiration.

ISCHIOBLEN'NIA, *Ischohlen'nia*, from *ισχω*, 'I restrain,' and *βλεννα*, 'mucus.' The suppression of a morbid but habitual discharge of mucus.

ISCHIO-CAVERNO'SUS. Belonging to the ischium and corpus cavernosum.

ISCHIO-CAVERNOSUS muscle, *Collateralis*, *Director penis*, *Erector penis*, *Ischio-uré'thral* (Ch.) is a small, long, flat muscle, which surrounds the origin of the corpus cavernosum. It is fixed *below* to the inner side of the tuberosity of the ischium, and *above* to the root of the penis, where it is confounded with the fibrous membrane of the corpus cavernosum. It draws the root of the penis downwards and backwards.

ISCHIO-CAVERNOSUS of the female, *Erector-clitoridis*, *Ischio-clitoriden*, *Superior rotundus clitoridis*, *Ischio sous-clitorien* (Ch.), is arranged nearly as in the male, but is less bulky. It arises, by aponeurosis, from the tuberosity of the ischium, and terminates by embracing the corpus cavernosum of the clitoris, to the erection of which it appears to contribute.

ISCHIOCE'LE or **ISCHIATOCE'LE**, *Hernia ischiatica*; from *ισχιον*, 'the ischium,' and *κηλη*, 'tumour.' *Ischiatic hernia*. One in which the viscera issue by the great sciatic notch. It is a rare disease. The protruded parts must be reduced; the patient being placed in a favour-

able position, and they must be retained by a bandage.

ISCHIO-CLITORIANUS. That which is connected with the ischium and clitoris.

ISCHIO-CLITORIAN ARTERY of Chaussier is a division of the internal pudic, which furnishes the two arteries of the clitoris—the *superficial* and *deep-seated*.

ISCHIO-CLITORIAN NERVE, of the same professor, is the superior branch of the pudic nerve, which is distributed to the clitoris.

ISCHIO-CLITORDIEN, Ischio-cavernous—i. Coccygeus, Coccygeus—i. *Crèti-tibial*, Semi-tendinosus—i. Femoralis, Adductor magnus—i. *Fémoro-péronier*, Biceps flexor cruris—i. *Périnéal*, Transversus perinæi—i. *Popliti-fémoral*, Semi-membranosus—i. *Popliti-tibial*, Semi-membranosus—i. *Prétibial*, Semi-tendinosus—i. *Sous-clitorien*, Ischio-cavernosus—i. *Sous-trochanterien*, Quadratus femoris—i. *Spini-trochanterien*, Ischio-trochanterianus—i. *Urèthral*, Ischio-cavernosus.

IS'CHION, *Ischium*, *Os ischii*, *Os coxæ* *condicis*, *Hip bone*, *Seat bone*, (F.) *Os de l'assiette*. The lowermost of the three portions, which compose the os innominatum in the fœtus and young individual. The inferior region of the same bone has, also, been called *ischium*, in the adult. According to Hesiychius, the ancients designated by the word *ischion*, the capsular ligament of the coxo-femoral articulation, as well as the articulation itself. Some derive the word from *ισχίς*, the lumbar region; others from the verb *ισχω*, 'I arrest,' 'I retain';—because that bone serves as a base or support for the trunk, when we are seated.

ISCHION, Haunch.

ISCHIOPAGES, from *Ischion*, and *παγω*, 'I fasten.' A monstrous union of two fœtuses, in which they are attached to each other by the Ischia.—Geoffroy St. Hilaire. See Hypogastrodidymus.

ISCHIO-PROSTATICUS. Winslow, Santorini, Albinus, and Sömmering, have given this name to the fibres of the transversus perinæi muscle, which go towards the prostate.

ISCHIOSIS, Neuralgia femoro-poplitea.

ISCHIO-TROCHANTERIANUS, *Gem'ini*, *Gemelli*. Part of the *Marsupialis* of Cowper, *Carneum Marsupium*, *Ischio-spini-trochanterien*, *Secundus et tertius quadrigeninus*, (F.) *Muscle cannelé*, *Accessoire à l'obturateur interne*. Two small, fleshy bundles, long and flat, which arise,—the *superior* on the outside of the sciatic spine; the *inferior* behind the tuberosity of the ischium. Both pass horizontally outwards, and are attached to the tendon of the obturator internus, which they accompany into the fossa of the trochanter. These muscles are rotators of the lower limb outwards. They can, also, turn the pelvis on the femur, in standing on one foot.

ISCHL, MINERAL WATERS OF. These springs, which are in Upper Austria, contain iodine and bromine.

ISCHNOPHONIA, from *ισχυος*, 'slender,' and *φωνη*, 'voice.' Slenderness of voice.—Hipp., Galen.

ISCHNOTES, Emaciation.

ISCHO, *ισχω*, 'I keep back,' 'I restrain,' 'I hold firm.' Hence:

ISCHOBLENNIA, Ischioblennia.

ISCHOCOILIA, Constipation.

ISCHOGALACTIA, from *ισχω*, and *γαλα*, 'milk.' Want of milk in the mammae.

ISCHOLOCHIA or **ISCHOLOCHIA**, from *ισχω*, 'I restrain,' and *λοχεια*, 'the lochial discharge.' Suppression of the lochial discharge.

ISCHOMENIA, Amenorrhœa.

ISCHURETIC, *Ischureticum*. Same etymon as the next. A medicine for relieving suppression of urine.

ISCHURIA, *Urinx suppressio*, *Stoppage of urine*, *Suppressio urinis*, *Paruria retentio*; from *ισχω*, 'I arrest,' 'I retain,' and *ουρα*, 'urine.' Impossibility of discharging the urine. Generally restricted to suppression of the secretion, or to renal Ischuria or *Anuria*.

Ischuria Vera is that in which the urine having accumulated in the bladder, the patient is unable to pass it, notwithstanding the inclination, which constantly distresses him. In the *False ischuria*, *Paruria inops*, *Paruria retentio* *rendlis*, *Ischuria notha*, seu *spuria*, (of some.) (F.) *Suppression d'Urine*, owing to some disease of the kidney or ureters, the urine cannot reach the bladder.

Ischuria has likewise received various other names, according to the seat and character of the obstacle, which opposes the exit of the urine: hence the expressions—*Renal*, *Ureteric*, *Vesical*, *Urèthral*, and *Culculous Ischuria*. The *Vesical Ischuria* is synonymous with Retention of Urine, which see.

ISCHURIA PHIMOSICA, see Phimosicus—i. Spasmodica, Cystospasmus—i. Spuria, see Ischuria—i. Urèthralis à phimosi, see Phimosicus—i. Vera, see Ischuria—i. Vesicalis, Retention of urine.

ISINGLASS, Ichthyocolla.

ISIR, Elixir.

ISIS NOBILIS. See Coral.

ISLE OF WIGHT, CLIMATE OF. This beautiful island is a favourable summer retreat for invalids. Undercliff, (q. v.) is the situation chosen as a winter residence for phthisical valetudinarians. Cowes, Niton, Sandown, Shanklin, and Ryde, are delightful summer residences.

ISOCHRONOUS, *Isodromos*, from *ισος*, 'equal,' and *χρονος*, 'time.' That which takes place in the same time, or in equal times. The pulsations of the arteries, in various parts of the body, are nearly isochronous.

ISOCHRYSON, *Auro compar*; from *ισος*, 'equal,' and *χρυσος*, 'gold.' A collyrium, described by Galen as worth its weight in gold. Libavius has also given this name to an amalgam, made with equal parts of antimony and mercury.

ISOC'RATES; from *ισος*, 'equal,' and *μεστρον*, 'I mix.' A mixture of equal parts of wine and water.—Hippocrates.

ISODROMOS, Isochronous.

ISOLUSINE. See Polygala senega.

ISSUE PEAS, Aurantia Curassaventia, see Fonticulus.

ISTHME DU GOSIER, Isthmus of the fauces.

ISTHMION, Isthmus, Pharynx.

ISTHMITIS, *Inflammatio Fau'cium*. Inflammation of the fauces. See Cynanche Pharyngea and Angina.

ISTHMUS, Pharynx.

ISTHMUS, *Isth'mion*. A tongue of land joining a peninsula to a continent; or which

separates two seas. Anatomists have given the name *Isthmus of the Fauces*, *Isthmus Faucium*, *Claustrem Gutturis*, (F.) *Isthme du gosier*, to the strait which separates the mouth from the pharynx. It is formed above by the velum palati and uvula; at the sides, by the pillars of the fauces and the tonsils; and below, by the base of the tongue.

ISTHMUS OF THE FOSSA OVALIS, *Isthmus Vieussentii*, is the prominent arch, formed above the fossa ovalis by the union of the two pillars which bound the cavity.

ISTHMUS OF THE THYROID GLAND is a narrow band that unites the two chief lobes composing the thyroid gland.

ISTHMUS HEPATIS, see *Lobulus anonymus*—i. *Vieussentii*, *Isthmus of the fossa ovalis*—i. *Vieussentii*, see *Ovalis fossa*.

ITCH, *Psora*—i. *Bakers'*, see *Psoriasis*—i. *Barbers'*, *Sycosis*—i. *Grocers'*, see *Psoriasis*—i. *Weed*, *Veratrum viride*.

ITCHING, *Parapsis pruritus*, *Auralgia pruriginosa*, *Pruritus*, *Prurigo*, *Cnesmos*, (F.) *Prurit*, *Démangeaison*. A sensation, more inconvenient than painful; seated especially at the surface of the body, and which provokes the patient to scratch the part. It may be either an external or an internal sensation; that is, produced by an external body, or by some modification in the organic actions of the part to which it is referred.

ITEA, *Salix*.

ITER AD INFUNDIBULUM, *Vulva*—i. a *Palato ad aurem*, *Eustachian tube*—i. ad *Quartum ventriculum*, *Aquæductus Sylvii*—i. ad

Tertium ventriculum, *Vulva*—i. *Urinarium*, *Urethra*.

ITHYPHALLUS, from *εἶς*, 'straight,' and *φαλλος*, 'penis.' An amulet, in the form of a penis, anciently worn round the neck, to which were attributed alexiterial properties.

ITINERARIUM, *Conductor*, *Director*.

ITIS; from *ιτης*, 'bold,' 'rash.' A suffix, denoting inflammation—as *encephalitis*. Inflammation of the Encephalon. *Pleuritis*; inflammation of the pleura.

IVA, *Teucrium iva*—i. *Arthritica*, *Teucrium chamæpitys*—i. *Moschata Monspelisium*, *Teucrium iva*—i. *Pecanga*, *Smilax sarsaparilla*.

IVETTE MUSQUÉE, *Teucrium iva*—i. *Petite*, *Teucrium chamæpitys*.

IVOIRE, *Ivory*.

IVORY; *Ebur*, *Elephas*, (F.) *Ivoire*. The tusk of the elephant. It is chiefly composed of phosphate of lime, and is used for the fabrication of pessaries, artificial teeth, handles of instruments, &c. Formerly, it entered into some pharmaceutical preparations, when calcined to whiteness. It was regarded as astringent and anthelmintic, and was called *Spodium*.

IVY, *Hedera helix*, *Kalmia angustifolia*—i. *Ground*, *Glecoma hederacea*.

IXIA, *Varix*, *Viscum album*.

IXINE, *Atractylus gummifera*.

IXIR, *Elixir*.

IXOS, *Viscum album*.

IXUS, *Galium aparine*.

IXYS, *Ixyx*. Used by different authors for the ilia, flanks, and loins; most frequently for the last.—Hippocr.

J.

JACA INDICA, *Thymus mastichina*.

JACEA, *Viola tricolor*—j. *Ramosissima*, *Centaurea calcitrapa*.

JACK IN THE HEDGE, *Alliaria*.

JACOBÆA, *Senecio Jacobæa*.

JACOBÉE, *Senecio Jacobæa*.

JACOBSON'S ANASTOMOSIS. See *Pectoral ganglion*.

JACTATION or **JACTITATION**, *Jactatio*, *Rhaptasmos*, *Jactitatio*, from *jactare*, 'to toss about.' Extreme anxiety; excessive restlessness;—a symptom observed in serious diseases.

JACTITATIO, *Inquietude*.

JADE NÉPHRITE OU ORIENTALE, *Nephreticus lapis*.

JAGRE. See *Tari*.

JALAP, *Convolvulus jalapa*, *Phytolacca decandra*.

JALAPINE. See *Convolvulus jalapa*.

JALAPIUM, *Convolvulus jalapa*.

JALAPPA, *Convolvulus jalapa*—j. *Alba*, *Convolvulus mechoacan*.

JALEYRAC, **MINERAL WATERS OF**. These waters are situate two leagues from Mauriac in France, on the road from Clermont in Auvergne. The waters contain lime and carbonate of soda, and are esteemed to be tonic, aperient, &c.

JAMAICA, see *West Indies*—j. *Bark tree*, *Bursera gummifera*.

JAMAICINE. See *Geoffræa inermis*.

JAMBES DU CERVELET, *Corpora restiformia*.

JAMBIER, *Tibial*—j. *Antérieur*, *Tibialis anticus*—j. *Grêle*, *Plantar muscle*—j. *Postérieur*, *Tibialis posticus*.

JAMESTOWN WEED, *Datura stramonium*.

JANAMUNDA, *Geum urbanum*.

JANIPHA MANIHOT, *Jatropha manihot*.

JANITOR, *Pylorus*.

JANITRIX, *Porta vena*.

JANON-TARENTISME, *Tarantismus*.

JARRET, *Poples*.

JARRETIER, *Popliteus*, *muscle*.

JARRETIÈRE, (F.) *Peris'celis*, a garter, from *garetum* or *garretum*, in low Latin, the *ham*. A kind of furfureous herpes, which occupies the part of the leg where the garter is worn.

JASMIN, *Jasminum officinale*.

JASMINUM ARABICUM, *Coffea Arabum*.

JASMINUM OFFICINALE, *Jasminum*, *Jeseminum*; the *Jes'minine*. (F.) *Jasmin*. The flowers of this beautiful plant have a very fragrant smell, and a bitter taste. They afford, by distillation, an essential oil; which is much esteemed in Italy, for rubbing paralytic limbs, and in the cure of rheumatic pains.

JATROPHA CURCAS, *Ricinus major*, *Ricinioides*, *Pisneus purgans*, *Pinko'nes Indici*, *Faba cathartica*, *Acetella'na cathartica*, *Nux ca-*

char'tica America'na, Nux Barbade'nsis; Physic Nat. (F.) Pignon d'Inde, Medicinier cathartique, Grand haricot de Pérou, Pignon de Barbare, Noix cathartique, N. Americaine ou des Barbades. Nat. Order, Euphorbiaceæ. The seeds of this plant afford a quantity of oil, given, in many places, like the castor oil; to which, indeed, it is nearly allied. They contain a peculiar acid, the Jatrophiic or Igasuric.

The seeds of *JATROPHA MULTIFIDA* are called *Purging Nuts*, and give out a similar oil.

JATROPHA ELASTICA. See *Caoutchouc*.

JATROPHA MAS'IHOT, Jan'ipha Ma'nihot. The plant affording the *Cassa'da* or *Cassa'ra Root, Caca'ri, Cassa're, Caza'bi, Pain de Madagascar, Ric'inus minor, Man'ioc, Magnoc, Man'iot, Yacca, Manibur, Aipi, Aipina coxera, Aippoca, Janipha.* The juice of the root is extremely acid and poisonous. What remains, after expressing it, is made into cakes or meal; of which the *Cassada* or *Cassava bread* is formed. This bread constitutes a principal food of the inhabitants of those parts where it grows.

The fecula of the root forms the *Tapioca, Cipipa, Fec'ula Tapioca*, which is very nutritious.

A factitious *Tapioca* is met with in the shops, which is in very small, smooth, spherical grains, and is supposed to be prepared from potato starch. It is sold under the name *pearl tapioca*.

JAUNDICE, Icterus—*j.* Black, *Melena*—*j.* Red, *Phenigmus*.

JAUNE, Yellow—*j. d'Œuf*, see *Ovum*.

JAUNESSE, Icterus.

JAW BONE, Maxillary Bone.

JEAN-DE-GLAINES, ST., MINERAL WATERS OF. These waters are situate two leagues from Billom in Auvergne. They contain chloride of calcium, and carbonate of magnesia; dissolved in an excess of carbonic acid.

JECORARIA, Marchantia polymorpha.

JECORARIUS, Hepateros, Hepatic.

JECTIGA'TIO. A word, used by Van Helmont for a species of epilepsy or convulsion.

JECUR, Liver—*j.* Uterinum, Placenta.

JEJUNITAS, Hunger.

JEJUNITIS; a term of hybrid formation,—from *Jejunum*, 'the intestine, Jejunum,' and *itis*, a suffix denoting inflammation. Inflammation of the jejunum.

JEJUNIUM, Hunger, Fasting.

JEJUNUM, from jejunos, 'empty'; Nestis, νεστις. The part of the small intestine comprised between the duodenum and ileum. It has been so called, because it is almost always found empty in the dead body.

JELLY, Gelly—*j.* of the Cord, Gelatin of Wharton.

JERSEY, CLIMATE OF. Jersey is the largest of the islands of the British Channel, and is most frequented by invalids. Its climate closely resembles that of the south-west coast of England, and especially of Penzance, (q. v.) and it is adapted to the same class of invalids.

JERUSALEM OAK OF AMERICA, Che-nopodium anthelminticum.

JESEMINUM, Jasminum officinale.

JESSAMINE, Jasminum officinale—*j.* Yellow, *Gelseminum nitidum*.

JEUNESSE, Adolescence.

JEWS' EAR, Peziza auricula.

JIMSTON WEED, Datura stramonium.

JOANNESIA PRINCEPS, Anda.

JOANNETTE, MINERAL WATERS OF. Several springs are found at Joannette, about five leagues from Angers, in France. The waters are both cold and warm, and contain sulphate of lime; subcarbonate of soda; chloride of sodium; some iron; chloride of calcium, and, sometimes, a kind of saponaceous matter. They are chiefly used as a tonic in chlorosis, leucorrhæa, &c.

JOHNE, MINERAL WATERS OF. Johnne is a village near Dol in Franche-Comté, France, where is a mineral spring, which contains subcarbonate of soda, and subcarbonates of magnesia and iron. It is used chiefly as a bath in certain diseases of the skin, and other atonic affections.

JOINT, Articulation—*j.* Ball and socket, Enarthrosis—*j.* Dove-tail, Suture—*j.* Stiff, Ankylosis.

JONAS, MINERAL WATERS OF. This spring is situate to the south-west of Bourbon-l'Archambault, in France. The waters contain chloride of calcium and sulphate of lime; chloride of sodium, and sulphate of soda; carbonate of iron and carbonic acid gas. They are tonic and aperient.

JOUAN, ST., MINERAL WATERS OF. St. Jouan is a village, near Saint-Malo, in France. The water is a cold chalybeate.

JOUBARBE ACRE, Sedum—*j. des Toits, Sempervivum tectorum*—*j. des Vignes, Sedum telephium.*

JOUE, Genu.

JOULOS, Julius.

JOUR, Dies.

JOURS CANICULAIRES, Dog days—*j. Critiques, Critical days*—*j. Indicateurs, Indicating days.*

JUCATO CALLELOE, Phytolacca decandra.

JUDÆUS, JUDAÏCUS, (Lapis,) Phœnic'ites Lapis, Iecol'ithos, (F.) Pierre Judaïque. A stone, found in Judæa, Palestine, &c. Called, also, *Lapis Syriacus*. It was formerly esteemed to be diuretic and lithontriptic.

JUDGMENT, Judic'ium, (F.) Jugement. The faculty of the intellect, by which ideas are compared with each other, and their relative worth appreciated.

JUDICIUM, Judgment.

JUGAL PROCESS, Zygomatic process.

JUGALIS SUTURA, from τυον, 'a yoke.' The suture, which unites the *Os Mala* or *Os Jugale* with the superior maxillary bone. Also, the sagittal suture.

JUGEMENT, Judgment.

JUGLANS CINEREA, Butter Nut, Oil nut, White Walnut. The inner bark of the root of this tree, *Juglans* (Ph. U. S.), which is abundant in the United States, is used in medicine, in the form of extract, as an efficacious and mild laxative, in doses of from 10 to 20 grains. It is in the secondary list of the Pharmacopœia of the United States.

JUGLANS REGIA, Juglans, Nux Juglans, Carya basil'ica, καρυα, Carya. The Walnut, (F.) *Noyer* (the tree); *Noix* (the nut.) The unripe fruit, in the state in which it is pickled, was formerly esteemed to be anthelmintic. The putamen or green rind of the walnut has been celebrated as a powerful antisyphilitic; and used as a sort of diet drink. The kernel is an agreeable article of dessert; but, like all nuts, difficult of digestion.

Various preparations of the leaves have been recommended in scrofulous affections.

JUG'ULAR, Jugula'ris, from *jugulum*, 'the throat.' Relating to the throat.

JUGULAR FOSSA, Fossa Jugula'ris, is a cavity in the *petro-occipital* suture. It is formed by the petrous portion of the temporal bone, and by the occipital bone, and lodges the origin of the internal jugular vein. It is, sometimes, called *thimble-like cavity*.

JUGULAR VEINS, Venæ Jugula'res, V. sphagmides, V. apoplecticæ, V. sopora'les. These are situate at the lateral and anterior parts of the neck. They are two on each side; one *external*, the other *internal*. 1. The *External Jugular Vein*,—*Trachélo sous-cutané*, (Ch.) is of less size than the internal. It descends, almost vertically, along the anterior and lateral part of the neck, from the cervix of the lower jaw to the subclavian vein, into which it opens, a little above the internal jugular. It is formed by the *internal maxillary, superficial temporal, and posterior auricular veins*. It is this vein, which is commonly opened in bleeding in the neck. 2. The *Internal Jugular Vein, V. Céphalique* (Ch.) *Vena apoplectica*, is much larger and more deeply seated than the preceding. It descends, vertically, along the anterior and lateral part of the neck, from the posterior part of the foramen lacerum posterius as far as the subclavian vein. It commences at the sinus of the jugular vein, and receives the blood, which returns by the *sinus of the dura mater*, and that of the *facial, lingual, pharyngeal, superior thyroid, occipital, and diploic veins*.

JUGULUM, Throat.

JUGUM PENIS, Presse-urèthre.

JUJUBE, Jujuba, Zizyphum. The fruit of *Rhamnus Zizyphus*, a native of the south of Europe. It was formerly ranked amongst the pectoral fruits. It has an agreeable sweet taste.

JUJUBE PASTE, Paste of jujubes.

JULAPIUM, Julep—j. Camphoræ, Mistura camphoræ.

JULEB, Julep.

JULEP, Jula'pium, Jule'pus, Zula'pium; *Juleb* of the Persians. A sweet drink. A demulcent, acidulous or mucilaginous mixture.

JULEP, CAMPHOR, Mistura camphoræ—j. *Camphrè*, Mistura camphoræ.

JULUS, Julos, Ioulos, ιουλος. The first down that appears upon the chin.—Rufus of Ephesus.

JUMEAU, Gemellus.

JUMEAUX DE LA JAMBE, Gastrocnemii.

JUMELLE, Gemellus.

JUNCTURA, Articulation.

JUNCUS ODORATUS, Andropogon chænanthum, Fœnum camelorum, Juncus aromaticus—*Camel's hay, Sweet rush, Schœnanthus, Calamus odordatus, Squinanthus, Gramen orientale*. (F.) *Jonc odorant*. The dried plant, which is generally procured from Turkey and Arabia, has an agreeable smell, and a warm, bitterish taste. It was formerly used as a stomachic and deobstruent.

JUNGLE FEVER. A variety of remittent occurring in the jungle districts of India.

JUNIPER TREE, Juniperus communis.

JUNIPERUM VINUM. Wine impregnated with juniper berries.

JUNIPERUS COMMUNIS, Arceut'os, The Juniper tree; Akat'atis, Akat'era. Family, Coni-

feræ. *Sex. Syst. Diœcia Monadelphia.* The tops and berries, *Juniperus* (Ph. U. S.), are ordered in the pharmacopœias. Their odour is strong, but not unpleasant. Taste warm, pungent. Properties dependent upon essential oil, which they yield to both water and alcohol. Dose, ℞j to ℥ss, rubbed with sugar. In Holland, juniper berries are used for flavouring the gin. The oil, *Oleum juniperi*, possesses the virtues of the plant. It is called by Ruland, *Turgar*. (F.) *Genérier* (the plant,) *Genièvre* (the berry.)

JUNIPERUS LYCIA. This plant—*Thurea, Th. virga, Arbor thurifera*, has been supposed to afford the *true frankincense*, *Cedros, Olibanum, Thus Libanotos, Lib'anas, Thus mas'culum, Thus verum*. (F.) *Encens*. By some, however, it is supposed to be the produce of an *Amyris*, and by others of the *Boswellia serrata*. The odour of olibanum is peculiar and aromatic: taste bitterish and slightly pungent; partly soluble in alcohol, and forming a milky emulsion, when triturated with water. It was formerly used in dysentery and hæmoptysis, but is now never employed, except as a perfume in a sick room.

JUNIPERUS SABI'NA, Sabina, Savina, Sabina ster'ilis, Bruta, Cedrus baccifera, Common or barren savin; Brathu, Bruthys, Barathron, Borathron, (F.) Sabine, Savinier. The odour of savin leaves is strong and disagreeable. Taste hot, acrid, and bitter, depending on an essential oil. Its operation is stimulant, emmenagogue, anthelmintic, and abortive; externally, escharotic. Dose, internally, gr. v to x of the powder. As an escharotic, it is applied in powder or formed into a cerate. The essential oil, *Oleum Sabinzæ*, (Ph. U. S.), has the virtues of the savine. Dose two to five drops.

JUNIPERUS VIRGINIA'NA, Red cedar. This tree is known throughout the United States by the name of *savine*, and is often used for the same purposes.

JUNK, Pad.

JUNO LUCINA, Ilithyia.

JUPITER, Tin.

JURIBALI, Euribali. A tree in the forests of Pomerony; *Nat. Fam. Meliacæ. Class, Octandria. Order, Monogynia.* The bark is febrifuge, and may be given in powder or infusion, (℥i ad aq. bullient. O. ij.)

JURISPRUDENCE, (Medical.) from *jus, juris*, 'law,' and *prudentia*, 'knowledge,' *Jurisprudentia Medica*. This word is often used synonymously with Legal Medicine, which see. It is now, as frequently perhaps, employed for the embodied laws and regulations that relate to the teaching and practice of medicine.

JUS. Zomos. Soup, broth, or bouillon.

JUS COAGULATUM, Gelly.

JUS D'HERBES, (F.) The juice of certain vegetables administered as depuratives; as the juices of fumitory, burdock, water trefoil, &c.

JUS JELATUM, gelly—j. *de Régliste*, see Glycyrrhiza—j. *de Viande*, see Bouillon.

JUSQUIAMUS, Hyoscyamus.

JUSQUIAUME, Hyoscyamus.

JUSTICIA BIVALVIS, Adulasso—j. *Adhatoda, Adhatoda.*

JUSTI'CIA ECBO'L'IUM, Curina curini. A Malabar plant, the root of which, and the leaves,

in decoction, are considered in the country to be lithontriptic.

JUSTI'CIA PECTORA'LIS. A West India plant, which is slightly astringent. (F.) *Carmantine*, *C. Pectorale*, *Herbe aux Charpentiers*.

JUVANS, Auxil'ium, Remed'ium. A medicine or substance of any kind, which relieves a disorder.

JUVENTUS, Adolescence.

JUXTAPOSITION, from *juxta*, 'near to,' and *ponere, positum*, 'to place.' The mode of increase, proper to minerals; which consists in the successive application of new molecules upon those that form the primitive nucleus. It is opposed to *intussusception*.

K.

K. This letter was formerly used to designate a compound of gold.

KAATH, Catechu.

KAAWY. Ancient name of an Indian drink, prepared from maize.

KABALA, Cabal.

KÄMPFERIA GALANGA. See *Maranta Galanga*.

KÄMPFERIA ROTUN'DA. Called after Kämpfer, the naturalist. *Zedoa'ria, Amo'mum zedoa'ria, Col'chicum Zeylan'icum, Zed'oary*. (F.) *Zedaire rond*. The roots of this Ceylonese plant have a fragrant smell, and warm, bitterish, aromatic taste. They are in wrinkled, gray, ash-coloured, heavy, firm, short pieces; of a brownish red colour within; and are stimulant and carminative. Dose, ʒj to ʒj of the powder.

KAHINCÆ RADIX, *Caincæ radix*.

KALB, Kayl. A word employed by the alchemists for sour and coagulated milk.

KAJEPUT, Cajeput.

KALI, Potash—*k. Acetas*, Potassæ acetas—*k. Aeratum*, Potassæ carbonas—*k. Causticum*, Potassa fusa—*k. Causticum cum calce*, Potassa cum calce—*k. Chloricum*, Potassæ murias hyperoxygenatus—*k. Hydriodinicum*, see Potassæ hydriodas—*k. Nitricum*, Potassæ nitras—*k. Oxalicum acidulum*, Potass, oxalate of—*k. Præparatum*, Potassæ subcarbonas—*k. Præparatum e tartaro*, see Potash—*k. Purum*, Potassa fusa—*k. Spinosum cochleatum*, Salsola kali—*k. Subcarbonas*, Potassæ subcarbonas—*k. Sulphas*, Potassæ sulphas—*k. Sulphuricum*, Potassæ sulphas—*k. Sulphuretum*, Potassæ sulphuretum—*k. Tartarizatum*, Potassæ tartras—*k. e Tartaro*, see Potash—*k. Vitriolatum*, Potassæ sulphas.

KALICUM HYDRAS, Potassa fusa.

KALIUM IODATUM. See Potassæ hydriodas.

KALMIA ANGUSTIFOLIA. Called after Kalm, the botanist. *Icy, Narrow-leaved laurel, Dwarf laurel*. This plant has the same virtues as the next.

KALMIA LATIFOLIA, Cal'ico bush, Broad-leaved laurel. This plant kills sheep and other animals. The Indians use it as a poison. The powdered leaves have been applied successfully in tinea capitis; and a decoction of it has been used for the itch. The powder, mixed with lard, has been applied in herpes.

KAMPHUR, Camphor.

KAPHUR, Camphor.

KARABE, Asphaltum.

KARABITIS, Phrenitis.

KARENA, Carena.

KASSADER, *Convolvulus panduratus*.

KASSAUDER, *Convolvulus panduratus*.

KATASARCA, Anasarca.

KATASTALTICA, Astringents.

KAVIAC, Caviare.

KAYL, Kaib.

KELOID, Canceroid.

KELOTOMIA, Celotomia.

KELP, Varec. The impure mineral alkali, obtained by burning certain marine plants. See Soda.

KENNELWORT, *Scrophularia nodosa*.

KENTUCKY, MINERAL WATERS OF. The Olympian Springs in this state are near the sources of Licking river. There are three different kinds, in the space of half a mile. One of these is saline, impregnated with sulphur;—another is a chalybeate, and a third a sulphureous spring. In various parts of Kentucky, there are saline waters, which are frequented by invalids. The *Salines* at Bigbone, formerly employed in the manufacture of salt, are now resorted to by invalids. A spring, near Harrodsburg in Mercer county, is strongly impregnated with sulphate of magnesia.

KERATITIS, Ceratitis.

KERATOGLOSSUS, *Ceratoglossus*.

KERATO-IRITIS, *Aquo-Membranitis*.

KERATOMUS, *Ceratotomus*.

KERATONYXIS, *Ceratomyxis*.

KERATOPHARYNGEUS, *Ceratopharyngeus*.

KERATOSTAPHYLINUS, *Ceratostaphylinus*.

KERATOTOMUS, *Ceratotomus*, Knife, cataract.

KERMES or **CHERMES**. One of the species of the genus kermes lives on a green oak, and is called *Coccus il'icis*, *Kermes animal*, *Coccus*, *Cocci granum*, *Coccum baph'icum*, *infecto'rium*, *tincto'rium*, *scarlati'num*, &c. The oak, to which allusion has been made, is known by botanists under the name *Quercus coccifera*, and grows abundantly in the uncultivated lands of southern France, Spain, and in the islands of the Grecian Archipelago. The kermes, inhabiting it, has the appearance of a small, spherical, inanimate shell. Its colour is reddish-brown; and it is covered with a slightly ash-coloured dust. This is the kermes of the shops. It is now only used in dyeing; but was formerly reputed to possess aphrodisiac, analeptic, anti-abortive, and other virtues.

KERMES MINERAL, see *Antimonii sulphuretum præcipitatum*.

KERUA, *Ricinus communis*.

KETCHUP or **CATCHUP**. A pickle prepared from the liquor of the mushroom, walnut, tomato, &c.

KETMIA ÆGYPTIACA, *Hibiscus abelmoschus*.

KEY, Sax. *cæx*, *Clavis*, *Cleis*, *Clavis An'gica*, (F.) *Clef de Garancot*. An instrument, used

for extracting teeth. It consists of a firm handle, with a claw at right angles to it, and moving upon a pivot. This claw embraces the tooth. It has undergone several modifications; and hence various instruments are used under this denomination. The French have the *Clef à pompe*, *Clef à pivot*, and *Clef à noix*.

KEYRI CHEIRI, Cheiranthus cheiri.

KHALA MIMUC, Bit noben.

KIASTER, *Chiaster*, from *χιαζειν*, 'to cross.'

A species of bandage, having the form of the Greek letter χ , which the ancients used for approximating, and maintaining in contact, the fragments of the patella, in cases of fracture of that bone. It was applied in the form of the figure 8.

KIBISTITOME, Cystitome.

KIDNEY. Its etymology is uncertain. Serenius derives it fancifully from Su. Goth. *qued*, the belly; and *nigh*, (quasi, *quidney*.) *Ren*, *Nephros*, *Protme'sis*. (F.) *Rein*. The kidneys are the secretory organs of the urine. They are two glands, situate deeply,—the one on the right, and the other on the left side,—in the hypochondres; at the sides of the lumbar vertebræ; behind the peritoneum; and in the midst of an abundant, fatty cellular tissue, called *Tunica adiposa*. The kidney is of a reddish-brown colour; oval form; and flattened on two surfaces. It has, at its internal margin, a deep fissure, by which the renal vessels and nerves enter or quit the organ, and the ureter issues. It resembles, pretty accurately, the haricot or kidney-bean. Two substances are readily distinguishable in it;—the outer, *Secerning* or *Cortical*, *Substantia corticalis*, *S. glandulosa*, which secretes the urine; and the inner, *Tubular*, *Medullary* or *Uriniferous*, *Substantia medullaris*, *S. Tubulosa*, *S. Fibrosa*, which appears under the form of small cones or unequal papillæ, each resulting from the union of small capillary tubes, adherent by one of their extremities to the cortical substance; and opening, by the other, at the summit of the cone, into calices, a species of membranous tubes, more or less numerous, which transmit the urine of the papillæ to the *pelvis*. By this (*pelvis*) is meant a small, membranous sac, of an irregularly oval shape, at the base of which are the orifices of the calices; and the other extremity of which is continuous with the ureter. The kidney is surrounded by a fibrous membrane proper to it.

KIDNEY, BRIGHT'S DISEASE OF THE *Morbus Brightii*, *Nephritis albuminosa*, *M. albuminensis*, *Nephritis*. Disease of Bright, *Granular Degeneration* or *Disorganization* of the Kidney, *Granular Kidney* of Bright, (F.) *Maladie de Bright*, *État Granuleux du Rein*, *Albuminorrhée*. A granular disease of the cortical part of the kidney, which gives occasion to the secretion of urine that contains albumen, and is of less specific gravity than natural, and which destroys by inducing other diseases. It was first described by Dr. Bright of London, about ten or twelve years ago.

KIDNEY, GRANULAR, OF BRIGHT, Kidney, Bright's disease of the.

K'ESTEINE, *K'estein*, properly *Ky'esteine*, *Ky'estein*, *Cy'esteine* or *Cy'estein*, from *κτειν*, 'to be pregnant,' and *εσθης*, 'a garment or pellicle.' A peculiar substance, which forms a pellicle on the urine of a pregnant female, when allowed to stand for a few days. It is

whitish, opalescent, slightly granular, and may be compared to the fatty substance that swims on the surface of soups, after they have been allowed to cool. When taken in conjunction with the other phenomena it is an aid in the diagnosis of pregnancy.

KILBURN, MINERAL WATERS OF. These springs contain carbonic acid, sulphohydric acid; carbonates of lime, magnesia, and iron; sulphates of soda, lime, and magnesia, and chloride of sodium.

KILOGRAMME, *Chiliogramma*, from *χίλιοι*, 'a thousand,' and *γραμμα*, 'a gramme.' The weight of a thousand grammes;—two pounds, eight ounces, one drachm, and twenty-four grains, Troy.

KILOLITRE, from *χίλιοι*, 'a thousand,' and *λιτρα*, 'a litre.' A measure, containing a thousand litres.

KINA KINA, Cinchona.

KINANCIE, Cynanche.

KINCOUGH, Pertussis.

KINDCOUGH, Pertussis.

KING'S EVIL, Scrofula.

KINICI ACETAS, Quinia, acetate of.

KININUM, Quinina.

KINKINA, Cinchona.

KINO, *Gummi Gambien'se*, *Gummi rubrum adstringens Gambien'se*, *African kino*, *East India kino*, *Amboyna kino*, *Gummi adstringens Fothergilli*. The trees, whence one variety of this resin is obtained, are not botanically ascertained. The London college ascribe it to the *Pterocarpus erinacea*; the Edinburgh to the *Eucalyptus resinifera*, and the Dublin to the *Butea frondosa*. On wounding the bark, the kino flows drop by drop. The *East India* or *Amboyna kino* is thought to be the produce of the *Nucifera gambir*; *Sex. Syst.* Pentandria Monogynia. *Nat. Ord.* Rubiaceæ. A West India variety is said to be derived from the *Coccoloba urifera* or *Sea-side grape*; and a Botany Bay kino is said to be the concrete juice of the *Eucalyptus resinifera*, or *brown gum-tree* of New Holland, *Sex. Syst.* Icosandria Monogynia. *Nat. Ord.* Myrtaceæ. Kino consists, chiefly, of tannin, gallic acid, oxide of iron, and colouring matter. It is inodorous; the taste a sweetish bitter; and it is sometimes gritty between the teeth. It comes to us in fragments of a dark ruby red colour, and is easily pulverized. Its properties are powerfully astringent. Dose, gr. x to gr. xx, in powder.

KIONORRHAPHIA, Staphyloraphy.

KI'OTOME, *Kiot'omus*; from *κτωρ*, 'a pillar,' 'support,' and *τεμνειν*, 'to cut.' (F.) *Coupebride*. An instrument, invented by Desault, to cut any accidental brides or filaments in the rectum and bladder; and which he, afterwards, used for the removal of the tonsils. It is composed of a flat, silver sheath; open at one edge. This sheath is provided with a cutting blade, which can be forced through the opening, and thus all the parts can be divided with which it comes in contact.

KIPPERNUT, *Bunium bulbocastanum*.

KIRATE. A weight of four grains, according to Blancard.

KIRRHONOSIS, Cirrhonosis.

KIRRHOSIS, Cirrhosis.

KIRSCHWASSER, (G.) 'Cherry water.' An alcoholic liquor, obtained from cherries bruised with their stones, by subjecting them to

distillation, after having caused them to ferment. See Spirit.

KISSINGEN, MINERAL WATERS OF These springs, in Bavaria, contain carbonic acid and chloride of sodium.

KIST. A weight of 14 grains.—Paracelsus.
KLAPROTHII SULPHAS, Cadmii Sulphas.
KLAPROTHIUM SULPHURICUM. See Cadmii Sulphas.

KLEPTOMANIA; from *κλέπτω*, 'I steal,' and *mania*. Insanity, with an irresistible propensity to steal.

KLOPEMANIA, *Clopemania* from *κλοπή*, 'theft,' and *mania*, 'mania.' Monomania, with an irresistible desire to steal.

KNARESBOROUGH, MINERAL WATERS OF. See Harrogate, mineral waters of.

KNEADING, Shamponing.

KNEE, HOUSEMAID'S. An inflammation of the bursa, which in most individuals is in front of the patella, and is apt to inflame and enlarge from effusion in those in whom it is subjected to much pressure. Hence its name. It is a form of capsular rheumatism, (q. v.)

KNEE-SCAB, *Crusta genu equinæ*—k. Encircled hoof, *Crusta genu equinæ*.

KNIFE. Sax. *cnif*. Swed. *K n i f*. Dan. *K n i v*. (F.) *Canif*. *Culter*, *Smile*, *Cutellus*, *Tomeion*, *Tomeus*, *Machæra*, *Machæron*, *Machæris*, (F.) *Couteau*. A cutting instrument, used in surgery to divide the soft parts, and which only differs from the bistouri or scalpel in being commonly larger.

The most common knives are the following:

AMPUTATION KNIFE, (F.) *Couteau à amputation*. *C. droit*, *Culter rectus*. This is the largest of the knives used in surgery. Formerly, they were curved; now they are straight, and provided with one or two edges.

CATARACT KNIFE, *Ceratolomus*, *Keratolomus*, (F.) *Couteau à cataracte*. The cataract knives of Richter, Wenzel, Ward, and others, being intended to perform the section of the transparent cornea, are so shaped as to exactly fill the small wound made by them; and thus to prevent the discharge of the aqueous humour, until the section is completed. The blade of the knives of Wenzel and Ward resembles a very narrow lancet, blunt in the posterior five-sixths of one of its edges. The blade of that of Richter is pyramidal, cutting through the whole length of its inferior edge, and also blunt in the five-sixths of the upper.

CHESLDEN'S KNIFE. A knife with a fixed handle; very convex on its edge, concave on the back, which was used by Cheselden in *lithotomy*.

CROOKED KNIFE, *Culter falcatius*, *Culter curvus*, (F.) *Couteau courbe*. A knife, which is crooked and concave on its cutting edge. It was formerly employed in amputation of the limbs.

CROCHET KNIFE, *Cutellus uncus*, (F.) *Couteau à crochet*. A steel instrument, composed of a round staff, furnished with a handle at one extremity, and at the other with a curved knife. It was formerly used to cut to pieces monstrous fœtus in utero; and to open the head when necessary.

DOUBLE EDGED KNIFE, *Ancaps cutellus*, *Amphisæla*, *Amphisæle*, *Catling*, (F.) *Couteau à deux tranchans*, *Couteau désarticulateur*, *C. interosseus*. A knife, the blade of which is

straight and sharp on both sides. It is used for disarticulating bones; and for cutting the soft parts situate between the bones, in amputation of the leg and forearm.

KNIFE EN SERPETTE, (F.) *Couteau en ser-pette*. A sort of knife, of the shape of a *ser-pette* or pruning-knife, invented by Desault for dividing the bony paries of the maxillary sinus, for the purpose of extracting fungi from it.

LENTICULAR KNIFE, *Culter lenticularis*, (F.) *Couteau lenticulaire*. An instrument, used in the operation of trepanning, for removing inequalities in the inner table of the skull, which may have been left by the crown of the trephine around the opening made by it. It is formed of a lenticular button, fixed at the extremity of an iron staff, which is convex on one side, flat on the other; sharp at both edges, and mounted on an ebony handle.

LITHOTOMY KNIFE, (F.) *Couteau lithotome*. A name, given by Poubert to a large knife, the narrow blade of which, four and a half inches in length, was sharp in its whole extent, and made an obtuse angle with the handle. He used it in the lateral operation.

KNOT, PACKER'S, (F.) *Nœud d'emballleur*. A compressive bandage, used for arresting hemorrhage from the temporal artery or its branches. The *nœud d'emballleur* is made with a double-headed roller, five ells long. A graduated compress is placed over the opening in the artery, and the bandage is applied over it; the balls of the roller being carried horizontally round to the opposite temple, where they are crossed obliquely and carried back to the part where the compress is situate. The hands are then changed with the rollers, crossing them so as to form a knot, and taking one above the head; the other beneath the chin. They are then crossed again, so as to form several knots, one above the other. This bandage is called, by some surgeons, *Solar* or *oblique chevestre*, or *capistrum*.

KNOT. SURGEON'S, (F.) *Nœud du chirurgien*. A double knot, made by passing the thread twice through the same noose. This knot is used frequently in the ligature of arteries, in the umbilical cord, &c.

KNOTBERRIES, *Rubus chamæmorus*.

KNOTGRASS, *Polygonum aviculare*.

KOINO-MIASMATA. See Miasm.

KOLERUS. A name given by Paracelsus to dry ulcers.

KOLPORRHAPHY, *Elytrorrhaphy*.

KOLTO, *Flica*.

KOPYOPIA. See Copyopia.

KORIS, *Cimex*.

KRAMERIA, *Ratan'hia*, *Rhatan'ia*, *Ral'anhy*, (F.) *Ratanhie*, *Rutankhia*. The krameria,—*Krameria triandra*; *Sex. Syst.* Tetrandria Monogynia. *Nat. Ord.* Polygalææ,—is a native of Java. The root has a bitter taste; and is astringent, diuretic, and detergent. Dose, ʒj to ʒj.

KRAMERIA IN'NA, or *Ratanhy of the Antilles* has similar virtues.

KREOSOTON, *Creosote*.

KUA KAHIA, *Curcuma longa*.

KUTKULEJA, *Cæsalpinia Bonducella*.

KUTOOKURUNJA, *Cæsalpinia Bonducella*.

KUTUBUTH. An Arabic name for a species of melancholy in which the patient is never quiet at any one place, but wanders about here and there. Also, the name of an insect, which

lives at the surface of stagnant waters, and is in a constant state of agitation. Some lexicographers imagine that it is on account of this last circumstance, that the name of the insect has been given to the disease.

KYANOSIS. Cyanopathy.

KYAPUTTY, Caieput.

KYESTEINE, Kiesteine.

KYLLO'SIS, from *κύλλος*, 'crooked,' 'lame,' *Cyllo'sis*. Professor Chaussier so calls congenital distortion of the feet, *Clubfoot*, *Tal'ipes*, (F.) *Pied bot*. Of this there are many varieties. In the first, the foot, instead of resting on the soil, by the whole plantar surface, touches it only with the metatarso-phalanganian articulations. It seems as if turned backwards and broken upon the leg, (*Pes Equinus*.) In the other cases the foot is twisted inwards, (*Varus*, (F.) *Cagneux*,) so that it rests only on the ground on its outer edge; or it may be twisted inwards, (*Valgus*,) or rest only on its inner surface. In the *flat-foot*, *Sar'apus*, (F.) *Pied plat*, the plantar surface of the foot is flattened instead of being concave.

These deformities are rarely accidental. They are almost always congenital, and may be rectified, at an early period, by proper mechanical means to strengthen the foot gradually and restore it to its proper shape and direction; and if these means fail, the tendons and muscles concerned in the deformity may be divided.

KYNA, *Pastinaca opoponax*.

KYPHOSIS, see Cyphosis—k. Inflammatoria, Vertebral Disease—k. Paralytica, Vertebral Disease.

KYST or CYST, *Kystus*, *Cystus*, from *κύστις*, 'a bladder,' 'pouch,' (F.) *Kyste*. This term is generally applied to pouches or sacs, without opening, and commonly of a membranous nature, which are accidentally developed in one of the natural cavities, or in the substance of organs. Many theories have been successively emitted to explain the formation of cysts, but none are entirely satisfactory. Some are formed by a thin, translucent membrane; having scarcely the thickness of the arachnoid; others of a whitish, fibrocellular membrane, more or less thick. Some contain cartilaginous or bony flakes. The greater part have but one cavity; others, on the contrary, have several; separated by complete or imperfect septa, as is frequently seen in those developed in the ovaries. The matter, contained in cysts, is sometimes limpid, serous, yellowish, white, reddish, and, at others, more or less thick, albuminous, adipous, or caseous. The tumour, formed by them, is called Encysted, which see.

KYSTE ANÉVRYSMAL, Aneurismal sac.

KYSTHITIS, *Cysti'tis*, from *κύσθις*, 'the vagina.' Inflammation of the vulva and of the mucous membrane of the vagina.

KYSTHOPTOSIS, from *κύσθος*, 'the vagina,' and *πίπτω*, 'I fall.' Prolapsus or inversion of the vagina.

KYTTARRHA'GIA, from *κυσταριον*, 'an alveolus,' and *εργυμι*, 'I break forth.' Discharge of blood from an alveolus.

L.

LABE, from *λαμβάνω*, 'I seize,' 'I take,' 'the act of grasping.' Invasion. Also, employed to denote the first paroxysm of fevers.—Galen, Hippocr.

LABIA INTERNA SEU MINORA, Nymphæ.

LABIA PUDENDI, Lips of the Vulva.

LABIAL, *Labia'tis*, from *Labium*, 'a lip.'

LABIAL, Orbicularis oris.

LABIAL ARTERY. Haller and Sabatier call thus the *facial artery* of the majority of anatomists. The *labial arteries*, properly so called, or *coronary arteries of the lips*, (F.) *Coronaires des lèvres*, are two in number. The *superior* arises from the facial, above, and very close to, the commissure of the lips. It is large and tortuous, and is distributed to the upper lip. The *lower* arises from the facial, at a considerable distance from the commissure, and proceeds, in a serpentine course, into the substance of the lower lip, to which it is distributed.

LABIAL GLANDS. This name is given to a multitude of muciparous follicles, of some size; round, prominent, and separate from each other; which are found on the inner surface of the lips, below the mucous membrane.

LABIAL VEINS are distinguished, like the arteries, into *superior* and *inferior*. They open into the facial vein;—a division of the internal jugular.

LABIALIS, Orbicularis oris.

LABIS, Forceps.

LABIUM, Lip—l. Leporinum, Harelip.

LABLAB, *Dolichos Lablab*.

LAB'ORATORY, *Laboratorium*, *Ergasterion*, from *laborare*, 'to work.' A name given to any place for preparing chemical or pharmaceutical products, &c.

LABO'RIOUS. Delivery is said to be laborious, (F.) *Accouchement laborieux*, when attended with more difficulty and suffering than usual. With some, *laborious labour* means one that requires the use of instruments. See Dystocia.

LABOUR, Parturition—l. difficult, Dystocia—l. Morbid, Dystocia—l. Pains, see Pains—l. Show, see Parturition.

LABRISULCIUM, Cheilocace, Stomacace.

LABRUM, Lip—l. Cerebri, Infundibulum of the brain.

LABRUSCA, *Bryonia Alba*.

LAB'YRINTH, *Labyrinth'us*, *Antrum buccino'sum*. A place, full of turnings, the exit of which is not easily discoverable. Anatomists have given this name to the aggregate of parts, constituting the internal ear, *Labyrinth'us auris intima*, *Intima pars organi audit'us*. The Labyrinth is situate between the tympanum and meatus auditorius internus. It is composed of several cavities, which communicate with each other in the dried bone; as the *vestibule*, *cochlea*, *semicircular canals*, &c. It is lined by perosteum, and also by a *pulpy membrane*, constituting the *membranous labyrinth*, on which the auditory nerve is regularly dispersed. This

membrane forms two sacs in the vestibule, called *sacculus vestibuli* and *sacculus*, (q. v.) respectively, which resemble in shape, that of the bony cavities containing them. Each sac contains calcareous matter, constituting the *Otolithes* and *Otoconies*. When the sac is laid open, upon the upper and outer part, a partition appears, partaking of the nature of the sac, and called by Meckel, *Septum vestibuli nervi somibrandæum*.

LAC, Milk.—I. Ammoniæ, *Mistura ammoniaci*—I. Amygdalæ, *Emulsio amygdalæ*—I. Asafetidæ, *Mistura asafetidæ*—I. Avis, *Albumen ovi*—I. Guaiaci, *Mistura Guaiaci*—I. Gum, *Lacca*—I. Lunæ, *Marga candida*—I. Maris, *Sperm*—I. Seed, *Lacca*—I. Shell, *Lacca*—I. Stick, *Lacca*—I. Sulphuris, *Sulphur præcipitatum*—I. Terræ, *Magnesia carbonas*—I. Virginis, *Virgin's milk*.

LACCA, from *lakah*, Arab. *Gunmi laccæ*, *Stick-lac*, *Gum-lac*, *Seed-lac*, *Shell-lac*, (F.) *Laque*. Lac is a substance formed by an insect, and deposited on different species of trees, chiefly in the East Indies. The various kinds, distinguished in commerce, are:—*stick-lac*, which is the substance in its natural state, investing the small twigs of the tree: and *seed-lac*, which is the same broken off. When melted, it is called *shell-lac*.

Lac was, at one time, used in the form of tincture, as a tonic and astringent; and it still forms part of particular dentifrices.

LACERATION, *Laceratio*, *Rhegma*, *Ruptura*, *Rupture*, from *lacerare*, 'to tear':—*Dilaceratio*, *Sparagmu*, (F.) *Arrachement*, *Déchirement*, *Dilaceration*. The act of tearing or rending. The breach, made by tearing or rending; as a *lacerated wound*, *Tresis vulnus laceratum*, *Laceratura*, *Vulnus laceratum*.

LACERATURA. See Laceration.

LACERTA, Lizard.

LACERTI CORDIS, *Columnæ carneæ*.

LACERTULI CORDIS, *Columnæ carneæ*.

LACERTUS, Brachium, Muscle.

LAC'ERUM. Same etymon. Any thing torn, or appearing as if torn.

FORAMEN LAC'ERUM ANTERIUS, (F.) *Trou déchiré antérieur*, *Hiatus sphæno-pétreux*, (Ch.) is an irregular opening, formed by the sphenoid and petrous portion of the temporal bone. This foramen transmits the third, fourth, and sixth pair of nerves and the first branch of the fifth pair to the eye and its appendages.

FORAMEN LACERUM POSTERIUS, *Foramen jugul're*, *F. lacerum in Basi Cranii*, (F.) *Trou déchiré postérieur*, *Hiatus occipito-pétreux*, (Ch.) is formed by the occipital bone and the inferior edge of the petrous portion of the temporal bone. Through it, the internal jugular vein, the eighth pair of nerves, and accessory nerve pass out of the cranium.

LACHRYMA, Tear. See, also, *Vitis vinifera*.

LACHRYMAL, *Lacrymalis*, from *lacryma*, 'a tear.' Belonging to the tears. This epithet is given to various parts.

LACHRYMAL ARTERY proceeds from the ophthalmic; and distributes its principal branches to the lachrymal gland.

LACHRYMAL or NASAL CANAL or DUCT, *Canalis lacrymalis*, *Canalis orbitæ nasalis*, *Ductus nasalis orbitæ*, *Canalis sacci lacrymalis*, *Ductus ad Nasum*, is formed by the superior maxillary bone, os unguis, and os turbinatum

inferius; and is seated in the outer paries of the nasal fossæ. It is lined by a prolongation of the mucous membrane of the lachrymal sac; and its inferior orifice is furnished with a valvular duplicature. This duct transmits the tears, which have been absorbed at the great angle of the eye by the puncta lacrymalia, into the nasal fossæ.

LACHRYMAL CARUNCLE. See *Caruncula lacrymalis*.

LACHRYMAL FOSSA, *Fossa seu Fovea lacrymalis*, is a slight depression at the upper part of the orbit, which lodges the lachrymal gland.

LACHRYMAL GLAND, *Glandula innominata Gule* ni sen *lacrymalis*, is seated in a depression of the frontal bone at the upper, anterior, and outer part of the orbit. It is of about the size of an almond; and of an oval shape, flattened above and below:—its great diameter being the antero-posterior. It is composed of several small lobules, united by cellular tissue, and separated by it as well as by vessels and nerves which creep in the intervals. This gland has seven or eight excretory ducts, which open behind the upper eyelid. Its use is to secrete the tears, and pour them on the globe of the eye by the excretory ducts.

LACHRYMAL GROOVE, (F.) *Gouttière lacrymale*, is the bony channel, which lodges the lachrymal sac. It is seated at the anterior and inner part of the orbit, and is formed by the os unguis and the ascending process of the upper jaw bone.

LACHRYMAL HERNIA or TUMOUR, *Hernia Sacci Lacrymalis*, is when the tears enter the puncta, but cannot pass to the nose, and accumulate. By Anel, this was called *Dropsy of the Lachrymal Sac*.

LACHRYMAL NERVE is the smallest of the three branches formed by the ophthalmic nerve. It is distributed, particularly, to the lachrymal gland and to the upper eyelid. In its course it gives off a *sphæno-maxillary* and a *malar* filament.

LACHRYMAL PASSAGES, *Via lacrymales*, (F.) *Voies lacrymales*. The organs concerned in the secretion of tears, in spreading them over the eye, and taking them up again to transmit them into the nasal fossæ. The lachrymal passages are composed of the *lachrymal gland*, *caruncle*, *puncta*, *ducts*, the *lachrymal sac*, and the *nasal duct*.

LACHRYMAL PUNCTA, *Puncta Lacrymalia*, (F.) *Points lacrymaux*, are two small, round, and contractile openings, situate in the centre of a tubercle, about a line and a half distant from the inner commissure of the eyelids, and continuous with the *lachrymal ducts*. These ducts, (F.) *Conduits lacrymaux*, *Lacrymales Canaliculi*, *Canales seu Ductus lacrymales*, *D. lacrymales*, *Ductus lacrymales laterales*, *D. punctorum lacrymalium*, *Cor' nua lacrymalia*, *Collic' iæ punctorum lacrymalium*, *Canaliculi limæum*, *Cor' nua Limæum*, are two in number—a superior and an inferior—which extend from the puncta to the lachrymal sac. They seem formed by a very delicate prolongation of the conjunctiva, which is continuous with the mucous membrane of the lachrymal sac, (F.) *Reservoir des larmes*:—the *Succus seu Sinus seu Lacus lacrymalis*, *Infundibulum lacrymale*, *Succus lacrymalis*.

LACHRYMAL VEINS accompany the artery of

the same name, and open into the ophthalmic and palpebral veins.

LACHRYMATIO, Epiphora. Also, a profuse secretion of tears from any cause:—Weeping.

LACIS, Plexus.

LACMUS TINCTORIUS, Lichen roccella.

LACONICUM, Vaporarium. See Stove.

LACQ, Laqueus.

LACRUMA, Tear.

LACRYMA, Tear.

LACTATION, *Tithenesis*, *Thelasis*, *Thelasmus*, *Lactatio*; from *lac*, 'milk,' 'I suckle,' 'I give milk.' *Suckling*:—the giving of suck, (F.) *Allaitement*. The French have four varieties of lactation. 1. *Allaitement maternel*,—*Maternal Lactation*, when the mother suckles the child. 2. *A. étranger, mercenaire*,—when another suckles it. 3. *A. artificiel*, when the child is brought up by hand. 4. *A. animal*, when the child is suckled by an animal.

LACTEALS, Chyliferous vessels.

LACTEUS, Lactic.

LACTIC, *Lacteus*, from *lac*, 'milk,' appertaining to milk.

LACTIC ACID *Ac'idum Lacticum*, *Acid of milk*, *Acidum Lactis*. This has been recommended as a therapeutic agent in atonic dyspepsia, owing to its being presumed to be one of the gastric acids secreted in health. It is given either in the form of lemonade or of lozenges. The acid is obtained either from milk or from the juice of the red beet.

LACTICA, Typhoid.

LACTICINIA, Parotid.

LACTIFEROUS, *Galactoph'orus*, (q. v.) *Lactiferus*, from *lac*, 'milk,' and *fero*, 'I carry.'

LACTIFEROUS VESSELS or DUCTS, *Tubuli lactiferi* vel *Ductus lactiferi*, (F.) *Vaisseaux ou conduits lactifères*, are the excretory ducts of the Mammary Gland, which see.

LACTIFEROUS or LACTEAL SWELLING. A tumefaction of the breast, supposed by Sir Astley Cooper to arise from a large collection of milk in one of the lactiferous tubes, the result of chronic inflammation of the tube near the nipple, with closure of its aperture, and obliteration of the canal for an inch or more. The tube requires to be punctured.

LACTIFUGA, *Lactifuge*, from *lac*, 'milk,' and *fugo*, 'I drive away.' Medicines which dispel milk.

LACTINIA, from *lac*, 'milk.' Food prepared with milk.

LACTIPOTOR, Galactopotes.

LACTIS REDUNDANTIA, Galactia.

LACTIVORUS, Galactophagous.

LACTUCA, from *lac*, 'milk,' so called from its milky juice. *Lactuca sativa*, *Lettuce*, *Garden Lettuce*, *Eunuchium Meco'nis*, *Thridax*, *Chebras*, (F.) *Laitue ordinaire*. It is used as a wholesome salad. The seeds possess a quantity of oil, which, when formed into an emulsion, has been advised in ardor urinae, &c.

The inspissated juice, *Lactucarium*, *Thridaceæ*, resembles, in odour and appearance, that of opium, and is, like it, narcotic, but uncertain. Dose, gr. j to x and more.

LACTUCA ELONGATA. See *L. Virosa*.

LACTUCA GRAVEOLENS, *L. Virosa*.—*L. Sylvestris*, *L. scariola*.

LACTUCA SCARIOLA, *L. Sylvestris*, *Scariola*, (F.) *Laitue Scariole*, *L. sauvage*, possesses a

stronger degree of bitterness than the *L. sativa*. It has similar virtues with the next.

LACTUCA VIROSA, *L. graveolens*, *Strong-scented Lettuce*, (F.) *Laitue vireuse*. The odour of this plant, the leaves of which are used in medicine, is strongly narcotic, and the taste bitter. They are narcotic, diuretic, and aperient; and have been used in dropsies. *Lactuca elongata*, or *Wild Lettuce* of the United States, has been employed for the *L. virosa*.

LACTUCIMEN, Aphthæ.

LACTUCIMINA, Aphthæ.

LACTUMEN, Porrigo larvalis.

LACTUMINA, Aphthæ.

LACUNA, from *lacus*, 'a lake or deep ditch.'

A Fossa or Ditch. Anatomists have given this name to small cavities in the mucous membranes, the parietes of which secrete a viscid humour. Certain lacunæ are but the excretory orifices of mucous crypts. They are very visible in the rectum, vagina, urethra, &c. Sometimes, *lacuna* is used synonymously with *crypt*.

LACUNA, Fontanella.—*L. Cerebri*, Infundibulum of the brain, Pituitary gland.—*L. Folliculus*, Crypta.

LACUNAR VENTRICULI QUARTI SUPERIOR, Valvula Vieussenii.

LACUNE DE LA LANGUE, Cæcum foramen.

LACUS LACRYMALIS, Lachrymal sac.

LACUS LACHRYMARUM. A small space in the inner angle of the eye between the lids, towards which the tears flow, and at which the triangular canal formed between the closed lids terminates.

LADA, Piper nigrum.

LADANUM. See *Cistus creticus*.

LADENDO, Influenza.

LADIES-MANTLE, Alchemilla.

LADIES-SMOCK, Cardamine pratensis.

LADRERIE, (F.) from *λαδρος*, 'deformed.' (F.) *Léproserie*, *Maladrerie*. A vulgar name for the elephantiasis (q. v.), or Lepra. Also, an hospital for the reception of the leprous.

LADYBIRD, Coccinella septempunctata.

LADYBUG, Coccinella septempunctata.

LADYCOW, Coccinella septempunctata.

LÆMOS, Pharynx.

LÆSION, Lesion.

LÆTIFICANTIA, from *lætifico*, (*lætus*, and *facio*), 'I make glad.' Medicines, formerly used as cordials, in depression of spirits, &c.

LAGNEIA, Coition.

LAGNESIS, Furor Fœmininus, Nymphomania.—*L. Furor masculinus*, Satyriasis.—*L. Salacitas*, Satyriasis.

LAGOCHEILUS, Harelip.

LAGONES, Flanks.

LAGONOPONOS, Pleurodynia.

LAGOPHTHALMIA, from *λαγως*, 'a hare,' and *οφθαλμος*, 'an eye,' *Hare's Eye*; *Leporinus Oculus*, (F.) *Œil de Lièvre*. A vicious arrangement of the upper eyelid, which is so retracted, that it cannot cover the globe of the eye during sleep. It has been asserted, that this condition of the eye is natural in the hare when asleep.

LAGOPHTHALMUS, Geum urbanum.

LAGOSTOMA, Harelip.

LAIICHE, Sarsaparilla Germanica.—*L. des Sables*, Sarsaparilla Germanica.

LAIIT, Milk.—*L. Adoucissant*, Looch ex ovo.—*L. d'Anesse*, Milk, asses'—*L. d'Amandes*, Emulsio

amygdale—*l. d'Asafetida*, Mistura asafetida—*l. de Beurre*, Buttermilk—*l. de Brebis*, Milk, ewes'—*l. Caillé*, Curds—*l. de Chèvre*, Milk, goats'—*l. Épanché*, *L. répandu*—*l. de Femme*, Milk, human—*l. de Jument*, Milk, mares'—*l. de Poule*, see *Ovum*—*l. de Vache*, Milk of the cow—*l. Virginal*, Virgin's milk.

LAIT RÉPANDU, (F.) *Lait épanché*. A popular expression in France, under which is comprehended every kind of disease (and particularly vague pains) occurring after delivery; all being ascribed to diffusion or deposition of milk.

LAÏTEROY DOUX, *Sonchus oleraceus*.

LAITUE ORDINAIRE, Lettuce—*l. Sauvage*, *Lactuca scariola*—*l. Scariola*, *Lactuca scariola*—*l. Vireuse*, *Lactuca virosa*.

LAKEWEED, *Polygonum hydropiper*.

LALIA, Voice, articulated.

LALLATION, *Lalla'tio*, *Lambdacismus*, *Lulaby* speech. Sauvages uses this term for a vicious pronunciation, in which the letter L is improperly doubled, or softened, or substituted for R.

LAMBDA CISMUS, Lallation.

LAMBDOID or **LAMBDOIDAL**, *Lambdoides*, from the Greek letter Λ , *λαμβδα*, and *idos*, 'shape,' 'resemblance.' Anatomists have given the name **LAMBDOIDAL SUTURE**, *Sutura lambdoidalis*, *S. Proræ*, to the suture, formed by the parietal bones and the occipital, because it resembles the letter Λ , *lamdba*, of the Greeks. It is the *Occipito-parietal suture*,—*Suture occipitale*, (Ch.) In this suture, the ossa Wormiana are most frequently met with; and the denticulations are most distinctly marked.

LAMBIVIVUM, Eclectos.

LAME, *Lamina*—*l. Cornée*, *Tænia semicircularis*—*l. Ruyschienne*, *Ruyschiana tunica*.

LAMELLA, *Lamina*.

LAMELLAR, *Lamello'sus*, *Lamina'ted*, (F.) *Lamelleux*, *Lamineux*, composed of thin laminae or leaves—as the *Lamellar* or *lam'inated Tissue*; i. e., the *cellular tissue*.

LAMELLEUX, *Lamellar*.

LAMENESS, Claudication.

LAMINA, *Lamella*, (F.) *Lame*. A thin, flat part of a bone; a plate or table, (q. v.), as the cribriform lamina or plate of the ethmoid bone. *Lamina* and *Lamella* are generally used synonymously; although the latter is properly a diminutive of the former.

LAMINA CRIBROSA, see *Criblé*—*l. Prima cutis*, *Epidermis*.

LAMINA SPIRALIS, *Septum scalæ*, *Septum cochleæ auditivæ*. A partition between the scalæ of the cochlea. The larger part of this, next the modiolus is formed of bone. The remainder, or that part next the opposite side of the scalæ, is composed of a cartilaginous membrane, called, by Valsalva, *Zona Cochleæ*. By some anatomists, the lamina is divided into a *Zona ossea*, and *Z. mollis*. By others, it is considered to consist of four laminae, when examined with a strong glass; a *Zona ossea*, next to the modiolus—a *Zona coriacea*, on the outer side of this; a *Zona vesiculæ*, and a *Zona membranaea*, which is, perhaps, the lining membrane of the cochlea.

LAMINÆ SPONGIOSÆ NASI, Turbinate bones.

LAMINARIA DIGITATA, *Tangle*. One of the Algæ eaten in Scotland, and hawked about the streets with the Pepper-dulse, (q. v.)

LAMINATED, *Lamellar*.

LAMINEUX, *Lamellar*.

LAMIUM ALBUM, *Urtica mortua*, *Galeopsis*, *Archangelica*, *Dead Nettle*, *White Archangel Nettle*, (F.) *Ortie blanche*, *Ortie morte*. Infusions of this plant have been recommended in uterine hemorrhage, and in leucorrhœa. It is not used.

LAMIUM MONTANUM, *Melittis melissophyllum*—*l. rubrum*, *Galeopsis*.

LAMOTTE, MINERAL WATERS OF. These thermal springs are in the department of Isère, France. Temperature, 184°.

LAMPOURDE, *Xanthium*.

LAMPANA, *Lapsana*.

LAMPYRIS, *Cicindela*.

LANA PHILOSOPHORUM, *Zincioxydum*.

LANARIA, *Saponaria*, *Verbascum nigrum*.

LANCE DE MAURICEAU, (F.) An instrument invented by Mauriceau for perforating the head of the fœtus. A perforator.

LANCET, *Lance'ola*, *Lance'la*, *Schastérion*, (F.) *Lancette*,—diminutive of *lancea*, 'a lance.' A surgical instrument, used in the operation of phlebotomy. It is composed of two parts, the handle, (F.) *Chasse*, and the blade, (F.) *Lame*. The former is made of two small plates of ivory, bone, or shell, movable on the blade, for whose preservation they are intended. The blade is formed of well polished steel. Lancets are made of different shapes; some being *broad-shouldered*—others, *spear-pointed*. The French distinguish three kinds: 1. *Lancette à grain d'orge*, which, on account of the almost oval shape of its point, makes a large opening. 2. The *L. à langue de serpent*, which is very narrow towards the point; and, 3. The *L. à grain d'avoine*, which holds a medium station between the two former, and is generally preferred.

The *Abscess Lancet* is merely a large lancet for the purpose of opening abscesses.

LANCEOLA, *Lancet*.

LANCETTE, *Lancet*.

LANCINANT, *Lancinating*.

LANCINATING, *Lancinans*, from *lancinare*, (*lunce'a*, 'a lance,') 'to strike or thrust through.' (F.) *Lancinant*, (substantive, *Élancement*.) A species of pain, which consists in lacerations or shootings, similar to those that would be produced by the introduction of a sharp instrument into the suffering part. It is especially in cancer, that this kind of pain is felt.

LAND'S END, CLIMATE OF. The climate of the Land's End, in England, resembles that of the south of Devonshire, but it is more relaxing. It is considered to be most likely to prove beneficial in consumptive cases, in which the disease is accompanied by an irritated state of the pulmonary mucous membrane, producing a dry cough. Where the system is relaxed, and the secretion from the lungs considerable, the climate, it is conceived, will generally prove injurious. As a brumal retreat, the southern coast of Devonshire would seem to be preferable to it.

LANGÉAC, MINERAL WATERS OF.—Acidulous, mineral waters at Langeac, in the department of Haute-Loire, France. They are employed as refrigerant, aperient, and diuretic. They contain carbonic acid, carbonates of soda and magnesia, and a little iron.

LANGII AQUA EPILEPTICA, *Epilepticæ*

Water of Langius, formerly employed against epilepsy. It was composed of the flowers of the *convallaria* and *lavender*, *Spanish wine*, *cinnamon*, *nutmeg*, *mistletoe*, *peony* and *dittany roots*, *long pepper*, *cubebæ*, and *rosemary flowers*.

LANGUE, Tongue.—*L. Abaisseur de la*, Glossoctochus.—*L. de Carpe*, see *Lever*.—*L. de Cerf*, Asplenium scolopendrium.—*L. de Chien*, Cynoglossum.—*L. de Serpent*, Ophioglossum vulgatum.

LANGUEUR, Languor.

LANGUOR, *Aph'esis*. (F.) *Langueur*. A species of atony, (q. v.) depression, or debility, which generally comes on slowly.

LANUGO PRIMA, Geneias.—*L. Pudendorum*, Pubes.—*L. Siliquæ hirsutæ*, see *Dolichos pruriens*.

LANUVIUM, Vulva.

LAONICA CURATIO. A mode of treating the gout, which consisted in the employment of local applications, proper for evacuating the morbid matter.

LAOS, Tin.

LAPACTICUS, Cathartic.

LAPARA, Abdomen, Flanks, Lumbi.

LAPAROCÆLE, from *λαπαρά*, 'the lumbar region,' and *κῆλη*, 'a tumour.' *Lumbar Hernia*, through a separation of the fibres of the quadratus lumborum, and a protrusion of the aponeurosis of the transverse muscle, on the outside of the mass common to the sacro-lumbalis and longissimus dorsi.—Cloquet.

LAPARO-ENTEROTOMY, *Lap'aro enterotomia*; from *λαπαρά*, the 'lumbar region,' the 'abdomen'; *εντερον*, 'intestine,' and *τομή*, 'incision.' The operation of opening the abdomen and intestinal canal, for the removal of disease.

LAPAROCYSTOTOMIA. See *Lithotomy*.

LAPAROSCOPIA, Abdominoscopia.

LAPAROTOMY. See *Gastrotony*.

LAPATHOS, Rumex acutus.

LAPATHUM, Rumex acutus.—*L. Aquaticum*, Rumex hydrolapathum.—*L. Chinense*, Rheum.—*L. Orientale*, Rheum.—*L. Sanguineum*, Rumex sanguineus.—*L. Unctuosum*, Chenopodium bonus Henricus.

LAPIDIL'LUM. Blasius has given this name to a kind of scoop, used, in his time, for extracting stone from the bladder.

LAPIS, Calculus.

LAPIS ACCIPITRUM, Hieracites.—*L. Aerosus*, Calamina.—*L. Ammoniæ*, see *Ammoniac gum*.—*L. Animalis*, Blood.—*L. Armenius*, Melochites.—*L. Aureus*, Urine.—*L. Bezoardicus*, Bezoar.—*L. Cæruleus*, Cupri sulphas.—*L. Calaminaris*, Calamina.—*L. Carneolus*, Cornelian.—*L. Causticus*, Potassa cum calce.—*L. Causticus*, Potassa fusa.—*L. Collymus*, Ætites.—*L. Contrayervæ*, *P. contrayervæ compositus*.—*L. Cyanus*, *L. lazuli*.—*L. Fulmineus*, Ceraunium.—*L. Hematites*, Hæmatites.—*L. Heracleus*, Magnet.—*L. Infernalis*, Argenti nitras.—*L. Infernalis alkalinus*, Potassa fusa.—*L. Infernalis sive septicus*, Potassa cum calce.—*L. Judaicus*, Judæus (lapis.)

LAPIS LAZULI, *Lapis Cyanus*, *Asuloi*, *Laz'ulite*, (F.) *Pierre d'azur*, *Outremer*. A stone, of a beautiful blue colour; opaque; and close-grained; fracture dull. It is composed of silicæ; alumine; carbonate and sulphate of lime; oxide of iron, and water. It was formerly looked upon as a purgative and emetic, and given in epilepsy.

LAPIS MALUCENSIS, Bezoard of the Indian porcupine.—*L. Nauticus*, Magnet.—*L. Phœnicites*, Judæus (lapis).—*L. Porcinus*, Bezoard of the Indian porcupine.—*L. Prunellæ*, Potassæ nitras

fusus sulphatis paucillo mixtus.—*L. Sardius*, Cornelian.—*L. Septicus*, Causticum commune.—*L. Septicus*, Potassa fusa.—*L. Specularis*, S. lucidum.—*L. Syderitis*, Magnet.—*L. Syriacus*, Judæus (lapis).—*L. Vini*, Potassæ supertartras impurus.

LAPPA, Galium aparine, Lippitudo.—*L. Minor*, Xanthium.

LAPPULA HEPATICA, Agrimony.

LAPSA'NA, *Lamps'na*, *Nu'pium*, *Papilla'ris herba*, *Dock-cresses*, *Nipple-Wort*. (F.) *Lamp-sane*, *Herbe aux Mamelles*. This plant is a lactescent bitter. It has been chiefly employed, however, as an external application to sore nipples, &c.

LAQ. Laqueus.

LAQUE, Lacca.

LAQUEUS, *Funis*. A cord or ligature or bandage, with running knots;—a *Noose*, a *loop*, *Brochos*, *Pach'etos*. (F.) *Lag* ou *Lacq*. The term is applied to a bandage or fillet of any kind, attached by means of a loop upon any part with the view of fixing it; as in certain cases of labour, where a hand or foot presents; or to facilitate extension in luxations and fractures.

LAQUEUS GUT'TURIS, 'Noose of the throat.' Violent inflammation of the tonsils, in which the patient appears as if suffocated by a noose.

LARCI, Pinus larix.

LARD, Adeps suilla.

LARDA'CEOUS, from *lardum*, 'lard;' the fat of bacon. An epithet given to certain organic alterations in the textures, whose aspect and consistence resemble lard.

LARGE, Broad.

LARIX, Pinus larix.

LARKSPUR, BRANCHING, Delphinium consolida.

LARME, Tear.

LARMOIEMENT, Epiphora.

LA-ROCHE POSAY, MINERAL WATERS OF. Simple sulphurous waters in the department of Vienne, France.

LARVA, Mask.

LARYNGE, Laryngeal.

LARYNGE'AL, *Laryngeus*. (F.) *Laryngé*, *Laryngien*. Same etymon as LARYNX, (q. v.) That which belongs to the larynx.

LARYNGEAL ARTERIES are given off from the thyroid arteries.

LARYNGEAL NERVES, (F.) *Nerfs laryngés* are two in number;—a *superior* and *inferior*. The *superior laryngeal nerve* is given off from the trunk of the pneumogastric, at the upper and deep part of the neck. It passes downwards and inwards, behind the internal carotid artery, and divides into two secondary branches: the one, *external*, which distributes its filaments on the outside of the larynx, to the sternothyroid, hyo-thyroid, constrictor inferior, crico-thyroid muscles, &c. The other, the *internal*, which crosses the thyro-hyoid membrane, and gives filaments to the epiglottis, the mucous membranes of the pharynx and larynx, to the arytenoid gland, the arytenoid and crico-thyroid muscles, and ultimately anastomoses with the inferior laryngeal nerve. The *inferior laryngeal nerves* or *recurrents*, *Nervi reversi'vi*, *Ramæaux Trachæaux* (Chaus.), arise from the trunk of the pneumogastric within the thorax. They ascend in the furrow, which separates the trachea from the œsophagus, to be distributed on the neck, after having been reflected;—the left

around the arch of the aorta; the right, around the corresponding subclavian. They send off filaments to the cardiac plexuses; to the plicates of the œsophagus, and trachea; to the thyroid gland; to the inferior constrictor of the pharynx; the posterior and lateral crico-arytenoid and thyro-arytenoid muscles; and to the mucous membrane of the pharynx and larynx.

LARYNGEAL VEINS open into the internal jugular. Winslow gives the name *laryngeal* to the superior thyroid artery, (q. v.)

LARYNGEAL, Laryngeal.

LARYNGISMUS STRIDULUS, Asthma thymicum.

LARYNGITE ŒDEMATEUSE, Œdema of the glottis—*l. avec production de Fausses membranes*, Cynanche trachealis—*l. pseudomembraneuse*, Cynanche trachealis—*l. avec sécrétion de Pus*, Phthisis laryngea.

LARYNGITIS, from *Larynx*, and *itis*, a suffix denoting inflammation; *Inflammat'io Laryng'is*, *Cynanchē laryng'e'a*, *Angina laryngea*, (F.) *Catarrhe laryngien*, *Anginē laryngē*, *Inflammation of the Larynx*. This disease, in some measure, resembles croup; but is usually devoid of that peculiar, sonorous inspiration, which attends the latter. There is, also, pain upon pressing the larynx; and, whilst laryngitis is a disease of more advanced life, croup attacks children. The membraniform exudation is, also, absent; probably, because the inflammation, being seated above the glottis, the coagulated lymph is readily expectorated. It requires the most active treatment.

LARYNGITIS, CHRONIC, Phthisis laryngea—*l. Œdematous*, Œdema of the glottis—*l. Submucous*, Œdema of the glottis—*l. et Tracheitis infantilis*, Cynanche trachealis.

LARYNGOGRAPHY, *Laryngographia*; from *λαρυγξ*, 'the larynx,' and *γραφειν*, 'a description.' An anatomical description of the larynx.

LARYNGOLOGY, from *λαρυγξ*, 'the larynx,' and *λογος*, 'a treatise.' A treatise on the larynx.

LARYNGOPHONY, *Tracheoph'ony*, *Laryng'e'al voice*, *Tra'cheal voice*, from *Larynx*, and *φωνη*, 'voice.' The sound heard in health, when the stethoscope is placed over the larynx or trachea, at the time the person speaks. The voice appears to pass immediately up to the ear of the Auscultator. A similar physical sign exists when there is a cavity in the lungs, and the instrument is placed over it, whilst the patient speaks. See Pectoriloquy.

LARYNGOTOMY, *Laryngotom'ia*, from *λαρυγξ*, 'the larynx,' and *τεμνειν*, 'to cut.' A surgical operation, which consists in opening the larynx, either to extract a foreign body, or to remedy any obstruction of the glottis. The operation is, sometimes, erroneously called *Bronchotomy* and *Tracheotomy*.

LARYNGO-TRACHEITIS, Cynanche trachealis.

LARYNGO-TRACHEITIS with DIPHTHERITIC EXUDATION, Cynanche trachealis.

LARYNX, *λαρυγξ*, ('a whistle.') *Caput seu Operculum seu Initium seu Finis superior seu Terminus superior seu Pars prima as'peræ arteriæ*. The apparatus of voice is situate at the superior and anterior part of the neck; and at the top of the trachea, with which it communicates. It is composed of four cartilages,—the thyroid, cricoid, and two arytenoid; is moved

by a number of muscles, and lined by a mucous membrane, having certain membranous reflections, constituting the superior ligaments of the glottis, &c.

PARTS COMPOSING THE LARYNX.

- | | | |
|-----------------------|---|--------------------------------------|
| 1. Cartilages,..... | { | Thyroid, |
| | | Cricoid, |

| | | Crico-arytenoid. |
| 6. Ligaments,..... | { | Thyro-arytenoid. |

The vessels and nerves of the larynx are called *laryngeal*.

The larynx is destined to give passage to the air in the act of respiration, and to impress upon it certain modifications, which constitute the voice. Its dimensions vary in different individuals. In men, it is always larger and situate lower than in women.

LARYNX, PELLICULAR OF PLASTIC INFLAMMATION OF THE, Cynanche trachealis.

LASER, *Laserpitium*—*l. à larges feuilles*, *Laserpitium latifolium*.

LASERPITUM, *Laser*, *Sil'phium*, *οπος σιλ'φιον*. A term applied, anciently, both to a plant and its juice, with the nature of neither of which we possess any precise information. Bentley, Laurence, Geoffroi, &c., regarded it to have been the same as our asafetida:—Theophrastus, Dioscorides, and the ancient Scholiast on Aristophanes, however, by assigning a sweet and agreeable flavour to the laserpitium, discountenance the idea. From whatever plant obtained, it was so rare, and consequently so costly, that the Romans deposited it in the public treasury. It was obtained from Cyrene—*Succus Cyrenæicus*—and likewise from Persia,—the latter being the most valuable. The Laserpitium is called, by Avicenna, *Althit*.

LASERPITUM LATIFOLIUM, *Gentiana alba*, *White Gentian*, *Ceræ'ria alba*. (F.) *Laser à larges feuilles*. The root of this plant is bitter and tonic.

LASERPITUM SILER, *Ses'eli*, *Siler montanum*; *Heart-wort*, *Sermountain*. The seeds and roots are possessed of aromatic properties.

LASSITUDE OCULAIRE, Copyopia.

LASSITUDO, Copos.

LATENS IN ORE, Pterygoideus internus.

LATENT, *Latens*, from *latere*, 'to lie hid,' 'lying hid,' 'concealed.' An epithet applied to certain diseases or states of disease, in which the symptoms are so concealed and obscure, as to escape the observation of the physician.

Thus, we say *latent inflammation*, *latent period of small pox*.

LATERITIOUS, *Lateritius*; from *luter*, 'a brick.' An epithet applied to the brick-like sediment, occasionally deposited in the urine of people afflicted with fever.

LATESCENTIS CHORDÆ, *Palmaris longus*.

LATHYRIS, *Euphorbia lathyris*.

LATIBULUM, from *lateo*, 'I lie hid' The focus of febrile poison; whence it spreads to every part to induce a paroxysm. See *Clapier*.

LATICA. Same etymon. *Amphimerina latica* of Sauvages. A species of quotidian remittent, whose paroxysms are very long, and which is accompanied with *latent heat* (?) whence its name.

LATICES LACTEI, *Receptaculum chyli*.

LATISSIMUS COLLI, *Platysma myoides*.

LATISSIMUS DORSI, *Aniscalptor*, *Dorsi-lumbosacro-humeral*, *Brachium movens quartus*, *Lombo-humeral*, (Ch.) (F.) *Muscle grand dorsal*, *M. très large du dos*. A flat muscle; broad, especially below: thin; quadrilateral; and situate at the posterior, lateral, and inferior region of the trunk. It is attached to the posterior half of the outer lip of the crest of the ilium; to the posterior surface of the sacrum; to the spinous processes of the six or seven last dorsal vertebrae, to all those of the loins, and to the last four false ribs, and is inserted by a strong tendon at the posterior edge of the bicipital groove of the humerus. Its upper fibres are almost horizontal: the middle very long and oblique upwards and outwards: and the anterior almost vertical. This muscle carries the arm backwards, depressing it, and making it turn on its axis. It also draws backwards and downwards the prominence of the shoulder. When, suspended by an arm, we make an effort to raise ourselves, it draws the trunk towards the arm. It can, also, raise the ribs by assuming its fixed point on the humerus, and become an inspiratory muscle.

LATTICE WORK, *Cancelli*.

LATUS, Broad—*l. Ani*, *Levator ani*.

LAU. See *Spirit*.

LAUCANIA, *Leuca'nia*, from *λαω*, 'I enjoy,' 'I take.' The fauces and œsophagus. Also, the chin.—*Gorræus*.

LAUDANUM. Perhaps from *laus*, 'praise;' *laudat'um*, 'praised.' Every preparation of opium, (q. v.) solid or liquid, but more particularly the extract and tincture, and especially the latter.

LAUDANUM ABBATIS ROUSSEAU, *Guttæ Abbatissæ Rousseau*, *Vinum opiatum fermentatione pardatum*, *Abbe Rousseau's Drops*, (*Mel. Narbonne*, 3xij, *et albidæ* Oij. Set in a warm place, and as soon as the mixture ferments, add *Opium* f. ʒiv, dissolved in *water* f. 3xij. Let it ferment for a month, and evaporate to f. 3x: strain, and add *rectified spirit of wine* f. 3ivss.)

LAUDANUM FORD'S, *Vinum opii*—*l. Liquid*, *Tinctura opii*—*l. Liquidum Hoffmanni*, *Vinum opii*—*l. Liquidum Sydenhami*, *Vinum opii*—*l. Opiatum*, *Extractum opii*—*l. Simplex*, *Extractum opii*.

LAUGH, SARDONIC, *Canine laugh*.

LAUGHING, *Risus*.

LAUREL, BROAD-LEAVED, *Kalmia latifolia*—*l. Cherry*, *Prunus lauro-cerasus*—*l. Common*, *Prunus lauro-cerasus*—*l. Dwarf*, *Kalmia*

angustifolia—*l. Narrow-leaved*, *Kalmia angustifolia*—*l. Poison*, *Prunus lauro-cerasus*—*l. Water*, see *Prunus lauro-cerasus*—*l. White*, *Magnolia glauca*.

LAURENT, SAINT, MINERAL WATERS OF. A thermal spring, five leagues from Joyeuse in France. Temp. 127° Fahr.

LAURENTIA PINNATIFIDA, *Pepperdulse*. One of the *Algæ*, eaten in Scotland, and hawked about the streets of Edinburgh along with *Laminaria digitata*, or *Tangle*.

LAUREOLA, *Daphne laureola*.

LAURIER, *Laurus*—*l. Alexandrin*, *Ruscus hypoglossum*—*l. Amandier*, *Prunus lauro-cerasus*—*l. Cérise*, *Prunus lauro-cerasus*—*l. Rose*, *Nerium oleander*.

LAURO-CERASUS, *Prunus lauro-cerasus*.

LAURUS, *Laurus nobilis*, *Daphnē*, the *Sweet Bay*. *Nat. Ord. Laurinæ*. (F.) *Laurier*. The leaves and berries have a sweet, fragrant smell, and an aromatic, astringent taste. Sweet bay has been advised as a stomachic and carminative, but is now rarely used. It is, sometimes, employed as a fomentation and in gylsters; and the berries are an ingredient in the *Emplastrum Cumini*.

LAURUS ALEXANDRINA ANGUSTIFOLIA, *Ruscus hypoglossum*—*l. Camphora*, see *Camphor*.

LAURUS CASSIA. The species of *laurus* which yields the *Cassia lignea*, *Casia*, *Cassia cinnamomea*, *Cortex Cuneifera Malabarica*, *Cassia lignea Malabarica*, *Xylo-cassia*, *Canel'la Malabarica* et *Javan'sis*, *Canella Cuba'na*, *Arbor Judæica*, *Cassia Canell'la*, *Canellifera Malabarica*, *Cortex crassior*, *Cinnamomum Malabaricum*, *C. Indicum*, *C. Sinen'se*, *Calihac'ha canell'la*, *Wild Cinnamon*, *Malabar Cinnamon*, *Cassia*. (F.) *Cannelle de Malabar ou de Java*, *ou de la Chine*, *ou des Indes*, *ou de Coromandel*, *C. fausse*, *C. matte*, *Casse en bois*, *Casse aromatique*. The bark and leaves abound with the flavour of cinnamon, for which they may be substituted; but they are much weaker. The unopened flower buds are used in the same manner.

LAURUS CINNAMOMUM, *Cinnamomum*, *C. Zeylanicum*, *Darse'ni*, *Dars'ni*, *Cinnamon*, *Xylo-cinnamomum*, *Cuirdo Canel'la*. (F.) *Cannelle*, *Baume de Cannelle*, *Cannelle officinale*. Cinnamon bark, which is obtained also from the *Cinnamomum aromaticum*, is stimulant and carminative, and is employed, chiefly, as a grateful aromatic, to cover the taste of nauseous remedies. Dose gr. x. to ʒj. The *Flowers*, called *Cassie Flores* in the shops, possess aromatic and astringent virtues, and may be used wherever cinnamon is required. The volatile oil of the bark—*Oleum Cinnamomi*—*Oil of Cinnamon*, is official in the *Pharm. U. S.*

LAURUS CULILAWAN. The tree that affords the *Cortex Culilawan*, *Cullitlawan*, *Cortex caryophylloides*, *C. Caryophylloides Amboinensis*. This bark resembles the sassafras in appearance and properties, and is used in Java as a condiment.

LAURUS MALABATHRUM, see *Malabathrum*—*l. Nobilis*, *Laurus*.

LAURUS SASSAFRAS, *Sassafras*, *Ague-free*, *Cornus mas odorata*, *Anhuiba*. Indigenous in the United States. Sassafras wood and root, and especially the bark of the root, *Sassafras Radicis Cortex* (Ph. U. S.), have been considered stimulant, sudorific and diuretic. The virtues depend upon essential oil, *Oleum Sassa-*

fras, the odour of which is not unlike that of fennel. It has been used in cutaneous diseases, chronic rheumatism, &c.

The pith of the stems, *Sassafras medulla*, abounds in a gummy matter, which it readily imparts to water, forming a limpid mucilage, which is much employed as a collyrium in ophthalmia, and as a drink in dysentery, catarrh, &c., (one dram of the pith to a pint of boiling water.)

LAUTISSIMA VINA. Wines were formerly so called, which were strongly impregnated with myrrh.

LAVANDE. Lavendula.

LAVANDULA. Lavendula.

LAVEMENT. Clyster, Enema—*l. Antispasmodique.* Enema foetidum.

LAVENDER. COMMON, Lavendula—*l. Sea, Statice limonium.*

LAVENDULA, from *lavo*, 'I wash;' so called from being used in baths. *Lavendula spica*, *L. vera*, Common lavender, *Lavandula*, (Ph. U. S.) (*F*) *Lavande*, *Aspic*, *Spic*. The odour of lavender flowers is fragrant and agreeable; taste warm and bitterish—depending upon an essential oil. It has been used as a stimulant; particularly in the form of the oil,—*Oleum lavendulae*. The dried leaves have been employed as an emmenagogue.

The French use the *Lavendula stœchas* or *French lavender*, of which they have a compound syrup, *Syrupus de stœchadæ compositus*: given as a pectoral.

LAVER GERMANICUM, *Veronica beccabunga*—*l. Odoratum*, *Sisymbrium nasturtium*. *LAVIPEDIUM*, *Pediluvium*.

LAW MEDICINE. Medicine, legal.

LAWSONIA INERMIS, *Alcantha vera*, *A. Orientalis*, *Cyprus antiquorum*, *Ligustrum Egyptiacum*, *Smooth Lawsonia*, (*F*) *Henné*. An East Indian and African plant, the root of which is slightly astringent.

In India, the root of the *Lawsonia spinosa* is employed in lepra and other cutaneous affections.

LAX, Diarrhœa.

LAXANS, Relaxant.

LAXATIVE, *Laxativus*, from *laxare*, 'to loosen.' *Minorativus*, *Solutivus*, *Alviducus*. A medicine which gently opens the bowels; such as tamarinds, manna, &c.

LAXATIVUS INDICUS, Cambogia.

LAXATOR AURIS INTERNUS, *L. tympani*.

LAXATOR MINOR TYMPANI. A very small muscle, which extends from the upper part of the external auditory canal, and is inserted at the inferior part of the process of the handle of the malleus. Its existence is denied by most anatomists.

LAXATOR TYMPANI, *L. major tympani*, *Extensor mallei*, *Anterior mallei*, *Obliquus auris*, *Extensor auris* vel *Laxator internus*, *Eustachii musculus*, *Sphœni-salpingo-mallien*, (*F*) *Antérieur du marteau*. A muscle, which arises from the spine of the sphenoid bone and from the cartilage of the Eustachian tube, and is inserted, by a tendon, into the apophysis of Rau. It relaxes the membrana tympani.

LAXITAS, Atony—*l. Ingestorum*, Lientery.

LAXITY, *Laxitas*, *Lazness*. Condition of a tissue, when loose or relaxed; or of one which wants tone. We say *lazity of fibre*, *lazity of*

skin, to express, that those parts have lost some of the tenseness proper to them.

LAZARETTO, *Lazaret*, *Lazar-house*, from (*L*) *lazzero*, 'a leper' A solitary edifice in most seaports of magnitude, intended for the disinfection of men and goods, proceeding from places where contagious diseases are prevailing.

LAZULITE, *Lapis lazuli*.

LEAD, *Plumbum*—*l. Black*, *Graphites*—*l. Iodide of*, see *Iodine*—*l. Oxyd of*, semi-vitrified, *Plumbi oxydum semivitreum*—*l. Protacetate of*, *Plumbi superacetat*—*l. Red*, *Plumbi oxydum rubrum*—*l. Subcarbonate of*, *Plumbi subcarbonas*—*l. Sugar of*, *Plumbi superacetat*—*l. Superacetate of*, *Plumbi superacetat*—*l. Tannate of*, see *Tannin*—*l. White*, *Plumbi subcarbonas*.

LEAMINGTON, MINERAL WATERS OF Saline waters at Leamington, about two miles east of Warwick, England, which contain chloride of sodium, sulphate of soda, and chlorides of calcium and magnesium.

LEANNESS, Emaciation.

LEAPING AGUE. This disease is said by the Scotch writers to be characterized by increased efficiency, but depraved direction of the will, producing an irresistible propensity to dance, tumble, and move about in a fantastic manner, and often with far more than the natural vigour, activity and precision!

LEBANON, MINERAL WATERS OF. The spring at Lebanon, 26 miles east of Albany, New York, is an almost pure thermal. Temp. 72° Fahr.

LECHENEUM, *Torcular herophilii*.

LE CRAN, *Cochlearia armoracia*.

LECTISTERNIUM, from *lectus*, 'a bed,' and *sternere*, 'to spread.' The arrangement of a bed, so as to adapt it to a particular disease. Also, a supplication, with the Romans, in times of public danger, when beds or couches were spread for the gods, as if they were about to feast, and their images were taken down from their pedestals and placed upon these couches around the altars. The lectisternium was first introduced in the time of a pestilence.—Livy.

LECTUALIS, from *lectus*, 'a bed.' An epithet applied to a long, chronic disease.

LECTULUS, *Funon*.

LEDE SAUVAGE, *Ledum sylvestre*.

LEDUM PALUSTRE, *Rosmarinus sylvestris*, *Anthos sylvestris*. (*F*) *Lède* ou *Rosmarin sauvage*. *Nat. Order*, *Ericinæ*. *Scz. Syst.* Decandria Monogynia. This plant has a bitter, subastringent taste, and was formerly used in Switzerland in place of hops; the virtues are equivocal.

LEE, *Feculence*, *Lixivium*.

LEECH, *Hirudo*.

LEEK, *Allium porrum*.

LEES, *SOAP*, *Liquor potassæ*.

LEG, (*Danish*) *Crus*, *Scelos*, *Cnemè*. The portion of the lower extremity, which extends from the knee to the foot. It consists of three bones;—*Tibia*, *Fibula*, and *Patella*, and, also, of a great number of muscles, vessels, and nerves. The projection, formed by the muscles at the back part of the leg, has received the name of *Calf of the leg*. It is the special attribute of man, and proves that he is destined to be biped.

LEG, *SWELLED*, *Phlegmatia dolens*—*l. Cochinchin*, see *Elephantiasis*.

LEGITIMATE, *Legitimus*, from *lex*, *legis*, 'law.' *Genuinus*, *Gnesios*. An epithet, applied to things which are according to rule. A *legitimate child* is one conceived or born during marriage. *Legitimate diseases* are those which follow a regular march.

LEGNA, from *λεγνον*, 'a fringed edge.' The orifice of the pudendum muliebre, or of the uterus.

LEGUME, *Legumen*.

LEGUMEN, from *lego*, 'I gather.' (F.) *Legume*, *Gousse*. So called because it is usually gathered by the hand, instead of being reaped. All kinds of *pulse*, as peas, beans, &c., are thus termed.

LEGUMIN, *Casein*.

LEICHEN, *Lichen*.

LEIOPODES, from *λειος*, 'smooth,' and *πους*, 'a foot.' Affected with *flat-footedness*, *splay-footedness*. Individuals, the soles of whose feet are flat, instead of having the concavity, which they commonly present.

LEIOPUS, *Liopus*, from *λειος*, 'smooth,' and *πους*, 'a foot.' One that is flat-footed, *splay-footed*.

LEIOSIS, *Comminution*.

LEIPHÆMOI, *Achroi*.

LEIPHÆMOS, from *λειπω*, 'I want,' and *αἷμα*, 'blood.' A word sometimes used adjectively; at others, substantively, either for a vicious state of blood, or rather for a sort of *anæmia*—or for the patient who labours under this condition.

LEIPO, *Lipo*.

LEIPODERMOS, *Lipodermos*, from *λειπω*, 'I want,' and *δερμα*, 'skin.' One who wants a part of his skin. It is especially applied to those who want the prepuce. See *Apella*.

LEIPOMERIA, *Lipomeria*.

LEIPOPSYCHIA, *Syncope*.

LEIPYRIAS, from *λειπω*, 'I want,' and *πυρ*, 'fire' or 'heat.' A species of continued fever, referred to by the Greek physicians, in which there is burning heat of the internal parts and coldness of the extremities. *Avicenna* described, under this name, a kind of *hemitritæa*.

LEMA, *Chassie*.

LEME, *Lippitudo*.

LEMITHOCORTON, *Corallina Corsicana*.

LEMNISCUS, *Tent*.

LEMON PEEL, see *Citrus medica*—*l. Tree*, *Citrus medica*.

LEMONADE, (F.) *Limonade*. Lemon juice, diluted with water and sweetened. See *Citrus medica*.

DRY LEMONADE, (F.) *Limonade sèche*. Citric or tartaric acid reduced to powder and mixed with sugar. *Lemonade Powders* may be made as follows:—Pound $\frac{3}{4}$ of *citric acid*, with a few drops of essence of lemon-peel, and $\frac{3}{4}$ or more of lump sugar. Divide into six papers, each of which will make a glass of lemonade, see *Citric acid*.

NITRIC LEMONADE. Nitric acid considerably diluted with water and sweetened.

SULPHURIC LEMONADE and **TARTARIC LEMONADE** are made with the sulphuric and tartaric acids.

LENITIVE, *Lenitivus*, *Lenis*, *Leniens*, from *lenio*, 'I assuage.' A medicine, which allays irritation or palliates disease; also, a laxative

medicine. A *lenitive electuary* is one that purges gently.

LENOS, *Torcular herophili*.

LENS, *Ervum lens*—*l. Crystalline*, *Crystalline*.

LENTIC'ULA. Dim. of *lens*, a lentil. A freckle. Also, the eruption of lenticular fever. See *Ephelides*.

LENTICULAR GANGLION, *Ophthalmic G.*

LENTICULAR'ES GLAND'ULÆ, *Lentic'ular glands*. Mucous follicles, having the shape of a lentil, which are observed especially towards the base of the tongue.

LENTIGO, *Ephelides*.

LENTIL, *Ervum lens*.

LENTILLE, *Ervum lens*—*l. crystalline*, *Crystalline*—*l. Ers*, *Ervum ervilia*.

LENTIS'CINUM VINUM. Wine, impregnated with mastich; from *Lentiscus*, 'the mastich tree.'

LENTISCUS VULGARIS, *Pistacia lentiscus*.

LENTITIS, *Phacitis*.

LENTOR, from *lentus*, 'clammy.' A viscosity or siziness of any fluid. See *Gluten*.

LEONTIASIS, *Leontion*, from *λεων*, 'a lion.' A name given to lepra of the face, from some fancied resemblance between the countenance of those labouring under it and that of the lion. To this kind of lepra the epithets, *le'onine* and *le'ontine*, have been given.

LEONTION, *Leontiasis*.

LEONTODON TARAX'ACUM, *Urina'ria*, *Caput mor'dachi*, *Dens leo'nis*, *Dandelion*, *Piss-a-bed*. Order *Compositæ*. (F.) *Pissenlit*, *Lion-dent*. The young leaves are sometimes eaten as salad. The roots are, also, roasted and used as a substitute for coffee. The root, *Tarax'acum*, (Ph. U. S.), is, moreover, reputed to be aperient and diuretic; hence its vulgar name. Its efficacy is doubtful.

LEONTOPODIUM, *Alchemilla*.

LEONURUS, from *λεων*, 'a lion,' and *ουρα*, 'tail.' *Lion's tail*.

LEONURUS CARDI'ACA, *Agripal'ma Gallis*, *Marrubium*, *Cardi'aca crisa*, *Herba cardiaca*, *H. Patæ lapinæ*, *Motherwort*, (F.) *Agripaume*. Its properties are those of a nauseous bitter; and hence it has been used in hysteria and other nervous affections.

LEONURUS LANATUS, *Ballota lanata*.

LEOPARD'S BANE, **ROMAN**, *Arnica montana*, *Doronicum pardalianches*.

LEPAS and **LEPIS**, *λεπας*, gen. *λεπαδος*, *λεπιδ*, gen. *λεπιδος*, 'a scale.' Hence:

LEPIDIUM, from *λεπιδ*, 'a scale'; so called from its supposed usefulness in cleansing the skin from scales and impurities. *Pepper-wort*.

LEPIDIUM IBERIS, *Ibe'ris*, *Cardamantica*, *Scit'lica cresses*. This plant possesses a warm, penetrating, pungent taste, like other cresses, and is recommended as an antiscorbutic, antiseptic, and stomachic.

LEPIDIUM SATI'VUM, *Nasturtium horten'se*, *Garden cress*, *Dittander*, (F.) *Cresson alénois*, *Cresson des Jardins*. This plant possesses warm, stimulating properties, and is used like the last.

LEPIDOSARCO'MA, *Tumor squamifor'mis carno'sus*. A fleshy tumour, covered with scales; from *λεπιδ*, 'a scale,' and *σάρκωμα*, 'a fleshy tumour.' *Marcus Aurelius Severinus* describes tumours of this kind in the interior of the month.

LEPIDOSES, *Scaly diseases*.

LEPIDOSIS-ICHTHYIASIS, Ichthyosis—

1. Ichthyiasis cornigera, Horny excrescences—
1. Lepriasis, Lepra—1. Pityriasis, Pityriasis—
1. Psoriasis, Psoriasis.

LEPIRA, Lepra.

LEPIS, Scale.

LEPORINA LABIA, Harelip.

LEPORINUM ROSTRUM, Harelip

LEPORINUS OCULUS, Lagophthalmia.

LEPRA, *Lepira*, from *λεπις*, 'a scale,' *Lepido'sis Lepriasis*, *Vitili'go*, *Lepra Græco'rum*, *Herpes furfuraceus circinatus*, *Leprosy*, (F.) *Lèpre*, *Mal Saint-Main*, *Dartre furfuracée arrondie*. This term has been applied to various affections, very different in character. 1. To the *Leprosy of the Jews*, *Leuce*, *Lepido'sis Lepriasis canescens*. A variety of the *Alphos* or *Lepra alphioides*. The leuce was, generally, not scaly, but consisted of smooth, shining patches, on which the hair turned white and silky, and the skin, with the muscular flesh, lost its sensibility. It was incurable. 2. To the *Elephantiasis* or *Lepra of the Arabs*. See *Elephantiasis*; and 3. To the *Lepra of the Greeks*, which includes all the varieties met with at the present day. It is characterized by scaly patches of different sizes, but having always nearly a circular form. Bateman and Willan describe three chief varieties of this lepra.

1. *Lepra alphioides*, *Lepido'sis Lepriasis al'bida*, *Alphos*, *Morphæa alba*, *Vitiligo albus*, *Albura*, *Alburies*, *Albaros*, *Lèpre écailleuse* of Alibert, *White leprosy*. An affection, characterized by white patches, surrounded by a rose-coloured areola, which appear here and there on the surface; depressed in the middle, and

2. *Lepra nigricans*, *Lepra melas*—*Vitili'go melas*, *V. Nigra*, *Morphæa nigra*, *Lepra maculosa nigra*, *Albura nigra*, *Melas*, *Lepidosi lepriasis nigricans*, *Black leprosy*; in which the scales are livid; the size of half a dollar; and diffused over the body, but less widely than in the *Alphioides*. The French pathologists usually admit three species of lepra, to which they give the epithets *scaly*, (*squameuse*), *crustaceous*, (*crustacée*), and *tubercular*, (*tuberculeuse*), according as the skin may be covered with scales, crusts, or tubercles.

3. *Lepra vulgaris*, *Lepido'sis lepriasis vulgaris*, *Dartre furfuracée arrondie*, of Alibert,—characterized as follows: scales glabrous, whitish; size of a crown piece; preceded by smaller reddish and glossy elevations of the skin, encircled by a dry, red, and slightly elevated border; often confluent; sometimes covering the whole of the body except the face.

Lepra appears to be endemic in Egypt, in Java, and certain parts of Norway and Sweden. Imperfect and faulty nutriment appears to contribute to its development. The means, best adapted for its removal, are:—a mild, un-irritating diet, emollient fomentations—sulphureous baths, fumigations, &c. but, often, all remedial agents will be found ineffectual.

LEPRA ARABUM, Elephantiasis Arabica—1. Fungifera, Frambesia—1. Græcorum, Lepra—1. Ichthyosis, Ichthyosis—1. Lombardica, Pellagra—1. Maculosa nigra, L. nigricans—1. Mediolanensis, Pellagra—1. Mercurial, Eczema mercuriale—1. Taurica, *Mal de Crimée*.

LEPRE, *Lepra*—1. des Cossagues, *Mal de Crimée*—1. Écailleuse, *Lepra alphioides*—1. Humide, Impetigo.

LEPROSERIE, Ladrerie.

LEPROSY, Lepra—1. black, *Lepra nigricans*—1. Norwegian, *Radyge*—1. white, *Lepra alphioides*.

LEPSIS, Attack.

LEPTOPHONIA, Oxyphonia.

LEPTOS, λεπτος, 'thin,' 'light.' Hence:

LEPTOTROPHIA, from λεπτος, 'light,' and τροφή, 'nourishment.' Light nutrition.

LEPTUNTICA, Attenuants.

LEPTYSMOS, Emaciation.

LEREMA. See Dementia.

LEROS, Delirium.

LESION, *Læsio*, from læsus, 'hurt,' 'injured.' Derangement, disorder; any morbid change, either in the exercise of functions or in the texture of organs. Organic lesion is synonymous with organic disease.

LESSIVE, Lixivium—1. de Tartre, Liqueur potassæ subcarbonatis.

LETHALIS, Lethiferous, Mortal.

LETHALITAS, Mortality.

LETHARGY, *Lethargus*, *Carus lethargus*, *Veter'us*, *Lethargia*, *Obliv'io iners*, from ληθι, 'oblivion,' and ἀργια, 'idleness.' A constant state of stupor from which it is almost impossible to arouse the individual; and, if aroused, he speedily relapses into his former condition.

LETHIFEROUS, *Lethif'er*, *Letha'lis*, *Lethif'icus*, *Mortifer*, from ληθι, 'death,' and φερω, 'I bear.' Death-bearing, deadly.

LETHUM, Death.

LETTUCE, Lactuca—1. Strong-scented, *Lactuca virosa*—1. Wild, *Lactuca elongata*.

LETUM, Death.

LEUCÆTHIOPIA. See Albino.

LEUCÆTHIOPS, Albino.

LEUCANIA, Laucania.

LEUCANTHEMUM, *Anthemis nobilis*, *Matricaria chamomilla*—1. Vulgare, *Chrysanthemum leucanthemum*.

LEUCE, Lepra (of the Jews.)

LEUCELECTRUM, Succinum (album.)

LEUCOIUM, *Lunaria rediviva*—1. Luteum, *Cheiranthus cheiri*.

LEUCOMA, from λευκος, 'white.' *Oculu'rum albu'go*, *Albu'go*, *Al'bula*. *Leucoma* and *Albugo* are often used synonymously to denote a white opacity of the cornea. Both are essentially different from the nebula of the cornea; the nebula being usually the result of chronic ophthalmia and an effusion of a milky serum into the texture of the delicate continuation of the conjunctiva over the cornea;—the others are the result of violent, acute ophthalmia. In this state, a thick, coagulable lymph is extravasated from the arteries, sometimes superficially, at other times deeply, into the substance of the cornea. On other occasions, the disease consists of a firm, callous cicatrix on this membrane,—the effect of a wound or ulcer with loss of substance. The affection is more difficult of cure in proportion to its duration and to the age of the individual; the activity of the absorbents being greater in youth. If inflammation still exist, antiphlogistics must be persevered in; and, afterwards, gentle stimulants be used to excite absorption; along with the internal use of mercury or iodine.

LEUCONYMPHÆA, *Nymphæa alba*.

LEUCOPATHIA. See Albino.

LEUCOPHAGIUM, *Blanc-manger*.

LEUCOPHLEGMASIA DOLENS PUERPERARUM, Phlegmatia dolens.

LEUCOPHLEGMATIA, from λευκος, 'white,' and γλεγμα, 'phlegm.' A dropsical habit. Some writers use the word synonymously with *anasarca*, (q. v.); others with *emphysema*.

LEUCOPYRIA, Hectic fever.

LEUCORRHOEA, *Fluxus vel fluor muliebris*, *Proflu'rium mulie'bre*, *Cursus matricis*, *Fluxus matricis*, *Elytrit'is*, *Coleosit'is*, *Colpit'is*, *Distillatio uteri*, *Fluxio alba*, *Fleurs blanches*, *Pertes blanches*, *Ecoulement blanc*, *Catarrhe utérin*, *The whites*, *Perte utérine blanche*, *Catame'nia alba*, *Menses albi*, *Menstrua alba*, *Menorrhagia alba*, *Fluor mulie'bris non Gal'licus*, *Blennorrh'ia*, *Gonorrh'ia benigna*, *notha intel'era*, *Purgatio mulie'bris alba*, *Alba purgament'a*, *Cachexia uteri'na*, *Rheuma uteri*, *Uteri Cory'za*, *Medorrh'ia femina'rum insons*, *Blennorrh'ia seu Blennorrh'gia genita'lium*, *Etdoblennorrh'ia seu Medoblennorrh'ia femina'rum*; from λευκος, 'white,' and ρεω, 'I flow.' A more or less abundant discharge of a white, yellowish, or greenish mucus; resulting from acute or chronic inflammation or from irritation of the membrane lining the genital organs of the female. *Vaginal Leucorrhœa* has been termed *Blennorrhœa seu Fluor albus vaginæ*, *Leucorrh'ia*, *Medorrh'ia vaginæ* and *Vaginit'is*, *Elytrobennorrh'ia*.—*Uterine Leucorrhœa* has received the names *Fluor albus uteri*, *Leucorrh'ia*, *Medorrh'ia uteri*, *Metrobennorrh'ia*. It is often attended with pain and a sense of heaviness in the loins, abdomen and thighs; disordered digestive functions, &c., so that, at times, the health suffers largely, although there are few females, who are not occasionally subject to moderate leucorrhœa. Attention to the general health, change of air, keeping up a perspirable state of the surface by flannel worn next the skin, the horizontal posture, &c., do more than pharmaceutical agents; which are almost entirely confined to astringent injections. These may be employed, when the discharge is so great as to require them.

LEUCORRHOEA ANALIS, see *Hæmorrhoids*.—*Nabothi*, see *Parturition*.

LEUCORRHOIS. See *Hæmorrhoids*.

LEUK or LOCHE, MINERAL WATERS OF. Saline, chalybeate waters, about six leagues distant from Sion. They contain chloride of sodium, with a little sulphate of magnesia; sulphate of lime, carbonate of magnesia, carbonic acid, and protoxide of iron.

LEVAIN, Ferment.

LEVATOR ANGULI ORIS, *Abducens labii'rum*, *Elevator labiorum communis*, *Caninus*, *Sus-maxillo-labial*, *Petit sus-maxillo-labial* (Ch.) (F.) *Muscle canin*. A small, flat, long, quadrilateral muscle, which arises from the fossa canina, and is inserted at the commissure of the lips, where it is confounded with the triangularis. It raises the corner of the mouth, and draws it towards the ear.

LEVATOR ANI, *Levator magnus seu internus*, *Latus ani*, *Elevator ani*, *Sedem attollens*, *Pubio-coccygien annulaire*, *Sous-pubio-coccygien*, (Ch.) (F.) *Releveur de l'anus*. A muscle, situate at the lower part of the pelvis. It is broad, flat, quadrilateral, and broader above than below. It represents a kind of membranous partition, which closes the outlet of the pelvis, and the

upper concavity of which is opposed to that of the diaphragm. It is attached, above, to the posterior surface of the body of the pubis, to the upper part of the obturator foramen, and to the spine of the ischium; and it is inserted into the coccyx, into an aponeurotic line common to it and its fellow, and into the lateral parts of the rectum. This muscle supports the rectum; raises it, and carries it upwards during the evacuation of the excrement. It can, also, compress the bladder and vesiculæ seminales, and thus favour the expulsion of the urine and sperm.

LEVATOR ANI PARVUS, *Transversus perinaei*—*l. Auris*, *Attollens aurem*—*l. Coccygis*, *Coccygeus*—*l. Menti*, *Levator labii inferioris*—*l. Oculi*, *Rectus superior oculi*—*l. Proprius scapulæ*, *l. scapulæ*.

LEVATOR LABII INFERIORIS, *Levator menti*, *Elevator labii inferioris*, *Incisivus inferior*, *Elevator labii inferioris proprius*, *Musculus penicillatus*. A portion of the mento-labial of Chaussier. (F.) *Houpe du menton*, *Releveur de la lèvre inférieure*, *Releveur du menton*. A small muscle situate before the symphysis menti. It is thick, conical; attached by its apex to a fossa at the side of the symphysis in the inferior maxillary bone. Its fibres proceed diverging and vanishing in the manner of a tuft, (F.) *Houpe*, on the skin of the chin. This muscle raises the chin, and pushes upwards the lower lip.

LEVATOR LABII SUPERIORIS ALEQUE NASI, *Incisivus lateralis et pyramidalis*, *Grand sus-maxillo-labial* (Ch.) (F.) *Élévateur commun de l'aile du nez et de la lèvre supérieure*. This muscle is a fleshy, thin, triangular bundle, situate at the sides of the nose. It arises from the ascending process of the superior maxillary bone: thence its fibres descend in a diverging manner, a part being inserted into the ala of the nose, and a part losing themselves in the upper lip. This muscle raises the upper lip and ala nasi, which it draws a little outwards.

LEVATOR LABII SUPERIORIS PROPRIUS, *Musculus incisivus*, *Elevator labii superioris proprius*, *Moyen sus-maxillo-labial*, (Ch.) *Orbitomaxillo-labial*. This thin, flat, quadrilateral muscle is situate at the middle and inner part of the face. It arises from the os maxillæ and the os maxillare superius and is inserted into the upper lip, which it raises, at the same time carrying it a little outwards.

LEVATOR PALATI, *Levator Palati Mollis*, *Petrosalpin'go-staphili'nis vel Salpin'go-staphili'nis internus*, *Salpingo-staphilinus*, *Pterigo-staphilinus externus*, *Spheno-staphilinus*, *Sphenopalatinus*, *Peristaphilinus internus vel superior*, *Péto-staphylin*, (Ch.) This muscle is long, narrow, and almost round above; broader and flatter inferiorly. It arises from the lower surface of the *pars petrosa*; from the cartilage of the Eustachian tube; and is inserted into the substance of the velum palati. Its use is to raise the velum palati.

LEVATOR PALPEBRÆ SUPERIORIS, *Palpebræ superioris primus*, *Aperitor Oculi*, *Aperiens Palpebrarum rectus*, *Orbito-palpebræ*, (Ch.) *Orbito-sus-palpebræ*. (F.) *Élévateur de la paupière supérieure*. A long, small, thin muscle, situate at the upper part of the orbital cavity. By its posterior extremity, it is inserted into the little ala of the sphenoid bone, immediately

in front of the foramen opticum, and, by its anterior extremity, which is expanded, it terminates at the upper margin of the tarsal cartilage of the eyelid. This muscle raises the upper eyelid; draws it backwards, and sinks it in the orbit.

LEVATOR PROS'TATÆ, (F.) *Releveur de la prostate*. Santorini has given this name to the anterior fibres of the levator ani, which embrace the prostate.

LEVATOR SCA'PULÆ, Elevator Scapulae, Elevator seu Musculus Patientiæ, Angularis vulgo Levator proprius, — Trachelo-scapulaire (Ch.) (F.) *Angulaire de l'omoplate, Releveur de l'omoplate*. This muscle is so called, because it is attached to the upper and internal angle of the scapula. It is situate at the posterior and lateral part of the neck, and at the upper part of the back. It is long, flat, and broader above than below. In this latter direction, it is inserted into the superior internal angle of the scapula; and, in the former, into the tops of the transverse processes of the first four cervical vertebrae. It depresses the prominence of the shoulder, by raising the posterior angle of the scapula, on which it impresses a kind of rotary motion. It can, also, draw the head to one side.

LEVATOR URETHRÆ, (F.) *Releveur de l'Urèthre*. Santorini describes under this name a portion of the transversus perinei muscle.

LEVATORES COSTARUM, Supracostales.

LEVEN, Ferment.

LEVER, from leva're, 'to lift up.' Vectis, Porrectum. An inflexible rod, moving round a fixed point, and used for moving bodies, bearing burdens, or raising them. The point, on which the lever moves, is called the *Fulcrum* or *Hypomochlion*. The force, which moves the lever, is called the *power*; and the weight to be moved, the *resistance*. There are three kinds of levers. A lever of the first kind has the fulcrum between the power and resistance. A lever of the second kind has the resistance between the fulcrum and power; whilst a lever of the third kind has the power between the fulcrum and resistance. In the locomotive system of the human body, we have examples of all the three kinds. The bones represent levers; the muscles of locomotion are powers; the weight of parts to be moved constitutes the resistance. The fulcra are, at times, the joints; at others, the ground, &c. The head moves on the neck as a lever of the first kind; the first cervical vertebra forming the fulcrum. We rise on tip-toe by a lever of the second kind, the fulcrum being the ground under the toes; and we have examples of a lever of the third kind in the flexion of the fore-arm on the arm, in the elevation of the arm, &c.

LEVER, Vectis obstetric'ius, Vectis, (F.) *Levier*, is an instrument, curved at the extremity, and having a fenestra. It is used to assist the extraction of the child's head, when instrumental aid is necessary. Levers are, also, used by the dentists for extracting stumps, &c. The *Levier de l'Ecluse, Langue de Carpe*, is employed for extracting the molar teeth.

LEVI'ATHAN PENIS, Priapus Ceti, Bale-nas. The penis of the whale. This singular medicine was, at one time, given in powder in cases of dysentery and leucorrhœa.

LEVIER, Lever—l. de l'Ecluse, see Lever.

LEVIGA'TION, Leviga'tio, from levigare,

(from *levis*, 'light,') 'to polish.') *Porphyrizat'ion*. An operation, by which bodies are reduced to very fine powder. It is performed by putting substances, already pulverized, into water; the coarser parts are not long in being deposited, whilst the finer molecules remain suspended in the water. The liquid is decanted into another vessel, and suffered to remain at rest, until the fine particles are all collected at the bottom of the vessel. The fluid part is then separated by decantation.

LEVISTICUM, Ligusticum levisticum.

LEVRE, Lip.

LEVRES GRANDES, Labia pudendi—l. Pe-tites, Nymphæ—l. de la Vulve, Labia pudendi.

LEVURE, Yest—l. de la Bière, Yest.

LEXIPHARMACUS, Alexipharmic.

LEXIPYRETICUS, Febrifuge.

LEY, Lixivium—l. Soap, Liquor potassæ.

LEZARD, Lizard.

LIBANOS, Juniperus lycia.

LIBANOTIS CORONARIA, Rosmarinus.

LIBIDO. Desire, necessity. Authors speak of *Libido ur'inae, Libido intesti'ni*. Some employ it synonymously with *Prurigo*; others, with *Salicitas*.

LIBOS, from λιβω, 'I distil.' A defluxion from the eyes.—Galen.

LIBRA, Pound.

LICHANOS, Index, see Digitus.

LICHEN, λεχην or λεχην, Exor'mia Lichen, Leichen, Serpi'go, Volat'ica, Pap'ule, P. siccæ, Pus'tula siccæ, Scab'ies sicca, Scab'it'ies, Sun-rash, (F.) *Gale sèche, Dartre furfuracée volante, Pousse*. The cutaneous affection, described under this name by the Greek writers, is not clearly defined. Some have believed it to be the *Impetigo*, but this is doubtful. The name is, now, generally applied to a diffuse eruption of red pimples, accompanied by a troublesome sense of tingling or pricking. Drs. Willan and Bateman define it,—"an extensive eruption of papulæ affecting adults, connected with internal disorder, usually terminating in scurf; recurrent, not contagious." One of their varieties, however, the *Lichen Tropicus*, does not accord well with this definition; for it affects children as well as adults, and is unconnected with internal disorder.

LICHEN A'GRIS, Exor'mia Lichen ferus, Lichen agrius, Pap'ula agria, is distinguished by pimples in clusters or patches, surrounded by a red halo; the cuticle growing gradually harsh, thickened, and chappy, often preceded by general irritation. In addition to antiphlogistics, a cooling ointment may be used, to allay itching.

LICHEN CIRCUMSCRIP'TUS is characterized by clusters or patches of papulæ, having a well defined margin, and an irregularly circular form: continuing for six or eight weeks. These varieties require but little medicinal treatment. The antiphlogistic plan is all that is necessary.

LICHEN LIVIDUS. The papulæ have a dark red or livid hue, without any fever. The papulæ are more permanent in this variety. It requires the mineral acids and bark.

LICHEN PILA'RIS, Exor'mia Lichen pilaris, is merely a modification of the preceding; the papulæ appearing at the roots of the hair.

LICHEN SIMPLEX, Exor'mia Lichen simplex, consists of an eruption of red papulæ, appearing first on the face or arms, and afterwards extend-

ing over the body; preceded for a few days by slight febrile irritation, which usually ceases when the eruption appears,—with an unpleasant sense of tingling during the night. It generally dies away in ten days or a fortnight.

LICHEN TROPICUS, *Exor'mia Lichen tropicus, Ecces'ma, Es'sera*, (?) *Sudam'ina*, (?) *Prickly Heat, Summer Rash*. The pimples are bright red, and of the size of a small pin's head: with heat, itching, and pricking, as if by needles. It is local; produced by excessive heat; and disappears when the weather becomes cooler, or the individual is inured to the climate.

LICHEN URTICA'TUS, *Exor'mia Lichen urticol'sus*, is another variety. The *Nettle Lichen* consists of papulæ, accompanied by wheals like those of nettle rash.

LICHEN ARBORUM, *Lichen pulmonarius*—*l. Blanc de Neige*, *L. Caninus*—*l. Boitier*, *L. pyxidatus*.

LICHEN CANINUS, *Lichen cinereus terres'tris, Muscus caninus, Physcia nivalis, Peltig'era canina*, Ash-coloured Ground Liverwort. (F.) *Lichen contre-rage, Lichen blanc de neige*. This cryptogamous plant was, for a long time, considered capable of preventing and curing *Rabies canina*. It has, also, been used in mania and in spasmodic asthma.

LICHEN CINEREUS TERRESTRIS, *L. caninus*—*l. Carrageen*, *Fucus crispus*—*l. Cocciferus*, *L. pyxidatus*—*l. Contre-rage*, *L. caninus*—*l. Entonnoir*, *L. pyxidatus*.

LICHEN ISLANDICUS, *Muscus Islandicus, M. catharticus, Cladonia Islandica, Physcia Islandica, Cetraria Islandica*, Iceland Lichen or Liverwort or Moss. (F.) *Lichen d'Islande*. This plant is inodorous, with a bitter and mucilaginous taste. It is esteemed to be tonic, demulcent, and nutrient. Dose, ʒj to ʒiv, being first steeped in water holding in solution some carbonate of potass, to extract the bitter, and then boiled in milk. A bitter principle has been extracted from it, termed *Cetrarin*, which has been given in intermittents.

LICHEN PLICAT'US, *Muscus arbo'reus seu Querc'i'ni Herba*. This plant is applied, as an astringent, to bleeding vessels; and to parts which are excoriated after long journeys, by the Laplanders.

LICHEN PULMONARIUS, *Muscus pulmonarius querc'i'nus, Pulmonaria arbo'rea, Loba'ria pulmonaria, Lichen arborum, Oak Lungs, Tree Lungwort, Hazel Crotties*. (F.) *Lichen pulmonire*. This plant is sub-astringent, and rather acid. It was once in high repute for curing diseases of the lungs.

LICHEN PYXIDAT'US, *Muscus Pyxidatus, Scyphoph'orus pyxidatus, Musculus pyxoides terres'tris, Lichen pyxidatus major, Lichen cocciferus, Cup Moss, Herba Ignis*. (F.) *Lichen entonnoir, Lichen Boitier, L. Pyxide*. This plant is sub-astringent, and has been used in decoction in hooping-cough.

LICHEN ROCC'ELLA, *Roccella, Litmus, Laccinus tinctorius, Orchill, Cana'ry Archell, Chinney-weed, Herb Archel*. (F.) *Orseille*. The chief use of this plant is as a blue dye. It has been employed to allay cough in phthisis, &c.

LICHEN SAXATILIS, *Muscus Cra'nii humani, Us'nea*. This moss, when found growing on a human skull, was formerly in high estimation against head affections, &c.

LICHEN STELLATUM, *Marchantia polymorpha*.

LICHENIASIS STROPHULUS, *Strophulus*.

LIEBERKUEHN'S GLANDS, or **FOLLICLES**, so called from their first describer, are fine, capillary, blind sacs, the openings of which are from 1-20th to 1-30th of a line in diameter, so closely placed over the whole of the small intestine, as to give the mucous membrane a general sieve-like or perforated appearance. They are supposed to secrete the *succus entericus*, (q. v.)

LIEBERSCHAE AUSZEHRUNG'S KRAUTER. See *Galeopsis grandiflora*.

LIEBERSCHAE BRUSTKRAUTER. See *Galeopsis grandiflora*.

LIÈGE, Suber.

LIEÏN, (F.) *Vin'culum*. A band, strap, or garter, used in certain operations; as to tie patients during the operation of lithotomy; to fix the apparatus in fracture, &c.; also, the Spleen, (q. v.)

LIEN'TERY, *Lienter'ia*, from λειος, 'smooth,' and εντερον, 'intestine.' *Lævitas intestini'rum, Diarrhœ'a Lienter'ia, Fluxus Lienter'icus, Chymorrhœ'a, Diarrhœ'a seu Lævitas ingesto'rum, D. dyspep'tica, D. cum apepsiâ, Slip'periness of the Guts*. Frequent liquid evacuations, the food only half digested. This condition is always symptomatic of great irritation in the intestinal canal; the sensibility of which is so much augmented, that it cannot bear the sojourn of the food in it.

LIERRE, *Hedera helix*—*l. Terrestris*, *Glecoma hederacea*.

LIFE, Sax. lif, lîf, *Vita, Bios, Biotē, Zoē*. (F.) *Vie*. The state of organized beings, during which, owing to the union of an immaterial imperdurable principle with matter, they are capable of performing functions different from those that regulate other natural bodies; all of which functions, however numerous and diversified, work to one end. Life has only a limited duration; beyond which,—the organic functions ceasing to be executed,—the body is given up to the agency of chymical affinity. Hence Bichat has defined life to be—the aggregate of the functions which resist death. On account of the difference that exists amongst the vital functions, he has applied the term *Organic Life* to the functions inservient to composition and decomposition;—as digestion, respiration, circulation, calorification, absorption, secretion, and nutrition; and *Animal Life*, to those functions which connect man and animals with external bodies; as the understanding, sensations, locomotion, and voice.

LIFE'S BLOOD, Cillo.

LIGAMENT, *Ligamentum*, from ligare, 'to bind;' *Desmos, Syndes'mos, Colliga'men, Cop'ula*. A name, given to fibrous structures, which serve to unite bones, and to form articulations; hence the division of *interosseous and articular ligaments*. They are of a white, close texture; are but little extensible, and difficult to break. The name *ligament* has, also, been given to any membranous fold, which retains an organ in its situation.

TABLE OF THE PRINCIPAL LIGAMENTS.

1. <i>Of the Lower Jaw.</i>	<p>Capsular ligament. Suspensory ligament of the stylo-glossus. Lateral ligament. Two capsular ligaments between atlas and head. Circular ligament. Two capsular between atlas and axis. Perpendicular ligament. Two lateral or moderator ligaments. Transverse ligament and its appendices. Anterior common. Crucial intervertebral. Ligaments running from the edge of the bony arch and spinous process of one vertebra to that of the next. Interspinous ligament. Ligamentum nuchæ. Intertransverse. Capsular. Posterior or internal common. Capsular of the heads of ribs. Capsular of the tubercles. Ligamenta transversaria interna. Ligamenta transversaria externa. Ligamenta cervicis costarum externa.</p>		
2. <i>Connecting the Head with the first and second Vertebra, and these with each other.</i>			
3. <i>Of the other Vertebra.</i>			
4. <i>Of the Ribs, Sternum, &c.</i>	<p>Ligamentous fibres running from the margins of the extremities of the ribs to the corresponding cartilages. Radiated ligaments from cartilage of ribs to the sternum. Capsular ligaments of the cartilages of the ribs. Proper membrane of sternum. L. of cartilago ensiformis. Tendinous expansions over the intercostales, &c. Two transverse,—one superior, one inferior. Ilio-sacral. Capsular of the sacro-iliac synchondrosis. Two sacro-ischiatic,—posterior and anterior, with the superior and inferior appendices. Longitudinal of os coccygis. Inguinal ligament. Capsular of symphysis pubis. Ligament of foramen thyroideum. Radiated ligament. Capsular. Interclavicular. Ligamentum rhomboideum. Claviculo-acromial. Conoid. Trapezoid. Anterior triangular. Proper posterior.</p>		
5. <i>Of the Pelvis.</i>			
6. <i>Of the Clavicle.</i>			
7. <i>Of the Scapula.</i>			
8. <i>Of the Shoulder-Joint.</i>	<p>Capsular.</p>		
		9. <i>Of the Elbow-Joint.</i>	<p>Capsular. Brachio-ular. Brachio-radial. Coronary of the radius. Anterior and posterior accessory. Intermuscular of the os humeri.</p>
		10. <i>Carpal Extremity of Radius and Ulna, and between those bones.</i>	<p>Interosseous ligament. Oblique or chorda transversalis cubiti. Capsular.</p>
		11. <i>Between Fore-arm and Wrist.</i>	<p>Capsular. Two lateral. Mucous. Annular. Capsular.</p>
		12. <i>Of Carpus.</i>	<p>Short ligaments,—oblique, transverse, capsular, and proper.</p>
		13. <i>Between Carpal and Metacarpal Bones.</i>	<p>Articular lateral. Straight, perpendicular, &c.</p>
		14. <i>Between the extremities of the Metacarpal Bones.</i>	<p>Interosseous, at the bases and heads,—dorsal, lateral, palmar.</p>
		15. <i>At the base of the Metacarpal Bone of the Thumb, and at the first joint of the Fingers.</i>	<p>Capsular. Lateral.</p>
		16. <i>Of the first and second joints of the Thumb, and second and third joints of the Fingers.</i>	<p>Capsular. Lateral.</p>
		17. <i>Retaining the Tendons of the Muscles of the Hand and Fingers in situ.</i>	<p>Annular. Vaginal or flexor tendons. Vaginal or crucial of the phalanges. Accessory of the flexor tendons. Posterior annular. Vaginal of extensors. Transverse of extensors.</p>
		18. <i>Connecting the Os Femoris with the Os innominatum.</i>	<p>Capsular and accessory slips. Round or teres ligament. Cartilaginous ligament. Double cartilaginous ligament. Ligamenta mucosa. Lateral,—internal and external. External short lateral ligament. Posterior ligament. Ligament of the patella.</p>
		19. <i>Of the Knee-Joint.</i>	<p>Capsular. Ligamentum alare,—majus et minus. Ligamentum mucosum. Two crucial,—anterior and posterior. Transverse.</p>

20. *Connecting Fibula and Tibia.* { Capsular.
Interosseous.
Anterior superior.
Posterior superior.
21. *Connecting the Tarsal with the Leg Bones.* { Anterior ligament of the fibula.
Posterior of fibula.
Deltoides of tibia.
Capsular.
Capsular.
Short ligaments.
Capsular, broad superior, and lateral ligaments, connecting astragalus and naviculare.
Superior, lateral, and inferior, fixing os calcis to os cuboides.
Long, oblique, and rhomboid, forming the inferior ligaments.
22. *Ligaments of the Tarsus.* { Superior superficial, interosseous and inferior transverse ligaments, fixing the os naviculare and os cuboides.
Superior lateral, and plantar, which fix the os naviculare and cuneiforme.
Superior superficial and plantar, connecting the os cuboides and os cuneiforme externum.
Dorsal and plantar, uniting the ossa cuneiformia.
The proper capsular of each bone.
23. *Ligaments between Tarsus and Metatarsus.* { Capsular.
Dorsal, plantar, lateral, straight, oblique, and transverse.
24. *Connecting the Metatarsal Bones.* { Dorsal, plantar, and lateral, connecting the metatarsal bones.
Transverse ligaments.
25. *Of the Phalanges of the Toes.* { Capsular.
Lateral.
Annular.
Vaginal of the tendons of the peronei.
Lacinated.
26. *Retaining the Tendons of the Muscles of the Foot and Toes in situ.* { Vaginal of the tendon of the flexor longus pollicis.
Vaginal and crucial of the tendons of the flexors of the toes.
Accessory of the flexor tendons of the toes.
Transverse of the extensor tendons.

CORONARY LIGAMENT OF THE LIVER is a reflection formed by the peritoneum, between the posterior margin of the liver, and the lower surface of the diaphragm. See Falx.

SUSPENSORY LIGAMENT OF THE LIVER, *Ligamentum latum, Suspensorium Hepatis*, is a large, triangular reflection, formed by the peritoneum between the superior surface of the liver and the diaphragm. It is constituted of two layers, and is continuous, below, with another reflection, called the *Falx of the Umbilical Vein*. See Falx.

LIGAMENT ARTÉRIEL, Arterial ligament

—1. Cervical supraspinal, see Supraspinosa ligamenta—*l. Ciliaire*, Ciliary ligament—*l. Costo-Xiphoid*, Xiphoid ligament—*l. Dorso-lumbo-supraspinal*, see Supraspinosa ligamenta—*l. of Fallopius*, Crural arch—*l. Infra-pubian*, Triangular ligament—*l. Interépineux*, Interspinal ligament—*l. Palmar inferior*, Metacarpal ligament—*l. Poupart's*, Crural arch—*l. Rond*, Ligamentum teres—*l. Sur-épineux cervical*, see Supraspinosa ligamenta—*l. Sur-épineux-dorso-lombaire*, see Supraspinosa ligamenta.

LIGAMENTA INTERVERTEBRALIA, Intervertebral cartilages.

LIGAMENTA ROTUNDA UTERI, Round ligaments of the uterus.

LIGAMENTS CROISÉS, Crucial ligaments—*l. Cruciformes*, Crucial ligaments—*l. Jaunes*, Yellow ligaments—*l. of the Larynx*, inferior, Thyreo-arytenoid ligaments—*l. Ronds de l'utérus*, Round ligaments of the uterus.

LIGAMENTUM NUCHÆ, Cervical ligament—*l. Suspensorium testis*, Gubernaculum testis.

LIGATIO, Fascia, Ligature.

LIGATURA, Fascia.

LIGATURE, *Ligatūra, Ligatio, Alligatūra, Deligatio, Vincitūra, Fascia, Epidæsis*, from *ligo*, 'I bind.' This word has various acceptations. It means, 1. The thread with which an artery or vein is tied, to prevent or arrest hemorrhage. 2. The cord or thread or wire, used for removing tumours, &c. 3. The bandage used for phlebotomy. *Ligature* is, also, sometimes applied to the act of tying an artery or considerable vessel. When the artery alone is tied, the ligature is said to be *immediate*; when any of the surrounding parts are included, it is said to be *mediate*. The ligature occasions obliteration or adhesion of the arterial parietes, by cutting through its middle and internal coats; the adhesion being favoured by the formation of a coagulum, which acts, in some degree, as a barrier against the impulse of the blood, and subsequently disappears by absorption.

LIGHT, Sax. *leoht*, *liht*, (G.) *Licht*—*Luz*, *Lumen*, *Phos*. (F.) *Lumière*. An extremely rare fluid, diffused over the universe; emanating from the sun and fixed stars; traversing more than four millions of leagues in a minute; passing through transparent bodies, which refract it according to their density and combustibility; and arrested by opaque bodies, by which it is reflected at an angle equal to the angle of incidence. It is the cause of colour in all bodies; being entirely reflected by white surfaces and absorbed by black. It is decomposed in passing through a transparent prism into seven rays, viz. into red, orange, yellow, green, blue, purple, and violet.

Light acts upon the body as a gentle and salutary stimulus. It urges to exercise, whilst privation of it induces sleep and inactivity, and disposes to obesity. Hence it is, that, in rural economy, animals, which are undergoing the process of fattening, are kept in obscurity. When vegetables are deprived of light, their nutrition is interfered with, and they become *etiolated*. To a certain extent this applies to animals, and there is every reason to believe, that want of light prevents the due developement of organized bodies. It has been found, that when tadpoles were deprived of light, they did not undergo the perfect metamorphosis into the

frog, but that monstrosities from arrest of development were induced.

LIGHTNING, *Astrape*.

LIGHTS, RISING OF THE, *Cynanche trachealis*.

LIGNE, Line—*l. Âpre*, *Linea aspera*—*l. Blanche*, *Linea alba*—*l. Courbe*, *Curved line*—*l. Médiane de l'abdomen*, *Linea alba*—*l. Sous trochantérienne*, *Linea aspera*.

LIGNIN, from *Lignum*, 'wood.' Ligneous or woody fibres, the fibrous structure of vegetable substances.

LIGNUM ALOES, *Agallochum*—*l. Aspalathi*, *Agallochum*—*l. Benedictum*, *Guaiaicum*—*l. Brasilianum rubrum*, *Hæmatoxyton campechianum*—*l. Cæruleum*, *Hæmatoxyton campechianum*—*l. Campechense*, *Hæmatoxyton campechianum*—*l. Campechianum*, *Hæmatoxyton campechianum*—*l. Campescanum*, *Hæmatoxyton campechianum*—*l. Colubrinum*, see *Strychnos*—*l. Hematoxyli*, *Hæmatoxyton campechianum*—*l. Indicum*, *Guaiaicum*, *Hæmatoxyton campechianum*—*l. Infelix*, *Sanbucus*—*l. Nephriticum*, *Guilandina Moringa* (the wood)—*l. Pavana*, *Croton tiglium*—*l. Quassia*, see *Quassia*—*l. Sanctum*, *Guaiaicum*—*l. Sappan*, *Hæmatoxyton campechianum*—*l. Serpentinum*, *Ophiocylum serpentinum*—*l. Vitæ*, *Guaiaicum*.

LIGNYODES, Fuliginous.

LIGULA or LINGULA. The claviæ, (q. v.) also, the glottis, (q. v.) and epiglottis, (q. v.) Also, a measure containing 3 drachms and a scruple. Scribon. Also, a species of bandage or ligature.—Scribon.

LIGUSTICUM FENICULUM, *Anethum*.

LIGUSTICUM LEVISTICUM, from *Λιγυστικόν*, appertaining to Liguria. *Levisticum*, *Laserpitium Germanicum*, *Ligusticum*, *Loruge*. (F.) *Livèche*, *Ache des montagnes*. The properties of this plant are said to be stimulant, carminative, emmenagogue, &c.

LIGUSTICUM PODAGRARIA, *Ægopodium podagraria*, *Seseli ægopodium*, *Angélica sylvestris*, *Gout weed*. A British plant, once considered useful in cases of gout.

LIGUSTRUM ÆGYPTIACUM, *Lawsonia inermis*.

LIGYSMA, Distortion.

LILI, *Lilium Paracelsi*.

LILIA'GO. Dim. of *Lilium*, the lily;—*Spiderwort*;—*Lilias'trum*. This plant was formerly said to be alexiphermic and carminative.

LILIASTRUM, *Liliago*.

LILIUM CANDIDUM, *Crinum*, *L. album*. The white lily. (F.) *Lis blanc*. The infusion of the flowers of the lily in olive oil is emollient, and often applied externally, under the name of *Lily oil*, (F.) *Huile de lis*. The scales of the bulb, roasted, are sometimes employed as maturatives.

LILIUM CONVALLIUM, *Convallaria maialis*.

LILIUM PARACEL'SI, or TINCTURA METALLORUM, *Lilk*. A medicine employed by Paracelsus. It was prepared by melting in a crucible four ounces of each of the following alloys: *Antimony and iron*, *antimony and tin*, *antimony and copper*, previously mixed with eighteen ounces of nitrate of potass, and as much salt of tartar. The melted mass, when pulverized, was treated with rectified alcohol, which really dissolved only the potass, set at liberty by the decomposition experienced by the nitre and salt of tartar. The *Lilium Paracelsi* was used as a

cordial. It entered into the composition of the theriacal elixir, &c.

LILY, MAY, *Convallaria maialis*—*l. of the Valley*, *Convallaria maialis*—*l. Water*, white, *Nymphaea alba*—*l. Water*, yellow, *Nymphaea lutea*—*l. White*, *Lilium candidum*.

LIMA, (CLIMATE OF.) The climate of Peru does not appear to be favourable to the generation of consumption; and Lima would seem to be a good residence for the phthisical valetudinarian. Many have been benefited by a residence there; but when they have gone farther south, as to Chili, the effect, according to Dr. M. Burroughs, has generally been fatal.

LIMACIEN, (F.) from *limaçon*, the cochlea of the ear. A branch of the acoustic or labyrinthine nerve sent to the cochlea.

LIMACON, Cochlea, *Limax*—*l. Rapes du*, see *Cochlea*.

LIMANCHIA, Abstinence.

LIMAX, *Helix*, the *Slug* or *Snail*. (F.) *Limaçon*, *Colimaçon*, *Escargot*. A syrup has been prepared from these animals, which has been given in phthisis, &c. The raw snails have also been taken in consumption. They were used as food.

LIMB, *Membrum*.

LIMBUS LUTEUS RETINÆ, see *Foramen centrale*—*l. Posterior corporis striati*, *Tænia semicircularis*.

LIME. A fruit like a small lemon, the juice of which is strongly acid, and much used for making punch. It is, also, used in long voyages as an antiscorbutic, &c. It is a species of lemon.

LIME, Calx—*l. Carbonate of*, *Creta*—*l. Chloride of*, *Calcis chloridum*—*l. Muriate of*, *Calcis chloridum*—*l. Muriate of*, solution of, see *Calcis murias*—*l. Sulphuret of*, *Calcis sulphuretum*—*l. Tree*, *Tilia*—*l. Water*, *Liquor calcis*—*l. Water*, compound, *Liquor calcis compositus*.

LIMITROPHES. See *Trisplanchnic nerve*.

LIMNE, Marsh.

LIMNE'MIC, *Limnæ'mic*, *Limnhæ'mic*, *Limnæ'micus*, *Limnhæ'micus*, from *λίμνη*, 'a marsh,' and 'αἷμα,' 'blood.' An epithet given to affections induced by paludal emanations. (F.) *Affections limnhémiques*.

LIMOCTONIA, Abstinence.

LIMON. See *Citrus medica*.

LIMONADE. Lemonade—*l. Sèche*, *Leimonade*, dry; see *Citric acid*.

LIMONIUM, *Statice limonium*—*l. Malum*, see *Citrus medica*.

LIMONUM BACCA. See *Citrus medica*.

LIMOS, *λιμος*, 'hunger.' (q. v.) Hence:

LIMO'SIS, from *λιμος*, 'hunger.' *Stomach disease*, *Morbid appetite*. A genus in the class *Coliaca*, order *Enterica*, of *Good*.

LIMOSIS CARDIALGIA MORDENS, *Cardialgia*—*l. Cardialgia spntatoria*, *Pyrosis*—*l. Dyspepsia*, *Dyspepsia*—*l. Expers*, *Anorexia*—*l. Expers protracta*, *Fasting*—*l. Flatus*, *Flatulence*—*l. Heliconum*, *Gluttony*—*l. Pica*, *Malacia*.

LIN, *Linum usitatissimum*—*l. Graines de*; see *Linum usitatissimum*—*l. Purgatif*, *Linum catharticum*.

LINAIRE, *Antirrhinum linaria*.

LINAMENTUM, *Carbasus*.

LINARIA, *Antirrhinum linaria*.

LINCTUARIUM, *Eclectos*.

LINCTUS, *Eclectos*—*l. Albus*, *Looch album*—*l. Amygdalinus*, *Looch album*—*l. ad Aphthas*

Mel boracis—l. de Borace, Mel boracis—l. Communis, Looch album.

LINDEN TREE, Tilia.

LINE, *Lin'ea*, *Grammē*, (F.) *Ligne*. Extent in length, considered without regard to breadth or thickness.

MEDIAN LINE OF THE BODY is an imaginary line supposed to set out from the top of the head and to fall between the feet, so as to divide the body vertically into two equal and symmetrical parts.

LINEA, Line.

LINEA ALBA, (F.) *Ligne blanche*, *Ligne médiane de l'abdomen*. (Ch.) *Candidula abdominis lin'ea*, *Lin'ea centralis*. Atendinous, strong, and highly resisting cord; extending from the ensiform cartilage of the sternum to the symphysis pubis, with the umbilicus near its middle. The linea alba is formed by the decussation of the aponeuroses of the abdominal muscles: and its use is to limit the movement of the chest backwards; to prevent it from separating too far from the pelvis, and to furnish a fixed point for the muscles of the abdomen, in their contraction.

LINEA AS'PERA, (F.) *Ligne âpre*, *Ragged ridge*, *Ligne sous-trochanterienne*, (Ch.) A rough projection at the posterior surface of the femur, which gives attachment to muscles.

LINEA CANDIDULA ABDOMINIS, L. alba—l. Centralis, L. alba—l. Innominata, L. ilio-pectinea.

LINEÆ SEMILUNA'RES are the lines, which bound the outer margin of the recti muscles of the abdomen. They are formed by the union of the abdominal tendons. The lines which cross these muscles are called *Lineæ transversæ*.

LINEÆ TRANSVERSÆ. See L. semilunares.

LINEAIRE, Linear.

LIN'EAMENT, *Lineamen'tum*, from *linea*, 'a line.' A delicate *trait* observed on the countenance, which constitutes its special character, enables us to preserve its image, and is the cause of resemblance to others. A *feature*.

Bonnet gave the name *Lincament* to the first traces of organization in the embryo of man and animals.

LINEAR, *Linea'ris*. Same etymon. (F.) *Linéaire*. Pathologists apply the epithet *linear*, to fractures which are very narrow, and in which the fragments are scarcely separated.

LINGUA, Tongue—l. Bovis, *Anchusa officinalis*—l. Canina, *Cynoglossum*—l. Cervina, *Asplenium scolopendrium*—l. Prognosis ex, *Glossomantia*—l. *Serpentaria*, *Ophioglossum vulgatum*.

LINGUÆ DETENTOR, *Glossocatochus*—l. *Exoncosis*, *Glossocus*—l. *Scalpium*, *Cure lingue*.

LINGUAL, *Lingua'lis*, from *lingua*, 'the tongue.' Relating or belonging to the tongue.

LINGUAL ARTERY, *Arteria lingua'lis* arises from the external carotid; and, after several tortuosities, reaches the base of the tongue, becomes horizontal, and, under the name *Ranine*, advances to the tip, where it anastomoses with its fellow. In its course, it gives off the *Dorsalis lingue* and *sublingual*.

LINGUAL MUSCLE, *Lingua'lis*, *Basio glossus* (Cowper.) *Glossia'nus*, is a small, long, fasciculus of fibres, hidden beneath the sides of the tongue, between the hyoglossus and styloglossus muscles, which are on the outside, and the

genioglossus, within. This muscle passes from the base to the tip of the tongue; and, at its sides, is confounded with the muscles just referred to. It shortens the tongue, depresses its point, and can carry it to the right or left side.

LINGUAL NERVE is a name, which has been given to the ninth pair or Hypoglossus, which see. *Lingual nerve* is, also, a term applied to a branch given off from the *Inferior maxillary*; or third branch of the fifth pair. Near its origin it anastomoses with, or simply runs close to, the corda tympani. It afterwards gives off a considerable number of filaments, which are distributed to the tongue, and some of which are said to have even been traced as far as the papillæ;—a distribution which has occasioned it to be regarded as the *Gustatory nerve*.

LINGUAL VEIN follows nearly the same distribution as the artery. It opens into the internal jugular.

LINGUALIS, Lingual muscle.

LINGULA, Ligula.

LINI USITATISSIMI SEMINA. See *Linum usitatissimum*.

LINIMENT, *Linimen'tum*, *Litus*, *Enchris'ton*, *Catachris'ton*, *Perich'risis*, *Perichris'ton*, *Aleiph'u*, *Aleim'ma*, *Enchris'ta*, *Fric'tum*, *Fricato'rium*, *Inunctio*, from *linire*, 'to anoint gently,' 'to anoint.' An unctuous medicine, containing usually oil or lard, and which is used externally, in the form of friction.

LINIMENT AMMONIACAL, *Linimentum ammoniæ fortius*—l. *de Carbonate d'ammoniaque*, *Linimentum ammoniæ carbonatis*.

LINIMENT ANTIHÉMORRHOIDALE DE SEUR ANDRY (F.) This is formed of *Narbonne honey*, *Olive oil* and *Turpentine*.

LINIMENT ANTIPARALYTIQUE (F.) Composed of *subcarbonate of ammonia*, *alcoholized oil*; *black soap*, and *oil of rosemary*.

LINIMENT, ANTISCROFULOUS, OF HUFELAND, It is composed of *fresh ox's gull*, *White soap*, *Unguentum althææ*, *Volatile oil of petroleum*, *Carbonate of ammonia*, and *Camphor*.

LINIMENT CALCAIRE, *Linimentum aquæ calcis*—l. *Camphor*, *Linimentum camphoræ*—l. *Cantharides*, *camphorated*, *Linimentum e cantharidibus camphoratum*—l. *Cantharide camphré*, *Linimentum e cantharidibus camphoratum*—l. *d'Eau de chaux*, *Linimentum aquæ calcis*—l. of *Lime water*, *Linimentum aquæ calcis*—l. *de Mercure*, *Linimentum hydrargyri*—l. *Mercurial*, *Linimentum hydrargyri*.

LINIMENT RÉSOLUTIF DE POTT, composed of *oil of turpentine* and *muratic acid*. Used in rheumatism, swellings, &c.

LINIMENT, SAINT JOHN LONG'S. A liniment used by a celebrated empiric at the commencement of the second quarter of the 19th century. It is said to have consisted of *oil of Turpentine*, and *acetic acid*, held in suspension by yolk of egg.

LINIMENT DE SAVON, *Linimentum saponis compositum*—l. *de Saxon opiacé*, *Linimentum saponis et opii*.

LINIMENT SAVONNEUX HYDROSULFURÉ DE JADELOT. Composed of *sulphuret of potass*, $\mathfrak{z}\text{vj}$, *white soap* lbij , *oil of poppy* lbiv , *oil of thyme* $\mathfrak{z}\text{ij}$: used in itch.

LINIMENT, SIMPLE, *Linimentum simplex*—l. *Soap*, *Linimentum Saponis*—l. *Soap and opium*,

Linimentum saponis et opii—*l. Soap, compound, Linimentum saponis compos.*—*l. Turpentine, Linimentum terebinthinæ*—*l. of Verdigris, Linimentum æruginis*—*l. de Vert-de-gris, Linimentum æruginis*—*l. Volatil, Linimentum ammoniæ fortius.*

LINIMENTUM ÆRUGINIS, *Oxymel Æruginis, Unguentum Ægyptiacum, Mellitum de aceta'te cupri, Liniment of verdigris, (F.) Liment de Vert-de-gris, Miel d'acétate de cuivre. (Ærugin. cont. ʒj. acet. ʒvij, mellis despum. pond. ʒxiv. Liquefied, strained, and inspissated by boiling. Ph. L.)* It is used as an escharotic and detergent;—diluted, as a gargle in venereal ulcerations and in foul ulcers.

LINIMENTUM ALBUM, Ceratum cetacei, Unguentum cetacei—*l. ad Ambustiones, L. aquæ calcis.*

LINIMENTUM AMMONIÆ, *Sapo ammoniacalis, Linimentum ammoniatum seu ammoniacum seu Anglicanum, Sapo ammoniæ oleaceus, Unguentum album resolutens, Oleum ammoniatum, Linimentum ammoniæ, Strong liniment of ammonia, (F.) Liniment volatil ou ammoniacal, Savon ammoniacal. (Liq. ammon. f. ʒj. olei olivæ, f. ʒij. Mix. Ph. U. S.)* A stimulating and rubefacient soap.

LINIMENTUM AMMONIÆ CARBONATIS, *Liniment of subcarbonate of ammonia, Linimentum ammoniæ, Linimentum volatilæ; Hartshorn and oil. (F.) Liment de carbonate d'ammoniaque. (Solut. subcarb. ammon. f. ʒj. olei olivæ, f. ʒij. Shake till they unite.)* A stimulating liniment, mostly used to relieve rheumatic pains, bruises, &c.

LINIMENTUM AMMONIATUM SEU AMMONIACUM, *L. ammoniæ fortis*—*l. Anglicanum, L. Ammoniæ fortis*—*l. ad Apthas, Mel boracis.*

LINIMENTUM AQUÆ CALCIS, *Linimentum Calcis, (Ph. U. S.) Oleum lini cum calce, Sapo calcarius, Linimentum ad ambustiones, Liniment of lime water, (F.) Liment d'eau de chaux, Savon calcaire, Liment calcaire. (Olei lini aquæ calcis, partes æquales. Mix.)* A cooling and emollient application to burns and scalds.

LINIMENTUM ARCEI, Unguentum elemi compositum—*l. de Borate, Mel boracis*—*l. Calcis, L. aquæ calcis.*

LINIMENTUM CAMPHORÆ, Oleum camphoratatum, Solutio camphoræ oleosa, Camphor liniment, (F.) Liment Camphré. (Camphoræ ʒiv, olivæ olei f. ʒij. Dissolve.) It is used as a stimulant and discutient.

LINIMENTUM CAMPHORÆ COMPOSITUM, Ward's essence for the headache, Compound camphor liniment (Camphor ʒij, liq. ammoniæ f. ʒij, spirit. lavender. f. Oj. Ph. L.) It is stimulant and anodyne.

LINIMENTUM CANTHARIDIS, Liniment of Spanish Flies, (Cantharid. in pulv. ʒj: Ol. Terebinth. Oss. Digest for three hours by means of a water bath, and strain. Ph. U. S.) Used as an excitant liniment in typhus, &c.

LINIMENTUM CANTHARIDIS CAMPHORATUM, Camphorated liniment of cantharides, (F.) L. cantharidæ camphré. (Tinet. cantharid. ʒss, ol. amygd. dulc. ʒiv, sapon. amygd. ʒj, camphor ʒss. Dissolve the camphor in the oil, and add this mixture to the tincture and soap. Ph. P.) Rubefacient and discutient.

LINIMENTUM HYDRARGYRI, Mercurial liniment, (F.) L. de mercure, (Ung. Hyd. fort., adip. præp. aa ʒiv, camphoræ ʒj, sp. rect. gr. xv, liquor am-

mon. f. ʒiv. Rub the camphor with the spirit; add the ointment and lard; and, lastly, gradually add the solution. *Ph. L.*) It is used as a stimulant and discutient to venereal swellings, &c.

LINIMENTUM PLUMBUM, Unguentum plumbi superacetatis—*l. Saponaceum opiatum, L. saponis et opii.*

LINIMENTUM SAPONACEUM HYDROSULPHURATUM, (Common Soap, 500 p. Liquefy in a water bath in an earthen vessel; and add *white poppy oil. 250 p.* Mix intimately, and add dry *sulphuret of potass. 100 p.* Beat together, and add *oil of poppy-seed 750 p.* *Ph. P.*) In cutaneous affections, psora, herpes, &c.

LINIMENTUM SAPONIS, Tinctura saponis camphorata (Ph. U. S.) Camphorated Tincture of Soap, Soap Liniment. (Saponis concis. ʒiv: camphor. ʒij, Ol. Rosmarin. f. ʒss. alcohol Oij. Digest the soap and alcohol in a water bath, until the former is dissolved; filter, and add the camphor and oil—*Ph. U. S.*) Used in sprains, bruises and as an embrocation.

LINIMENTUM SAPONIS CAMPHORATUM, L. S. composatum, Tinctura saponis camphorata, Opodeldoch, Steer's opodeldoch, (F.) L. de Savon. Compound soap Liniment. (Sapon. vulgar. ʒij, Camphor. ʒj, Ol. Rosmarin. f. ʒss. alcohol Oij. aa f. ʒj. Alcohol, Oj. Digest the soap with the alcohol in a sand bath, until it is dissolved; then add the camphor and oils, and when they are dissolved, pour the liquor into broad-mouthed bottles.—*Ph. U. S.*) Stimulant and anodyne; in bruises, local pains, &c.

Freeman's Bathing Spirits consists of *lin. sapon. comp.* coloured with *Daffy's elixir.*

Jackson's Bathing Spirits differ from *Freeman's* in the addition of some essential oils.

LINIMENTUM SAPONIS ET OPII, L. saponaceum opiatum—*Soap and opium liniment, Bates's anodyne balsam. Balsamum anodynum, Tinctura saponis et opii, (F.) L. de savon opiacé. (Saponis duri ʒiv, opii ʒj, camphoræ ʒij, olei rosmarin. f. ʒss. alcohol Oij. Ph. E.)* Anodyne; in chronic rheumatism and local pains in general.

LINIMENTUM SIMPLEX, Simple liniment. (Ol. oliv. 4 p. ceræ albæ 1 p. fiat linimentum. Ph. E.) Emollient, used in chaps, &c.

LINIMENTUM SIMPLEX, Unguentum ceræ.

LINIMENTUM TEREBINTHINÆ, Turpentine liniment. (Cerat. resinæ, lbj, ol. terebinth. Oss. Melt the cerate and stir in the oil. A stimulant; applied to burns, &c.

LINIMENTUM VOLATILE, L. ammoniæ carbonatis.

LINNÆA BOREALIS. This plant, called after Linnæus, has a bitter, subastringent taste; and is used, in some places, in the form of fomentation, in rheumatic pains. An infusion in milk is used in Switzerland for the cure of sciatica

LINOSPERMUM. See *Linum usitatissimum.*

LINSEED. See *Linum usitatissimum.*

LINT, Carbasus, Linteum.

LINTEAMEN, Linteum, Pledget.

LINTEUM, Linteum, Othoæ, Othonion, Xystos, Achnè, Lint. A soft, flocculent substance, made by scraping old linen cloth; and employed in surgery as a dressing to wounds, ulcers, &c., either simply or covered with ointment.

LINTEUM CARPTUM, Carbasus.

LINUM, see *Linum usitatissimum*.

LINUM CATHARTICUM, *L. minimum*, *Chamaelimum*, *Purging flax*, or *Mill mountain*, (F.) *Lin purgatif*. This plant is possessed of cathartic properties, and has a bitterish, disagreeable taste. Dose, \mathfrak{ss} in substance.

LINUM CRUDUM. See Apolinosis—*l. Minimum*, *L. Catharticum*.

LINUM USITATISSIMUM, *Common flax*, (F.) *Lin.* The seed, *Linum*, (Ph. U. S.) *Semina lini usitatis simi*, *Linospermum*, *Linseed*, *Flaxseed*, (F.) *Grains de lin*, are inodorous, and almost tasteless; yielding mucilage to warm water, and oil by expression. They are demulcent and emollient. Linseed, when ground into powder, forms a good emollient poultice. It is only necessary to stir the powder into boiling water. The oil, *Oleum lini*, *Flaxseed oil*, is emollient and demulcent.

LIONDENT, *Leontodon taraxacum*.

LION'S TAIL, *Leonurus*.

LIP, Sax. and Germ. *Lippe*, *Cheilos*, *Labium*, *Labrum*, (F.) *Lèvre*. The lips are composed of different muscular fasciculi, nerves, and vessels, covered by the skin and mucous membrane of the mouth. They circumscribe the anterior aperture of that cavity; and are inservient to mastication, pronunciation, &c. They are distinguished into *upper* and *lower*—*Anatheilon*, and *Cutocheilon*—and are placed in front of each jaw, forming the anterior aperture of the mouth between them. They unite at each side, and form what are called the *angles or commissures* of the mouth—*Chalini*. Their free edge is covered with a mucous membrane, of a more or less vivid red, according to the individual. They receive their arteries from the external carotid. Their veins open into the two jugulars. Their lymphatic vessels descend into the ganglions, situate beneath the chin. Their nerves are derived from the infra-orbital, mental, and facial.

LIPS, *Labia*, (F.) *Lèvres de la vulve*, are folds belonging to the genital organs of the female, and distinguished into—*l. Labia pudendi*, *Labia majora*, *Epistæ*, *Alæ majoræ*, *Cremænoæ*, (F.) *Grandes Lèvres*. These are two membranous folds, thicker above than below, which limit the vulva laterally, and extend from the inferior part of the mons veneris to the perinæum. They unite anteriorly and posteriorly, forming commissures; the posterior of which is called *Fourchette*. Their outer surface is convex; formed of skin and covered with hair. The inner surface is red and covered by a mucous membrane, continuous with that lining the other parts of the vulva. The space between the skin and mucous membrane is filled with a fatty tissue and fibrous bands, some fibres of the constrictor vaginæ muscle, vessels, and nerves.

We speak, also, of the *lips of a wound, ulcer*, &c., when alluding to the edges of these solutions of continuity.

LIPA, *λίπα*, fat; also, *Lippitudo*, (q. v.)

LIPARA, from *λίπαρος*, 'fatty,' and *λίπα*, 'fat.' Plasters, containing much oil or fat.

LIPARIA. See *Polysarca*.

LIPAROLÉ, *Pomatium*.

LIPAROCELE, *Lipocelè*, from *λίπαρος*, 'fatty,' and *χήλη*, 'tumour.' A *Lipoma*, or fatty tumour of the scrotum.

LIPEMANIA, *Melancholy*, see *Lypemania*.

LIPO or LEIPO, *λείπω*, 'I leave,' 'I forsake.' Hence, *Leipopsychia*, *Leipothymia*.

LIPOCELE, *Liparocele*.

LIPODERMOS, *Leipodermos*.

LIPO'MA, *Lypo'ma*, from *λίπος*, 'fat,' 'a fatty tumour.' A fatty tumour, of an encysted or other character.

LIPOMERIA, *Lipomé'ria*, from *λείπω*, 'I leave,' and *μέρος*, 'a part' Monstrosity from arrest of development, or from defect. Deficiency of one or more of the parts of the body; for example, where a person has only four fingers.

LIPOS, *Pinguedo*.

LIPOTHYMIA, *Syncope*.

LIPPA, *Chassie*.

LIPPIA, *Adali*.

LIPPITUDO, *Ophthalmia chronica* of some. *Lippitude*, *Blar-eye*, *Lappa*, *Lipa*, *Xerophthalmia*, *Lema*, *Lemè*, *Glama*, *Gra'mia*. A copious secretion of the sebaceous humour of the eyelids, which renders them gummy. It is a state of chronic inflammation of the tarsal margins; the eyelids being generally red, tumefied, and painful.

LIPPITUDO NEONATORUM, see *Ophthalmia*.

LIPPUS, *Chassieux*.

LIQUAMUM'IA, *Adeps humd'nus*. Human fat.—Ruland and Johnson.

LIQUATIO, *Liquefaction*.

LIQUEFA'CIENT, *Liquefa'ciens*, from *liquidus*, 'liquid,' and *facere*, 'to make.' A medicinal agent, which seems to have the power of liquefying solid depositions. To this class Mercury, Iodine, &c. have been referred by some.

LIQUEFAC'TION, *Liqua'tio*, *Liquefac'tio*; (same etymon.) Transformation of a solid substance into a liquid. It is used particularly in speaking of metals and fatty bodies.

LIQUEUR D'ALUMINE COMPOSÉE, *Liquor aluminis compos.*—*l. Arsénicale*, *Liquor arsenicalis*—*l. Fumante de Boyle*, *Ammonia sulphuretum*—*l. Fumante de Boyle*, *Liquor fumans Boylii*—*l. Volatile de corne de cerf*, *Liquor volatilis cornu cervi*—*l. de Cuivre ammoniacal*, *Liquor cupri ammoniati*—*l. de Fer alcaline*, *Liquor ferri alkalini*—*l. de Sousacetate de plomb*, *Liquor plumbi subacetatis*—*l. de Potasse*, *Liquor potassæ*—*l. de Souscarbonate de potasse*, *Liquor potassæ subcarbonatis*.

LIQUID, DISINFECTING, *LABARRAQUE'S*, *Liquor Sodæ chlorinatæ*.

LIQUIDAMBAR OFFICINALIS. See *Styrax*.

LIQUIDAM'BAR STYRACIF'LUA, *Liquidam'bra*, *Sweet gum*. The name of the tree which affords the *Liquid amber* and *Storax liquida*, *Styrax liquida* or *Liquid storax*. Liquid amber is a resinous juice of a yellow colour, inclining to red; at first of about the consistence of turpentine; by age, hardening into a solid, brittle mass. It is not used medicinally.

Styrax Liquida is obtained from this plant by boiling. There are two sorts:—one more pure than the other. It is used, occasionally, as a stomachic, in the form of plaster.

LIQUIDUM NERVEUM, *Nervous fluid*.

LIQUOR, *Hygron*, *Hygrotes*. (F.) *Liqueur*. A name given to many compound liquids, and especially to those the bases of which are water and alcohol.

LIQUOR ACIDUS HALLERI, *Elixir acidum Hal-*

teri—1. Æthereus, Ether—1. Æthereus sulphuricos, Spiritus ætheris sulphurici.

LIQUOR ALUMINIS COMPOSITUS, *Aqua aluminis composita, Aqua aluminosa Bateana, Compound solution of alum.* (F.) *Liqueur d'alumine composée.* (Aluminis, zinci sulphat. sing. ʒss, aquæ ferrent. Oij. Dissolve and filter through paper.) Detergent and stimulant. Used as a collyrium, when properly diluted, in ophthalmia; as an injection in gleet, and leucorrhœa, &c.

LIQUOR AMMONIÆ, *Liq. ammoniæ puræ, Alcali ammoniacum fluidum, Ammonia liquidum, Acaustica liquida, A. pura liquida, Lixivium ammoniacale, Spiritus salis ammoniaci aquosus, Aqua ammoniæ, Aqua ammoniæ caustica, Liquid ammonia, Solution of ammonia.* (F.) *Ammoniaque liquide.* (Directed to be made, in the Pharm. U. S. from muriate of ammonia, in fine powder; and Lime, each a pound; distilled water a pint; water, nine fluid ounces. The water is employed to slake the lime; this is mixed with the muriate of ammonia and put into a glass retort, in a sand bath. Heat is applied so as to drive off the ammonia, which is made to pass into a quart bottle containing the distilled water. To every ounce of the product three and a half fluidrachms of distilled water are added, or so much as may be necessary to raise its s. g. to 0.96. This Liquor Ammonia may also be made by mixing one part of liquor ammonia fortior with two parts of distilled water.—Ph. U. S. (1842.) The Liquor Ammonia fortior, or stronger solution of ammonia (Ph. U. S.) is an aqueous solution of ammonia of the s. g. 0.882. It is a stimulant, antacid, and rubefacient. Dose, gr. x to xx, in water or milk.

LIQUOR AMMONIÆ ACETATIS, *Alcali ammoniacum acetatum, Alkali volatile acetatum, Aqua acetatis ammoniæ, Solution of acetate of ammonia, Aqua ammoniæ acetate, Acetate ammoniæ, Spirit of Mindere's, Sal ammoniacum vegetabile, Spiritus ophthalmicus Mindere's, Sal acetosus ammoniacalis.* (Ammon. carbon. ʒij, acid. acet. dil. liiv: or add the salt till the acid is saturated. A sudorific: externally, cooling. Dose, ʒij to f. ʒiss.

LIQUOR AMMONIÆ SUBCARBONATIS, *Solutio subcarbonatis ammoniæ, Aqua carbonatis ammoniæ, Solution of subcarbonate of ammonia.* (Ammonia carbon. ʒviij, aquæ destillat. Oj. Dissolve and filter through paper.) Use;—the same as that of the carbonate of ammonia, (q. v.)

LIQUOR AMMONIÆ HYDROTHIODIS, *Ammonia sulphuretum*—1. ex Ammonia et oleo succini, Spiritus ammoniæ succinatus.

LIQUOR AMNII, *Aqua amnii.* The liquor of the amnios. (F.) *Eaux de l'amnios.* The fluid exhaled by the amnios, and which envelopes the fœtus during the whole period of utero-gestation. It is often simply called, the waters, (F.) *Les Eaux.* Its relative quantity diminishes as pregnancy advances, although its absolute quantity continues to increase till the period of delivery. In some women, only five or six ounces are met with; in others, it amounts to pints. It is limpid, yellowish, or whitish, exhales a faint smell, and has a slightly saline taste. It contains water in considerable quantity; albumen; chloride of sodium; phosphate of lime; an alkaline substance; and a particular acid. It facilitates the dilatation of the uterus, and aids delivery by acting as a soft wedge en-

closed in its membranes, &c. It is probably inservient to useful purposes in the nutrition of the fœtus.

LIQUOR, ANODYNE, HOFFMANN'S, Spiritus ætheris sulphurici compositus—1. Anodynus martialis, Alcohol sulphurico-æthereus ferri.

LIQUOR ARSENICALIS, *L. Potassæ arsenitis, (Ph. U. S.) Solutio arsenicalis, S. arsenicata, S. arsenitis kalica, Arsenical solution, Mineral solvent, Arsenis potassæ liquidum, Arsenis potassæ aquosus, Fowler's solution of arsenic, Solvens mineralle, Italian poison, Aqua Tofana, (?) Aqua Tuffiana, Acqua della Toffana, Acqua di Napoli, Acquetta, Tasteless ague drop.* (F.) *Liqueur arsenicale.* (Acid arsenios in pulverein subtilem triti, potassæ carbonatis pur, sing. gr. lxiv, aqua destillat. q. s. Boil together the arsenious acid and carbonate of potassa with twelve fluidounces of distilled water, in a glass vessel, until the arsenic is dissolved. When the solution is cold, add Tinct. lavand. c. f. ʒiv, and as much distilled water as will make the whole one pint. Ph. U. S.) f. ʒij, contains gr. ss. of the arsenious acid. Dose, gr. v, gradually increased to gr. xx.

LIQUOR BARI CHLORIDI, Baryta, muriate, solution of.

LIQUOR BELLOSTI, L. hydrargyri nitrici.

LIQUOR CALCII CHLORIDI, see Calcis murias.

LIQUOR CALCIS, *Solutio calcis, Aqua calcis, Aqua benedicta, Calcaria pura liquida, Aqua calcaria usta, Solution of lime, Lime Water, (F.) Eau de chaux. (Calcis ʒiv, aq. destill. cong. Pour the water on the lime, and stir. Let it stand in a covered vessel three hours; bottle the lime and water in stopped bottles, and use the clear solution.) It is astringent, tonic, and antacid: and is used in diarrhœa, diabetes, heartburn, &c. and as a lotion to foul and cancerous ulcers, &c. Dose, f. ʒij to Oss, in milk.*

LIQUOR CALCIS COMPOSITUS, *Aqua calcis composita, Compound lime water, Aqua benedicta composita.* (F.) *Eau de chaux composé.* (Lign. guaiac. ras. lbss, rad. glycyrrh. ʒj, cort. sassafras, ʒss; semin. coriand. ʒij, liquor. calcis Ovj. Macerate for two days and filter.) It is stimulant, diaphoretic, and astringent, and is used in cutaneous affections.

LIQUOR CALCIS MURIATIS, see Calcis murias—1. Cereis, Cerevisia—1. Chloreti natri, L. sodæ chlorinatæ—1. Chloreti sodæ, L. sodæ chlorinatæ—1. Chlorureti natri, L. sodæ chlorinatæ—1. Chlorureti sodæ, L. sodæ chlorinatæ.

LIQUOR CUPRI AMMONIATIS, *Aqua cupri ammoniati, Aqua sappharina, Blue eyewater, Solution of ammoniated copper.* (F.) *Liqueur ou Eau de cuire ammoniacal.* (Cupri ammoniat. ʒj, aquæ destill. Oj. Dissolve and filter the solution through paper. Ph. L.) Corrosive and detergent. Used externally to foul ulcers; and, diluted with an equal part of distilled water, it is applied by means of a hair pencil to specks and films on the eye.

LIQUOR CUPRI SULPHATIS COMPOSITUS, *Aqua cupri vitriolata composita.* (Cupri sulphat. alumin. sulphat. aa ʒij, aquæ puræ Oij, acid. sulph. ʒij. Boil the salts in the water until they are dissolved; then filter the liquor, and add the acid.) Used as an astringent in epistaxis, &c. It was also called *Aqua styptica.*

LIQUOR CYRENIACUS, Benjamin—1. Excitans, Spiritus Ammonia succinatus.

LIQUOR FERRI ALKALINI, *Solution of Alkaline Iron*, (F.) *Liqueur de fer alcaline*. (Ferri ζ iss, acid. nitric. ζ ij, aquæ destillat. f. ζ vj, liq. potass. subcarb. f. ζ vj.) To the acid and water mixed, add the iron; and, after the effervescence, add the clear solution, gradually, to the liq. potassæ subcarb.; shaking it occasionally till it assumes a deep brown-red colour, and the effervescence stops. After six hours' settling, pour off the clear solution. *Ph. L.*) It is tonic, like other preparations of iron. Dose, f. ζ ss to f. ζ iss.

LIQUOR FERRI IODIDI, *Solution of Iodide of Iron*. (Iodin. ζ ij, Ferri rament. ζ ij, Mel. despumat. f. ζ v, Aquæ destillat. q. s. Mix the iodine with f. ζ x of the distilled water, in a porcelain or glass vessel, and gradually add the iron filings, constantly stirring. Heat the mixture gently until the liquor acquires a light greenish colour; then, having added the honey, continue the heat a short time, and filter. Lastly, pour distilled water upon the filter, and allow it to pass until the whole of the filtered liquor measures twenty fluid ounces. Keep the solution in closely stopped bottles.—*Ph. U. S.*) Dose, 10 to 30 drops.

LIQUOR FUMANS BOYLI, *Sulphuretum Ammoniac Hydrogenatum, Hydrosulphuretum Ammoniac*, *Tinctura Sulphuris Volatilis*, *Aqua Sulphureti Ammoniac*.—Boyle's Fuming liquor, (F.) *Liqueur fumante de Boyle*. It is possessed of nauseating and emetic properties, and has been given in diabetes and diseases of excitement as a disoxygenizer!

LIQUOR FUMING, BOYLE'S, *Liquor fumans Boylii*—l. Fuming, of Libavius, Tin, muriate of—l. Genital, Sperrn—l. of Hartshorn, volatile, *Liquor volatilis cornu cervi*.

LIQUOR HYDRARGYRI NITRICI, *L. Bellosti Eau mercurielle, Eau contre la gangrène, Remède du Duc d'Antin, R. du Capucin*, (Hydrarg. 120 p., acid. nitr. (33°) 150 p. Dissolve, and add to the solution, distilled water, 900 p. *Ph. P.*) Dose, two or three drops in a glass of water. Not much used.

LIQUOR HYDRARGYRI OXYMURIATIS, *Solution of Oxymuriate of Mercury, Liquor Scieticus*, *L. Syphiliticus Turneri*, *Murias hydrargyri spirituosus liqvidus*. *Solutio Muriatis hydrargyri oxygenati*, *S. of Corrosive Sublimate, Liquor* or *Solution of Van Swieten*. (Hyd. oxym. gr. viij, aquæ destill. f. ζ xv, sp. rect. f. ζ j. Dissolve in the water, and add the spirit. *Ph. L.*) Dose, f. ζ ss, or f. ζ j.

GREEN'S DROPS, and **SOLOMON'S ANTI-IMPETIGENES**—both nostrums—seem to be solutions of *Corrosive Sublimate*.

LIQUOR HYDRIDATIS ARSENICI ET HYDRARGYRI, Arsenic and mercury, iodide of.

LIQUOR IODINI COMPOSITUS, *Solutio Potassii Iodidi Iodureta*, *Compound Solution of Iodine*, *Lugol's Solution*. (Iodin. ζ vj, Potass. iodic. ζ iss, Aquæ destillat. Oj. Dissolve the iodine and iodide of potassium in the water.—*Ph. U. S.*) Dose, grt. vj ad xij, in sugared water.

LIQUOR LITHARGYRI SUBACETATIS, *L. plumbi subacetatis*—l. Lithargyri subacetatis compositus, *Liquor plumbi subacetatis dilutus*.

LIQUOR OF MONRO, *Solution of Monro*. A solution, used by Monro for the preservation of anatomical preparations. It is composed of alcohol at 22° or 24°, with a drachm of nitric acid to each pint.

LIQUOR MORPHINÆ seu MORPHIÆ SULPHATIS,

Solution of Sulphate of Morphia. (*Morphiæ sulphat.* gr. viij, aquæ destillat. Oss. Dissolve the sulphate of morphia in the water.—*Ph. U. S.*) Dose, f. ζ j to f. ζ ij—containing from an eighth to a quarter of a grain.

LIQUOR MORPHINÆ seu MORPHIÆ ACETATIS, *Solution of Acetate of Morphia, Anodyne Drops*, (*Acetate of morphia* gr. xvj, distilled water, f. ζ vj, dilute acetic acid, f. ζ ij.) Dose, from six to twenty-four drops.

LIQUOR NATRI OXYMURIATICI, *L. Sodæ chlorinate*.

LIQUOR NERVINUS BANGII, *Tinctura ætherea camphorata*—l. Oleosus Sylvi, *Spiritus ammoniac aromaticus*—l. *Opii sedativus*, Haden's, see *Tinctura opii*.

LIQUOR OPII SEDATIVUS. An empirical preparation by a London druggist, of the name of Battley. It is presumed to be a solution of acetate of morphia, or of opium, in some form in vinegar. It is devoid of many of the narcotic effects of opium.

LIQUOR OVI ALBUS, *Albumen ovi*—l. *Pancreaticus*, see *Pancreas*—l. *Plumbi acetatis*, *L. P. subacetatis*.

LIQUOR PLUMBI SUBACETATIS, *Liquor Subacetatis Lithargyri, Solution of Subacetate of Lead, Liquor Plumbi Acetatis*, Goulard's *Extractum Saturni*, *Lithargyri Acetum*, (F.) *Liqueur de sousacétate de Plomb*. (*Plumb. acet.* ζ xvj, *Plumb. oxid. semivitr.* in pulv. subtil. ζ ixss, aq. destillat. Oij. Boil together in a glass or porcelain vessel, for half an hour, occasionally adding distilled water, so as to preserve the measure, and filter through paper. Keep the solution in closely stopped bottles.—*Ph. U. S.*) It is used externally as a cooling astringent, and discutient, when diluted with distilled water.

LIQUOR PLUMBI SUBACETATIS DILUTUS, *Liquor Subacetatis Lithargyri Compositus*, *Aqua Saturni*, *Acetate Plumbi dilutum alcoholicum*, *Diluted Solution of Subacetate of Lead*, *Aqua reg'eto-mineralis*, *Tinctura plumbosa*, *Aqua Lithargyri Acetati composita*, *Liquor Plumbi Acetatis dilutus*, *White Wash*, *Royal Preen-tice*. (*Liq. plumbi subacet.* ζ ij, aquæ destillat. Oj.—*Ph. U. S.*) Properties the same as the last, but feebler.

LIQUOR POTASSÆ, *Aqua Potassæ*, *Aqua Kali Cautici*, *Solution of Potash*, *Lixivium magistralē*, *L. Saponarium*, *Soap Lees*, *Aqua Kali puri*, *Soap Ley*, *Lixivium causticum*, *Potassæ liquida*, (F.) *Eau, solution ou liqueur de Potasse*, *Potasse liquide*. (*Potassæ carb.* lbj, calcis lbss, aquæ destill. fervent. congiū. Dissolve the alkali in Oij of the water, and add the remainder to the lime. Mix the whole: set aside in a close vessel, and, when cold, filter through calico. *Ph. L.*) It is antilithic in cases of uric acid calculi, and antacid. Externally, stimulant and escharotic. Dose, grt. x to xx.

LIQUOR POTASSÆ ARSENITIS, *L. arsenicalis*—l. *Potassæ Carbonatis*, *L. P. Subcarbonatis*.

LIQUOR POTASSÆ CITRATIS, *Solution of Citrate of Potassa*, *Neutral Mixture*; *Saline Mixture*. (*Succ. Limon.* Oss. *Potass. Carbonat.* q. s.) saturate by the carbonate of potassa, and filter; or, *Acid. Citric* ζ ss; *Ol. Limon.* ℥. ij; *Aquæ Oss. Potass. Carbonat.* q. s.; dissolve, saturate by the carbonate of potassa, and filter. *Ph. U. S.*) Used in fever, but probably of little or no efficacy.

LIQUOR POTASSÆ HYDRIODATIS, *Solution of Hydiolate of Potass.* (Potassæ hydriod. 36 gr., aqua destillat. f. ʒj.) Dose, grt. xx, three times a day.

LIQUOR POTASSÆ SUBCARBONATIS, *L. P. Carbonatis*, (Ph. U. S.) *Aqua Subcarbonatis Kali*, *Oleum Tartari per deliquium*, *Aqua Kali*, *Lixivium Tartari*, *Aqua Kali preparati*, *Oil of Tartar*, *Saline Oil of Tartar*, *Solution of Subcarbonate of Potass.* (F.) *Liqueur de sous-carbonate de Potasse*, *Lessive de Tartre.* (Potass. subcarb. lbj, aqua destillat. f. ʒxij. Dissolve and filter through paper.) Dose, grt. x to xxx.

LIQUOR, PROPAGATORY, Sperin.

LIQUOR SANGUINIS. This term has been given by Dr. Babington to one of the constituents of the blood, the other being the red particles. He considers, from his experiments, that fibrin and serum do not exist as such in circulating blood, but that the *Liquor Sanguinis*—the *Plasma*, of Schultz—when removed from the circulation and no longer subjected to the laws of life, has then, and not before, the property of separating into fibrin and serum. It is the *Liquor Sanguinis*, after the red particles have subsided, which forms the buffy coat of inflammatory blood.

LIQUOR SEMINIS. The homogeneous, transparent fluid, in which the spermatozoa and seminal granules are suspended.—Wagner.

LIQUOR SODÆ CHLORIDI, *L. Sodæ Chlorinatæ.*

LIQUOR SODÆ CHLORINATÆ, *L. sodæ chloridi*, *L. sodæ oxymuriaticæ*, *L. chloreti natri*, *L. chlorureti natri*, *L. chloreti sodæ*, *L. chlorureti sodæ*, *Natrum chloratum liquidum*, *L. natri oxymuriatici*, *Aqua natri oxymuriatici*, *Labarraque's Disinfecting Liquid*, *Solution of Chlorinated Soda*, (*Calcis Chlorinat.* lbj; *Sodæ Carbonat.* lbj; *Aque cong. iss.* Dissolve the carbonate of soda in three pints of the water, with the aid of heat. To the remainder of the water add, by small portions at a time, the chlorinated lime, previously well triturated, stirring the mixture after each addition. Let the mixture lie for several hours, that the dregs may subside; decant the clear liquid, and mix it with the solution of carbonate of soda. Lastly, decant the clear liquor from the precipitated carbonate of lime, pass it through a linen cloth, and keep it in bottles secluded from the light; (Ph. U. S.) Used in the same cases as the chloride of lime. Internally, 10 drops to a fluidrachm, for a dose. Diluted with water, it is used as an excitant and disinfectant in various morbi externi.

LIQUOR SODÆ OXYMURIATICÆ, *L. sodæ chlorinatæ.*

LIQUOR SULPHURICUS ALCOOLISATUS, *Spiritus ætheris sulphurici*—*L. Swietenis*, *L. hydrargyri oxymuriatis*—*L. Syphililiticus Turneri*, *L. hydrargyri oxymuriatis*—*L. of Van Swieten*, *L. hydrargyri oxymuriatis*.

LIQUOR VOLATILIS CORNU CERVI, *L. volatilis Cornu Cervini*, *Volatile Liquor of Hartshorn*, *Spiritus Lumbriorum*, *Spiritus Millepedarum*, *Hartshorn*, *Spirit of Hartshorn*, *Spiritus Cornu Cervi*, *Liquor volatilis ossium*; *Bone Spirit*, (F.) *Liqueur volatile de Corne de cerf*. This is a solution of subcarbonate of ammonia, impregnated with empyreumatic oil. It possesses the same virtues as the subcarbonate of ammonia. It is in common use to smell at, in faintings, &c.

LIQUOR VOLATILIS OSSIIUM—*L. volatilis cornu cervi.*

LIQUOR ZINCI SULPHATIS CUM CAMPHORÆ, *Aqua Zinci vitriolati cum Camphoræ*, *Aqua vitriolici camphorati*, *Aqua ophthalmica*, *Common Eye Water.* (Zinci sulph. ʒss, camphor, ʒij, aq. bullient. Oij; dissolve and filter.) Used as a lotion for ulcers; or, diluted with water, as a collyrium.

LIQUORICE, *Glycyrrhiza*—*L.* Juice, see *Glycyrrhiza*—*L.* refined, *Extractum glycyrrhizæ*—*L.* Spanish, see *Glycyrrhiza*.

LIQUORICIA, *Glycyrrhiza*.

LIRIODENDRON, *Liriodendron tulipifera*, *Tulip Tree*, *Poplar Tree*, *Tulip-bearing Poplar*, *American Poplar*, *White Wood*, *Cypress Tree*, (New England) (F.) *Tulipier*. The bark—*Liriodendron*, (Ph. U. S.)—especially of the root of this noble forest tree, which is indigenous in the United States, is a strong aromatic bitter, and has been employed advantageously as a tonic. An active principle has been separated from it by Professor J. P. Emmet of the University of Virginia, and has been called *Liriodendrin*. It is not used in medicine.

LIS BLANC, *Lilium candidum*—*L. Asphodelæ*, *Asphodelus ramosus*.

LISERON, GRAND, *Convolvulus sepium*—*L. des Haies*, *Convolvulus sepium*.

LITE, λιτή. A plaster, formerly used, made of verdigris, wax, and resin.—Galen.

LITHOGGUS, from λίθος, 'a stone,' and γυν, 'I expel.' A remedy, which was supposed to possess the power of expelling calculi.

LITHARGE, *Plumbi oxydum semivitreum*

—*L.* of Gold, see *Plumbi oxydum semivitreum*

—*L.* of Silver, see *Plumbi oxydum semivitreum*.

LITHARGYRI ACETUM, *Liquor plumbi subacetatis*.

LITHARGYROS, *Plumbi oxydum semivitreum*.

LITHEC'TASY, from λίθος, 'a stone,' and εκτείνω, 'dilatation;' *Cystec'tasy*. An operation, which consists in extracting stone from the bladder by dilating the neck of the organ, after making an incision in the perineum, and opening the membranous portion of the urethra.—R. Willis.

LITHAS, *Urate*.

LITHATE, *Urate*.

LITHIA, *Lithi'asis*, *Uri'asis* (?), *Urolithi'asis*, *Cuchez'ia calculosa*, *Cal'culi Morbus*, from λίθος, 'a stone.' The formation of stone or gravel in the human body. Also, an affection in which the eyelids are edged with small, hard, and stone-like concretions.

LITHIA RENALIS ARENOSA, *Gravel*—*L. Renalis*, *Nephrolithiasis*—*L. Vesicalis*, *Calculi, vesical*.

LITHIASIS, *Lithia*—*L. Cystica*, *Calculi, vesical*—*L. Nephretica*, *Gravel*—*L. Nephretica*, *Nephrolithiasis*—*L. Renalis*, *Gravel*—*L. Renalis*, *Nephrolithiasis*—*L. Vesicalis*, *Calculi, vesical*.

LITHIC, *Lithicus*. Same etymon. Belonging to lithic or uric acid, or to stone: hence *Lithic Diathesis*: the habit of body which favours the deposition of lithic acid and the lithates from the urine.

LITHOLABON, *Forceps*, (*Lithotomy*.)

LITHOLABUM, from λίθος, 'a stone,' and λαμβάνω, 'I seize.' An instrument for extracting stone from the bladder. It had various shapes—Fabricius ab Acquapendente, Hildanus.

LITHONTRIPTIC, *Lithontrip'ticus*, *Lithon-thryp'tic*, *Calculi'ragus*, *Saxi'ragus*, from *λίθος*, 'a stone,' and *ἐνπτω*, 'I break in pieces.' A remedy, believed to be capable of dissolving calculi in the urinary passages. There is not much reliance to be placed upon such remedies. By *antilithics*, exhibited according to the chemical character of the calculus (see *Calculi Urinary*), the disease may be prevented from increasing; but most of the vaunted lithontriptics, for dissolving the calculus already formed, have been found unworthy of the high encomiums which have accompanied their introduction.

LITHOPÆDION, *Infans lapide'us*, *Osteopæ'dion*, from *λίθος*, 'a stone,' and *παις*, 'a child.' A fœtus, petrified in the body of the mother.

LITHOS, Calculus.

LITHOSPERMUM OFFICINALE, *Mil'ium Solis*, *Gromwell*, *Ægon'ychon*, *Bastard Alkanet*, (F.) *Gremil officinal*, *Herbe aux Perles*. The seeds of this plant were formerly supposed, from their stony hardness, (*λίθος*, 'a stone,' and *σπέρμα*, 'seed,') to be efficacious in calculous affections. They have, also, been considered diuretic.

LITHOSPERMUM VILLOSUM, *Anchusa tinctoria*.

LITHOTOME, *Lithot'omus*, from *λίθος*, 'a stone,' and *τεμνειν*, 'I cut.' This name has been given to a number of instruments of different shapes and sizes, which are used in the operation for the stone, to cut the neck or body of the bladder. They ought, with more propriety, to be called *Cystotomes*.

The **LITHOTOME CACHE** of Frère Côme is the most known, and is still occasionally used. It is composed of a handle, and of a flattened sheath, slightly curved; in this there is a cutting blade, which can be forced out by pressing upon a *bascule* or lever, to any extent that may be wished by the operator.

A **DOUBLE LITHOTOME** was used by Dupuytren in his bilateral operation. See *Lithotomy*.

LITHOTOMIST. Same etymon. *Lithot'omus*. One, who devotes himself entirely to operating for the stone. One who practises lithotomy.

LITHOTOMY, *Lithotom'ia*, *Cystotom'ia*, *Urolithotom'ia*, *Sectio vesica'lis*, same etymon. (F.) *Taille*. The operation by which a stone is extracted from the bladder. The different methods, according to which this operation may be practised, are reducible to five principal; each of which has experienced numerous modifications.

1. The *Method of Celsus*, *Meth'odus Celsia'na*, *Cystotom'ia cum apparat'u parvo*, *Apparatus Minor*, *Cutting on the Gripe*. This consisted in cutting upon the stone, after having made it project at the perinæum by means of the fingers introduced into the rectum. This method was attended with several inconveniences; such as the difficulty of dividing the parts neatly, injury done to the bladder, as well as the impossibility of drawing down the stone in many persons. It is sometimes, also, called the *Meth'odus Guytonia'na*; from Guy de Chauliac having endeavoured to remove from it the discredit into which it had fallen in his time. It was termed the *Apparatus Minor*, (F.) *Le petit appareil*, from the small number of instruments required in it.

2. *Apparatus Major*. This method was invented, in 1520, by John de Romani, a surgeon of Cremona, and communicated by him to Mariano-Santo-di-Barletta, whence it was long called *Mariano's Method*, *Sectio Maria'na*. It was called the *Apparatus Major*, and *Cystotom'ia vel Meth'odus cum apparat'u magno*, (F.) *Le grand appareil*, from the number of instruments required in it. An incision was made on the median line; but the neck of the bladder was not comprehended in it. It was merely dilated. The greater apparatus was liable to many inconveniences, such as ecchymoses; contusion; inflammation of the neck of the bladder; abscesses; urinary fistulæ; incontinence of urine; impotence, &c.

3. The *High Operation*, *Apparatus altus*, *Cystotom'ia cum apparat'u alto*, *C. hypogast'rica*, *Epicystotom'ia*, *Laparocystotom'ia*, *Sectio seu Meth'odus Franconia'na*, *S. Hypogast'rica*, *S. alta*, (F.) *Haut appareil*, *Taille Hypogastrique*, *Taille sus-pubienne*, was first practised by Peter Franco, about the middle of the 16th century. It consisted in pushing the stone above the pubis by the fingers introduced into the rectum. Rousset afterwards proposed to make the bladder rise above the pubis by injecting it. The method had fallen into discredit, when Frère Côme revived it. It is used when the calculus is very large. It was practised by opening first the membranous part of the urethra upon a catheter passed into the canal. Through this incision, the *Sonde à dard*—a species of catheter, having a spear-pointed stilet—was introduced into the bladder. An incision was then made in the linea alba, above the symphysis pubis, of about four or five fingers' breadth, and the peritoneum detached to avoid wounding it. The stilet was pushed through the bladder, and used as a director for the knife, with which the bladder was divided anteriorly, as far as the neck; and the stone extracted. It was performed in England by Douglas, in 1719, and since by others with various modifications.

4. The *Lateral Operation*, *Cystotom'ia latera'lis*, *Sectio latera'lis*, *Apparatus latera'lis*, (F.) *Appareil lateralisé*, so named from the prostate gland and neck of the bladder being cut laterally, was probably invented by Peter Franco. It was introduced into France by Frère Jacques de Beaulieu. He performed it with rude instruments, invented by himself, and improved by the suggestions of some of the Parisian surgeons. In England, it received its earliest and most important improvements from the celebrated Cheselden. It is the method practised at the present day, according to different modes of procedure. In this method, the patient is placed upon a table; his legs and thighs are bent and separated; the hands being tied to the feet. The perinæum is then shaved, and a staff is introduced into the bladder; the handle being turned towards the right groin of the patient. An oblique incision is now made from the raphe to the middle of a line drawn from the anus to the tuberosity of the ischium of the left side; and, taking the staff for a guide, the integuments, cellular tissue of the perinæum, membranous portion of the urethra, transversus perinæi muscle, bulbo-cavernosus, some fibres of the levator ani, the prostate and neck of the bladder, are successively divided. For this latter

part of the operation, the knife, the beaked bistoury, *Bistouri* ou *Lithotome Caché*, cutting gorgel, &c. are used, according to the particular procedure. The forceps is now introduced into the bladder, and the stone extracted. In the operation, care must be taken not to injure the rectum, or the great arterial vessels, distributed to the perinæum.

A variety of the *Lateral Apparatus*, called by the French *Appareil latéral*, consisted in cutting into the bas fond of the bladder, without touching the neck of that organ: but it was soon abandoned on account of its inconveniences.

The *Bilateral Operation* is founded on that of Celsus. It consists in making an incision posterior to the bulb of the urethra, and anterior to the anus, involving both sides of the perinæum by crossing the raphe at right angles: an incision is then made through the membranous part of the urethra, and the prostate may be cut bilaterally, either by the "double lithotome" of Dupuytren, or by the "Prostatic Bisector" of Dr. Stevens, of New York.

5. *Lithotomy by the Rectum, Proctocystotomy*, (F.) *Taille par la Rectum, Taille postérieure, T. Recto-résicale*. This was proposed by Vegetius in the 16th century; but was never noticed until M. Sanson, in the year 1817, attracted attention to it; since which time it has been successfully performed in many instances. It consists in penetrating the bladder through the paries corresponding with the rectum, by first cutting the sphincter ani and rectum about the root of the penis, and penetrating the bladder by the neck of that organ, dividing the prostate; or by its *bas-fond*.

Lithotomy in women, from the shortness of the urethra, is a comparatively insignificant operation.

LITHOTRIPTORS. See Lithotrity.

LITHOTRITES. See Lithotrity.

LITHOTRITEURS. See Lithotrity.

LITHOTRITY, *Lithotritia*, *Lithotripsy*, *Lithotripsy*, from *λίθος*, 'a stone,' and *τριψω*, 'I break.' The operation of breaking or bruising the stone in the bladder. It has been performed, of late years, with success, by French, and, after them, by English and American surgeons. The instruments employed for this purpose are called in the abstract. *Lithotrites*, *Lithotriteurs*, and *Lithotriptors*. The most celebrated are those of Civiale, Jacobson, Heurteloup and Weiss. See *Brise Pierre articulé* and *Percuteur à Marteau*.

LITHOTRIPSY, Lithotrity.

LITHOXIDURIA, from *λίθος*, 'a stone,' *oride*, and *ουρον*, 'urine.' The discharge of urine containing lithic or xanthic oxide.

LITHURIA, *Lithourorrhée* (Piorry); from *λίθος*, 'a stone,' and *ουρον*, 'urine.' The condition of the system in which deposits of lithic acid and the lithates take place from the urine. See *Urine*.

LITMUS, Lichen roccella.

LITRA, Pound.

LITRE, *Litra*. A measure containing a cubed decimetre, which is equal nearly to 2.1135 pints. The ancients gave the name *litra*, *λίτρα*, to a measure capable of containing 16 ounces of liquid.

LITUS, Liniment.

LIVECHE, *Ligisticum levisticum*.

LIVER, Sax. *liver*, *Hepar*, *Jecur*. (F.) *Foie*.

The liver is the largest gland in the body. It is an azygous organ; unsymmetrical; very heavy; and of a brownish-red colour; occupying the whole of the right hypochondrium, and a part of the epigastrium. Above, it corresponds to the diaphragm; below, to the stomach, transverse colon, and right kidney; behind, to the vertebral column, aorta, and vena cava; and before, to the base of the chest. Its upper surface is convex; the lower, irregularly convex and concave, so that anatomists have divided the organ into three lobes,—a large or right or colic lobe;—a lesser lobe, lobule, or inferior lobe, the *Lobulus Spigelii*, (q. v.)—and a middle or left lobe. At its inferior surface, are observed;—1. A *Sulcus* or *Furrow*, or *Fissure*, called *horizontal* or *longitudinal*, great fissure, *Fossa Umbilicalis*, (F.) *Sillon horizontal*, *longitudinal*, *S. de la veine ombilicale*, *Sulcus antero-posterior Jecoris*, *S. horizontalis Jecoris*, *S. longitudinalis Jecoris*, *S. sinist. Jecoris*, *S. Umbilicalis*, which lodges, in the fœtus, the umbilical vein and ductus venosus. 2. The *Principal Fissure*, termed *Sulcus Transversus* vel *Sinus Portalis*, (F.) *Sillon transversal* ou *de la veine porte*, which receives the sinus of the vena porta. 3. The *Fissure of the Vena Cava inferior*, *Sillon de la veine cava inférieure*, situate at the posterior margin of the organ, and lodging the vena cava inferior. 4. The *Lobulus Spigelii*, (q. v.) or *posterior portal eminence*. 5. The *anterior portal eminence*, *Auriga* vel *Lobulus anatumus*, (q. v.) 6. Depressions corresponding to the upper surface of the stomach, gall-bladder, arch of the colon, right kidney, &c. Continued from the fossa umbilicalis, is a small fossa, called *Fossa Ductus Veno-si*, between the left lobe and *Lobulus Spigelii*. The posterior margin of the liver is very thick; much more so than the anterior. The liver is surrounded by a serous or peritoneal covering, which forms for it a *suspensory* or *broad ligament*, and two *lateral* and *triangular* ligaments. See *Falx*. The blood-vessels of the liver are very numerous. The hepatic artery and vena porta furnish it with the blood necessary for its nutrition and the secretion of bile. The hepatic veins convey away the blood, which has served those purposes. The lymphatic vessels are very numerous; some being superficial; others deep-seated. The nerves are, also, numerous, and proceed from the pneumogastric, diaphragmatic, and from the hepatic plexuses.

The intimate structure of the parenchyma of the liver is not understood. When cut, it presents a porous appearance, owing to the division of a multitude of small vessels. When torn, it seems formed of granulations;—the intimate structure of which has given rise to many hypotheses. In these granulations are contained the radicles of the excretory ducts of the bile; the union of which constitutes the hepatic duct. According to Mr. Kiernan, the intimate structure consists of a number of lobules composed of *intralobular* or hepatic veins, which convey the blood back that has been inservient to the secretion of bile. The interlobular plexus of veins is formed by branches of the vena porta, which contain both the blood of the vena porta and of the hepatic artery; both of which, according to Mr. Kiernan furnish the pabulum of the biliary secretion. The biliary ducts form likewise an interlobular

plexus, having an arrangement similar to that of the interlobular veins. Mr. Kiernan's views are embraced by many anatomists; but are denied by some.

The liver is the only organ, which, independently of the red blood carried to it by the hepatic artery, receives black blood by the vena porta. The general opinion is, that the vena porta is the fluid which furnishes bile, whilst that of the artery affords blood for the nutrition of the liver. It is, probable, however, that bile is secreted by the latter vessel.

The liver is liable to a number of diseases. The principal are—*Hepatitis*, (q. v.) or *inflammation*,—*cancer*, *biliary calculi*, *encysted* and other *tumours* or *tubercles*, *hydatids*, &c., and it has, at times, been the *fashion* to refer to it as the cause of symptoms, with which it is in no wise connected.

LIVER, *Hepar*. Under this name the ancients designated several substances, having a brownish colour, analogous to that of the liver; and composed of sulphur and some other body. See *Potassæ Sulphuretum* or *Liver of Sulphur*.

Liver of *Antimony* is the semi-vitreous sulphuret, &c.

LIVER, GRANULATED, *Cirrhosis* of the liver—1. Granular, *Cirrhosis* of the liver—1. Hobnailed, *Cirrhosis* of the liver—1. Mammillated, *Cirrhosis* of the liver—1. Nutmeg, *Cirrhosis* of the liver—1. Spot, *Chloasma*—1. Tuberculated, *Cirrhosis* of the liver—1. Wort, *Hepatica triloba*, *Marchantia polymorpha*—1. Wort, ground, ash-coloured, *Lichen caninus*—1. Wort, Iceland, *Lichen Islandicus*.

LIVRE, Pound.

LIXIVIA TARTARIZATA, *Potassæ tartaras*—1. *Vitriolata*, *Potassæ sulphas*—1. *Vitriolata sulphurea*, *Potassæ sulphas cum sulphure*.

LIXIVIÆ seu KALICUM ACETAS, *Potassæ acetas*.

LIXIVIAL, *Lixivio'sus*; from *lixivium* 'lee.' (F.) *Lixivial*, *Lixivieux*. An ancient term for salts, obtained by washing vegetable ashes,—such as the fixed alkalis.

LIXIVIATION, *Elizivia'tion*. *Lixiviatio*, same etymon. An operation, which consists in washing ashes with water, so as to dissolve the soluble parts. The filtered liquor is the *lee*.

LIXIVTUM, *Lixiv'ia*, *Conia*, *Lee*, *Ley*, (F.) *Lessive*. Any solution containing potass or soda in excess; from *lix*, 'potash.' (q. v.)

LIXIVUM AMMONIACALE, *Liquor ammoniæ*—1. *Ammoniacale aromaticum*, *Spiritus ammoniæ aromaticus*—1. *Cauticum*, *Liquor potassæ*—1. *Magistrale*, *Liquor potassæ*—1. *Saponarium*, *Liquor potassæ*—1. *Tartari*, *Liquor potassæ subcarbonatis*.

LIZARD, *Lacer'ta*, *Lacertus*, said to be so called in consequence of its limbs resembling the arms (*lacerti*) of man (?), *Saura*, *Sauros*, (F.) *Lézard*. Lizards were formerly employed in medicine as sudorifics; and were, at one time, extolled in syphilis, cutaneous affections, and in cancer.

LOADSTONE, *Magnet*.

LOATHING, *Disgust*.

LOBARIA PULMONARIA, *Lichen pulmonarius*.

LOBE, *Lobus*. A round, projecting part of an organ. The liver and the lungs have lobes.

LOBE, or LOBULE OF THE EAR, is a soft, rounded prominence, which terminates the cir-

cumference of the pavilion inferiorly, and which is pierced in those who wear rings.

The under surface of the brain is divided into *two anterior*, *two lateral*, and *two posterior*, and two intermediate *lobes* or *processes*. These *Chaussier* calls *lobules* of the brain: the cerebral hemispheres he terms *lobes*.

LOBE DUODÉNAL, *Lobulus Spigelii*—1. *Pancréatique*, *Lobulus Spigelii*—1. *Petit du foie*, *Lobulus Spigelii*—1. *de Spigel*, *Lobulus Spigelii*.

LOBE'LIA INFLA'TA, *Indian Tobacco*. *Emetic Weed*, *Lobelia*. (Ph. U. S.) The prominent virtues of this American plant are those of an emetic. In smaller doses it is sedative, and has been given as a pectoral in croup, asthma, &c. It is, also, sudorific and cathartic, and is an acro-narcotic poison. Twenty grains act as an emetic.

LOBELIA SYPHILIT'ICA, *Blue Cardinal Flower*, *Ranunculus Virginianus*. The root of this plant which is indigenous in the United States, is an emetic and drastic cathartic. It has been used against syphilis; hence its name. The mode of preparing it is to boil $\frac{3}{ss}$ of the dried root in Oxiij of water, until the fluid is reduced to Oviij. Dose, Oss.

LOBES, CEREBRAL, see *Lobe*—1. Optic, *Quadrigenina tubercula*.

LOBULE, *Lobulus*, diminutive of *Lobus*. A little lobe. Mr. Kiernan uses the term *lobule* for the *acinus* of the liver of many anatomists.

LOBULE DU FOIE, *Lobulus Spigelii*.

LOBULUS ACCESSORIUS ANTERIOR

QUADRATUS, L. *anonymus*.

LOBULUS ANON'YMUS, L. *accessorius anterior quadratus*, L. *quadratus*, (F.) *Éminence porte antérieure*. This is situated in the liver between the passage for the round ligament and the gall-bladder, and is less prominent, but broader than the *Lobulus caudatus*. From the *lobulus anonymus* a bridge runs across the passage for the round ligament. It is called *Pons* vel *Isthmus hep'atis*.

LOBULUS CAUDA'TUS, *Processus caudatus*. This is merely the root or one of the angles of the *lobulus Spigelii*, advancing towards the middle of the lower side of the great lobe, and representing a kind of tail.

LOBULUS POSTERIOR, L. *Spigelii*—1. *Posticus papillatus*, L. *Spigelii*—1. *Quadratus*, L. *anonymus*.

LOBULUS SPIGE'LI, L. *posterior*, L. *posticus papillatus* (F.) *Éminence porte postérieure*, *Lobule*, *Petit lobe du foie*, *Lobe de Spigel*, *Lobe duodénal*, L. *pancréatique*, is situated near the spine, upon the left side of the great lobe of the liver, and is of a pyramidal shape, projecting, like a nipple, between the cardia and vena cava, at the small curvature of the stomach.

LOBUS, *Lobe*.

LOCAL, *Loca'lis*, *Top'icus*. *Topical*, (F.) *Locale*, *Topique*. An affection is called local—*Morbus Loca'lis*,—when confined to a part, without implicating the general system; or, at all events, only secondarily. *Local* is thus opposed to *general*. A *local* or *topical* application is one used externally. See *Topical*.

LOCHIA or LO'CHIA, *Purgamēta Puēperii*, *Purgatio* from *λοχος*, 'a woman in childbed.' (F.) *Suites de couches*, *Vidanges*. The *cleansings*. A serous and sanguineous discharge following delivery. During the first two or three days, it is bloody, but afterwards

Lived. Age.

LONGISSIMUS DORSI, *Lombo-dorso-trachélien*, *Portion costo-trachélienne du sacro-spinal*, (Ch.) *Semi-spinalis*, (F.) *Long dorsal*, *Long du dos*, is situate vertically at the posterior part of the trunk, and fills, in a great measure, the vertebral furrows. It is thick and almost square below; thin and pointed above. It is attached to the posterior surface of the sacrum, to the transverse processes of all the lumbar and dorsal vertebræ, and to the inferior margin of the last 7 or 8 ribs. It maintains the vertebral column in a straight position; straightens it when bent forwards, and can even carry it back. It also assists in the rotatory motion of the trunk.

LONGISSIMUS FEMORIS, Sartorius—*I. Oculi*, *Obliquus superior oculi*.

LONG-SIGHTEDNESS, Presbytia.

LONGUS COLLI, *Pré-dorso-cervical*, *Pré-dorso-atloïdien*, (Ch.) (F.) *Long du cou*. This muscle is situate at the anterior and superior part of the vertebral column. It is long, flat, and broader at its middle than at its extremities, which are pointed. It is attached to the anterior surface of the bodies of the first three dorsal and last six cervical vertebræ; to the intervertebral ligaments; to the anterior edge of the transverse processes of the last five cervical vertebræ; and to the tubercle on the anterior arch of the first. This muscle bends the cervical vertebræ upon each other and upon the dorsal vertebræ. If the upper portion acts on one side only, it occasions the rotation of the atlas on the vertebra dentata; and, consequently, of the head on the neck.

LONGICERA PERICLYMENUM, *Peryclinenum*, *Caprifolium*, *Common Woodbine*. (F.) *Chêrre-feuille*. This common plant is slightly astringent and tonic, and was formerly much used in gargles.

LOOCH, *Lohoch*. Look. A linctus. See Eclegma and Eclectos.

LOOCH ABSQUE EMULSIONE PARATUM, *Look préparé sans emulsion*. *Looch prepared without emulsion*. (Pulv. g. trag. gr. xvj to gr. xxx, ol. amygd. dulc. ʒss, sacchar. ʒj, aquæ ʒijj, aquæ flor. aurant. ʒij. M. by rubbing in a marble mortar.) Demulcent.

LOOCH ALBUM, *Looch amygdalinum*, *Linctus albus*, *L. amygdalinus*, *L. communis*, *Eclegma album*, *Eclegma gummo-so-oleosum*, (F.) *Looch blanc*, *L. b. amygdalin*, *L. b. pectoral*. (Amygd. dulc. ʒss, amygd. amar. No. ij, sacchar. alb. ʒiv. Make an emulsion by gradually adding ʒiv of water. Then take pulc. tragacanth. gr. xvj, ol. amygd. dulc. recent. ʒss, sacch. ʒij. Add the almond milk gradually to this, and afterwards aq. flor. aurant. ʒij. Ph. P.) It is demulcent and pectoral.

LOOCH AMYGDALINUM, *L. album*—*I. Blanc*, *L. album*—*I. cum Croco et pistaciis*, *L. viride*—*I. of Egg*, *L. ex ovo*.

LOOCH EX OVO, *Looch of egg*, (F.) *Look d'œuf*, *Looch rouge*, *Emulsion huileuse*, *Mixture calmante*, *Potion pectorale*, *Lait adoucissant*, *Potio seu emul'sio seu mistu'ra len'iens seu oleo'sa*, *Looch pectoral'le len'iens*. (Vitell. ovi. recent. ʒss, ol. amygd. dulc. ʒiss, syrup. althææ, ʒj. Rub in a mortar, and add by degrees aq. flor. aurant. ʒj. aq. papav. rhæod. ʒij. Ph. P.) Virtues the same as the preceding.

LOOCH ROUGE, *L. ex ovo*—*I. Vert*, *L. viride*.

LOOCH VIRIDÈ, *Look cum crocè et pista'ciis*, (F.) *Looch vert*. (Syrup. Violor. ʒj, tinct. croci gtt. xx, aquæ ʒiv. Mix, and add pistaciæ semin. sicc. ʒvj. Ph. P.) Virtues like the last.

LOOK, *Looch*—*I. d'œuf*, *Looch ex ovo*—*I. Préparé sans emulsion*, *Looch absque emulsione paratum*.

LOOSE STRIFE, **CREEPING**, *Lysimachia nummularia*.

LOOSENESS, *Diarrhæa*.

LOPEZ RADIX, *Radix lopezia'na*, *Radix Indica lopezia'na*. The root of an unknown Indian tree, not possessed of any remarkable smell or taste, or of any appearance of resinous matter. It has been extolled, notwithstanding, in cases of colliquative diarrhæa. Gaubius compares its action to that of simarouba, but thinks it more efficacious.

LOPHADIA, *Lophia*.

LOPHIA, *Lophadia*. The first vertebra of the back.—Gorræus.

LOPIMA, *Fagus castanea*.

LOQUAC'ITY, *Garrulitas*; from *loquor*, 'I speak.' (F.) *Babillement*. The act of speaking with volubility. It is, sometimes, a symptom of disease, and is observable in hysteria, &c.

LOQUELA, *Voice*, articulated.

LORDO'SIS, from *λорδος*, 'curved,' 'bent.' *Rependa'tio*, *Repan'ditas*. A name given to curvatures of the bones in general; and particularly to that of the vertebral column forwards. See Hump.

LORIND MATRICIS, *Epilep'sia uteri'na*, *Convulsivus u'teri morbus*. A barbarous name given to a pretended epilepsy of the womb.

LOT, *Urine*.

LOTIO SAPONACEA. See Sapo.

LOT'ION, *Lotio*, from *lavare*, *lotum*, 'to wash.' (F.) *Hydrolotif*. A fluid external application. Lotions are ordinarily applied by wetting linen in them and keeping it on the part affected.

LOTION, **GOWLAND'S**. An empirical preparation. (Bitter almonds, ʒj, sugar, ʒij, distilled water, lbj. Grind together, strain, and add corrosive sublimate, ʒij, previously ground with sp. vini rect. ʒij.) Used in obstinate eruptions.

LOTION, **HANNAY'S**, *Preventive wash*. This famous nostrum, for the prevention of venereal infection, was nothing more than a solution of caustic potass.

LOTION, **HYDROCYAN'IC**, *Lotio Ac'idi Hydrocyan'ici*. (Hydrocyanic acid, f. ʒiv, rectified spirit of wine, f. ʒj, distilled water, f. ʒxxx) Used with much success in impetigo, &c.

LOTION, **STRUVE'S**, **FOR HOOPING-COUGH**. (*Antim. et Potass. tartar. ʒj, aquæ ʒij. Add tinct. cantharid. ʒj.*)

LOTIUM, *Urine*.

LOTUS SYLVESTRIS, *Trifolium melilotus*—*l. Virginiana*, *Diospyros Virginiana*.
LOUCHEMENT, *Strabismus*.
LOUCHES. See *Strabismus*.
LOUPE, *Wen*.
LOUSE, *Pediculus*.
LOUSINESS, *Phthiriasis*.
LOUSY DISEASE, *Phthiriasis*.
LOUTRON, *Bath*.
LOVAGE, *Ligusticum levisticum*.
LOVE, *Eros, amor*, from *Sax. lupian*, (G.) *lieben*, 'to love.' (F.) *Amour*. A tender and elevated feeling, which attracts one sex to the other. Love is occasionally a cause of disease, especially of insanity.
LOVE APPLE PLANT, *Solanum lycopersicum*.
LOW SPIRITS, *Hypochondriasis*.
LOWER, TUBERCLE OF, *Tuber'culum Loweri*. Anatomists have given this name to a small projection, the existence of which is by no means constant, and which is found in the sinus venosus, between the superior and inferior cava.
LOXARTHROS, from *loxos*, 'oblique,' and *arthron*, 'articulation.' (F.) *Perversion de la tête des os et des muscles*. A vicious deviation or direction of the joints; without spasm or luxation, as in *clubfoot*.
LOXIAS, *Torticollis*.
LOZENGE, *Tabella*.
LOZENGES, BARK, *Tabellæ cinchonæ*—*l. of Catechu and magnesia*, *Tabellæ antimonialis Kunckelii*—*l. Faustinus's*, *Faustini pastilli*—*l. for the Heart-burn*, *Trochisci carbonatis calcis*—*l. Magnesia*, *Tabellæ de magnesiâ*—*l. of Marshmallows*, *Tabellæ de althæâ*—*l. of Oxalic acid*, *Tabellæ acidi oxalici*—*l. Pectoral, black*, *Trochisci glycyrrhizæ glabræ*—*l. Pectoral, of emetine*, *Trochisci emetinæ pectorales*—*l. Rhubarb*, *Tabellæ de rheo*—*l. of Scammony and senna*, compound, *Tabellæ de scammonio et sennâ*—*l. Steel*, *Tabellæ de ferro*—*l. of Steel, aromatic*, see *Tabellæ de ferro*—*l. Sulphur, simple*, *Tabellæ de sulphure simplicis*—*l. Sulphur, compound*, *Tabellæ de sulphure compositæ*—*l. of Sulphuret of antimony*, *Tabellæ antimonialis Kunckelii*—*l. Worm*, *Ching's*, *Worm lozenges*, *Ching's*.
LUBRICUM CAPUT, Penis.
LUCCA, MINERAL WATERS, AND CLIMATE OF. The baths and waters, near this ancient Italian city, have been long celebrated. They are thermal, and resemble, in properties, those of *Plombières* in France, and of *Bath* in England. They contain carbonic acid, sulphates of alumina, soda, magnesia, and iron. There are ten different sources, the temperature of which varies from 94° to 130° Fahr.
Lucca is much frequented in summer; partly on account of its mineral waters, but more on account of the coolness of its situation.
LUCID, Lucidus. In medicine, the word *lucid* is particularly applied to the *internals* of apparent reason, which occur in mental alienation.
LUCINA, *Hithya*.
LUES, Syphilis—*l. Gutturis epidemica*, *Cynanche maligna*—*l. Indica*, *Frambœsia*—*l. Sarmatica*, *Plica*—*l. Syphilis*, *Syphilis*—*l. Syphilodes*, *Syphilis pseudo-syphilis*—*l. Venerea*, *Syphilis*.
LUES SCORBUTICA, see *Purpura*.
LUETTE, *Uvula*—*l. Vésicale*. See *Urinary bladder*.

LUJULA, *Oxalis acetosella*.
LULLABY SPEECH, *Lallation*.
LUMBA'GO, from *Lumbi*, 'the loins.' *Arthro'sia lumborum*, *Lumbago rheumatica*, *Nephral'gia rheumatica*, *Rhachirrhœd'ma*, *Rachiorrhœd'ma*, *Rheumatismus dorsalis*. Rheumatism affecting the lumbar region.
Lumba'go psod'ica, *L. apostematosa*, *L. ab arthro'acæ*—Pain in the loins from abscess.
LUMBAGO A NIS. See *Effort*.
LUMBAR, *Lumba'ris* vel *Lumba'lis*. (F.) *Lombaire*. Belonging or having reference to the loins.
LUMBAR ABSCESS, *Psoas abscess*, *Apostéma psod'icum*, *Abscessus lumborum*, *Morbus psod'icus*. This abscess is so called from the matter being found on the side of the psoas muscle, or betwixt that and the iliacus internus. Between these muscles is a quantity of loose, cellular substance; and, when an abscess takes place there, it can find no outlet except by a distant course. Generally, it descends along the psoas muscle, forming a swelling immediately beneath Poupard's ligament; at times, however, it extends down the thigh under the fascia. Severe hectic follows the bursting of the abscess, and often death. Its causes are,—scrofula, injury to the loins, &c.
 When, from the pain of the back continuing for some time, with other symptoms, the disease is suspected, caustics, or the moxa applied opposite the transverse processes of the lumbar vertebræ, must be recommended; and, when the abscess is ready for opening, it may be emptied by repeated discharges of the matter, through a small opening, made with a lancet or small lancet-pointed trocar. The medical treatment will consist in supporting the system, under the great restorative efforts required of it.
LUMBAR ARTERIES, are four or five in number on each side. They arise from the sides of the abdominal aorta, and pass behind the muscles situate in front of the lumbar portion of the spine, to gain the broad muscles of the abdomen. They give off, 1. Spinal branches. 2. Anterior, posterior, and external muscular branches.
LUMBAR NERVES are five in number, and issue from the vertebral column by the spinal foramina of the loins. The first lumbar nerve gives off three branches:—the *external or ilio-scrotal*; the *middle or inguino-cutaneous*, and the *internal or infra pubian*. Along with the three pairs below it, it forms the lumbar plexus.
LUMBAR PLEXUS, *Portion lombaire du plexus crural*, (Ch.) *Plexus Lombo-abdominal*. This plexus is formed by the union of the *Rami communicantes* of the anterior branches of the first four lumbar nerves. It is situate behind the psoas muscle, and before the transverse processes of the lumbar vertebræ. It furnishes, besides the branches which proceed from the first pair, several filaments, that are distributed to the psoas muscle, to the iliacus, the integuments, glands of the groin; and three great branches—the *crural*, *obturator*, and *lumbo-sacral*.
LUMBAR VEINS have an arrangement analogous to that of the arteries of the same name. They communicate with the vertebral sinuses, azygous veins, &c., and pass into the vena cava inferior.

LUMBAR REGION, *Lumbi*.

LUMBARIS EXTERNUS, *Quadratus lumborum*—*l. internus*, *Psoas magnus*.

LUMBI, *The loins, the lumbar region, Lap'ara, Psoæ, Osphys*. The posterior regions of the abdomen, comprised between the base of the chest and the pelvis. The parts which enter into the formation of the lumbar region, are—the skin; a considerable quantity of cellular texture; broad and strong aponeuroses;—the *Latissimus Dorsi*, *Obliquus externus*, and *Obliquus internus abdominis*, *Transversalis abdominis*, *Quadratus lumborum*, and the mass common to the *Sacro-lumbalis*, *Longissimus dorsi* and *Multifidus spina*. These muscles surround the lumbar region of the vertebral column. The vessels, nerves, &c., of the loins, are called *lumbar*.

LUMBO-SACRAL. Belonging to the lumbar and sacral regions. (F.) *Lombo-sacré*. Bichat calls thus a very large nerve, given off from the anterior branch of the fifth lumbar pair, which descends into the pelvis before the sacrum to join the sciatic plexus.

LUMBRIC/LIS, *Vermicul'ris*. Resembling a *lumbr'icus* or 'earthworm.' A name given to small muscles, met with in the palm of the hand and sole of the foot.

LUMBRICALES MANUS, *Fidicina'les, Flexor primi internodii digitorum manus vel perforatus lumbrical'is, Annuli-tendino-phalangiens, Palmi-phalangiens*. Four small, fleshy, thin, round, long, fusiform fasciuli, situate in the palm of the hand, and distinguished into first, second, third, and fourth, counting from without to within. They arise from the tendons of the flexor communis digitorum, and are inserted at the outer and posterior side of the superior extremity of the first phalanges of the last four fingers. These muscles bend the fingers on the metacarpus, and fix the tendons of the flexor digitorum communis.

LUMBRICALES PEDIS, *Planti-tendino-phalangiens, Planti-sous-phalangiens*, (Ch.) They are analogous to those of the hand in form, number, and arrangement. They increase the flexion of the toes, and draw them inwards.

LUMBRICUS, *Ascaris lumbricoides*—*l. Latius, Bothriocephalus latus, Tania solium*.

LUMBUS VENERIS, *Achillea millefolium*.

LUMEN, *Light, pupil*.

LUMIERE, *Light*.

LUNA, *Argentum, Moon*.

LUNA'RE OS, *Os semiluna're*. The second bone in the upper row of the carpus.

LUNA'RIA REDIVIVA, *Leuco'ium, Bulbonach, Satin, Honesty*. Said, by Ray, to be a warm diuretic.

LUNATIC, *Lunaticus*, from *Luna*, 'the moon.' That which is under the influence of the moon. *Moonstruck*. An epithet given to diseases, which are supposed to appear at certain phases of the moon; or to those who are affected by them. Usually, it is restricted to one labouring under lunacy or mental alienation.

LUNE, *Moon*.

LUNELLA, *Hypopyon*.

LUNES, *Menses*.

LUNETTES ORDINAIRES, *Spectacles*.

LUNG, Pulmo—*l. Cancer* of the, *Phthisis*, *Cancerous*—*l. Proof*, *Dicamasia pulmonum*—*l. Wort*, *Pulmonaria*—*l. Wort*, cow's, *Verbascum nigrum*—*l. Wort*, tree, *Lichen pulmonarius*.

LUNG, PERFORATING ABSCESS OF THE. A purulent collection, which forms exterior to the lung, and afterwards perforates its tissue, so that it is evacuated through the bronchial tubes.

LUPIA, *Encystis, Wen*.

LUPINUS. Under this term the *white lupin*, *Lupinus albus*, is meant in some pharmacopœias. The seeds, which were much eaten in the days of Pliny and of Galen, are now neglected. The meal is, however, occasionally used as an anthelmintic, and as a cataplasm.

LUPULINA, *Lu'pulin*. A substance which exists in the hop, and has been pointed out by Dr. Ives, of New York. It occurs in the form of small, shining, yellowish grains, which cover the base of the scales of the hop. It is pulverulent, and of an aromatic odour. When analyzed, it is found to contain resin, volatile oil in small quantity, and a bitter principle. It is aromatic and tonic, and—according to Dr. Ives—narcotic.

LUPUS, 'the wolf.' So named from its rapacity. *Ulcus Tuberculosum, Cancer lupus, Noli tangere*. Tubercular excrescences, with ragged, spreading ulcerations, chiefly about the alae nasi, where they destroy the skin, &c. for some depth. Sometimes they appear in the cheek circularly, or in the shape of a sort of ringworm, destroying the substance and leaving a deep and deformed cicatrix. The knife or caustic should be used to separate the sound from the morbid parts. Arsenic has been given internally with advantage.

LUPUS CANCROUS, *Cancer*—*l. Vorax, Herpes exedens*.

LUSCIOSITAS, *Myopia*.

LUSCIOUSUS, *Myops*.

LUS'CITAS, *Strabismus*. The term has also been given to all those cases of strabismus, in which the eye is fixed in its unnatural position.—Beer.

LUSCUS, *Borgne*.

LUT, *Lute*.

LUTE, *Lutum*, ('mud,') *Cæmentum*, (F.) *Lut*. A composition employed either for closing apertures in a pharmaceutical instrument, or for covering the surface of retorts, tubes, &c., which have to support a great degree of heat. Lutes are composed differently, according to the object to be accomplished. Commonly they are made of linseed meal and starch. The *fut lute* is formed of clay and drying oil. Sometimes, the white of egg and lime are used; and that which is employed for covering vessels, intended to be strongly heated, is made of clay, sifted sand, and water.

LUTEUS, *Yellow*.

LUTRON, *λουτρον*. A bath. Also, an ophthalmic medicine.—Galen.

LUX, *Light*.

LUXATION, *Eluxa'tion*, from *luxa're*, 'to put out of place.' *Disloc'ation, Olisthe'ma, Apoped'asis, Luxa'tio, Dislocu'tio, Ec'clisis, Strem'ma, Luxatu'ra, Ectop'ia, Ecpt'o'sis, Elap'sus, Lygis'mus, Emo'tio, Ec'stasis, Exarthre'ma, Exarthro'ma, Exarthre'ma luxa'tio, Exarthro'sis, Deloca'tio, Exarticula'tio*, (F.) *Luzation, Disloc'ation, Déboîtement*. A displacement of a part from its proper situation. A putting out of joint. A displacement of two or more bones, whose articular surfaces have lost, wholly or in part, their natural connexion; either owing to

external violence, (*accidental luxation*;) or to disease of some of the parts about the joint (*spontaneous luxation*.) Luxation is *complete*, when the bones have entirely lost their natural connexion; *incomplete*, when they partly preserve it; and *compound*, when a wound communicates with the luxated joint. The general indications of treatment, are:—1. To reduce the protruded bone to its original place. 2. To retain it *in situ*. 3. To obviate any attendant or consequent symptoms.

To reduce requires extension, counter-extension, and coaptation.

LUXEUIL, MINERAL WATERS OF. Saline waters, at the town of Luxeuil, at the foot of the Vosges, in the department of Haute Saône. Five springs are thermal, and two cold. They seem to contain carbonic acid, carbonates of iron and lime, and chloride of sodium; and are employed as aperient, tonic, and stimulant.

LYCANCHÉ, from *λυκος*, 'a wolf,' and *αγχο*, 'I strangle.' *Wolf quinsy*, *Wolf choak*;—as *Cynanche* means *Dog choak*. See *Lycoides*.

LYCANTHROPIA, from *λυκος*, 'a wolf,' and *ανθρωπος*, 'a man'; *Lyc' on*, *Ins' nia lupi' na*. A variety of melancholy, in which the person believes himself to be changed into a wolf, and imitates the voice and habits of that animal.

LYCAON, *Lycanthropia*.

LYCHNIS SYLVESTRIS, *Saponaria*.

LYCOIDES, *Lyc' des*, from *λυκος*, 'a wolf,' and *ειδος*, 'form.' *Lupo similis*. An epithet for a species of *cynanche*, absurdly attributed to excessive retention of sperm in its reservoirs, and its passage into the blood. (?)

LYCOPERDON, from *λυκος*, 'a wolf,' and *περδω*, 'I break wind.' *L. Bovis'ta*, *Crep'itus Lupi*, *Puff-ball*, *Bull Fists*, *Moll'ipuffs*, *Bovis'ta*, (F.) *Vesseloup*. The puff-ball dries into a very fine, light, brownish dust, which is sometimes used as a mechanical styptic to arrest hemorrhage.

LYCOPERDON TUBER, *Tuber*, *Truffle*, *Agriocastanum*, *Tribs*, *Tuber cibarium*, *T. Gulosorum*, *Tubera Terræ*, (F.) *Truffe*. A fleshy, firm body, unknown in its mode of reproduction, which is found under ground, especially in different parts of France, Italy, &c., and is much esteemed as an aliment. It seems to belong to the Champignons, and has a particular perfume. Aphrodisiac virtues have been ascribed to it.

LYCOPODIUM, (from *λυκος*, 'a wolf,' and *πους*, 'a foot.') *L. Clavatum*, *Cingula'ria*, *Muscus claudus*, *Club-moss*, *Wolf's-claw*. This is the largest of the European mosses. The dust, which fills the capsules of its spikes, is very inflammable, and hence has been called *Vegetable Sulphur*;—and, also, *For'na seu Pulvis seu Semen seu Sulphur Lycopodii*. It is used in France to roll pills and boluses in: and in Medicine, as a desiccative, in the excoriations to which infants are liable. It is collected chiefly in Switzerland and Germany for commerce.

LYCOPodium SEL'GO, *Muscus erectus*, *Upright Club-moss*, *Fir Club-moss*, *Upright Fir-moss*. The decoction of this plant acts violently as an emetic and purgative; and was formerly, on this account, used as an abortive. It is also employed to kill vermin.

LYCOPUS, *L. Virginicus*, *Bugleweed*. This

indigenous herb, *Sex. Syst.* *Diandria Monogynia*, *Nat. Ord.* *Labiata*, grows throughout the greater part of the United States. The whole herb is said to be slightly narcotic. It is given in infusion (*Lycop. ʒj; aq. fervent. Oj.*)

LYCOPUS VIRGINICUS, *Lycopus*.

LYCOREXIS, *Fames Lupina*.

LYCOSA TARENTULA. See *Tarantula*.

LYE, DYSPEPTIC, see *Fulgikali*—*l. Medical*, see *Fulgikali*.

LYGISMUS, *Luxation*.

LYGMUS, *Singultus*.

LYING-IN STATE, *Parturient state*.

LYMPH, *Lympha*, from *λυμη*, 'water,' by changing *υ* into *λ*. *White Blood*, *Lympha Nutritia*. A name given to the fluid, contained in the lymphatic vessels and thoracic duct of animals, which have been made to fast for 24 hours. According to Chevreul, the lymph of the dog contains water, fibrin, albumen, common salt, subcarbonate of soda, phosphates of lime and magnesia, and carbonate of lime. The properties and composition of lymph vary considerably, according to the part whence the lymphatic vessels obtain it. Generally, it is under the form of a transparent, slightly alkaline fluid, sometimes of a madder-red or yellowish colour,—of a spermatic odour, and saline taste; soluble in water,—the solution becoming turbid, when mixed with alcohol. When left to itself, it coagulates. The clot or solid portion becomes of a scarlet red, if put in contact with oxygen; and of a purple red, if placed in carbonic acid.

Like the blood, the lymph consists of a fluid in which the solid elements, the *lymph corpuscles* are suspended.

The lymph is probably the product of internal absorption in different parts of the body: it then flows along the lymphatic vessels, uniting with the chyle, and is poured with it into the veins; thus becoming one of the materials of the blood. According to others, the blood, when it reaches the arterial radicles, is divided into two portions,—the one red, which is carried to the heart,—the other serous or white, which is absorbed by the lymphatic vessels, and constitutes the lymph. By others, again, the lymphatics are considered to be the vessels of return for the white blood sent to certain tissues.

LYMPH CORPUSCLES, see *Lymph*—*l. Hearts*, *Lymphatic Hearts*.

LYMPHA MUCULENTA NARIUM, *Nasal mucus*—*l. Nutritia*, *Lymph*—*l. Pancreatis*, see *Pancreas*—*l. Plastica*. *Fibrin*.

LYMPHADENITIS: from *lympa*, 'lymph,' and *adenitis*, 'inflammation of a gland.' Inflammation of a lymphatic gland or ganglion.

LYMPHÆDUCTUS, *Lymphatic vessels*.

LYMPHANGEITIS, *Angiolenicitis*.

LYMPHANGIA, *Lymphatic vessels*.

LYMPHANGIOLOGY, from *Lymphangeon*, 'a lymphatic,' and *λογος*, 'a description.' A treatise on the lymphatics.

LYMPHATIC, *Lymphaticus*, *Rorifer*. That which relates to lymph.

LYMPHATIC HEARTS, *Lymph Hearts*. The frog and several other animals are provided with large receptacles for the lymph immediately underneath the skin, which exhibit distinct and regular pulsations like the sanguiferous heart. Their use appears to be—to propel the lymph.

LYMPHATIC SYSTEM is that particular system of organs, which is inservient to the formation and circulation of lymph. These organs are:

1. LYMPHATIC GANGLIONS or GLANDS. See Ganglions.

2. LYMPHATIC VESSELS, *Lymphæductus*, *Lymphangi'a*, *Lymphang'e'a*, *Venæ lymphaticæ*, *Ductus sero'si*, and *Vasa lymphatica*. These are very numerous. Arising at the surface of membranes and of the tissue of the organs, they carry into the veins the lymph from those parts. Lymphatic vessels are found in every part of the body. Wherever they are met with, however, they form two orders,—one *superficial*, the other *deep seated*;—the two orders frequently communicating with each other. Lymphatic vessels are generally smaller than arteries and veins. They are very thin, diaphanous, and cylindrical; but they present, here and there, more or less considerable dilatations, caused by valves in their interior. They are slightly tortuous in their course: their anastomoses are very numerous, and they often cross each other, forming successive plexuses. Of the arrangement of the extreme radicles we are ignorant. All the branches, before joining the principal trunks, pass through lymphatic ganglions, in which they are convoluted, or subdivide almost *ad infinitum*. They are formed of an outer cellular membrane and an internal coat, similar to that of the veins: of the latter, the valves are formed. All the lymphatics of the body ultimately discharge themselves into the subclavian and internal jugular veins. Two of these trunks are considerably larger than the others,—the *thoracic duct*, (q. v.) and the great trunk of the right side,—(F.) *La grand veine lymphatique droite*. The former receives the lymphatics of the abdomen, of the lower extremities, the left side of the thorax, the left upper extremity, and the corresponding side of the head and neck:—the latter receives those of the right upper extremity, and of the right side of the head, neck and thorax.

LYMPHE DE COTUGNO, Cotunnus, liquor of.

LYMPHEURYS'MA, from *lymphe*, 'lymph,' and *ευρυω*, 'I dilate.' Morbid dilatation of a lymphatic vessel.

LYMPHIZA'TION. A term used to signify effusion of coagulable lymph. Gross.

LYMPHOCH'E'ZIA, from *lymphe*, 'lymph,' and *ζεω*, 'I go to stool.' Serous diarrhœa (q. v.)

LYMPHO'SIS. The preparation or elaboration of lymph.

LYMPHOT'OMY, from *lymphe*, 'lymph,' and *τεμνω*, 'I cut.' Dissection of the lymphatics.

LYNCH'S EMBROCA'TION. An emol-

lient nostrum, formed of olive oil impregnated with *bergamot* and other essences, and coloured with *alkannet root*.

LYNGO'DES, from *λυγξ*, 'the hiccough,' *Febris lyngodes*. A species of fever, commonly intermittent, of which hiccough is a prominent symptom.

LYNN WAHOO, *Ulmus alata*.

LYNX, *Singultus*.

LYPEMANIA, *Melancholy*.

LYPOMA, *Lipoma*.

LYRA, *λύρα*, 'the lyre.' *Psalterium*, *Corpus Psalloi'des*, *Lyra Da'vidis*. The under surface of the posterior part of the body of the fornix is impressed with numerous transverse and oblique lines, which have been so called from some resemblance they bear to the ancient lyre.

LYRINGIUM, *Eryngium campestre*.

LYSIMA'CHIA NUMMULA'RIA, *Creeping Loose Strife*, *Money Wort*, *Nummula'ria*, *Hirundin'ria*, *Centimor'bia*. (F.) *Herbe aux écus*. This plant was formerly accounted vulnerary. It has been considered to possess antiscorbutic and astringent qualities, and has been used in leucorrhœa.

LYSIMACHIA PURPUREA, *Lythrum salicaria*.

LYSIS, *λυσις*, from *λυω*, 'I dissolve.' Solution, (q. v.); a common suffix; also, a name given to crises, which are operated insensibly; that is, gradually and without critical symptoms.

LYSSA CANINA, *Hydrophobia*.

LYSSODEC'TUS, from *λυσσα*, 'canine madness,' and *δεννω*, 'I bite.' *Hydrophobus*; *Cane rabido morsus*. One who has been bitten by a mad dog, or is actually labouring under hydrophobia.

LYTE'RIOS, *λυτηριος*, (from *λυω*, 'I dissolve,') 'solving.' An epithet given to those signs which announce the solution of a very violent disease.

LYTHRUM SALICA'RIA, *Lysim'chia purpurea*, *Salica'ria*:—the *Common or Purple Willow Herb*. The herb, root, and flowers possess a considerable degree of astringency, and are used, occasionally, in the cure of diarrhœa and dysentery, leucorrhœa, hæmoptysis, &c.

LYTTA VESICATORIA, *Cantharis*.

LYTTA RUPIES. A variety of *Lytta*, peculiar to Chili, which is more active as a vesicant than the *Cantharis*, or the *Lytta* next described.

LYTTA VITTA'TA, *Cantharis vittata*, *Pota'to Fly*. (F.) *Cantharide tuchette*. Four species of meloe that blister are found in the United States. The *Lytta vittata* feeds principally upon the potato plant, and, at the proper season of the year, may be collected in immense numbers. The potato fly resembles the cantharides in every property, and is fully equal to them.

M.

M. This letter signifies, in prescriptions, *manipulus*, 'a handful.' Also, *miscæ*, 'mix.' See Abbreviation.

MACAPATLI, *Smilax sarsaparilla*.

MACARO'NI. An alimentary paste, moulded of a cylindrical shape, and formed of rice or wheaten flour. It is eaten—when boiled—in soup, prepared with cheese, &c.

Also, a name formerly given to a pulverulent compound of sugar and glass of antimony, carried into France by the Italian monks, and employed at the hospital *La Charité*, in the treatment of painters' colic.

MACEDONISIUM, *Smyrnum olusatrum*.

MACERA'TION, *Macera'tio*, from *macero*, 'I soften by water.' An operation, which con-

sists in infusing, usually without heat, a solid substance in a liquid, so as to extract its virtues.

MACERONA, *Smyrnum olusatrum*.

MACHERA, Culter, Knife, Penis.

MACHERIDION, *Maclariion*.

MACHÆRION, *Machæris*, *Machærid'ion*, *Gladiolus*, a knife, (q. v.) An amputating knife. Rufus of Ephesus asserts, that the Aruspices gave this name to a part of the liver of animals.

MACHÆRIS, Knife.

MACHAONIA ARS, Medicine. The *Healing Art*:—so called after Machaon, the son of Æsculapius.

MACH'INAL, *Mechan'icus*. This epithet is added, especially by French writers, to the word *movement*, to express that the will takes no part in it.

MACHINE, *Mach'ina*, *Machinamen'tum*, *Mech'anè*, *Mechan'na*. A more or less compound instrument, used in physics and chymistry to put a body in motion, or to produce any action whatever. Physiologists sometimes, use it for the *animal body*;—as the *machine* or *animal machine*.

MACHLOSYPNE, Nymphomania.

MACHOIRE, Maxillary bone—*m. Diacranienne*, Maxillary bone, lower—*m. Syncranienne*, Maxillary bone, superior.

MACIES, Atrophy, Emaciation—*m. Infantum*, *Tabes mesenterica*.

MACRAUCHEN, from *μακρος*, 'long,' and *αυχρ*, 'the neck.' *Longo collo præditus*.—One who has a long neck.—Galen.

MACRE FLOTTANTE, *Trapa natans*.

MACRITUDO, Emaciation.

MACROBIOSIS, Longevity.

MACROBIOTIC, *Macrobiot'icus*, *longæ'tus*, from *μακρος*, 'great,' 'long,' and *βιος*, 'life.' That which lives a long time. The *macrobiotic art* is the art of living a long time.

MACROCEPHALUS, from *μακρος*, 'great,' 'long,' and *κεφαλή*, 'head.' *Qui magnum habet caput*, 'One who has a large head.' This epithet is given to children born with heads so large, that they seem to be hydrocephalic; but in which the unusual development is owing to a large size of the brain. Such are supposed to be more than ordinarily liable to convulsions. (?) The term has also been applied, by Hippocrates, to certain Asiatics who had long heads.

MACROGLOS'SUS, from *μακρος*, 'large,' and *γλωσσα*, 'tongue.' One who has a very large tongue. The condition is termed *macroglossia*.

MACRONOSIÆ, Chronic diseases.

MACROPHYSOCEPHALUS, from *μακρος*, 'long,' *φύσα*, 'air,' and *κεφαλή*, 'head.' A word used by Ambrose Paré to designate an augmentation of the head of the fœtus, produced by a sort of emphysema, which retards delivery.

MACROP'IPER, *Piper longum*.

MACROPNE'IA, from *μακρος*, 'long,' and *πνέει*, 'I breathe.' A long or slow respiration.

MACROP'NUS, *Macrop'noos*. One who breathes slowly:—a word met with in some authors.—Hippocr.

MACROR, Emaciation.

MACROS, Long.

MACROS'CELES, *Crura longa habens*; from *μακρος*, 'long,' and *οκέλος*, 'the leg.' One who has long legs.

MACROSIÆ, Chronic diseases.

MACROTRY'S RACEMOSA. See *Actæa racemosa*.

MAC'ULA. A spot. *Dyschræa*, *Celis*, (F.) *Tuche*. A permanent discoloration of some portion of the skin, often with a change of its texture. *Ephelis*, *Nævus*, *Spilus*, &c., belong to the Macule.

MACULA, Molecule—*m. Corneæ*, *Caligo*—*m. Corneæ arcuata*, *Gerotoxon*—*m. Germinativa*, see Molecule—*m. Hepatica*, *Chloasma materna*, *Nævus*—*m. Lutea retinae*, see *Foramen centrale*—*m. Matricis*, *Nævus*—*m. Solaris*, *Ephelides*.

MADAR, Mudar.

MADAROSIS, from *μαδος*, 'bald.' *Madaroma*, *Made'sis*, *Deplumatio*, *Milphæ*, *Milphosis*, *Ptilosis*, *Calvities*, (q. v.) Loss of the hair, particularly of the eyelashes.

MADDER, DYERS', Rubia.

MADEIRA, CLIMATE OF. This island is much frequented by pulmonary invalids, on account of the mildness and equability of its climate. Owing, indeed, to the mildness of the winter, and the coolness of the summer, together with the remarkable equality of the temperature during day and night, as well as throughout the year, it has been considered, that the climate of Madeira is the finest in the northern hemisphere. Sir James Clark is of opinion, that there is no place on the continent of Europe, with which he is acquainted, where the pulmonary invalid could reside with so much advantage, during the whole year, as in Madeira.

MADELEON, Bdelium.

MADESIS, Depilation, Madarosis.

MADISIS, Depilation.

MADISTERIUM, *Madiste'rion*, *Tricholabium*, *Volsella*. Tweezers. An instrument for extracting hairs from the skin.

MADNESS, CANINE, Hydrophobia—*m. Raving* or *furious*, *Mania*.

MADOR, Moisture.

MADREPORA OCULATA. See Coral.

MAEA, Midwife.

MAE'IA, Obstetrics.

MA'IA, Obstetrics.

MAEUTRIA, Midwife.

MAGDALIA, *Magdaleon*, *Magdalis*, from *μαγδαλία*, 'a cylinder.' Any medicine rolled into the form of a cylinder; and particularly plasters.

MAGEIRICE, Culinary art.

MAGGOT PIMPLE. See Acne.

MAGIS, *μαγίς*, 'a cake.' A sort of cake, composed of cloves of garlic and cheese beaten together.—Hippocr.

MAGISTERIUM SULPHURIS, Sulphur lotum—*m. Tartari purgans*, *Potasse acetas*.

MAG'ISTERY, *Magiste'rium*, from *magister*, 'a master.' Certain precipitates from saline solutions were formerly so called; as well as other medicines, the preparation of which was kept secret.

MAG'ISTRAL, *Magistra'lis*. Same etymon. *Extempora'neus*. Medicines are so called which are prepared extemporaneously. *Officinal*, are such as have been prepared for some time before they are prescribed.

MAGISTRANTIA, Imperatoria.

MAGMA, *μαγμα*, (F.) *Marc*. The thick residuum, obtained after expressing certain substances to extract the fluid parts from them. Also, the grounds which remain after treating a substance with water, alcohol, or any other menstruum.

MAGMA OF MARC OF OLIVES is the residuum after the greatest possible quantity of oil has been extracted from olives by making them ferment. It was formerly employed as a stimulant, under the form of a *bath*—to which the name *Bain de Marc* was given by the French.

MAGMA OF MARC OF GRAPES, *Brytia*, was once employed for the same purposes.

MAGNES, Magnet.

MAGNES ARSENICALIS, (*Sulphur, white arsenic, and common antimony*, of each equal parts. Mix by fusion.) It is corrosive. See Magnetic Plaster.

MAGNES EPILEPSIÆ, Hydrargyri sulphuretum rubrum.

MAGNÉSIA, *Abarnahas, Chambar*, from *magnes*, 'the magnet;' because it was supposed to have the power of attracting substances from the air.

MAGNESIA, *M. usta, M. calcinata, Calcinata Magnesia, Oxide of magnesium*. (F.) *Magnésie brûlée, Magnésie, M. Caustique*. This is obtained by exposing carbonate of magnesia to a strong heat. It is inodorous; taste very slightly bitter; in the form of a white, light, spongy, soft powder. S. g. 2.3; requiring 2000 times its weight of water for its solution. It is antacid, and laxative when it meets with acid in the stomach. Dose, gr. x to ʒj in water or milk.

MAGNESIA AERATA, *Magnesiæ carbonas—m. Alba, M. carbonas—m. Calcinata, M. usta—m. Edinburgensis, Magnesiæ carbonas*.

MAGNESIA EFFERVESCENS, *Moxon's, (Magnes. carb.; M. sulphat.; Sodæ bicarbon., Acid tartaric. aa partes æquales; to be pulverized, well dried, mixed, and enclosed in bottles hermetically sealed.*

MAGNESIA FLUID. Under this name a preparation is designated, which consists of a solution of carbonate of magnesia in carbonated water. It is also termed *carbonated magnesia water, aerated magnesia water, and condensed solution of magnesia*.

MAGNESIA, HENRY'S, *Magnesiæ carbonas—m. Mitis, Magnesiæ carbonas—m. Nigra, Manganese, black oxide of*.

MAGNESIA OPALINA. A name given by Léméry to a mixture of equal parts of *antimony, nitrate of potass, and muriate of soda*, (decrepitated.) It has emetic properties, but is not used.

MAGNESIA SALIS AMARI, *Magnesiæ carbonas—m. Salis Ebsdamiensis, Magnesiæ carbonas—m. Saturni, Antimonium—m. Solution of, condensed, M. fluid—m. Vitriolata, Magnesiæ sulphas—m. and Soda, sulphate of, see Soda, sulphate of—m. Usta, Magnesia*.

MAGNESIÆ CARBONAS, *M. Subcarbonas, Magnesia, (Dublin), M. aërata, M. carbonica, M. alba, Subcarbonate of Magnesia, Henry's Magnesia, M. Subcarbonica, M. Mitis, M. Edinburgensis, M. Salis Ebsdamiensis, M. Salis amari, Carbonas magnësicum, Lac terræ, Hypocarbonas magnësie, Terra amara, T. amara aërata, T. absorbens mineralis, T. Talco'sa oxyanthracodes. (F.) Sous-carbonate de Magnésie, Magnésie aërée, M. blanche, M. crayeuse, M. douce, M. effervescente, M. Moyenne, Poudre de Scintilli, P. de Valentini, P. du Comte de Palme. Prepared from sulphate of magnesia by subcarbonate of potass. It is inodorous; insipid; light; white; spongy; opaque; effervescing with*

acids; insoluble in water. Properties the same as the last. But the carbonic acid, when set free, sometimes causes unpleasant distention.

MAGNESIÆ HYPOCARBONAS, *M. carbonas—m. Subcarbonas, M. carbonas—m. Vitriolicum, Magnesiæ sulphas*.

MAGNESIÆ SULPHAS, *Sulphas Magnesiæ purificatus, Magnesia vitriolata, Sal catharticus amarus, Sal catharticum amarum, Sal amarus, S. Anglicanum, Sulphate of Magnesia, Sal Epsomensis, Sal catharticus Anglicanus, Sal Sedlicensis, Sal Ebsdamiense, S. Seydschutzen'se, Terra amara sulphurica, Vitriolicum Magnesiæ, Epsom Salt, Bitter purging Salt. (F.) Sel admirable de Léméry, Sel d'Egra. Generally obtained from sea water. Its taste is bitter and disagreeable. It is soluble in an equal quantity of water at 60°. It is purgative and diuretic. Dose, as a cathartic, ʒss to ʒij.*

MAGNÉSIE AÉRÉE, *Magnesiæ carbonas—m. Blanche, Magnesiæ carbonas—m. Brûlée, Magnesia usta—m. Caustique, Magnesia usta—m. Crayeuse, Magnesiæ carbonas—m. Douce, Magnesiæ carbonas—m. Effervescente, Magnesiæ carbonas—m. Moyenne, Magnesiæ carbonas*.

MAGNESIUM, OXIDE OF, *Magnesia usta*.

MAGNET, *Magnes, Lapis heracleus, L. Syderitis, L. nauticus, Magnitis*, so called from *Magnes*, its discoverer, or from *Magnesia*, whence it was obtained. (F.) *Aimant*. The magnet or loadstone. An amorphous, oxydulated ore of iron, which exerts an attraction on unmagnetized iron, and has the property of exhibiting poles; that is, of pointing by one of its extremities to the north. This ore, by constant or long rubbing, communicates its properties to iron; and thus artificial magnets are formed. Magnetic ore is found in many countries, and particularly in the island of Elba. The magnet is sometimes used to extract spicula of iron from the eye or from wounds. It has been employed as an antispasmodic; but acts only through the imagination. The powder has been given as a tonic. In *Pharmacy*, it is used to purify iron filings. It attracts the iron, and the impurities remain behind. It formerly entered, as an ingredient, into several plasters, to draw bullets and heads of arrows from the body—as the *Emplastrum divinum Nicolai*, the *Emplastrum nigrum of Augsburg*, the *Opodeldoch*, and *Attractionum of Paracelsus*, &c.

MAGNETIC, Magnet'icus. Same etymon. That which belongs or relates to magnetism;—mineral or animal

MAGNETIC FLUID. A name given to the imponderable fluid to which the magnet owes its virtues. By analogy, it is applied to a particular principle, supposed to be the source of organic actions; which affects, it is conceived, the nervous system principally, and is susceptible of being transmitted from one living body to another, by contact or simple approximation, and especially under the influence of fixed volition. See *Magnetism, Animal*.

MAGNETIC PLASTER. A plaster, at present, not used. It had for its base a mixture, called *Magnes arsenicalis*; formed of equal parts of antimony, sulphur, and arsenic melted together in a glass cucurbit. The name *Magnetic Plaster* was, likewise, given to such as contained powdered magnet.

MAGNETINUS, *Potassæ supertartaras impurus*.

MAGNETISM, ANIMAL, Mesmerism, Neurog'mia, Biog'mia, Biomagnetismus, Zomagnetismus, Exonerism, (proposed by Mr. H. Mayo,) *Tellurismus*. Properties attributed to the influence of a particular principle, which has been compared to that which characterizes the magnet. It is supposed to be transmitted from one person to another, and to impress peculiar modifications on organic action, especially on that of the nerves. The discussions, to which this strange belief has given rise, are by no means terminated. There is no evidence whatever of the existence of such a fluid. Highly impressible persons can be thrown into a kind of hysteric sleep and somnambulism, but farther than this, the efforts of the magnetizer cannot reach. It is a mode of action upon the nerves through the medium of the senses.

MAGNETIS, Magnet.

MAGNOC, Jatropha manihot.

MAGNOLIA GLAUCA, Small Magnolia, Magnolia, Swamp Sas'safra, Elk Bark, Indian Bark, White Laurel, Sweet Bay, Beaver Wood, White Bay, Cinchona of Virginia. The bark is possessed of tonic properties, resembling those of cascarilla, canella, &c. The same may be said of the *Magnolia tripetala* or *Umbrella tree*; the *M. acuminata* or *Cucumber tree*, and the *M. grandiflora*.

MAGNUM DEI DONUM, Cinchona.

MAGNUM, Os. The third bone of the lower row of the carpus; reckoning from the thumb. It is the largest bone of the carpus; and is, also, called *Os capitatum*. (F.) *Grand Os*.

MAGRUMS. A popular name in the state of New York for a singular convulsive affection, which resembles chorea. It rarely, however, occurs before the adult age; never ceases spontaneously, and, when fully developed, is devoid of any paroxysmal character.

MAHMOUDY, Convolvulus scammonia.

MAHOGAN FEBRIFUGE, Swietenia febrifuga.

MAIANTHEMUM, Convallaria maialis.

MAIDENHAIR, Adiantum capillus veneris—*m. Canada, Adiantum pedatum*—*m. Common, Asplenium trichomanoides*—*m. Golden, Polytichum*—*m. White, Asplenium ruta muraria*.

MAIEIA, Obstetrics.

MAIGREUR, Emaciation.

MAILLET, Mallet.

MAILLOT, Swathing clothes.

MAIN, Manus.

MAJORANA, Origanum majorana—*m. Syriaca, Teucrium marum*.

MAL D'AMOUR, Odontalgia—*m. des Ardents, see Ardent*—*m. d'Aventure, Paronychia*—*m. di Breno, Scherlievo*—*m. Caduc, Epilepsy*.

MAL DE CRIMÉE, (F.) Lèpre des Cosaques, Lepra Tau'rica. A variety of lepra in the Crimea.

MAL DE DENT, Odontalgia—*m. Dixin, Epilepsy*—*m. d'Enfant, Pains (Labour)*—*m. di Fiume, Scherlievo*—*m. Français, Syphilis*—*m. de Gorge, Cynanche*—*m. haut, Epilepsy*—*m. de Machoiré, Trismus*—*m. De Mer, Nausea marina*—*m. de Mère, Hysteria*—*m. de Misère, Pellagra*—*m. de Naples, Syphilis*—*m. petit, Epilepsy*—*m. Rouge de Cayenne, Elephantiasis of Cayenne*—*m. Saint Antoine, Erysipelas*—*m. Saint Jean, Epilepsy*—*m. Saint Main, Lepra, Psora*—*m. di Scherlievo, Scherlievo*—*m. de Siam, Fever, yellow*.

MAL DE SAN LAZARO, Cocobay. A leprous disease common in Columbia, S. America, and said to be cured by the Cuichunchulli.

MAL DEL SOLE, Pellagra—*m. de Terre, Epilepsy*—*m. à Tête, Cephalalgia*.

MALA, Gena—*m. Aurea, see Citrus aurantium*.

MALABATHRINUM. Ancient name of an ointment and a wine, into which the *malabathrum* entered.

MALABATHRUM, Cadeji-Indi. The leaves of a tree of the East Indies. These leaves entered into the theriac, mithridate, and other ancient electuaries. They are believed to be from a species of laurel—the *Laurus Cassia*; but, according to others, from the *Laurus Malabathrum*. The *Oleum Malabathri* is obtained from it.

MALACCÆ RADIX, Sagittarium alexipharmacum.

MALA'CIA, from μαλακία, 'softness' A depravation of taste, in which an almost universal loathing is combined with an exclusive longing for some particular article of food. If the patient desire substances that are not eatable or noxious, it constitutes *Pica, Pissos'sis, Pito'sis, Heterorexia, Cissa, Citto'sis, Depressed appetite, Citta, Lino'sis Pica, Allotriophagia, Pella'cia, Picacismus, Picatio*. (F.) *Envie*. These symptoms accompany several nervous affections,—those of females in particular. In pregnancy it is common; and is termed *Longing*.

MALACISMUS, Mollities.

MALACORIUM. See *Punica granatum*.

MALACOSAR'COS, from μαλακος, 'soft,' and σαρκ, 'flesh.' One of a soft constitution: *habitu corporis mollioris præditus*.—Galen.

MALACOSIS CEREBRI, Mollities cerebri—*m. Cordis, Cordiomalacia*—*m. Hepatis, Hepatomalacia*—*m. Uteri, Hysteromalacia*.

MALACOSTEON, Mollities ossium.

MALACTICA, Emollients.

MALACTICUM, Relaxant.

MALADE, Sick.

MALADIE, Disease—*m. Anglaise, Hypochondriasis*—*m. Bleue, Cyanopathy*—*m. de Bright, Kidney, Bright's disease of the*—*m. de Cruveilhier, see Brash, weaning*—*m. Glandulaire, Elephantiasis Arabica*—*m. Imaginaire, Hypochondriasis*—*m. Imaginaire, Hysteria*—*m. Noire, Melæna*—*m. du Pays, Nostalgia*—*m. Pédiculaire, Phtheiriasis*—*m. de Pott, Vertebral disease*—*m. Vénérienne, Syphilis*—*m. de Venus, Syphilis*.

MALADIES ANNUELLES, Annual diseases

—*m. Chroniques, Chronic diseases*—*m. Connées, Connate diseases*—*m. Dissimulées, Feigned diseases*—*m. Externes, External diseases*—*m. Feintes, Feigned diseases*—*m. Innées, Innate diseases*—*m. Nerveuses, Nervous diseases*—*m. Simulées, Feigned diseases*—*m. Supposées, Feigned diseases*—*m. Venteuses, Pneumatosis*.

MALADIF, Sickly.

MALADRERIE, Ladrerie.

MALADY, ENGLISH, Hypochondriasis.

MALÆ, OS, from malum, 'an apple,' so called from its roundness. *Os Jugale, Os Jugamentum, Os Gena, Zygoma, Os Zygomaticum*, (F.) *Os Malaire, Os Zygomaticum, Os de la pommette*. The cheek or malar bone. This bone is situated at the lateral and superior part of the face; and constitutes the zygomatic region of

region of the cheek. It is irregularly quadrilateral. Its outer surface is convex, covered by muscles and skin, and pierced with canals, called *malar*, through which vessels and nerves pass. Its upper surface is concave, and forms part of the orbit. Its posterior surface is concave, and enters into the composition of the temporal fossa. This bone is thick and cellular. It is articulated with the frontal, temporal, sphenoid, and superior maxillary bones, and is developed by a single point of ossification.

The part of the face rendered prominent by this bone, the French call *Pommelte*.

MALAG'MA, from *μαλασσω*, 'I soften.' An emollient cataplasm, and, in general, every local application which enjoys the property of softening organic tissues.

MALAISE, Indisposition.

MALANDRIA. A species of lepra or elephantiasis.—Marcellus Empiricus.

MALANDRIO'SUS, *Leprous*. Affected with a species of lepra.

MALAR PROCESS, Zygomatic process.

MALARIA, Miasm.

MALARIOUS, *Malarial*. Owing to, or connected with Malaria,—as a *malarious soil*, *malarious disease*, &c.

To **MAL'AXATE**. *Mollire*, *Subigere*, *Malacissare*, (F.) *Malaxer*, from *μαλασσω*, 'I soften.' To produce the softening of drugs, by kneading them.

MALAZISSA'TUS. One in whom the testicles have not descended. It has, also, been used synonymously with *emascu'tus*, and *mullera'tus*.—Castelli.

MALE. *Mas'culus*. Of the sex that begets young. Not female. What belongs to the male sex; as the *male organs of generation*.

MALE, Axilla—m. Organs, Penis.

MALIASMOS, *Malis*.

MALICHORIUM. See *Punica granatum*.

MALICORIUM. See *Punica granatum*.

MALIG'NANT, *Malignus*, (F.) *Malin*. A term applied to any disease whose symptoms are so aggravated as to threaten the destruction of the patient. A disease of a very serious character, although it may be mild in appearance;—*Morbus malignus*.

MALIN, Malignant.

MALING'ERER. A simulator of disease, is so termed in the British military service.

MALIS, *Malias'mos*, *Coc'ytia*, *Cuta'neous vermination*. The cuticle or skin infested with animalcules,—*Phthiri'asis*, *Parasiti's mus super-ficiæ*. In Persia, this affection is produced by the Guinea Worm; in South America, by the Chigre; and in Europe, occasionally by the Louse. See *Phtheiriasis*.

MALIS DRACUNCULUS, *Dracunculus*—m. Gordii, *Dracunculus*—m. *Pediculi*, *Phtheiriasis*.

MALLE'OLAR, *Malleola'ris*, from *malleolus*, 'the ankle.' Belonging or relating to the ankles.

MALLEOLAR ARTERIES are two branches furnished by the *anterior tibial* about the instep; the one—the *internal*—passes transversely behind the tendon of the *tibialis anticus* to be distributed in the vicinity of the *malleolus internus*;—the other—the *external*—glides behind the tendons of the *extensor communis digitorum pedis* and the *peroneus brevis*, and sends its branches to the parts which surround the outer ankle, as well as to the outer region of the tarsus.

MALLE'OLUS. Diminutive of *mal'leus*, 'a mallet, (q. v.) or hammer.' *Rasceta*, *Rasteta*, *Sphyra*, *Talus*, *Dia'ebos*; the *Ankle*. (F.) *Malleole*, *Chevillè du Pied*. The two projections formed by the bones of the leg at their inferior part. The *inner* belongs to the tibia; the *outer* to the fibula. The ankles afford attachment to ligaments, and each has a sort of gutter, in which certain tendons slide. See *Malleus*.

MALLET, *Malleolus*, (F.) *Maillet*. A kind of hammer, used, with a gouge, for removing or cutting bones, in certain surgical and anatomical operations.

MAL'LEUS, *Malleolus*, *Ossic'ulum Malleolo-assinila'tum*, (F.) *Marteau*. The longest and outermost of the four small bones of the ear. It is situate at the outer part of the tympanum, and is united to the *membrana tympani*. It has, 1. An ovoid head, which is articulated, behind, with the *incus*, and is supported by a narrow part called the neck: this has, anteriorly, a *long apophysis*, which is engaged in the glenoid fissure, and is called the *Apophysis of Rau*, and *Processus grac'ilis*. It affords attachment to the *anterior mallei* muscle. 2. A *handle*, which forms an obtuse angle with the neck, and corresponds to the membrane of the tympanum, which it seems to draw inwards. It is furnished at its upper extremity, with a process—the *processus brevis*, to which the *internus mallei* is attached. This bone is developed by a single point of ossification.

MALLEUS, SLENDER PROCESS OF THE, *Grêlè apophyse du marteau*.

MALLOW, COMMON, *Malva*—m. Compound decoction of, *Decoctum malvæ compositum*.

MALO DI SCARLIEVO, *Scherlievo*.

MALOG'RANATUM, *Punica granatum*.

MALPIGHI, *ACINI OF*, *Corpora Malpighiana*.

MALPIG'HIA MOUREL'LA, (F.) *Mourelil-lier*, *Simaroubia faux*. The bark of this shrub—a native of Cayenne—is reputed to be febrifuge, and useful in diarrhœa.

MALPIGHIAN BODIES, *Corpora Malpighiana*.

MALT, Sax. *mealt*, Dutch *mout*, Teut. *malt*; from *μαλαττω*, 'I soften,' *Maltum*, *Bralsium*. (F.) *Dreche*. Barley made to germinate, for the purpose of forming beer. It has been recommended in medicine, as antiscorbutic, antiscrofulous, &c.

MALT SPIRIT. A spirit distilled from malt. It is the basis of most of the spirituous cordials.

MALTA, CLIMATE OF. The climate of Malta is pretty equable, the range of temperature in the twenty-four hours, being rarely more than 6°. The air is almost always dry and clear. The most disagreeable wind is the Sirocco, which is the source of more or less suffering to the pulmonary invalid. The winter climate is favourable. Dr. Liddell thinks that no place he has seen in the south of Europe can compete with Malta, for a mild, dry, bracing air in November, December, and part of January; and during the other winter and spring months, he thinks it is equal to any of them.

MALTHA, *Malthè*, from *μαλαττω*, 'I soften.' Wax, particularly a soft wax.

MALTHACTICA. Emollients.

MALUM CANUM. See *Pyrus cydonia*—

m. Coense, Averrhoa carambola—m. Cotoneum, see *Pyrus cydonia*—m. Hypochondriacum, Hypochondriasis—m. Hystericum, Hysteria—m. Insanum, see *Solanum melongena*—m. Ischiadicum, Neuralgia femoro-poplitea—m. Lazari, Elephantiasis.

MALUM MORTUUM. A species of lepra, in which the affected portions of skin seem to be struck with death.

MALUM PILARE, Trichosis—m. Pottii, Vertebral Disease—m. Venereum, Syphilis.

MALUS AURANTIA MAJOR, *Citrus aurantium*.

MALUS INDICA, *Bilumbi* biting-bing of Bontius. The juice of this East India tree is cooling, and is drunk as a cure for fevers. The leaves, boiled and made into a cataplasm with rice, are famed in all sorts of tumours. The juice, mixed with arrack, is drunk for the cure of diarrhoea. The ripe fruit is eaten as a delicacy; and the unripe is made into a pickle for the use of the table.

MALUS LIMONIA ACIDA, see *Citrus medica*—m. Medica, see *Citrus medica*.

MALVA, *Malva sylvestris*, *M. vulgaris*, Common Mallow, (F.) *Mauve saurage*. The leaves and flowers are chiefly used in fomentations, cataplasms, and emollient enemata. Its properties are demulcent.

Malva rotundifolia has like virtues; as well as the other varieties.

MALVA VISCUM, Althæa.

MALVERN, WATERS OF. The village of Great Malvern, in Worcestershire, England, has for many years been celebrated for a spring of remarkable purity, which has acquired the name of the *Holy-well*. It is a carbonated water; containing carbonates of soda and iron, sulphate of soda, and chloride of sodium, and is chiefly used externally, in cutaneous affections.

MAMA-PIAN. An ulcer of a bad aspect, which is the commencement of the pian; and which, after having destroyed the flesh, extends to the bones. It is also called the *Mother of Pians*;—*La mère des pians*.

MAMEI, *Mamoe*, *Momin* or *Toddy Tree*. From incisions made in the branches of this West Indian tree, a copious discharge of pellucid liquor occurs, which is called *momin* or *toddy wine*. It is very diuretic, and is esteemed to be a good antilithic and lithontriptic.

MAMELLE, Mamma.

MAMELON, Nipple.

MAMELONNÉ, Mammlated.

MAMELONS DU REIN, Papillæ of the kidney.

MAMILLA, Nipple.

MAMILLARY, *Mamilla'ris*, from *Mamilla*, 'a small breast, a nipple.'

MAMILLARY EX'INENCE is a name given, 1. To more or less marked prominences on the inner surface of the bones of the cranium, which correspond to the anfractuosities of the cranium. 2. To white, round, medullary tubercles, of the size of a pea, situate at the base of the brain, behind the gray substance from which the *Tige pituitaire*, of the French anatomists, arises. These *Mamillary Tubercles*, *Bulbes de la route à trois piliers*, *Corpora albican'tia*, *C. Candican'tia*, *Willis's Glands*, *Tubercles pisiformes*, (Ch.) *Eminentie candican'tes*, *Priorum crurum for'nicis bulbi*, are united to each other

by a small grayish band, which corresponds with the third ventricle. They receive the anterior prolongations of the fornix. Some ancient anatomists, taking the nervous trunks, to which Willis first gave the name *olfactory nerves*, for simple appendages of the brain, called them, on account of their shape, *Caruncule mamillares*. Vesalius, Fallopius, Columbus, and several others, termed them *Processus mamillares cerebri ad naves*.

MAMMA, from *mama*, one of the earliest cries of the infant, ascribed to a desire for food. *Masthos*, *Mazos*, *Thele*, *Tithos*, *Ruma*. The female breast. (*Mamilla* being the male breast,) (F.) *Mamelle*. A glandular organ, proper to a class of animals—the *mammalia*—and intended for the secretion of milk. The *mammæ* exist in both sexes, but they acquire a much greater size in the female; especially during pregnancy and lactation. In women, before the age of puberty, the breasts are but little developed. At this period, however, towards the central part of each breast, the skin suddenly changes colour, and assumes a rosy tint in young females. It is of a reddish brown in women, who have suckled several children. This circle has a rugous appearance, owing to the presence of sebaceous glands, and is called *Areola* or *Aureola*. These glands furnish an unctuous fluid for defending the nipple from the action of the saliva of the sucking infant. In the midst of the aureola is the nipple, a conoidal eminence, of a rosy tint, susceptible of erection, and at the surface of which the galactophorous ducts open. Besides the skin, covering them, the breasts are, also, composed of a layer of fatty cellular tissue, more or less thick; of a large gland; excretory ducts; vessels, nerves, &c. See *Mammary*.

The breasts are called the *bosom*, (F.) *Sein*.

MAMMARY, *Mamma'rius*, from *mamma*, 'the breast.' Relating to the breasts.

MAMMARY ABSCESS, *Mastodynia apostematosa*.

MAMMARY ARTERIES are three in number. They are distinguished into—1. The *Internal Mammary*, *Arteria sternal'is*, *A. Sous-sternal* (Ch.), *Internal thorac'ic*. It arises from the subclavian and descends obliquely inwards, from its origin to the cartilage of the third rib. Below the diaphragm it divides into two branches: the one *external*, the other *internal*. From its origin until its bifurcation, it gives branches to the muscles and glands of the neck, to the thymus, mediastinum, pericardium, and œsophagus. In each intercostal space, it gives off *internal* and *external musculo-cutaneous* branches, and also, on each side, the *superior diaphragmatic*. Its two ultimate branches are distributed on the parietes of the abdomen, and anastomose with the external mammary, intercostal, lumbar, circumflexa ilii, and epigastric arteries. 2. The *External Mammary Arteries* are two in number, and are distinguished into *superior* and *inferior*. The *superior external mammary*, *First of the thoracics* (Ch.), *Superior external thorac'ic*, *Superior thorac'ic*, is furnished by the axillary artery. It descends obliquely forwards between the pectoralis major and pectoralis minor, to which it is distributed by a considerable number of branches. The *inferior external mammary*, the *second of the thoracics* (Ch.), *Long or inferior thorac'ic*, arises from the axillary artery,

a little below the preceding. It descends vertically over the lateral part of the thorax; curves, afterwards, inwards; becomes subcutaneous and divides into a number of branches, which surround the breast. It gives branches to the pectoralis major, serratus major anticus, the intercostal muscles, the glands of the axilla and the integuments of the breast.

MAMMARY GLAND is the secretory organ of the milk. It is situate in the substance of the breast, to which it gives shape and size. The tissue of this gland results from the assemblage of lobes of different size, united intimately by a dense cellular tissue. Each of them is composed of several lobules, formed of round granulations, of a rosy white colour and of the size of a poppy seed. The glandular grains give rise to the radicles of the excretory canals of the mamma, which are called *galactophorous* or *lactiferous*. These excretory vessels unite in ramusculi, rami, and in trunks of greater or less size; collect towards the centre of the gland; are tortuous, very extensible, and semi-transparent. All terminate in sinuses, situate near the base of the nipple, and which are commonly from 15 to 18 in number. These sinuses are very short, conical, and united by cellular tissue. From their summits, a fasciculus of new ducts sets out, which occupy the centre of the nipple and open separately at its surface. The arteries of the mammary gland come from the thoracic, axillary, intercostal, and internal mammary. The veins accompany the arteries; the nerves are furnished by the intercostals and brachial plexus; the lymphatic vessels are very numerous and form two layers. They communicate with those of the thorax, and pass into the axillary ganglions.

MAMMARY SARCOMA, *Mastoid sarcoma* of Abernethy, *Emphyma sarcoma mammae* of Tumour, of the colour and texture of the mammary gland; dense and whitish; sometimes softer and brownish; often producing, on excitation, a malignant ulcer with indurated edges. Found in various parts of the body and limbs.

MAMMARY VEINS follow the same course as the arteries, and have received the same denominations. The *internal mammary vein*, of the right side, opens into the superior cava; that of the left, into the corresponding subclavian vein. The *external mammary veins* open into the axillary vein.

MAMMEA AMERICANA. The systematic name of the tree on which the *mammea* fruit grows. This fruit has a delightful flavour when ripe; and is much cultivated in Jamaica, where it is generally sold in the markets as one of the best fruits of the island.

MAMMELLA, Nipple.

MAMMIFORMIS, Mastoid.

MAMMILLA, Mamma (male.) Nipple.

MAMMILLARIS, Mastoid.

MAMMILLATED, (F.) *Mamelonné*, from *mamma*, 'the female breast.' That which has mamminiform projections on its surface.

MAMMILLATED LIVER, Cirronosis.

MAMOE, Mamei.

MANCHE D'HIPPOCRATE, *Chausse*.

MANCURANA, *Origanum*.

MANDIBULA, Maxillary bone.

MANDRAGORA, *Atropa mandragora*.

MANDRAGORITES, from *μανδραγορα*,

the *Atropa mandragora* or mandrake. Wine, in which the roots of mandrake have been infused.

MANDRAKE, *Atropa mandragora*, *Podophyllum peltatum*.

MANDUCATIO, Mastication.

MANDUCATORY NERVE. See *Trigeminus*.

MANGANESE, BLACK OXIDE OF, *Tetroxide of manganese*, *Magnesia nigra*, *Manganisum vitrarium*, *M. oxydatum nativum seu nigrum*, *Manganisum ochraceum nigrum*, *M. oxydatum nativum*, *Manganum oxydatum nativum*, *Molybdaenum magnesi*, *Oxides manganis nativa*, *Peroxydum manganis nigrum nativum*, *Superoxydum manganicum*. This oxide is not much used in medicine. It has been advised to dust the affected parts, in *tinea capitis*, with the powder.

MANGANESE, TETROXIDE OF, *M. black oxide of*.

MANGANESII PEROXYDUM NIGRUM NATIVUM, *Manganese, black oxide of*.

MANGANESIUM OCHRACEUM NIGRUM, *Manganese, black oxide of*—*m. Oxydatum nativum seu nigrum*, *Manganese, black oxide of*—*in. Vitrarium*, *Manganese, black oxide of*.

MANGANI OXIDES NATIVA, *Manganese, black oxide of*.

MANGANICUM SUPEROXYDUM, *Manganese, black oxide of*.

MANGANUM OXYDATUM NATIVUM, *Manganese, black oxide of*.

MANGIFERA INDICA. The *Mango tree*.

(F.) *Manguier*. A tree, cultivated over Asia and in South America. Mangos, when ripe, are juicy; of a good flavour; and so fragrant as to perfume the air to a considerable distance. They are eaten, either raw or preserved with sugar. From the expressed juice a wine is prepared; and the remainder of the kernel can be reduced to an excellent flour for bread.

MANGO TREE, *Mangifera Indica*.

MANGOSTAN, *Garcinia mangostana*.

MANGOSTANA, *Garcinia mangostana*.

MANGOUSTAN, *Garcinia mangostana*.

MANGUIER, *Mangifera Indica*.

MANIA, *Furor mania*, (q. v.) *Insanitia*, *Delirium maniacum*, *Ecphrophia mania*, *Delirium mania*, *D. furiosum*, *Mania univ ersalis*, *Vesania mania*, *Raving or furious madness*; from *μανωμαι*, 'I am furious.' With some, it means *insanity*. Disorder of the intellect, in which there is erroneous judgment or hallucination, which impels to acts of fury. If the raving be not directed to a single object, it is mania properly so called; if to one object, it constitutes *monomania*. This term is, however, usually given to melancholy. Mania attacks adults chiefly; and women more frequently than men. The prognosis is unfavourable. About one-third never recover; and they who do are apt to relapse. Separation is one of the most effective means of treatment, with attention to the corporeal condition and every thing that can add to the mental comfort of the patient; and turn his thoughts away from the subjects of his delusion. In the violence of the paroxysms, recourse must be had to the straight waistcoat, the shower bath, &c. Separation should be continued for some weeks during convalescence, with the view of preventing a relapse.

MANIA EPILEPTICA, see Epilepsy—*m. Lactea*, *M. puerperal*—*m. Melancholica*, Melancholy—*m. a Pathemate*, Empathema—*m. a Potù*, Delirium tremens—*m. a Temulentia*, Delirium tremens—*m. Pellagria*, Pellagra.

MANIA PUERPERAL, *Ma'nia puerpera'rum acuta*, *M. lac'tea*. Mania which supervenes in the childbed state.

MANIA PUERPERARUM ACUTA, *M. puerperal*—*m. sine Delirio*, Pathomania.

MANIACUS, Maniodes.

MANICA HIPPOCRATIS, *Chausse*.

MANIE SANS DÉLIRE, Empathema.

MANIQUETTA, *Amomum grana Paradisi*.

MANIBAR, *Jatropha manihot*.

MANILUVIUM, *Manuluvium*, from *manus*, 'the hand,' and *lavo*, 'I wash.' A bath for the hands. It may be rendered stimulating by means of muriatic acid, mustard, &c.

MANIOC, *Jatropha manihot*.

MANIO'DES, *Mani'acus*. One labouring under mania: a maniac.

MANIPULA'TION, from *manus*, 'a hand.' Mode of working in the arts.

MANIP'ULUS, (F.) *Poignée*. The quantity of a substance capable of filling the hand. A handful. See Fasciculus.

MAN-MIDWIFE, Accoucheur.

MANNA, see *Fraxinus ornus*—*m. Briançon*, see *Pinus Larix*—*m. Calabrina*, see *Fraxinus ornus*—*m. Metallorum*, *Hydrargyri submurias*.

MANNACROUP, Semolina.

MANNEQUIN, Fantom.

MANNITE, see *Fraxinus ornus*.

MANŒUVRE (F.), from *main*, 'the hand,' and *œuvre*, 'work.' *Opera'tio chirurg'ica vel obstet'rica*. The practice of surgical or obstetrical operations on the dead body or phantom.

MANSORIUS, Buccinator.

MANSTUPRATIO, Masturbation.

MANTIA, *Mantica*, *Mantiee*, in English, *mancy*; a common suffix, denoting 'divination.'

MANTILE, Bandage (body.)

MANTLE, *Panniculus carnosus*.

MANU'BRIUM, from *manus*, 'a hand.' The handle of any thing:—as *manu'brium mall'ei*, 'the handle of the malleus.'

MANUBRIUM, *Chasse*—*m. Manûs*, Radius.

MANULUVIUM, Bath, hand, Maniluvium.

MANUS, *Cheir*, (F.) *Main*. The hand. The part which terminates the upper extremity in man, and which is inservient to prehension and touch. It extends from the fold of the wrist to the extremity of the fingers. The hand is sustained by a bony skeleton, composed of a number of pieces, movable on each other; of muscles, tendons, cartilages, ligaments, vessels, nerves, &c. It is divided into three parts—the *carpus* or wrist, the *metacarpus*, and *fingers*. Its concave surface is called the *palm*; the convex surface the *back of the hand*. The facility of being able to oppose the thumb to the fingers in order to seize objects forms one of the distinctive characters of the human hand.

MANUS CHRISTI PERLA'TA. A name anciently given to troches, prepared of pearls and sugar of roses. They were called *Manus Christi simplices*, when pearls were not employed.

MANUS DEI. An ancient plaster, prepared of *roax*, *myrrh*, *frankincense*, *mustich*, *Gum ammoniac*, *Gallinum oil*, &c. See Opium.

MANUS HEPATIS, *Porta vena*—*m. Jecoria*,

Porta vena—*m. Parva major adjutrix*, see *Digitus*.

MANUSTUPRATIO, Masturbation.

MANYPIES, *Omasum*.

MAPLE, *Acer saccharinum*.

MARJIS, Marsh.

MARANTA ARUNDINACEA, Arrow root.

MARANTA GALANGA, *Amomum galangn*, *Galanga*. The smaller *galangul*. Two kinds of galangal are mentioned in the pharmacopœias;—the greater, obtained from the *Kæmpferia galanga*, and the smaller, from the root of the *Maranta galanga*. The dried root is brought from China, in pieces, from one to two inches in length, but scarcely half as thick; branched; full of knots and joints, with several circular rings, of a reddish brown colour, on the outside, and brownish within. It was formerly much used as a warm stomachic bitter; and generally ordered in bitter infusions.

MARASCHINO. See Spirit.

MARASMUS, Atrophy—*m. Phthisis*, *Phthisis pulmonalis*—*m. Tabes*, *Tabes*—*m. Tabes dorsalis*, *Tabes dorsalis*.

MARATHRI'TES, from *μαραθρον*, 'fennel.' Wine, impregnated with fennel.

MARATHROPHYLLUM, *Peucedanum*.

MARATHRUM, *Anethum*—*m. Sylvestre*, *Peucedanum*.

MARBLE, *Marmor*.

MARBRE, *Marmor*.

MARC, *Magna*.

MARCASITA, *Bismuth*—*m. Alba*, *Bismuth*, subnitrate of—*m. Plumbea*, *Antimonium*.

MARCASITÆ MAGISTERIUM, *Bismuth*, subnitrate of.

MARCHAN'TIA POLYMORPHA, *Hepatica font'na*, *Lichen stellatum*, *Jecord'ria*, *Liv'erwort*. (F.) *Hépatique des fontaines*. This plant is mildly pungent and bitter. It is recommended as aperient, resolvent, and antiscorbutic; and is used in diseased liver, &c.

MARCHE, *LA*, Walking.

MARCHIONIS PULVIS, *Powder of the Marquis*. A powder, formerly considered to be anti-epileptic; and composed of *Mule p'ony root*, *Mistletoe*, *Teory shavings*, *Horn of the hoof of the stag*, *Spodium*, *Tooth of the monodon*, *coral*, &c.

MARCORES, Atrophy, Emaciation.

MARE'S TAIL, *Hippuris vulgaris*.

MARGA CAN'DIDA, *Lac'lunæ*. An ancient name for a variety of spongy, white, friable marl, which was employed as an astringent and refrigerant.

MARGARETIZZA, Scherlievo.

MARGARITA, Pearl.

MARGARON, Pearl.

MARGINI-SUS-SCAPULO-TROCHI-TERIEN, *Teres minor*.

MARGO, *Bord*.

MARGUÉRITE, *PETITE*, *Bellis*—*m. des Prés grande*, *Chrysanthemum leucanthemum*.

MARIENBAD, MINERAL WATERS OF. Celebrated springs in Bohemia. The Kreuzbrunn contains sulphate of soda, carbonate of iron, and carbonic acid.

MARIGOLD, *DIAMOND FIG*, *Mesembryanthemum crystallinum*—*m. Garden*, *Calendula officinalis*—*m. Single*, *Calendula officinalis*—*m. wild*, *Calendula arvensis*.

MARIS, *uag'z*. Ancient name of a measure, containing 83 pints and 4 ounces.

MARISCA, Ficus, Hæmorrhoids.

MARJOLAINE, Origanum majorana.

MARJORAM, COMMON, Origanum—m. wild, Origanum—m. sweet, Origanum majorana.

MARJORANA, Origanum majorana—m. Mancurana, Origanum.

MARMALADE, Marmelade.

MARMARYGODES, 'brilliant.' An epithet, joined particularly to the word *οφθαλμος*; a brilliant eye, a flashing eye.

MARMELADE, *Marmela'da*, *Marmalade*, *Miza*. Parts of vegetables, confectioned with sugar, and reduced to a pulaceous consistence.

MARMELADE OF APRICOTS. A marmelade, prepared with two parts of ripe apricots deprived of their stones, and one part of white sugar.

MARMELADE OF FERNEL, M. of Tronchin.

MARMELADE OF TRONCHIN, or OF FERNEL. A kind of thick looch, of an agreeable taste, prepared with two ounces of oil of sweet almonds, as much syrup of violets, manna in tears, very fresh pulp of cassia, 16 grains of gum tragacanth, and two drachms of orange flower water. It is used as a laxative, demulcent, and pectoral.

MARMOR. Marble, *Calcis Carbonas durus*, (F.) *Marbre*. White granular carbonate of lime. Used in pharmacy for the preparation of a pure lime, and the disengagement of carbonic acid.

MARMORYGE HIPPOCRATIS, Hemiopia.

MARROUTE, Anthemis cotula.

MAR'RIOTT, DRY VOMIT OF. This once celebrated emetic, called *dry*, from its being exhibited without drink, consisted of equal portions of tartarized antimony and sulphate of copper.

MARRONIER D'INDE, *Æsculus Hippocastanum*.

MARROW, *Myelos*, *Medul'la*, *Med'ullary*, *Juice*, *Αυξιν'gia de Mum'ia*, Sax. *μερζ*, (F.) *Moëlle*, *Suc médullaire*. The oily, inflammable, whitish or yellowish juice, which fills the medullary canal of the long bones, the cancellated structure at the extremities of those bones, the diploe of flat bones, and the interior of short bones. The marrow is furnished by the exhalation of the medullary membrane. It is fluid during life, and appears under the form of small points or brilliant grains, after death. It is enveloped in the medullary membrane.

MARROW, SPINAL, *Medulla spinalis*—m. Vertebral, *Medulla spinalis*.

MARRUBE BLANC, *Marrubium*—m. *Noir*, *Ballota foetida*.

MARRUBIUM, *Marrubium vulg'rè*, *M. album*, *Horehound*, *Præ'sium*, *Phrasum*. (F.) *Marrube blanc*. The leaves have a moderately strong, aromatic smell; and a very bitter, penetrating, diffusive, and durable taste. It has often been given in coughs and asthmas, united with sugar. Dose, \mathfrak{z} ss to $\mathfrak{z}\mathfrak{j}$, in infusion; dose, of extract, gr. x. to \mathfrak{z} ss.

FORD'S BALSAM OF HOREHOUND is made as follows:—horehound, liquorice root, $\mathfrak{a}\mathfrak{a}$ $\mathfrak{li}\mathfrak{ij}$ and $\mathfrak{z}\mathfrak{vi}\mathfrak{ij}$; water, q. s. to strain, $\mathfrak{lv}\mathfrak{j}$. Infuse. To the strained liquor add:—proof spirit or brandy, $\mathfrak{lb}\mathfrak{l}\mathfrak{z}$; camphor, $\mathfrak{z}\mathfrak{j}$ and $\mathfrak{z}\mathfrak{ij}$; opium and benjamin, $\mathfrak{a}\mathfrak{a}$ $\mathfrak{z}\mathfrak{j}$; dried squills, $\mathfrak{z}\mathfrak{ij}$; oil of aniseed, $\mathfrak{z}\mathfrak{j}$; honey, $\mathfrak{li}\mathfrak{ij}$ and $\mathfrak{z}\mathfrak{vi}\mathfrak{ij}$.—Gray. It is pectoral.

MARRUBIUM, *Leonurus cardiaca*—m. *Nigrum*, *Ballota foetida*.

MARS, Ferrum—m. *Solubilis*, Ferrum tartarizatum.

MARSEILLES, (CLIMATE OF.) The remarks made upon the climate of Montpellier ap-

ply even in greater force to that of Marseilles. It possesses all the objectionable qualities of the climate of south-eastern France.

MARSH, *Limnè*, *Helos*, *Palus*, Sax. *μερρε*, (F.) *Marais*. Marshy districts give off emanations, which are the fruitful source of disease and the cause of great insalubrity in many countries. The chief disease, occasioned by the malaria or miasm, (q. v.) is intermittent fever. Hence it becomes important to drain such regions, if practicable. Marshy countries are, however, not so liable to phthisis pulmonalis, and it has been found, that where intermittents have been got rid of by draining, consumption has, at times, become frequent. The most unhealthy periods for residence in a marshy district are during the existence of the summer and autumnal heats: at which times the water becomes evaporated, and the marshy bottom is more or less exposed to the sun's rays. This postulatam seems necessary for the production of the miasmata: for whilst the marsh is well covered with water, no miasm is given off.

MARSH POISON, Miasm (marsh.)

MARSHMALLOW, *Althæa*.

MARSUM, *Mar'sium*, *Mar'sicum*. An ancient wine of Marsia, in Italy, which was used as an astringent in certain diseases of the mouth.

MARSUPIALIS, *Ischio-trochanterianus*, *Obturator internus*.

MARSU'PION, *Marsyp'ion*, *Marsip'pon*, *Marsu'pium*, *Sac'culus*. A sac or bag, with which any part is fomented. Also, the abdominal pouch in the Kangaroo, Opossum, &c. into which the young, born at a very early stage of development, are received and nourished with milk secreted from glands contained within the pouches. Such animals are termed *Marsupial* or *Marsupiate*.

MARSUPIUM, *Scrotum*—m. *Musculosum*, *Dartos*.

MARTEAU, Malleus.

MARTIALIS, *Chalybeate*.

MARTIANAPOMA. See *Citrus aurantium*.

MARTIA'NUM UNGUEN'TUM, *Onguent de Soldat*, *Soldier's ointment*. This was composed of bay-berries, rue, marjoram, mint, sage, wormwood, basil, olive oil, yellow wax, and Malaga wine. It was invented by Martian; and was employed by soldiers as a preservative against cold.

MARTIS LIMATURA, *Ferri limatura*.

MARUM CORTUSI, *Teucrium marum*—m. *Creticum*, *Teucrium marum*—m. *Syriacum*, *Teucrium marum*—m. *Verum*, *Teucrium marum*—m. *Vulgare*, *Thymus mastichina*.

MASCHALE, *Axilla*.

MASCHALISTER, *Axis*.

MASCHALON'CUS, from *μασχαλη*, 'the axilla,' and *ογκος*, 'a tumour.' A tumour or bubo in the axilla.

MASCULA, *Tribade*.

MASCULUS, Male.

MASESIS, Mastication.

MASK, *Laræa*, (F.) *Masque*. A bandage, applied over the face, as a sort of mask, in cases of burns, scalds, or erysipelas. It serves to preserve the parts from the contact of air, and to retain topical applications *in situ*. It is made of a piece of linen, of the size of the face, in which apertures are made corresponding to the eyes, nose, and mouth, and which is fixed by means of strings stitched to the four angles.

MASLACH, *Am'phion, An'fion*. A medicine, much used by the Turks, and into the composition of which opium enters. It is excitant.

MASQUE, Mask.

MASS, *μαζα, Maza, Massa*, from *μασσω*, 'I mix.' The compound, from which pills have to be formed.

MASSA, Mass—*m. de Dactylis*, Paste, date—*m. de Extracto glycyrrhizæ*, Pasta glycyrrhizæ, &c.—*m. de Gummi Arabico*, Paste, marshmallow—*m. de Zizyphorum fructû*, Paste of jujubes.

MASSAGE, Shampooing.

MASSEMA, Mastication.

MASSES APOPHYSAIRES. See Vertebrae.

MASSESES, Mastication.

MASSETER, from *μασσωμαι*, 'I eat,' 'I chew,' *Zygomato-maxillaire*. A muscle, situate at the posterior part of the cheek, and lying upon the ramus of the lower jaw-bone. It is long, quadrilateral, and is attached, *above*, to the inferior edge and to the inner surface of the zygomatic arch; *below*, it terminates at the angle of the jaw, and at the outer surface and inferior margin of the ramus of that bone. It is composed of an intermixture of fleshy and aponeurotic fibres. Its office is to raise the lower jaw, and to act in mastication.

MASSETER INTERNUS, *Pterygoideus internus*.

MASSETERIC, *Mas'seterine, Musseter'icus, Masseter'ius*. Relating or belonging to the masseter muscle.

MASSETERINE ARTERY arises from the trunk of the internal maxillary or temporalis profunda posterior, and is distributed to the masseter muscle, after having passed, horizontally, through the sigmoid notch of the lower jaw-bone.

MASSETERINE NERVE is given off from the inferior maxillary branch of the fifth pair. It passes through the sigmoid notch, and is distributed on the inner surface of the masseter. In luxation of the lower jaw, this nerve is strongly stretched, and considerable pain, consequently, produced.

MASSETERINE VEIN has the same distribution as the artery. It opens into the internal maxillary vein.

MASSETERINUS, Masseteric.

MASSING, Shampooing.

MASSULA, Molecule.

MASTALGIA, Mastodynia.

MASTEMA, Masticatory.

MASTERWORT, *Heracleum lanatum, Imperatoria angelica atropurpurea*.

MATESTIS, Mastication.

MASTHELICOSIS, Mastodynia apostematosa.

MASTHOS, Mamma.

MASTICATION, *Masticatio, Mase'sis, Masse'sis, Masse'ma, Masté'sis, Manduca'tio, Commanduca'tio*, from *μαστιχω*, 'I chew.' The action of chewing or bruising food, to impregnate it with saliva, and prepare it for the digestion it has to undergo in the stomach. This is executed by the joint action of the tongue, cheeks, and lips, which push the alimentary substance between the teeth; and by the motions of the lower jaw it is cut, torn, or bruised.

MASTICATORY, *Masticatorium, Masté'ya, Diamastéma*. Same etymon. A substance, chewed with the intention of exciting the secretion of saliva.

MASTICATORY NERVE. See Trigemini.

MASTICH, see *Pistacia lentiscus*—*m. Herb*, common, *Thymus mastichina*—*m. Herb*, Syrian, *Teucrium marum*—*m. Tree*, *Pistacia lentiscus*.

MASTICHINA GALLORUM, *Thymus mastichina*.

MASTIGODES HOMINIS, *Tricocephalus*.

MASTITIS APOSTEMATOSA, Mastodynia apostematosa.

MASTIX. See *Pistacia lentiscus*.

MASTODYN'IA, *Mastal'gia*, from *μαστος*, 'the breast,' and *οδυνη*, 'pain.' Pain in the breasts; a sort of neuralgia.

MASTODYN'IA APOSTEMATOSA, *Phleg'moné Mammæ, Masthelco'sis, Masti'tis apostemat'isa, Absces'sus Mammæ, Phleg'moné Mastodyn'ia, Abscess of the Breast, Mam'mary Abscess*. Phlegmonous inflammation of the breasts, running on to suppuration. It is one of the best examples of acute phlegmonous inflammation, and requires the active use of appropriate treatment.

MASTODYNIA POLYGALA, Sparganosis.

MASTOID, *Masto'idés, Mammillaris, Papil'li-aut-mammilli-formis, Mammiformis*; from *μαστος*, 'a breast,' and *ειδος*, 'form, resemblance.' Having the form of a nipple.

MASTOID OR MAM'MIFORM OR MAM'MILLARY PROCESS, is situate at the inferior and posterior part of the temporal bone, and gives attachment to the digastric and mastoid muscles.

MASTOID, Mastoideus. That which relates to the mastoid process.

MASTOID APERTURE:—the opening of communication between the cavity of the tympanum and the mastoid cells.

MASTOID CELLS, *Antrum mastoideum, Mastoid Sinus*. These are situate in the mastoid process; communicate with each other, and open into the cavity of the tympanum. Their use seems to be, to increase the intensity of sound.

MASTOID FORAMEN is situate behind the mastoid process, and gives passage to a small artery of the dura mater, as well as to a vein which opens into the lateral sinus.

MASTOID FOSSA, (F.) *Gouttière mastoïdienne*, is a depression at the inner surface of the mastoid portion of the temporal bone, which forms part of the lateral sinus.

MASTOID OR DIGASTRIC GROOVE, (F.) *Rainure mastoïdienne ou digastrique*, is a groove, situate at the inner side of the mastoid process, which affords attachment to the posterior belly of the digastric muscle.

MASTOID MUSCLE, POSTERIOR, *Splenius*.

MASTOIDEUS, *Sterno-cleido-mastoideus*—*m. Lateralis, Complexus minor*.

MASTOIDO-CO'NCHINEN, *Retrahens auris*—*m. Génien, Digastricus*—*m. Hyogénien, Digastricus*—*m. Oriculaire, Retrahens auris*.

MASTON'CUS, from *μαστος*, 'the breast,' and *ογκος*, 'a tumour.' A tumefaction of the nipple, or of the breast itself.

MASTORRH'GIA, from *μαστος*, 'the breast,' and *εργυρειν*, 'to flow.' An unusual flow of milk.

MASTRUPATIO, Masturbation.

MASTURBA'TION, *Mastupra'tio, Mann-stupra'tio, Mastupra'tio*, from *manus*, 'the hand,' and *stupro*, 'I ravish.' *Onania, Onanism, Vol'untary Pollu'tion, Guadia fada, Self-Pollution*, (F.) *Abus de soi-même Atouchement*. Excitement of the genital organs by the hand.

MAT, (F.) *Dull*. A dull sound, *Sop mat*. The obscure noise, afforded when any part, as

the chest, is percussed in several diseases. It has been compared to that produced when the thigh is struck. It is opposed to the *Son clair*, or 'clear sound.'

MATÉ. See *Ilex Paraguensis*.

MATER HERBARUM, *Artemisia vulgaris*—*m. Metallorum*, *Hydrargyrum*—*m. Perlarum*, see Pearl.

MATERIA, Matter—*m. Fibrosa*, Fibrin.

MATÉRIA MÉDICA, *Pharmacolog'ia*, *Pharmacology*, *Acol'ogy* or *Akol'ogy*, *Hylé Iatricé*, *Iamatol'ogy*, (F.) *Matière Médicale*. The division of medical science, which treats of the knowledge of medicines; their action on the animal economy, and mode of administration. The study of the *Materia Medica* is one of great importance:—it is a study of the tools with which the practitioner has to work in the cure of disease. Much labour has been spent in contriving classifications of the *Materia Medica*. Some have arranged the articles, according to their natural resemblance: others, according to their real or presumed virtues: others, according to their active constituent principles. The *Pharmacopœias* place them alphabetically. Perhaps the best classification would be one founded on the agency exerted by the articles on the different tissues; but this arrangement, in the present state of science, is by no means easy; and, moreover, the action of medicines is so associated with certain terms,—as narcotics, tonics, sedatives, &c., employed to denote certain operations, which they are esteemed capable of producing, that, to abandon them, would be to throw obstacles in the way of the student, without the ultimate advantage accruing to him—of possessing a better knowledge of the *modus operandi* of medicines than when a classification, somewhat resembling those usually embraced, is adopted.

The following is the classification given by the Author, in his "General Therapeutics," (Philadelphia, 1836:)

CLASSIFICATION OF THERAPEUTICAL AGENTS.

I. VITAL AGENTS.	Excitants.	Increasing action generally, or locally, or both.	Excitants proper, Tonics, Anthelmintics, Astringents, Emetics, Cathartics, Emmenagogues, Abortives, Diaphoretics, Errhines, Sialogogues, Diuretics, Expectorants, Sorbefacients, Revellents, Antispasmodics.
	Sedatives.	Diminishing action directly or indirectly.	Sedatives proper, Narcotics, Refrigerants, Nauseants.
II. CHEMICAL AGENTS.			Antacids, Antalkalies, Antilithics, Disinfectants.
III. MECHANICAL AGENTS.			Demulcents, Diluents.

In his "General Therapeutics and *Materia Medica*," (Philad. 1843,) however, he adopted the following classification, to harmonize more with the arrangement adopted in his *Practice of Medicine*.

1. Agents that affect prominently the alimentary canal or its contents,	Emetics, Cathartics, Anthelmintics.
2. Agents that affect prominently the respiratory organs,	Expectorants.
3. Agents that affect prominently the follicular or glandular organs,	Errhines, Sialogogues, Diuretics, Antilithics, Diaphoretics.
4. Agents that affect prominently the nervous system,	Narcotics, Tetanics, Antispasmodics.
5. Agents that affect prominently the organs of reproduction,	Emmenagogues, Parturients.
6. Agents that affect various organs,	Excitants, Tonics, Astringents, Sedatives, Refrigerants, Revellents, Eutrophics.
7. Agents whose action is prominently chemical,	Antacids, Antalkalies, Disinfectants.
8. Agents whose action is prominently mechanical,	Demulcents, Diluents.

Of old, the *Materia Medica* consisted of more articles than at present. The tendency, indeed, is, and must be, to diminish it still farther: to get rid of those articles which possess no advantages over others equally common, or whose properties are doubtful. In a Dictionary, it becomes necessary to insert all that have been reputed to possess virtues; but the majority are unnecessary. The catalogue might be largely reduced, with impunity.

MATERIA TESTACEA DENTIUM. See Tooth.

MATERIAUX IMMÉDIATS, Principles, immediate.

MATERIES, Matter.

MATIAS. The bark of a South American tree, supposed to belong to the genus *Winter-sonia*. It is used in its native country in intermittents, and as a tonic generally. Its principal characteristic constituent is a bitter resinous matter.

MATÏÈRE, Matter—*m. Extractive du Bouillon*, *Osmazome*—*m. Médicale*, *Materia Medica*—*m. Perlée de Kerkring*, *Antimonium diaphoreticum*—*m. Pulmonaire noire*, see Pulmo.

MATLOCK, MINERAL WATERS OF. Matlock is a village in Derbyshire, England, to which there is a mineral spring of the acidulous class. Temperature 66°. It differs but little, except in temperature, from good spring water. It is generally used as a tepid bath.

MATONIA CARDAMOMUM, *Amomum cardamomum*.

MATRACIUM, Matrass, Urinal.

MATRASS, *Matra'cium*. A glass vessel with a long neck; and a round, and sometimes oval, body. It may be furnished with tubulures or

not. It is used in *Pharmacy* for distillation, digestion, &c.

MATRES CEREBRI, Meninges.

MATRICAIRE, Matricaria.

MATRICARIA, from *matrīx*, 'the womb;' so called from its reputed virtues in affections of that organ. *Matricaria Parthenium*, *Parthenium febrifugum*, *Argyrochæta*, *Chrysocalis*, *Feter-few*, *Feather-few*, *Mother-wort*, (F.) *Matricaire*. It resembles, in its properties, chamomile and tansy; and, like them, has been esteemed tonic, stomachic, resolvent, emmenagogue, vermifuge, &c. It is not much used.

MATRICARIA CHAMOMILLA, *Chamæmelum Vulgare*, *Chamomilla nostras*, *Leucanthemum of Dioscorides*; *Wild Corn*, *Dog's Chamomile*, *German Chamomile*, (F.) *Camomille vulgaire*. It resembles the Matricaria in properties.

MATRICARIA, *Anthemis nobilis*.

MATRICE, Uterus—*m. Col. de la*, Collum uteri.

MATRISYLA, *Asperula odorata*.

MATRIX, Uterus.

MATRONA, Midwife.

MATRONALIS, Viola.

MATTEE. See *Ilex Paraguensis*.

MATTER, *Matéria*, *Hylē*, *Matéria*, (F.) *Matière*. Any substance which enters into the composition of a body. In *Medicine*, it is sometimes applied to the substance of evacuations; and is also used synonymously with pus.

MATURATION, *Maturatio*, from *matura-re*, 'to ripen'; *Pepasmos*, *Pepansis*. Progression of an abscess towards maturity. The state of maturity. Coction, (q. v.)

MAT'URATIVE, *Maturans*, *Pepanticos*. A medicine which favours the maturation of an inflammatory tumour.

MATU'RITY, *Maturitas*. The state of fruits and seeds, when completely developed. State of an abscess, in which the pus is completely formed.

MATURITY, *Precocius*, *Præotia*.

MAUDLIN, *Achillea ageratum*—*m. Tansey*, *Achillea ageratum*—*m. Wort*, *Chrysanthemum leucanthemum*.

MAUVE SAUVAGE, *Malva*.

MAX'ILLARY, *Maxilla'ris*, from *maxilla*, 'a jaw.' Relating or belonging to the jaws; from *μασσω*, 'I chew.'

MAXILLARY BONE, *Maxilla*, *Mandibula*, *Sigæon*, 'jaw,' (F.) *Machoire*. A name given to two bones, which support the teeth, and which, by means of them, are inservient to the cutting, bruising, and tearing of alimentary substances.

The maxillary bones are two in number.

INFERIOR MAXILLARY BONE, *Lower jaw-bone*, *Os Maxilla're inferius*, *Machoire diacranienne*, *Maxilla inferior*, *Os maxillaire*, (Ch.) is a symmetrical, nearly parabolic bone, the middle portion of which is horizontal and called the *body*; the posterior vertical, and angular portions being termed *Rami* or *branches*. These have behind a *parotidæan edge*, which forms—by uniting with the base—the *angle of the jaw*. The branches terminate above, by two processes, separated by the *sigmoid notch* or *fossa*; the anterior of which is called the *coronoid*; the posterior, the *condyloid process* or *maxillary condyle*, supported by a *Cervix*, *Collum*, or *Neck*. The chief parts observed on the lower jaw are—1. *Externally*,—the *Symphysis menti*, *Apophysis menti*, *Mental foramen* and the *external*

oblique line.—2. *Internally*,—the *Geniapophysis*, the *internal* or *Myloid oblique lines*, and the *entrance of the dental canal*. The lower jaw has, also, an *alveolar edge*, which contains alveoli for the reception of the teeth. The lower jaw bone is developed by two points of ossification, which unite at the symphysis of the chin. It is articulated with the temporal bones and with the teeth.

SUPERIOR MAX'ILLARY BONE, *Upper jaw-bone*, *Maxilla superior*, *Os maxilla're superius*, *Maxilla syncrania*, *Os sus-maxillaire*, (Ch.), *Machoire syncranienne*. The upper jaw-bones are to the face what the sphenoid bone is to the cranium. They are articulated with all the portions composing it. They determine, almost alone, the shape of the face, and give it solidity. Their size is considerable; form unequal. They occupy the middle and anterior part of the face; and enter into the composition of the nasal fossæ, orbit, and mouth. The chief parts observable in the upper jaw, are, 1. *Externally*—The *Nasal process*, (F.) *Apophyse montante*, *Foramen infra-orbitarium*, *Zygomatic process*, *Canine fossa*, *Myrtiform fossa*. 2. *Internally*—The *Palatine process*, *Anterior palatine canal*, and the *Antrum of Highmore*. Its circumference is very unequal, and it has behind a round, unequal prominence called the *Maxillary tuberosity*, which is pierced by the *posterior dental canal*. Anteriorly, is a notch, which forms part of the anterior aperture of the nasal fossæ, and beneath, an eminence called the *anterior nasal spine*. The lower part of this circumference forms the *alveolar margin*. Each superior maxillary bone is articulated with the ethmoid, frontal, nasal, lachrymal, palatine, inferior spongy, vomer, its fellow, the teeth of the upper jaw, and sometimes with the sphenoid bone. It is developed by four or five points of ossification.

MAXILLARY ARTERIES are three in number.

1. The *External maxillary*. See *Facial*. 2. *Internal maxillary*—*A. Gutturo-maxillaire*, (Ch.) This arises from the external carotid with the temporal. It is remarkable for its complex course, and for the number of branches which it transmits to the deep-seated parts of the face. Immediately after its origin, it buries itself under the neck of the lower jaw, curving inwards and downwards. It then advances directly inwards; proceeding in the space between the two pterygoid muscles towards the *maxillary tuberosity*. It turns again, becomes vertical, and ascends into the bottom of the zygomatic fossa, until, having arrived at the floor of the orbit, it takes a horizontal and transverse direction; enters the sphenomaxillary fossa, and divides into several branches. See *Artery*. (Table.)

MAXILLARY NERVES are two in number, and formed of the second and third branches of the fifth pair. The **SUPERIOR MAXILLARY NERVE**, *Nervus sus-maxillaire*, (Ch.) arises from the middle of the gangliform enlargement of the fifth pair; passes forwards and issues from the cranium through the foramen rotundum of the sphenoid bone; enters the sphenomaxillary fossa, which it crosses horizontally; passes into the infra-orbital canal, which it traverses; and makes its exit to vanish on the cheek. It gives off the following branches: the *orbital*, a branch which goes to the *sphæno-palatine ganglion*.

posterior dental branches; the anterior dental,—and terminates in the *infra-orbital* nerves—which are divided into *superior, inferior, internal*. The *inferior maxillary nerve*, *Nerf maxillaire*, (Ch.) is the largest of the three branches, furnished by the fifth pair. It issues from the cranium by the foramen ovale of the sphenoid. Having reached the zygomatic fossa, it divides into two trunks; the one *superior and external*, which gives off the *temporales profundi, masseterine, buccal* and *pterygoids*; the other—*inferior and internal*—the larger of the two, which furnishes the *inferior dental, lingual, and auricular*.

MAXILLARY VEINS present the same arrangement as the arteries they accompany.

MAXILLO-ALVEOLI-NASAL, Depressor alae nasi—*m. Labial*, Depressor anguli oris—*m. Narinal*, Compressor naris—*m. Palpebral*, Orbicularis palpebrarum—*m. Scleroticien*, Obliquus inferior oculi.

MAYAPPLE, *Podophyllum peltatum*—*m. Weed*, *Anthemis cotula*.

MAYELLA, *Curcuma longa*.

MAZA, Mass.

MAZISCH/ESIS, from *maza*, (with some,) 'the placenta,' and *αχαις*, 'holding,' 'retention.' Retention of the placenta.

MAZOS, Mamma.

MEAD, *Hydromeli*, *Melizomum*.

MEADOW SAFFRON, VINEGAR OF, *Acetum colchici*—*m. Sweet*, *Spiræa ulmaria*.

MEASLES, *Rubeola*—*m. Black*, see *Rubeola*.

MEAT, EXTRACTIVE OF, *Osmazome*.

MEATUS, Canal—*m. Auditorius externus*, Auditory canal, external—*m. Auditorius internus*, Auditory canal, internal—*m. Cecus*, Eustachian tube—*m. Narium*, see *Nasal fossæ*—*m. Seminales uteri*, *Tubæ Fallopianæ*—*m. Seminarius*, *Corpus Highmori*—*m. Urinarius*, *Urethra*.

MECHAMEEK, *Convolvulus panduratus*.

MECHANE, Machine.

MECHANEMA, Machine.

MECHANICAL, *Mechanicus*, from *μηχανη*, 'a machine.' An epithet given to irritating bodies, which do not act chymically—as a *mechanical irritant*.

Mechanical or Iatro-mathematical Physicians, are such as refer every function, healthy or morbid, to mechanical or mathematical principles.

MECHANICS, ANIMAL. That part of physiology, whose objects are to investigate the laws of equilibrium and motion of the animal body.

MECHANISM. The structure of a body; the collection or aggregate of the parts of a machine; the mode in which forces produce any effect, &c.

MÊCHE, Tent. The term is usually employed in French surgery to a collection of threads of charpie, cotton or raw silk united together, which are used for detaching sinuous or fistulous ulcers; or to keep open or enlarge natural or artificial apertures. They are generally applied by means of an instrument called *Porte-mêche* (q. v.)

MECHOACANA NIGRA, *Convolvulus jalapa*

MECHOACANÆ RADIX, *Convolvulus mechoacan*.

MECHOACHAN DU CANADA, *Phytolacca decandra*.

MECON, Papaver.

MECO'NIUM, from *μικρον*, 'a poppy.' *Poppy juice*. *Papaver'culum*, *Purgamen'ta Infant'is*. The excrement passed by the infant a short time after birth, which had accumulated in the intestines during pregnancy. It is of a greenish or deep black colour, and very viscid. It seems formed of the mucous secretions of the intestines mixed with bile. See *Opium*.

MÉDECIN, Physician.

MÉDECINE, *Medicina*—*m. Expectante*, Expectation—*m. Légale*, Medicine, legal.

MEDELA, Curation.

MEDIA, Genital organs.

MEDIAN, *Medi'anus*; from *me'dium*, 'the middle.' That which is situate in the middle.

MEDIAN LINE. A vertical line, supposed to divide a body longitudinally into two equal parts; the one right, the other left. Chaussier calls the *linea alba* the *ligne médiane* of the abdomen.

MEDIAN NERVE, *Médian digital*, (Ch.) This nerve arises chiefly from the anterior branches of the last two cervical nerves and first dorsal. The fifth and sixth cervical pairs also send it a branch, which separates from the musculo-cutaneous nerve. The median nerve descends along the inner part of the arm along the biceps muscle. Opposite the elbow joint it buries itself behind the aponeurosis of that muscle, and engages itself between the two fasciculi of the pronator teres. Lower down, it is situate between the flexors—*sublimis* and *profundus*—and passes, with their tendons, under the anterior annular ligament; it then divides into five branches, which are distributed to the muscles of the thenar eminence, to the lumbricales, the integuments of the thumb, the index, middle finger, and outer part of the ring finger. This nerve gives no branches to the arm. In the forearm, it furnishes filaments to all the pronator and flexor muscles; and one of them accompanies the anterior interosseous artery. It also gives off a filament to the integuments of the palm of the hand.

MEDIAN VEINS. Three of the superficial veins of the forearm are so called. The *median basilic*—the *median cephalic* and *common median* or *funis brachii*. See *Basilic* and *Cephalic*.

MEDIANUM, *Mediastinum*.

MEDIASTINAL, *Mediastina'lis*. Relating to the mediastinum.

MEDIASTINAL ARTERIES are very delicate arterial branches, distributed in the cellular texture of the mediastinum. They are distinguished, according to their situation, into anterior and posterior.

MEDIASTINITIS, *Mesod'initis*.

MEDIASTINUM, quasi, *in me'dio stans*, as being in the middle. *Mesod'mē*, *Medi'num*, *Septum thorac'is*, *Hymen Diaphragmat*, *Membra'na Thoracem intersepiens*. A membranous septum formed by the adossement of the pleuræ, dividing the chest into two parts, the one right, the other left. The mediastinum, formed by a double reflection of the pleura, extends from the spine to the posterior surface of the sternum. Its anterior part, called the *Anterior mediastinum*, *Mediastinum pectoralē*, lodges, at its upper part, the thymus gland in the fœtus, and is filled below with fatty, cellular tissue. Its posterior part, parallel to the spine, is occupied

by the œsophagus, vena azygos, thoracic duct, the lower part of the windpipe, the origin of the bronchia and a number of lymphatic glands. This part is called the *posterior mediastinum—Mediastinum dorsale*.

MEDIASTINUM CEREBRI, Falx cerebri—m. Cerebri, Septum lucidum.

MEDICAL JURISPRUDENCE, Medicine, legal.

MED'ICAMENT, *Medicamentum, Remedium, Acs'sis, Aces'ma Acos, Medica'men, Phar'macum, Medicine, Physic, Rem'edy, Alkar, Auxil'ium, Boëthe'ma*, from *medicare*, 'to cure or heal.' A medicine. Any substance, exhibited with the view of curing or allaying morbid action. Medicines are obtained from the three kingdoms of nature, and are divided into *internal and external*, according as they are administered internally or applied externally.

MEDICAMENTO'SUS LAPIS, *Medic'inal stone*, (F.) *Pierre medicamenteuse*. A name, formerly given to a mixture of peroxyl of iron; litharge; alum; nitre; sal ammoniac; and vinegar; evaporated and calcined at a red heat for an hour. The product was regarded as eminently astringent.

MEDICAMENTUM, Drug—m. ex Palmulis, Diaphœnicon.

MEDICAS'TER, *Medicastra*. An ignorant practitioner. A charlatan.

MEDICA'TION, from *mederi*, 'to remedy.' The change in the animal economy produced by the operation of remedies. Treatment by medicine.

MEDIC'INA, *Med'icine, Ars medica*. The healing art, *Res medica, Ars Machao'nia, Iat'ricë, Iuter'ia, Iatrotechnicë, Physic*. (F.) *Médecine*. A science, the object of which is the cure of disease and the preservation of health. Occasionally, it is used to comprehend all the branches of the healing art; at others to comprise one great division, in contradistinction to *surgery and obstetrics*. Medicine, in this sense, includes many branches;—the chief of which are, Anatomy, Physiology, Pathology, Therapeutics, Hygiene, *Materia Medica*, and Pharmacy.

MEDICINA CONSERVATIVA, Hygiène—m. Dietetica, Dietetics—in. Efficax, Surgery—m. Forensis, Medicine, legal—m. Hermetica, see Spagirists—m. Operativa, Surgery—m. Politica, Police, medical—m. Sinica, Chinese medicine—m. Spagirica, see Spagirists—m. Tristitia, Crocus.

MEDIC'INAL, *Medicina'lis*. Having a remedial power;—as *medicinal plants*, &c.

MEDICINA'LES DIES, *Medic'inal days*. Days on which the ancients considered that remedies might be administered; and especially evacuations. Such days were not esteemed critical.

MEDICINE, Medicament—m. Galenic, Galenism.

MEDICINE is, also, used in the same sense as Medicament (q. v.) and for a purging potion.

MED'ICINE, LEGAL, *Med'ical jurisprudence* of some, *Law med'icine, Forensic medicine, Medicina foren'sis*. (F.) *Médecine légale*. The application of medical knowledge to the solution of every question connected with the preservation of the species, and the administration of justice.

MEDICINE, POLITICAL, Police, medical.

MEDICINIER CATHARTIQUE, *Jatrophacurtas*.

MEDICO-CHIRURGICAL ANATOMY, see Anatomy.

MEDICUS, Doctor, Physician—m. Unguentarius, Iatroleptes—m. Vulnerarius, see Deligatio—m. Vulnerum, Surgeon.

MEDIM'NUS, *Medim'nos, μεδιμνος*. An ancient measure, capable of containing about 4 pecks and 6 pints.

MEDITULLIUM, Diploe.

MED'IDIUS. Middle, median.

MIDDLE FINGER, (F.) *Doigt du milieu*, is between the index and ring finger.

MEDLAR, *Mespilus*.

MEDO, Hydromeli.

MEDOBLENNORRHŒA, Leucorrhœa.

MEDORRHŒA, Gonorrhœa—m. Feminarum insons, Leucorrhœa—m. Virilis, Gonorrhœa.

MEDULLA, Marrow—m. Dorsalis, m. Spinalis.

MEDUL'LA OBLONGA'TA. *Cerebral protuberance, Nervous system of the senses*, (Gall.) *Cerebrum elongatum, Mésocephale*, (Ch.) (F.) *Moëlle allongée*. The medullary substance, that lies within the cranium upon the basilar process of the occipital bone. The anterior surface, which rests in the basilar groove, is impressed by the basilar artery. At the upper extremity, and on its posterior surface are the *Tubercula quadrigemina*. At the same extremity, the medulla gives rise to two prolongations, the *peduncles of the brain*, separated from each other by the mammillary eminences and becoming lost in the optic thalami. The lower extremity is called the *tail or Rachid'ian bulb*, and is continuous with the medulla spinalis. It is to this part only that some anatomists apply the name *Medulla oblongata*. From the posterior angles two other prolongations arise, called *Peduncles of the cerebellum*. The medulla oblongata has several eminences—the *Pons varolii, Corpora pyramidalia, C. olivaria*, &c. (q. v.)—and it has a longitudinal fissure before, and another behind, called the *anterior and posterior median fissures*.

MEDUL'LA SPINALIS, *Eon, Noliæus, Medul'la vertebral'is, Processus rachidin'us, Sacra fistula, Spinal prolongation, Vertebral marrow, Spinal cord, The nervous system of voluntary motion and tactile impression*, (Gall.) The spinal marrow, *Medul'la dorsal'is*, (F.) *Moëlle épinière, Moëlle vertébrale*, called by Chaussier, *Prolongement rachidien* of the encephalon, is the continuation of the medulla oblongata. It commences at the foramen magnum of the occipital bone, and descends in the vertebral canal as low as the 2d lumbar vertebra, without filling it; presenting, in its course, several evident enlargements. It is grooved, on both its anterior and posterior surfaces, by a furrow, which divides it, in its whole length, into two great nervous cords, intimately united with each other. It terminates by an oval tubercle, whence a number of nerves set out, called *Cauda equina*, (F.) *Queue de cheval*, from its resemblance to a horse's tail. The spinal marrow has no analogy, as regards its structure, with the marrow of long bones. It is formed of two substances; one white, the other gray, presenting an inverse arrangement to that which they have in the brain, the white being external, the cineritious at the centre. It is enveloped by a yellowish, fibrous membrane,

very resisting, which seems to be continued insensibly from the pia mater, and by two other membranes, which are merely prolongations of the arachnoid and dura mater. See Nerve.

MEDULLA VERTEBRALIS, M. spinalis.

MEDULLÆ, Sperm.

MED'ULLARY, *Medulla'ris*, from *medulla*, 'marrow.' Relating to the marrow or analogous to marrow.

MEDULLARY ARTERIES. The arteries, which enter bones and pass to the marrow.

MEDULLARY JUICE, Marrow—in. Sarcoma, *Hæmatodes fungus*.

MEDULLARY MEMBRANE, *Perios'teum Inter-nunum*. A vascular, areolar web of extreme tenuity, which envelops the marrow and lines the inner surface of the medullary canal of the long bones. This membrane has been considered as a species of internal periosteum of those bones. It has numerous vessels, which bury themselves in the thickness of the marrow; and others which nourish the innermost plates of the bone.

MEDULLARY SYSTEM. Bichat gives this name to the marrow and its membranes. He distinguishes two species of medullary systems; the one occupies the cellular tissue at the extremities of the long bones and that of the flat and short bones; the other is found merely in the central canal of long bones.

MEDULLARY TUMOUR OF THE LUNGS. *Phthisis, cancerous*.

MEGALANTHROPOGENESIS, from *μεγας*, 'great,' *ανθρωπος*, 'man,' and *γενεσις*, 'birth.' A term used by a French physician, named Robert, to designate the art of procreating great men; men of mind; men of genius. He considered that they may be perpetuated by always taking care to have talented men united to clever women!

MEGALOCCELIA, Intestine, great, *Megasplanchnia*.

MEGALOPHONIA, from *μεγας*, *μεγαλη*, 'great,' and *φωνη*, 'voice.' A full, strong voice.

MEGALOPHTHALMUS; from *μεγας*, *μεγαλη*, 'great,' and *οφθαλμος*, the eye. A congenital deformity in which the eye is inordinately large.

MEGALOSPLANCHNOS, *Megasplanchnus*, from *μεγας*, 'great,' and *σπλαγχνον*, 'a viscus.' *Megalocelia*. Hippocrates applies the epithet to those in whom the viscera, or any viscus is tumid. Some have used the substantive *Megasplanchnia*, for the tumour itself.

MEGALOSPLENIA, Splenoncus.

MEGETHOS, Stature.

MEGRIM, Hemicrania.

MEIBOMIUS, GLANDS OF, *Follicles of M.*, *Palpebral Follicles*, *Ciliary F.*, *Glandulæ sebaceæ ciliar'es* vel *Meibomia'næ*, (F.) *Follicules palpébraux* ou *ciliares*, *Glandes de Meibomius*. Small, sebaceous follicles, called after Henry Meibomius, although known long before his description of them. They are situate in special grooves in the tarsal cartilages; and are ranged by the side of each other, in the form of yellowish, parallel, and vertical lines; sometimes straight, at others, tortuous. They may be seen at the inner surface of the eyelids, through the conjunctiva, and secrete a sebaceous humour, called *Lippitudo*, Gum, (F.) *Chassie*.

MEIOSIS, *Imminutio*, *Minuthe'sis*, from *μειωω*, 'I lessen.' The period of a disease, in

which the symptoms begin to diminish;—the decline.

MEIUROS, *Decurtatus*, Myurus.

MEL, *Meli*, *Niliacum*, *Honey*, (F.) *Miel*. A substance, of a mucoso-saccharine nature, prepared by the *Apis mellifica*, or common bee, which collects it from the nectaries of flowers. Honey is employed as aliment, condiment, and medicine. It is demulcent and aperient; and is employed as an adjunct to gargles in cynanche tonsillar, &c. It is, at times, used as a detergent to foul ulcers. *Virgin Honey*, (F.) *Miel vierge*, is that which flows from the wax spontaneously.

HILL'S BALSAM OF HONEY is formed of *balsam. tolu.* ℥ij, *honey*, ℥ij, *rectified spirit*, one gallon. It was long a celebrated empirical peccoral.

MEL ACETATUM, Oxymel—m. *Ægyptiacum*, *Ægyptiacum*—m. *Aërium*, *Fraxinus ornus*.

MEL BORA'CIS, *Mel subbora'cis*, *Colluto'rium adstrin'gens*, *Linimen'tum de Bora'te*, L. *ad aphthas*, *Mel Bora'zatum*, *Linctus de Bora'te*, L. *ad aphthas*. *Honey of Borax*. (*Boracis contrit.* ʒj, *mellis despumati* ʒj, M. Ph. L.) Detergent. Applied to the mouth in apthous affections.

MEL CANNÆ, Saccharum (non purificatum)—m. Coctum, Pelicidae.

MEL DESPUMATUM, *Clarified Honey*, *Anaphron'eli*, (F.) *Miel clarifié*. Melt the honey in a water bath, and remove the scum. Uses the same as honey, (q. v.)

MEL PRÆPARATUM, *Prepared Honey*. (*Mel despumat.* Oss. *Alcohol dilut.* Oj. *Cretæ præparat.* ʒss. To the honey and diluted alcohol, mixed, add the prepared chalk, and let the mixture stand for two hours, occasionally stirring. Then heat to ebullition, filter, and by means of a water-bath, evaporate the clear liquor, to the specific gravity 1.32. Ph. U. S.)

MEL ROSÆ, *Mel rosa'tum*, *Melli'tum de Rosis*, *Honey of Roses*, *Rhodom'eli*, *Rhodostact'on*, (F.) *Miel rosat*, *Mellite de Rosæ*. (*Rosæ gallic.* ʒij, *aquæ ferr.* Oiss. *mellis despum.* Oij. Infuse the roses for two hours; add the strained liquor to the honey, and boil to a proper consistence in a water bath. Astringent and detergent. Used chiefly in gargles and washes for apthæ, &c.

MEL SCILLÆ, Oxymel scillæ—m. *Scillæ Compositum*, *Syrupus Scillæ Compositus*.

HONEY WATER is a mixture of essences, coloured with saffron. A little honey is added to communicate a clamminess; the effect of which is to make it retain the scent the longer. It is used as a scent.

MELÆNA, *Melanorrhag'ia*, *Melancl'horus*, *Melanict'erus*, *Melas ic'terus*, from *μελας*, 'black.' The *Black Vomit*; the *Black Jaundice*, *Morbis niger*, (F.) *Maladie noire*, *Méline*, *Ictère noire*. A name given to vomiting of black matter, ordinarily succeeded by evacuations of the same character. It seems to be often a variety of hæmatemesis. The *Black Vomit* in yellow fever is owing to a morbid secretion from the lining membrane of the stomach and small intestine. *Melæna* also signifies hemorrhage from the intestines.

MELÆNA FUNGOSA CARCINODES, *Hæmatodes fungus*.

MELALEUC'A CAJAPUTI. This plant affords the *Cajeput Oil* (see *Cajeput*.) The leaves are esteemed diuretic, stomachic, and emmenagogue.

MELAMPHYLLUM, *Acanthus mollis*.

MELAMPODIUM, *Helleborus niger*.

MELANAGOGUE, *Melanagógus*, from *μελας*, 'black,' and *αγω*, 'I expel.' A medicine which the ancients believed adapted for expelling black bile or melancholy.

MELANCHLO'ROS, from *μελας*, 'black,' and *χλωρος*, 'green.' The ancients gave this name to certain dark-coloured topical remedies. See *Melæna*.

MELANCHOLE, *Atrabilis*.

MELANCHOLIA FLATULOSA, Hypochondriasis—*m. Nervea*, Hypochondriasis—*m. Suicidium*, Suicide—*m. Uterina*, Nymphomania.

MELANCHOLIC, *Melancholicus*, from *μελας*, 'black,' and *χολη*, 'bile.' One labouring under melancholy. That which belongs or relates to melancholy. In popular language, one of a gloomy disposition.

MELANCHOLY, *Melancholia*, same etymon. *Lypemania*, *Monomania*, *Ecphro'nia*, *Melancholia*, *Mania Melancholica*, *Mania Melancholia*, *Tristemia*, (F.) *Mélancolie*. A disease supposed, by the ancients, to be caused by black bile. A variety of mental alienation, characterized by excessive gloom, mistrust, and depression, with insanity on one particular subject or train of ideas. *Paraphobia*, *Demonomania*, *Erotomania*, *Nostalgia*, &c., may be referred to this head.

Melancholy is also used for unusual gloominess of disposition.

MELANCHOLY, EROTIC, Erotomania—*m. Love*, Erotomania.

MELANCHRUS, from *μελας*, 'black,' and *χρως*, 'a colour.' One attacked with black jaundice. It is probably an abbreviation of *Melanchloros*.

MELANCOLIE, Melancholy.

MELANGE PECTORAL, *Mistura acidi hydrocyanici*

MELANICTERUS, *Melæna*.

MELANOMYCES, *Melanospongus*.

MELANOPYPER, *Piper nigrum*.

MELANORRHAGIA, *Melæna*.

MELANOSIS, *Melanosis*, *Nigritudo*, *Carcinoma melanoticum*, from *μελας*, 'black.' An organic affection, in which the tissue of the parts is converted into a black, hard, homogeneous substance, near which ulcers or cavities form;—owing to the softening, either of this substance itself, or of some other morbid tissue, —of tubercles especially. This morbid change affects the lungs particularly, which is called *Melanosis Pulmonum*, *Nigritudo seu Carcinoma melanoticum*, *seu Melanosis Pulmonum* (F.) *Mélanose Pulmonaire*. It is, also, met with in the liver and cellular texture. Its causes are very obscure. The melanosis of the lungs constitutes one of the species of plithisis of Bayle; but it is impossible to distinguish it from the other species during life.

MELANOSIS PULMONUM, see *Melanosis*.

MELANOSMEGA, see *Sapo*.

MELANOSPONGUS, *Melanomyces*; from *μελας*, 'black,' and *σπογγος*, 'sponge.' The tuberiform variety of *Melanosis* of the Lungs.

MELANSIS, *Melanosis*—*m. Pulmonum*, *Melanosis Pulmonum*.

MELANTHIUM, *Nigella*.

MELAS, *Lepa nigricans*.

MELAS'MA, *Ecchymoma Melasma*, *Nigror*, from *μελας*, 'black.' A black spot or ecchymo-

sis, occurring on the lower extremities of old people especially. Also, a cutaneous affection analogous to *Chloasma*, differing from it only in the darker colour of the morbid pigment. It is called also *Pityriasis nigra*.

MELAS'SES, *Molas'ses*, *Melus'tum*, *Theriaca communis*, *Treacle*. The syrup, which remains after the juice of the sugar cane has been subjected to all the operations for extracting sugar from it. In the United States, the syrup, made in the process of forming common sugar, is called *melasses*; that remaining after the refinement of sugar being termed *sugar-house melasses* or *treacle*.

MELASSES SPIRIT, Rum.

MELATROPHIA, from *μελος*, 'a limb,' and *τροφια*, 'wasting.' Wasting of the limbs.

MELCA, *μελκα*. Food, made of acidulated milk.

MELE, *Specillum*.

MELEA, *Pyrus Malus*.

MELEGUETTA, *Amomum grana paradisi*.

MELE'OS, *μηλειος*, *Melinus*, *Melias*. A species of alum, found in the island Melos.

MELEZE, *Pinus larix*.

MELIA, *Fraxinus ornus*.

MELIA AZED'ARACH, *Poison Berry Tree*, *Azed'arach*, *Pride of India*, *Pride of China*, *Bead Tree*. Nat. Ord. *Meliaceæ*; Sez. *Syst. Decandria Monogynia*. The bark of the root—called in India *Neem Bark*, *Azedarach*, (Ph. U. S.)—is usually given in decoction, in the proportion of 3 or 4 ounces of the bark of the fresh root to a quart of water, boiled down to a pint. The dose is one or two table-spoonfuls, every two or three hours, till free purging is induced. It is given in this manner as an anthelmintic. It is sometimes formed into an ointment, and used in tinea capitis. The tree is a native of Syria, Persia, and the north of India, and is abundant in the southern states.

MELIA TERRA, *Creta*.

MELICERIA, *Hydrarthrus*.

MELICERIS, *Melissivium*, from *μελι*, 'honey,' and *κηρος*, 'wax.' *Emphyema encystis meliceris*. An encysted tumour, filled with a substance resembling honey.

MELICRATUM, *Hydromeli*.

MELIFAVIUM, *Meliceris*.

MELIGE'ON, from *μελι*, 'honey.' A fetid humour, of the consistence of honey, discharged from ulcers, accompanied with caries of a bone.

MELILOTUS, *Trifolium melilotus*.

MELIME'LUM, from *μελι*, 'honey,' and *μηλον*, 'an apple.' A name given to two compounds:—one of honey and quince, the other of honey and apples.

MELINE, *Melæna*.

MELINI SULPHAS, *Cadmii Sulphas*.

MELINUM, *μηλινον*. The ancient name of an ointment, and of several plasters; described by Dioscorides and Galen: so called from their resembling the *μηλον*, or quince, in colour.

MELINUM SULPHURICUM, *Cadmii sulphas*.

MELINUS, *Meleios*.

MELIS'SA, from *μελισσα*, 'a bee,' (q. v.) because bees gather honey from it. *Melissa officinalis*, *Citra'go*, *Citrad'ria*, *Melitel'a*, *Melissob'otos*, *Melitel'na*, *Melissabol'anum*, *Meliss'a citrata*, *Melissophyll'um*, *Melitt'is*, *Cedronell'a*, *Apia'strum*, *Melissa cit'rina*, *Ero'tion*, *Balm*. (F.) *Mélisse*, *La Citronnelle*. Nat. Ord. *Labiata*.

The leaves of balm, *Melissa*, (Ph. U. S.) have a pleasant odour; and an austere and aromatic taste. It was formerly much used in nervous diseases, but is now only employed when made into a tea, as a diluent, in febrile affections. It is the basis of a celebrated preparation,—the *Eau des Carmes*, (q. v.)

MELISSA CALAMIN'THA, *Calamin'tha*, *C. vulgaris*, *C. officinarum*, *Calamint*. (F.) *Calament*. This plant smells like wild mint, though more agreeably. It is used, popularly, as a tea in dyspepsia; flatulent colic; hysteria; uterine obstructions, &c.

MELISSA GRANDIFLORA, *Calamin'tha magno flore*, *C. montana*, *Mountain Calamint*. This plant resembles the last in virtues.

MELISSA HUMILIS, *Melittis Melissophyllum*.

MELISSA NEP'ETA, *Calamin'tha Anglica*, *C. Pale'gii odor'e*, *Nep'eta agrestis*, *Field Calamint*, *Spotted Calamint*. Formerly used as an aromatic.

MELISSA TURCICA, *Dracocephalum Canariense*.

MÉLISSE DES BOIS, *Melittis Melissophyllum*—*m. de Moldavie*, *Dracocephalum Canariense*.

MELISSOBOTANUM, *Melissa*.

MELISSOBOTOS, *Melissa*.

MELISSOPHYLLUM, *Melissa*, *Melittis Melissophyllum*.

MÉLISSOT, *Melittis Melissophyllum*.

MELITÆNA, *Melissa*.

MELITAGRE, *Impetigo*.

MELITEIA, *Melissa*.

MELITHOCORTON, *Carallina Corsicana*.

MELITITES, *Hydromeli*.

MELITTA, *Bee*.

MELITTIS, *Melissa*.

MELIT'TIS MELISSOPHYLLUM, *La'mium montanum*, *Melissa lu'milis*, *Melissophyllum*, *Bastard Balm*. (F.) *Mélisse des Bois*, *Mélistot*. This plant was formerly employed, like the balm, in uterine obstructions.

MELITURIA, *Urine*, *diabetic*. See *Diabetes*.

MELIZOMUM, from *μελι*, 'honey,' and *ζωμος*, 'broth,' *Mead*, *Mel'tina*, *Melheg'tin*. A drink prepared with honey.

MELLA'GO, from *mel*, 'honey.' Any medicine having the consistence of honey.

MELLINA, *Melizomum*.

MELLITE DE ROSES, *Mel rosæ*.

MELLITUM, from *mel*, 'honey.' A prepared honey:—a medicated honey.

MELLITUM DE ACETATE CUPRI, *Linimentum Æruginis*.

MELLITUM DE MERCURIA'LI COMPOS'ITUM, (F.) *Miel de mercuriale composé*, *Syrup de longue vie*. (Succ. purif. *mercurialis* lbij, *boraginis*, *anchusæ officinalis*, aa lbss, *iris pseudacori radices recent.* ℥ij, *rad. sic. gentianæ* ℥j, *mellis* lbij, *vini albi* ℥xij. Macerate the bruised roots in the wine, for 24 hours; strain; mix the juices and honey; boil slightly, and filter: then add the two liquors, and boil to the consistence of syrup. ℥iss of *senna leaves* may be added to the syrup. Ph. P.) *Cathartic*, *stomachic*, &c.

MELLITUM DE ROSIS, *Mel rosæ*.

MELLITUM SIMPLEX, *Syrupus de Mel'te*, *Syrup of Honey*. (*Mellis* lbvj, *aquæ* lbss, *carbonat. calcis. præparat.* ℥ij. Mix the honey, water, and carbonate of lime in a silver vessel: boil the mixture, stirring, at the same time, for 2 or 3 minutes: then add prepared animal charcoal

℥vj, two whites of eggs, mixed in a pint of water. Mix all, and boil to the consistence of syrup: remove from the fire; let the syrup rest for 15 minutes, and pass through a cloth. Ph. P.) *Demulcent*.

MELOÆ/MIA, from *μελας*, 'black,' and *αἷμα*, 'blood.' A state of blood, characterized by its incoagulability, black colour, and septic properties.

MELOCH'ITES, *Lapis Armënius*, *Armënit'es*, *Armënian Stone*. A variety of blue carbonate of copper. It is found in Germany, the Tyrol, and especially in Armenia. It was formerly employed as a cardiac, and as proper for purging away melancholy.

MEL/OE NIGER, *M. Pennsylvanicus*. A blistering fly, native of the United States. It feeds upon the *Prunella vulgaris* or *Self-heal*, and *Ambrosia trifida* or *Stick-weed*. These flies resemble the Spanish flies in properties.

MELOE PENNSYLVANICUS, *M. niger*.

MELOE PROSCARAB'US, *Cantarel'lus*, was anobically used as a diuretic and anti-hydrophobic.

MELOE VESICATORIUS, *Cantharis*.

MELON, *μηλον*, 'an apple.' A disorder of the eye, in which it protrudes out of the socket. See *Exophthalmia*.—Castelli.

MELON, *Cucumis melo*—*m. d'Eau*, *Cucurbita citrullus*—*m. Plant*, *Cucumis melo*—*m. Water*, *Cucurbita citrullus*.

MELONGENA, *Solanum melongena*.

MELOPLA'CUS, from *μηλον*, 'an apple,' 'a quince.' A compound obtained by boiling wine, honey, quince, pepper, &c. together.—Galen.

MELOPLAS'TIC, *Meloplas'ticus*; from *μηλον*, 'the cheek,' and *πλασσω*, 'I form.' The operation for forming a new cheek when any part of it has been lost.

MELOS, *μελος*, *Membrum*. (q. v.) A member. An organized part, composed of other parts.—Castelli.

MELO'SIS, *μλωσις*, from *μλην*, 'a probe.' The act of probing a wound, ulcer, &c.—Hippocrates.

MELOTHRUM, *Bryonia alba*.

MELO'TIS, *Melo'tris*, *Specillum Minus*. A small probe,—a probe for the ear. See *Apyromele*.

MELOTRIS, *Melotis*.

MELUSTUM, *Melasses*.

MEMBRANA VERSIC'OLOR. A peculiar membrane—according to Mr. Fielding, of Hull—situate immediately behind the retina, and in connexion with it. It is separable into distinct layers from the choroid, and is supplied with blood-vessels.

MEMBRANA ABDOMINIS, *Peritonæum*—*m. Adiposa*, *Cellular membrane*—*m. Adventitia*, *Decidua reflexa*—*m. Agnina*, *Amnios*—*m. Amphiblestodes*, *Retina*—*m. Arachnoidea*, *Hyaloid membrane*—*m. Capsularis testis*, *Albuginea*—*m. Carnosa*, *Dartos*—*m. Cellulosa*, *Cellular membrane*—*m. Cellulosa*, *Decidua*—*m. Circumossalis*, *Periosteum*—*m. Communis*, *Decidua*—*m. Circumflexa*, *Pericardium*—*m. Cordis*, *Pericardium*—*m. Costalis*, *Pleura*—*m. Costas succingens*, *Pleura*—*m. Crassa*, *Decidua reflexa*—*m. Cribrosa*, *Decidua*—*m. MEMBRANE, *Membr'na*, *Hymen*, *Meninx*, *Epen'dyma*. A name, given to different thin organs, representing species of supplé, more or less elastic, webs; varying in their structure and vital properties, and intended, in general, to exhale, absorb, or secrete certain fluids; and to separate, envelop, and form other organs. Bichat has divided the membranes into simple and compound.

SIMPLE MEMBRANES comprise three orders. 1. The *Mucous Membranes*, *Membranes folliculeuses* (Ch.), so called, on account of the mucous fluid by which they are constantly lubricated. They line the canals, cavities, and hollow organs, which communicate externally, by different apertures in the skin. Bichat refers the mucous membranes to two great divisions—the *gastro-pulmonary*, and the *genito-urinary*. The mucous membranes have a striking analogy with the cutaneous tissue, in organization, functions, and diseases. They are composed of chorion, papillæ, and epidermis; and are furnished with a multitude of follicles, which secrete a viscid humour;—mucus. They receive a quantity of arterial vessels, veins, lymphatics, and nerves. 2. The *Serous Membranes*, *M. villosæ simplices*, (Ch.) are transparent, thin, and composed of one lamina. One surface adheres to other textures; the other is smooth, polished, and moistened by a serous fluid. They are arranged—in the form of sacs without apertures—as great, intermediate reservoirs for the exhalant and absorbent systems, and in which the serous fluid in passing from the one system tarries some time before it enters the other. The serous membranes resemble the cellular membrane in structure and diseases. They facilitate the motion of the organs on each other, which they envelop. They may be divided into, 1. *Serous membranes*, properly so called; as the arachnoid, pleura, peritoneum, and tunica vaginalis. 2. *Synovial membranes or Capsules*; which belong to joints, tendons, aponeuroses, &c. 3. *Fibrous Membranes*, *Membranes albugineuses* (Ch.) These are almost all continuous, and terminate at the periosteum—their common centre. They have been divided into two

sections. 1. *Enveloping aponeuroses*, *Aponeuroses of insertion*, *Fibrous capsules of the joints*, and *Fibrous sheaths of tendons*. 2. The *Periosteum*, *Dura mater*, *Sclerotica*, *Tunica albuginea testis*, *Fibrous membrane of the spleen*, &c. The fibrous membranes are not free or moistened by any particular fluid. They adhere by both surfaces to the neighbouring parts; are firm, resisting, but slightly elastic, and of a white colour; sometimes pearly and glistening. They are chiefly composed of the *albugineous fibre*, (see Albugineous and Fibrous.) Their vessels are numerous, in some, as in the dura mater and periosteum; in others, scarcely perceptible, as in the aponeuroses. The presence of nerves has never been proved, although several circumstances, regarding their sensibility, render their existence probable. The fibrous membranes serve, in general, to augment the solidity of the organs which they envelop; to retain the muscles in their respective positions; to favour the motion of the limbs, and that of the muscles and skin; to form canals and rings for the passage of different organs, &c.

Bichat admits three species of **COMPOUND MEMBRANES**. 1. The *Sero-fibrous*, formed of a serous and fibrous lamina, intimately adherent to each other;—as the pericardium, dura mater, and tunica albuginea. 2. The *Sero-mucous*, formed of a serous and mucous lamina;—as the gall-bladder at its lower part. 3. The *Fibro-mucous*, constituted of the union of a fibrous and mucous membrane; as the *mucous membrane of the nasal fossæ*, gums, &c. Chaussier admits six kinds of membranes. 1. The *laminated*. See Cellular Tissue. 2. The *serous or simple villous*. 3. The *follicular or complicated villous*. 4. The *muscular or fleshy*. 5. The *albugineous*. 6. The *albuminous*.

MEMBRANE ACCIDENTAL, *M. false*—*m. Accidentelle*, *M. false*—*m. Adnée*, *Conjunctiva*—*m. Adventitious*, *M. false*—*m. Anhistous*, *Decidua*—*m. Cuducque*, *Decidua*—*m. Caduque réfléchie*, *Decidua (reflexa)*—*m. de Demours*, see Aqueous Humour and Cornea—*m. de Descemet*, see Aqueous Humour and Cornea.

MEMBRANE FALSE, *Accidental membrane*, *Adventitious membrane*, *Pseudo-membrane*, *Pseud'hymen*, *Pseudomeninx*, (F.) *Fausse membrane*, *M. accidentelle*. Membranous productions are so called, which form on all the free, natural surfaces, and on every free, accidental surface. They are, in general, produced by the exudation of a fibrinous matter, susceptible of organization, which takes place in consequence of inflammation of the various tissues. These accidental membranes occur on the skin after the application of a blister; on mucous surfaces, as in croup; on the parietes of inflamed veins and arteries, &c. The cicatrices of wounds are formed of them.

MEMBRANE FAUSSE, *Membrane false*—*m. Germinal*, see Molecule—*m. Pseudo*, *M. false*—*m. Ruyschienne*, *Ruyschiana tunica*—*m. du Tympan*, see Tympanum.

MEMBRANES ALBUGINEUSES, *Membranes*, *fibrous*, see Albuginea—*m. Folliculeuses*, *Membranes*, *mucous*—*m. Veloutées*, *Villous membranes*—*m. Villeuses simplices*, *Membranes*, *serous*.

MEMBRANES OF THE FÆTUS, *Membr'nae fœtum involvèntes*. The membranes which immediately envelop the fœtus, in the cavity of

the uterus, and the rupture of which gives rise to the discharge of the liquor amnii. These membranes are the *decidua*, *chorion*, and *amnion*, (q. v.)

MEMBRANEUX, Membranous.

MEMBRANIFORM, *Membraniformis*, from *membrana*, and *forma*;—resembling a membrane. A name given to thin and flat parts, which resemble membranes.

MEMBRANIFORM MUSCLES. Very broad and thin muscles, as the *platysma myoides*, *obliquus abdominis*, &c.

MEMBRANOSUS, *Fascia lata* muscle.

MEMBRANOUS, *Membranosus*, *Hymenoides*, (F.) *Membraneux*. Having the nature of membrane. Formed of membranes.

MEMBRANULA CORONÆ CILIARIS, see Ciliary—*m. Lunata* vagina, *Hymen*—*m. Nervorum*, *Neurilema*.

MEMBRE, *Membrum*—*m. Viril*, *Penis*.

MEMBROSUS, *Membrosior*, *Mentulatus*, *Mutoniatus*, *Nasatus*, *valde Mentulatus*, from *membrum*, 'the male organ.' One whose penis is very large.

MEMBRUM, *Artus*, *Melos*, *Colon*, a limb, a member, (F.) *Membre*. The limbs or extremities or members of animals are certain parts, exterior to the body, which are more or less apparent, long, and movable. It is by means of their limbs, that animals transport themselves from one place to another; and that they defend themselves, or attack others. The limbs are arranged on each side of the trunk, with which they are articulated. In man, they are four in number;—two upper or thoracic, and two lower, pelvic or abdominal. Also, the male organ.

MEMBRUM MULIERE, *Clitoris*—*m. Virile*, *Penis*.

MÉMOIRE, *Memory*—*m. Perte de*, *Amnesia*.

MEMORIA DELETA, *Amnesia*.

MEMORY, *Memo'ria*, *Mnemē*, (F.) *Mémoire*. The cerebral faculty, by virtue of which past impressions are recalled to the mind.

MEMPHITES LAPIS. A sort of stone, found in the environs of Memphis; which was formerly esteemed narcotic.

MENAGOGUES, *Emmenagogues*.

MENDESION, *Ægyptiacum*.

MENE, *Moon*.

MENECRATIS ACCIPITER, *Accipiter*.

MENFRIGE. See *Pistacia lentiscus*.

MÉNINGE, *Dura mater*.

MÉNINGE, *Meningeal*.

MENINGEAL, *Meningæus*, from *μηνιγξ*, 'a membrane.' (F.) *Méningé*. Relating to the meninges, or merely to the dura mater.

MIDDLE MENINGEAL ARTERY, *Artéria meningæa média*, *A. Sphæno-spino'sa*, *A. Duræ Matris média max'ima*, *A. Sphæno-spinalis*, *Spinal Artery*, (F.) *Artère méningée moyenne*, *A. Sphéno-épineuse*, *A. Épineuse*, is the largest of the branches, given off by the internal maxillary artery. It enters the cranium by the foramen spinale, and distributes its branches chiefly to the dura mater.

MENINGES, *Eilam'ides*, *Matres Cerebri*, *Omen'ta*, from *μηνιγξ*, 'a membrane.' The three membranes, which envelop the brain—*Dura mater*, *Arachnoid*, and *Pia mater*, (q. v.)

MÉNINGETTE, *Pia mater*.

MENINGINE. Same etymon. A name given by Chaussier to the pia mater, united to the cerebral layer of the arachnoid,

MENINGINE, *INNER LAMINA OF THE*, *Pia mater*.

MENINGION, *Arachnoid membrane*.

MENINGIS CUSTOS, *Meningophylax*.

MENINGITIS, (F.) *Inflammation de la membrane séreuse, Céphalo-rachidienne*. Inflammation of the meninges or membranes of the brain. See Phrenitis.

MENINGITIS RACHIDIAN, *M. spinal*.

MENINGITIS SPINAL, *M. Rachidian*. Inflammation of the meninges of the spinal marrow.

MENINGITIS, TUBERCULAR, see *Hydrocephalus internus*.

MENINGO-CEPHALITIS, from *μηνιγξ*, 'a membrane,' *κεφαλή*, 'head,' and *itis*, a suffix denoting inflammation. Inflammation of the membranes and brain.

MENINGOPHYLAX, *Custos meningis*, *Depressorium*, (F.) *Dépressoire*, from *μηνιγξ*, 'a membrane,' the dura mater; and *φυλάξ*, 'a preserver.' An instrument for depressing the dura mater, and guarding it from injury, whilst the bone is cut or rasped.

MENINGOSIS. Same etymon. The union of bones by means of membrane; e. g. the articulation of the bones of the cranium in the fœtus. Meningosis is a variety of Syndesmosis.

MENINX, *Membrane*—*m. Choroides*, *Pia mater*—*m. Crassa*, *Dura mater*—*m. Dura*, *Dura mater*—*m. Exterior*, *Dura mater*—*m. Interior*, *Pia mater*—*m. Media*, *Arachnoid membrane*—*m. Pacheia*, *Dura mater*—*m. Sclera*, *Dura mater*.

MENISPERMUM COCCULUS, from *μηνιγξ*, 'the moon,' and *σπέρμα*, 'seed.' So called from the shape of its seed. *Family*, *Menispermæ*. *Sex. Syst.* *Diœcia* *Dodecandria*. The systematic name of the plant, the berries of which are well known by the name of *Cocculus Indicus*, *Indian Berries*, *Bacæ Piscato'rie*, *Cocculus suberosus*, *Indian Cockles*, *Coccus Indicus*, *Cocculæ officinarum*, *Cocci orientales*, *Grua Orientis*, (F.) *Coque du Levant*, *Coquelevant*. These berries are remarkable for their inebriating and destructive quality to fish. The deleterious principle appears to reside in the kernel, and in the active principle called *Picrotoxine*. The *Cocculus Indicus* has been used in decoction to kill vermin. It has, at times, been added to beer, by fraudulent tradesmen, to render it more inebriating.

MENISPERMUM PALMATUM, *Calumba*.

MENISPERMUM TUBERCULATUM, *M. verrucosum*, *Cocculus crispus*. A Chinese plant, an extract from the root of which is tonic to the stomach and bowels, and possesses some astringency. Dose, 5 to 10 grains.

The same may be said of the *Menispermum cordifolium*—the *Goluncha*, of Bengal.

MENISPERMUM VERRUCOSUM, *M. tuberculatum*.

MENOCRYPHIA, *Amenorrhœa*.

MENOLIPSIS. See *Menses*.

MENORRHA'GIA, from *μην*, 'a month,' and *ρρύνω*, 'I flow fiercely.' Flow of the menses. Frequently the word is used synonymously with uterine hemorrhage or *metrorrhagia*, (q. v.) or for immoderate flow of the menses—*profuse menstruation*, *Parame'nia superflua*, *P. profusa*, *Menorrha'gia rubra*, *Catamenio'rum fluxus immodicus*.

MENORRHAGIA, *Menstruation*, *Metrorrhagia*—*m. Alba*, *Leucorrhœa*—*m. Difficilis*, *Dysmenorrhœa*—*m. Erronea*, *Menstruation*, *erroneous*—*m. Stillatitia*, *Dysmenorrhœa*.

MENOSCHESIS. See Amenorrhœa.

MENOSTASIA, Amenorrhœa.

MENOSTASIS, from *μην*, 'a month,' and *stasis*, 'stasis,' 'stagnation.' This word, according to some, signifies the retention of the menses and their accumulation in the uterus. According to others, it means the acute pain which, in some females, precedes each appearance of the menses; a pain which has been presumed to proceed from the stasis of blood in the capillary vessels of the uterus.

MENOXENIA, from *μην*, 'a month,' and *ξενος*, 'foreign.' Irregular menstruation.

MENS, Anima.

MENSES, *Mensis*, 'a month.' *M. Muliebres*, *Muliebria*, *Fluxus menstruus*, *F. lunaris*, *Profluviū muliebri*, *P. genitalē muliebri*, *Consuetudo menstrua*, *Catamenia*, *Menstrua*, *Emmenia*, *Tributum lunare*, *Purgatio nes*, *P. menstrua*, *Gynacœa*; the *Courses*, *Menstrual flux*, *Monthly courses*, *M. periods*, *Flowers*, *Turns*, *Terms*, the *Reds*, *Troubles*, being unwell, (F.) *Mois*, *Règles*, *Lunes*, *Flueurs*, *Affaires*, *Époques*, *Ordinaires*, *Purgations*, *Fleurs*, *Menstrues*. The sanguineous evacuation from the uterus, the monthly occurrence of which constitutes *menstruation*, (q. v.) The first appearance of the menses is usually preceded by the discharge of a fluid, whitish matter from the vagina; by nervous excitement, and by vague pains and heaviness in the loins and thighs; numbness of the limbs, tumefaction and hardness of the breasts, &c. More or less indisposition and irritability, also, precede each successive recurrence of the menstrual flux. In temperate climates, each period ordinarily continues from three to six days; and the quantity lost varies from four to eight ounces. The menses continue to flow from the period of puberty till the age of 45 or 50. At the term of its natural cessation, *Menopis*, the flux becomes irregular; and this irregularity is occasionally accompanied with symptoms of dropsy, glandular tumours, &c., constituting the *Paramenia cessatio* of Good, and what is called the *critical time of life*; yet it does not appear that the mortality is increased by it. With the immediate causes of menstruation we are unacquainted. We express only our ignorance, when we assert it to depend upon periodicity;—the discharge comes from the uterus, and vagina, and seems to be a true secretion from the lining membrane. It differs from blood, by its peculiar odour, and by its not coagulating. It is arrested, as a general principle, during pregnancy and lactation. In warm climates, women usually begin to menstruate early, and cease sooner than in the temperate regions. The quantity lost is also greater. In the colder regions, the reverse of this holds, as a general rule.

MENSES ALBI, Leucorrhœa—m. Anomalæ, Paramenia—m. Devii, Menstruation, vicarious—m. Dolorifica, Dysmenorrhœa—m. Retention of the, see Amenorrhœa—m. Suppression of the, Amenorrhœa

MENSTRUUA, Menses—m. Alba, Leucorrhœa.

MENSTRUAL FLUX, Menses.

MENSTRUATIO ANOMALA, Paramenia—m. Difficilis, Dysmenorrhœa—m. Dolorifica, Dysmenorrhœa.

MENSTRUATIO RECIDIVA. Menstruation, when protracted beyond the usual age.

MENSTRUATIO RETENTIO, Paramenia—m. Suppressa, Paramenia.

MENSTRUATION, *Menstruatio*, *Chronogūnea*. The flow of the menses. *Menorrhagia*, *Fluxus menstruatis*.

MENSTRUATION, LABORIOUS, Dysmenorrhœa—m. Profuse, Menorrhagia.

VICARIOUS MENSTRUATION is that which occurs from other parts than the uterus. It is called *Paramenia erro'ris*, *Menorrhagia erro'nea*, *Mensium per aliena loca excretio*, *Menses devii*, *Aberratio mensium*, *Hæmatoph'nia*. (F.) *Deviation des Règles*. At times, the secreted fluid has all the characters of the menstrual secretion: at others, it appears to be blood.

MENSTRUES, Menses.

MENSTRUUM, (F.) *Menstrue*. Same etymon;—the menstruum being, of old, usually continued in action for a month. This name was formerly given to every substance which possesses the property of dissolving others slowly and with the aid of heat. At present, it is used synonymously with *solvent*. Thus,—water, alcohol, ether, acids, oils, &c. are menstrua.

MENSTRUUM AURI, Nitro-muriatic acid.

MENSURATION, *Mensuratio*, from *mensura*, 'measure.' *Measurement*. One of the means used for exploring the state of the thoracic and other cavities. It consists in a comparative measurement of each side of the chest, by means of a riband extended from the median line of the sternum to the spine. When effusion exists in one side, the measurement is usually greater than on the other. When, on the other hand, a portion of a lung has ceased, for some time, to exert its respiratory functions, the corresponding side of the chest becomes smaller, in consequence of the contraction of the pleura, retraction of the pulmonary tissue and greater approximation of the ribs.

MENTA, Penis.

MENTAGRA, Sycoosis—m. Infantum, Por-rigo lupinosa.

MENTAL, from *mens*, 'mind,' belonging or relating to the mind, as, *mental phenom'ena*, *mental diseases*, *Morbi mentales*, &c.

In Anatomy, Mental, *Mentalis*, (F.) *Menton-nier*, signifies that which relates to the chin; from *mentum*, 'the chin.'

MENTAL ARTERY, (F.) *Artère mentonnière*. This is given off by the inferior dental, and issues at the mental foramen to be distributed on the lower lip.

MENTAL FORAMEN, (F.) *Trou mentonnier*. *Anterior maxillary F.*, is the outer orifice of the inferior dental canal. It is situated on the outer surface of the lower jaw-bone, opposite the second incisor or the canine tooth, and gives passage to the following vessels and nerves.

MENTAL NERVE, (F.) *Nerf mentonnier*, is furnished by the inferior dental nerve. It issues by the mental foramen, and is distributed, in numerous filaments, to the muscles of the lower lip.

MENTHA AQUATICA, *Menthrastrum*, *Sisymbrium menthrastrum*, *Mentha rotundifolia palustris*, *Watermint*, (F.) *Menthe aquatique*, *M. rouge*. *Nat. Ord.* Labiata. This is less agreeable than the *Mentha viridis*, and more bitter and pungent. It is used like *spearmint*.

MENTHA CERVINA, *Hart's pennyroyal*, *Hys-sop-leaved mint*, *Pulegium cervinum*, (F.)

Menthe cervine. Possesses the properties of pennyroyal, but is very unpleasant.

MENTHA CRISPA, *Colymbifera minor*, *Curled Mint*, (F.) *Menthe frissée*, *Menthe crépue*, *Bauine d'eau à feuilles ridées*. Possesses the properties of peppermint.

MENTHA GENTILIS, *M. viridis*.

MENTHA PIPERITA, *Mentha Piperitis*, *Peppermint*, (F.) *Menthe poivrée*. The odour of this variety is strong and agreeable. Taste, pungent, aromatic, and producing a sensation of coldness in the mouth. Virtues depend upon essential oil and camphor. It is stomachic and carminative. It is chiefly used in the form of essential oil—the *oleum menthae piperitæ*.

ESSENCE OF PEPPERMINT consists of *ol. menthae pip.* ʒij, *sp. vin. rectif.*, coloured with spinach leaves, Oij.

MENTHA PULEGIUM, *Pulegium*, *Pulegium regale*, *Pulegium latifolium*, *Glechon*, *Pennyroyal*, *Pudding grass*, (F.) *Poultie*. The oil—*Oleum pulegii*—possesses the virtues of the plant. It resembles the mints in general in properties. Amongst the vulgar, it is esteemed an emmenagogue.

MENTHA ROMANA, *Balsamita suaveolens*, *Tanacetum balsamita*—*m. Rotundifolia palustris*, *M. aquatica*—*m. Saracenica*, *Balsamita suaveolens*, *Tanacetum balsamita*—*m. Sativa*, *M. viridis*—*m. Spicata*, *M. viridis*.

MENTHA VIRIDIS, *M. Sativa*, *M. vulgaris*, *M. gentilis*, *M. spicata*, *Spearmint*, (F.) *Menthe sauvage*, *Baume des jardins*, *Menthe verte*, *Menthe des jardins*. Odour strong, aromatic; taste, warm, austere, bitterish. Virtues the same as those of the peppermint. The *Oleum menthae viridis* is obtained from it.

MENTHA VULGARIS, *M. viridis*.

MENTHE AQUATIQUE, *Mentha aquatica*—*m. Cervine*, *Mentha cervina*—*m. Cog.* *Tanacetum balsamita*—*m. Crépue*, *Mentha crispa*—*m. Frissée*, *Mentha crispa*—*m. des Jardins*, *Mentha viridis*—*m. Poivrée*, *Mentha piperita*—*m. Rouge*, *Mentha aquatica*—*m. Sauvage*, *Mentha viridis*—*m. Verte*, *Mentha viridis*.

MENTHRASTRUM, *Mentha aquatica*.

MENTO-LABIAL, *Mento-labialis*. Under this name Chaussier has united the Levator labii inferioris, (q. v.) and Quadratus muscles. See Depressor Labii inferioris.

MENTON, *Mentum*.

MENTONNIER, *Mental*—*m. Labial*, *Depressor labii inferioris*.

MENTONNIERE. See *Funda*.

MENTULA, *Penis*—*m. Muliebris*, *Cercosis*, *Clitoris*.

MENTULAGRA. A hybrid word, from *mentula*, 'the penis,' and *agra*, 'a seizure.' A convulsive erection of the mentula or penis; such as is sometimes observed in eunuchs.

MENTULATUS, *Membrosus*.

MENTUM, *Geni'on*, *Anthe'ron*, 'the chin.' (F.) *Menton*. The inferior and middle part of the face, situate below the lower lip. The chin is formed of skin, cellular tissue, muscles, vessels, nerves, and of the os maxillare inferius.

MENYANTHES TRIFOLIATA, *Trifolium paludosum*, *T. aquaticum*, *T. palustre*, *T. fibrinum*, *Menyanthes*, *Water trefoil*, *Buckbean*, *Bogbean*. *Nat. Ord. Gentianæ*. (F.) *Trèfle d'eau*. The taste is intensely bitter, and is extracted by water. It is tonic, anthelmintic, diuretic, cathartic, and, in large doses, emetic. In

some countries, it is used as a substitute for hops in making beer.

MEPHITIC, *Mephiticus*; from a Syriac word, signifying 'to blow, to breathe.' Any thing possessed of an unwholesome property; chiefly applied to exhalations.

MEPHITIS HEPATICA, Hydrogen, sulphuretted.

MEPHITISM. Same etymon. Any pernicious exhalation. *Mephitis* and *Mopheta*, (F.) *Mofette* ou *Moufette*, are old names for azote; and, in general, for all exhalations and gases that are unfit for respiration.

MERACUS, *Merus*.

MERAMAUROSIS, *Hypamaurosis*.

MERCURE, *Hydrargyrum*—*m. avec la craie*, *Hydrargyrum cum creta*—*m. Cru*, *Hydrargyrum*—*m. Cyanure de*, *Hydrargyri cyanuretum*—*m. Doux*, *Hydrargyri submurias*—*m. Gommeux de Plenck*, *Syrupus de mercurio mediante gummi*—*m. Muriate oxygénée de*, *Hydrargyri oxymurias*—*m. Oxide de, cendré*, *Hydrargyri oxydum cinereum*—*m. Oxide gris de*, *Hydrargyri oxydum cinereum*—*m. Oxide nitrique de*, *Hydrargyri nitrico-oxydum*—*m. Oxide noir de*, *Hydrargyri oxydum cinereum*—*m. Oxide rouge de*, *Hydrargyri oxydum rubrum*—*m. Protochlorure de*, *Hydrargyri submurias*—*m. Sous-muriate de, précipité*, *Hydrargyrum præcipitatum*—*m. Sous-sulfate de*, *Hydrargyri vitriolatus*—*m. Sulfure de, noir*, *Hydrargyri sulphuretum nigrum*—*m. Sulphure de, rouge*, *Hydrargyri sulphuretum rubrum*.

MERCURIAL, *Mercurialis*. That which contains mercury: one of the preparations of mercury.

MERCURIALIS, *Mercurialis annua*, *French mercury*. It has been esteemed cathartic, hypnotic and cosmetic, and has been chiefly used by way of lavement. See *Chenopodium Bonus Henriens*.

MERCURIALIS PERENIS, *Cynocrambæ*, *Canina brasica*, *M. montana*, *M. Sylvestris*, *Dog's mercury*. This plant is possessed of acro-narcotic properties.

MERCURI CALX VITRIOLATA, *Hydrargyri vitriolatus*—*m. Sperma*, *Hydrargyri acetatus*—*m. Terra foliata*, *Hydrargyri acetatus*.

MERCURIUS, *Hydrargyrum*—*m. Acetatus*, *Hydrargyri acetatus*—*m. Alkalisatus*, *Hydrargyrum cum creta*—*m. Calcinatus*, *Hydrargyri oxydum rubrum*—*m. Causticus flavus*, *Hydrargyri vitriolatus*—*m. Cinereus*, *Hydrargyri oxydum cinereum*—*m. Cinnabarinus*, *Hydrargyri sulphuretum rubrum*—*m. Corallinus*, *Hydrargyri nitrico-oxydum*—*m. Corrosivus*, *Hydrargyri oxymurias*—*m. Corrosivus ruber*, *Hydrargyri nitrico-oxydum*—*m. Corrosivus sublimatus*, *Hydrargyri oxymurias*—*m. Cosmeticus*, *Hydrargyrum præcipitatum*—*m. Dulcis*, *Hydrargyri submurias*—*m. Emeticus*, *Hydrargyri vitriolatus*—*m. Gummosus Plenckii*, *Syrupus de mercurio mediante gummi*—*m. Luteus*, *Hydrargyri vitriolatus*—*m. Mortis*, *Algaroth*—*m. Niger Moscati*, *Hydrargyri oxydum cinereum*—*m. Præcipitatus corrosivus*, *Hydrargyri nitrico-oxydum*—*m. Præcipitatus niger*, *Hydrargyri oxydum cinereum*—*m. Saccharatus*, *Hydrargyrum saccharatum*—*m. Solubilis* of Hahnemann, see *Hydrargyri oxydum cinereum*—*m. Sublimatus dulcis*, *Hydrargyri sulphuretum ni-*

grum—m. *Terrestris*, *Polygonum hydropiper*—m. *Vitæ*, *Algaroth*.

MERCURY, *Hydrargyrum*—m. Acetate of, *Hydrargyrum acetatus*—m. Bichloride of, *Hydrargyri oxymurias*—m. Biniodide of, see Iodine—m. Bromide of, see Bromine—m. with Chalk, *Hydrargyrum cum cretâ*—m. Chloride of, mild, *Hydrargyri submurias*—m. Cyanuret of, *Hydrargyri cyanuretum*—m. Dento-iodide of, see Iodine—m. Dog's, *Mercurialis perennis*—m. English, *Chenopodium bonus Henricus*—m. French, *Mercurialis*—m. Iodide of, *Hydrargyri Iodidum*—m. Iodide of, red, *Hydrargyri Iodidum rubrum*—m. Iodo-arsenite of, *Arsenic and Mercury*, iodide of—m. Nitrate of, *Hydrargyri nitras*—m. Nitric oxyd of, *Hydrargyri nitrico-oxydum*—m. Oxide, black or gray of, *Hydrargyri oxydum cinereum*—m. Oxide of, red, *Hydrargyri oxydum rubrum*—m. Oxymuriate of, *Hydrargyri oxymurias*—m. Phosphuretted, *Hydrargyrum phosphoratus*—m. Precipitate of, white, *Hydrargyrum præcipitatum*—m. Proto-iodide of, see Iodine—m. Prussiate of, *Hydrargyri cyanuretum*—m. Soluble, *Hydrargyri nitras*—m. Sulphuret of, black, *Hydrargyri sulphuretum nigrum*—m. Sulphuret of, red, *Hydrargyri sulphuretum rubrum*, *Realgar*—m. Tartrate of, *Hydrargyri tartas*.

MERCURY AND ARSENIC, IODIDE OF, *Arsenic and Mercury*, Iodide of.

MERE DES PIANs, Pian.

MERIDROSIS, from *μερος*, 'a part,' and *ἰδρωσις*, 'sweating.' A partial perspiration.

MERISIER, *Prunus avium*.

MEROBALANEUM, Bath, Partial.

MEROBALNEUM, Bath, Partial.

MEROCE'LE, *Merorix'is*, *Merorrhæ'is*, from *μηρος*, 'the thigh,' and *κηλη*, 'tumour.' *Femoral or crural hernia*. (F.) *Hernie crurale ou fémorale*. In this hernia, the viscera issue from the abdomen through the crural canal; or through an opening immediately on the outer side of Gimbernat's ligament, which gives passage to lymphatic vessels. This affection is more frequent in the female than in the male, and especially in those who have had children. The tumour, formed by the merocele, is generally small, round, and more or less difficult of reduction. In other respects, it possesses all the characters of hernia. The neck of the sac has, close on the outside, the epigastric artery; above, the spermatic cord and spermatic artery in the male—the round ligament in the female; on the inside, Gimbernat's ligament; and, below, the pubes. When the obturator artery arises from the epigastric, it generally passes on the outside of and below the orifice of the sac; sometimes, however, it takes a turn above, and then to the inside of the opening. J. Cloquet asserts, that of 134 cases, in one only did he find the epigastric artery on the inside of the orifice of the sac.

The operation, required in strangulation of this variety, may be practised on the aponeurotic opening, by cutting downwards and inwards, on the side of Gimbernat's ligament.

MERORRHÆXIS, Merocele.

MERORIXIS, Merocele.

MEROS, Feinur, Thigh.

MERRY-ANDREW. An itinerant quack, who exposes his nostrums for sale at fairs and markets. See CHARLATAN. They are so called from Dr. Andrew Boorde, who lived in the

reigns of Henry VIII., Edward VI., and Queen Mary, and who was in the habit of frequenting fairs and markets at which he harangued the populace.

MERUS, *Mera'cus*, *Arcatos*, 'pure, genuine;' as *Vinum merum*, unmixed wine.

MERYCISMUS, Rumination.

MERYCOLOG'IA, from *μερυω*, 'I ruminate,' and *λογος*, 'a description.' Any work on rumination may be so termed.

MESA, Genital organs.

MESARAI'C, Mesenteric.

MESEMAR, Mismar.

MESEMBRYANTHEMUM COPTICUM. See Soda.

MESEMBRYANTHEMUM CRYSTALLINUM, *M. ficoi'des*, *Diamond fig-marygold*, *Ice-plant*. (F.) *Glaciale*, *Crystalline*. It has been recommended in dysuria, ischuria, and some other affections of the urinary organs.

MESENTERIC, *Mesara'ic*, *Mesenteric'us*, *Mesara'icus*, from *μεσεντεριον*, or *μεσαστερion*, 'the mesentery.' That which relates or belongs to the mesentery.

MESENTERIC ARTERIES are two in number, and distinguished into, 1. The *Superior mesenteric*, which arises from the anterior part of the abdominal aorta, below the celiac. It immediately descends to the left, forwards, behind the pancreas, and in front of the third portion of the duodenum,—to gain the superior extremity of the mesentery, where it makes a long curvature, the convexity of which is turned forwards and to the left. Towards the termination of the ileum, it ends by anastomosing with a branch of the *A. colica dextra inferior*. At its concavity, it gives off the three *Arteriæ colicæ dextræ*, which belong to the great intestine; and, at its convexity, it sends off fifteen or twenty branches, which are distributed to the small intestine; after having formed numerous arches by their anastomoses.

2. The *Inferior Mesenteric Artery* arises from the anterior part of the abdominal aorta, an inch and a half before its termination. It descends, on the left side, behind the peritoneum; engages itself in the substance of the iliac mesocolon, forming a considerable curvature, whose convexity faces the left side. When it reaches the brim of the pelvis, it passes along the posterior separation of the mesorectum, and attains the neighbourhood of the anus, under the name *Superior hemorrhoidal artery*. It gives off no branch at its concave part; but, from the convex, the three *Arteriæ colicæ sinistræ* arise.

MESENTERIC GLANDS are the lymphatic ganglions of the mesentery. Through them, the chyloferous vessels pass to the thoracic duct. Their uses are unknown. When diseased, nutrition is interfered with, and atrophy produced.

MESENTERIC HERNIA. If one of the layers of the mesentery be torn by a blow, whilst the other remains in its natural state, the intestines may insinuate themselves into the aperture, and form a kind of hernia. It is not known during life.

MESENTERIC PLEXUSES are furnished by the solar plexus, and have been distinguished into *superior* and *inferior*; like the mesenteric arteries which they accompany.

MESENTERIC OF MESARAI'C VEINS are two in number, and belong to the vena porta. They are distinguished into, 1. The *Superior mesen-*

teric or *mesaraic*, or *great mesaraic*. This trunk receives, from above to below and on the right side, the three *venæ colicæ dextræ* and the *Gastro-epiploica dextra*. Into its left side, the veins of the small intestine open. It passes in front of the transverse portion of the duodenum; and, behind the pancreas, unites with the splenic vein to concur in the formation of the *vena porta*.

The *inferior* or *lesser mesenteric vein* corresponds to the artery of the same name, and opens into the splenic, near the union of that vein with the superior mesenteric, and behind the pancreas.

MESENTERITIS, *Empres'ma peritonitis mesenterica*, *Enteritis mesenterica*, *Inflammation of the mesentery*. The pain is here deeper seated and more immediately in the mesenteric region. The external tenderness is less than in some of the other varieties of peritonitis. See *Tabes Mesenterica*.

MES'ENTERY, *Mesenterium*, *Mesaraion*, *Mesenteron*, *Meseræum*, *Mesoræum*, *Medium intestinum*, from *μεσος*, 'in the middle,' and *ετερων*, 'an intestine,' (F.) *Mésentère*. A term applied to several duplicatures of the peritoneum, which maintain the different portions of the intestinal canal in their respective situations; allowing, however, more or less mobility. They are formed of two laminae, between which are contained the corresponding portion of intestine and the vessels that pass to it. One only of these duplicatures has received the name *mesentery*, properly so called. This belongs to the small intestine, which it suspends and retains in *situ*. Its posterior margin, which is the smallest, is straight, and descends obliquely from the left side of the body of the second lumbar vertebra to the right iliac fossa. Its anterior margin is curved, undulating, plaited, and corresponds to the whole length of the small intestine. The mesentery contains, between the two laminae which form it, a number of lymphatic ganglions; the trunks and branches of the mesenteric vessels; the nervous plexuses, accompanying them, and many lacteals and lymphatics.

MESERA, Tutia.

MESERÆUM, Mesentery.

MESERAION, Mesentery.

MESIAMUM, Aniceton.

MESMERISM, Magnetism, animal.

MESO, *μεσος*, 'in the middle.' A prefix to certain words.

MESOBREGMATE. See *Cranium*.

MESOCÆ'CUM. A name given to a duplicature of the peritoneum; (in some persons only,) at the posterior part of the cæcum.

MÉSOCÉPHALE, *Medulla oblongata*.

MESOCEPHALUM, *Pons varolii*.

MESOC'HONDRIAC, *Mesochondriacus*; from *μεσος*, and *χονδρος*, 'cartilage.' A name given by Boerhaave to fleshy fibres situate between the cartilaginous rings of the trachea.

MESOCOLIC HERNIA. Hernia is so named by Sir Astley Cooper, when the bowels glide between the layers of the mesocolon.

MESOCOLON, from *μεσος*, and *κολον*, 'the colon.' A name given to the duplicatures of the peritoneum, which fix the different parts of the colon to the abdominal parietes. It has received different names, according to its situation. The *right lumbar mesocolon* fixes the as-

cending colon to the corresponding lumbar region. The *transverse mesocolon* arises from the concave arch of the colon, and forms a septum between the epigastric and umbilical regions. Its inferior portion is continuous with the mesentery. The *left lumbar mesocolon*, which contains the ascending colon, is continuous below with the *iliac mesocolon*. The last includes between its layers the sigmoid flexure of the colon, and ends in the mesorectum. Under the right kidney, it is narrow and firm, and forms the *right ligament of the colon*; at the under end of the left kidney, it forms the *left ligament of the colon*.

MESOCRANIUM, *Sinciput*.

MESODME, *Mediastinum*.

MESODMITIS, from *μεσodμη*, 'the mediastinum,' and *itis*, 'inflammation.' *Mediastinitis*. Inflammation of the mediastinum.

MESOGLOSSUS, *Genio-glossus*.

MESOLO'BAR. Belonging to the *Mesolobe* or *Corpus callosum*.

MESOLABAR ARTERIES are the arteries of the corpus callosum.

MESOLOBE, *Corpus callosum*.

MESOME'RIA, from *μεσος*, and *μηρος*, 'the thigh.' The parts of the body situate between the thighs or hips.

MESOMERION, *Perinæum*.

MESOMPHALUM, *Umbilicus*.

MESOPH'RION, *Glabella*. The part of the face between the eyebrows; from *μεσος*, 'the middle,' and *οφρυα*, 'the eyebrows.'

MESOPLEURIOS, *Intercostal*.

MESORE'UM, *Mesentery*.

MESOREC'TUM. A hybrid word; from *μεσος*, and *rectum*, 'the intestine rectum.' A triangular reflection, formed by the peritoneum, between the posterior surface of the rectum and the anterior surface of the sacrum. Between the two layers of which the mesorectum is composed are found much cellular tissue, and the termination of the inferior mesenteric vessels.

MESOS, *Meso*.

MESOSCELOCELE, *Hernia*, perineal.

MESOSCELO'N, *Perinæum*.

MESOTH'ENAR, from *μεσος*, and *θενας*, 'the thenar,' 'the palm of the hand.' A muscle, which carries the thumb towards the palm Winslow applied the term to the abductor pollicis, united to the deep-seated portion of the flexor brevis pollicis.

MESOTICA, from *μεσος*, 'middle.' Diseases, affecting the parenchyma. Pravity in the quantity or quality of the intermediate or connecting substance of organs; without inflammation, fever, or other derangement of the general health. The first Order, class *Ec critica* of Good.

MES'PILUS, *Mespilus Germanica*. The medlar, (F.) *Néflier*. (Fruit) *Néfle*. The fruit and seeds of the medlar have both been used medicinally:—the immature fruit as an astringent, and the seeds in nephritic diseases. See *Cratægus Aria* and *Sorbus Aucuparia*.

MESPILUS OXYACAN'THA, *Oxyacantha*, *Spina alba*, *White Hawthorn*, (F.) *Aubepine*. The flowers of this common European plant are sometimes used in infusion as a pectoral.

META, *μετα*, *Meth*, 'μειν', 'with,' 'together with,' 'after,' 'change of form and place.' A common prefix to words. Hence:

METAB'ASIS, *Transitus*, *Metabolē*, *Metal-*

lagē, from *μεταβαίνω*, 'I digress.' A change of remedy, practice, &c.—Hippocrates.

METABOLE, Metabasis.

METACARPAL, *Metacarpia* nus, (F.) *Métacarpien*. Relating or belonging to the metacarpus.

METACARPAL ARTERY, or *Arteria dorsalis metacarpi* arises from the radial, at the moment it engages itself in the upper extremity of the abductor indicis. It descends obliquely upon the back of the hand. Its branches are distributed to the abductor indicis, and the integuments: some communicate with the dorsalis carpi.

METACARPAL ARTICULATIONS are those by which the last four metacarpal bones are united together, at their upper extremity.

METACARPAL BONES, or bones which compose the metacarpus, are five in number; and distinguished into *first, second, third, &c.* beginning from the outer or radial side. They are articulated, by their superior extremity, with the bones of the second range of the carpus; and, by the lower, with the first phalanges.

METACARPAL LIGAMENT, or *Inferior palmar Ligament*, is a fibrous band, stretched transversely before the inferior extremities of the last four metacarpal bones, which it keeps in their respective positions.

METACARPAL PHALANGES are the first phalanges of the fingers; so called, because they are articulated with the bones of the metacarpus.

METACARPAL RANGE or *Row* of the carpal bones, (F.) *Rangée métacarpienne du carpe* is the lower row of carpal bones; so called because they are articulated with the bones of the metacarpus. It is composed of the trapezium, trapezoides, magnum, and unciniforme.

METACARPEUS, Adductor metacarpi minimi digiti.

MÉTACARPIEN, Metacarpal—*m. du petit doigt*, Opponens minimi digiti—*m. du Pouce*, Opponens pollicis.

METACARPO-PHALANGÆUS POLLICIS, Adductor pollicis manus.

METACARPO-PHALANGIAN, *Metacarpophalangia* nus, (F.) *Métacarpophalangien*. That which belongs to the metacarpus and phalanges.

METACARPO-PHALANGIAN ARTICULATIONS are formed by the bones of the metacarpus and the corresponding phalanges. In these articulations, the bony surfaces are incrustated with cartilage, covered by a synovial membrane, and kept in connexion by means of an anterior and two lateral ligaments.

MÉTACARPO-PHALANGIEN LATÉRAL SUS-PALMAIRE ET MÉTACARPO-PHALANGIEN LATÉRAL, Interosseus manus.

METACARPUS, from *μετα*, 'after,' and *carpus*, 'the wrist.' *Metacarpion*, *Postbrachiale*, (F.) *Métacarpe*. The part of the hand comprised between the carpus and fingers. It is composed of five parallel bones, called *metacarpal*; forming the back of the hand, externally, and the palm internally.

METACERASMA, Cerasma.

METACHEIRIXIS, Surgery.

METACHORESIS, Metastasis.

METAL, *Metalum*. A class of simple, combustible bodies; distinguished from others by considerable specific gravity; a particular splen-

dour; almost total opacity; insolubility in water; and the property they have of ringing when struck. Metals have no effect, except of a mechanical nature, when taken into the stomach; unless they have already undergone, or undergo, in the stomach, oxidation or union with an acid; when several most deleterious compounds may be formed. Copper cents; half-pence; quicksilver; lead, have frequently been swallowed in the metallic state with impunity. Tin and mercury are the only metals used to produce a mechanical effect;—the former as an anthelmintic,—the latter, idly enough, in cases of fancied intussusception.

MÉTAL DES CLOCHES, Bell metal.

METALLAGE, Metabasis.

METALLIC VOICE, *Tintement métallique*.

METALLUM, Metal.

METAMORPHOP'SIA, from *μεταμορφωσις*, (*μετα*, and *μορφη*, 'form,') 'I transform,' and *οψις*, 'the eye.' *Suffusio*, *Suffusio Oculi*, *Imagination* (Maitre-Jean.) *Crupia*, *Myodesopsia*, *False sight*. (F.) *Berlue*. Aberration of the sense of sight, which transmits the image of imaginary objects. This affection sometimes depends on a slight opacity in the transparent parts of the eye; the cornea, crystalline, or vitreous humour, when it is symptomatic, and of no consequence. At other times, it appears to be idiopathic; and occurs particularly in those who have been in the habit of constantly fixing their eyes on very brilliant or small bodies. The objects, fancied to be seen, are various. They are sometimes circular, perpetually moving, or shining or black spots, cobwebs, insects, or pieces of wood—when they are often termed *Musce volitantes*, (F.) *Mouches volantes*, and the condition *Visus muscarum*, *Scotomata*, *Suffusio Myodes*, *Myodesopsia*, *Myodesopsia*. These appearances sometimes continue for a few days; being dependent on the state of the nerves of the individual at the time; or they may exist for life, and ultimately impair the sight.

If the affection be symptomatic, it is of but little moment. If idiopathic, and connected with any excitement of the brain, which is not often the case, attention will have to be paid to that organ.

METAMORPHOSIS VENTRICULI GELATINIFORMIS, Gastromalacia.

METANGISMOS, Decantation.

METAPEDIUM, Metatarsus.

METAPHRENON, Dorsum.

METAPHYTEIA, Transplantation.

METAPODIUM, Metatarsus.

METAPOROPCEIA, *Metaporopoeia*, from *μετα*, 'after,' *πορος*, 'a pore,' and *ποιεω*, 'to make.' The change produced in the minute pores,—in the capillary extremities of vessels,—when they pass from the morbid to the healthy condition.—Galen.

METAPTO'SIS, *Metaschematis* mus. Mutation; change; from *μεταπίπτω*, (*μετα*, and *πίπτω*, 'I fall,') 'I digress.' Any change in the form or seat of a disease.

METASCHEMATISMUS, Metaptosis.

METAS'TASIS, *Metachore* sis, from *μεταστεύω*, (*μετα*, and *στασις*, 'place,') 'I change place.' *Displacement*, *Transhition*. A change in the seat of a disease; attributed, by the Humorists, to the translation of the morbid humor to a part different from that which it had previously

occupied; and, by the Solidists, to the displacement of the irritation. It has also been used in the same extensive sense as Metaptosis, (q. v.) Disputes have often been indulged, whether a case of metastasis ought not rather to be esteemed one of extension of the disease. The phenomena of gout and acute rheumatism are in favour of metastasis occasionally supervening.

METASTATIC, *Metastaticus*. Belonging or relating to metastasis. A *metastatic crisis* is one produced by metastasis;—a *metastatic affection*, one caused by metastasis, &c.

METASYNCRISIS, from *συνκρίνω*, 'I compose,' and *μετα*, which indicates a change. *Recomposition*. A word, employed by some disciples of Asclepiades. This physician supposed, that all animals are formed by the union or assemblage of atoms. He designated all bodies by the word *συνκρίματα*; which signifies 'assemblage.' *Συνκρίνεσθαι*, 'to be assembled,' was, with him, synonymous with 'to exist;' and *διακρίνεσθαι*, 'to separate,' was, with him, synonymous with 'to dissolve,' 'to cease to exist.' The word *Metasyncretis* was invented to express the recomposition of bodies after their momentary dissolution. Some have rendered the word by the Latin *Recorporatio*.

METASYNCRITIC, *Metasyncriticus*, *Recorporativus*. Belonging or relating to metasyncretis. A name, formerly given to medicines to which was attributed the virtue of producing the metasyncretis or regeneration of the body or of some of its parts.

METASYNCRITIC CYCLE meant a determinate series of remedies, employed for this purpose.

METATAR'SAL, *Metatarsus*, (F.) *Métatarsien*. Relating or belonging to the metatarsus.

METARSAL ARTERY, *Sus-métatarsienne* of Chaussier, arises from the *A. dorsalis Tarsi*; passes transversely over the back of the foot; and furnishes, at its convexity, which is anterior, three branches, called *A. interosæ sæ dorsales Pedis*. These branches are distributed in the interosseous spaces.

METARSAL ARTICULATIONS are those resulting from the juncture of the metatarsal bones with each other. They are strengthened, behind, by *dorsal*, and *plantar* ligaments; and, before, by a *transverse metatarsal ligament*, which is plantar, and has the greatest analogy to the *inferior transverse metacarpal ligament*.

METARSAL BONES, (F.) *Os metatarsiens*, are five in number, and distinguished by their number; *first*, *second*, *third*, &c., reckoning from the outer side.

METARSAL PHALANGES are the first phalanges of the toes; so called, because they are united to the metatarsus.

METARSAL ROW—(F.) *Rangée métatarsienne*—of the bones of the tarsus, is the second row, or that contiguous to the metatarsus; comprehending the cuboides and three cuneiform bones: some add the scaphoides.

METATARSEUS. See *Abductor minimi digiti pedis*.

MÉTARSIEUX, *Metatarsal*.

METATARSO-PHALANGIAN, *Metatarsophalangianus*. Relating to the metatarsus and phalanges.

METATARSO-PHALANGIAN ARTICULATIONS are formed by the bones of the metatarsus and the

corresponding phalanges. They bear the greatest analogy to the *metacarpo-phalangian articulations*, (q. v.)

MÉTATARSO-PHALANGIEN-LATÉRAL. See *Interossei pedis*.

METATAR'SUS, *Metatarsium*, *Metapedium*, *Metapodium*, from *μετα*, 'after,' and *ταρσος*, 'the tarsus.' The instep. That part of the foot which is situate between the tarsus and toes, corresponding with the metacarpus. It is composed of five parallel bones; one to each toe. Like the metacarpal bones, they are developed from two points of ossification.

METATHESIS, from *μετατίθημι*, (*μετα*, and *τίθημι*, 'to place,') 'I change place.' *Transposition*, (q. v.) An operation, by which a morbid agent is removed from one place to another, where it may produce less disturbance in the exercise of the functions:—as, for example, in the operation of depressing cataract, or when a calculus in the urethra is pushed back into the bladder.

METATOPTOSIS, *Diadexis*.

METEORISMUS, *Sublimation*, *Tympanites*.

METEOROLOG'Y, *Meteorologia*, from *μετεωρος*, 'a meteor,' and *λογος*, 'a discourse.' The science, whose object is a knowledge of the origin, formation, appearance, &c. of meteors. The state of the atmosphere has a most important bearing on the health of animals. The whole range of epidemic affections have their causes seated there. Meteorological observations have, hence, ever been attended to, by the physician, for the purpose of detecting the precise character of any particular epidemic influence. The barometer, thermometer, and hydrometer are the instruments used with this intent—to detect, as well the varying weight or pressure, and the temperature, as the moisture. Perhaps, of the three conditions, the last exerts more influence in the production of disease, than either of the others. Our knowledge, however, of this part of Physics is extremely limited and unsatisfactory.

METER, *μετρον*, 'a measure,' a suffix to words denoting 'a measure,' as in *Barometer*, *Pleximeter*, &c.

METHÆMACHYIA, *Transfusion*.

METHE, *Temulentia*.

METHEGLIN, *Melizomum*.

METHEMERINOS, *Quotidian*.

METHOD, *Methodus*, from *μετα*, 'with,' and *οδος*, 'way.' This word has different acceptations in the sciences. In Medicine, *curative method* is the methodical treatment of disease.

METHOD, Mariano's. See *Lithotomy*.

NUMERICAL METHOD, *Method of Observation* of Louis, consists in observing every case and every symptom of a case numerically, so as to ensure, as far as practicable, accuracy of observation; and to enable us by the analysis and collation of such facts to deduce general laws and conclusions.

MÉTHODIQUES, *Methodists*.

METHODISTS, *Methodical Sect.* (F.) *Méthodistes*, *Méthodiques*. A sect of physicians, whose doctrine was in vogue after that of the Empirics and Dogmatists, towards the end of the first century. According to the Methodists, of whom Themison was the chief, almost every disease was dependent on contraction or relaxation;—*strictum* or *laxum*. To these two causes, they added a third—*mixed* or *compound*—to in-

clude those affections which partook of the two characters. The doctrine resembled, in some respects, that of Brown.

METHODOLOGY, (MEDICAL) *Methodolog'ia Medica*, from *μεθόδος*, 'method,' and *λόγος*, 'a discourse.' A word used, by the French more especially, to signify *method* applied to the study of any science. *Medical-Methodology*, consequently, means *method* applied to the study of Medicine.

METHODUS CELSIANA, see *Lithotomy*—*m. Curatoria*, Therapeutics—*m. Franconiana*, see *Lithotomy*—*m. Guytoniana*, see *Lithotomy*—*m. Medendi*, Therapeutics.

METHOMANIA, from *μεθρ*, 'drunkenness,' and *μανία*, 'mania.' An irresistible desire for intoxicating substances.

METOPAGES, *Symphyocephalus*.

METOPANTRAL'GIA, from *μετωπον*, (*μετω*, and *ων*, 'the eye,') 'the forehead,' *αντρον*, 'a cavity,' and *αλγος*, 'pain.' Pain in the frontal sinuses.

METOPANTRITIS, from *μετωπον*, 'the forehead,' *αντρον*, 'a cavity,' and *itis*, denoting inflammation. Inflammation of the frontal sinuses.

METOPION, *Bubon galbanum*.

METOPODYNIA, *Neuralgia frontalis*.

METOPON, Front, Frontal bone.

METOPOS/COPY, *Metoposcop'ia*, from *μετωπον*, 'the forehead,' and *σκοπειν*, 'to view.' The art of knowing the temperament and character of a person, by inspecting the traits of his forehead or face. See *Physiognomy*.

METRA, Uterus.

METRAL'GIA, from *μητρα*, 'the womb,' and *αλγος*, 'pain.' Pain in the uterus.—*Bal-dinger*.

METRANASTROPHE, Uterus, inversion of the.

METRATRE'SIA, from *μητρα*, 'the womb,' and *αργισια*, 'imperforation.' An unnatural closure of the uterus.

METRELCO'SIS, *Metrelco'sis*, from *μητρα*, 'the womb,' and *ελκος*, 'an ulcer.' Ulceration of the uterus.

METREMPHRAX'IS, from *μητρα*, 'the uterus,' and *εμφρασω*, 'I obstruct.' Obstruction of the womb. A name, under which some authors have confounded chronic inflammation of that viscus, and the different degenerations to which it is exposed.

METREN'CHYTA, *Metren'chyles*, from *μητρα*, 'the uterus,' and *εγχυω*, 'I inject.' Injection of the uterus. Substances injected into the uterus are also called *Metren'chyla*.

METRHELCO'SIS, *Metrelcosis*.

METRIOPATHIA, from *μετριος*, 'tempered,' and *παθος*, 'affection.' State of an individual, whose passions are temperate.

METRI'TIS, from *μητρα*, 'the womb;' *Fecbris uteri'na*, *Hysteri'tis*, *Empres'ma Hysteri'tis*, *Inflammat'io Uteri*, *Inflammat'ion of the Uterus or Womb*, (F.) *Inflammat'ion de la matrice*. The characteristic symptoms of this affection are:—pain, swelling, and tenderness in the hypogastric region; with heat, pain, and tenderness of the os uteri; vomiting, smallness, and frequency of pulse. It occurs, most frequently, after delivery, when there is, generally, suppression of the lochial discharge. The treatment must be vigorous,—as bleeding early, so as to make a

decided impression: followed by a full dose of opium, fomentations, blisters, &c.

Acute inflammation of the womb, seated in its internal membrane, has been called *Inflammat'io catarrhalis uteri* or *Acute catarrh*, (F.) *Catarrhe aigu*, of that viscus. It is known by the discharge of a clear, stringy fluid, *per vaginam*; preceded by pains, which, from the hypogastric region, shoot to the thighs, groins, &c. with more or less fever. It requires the antiphlogistic treatment. *Chronic metritis* sometimes succeeds the acute. To it must be referred the indurations, observed in the uterus, and many of the leucorrhœal discharges, to which females are subject.

METROCARCINO'MA, *Cancer uteri*, from *μητρα*, 'the uterus,' and *καρκινωμα*, 'cancer.' Cancer of the uterus.

METROCELIDES, *Nævus*.

METROHE'MIA, *Hypermetrœhémie*, from *μητρα*, 'the uterus,' and *αιμα*, 'blood.' Hyperæmia or congestion of blood.

METROHEMORRHAGE, *Metrorrhagia*.

METROLOXIA, *Hysteroloxia*.

METROMANIA, *Nymphomania*.

METROPATHIA, from *μητρα*, 'the womb,' and *παθος*, 'affection.' An affection of the womb.

METROPERITONITIS, from *μητρα*, 'the uterus,' and *peritonitis*. Inflammation of the uterus and peritoneum. Puerperal Fever. See *Peritonitis*.

METROPTOSIS, *Prolapsus uteri*.

METRORRHA'GIA, *Hæmorrh'gia uteri'na*, *Sanguiflux'us uteri'nis*, *Hæmorrh'gia uteri'na*, (of some,) *Menorrh'gia*, (of some,) *Uterine Hemorrhage*, *Hemorrhage from the Womb*, *Metrorrhœmorrhage*, (F.) *Hémorrhagie de la Matrice*, *Perte*, *Perte utérine rouge*, from *μητρα*, 'the womb,' and *ρηννυμι*, 'I break forth.' An effusion of blood from the inner surface of the uterus, either at the menstrual or other periods; but in a greater quantity than proper. Uterine hemorrhage may be caused by those influences which produce hemorrhage in general. It happens, however, more frequently during pregnancy, and during or after delivery, when the vascular system of the uterus is so circumstanced as to favour its occurrence more than at other periods. The termination of metrorrhagia is usually favourable. Should it, however, be very copious, or frequently recur; or, should it happen to a great extent after delivery, death may occur very speedily; and, in some cases, without the discharge being perceptible; constituting *internal hemorrhage*.

Uterine hemorrhage may be *active* or *passive*; requiring obviously a different treatment. The general management is similar to that of *Hemorrhage* in general, (q. v.): as the horizontal posture; acid drinks; free admission of cool air; cold applications to the loins, thighs, and abdomen; injection of cold water, even of iced water, into the vagina; plugging the vagina, so as to prevent the discharge *per vaginam*, and thus induce a coagulum in the mouths of the bleeding vessel. Such will be the *special* plan adopted where the hemorrhage has occurred in one not recently delivered. In uterine hemorrhage, after delivery, the same cooling plan must be followed; but, as the flow of blood is owing to the uterus not contracting so as to constrict its vessels, pressure must be made

on the abdomen to aid this; and, if necessary, the hand must be introduced into the uterus to stimulate it to contraction. Should the female be excessively reduced, so as to render the accoucheur apprehensive that she may expire from loss of blood, brandy may be exhibited. The profuse exhibition of opium in such cases, is, at least, a doubtful plan.

Transfusion (q. v.) has, at times, been practised as a last resource.

METRORRHEXIS, Uterus, rupture of the.

METROTOMIA, Cæsarean section.

MEU. *Æthusa meum.*

MEULIÈRE, Molar.

MEUM, *Æthusa meum.*

MEURTRISSURE, Contusion.

MEVIUM, Syphilis.

MEZEA, Genital organs.

MEZEREON, *Daphne Mezereum.*

MIASM, *Mias'ma*, *μῑσμα*, 'a stain,' from *μῑαινω*, 'I contaminate.' *Inquinamentum*, *Contagium*.

The word *miasm* has, by some, been employed synonymously with contagion. It is now used more definitely for any emanation, either from the bodies of the sick, or from animal and vegetable substances, or from the earth, especially in marshy districts, (*marsh poison*, *Efflu'rium palustrè*, *Gas palustrè*, (F.) *Intoxication des Marais*,) which may exert a morbid influence on those who are exposed to its action. To these terrestrial emanations—the *Koino miasmata* of Dr. E. Miller of New York—the Italians give the name *aria cattiva*, but, more commonly, *malaria*; a word which has been adopted into other languages. The deleterious effluvia, originating from the decomposition of matter derived from the human body, have been called by Dr. Miller, *Idiomiasmata*: the epithets *Koino* and *Idio* being derived respectively from *κοινος*, 'common,' and *ιδιος*, 'personal.' Of the miasms, which arise either from the animal body or from the most unhealthy situations, we know, chymically, nothing. All that we do know, is, that, under such circumstances, emanations take place, capable of causing disease in many of those who are exposed to their action.

MIASMATIC, *Miasmaticus*. Belonging or relating to miasmata. Sauvages, in his classification of diseases according to their etiology, has a class under the name *Morbi miasmatici*. The fevers that arise from marshy miasms, are styled *malaria*, *paludal*, *Helop'yræ*, *Helopyretoi*, &c.

MICÆ PANIS. See *Triticum*.

MICATIO CORDIS, Systole.

MICHELIA CHAMPACA, *Champaca*, *Champacum*, *Michelia Tsjampaca*, *Tsjampaca*. An Oriental tree, much prized for the odour and beauty of its flowers. The oily infusion of the flowers is employed, in the Moluccas, in headache.

MICOSIS, *Frambæsia*.

MICROCEPHALUS, *Microcranius*, from *μικρος*, 'small,' and *κεφαλη*, 'head.' A monster having a small head, or a small cranium.

MICROCRANIUS, *Microcephalus*.

MICROCOSM, *Microcos'mus*, from *μικρος*, 'little,' and *κοσμος*, 'world.' A little world. Some philosophers have given this appellation to man, whom they consider as the epitome of all that is admirable in the world. The world they call *Macrocosm*.

MICROCOSMA SCIENTIA, Physiology.

MICROCOSMOGRAPHIA, Physiology.

MICROCOUSTIC, *Microcous'ticus*, from *μικρος*, 'small,' and *ακουω*, 'I hear.' This word, as well as *Microphonous*, from *μικρος*, 'small,' and *φωνη*, 'voice,' means any thing that contributes to increase the intensity of sound—as the speaking trumpet—by collecting the sonorous rays.

MICROGLOS'SIA, from *μικρος*, 'small,' and *γλωσσα*, 'tongue.' Original smallness of tongue.

MICROLEUCONYMPHÆA, *Nymphæa alba*.

MICROM'ELUS, *Hemimeles*, from *μικρος*, 'small,' and *μελος*, 'a limb.' A monster having imperfectly developed extremities.

MICROMMATUS, *Microphthalmus*.

MICROPHTHALMOS, from *μικρος*, 'little,' and *οφθαλμος*, 'eye.' One who has small eyes.

MICROPHTHALMUS, *Micro'matus*, from *μικρος*, 'small,' and *οφθαλμος*, 'eye.' A monster with too small, or imperfectly developed eyes.

MICROR'CHIDES, from *μικρος*, 'small,' and *ορχις*, 'a testicle.' They who have very small testicles.

MICROSPHYC'TOS, from *μικρος*, 'small,' and *σφυγμος*, 'pulse.' One who has a small pulse.

MICTIO CRUENTA, *Hæmaturia*—m. Inopportuna, *Enuresis*—m. Involuntaria, *Enuresis*—m. Sanguinea, *Hæmaturia*.

MICTURITION, *Mictio*, *Mictus*, from *Micturio*, 'I make water.' The act of making water.

MICTUS CRUENTUS, *Hæmaturia*.

MIDRIFF, Diaphragm.

MIDWIFE, from *μῑδω*, 'with,' and *νῑφ*, 'wife;' or, from *μῑδω*, 'need,' 'recompense,' and *νῑφ*, 'wife.' *Matro'na*, *Obste'trix*, *Hyper'tria*, *Mæa*, *Mæutria*, *Acces'toris*. (F.) *Sage-femme*, *Accoucheuse*. A female who practises midwifery.

MIDWIFERY, Obstetrics.

MIEL, *Mel*—m. d'Acétate de Cuivre, *Lini'mentum æuginis*—m. *Mercuriale composé*, *Mellitum de mercuriali composum*—m. *Rosat*, *Mel Rosæ*.

MIEUTER, *Accoucheur*.

MIGRAINE, *Hemicrania*.

MIGRANA, *Hemicrania*.

MIKANIA GUACO, *Guaco*.

MILFOIL, *Achillea millefolium*.

MILIAIRE, Miliary fever.

MILIARIA SUDANS, Miliary fever—m. Sudatoria, Miliary fever.

MIL'IARY (FEVER,) *Emphlysis milia'ria*, *Miliaria*, *M. sudans*, *Miliaris*, *M. sudatoria*, *Febris miliaris*, *Exanthema miliaria*, *Syn'ochus miliaria*, *Aspre'do miliacea*, *Febris essero'sa*, *Febris puncticul'a'ris*, *F. culicula'ris*, *F. vesicula'ris*, *Pur'pura puerpera'rum*, *F. milia'ris*, *Febris purpura'te rubra et alba milia'ris*, *Pur'pura alba benign'a et malign'a*, *Sudam'ina*, *Pap'ulæ sudor'is*, *Millet-seed rash*, (F.) *Milaire*, *Millet*, *Pourpre blanc*, *Millet*. It is so called from the eruption resembling the seed of the *milium* or *millet*. Fever, accompanied by an eruption of small, red, isolated pimples, rarely confluent, but almost always very numerous, slightly raised above the skin, and presenting, at the end of 24 hours, a small vesicle filled with a white, transparent fluid; which quickly dries up, and separates in the form of scales. Miliary fever is now rare, in consequence of the cool-

ing practice in fevers and other states of the system. It is, almost always, brought on by external heat, and hence the prevention is obvious. The treatment is simple. It requires merely the antiphlogistic regimen, in ordinary cases.

MILINARY GRANULATIONS or TUBERCLES. See Granulation.

MILII SEMINA, *Panicum Italicum*.

MILIOLUM. Diminutive of *mil'ium*, 'millet,' *Cenchr'id'ion*. A small tumour on the eyelids, resembling, in size, a millet-seed.

MILITARIS HERBA, *Achillea millefolium*.

MILIUM, *Grutum*, *Panicum miliaceum*, see Hydatid—*m. Indicum*, *Panicum Italicum*—*m. Solis*, *Lithospermum officinale*.

MILK, *Sax. meole*, *Luc. Gula*, (F.) *Lait*. A fluid, secreted by the mammary glands of the females of the mammalia. The skimmed milk of the cow, (F.) *Lait de Vache*, contains water, caseous matter, traces of butter, sugar of milk, chloride of sodium, phosphate, and acetate of potass, lactic acid, lactate of iron, and earthy phosphate. The cream is formed of butter, caseum, and whey, in which there is sugar of milk and salts. Cow's milk is employed for the preparation of cream, butter, cheese, whey, sugar of milk, and frangipane. It is useful in a number of cases of poisoning; either by acting as a demulcent, or by decomposing certain poisons, or by combining with others so as to neutralize them. It is constantly employed as aliment, and may be regarded as an emulsion, in which butter and caseum are found in suspension. When taken into the stomach, it is coagulated by the gastric fluids, and the coagulum is digested like any other solid. The watery parts are absorbed.

MILK, ALMOND, *Emulsio amygdalæ*.

MILK, ASSES', (F.) *Lait d'anesse*, considerably resembles human milk, of which it has the consistence, smell, and taste: but it contains a little less cream, and more soft, caseous matter. It is often used by those labouring under pulmonary affections.

MILK, EWES', (F.) *Lait de Brebis*. It affords more cream than cows' milk; but the butter is softer. The caseum, on the contrary, is fatter, and more viscid. It contains less serum than cow's milk. The Roquefort cheeses are made from it.

MILK, GOATS', (F.) *Lait de Chèvre*,—resembles cows' milk: the butyraceous matter, however, which enters into its composition, is more solid than that of the cow.

MILK, HUMAN, (F.) *Lait de femme*,—contains more sugar, milk, and cream, and less caseum, than cows' milk. Its composition differs according to the distance of time from delivery.

MILK, MALE'S, *Sperm*.

MILK, MARES', (F.) *Lait de Jument*,—contains only a small quantity of fluid butyraceous matter; a little caseum, softer than that of cows' milk, and more serum.

From a considerable number of experiments, Messrs. Deyeux and Parmentier class the six kinds of milk, which they examined, according to the following table, as regards the relative quantity of the materials they contain.

Caseum.	Butter.	Sugar of Milk.	Serum.
Goat Sheep Cow	Sheep Cow Goat	Woman Ass Mare	Ass Woman Mare
Ass Woman Mare	Woman Ass Mare	Cow Goat Sheep	Cow Goat Sheep

MILKSCALL, *Porrigo larvalis*.

MILK SICKNESS. A disease occasionally observed in the States of Alabama, Indiana, and Kentucky, and which affects both man and cattle, but chiefly the latter. It is attributed in cattle to something eaten or drunk by them; and in man to the eating of the flesh of animals labouring under the disease. Owing to the tremors that characterize it in animals, it is called the *Trembles*.

The symptoms of the disease are such as are produced by the acro-narcotic class of poisons—vomiting, purging, extreme nervous agitation, &c.: and the approved indications of treatment appear to be—gentle emetics and laxatives, with quiet, and mucilaginous drinks.

MILK, SNAKES', *Euphorbia corollata*—*m. Spots*, *Strophulus*—*m. Sugar of*, *Sugar of milk*—*m. of Sulphur*, *Sulphur præcipitatum*—*m. Vetch*, *Astragalus verus*—*m. Vetch*, stemless, *Astragalus exscapus*—*m. Weed*, *Asclepias Syriaca*, *Euphorbia corollata*—*m. Wort*, bitter, *Polygala amara*—*m. Wort*, common, *Polygala*—*m. Wort*, rattlesnake, *Polygala senega*.

MILLEFEUILLE, *Achillea millefolium*.

MILLEFOLIUM, *Achillea millefolium*.

MILLEMORBIA SCROPHULARIA, *Scrophularia nodosa*.

MILLEPEDES, *Onisci aselli*.

MILLEPERTUIS ORDINAIRE, *Hypericum perforatum*.

MILLET, *Miliary fever*—*m. Barbadoes*, *Panicum Italicum*—*m. Common*, *Panicum miliaceum*—*m. Indian*, *Panicum Italicum*—*m. des Oiscaux*, *Panicum Italicum*—*m. Ordinaire*, *Panicum miliaceum*.

MILLET-SEED RASH, *Miliary fever*.

MILLIGRAMME, from *mille*, 'a thousand,' and *γρμμα*, 'a gramme.' The thousandth part of a gramme;—about 0.0154 Troy grain.

MILLIGRANA, *Herniaria glabra*.

MILLIMÈTRE, from *mille*, 'a thousand,' and *μετρον*, 'measure.' The thousandth part of the metre;—equal to 0.03937 Engl. inch, or about two-fifths of a line.

MILL MOUNTAIN, *Linum catharticum*.

MILLOT, *Miliary fever*.

MILPHÆ, *Madarosis*.

MILPHOSIS, *Madarosis*.

MILT WASTE, *Asplenium*.

MIMOSA NILOTICA, see *Acaciæ gummi*—*m. Scandens*, *Cachang*, *Parang*—*m. Senegal*, see *Senegal*, gum.

MIND, ABSENCE OF, *Aphelxia socors*—*m. Abstraction of*, *Aphelxia intenta*—*m. Unsound*, *Insanity*.

MINERALIUM, *Antimonium*.

MINER'S ELBOW. An enlargement of a bursa over the olecranon, occurring in such as are in the habit of leaning much upon it; and, therefore, often seen on those who work on the side in low-roofed mines.

MINIMUM. A *minim*, 'the least part or portion.' The 60th part of a fluidrachm. This measure has been introduced by the London College of Physicians, in consequence of the uncertainty of the size of the drop, (see Gutta.) The subdivision of the wine pint has, accordingly, been extended to the 60th part of the fluidrachm; and glass measures, called *minim* measures, have been adopted by the London College. The proportion between the *minimis* and the drops of various fluid preparations is exhibited in the following table. The results were obtained by Mr. E. Durand, a skilful *Pharmacien*, of Philadelphia, under circumstances as regards the different articles, as nearly identical as possible.

TABLE OF THE NUMBER OF DROPS OF DIFFERENT LIQUIDS EQUIVALENT TO A FLUIDRACHM.

MINISTER GYMNASTÆ, *Pædotriba*.
MINIUM, *Plumbi oxydum rubrum*—m. *Græcorum*, *Hydrargyri sulphuretum rubrum*—m. *Purum*, *Hydrargyri sulphuretum rubrum*.
MINORATIVUS, *Laxative*.
MINT, COCK, *Tanacetum balsamita*—m. Curled, *Mentha crispa*—m. Cat, *Nepeta*—m. Horse, *Nardoda punctata*—m. Hyssop-leaved, *Mentha cervina*—m. Pepper, *Mentha piperita*—m. Spear, *Mentha viridis*—m. Water, *Mentha aquatica*.
MINUTHEISIS, *Meiosis*.
MISANTHRO'PIA, *Misanthropy, Exanthro'pia*, from *μισος*, 'hatred,' and *ανθρωπος*, 'man.' Aversion for men and society. A symptom of melancholy and hypochondriasis.

MISCARRIAGE, *Abortion*.
MISERERE MEI, *Ileus*.
MISHME'LEETA, *Coptis Teeta*.
MISMAR, *Mesemar*. A name given by Avicenna to a kind of nodus, which forms on the toes as the sequel of contusion or inflammation of those parts.
MISOPTO'CHOS, from *μισος*, 'hatred,' and *πτοχος*, 'poor.' That which has hatred for the

poor. The gout (q. v.) has been so called by some, because it commonly affects the rich.

MISTLETOE, *Viscum album*.
MISTURA. A *mixture*; from *miscere*, *mixture*, 'to mix.' A mingled compound, in which different ingredients are contained in the fluid state; suspended or not by means of mucilaginous or saccharine matter. In this sense, it is synonymous with the French *Potion*. In France, however, the word *mixture* is more frequently understood to mean a liquid medicine, which contains very active substances, and can only be administered by drops. A mixture, in other words, in the French sense, may be regarded as a *potion*, (q. v.) deprived of watery vehicle.

MISTURA AC'IDI HYDROCYAN'ICI, *Mixture of Prussic acid, Mélange pectoral* (Magendie.) (*Medicinal prussic acid*, 1 drachm, distilled water, ℥14, pure sugar, ℥iss.) A dessert spoonful every morning and evening, as a pectoral, &c.

MISTURA AMMONI'ACI, *Lac ammoniaci, Mixture of ammoniac.* (*Ammoniac*, ℥ij, aquæ Oss. Rub the ammoniacum: adding the water gradually, until they are perfectly mixed.) Dose, f. ℥ss to f. ℥j.

MISTURA AMYGDALÆ, *Emulsio amygdalæ*.
MISTURA ASAFÆTIDÆ, *Lac asafetidæ, Emulsio antihyster'ica, Mixture of asafetida*, (F.) *Lait d'asafetida*. (*Asafetidæ*, ℥ij, aquæ, Oss. Rub together, adding the water by degrees.) Used where pills cannot be swallowed, and as a glister in irritations during dentition, and in ascariides. Dose, f. ℥ss to f. ℥iss.

MISTURA ASAFÆTIDÆ PRO CLYSMATE, *Enema fætidum*.

MISTURA CAM'PHORÆ, *Aqua camphoræ* (Ph. U. S.) *Camphor mixture, Camphor julep*, *Mistura camphorata*, *Julu'pium e camphorâ seu camphoratum*, (F.) *Julep camphoré*. (*Camphor* ℥ss; rectified spirit, 10 minims, water, a pint. Rub the camphor and spirit; add the water and filter.) Virtues like those of camphor. See *Emulsio Camphoræ*.

MISTURA CORNU USTI, *Decoctum cornu cervi'ni, Decoctum album, Decoction of burnt hartshorn, Mixture of burnt hartshorn.* (*Cornuum ust.* ℥ij, *acaciæ gum.* cont. ℥j, aquæ Oij. Boil to Oij, constantly stirring and strain. Ph. L.)

MISTURA CRETÆ, *Potio carbonatis calcis, Mistura creta'cea, Mucilago cret'ica, Chalk mixture*, (F.) *Mixture de craie*. (*Cretæ pp.* ℥ss, *sacchar.*, *acaciæ gum.* in pulv. aa ℥ij, aquæ cinnam. aquæ, aa f. ℥iv. Mix. Ph. U. S.) Antacid and absorbent. Dose, f. ℥j to f. ℥ij.

MISTURA DIABOL'ICA. A mixture under this name is kept in military hospitals for the malignerers. It is made of sundry nauseous ingredients, as alces, asafetida, castor, &c., and is given so as to keep up a disagreeable depression on the gustatory nerves.

MISTURA EMETI'NÆ VOMITO'RIA, *Emetic Mixture of emetine.* (*Emetine*, 4 gr., orange-flower water ℥ij, syrup, ℥ss, M.) A dessert spoonful every half hour till it acts.

MISTURA FERRI COMPOS'ITA, *Compound mixture of iron*, (F.) *Mixture de fer composée, Griffith's mixture.* (*Myrrh* cont. ℥j, *potassæ carb.* gr. xxv, aquæ rosæ, f. ℥viiss, *ferri sulph.* cont. ℥j, *sp. lavand.* ℥ss, *sacchar.* ℥j. Rub together the myrrh, subcarbonate of potass, and sugar; then add, while triturating, the rose-water, spirit of nutmeg; and, lastly, the sulphate of iron.

Pour the mixture directly into a glass bottle, and stop it close. Ph. U. S.) It is tonic and emmenagogue, and is useful wherever iron is indicated.

MISTURA GUA'IACI, *Mixture of guaiac*, *Lac guaiaci*, *Emul'sio guaiaci'na*, *Mistura guaiaci gummo'sa*, *M. gummi guaiaci Berge'ri*, *Solu'tio guaiaci gummo'sa*, *S. resinæ guaiaci aquo'sa*, (F.) *Mixture de Gayac*. (*Guaiac. G. resin.* ζ iss, *sacch. pur.* ζ ij, *muc. acacie gum.* ζ ij, *aq. cinnaum.* f. ζ viiij). Rub the guaiacum with the sugar; then with the mucilage. Add, gradually, the cinnamon water. Ph. L.) Dose, f. ζ ss to f. ζ ij.

MISTURA GUMMI GUAIACI BERGERI, *Mistura Guaiaci*—m. Leniens, Looch ex ovo.

MISTURA MOSCHI, *Musk Mixture*, *Mistura moschata*. (*Moschi*, *acacie gum contus.*, *sacch. purif.*, *sing.* ζ j, *aq. rose* f. ζ vj). Rub the musk with the sugar; add the gum, and, by degrees, the rose-water. Ph. L.) Dose, f. ζ ss to f. ζ ij.

MISTURA STRYCHNIÆ, *Mixture of strychnia*. (*Distilled water*, ζ ij, *very pure strychnia*, 1 gr., *white sugar* ζ ij, M.) Dose, a dessert spoonful.

MISTURA SULPHURICO-ACIDA, *Elixir acidum Halleri*—m. *Vulneraria acida*, *Arquebusade cau d'*.

MITELLA, Sling.

MITHRIDATE, *Mithridatium*, *Antid'otum Mithridatum*, *Diascin'ci antid'otus*, *Confectio Damoc'ratis*. A very compound electuary, into which entered—*Myrrh*, of Arabia, *Saffron*, *Agaric*, *Ginger*, *Cinnamon*, *Frankincense*, *Garlic*, *Mustard*, *Birtherwort*, *Galbanum*, *Castor*, *Long pepper*, *Opoponax*, *Bellium*, *Gum Arabic*, *Opium*, *Gentian*, *Orris*, *Sugapenum*, *Valerian*, *Acacia*, *Hypericum*, *Canary wine*, *Honey*, &c. It was invented by Mithridates, king of Pontus and Bithynia, and was formerly regarded as alexipharmic. It is little used at the present day; and, from its heterogeneous nature, should be wholly abandoned.

MITRA HIPPOCRATICA, *Bonnet d'Hippocrate*.

MITRAL, *Mitra'lis*. Having the form of a mitre; resembling a bishop's mitre.

MITRAL VALVES, *Val'vulæ mitra'les*, *V. episcopa'les*. Two triangular valves, at the opening of communication between the left auricle of the heart and the corresponding ventricle. These valves are formed by the inner membrane of the left cavities of the inner heart; and are retained on the side of the ventricle by tendinous cords, proceeding from the columnæ carneæ. They form species of valves, which permit the blood to pass from the auricle into the ventricle and oppose its return.

MITTE (F), *Efflu'rium Latrind'rium*. An emanation exhaled from privies, which strongly irritates the eyes. It consists of ammonia, united to the carbonic and hydro-sulphuric acids.

MIXTURE, *Mistura*—m. of Ammoniac, *Mistura ammoniaci*—m. of Asafetida, *Mistura Asafetidæ*—m. *Calmante*, Looch ex ovo—m. Camphor, *Mistura camphoræ*—m. Camphor, *Mistura camphoræ*—m. Chalk, *Mistura Cretæ*—m. de Craie, *Mistura cretæ*—m. of Emetine, emetic, *Mistura emetinæ vomitoria*—m. de Fer composée, *Mistura ferri composita*—m. de Gayac, *Mistura Guaiaci*—m. Griffith's, *Mistura ferri composita*—m. of Guaiac, *Mistura Guaiaci*—m. of Hartshorn, burnt, *Mistura cornu usti*—m. compound, *Mistura ferri composita*.

MIXTURE, HOPE'S. A mixture prepared by

Mr. Hope, for diarrhœa and dysentery, and much used in this country. It is essentially a nitrate of morphia. Although the proposer employed the acidum nitrosus of the Edinburgh Pharmacopœia, nitric acid is generally used. (*Acid. nitros. f. ζ j*; *Aquæ camphor. f. ζ viiij*; *Tinct. opii gut. xl. M.*) Dose, a fourth part every three or four hours.

MIXTURE, MUSK, *Mistura Moschi*—m. Neutral, *Liquor Potassæ Citratæ*—m. of Prussic acid, *Mistura acidi hydrocyanici*.

MIXTURE, SCUDAMORE'S. A mixture recommended by Sir C. Scudamore in gouty and rheumatic affections, and much prescribed in the United States. *Magnes. sulph. ζ i— ζ ij*; *Aquæ menthæ f. ζ x*; *Aceti colchic. f. ζ j—f. ζ iss*; *Syrup croci f. ζ j*; *Magnes. ζ viiij*. M. Dose, one, two or three tablespoonfuls, repeated every two hours on a paroxysm of gout, until from four to six evacuations are produced in the twenty-four hours.

MIXTURE OF STRYCHNIA, *Mistura strychniæ*.

MNEME, Memory.

MNEME CEPHALICUM BAL'SAMUM. A very compound medicine, into which entered *Balm*, *Lily*, *Rosemary*, *Lavender*, *Borage*, *Broom*, *Roses*, *Violet*, *Saffron*, *Thyme*, *Storax*, *Galbanum*, &c.

MNEMONETICE, Mnemonics.

MNEMONICS, *Mnemon'icæ*, *Mnemonet'icæ*, from *μνημα*, 'I recollect.' The art of aiding the memory by signs; and of forming, in some sort, an artificial memory.

MOANING, from Sax. *mænan*, 'to grieve.' *Respira'tio luctuo'sa*, *Mychthis'mos*. A plaintive respiration, in which the patient utters audible groans.

MOBILE, see Saint Augustine.

MOBILITY, *Mobil'itas*, from *mobilis*, contraction of *movibilis*, 'that can be moved.' The power of being moved. In physiology, great nervous susceptibility, often joined to a disposition to convulsion. Greatly developed excitability.

MOCHLIA. Reduction of a luxated bone; from *μοχλος*, a lever.

MOCHLICUS, Purgative.

MOCK KNEES, *Crusta genu equinæ*.

MODIOLUS, 'the nave of a wheel.' One of the hollow cones in the cochlea of the ear, forming a nucleus, axis, or central pillar, round which the gyri of the cochlea pass. The modiolus forms the inner and larger portion of the central pillar, and is the cavity seen at the bottom of the meatus auditorius internus. It lodges a branch of the auditory nerve. The central portion of the modiolus contains a number of minute canals, and is called in consequence *Tractus spiralis foraminulosus*. Into these the nerves of the cochlea enter, and pass out at right angles between the bony plates forming the *Zona ossea* of the *lamina spiralis*, to be expanded on the membranous portion of the *lamina*.

MODIOLUS also means the Crown of the tripod.

MODIUS. A dry measure, the third of an amphora, equal to the bushel.—Varro.

MODUS OPERANDI, 'mode of operating.' This term is applied to the general principle upon which remedies act in morbid states of the body;—a subject of much interest, although involved in considerable obscurity.

The following classification will convey some

idea of the ways in which different organs may be excited into action.

TABLE.

1. By actual or immediate contact of the remedy, and by absorption or immediate contact.
2. By an impulse conveyed by the nerves, through an impression made on the stomach or elsewhere.
3. By contiguous or continuous sympathy, or by that which is excited by mere proximity and continuity of parts.

MOËLLE, Marrow—*m. Allongée*, Medulla oblongata—*m. Epinière*, Medulla spinalis—*m. Vertébrale*, Medulla spinalis.

MOFETTE. See Mephitism.

MOFAT, MINERAL WATERS OF. Mofat is a village situate about 56 miles S. W. of Edinburgh. The water is a cold sulphureous: containing, in a wine gallon, 36 grains of chloride of sodium, 5 cubic inches of carbonic gas, 4 of azote, and 10 of sulphohydric acid. It resembles Harrogate water in its properties.

A strong chalybeate spring was discovered there about the year 1823, which contains sesquisulphated peroxide of iron, sulphate of alumina, and uncombined sulphuric acid.

MOGILALIA, from *μογίς*, 'with difficulty,' and *λαλέω*, 'to speak.' Difficult articulation. This word is inaccurately written by Paul Zachias,—*Mola'lia*, and *Molild'lia*. Impediment of speech. See Balbuties.

MOGOSTOCIA, Dystocia.

MOHAWK TASSEL, *Eupatorium purpureum*.

MOIS, Menses.

MOISTURE, *Mador*, (F.) *Moïteur*, anciently *moisteur*. Simple humidity of the skin. The skin is said to be moist or in a state of moisture, when there is slight perspiration.

MOÏTEUR, Moisture.

MOLA, Patella.

MOLAGOCODI, *Piper nigrum*.

MOLAIRE, Molar.

MOLALIA, Mogialia.

MOLAR, *Mola'ris*, *Mylicus*, (F.) *Molaire*, *Meulière*. That which bruises or grinds; from *molaris*, 'a grindstone,' or *mola*, 'a millstone.'

MOLAR GLANDS. Two small bodies formed by a collection of mucous crypts; seated in the substance of the cheeks, between the masseter and buccinator muscles, and whose excretory duct opens into the mouth opposite the last molar tooth.

MOLAR TEETH, *Grinders*, *Jaw Teeth*, *Molares permanentes dentes*, *Dentes molares*, *Gomphioi*, (F.) *Dents molaires* ou *mâchelières*, occupy the farther part of each alveolar arch. Their coronæ are broader than they are high: unequal, tuberculated; and the roots are more or less subdivided. They are 20 in number, 10 in each jaw. The first two pairs of molar teeth, in each jaw, have been called *lesser molares* or *bicuspid* (q. v.), *Dentes bicuspidati*. The coronæ have two tubercles; the outer being more prominent and larger than the inner. The root is commonly simple; sometimes bifurcated. The other three pairs have been termed, *Great molares*—*Dents multicuspidées* (Ch.) Their coronæ are cubical, rounded, and have, at the upper surface, four or five tubercles, separated by deep furrows. The root is divided into two, three, four, and five *fangs*, which are more or less curved. The third great molaris appears a long time after the others; and, hence, has been called *Dens sapientiæ* or *Wisdom tooth*.

MOLASSES, Melasses.

MOLE, *Molt*, from *moles*, 'mass.' *Mylē*, *Zephyrius fetus*, *Germen falsum*, *Pseudocye'sis molaris*, *Graviditas molaris*. A fleshy, insensible, at times, soft—at others, hard—mass; of variable and indeterminate size, which forms in the uterus, and is slightly united by vessels to that organ; from which its feeble vitality is derived. It has been conceived by some to be always owing to imperfect conception; but moles may form in the undoubted virgin. They seem to be owing to a morbid process; and certainly are generally connected with conception. At times, they contain parts of the fetus; but commonly do not. At very different periods, in different women, the diseased mass is expelled from the uterus, with ordinary symptoms of abortion; and the case requires similar management. See, also, *Nævus* and *Conception*, (*false*.)

MOLECULE, *Molec'ula*, *Mass'ula*; diminutive of *Moles*, 'a mass.' A minute portion of any body. Also, the *cicatricula*, *ma'cula*, *treed of the cock*, or embryo part of the impregnated ovum, observable by the microscope before the ovum has left the ovarium of the hen. It lies under the epidermic coats of the yolk, and upon its proper coat. If the ovum, according to Valentin, be lacerated and its contents minutely examined, the cicatricula is found like a grayish white disk, which in its whole periphery is dense, granulous, and opaque, but in the centre presents a clear nongranulous and perfectly diaphanous point. Purkinje found, that when he removed the dark granulous mass by suction with a small tube, there remained a perfectly transparent vesicle filled with a pellucid lymph, which had a decidedly spherical form, but being extremely delicate, was easily lacerable, and then its fluid escaped. As he found this, which later naturalists have named—after its discoverer—the *Purkinjean vesicle*, in the ova of the ovary, but could not see it in ova, which had already entered the oviduct, he gave it the name *germinal vesicle*, *vesic'ula prolifera* seu *germinati'va*. Besides a perfectly colourless fluid, this contains one or more dark corpuscles, which appear as nuclei through the including membrane in the shape of opaque spots—the *germinal spot*—*macu'la germinati'va*, *nucleus germinati'vus*. The granulous membrane—its thickened portion, the so called "cicatricula,"—and the germinal vesicle, constitute those parts of the ovum, which pass immediately into the original foundation of the embryo, the *blastodermis* or *germinal membrane*.

MOLEC'ULAR, *Molecu'laris*. Of or belonging to molecules or minute portions of any thing. Hence *molecular death*, in contradistinction to *somatic death*.

MOLÈNE, *Verbascum nigrum*.

MOLIMEN, from *molior*, 'to move or stir.' 'An attempt to struggle.'

MOLIMEN HÆMORRHAG'ICUM. The hemorrhagic diathesis or impulsion.

MOLIMEN HÆMORRHOIDAL'È. The hemorrhoidal diathesis or impulsion. See *Hæmorrhoids*.

MOLIMEN MENSTRUAL'È. The menstrual diathesis or impulsion.

MOLLESCENCE, *Mollities*.

MOLLET, *Sura*.

MOLLIPUFFS, *Lycoperdon*.

MOLLIS MATER, *Pia mater*.

MOLLI'TIES, *Molles'cenæ Malacis'mus*, (F.) *Ramollissement*, from *mollis*, 'soft.' Preternatural softness of an organ or part of an organ.

MOLLITIES CEREBRI, *Malaco'sis Cer'ebrî, Encephalomala'cia, Necrenceph'alus* (W. Farr.) *Mollescence*, or *softening*, or a kind of liquefaction of the cerebral substance; the remainder preserving its ordinary consistency, (F.) *Ramollissement du cerveau, Apoplexie capillaire*, (Cruveilhier.) The symptoms denoting it are equivocal.

MOLLITIES OS'SIUM, *Malacosteo'sis, Malaco'steon, Paros'tia, flex'ilis, Osteosarco'sis, Spina rento'sa* (of some.) *Osteomalh'cia, Soft'ening of the bones*, (F.) *Ostéo-malacie, Ostéo-malaxie, Ostéo-malakie, Ramollissement des os*. A rare affection in which the bones are deprived of their salts, particularly of the phosphate of lime, and consist only, or mainly, of gelatin; hence they acquire a degree of suppleness, which renders them unfit for the performance of their functions. The disease generally affects all the bones; but it is especially remarkable, during life, in the long bones, which assume any curvature that may be wished. Very violent pain is often experienced in them; and the urine frequently contains an enormous proportion of calcareous phosphate. The patient is compelled to remain in the horizontal posture; the bones no longer being fixed points for the muscles to act upon. The disease has, hitherto, always terminated fatally, and dissection has exhibited the gelatinous nature of the bones; which, by desiccation, have become transparent, as if they had been macerated in acid.

Experience has afforded no means of relief in this dreadful affliction. The alkaline salts, earthy phosphates, &c. are of little or no use.

MOLLUSCUM, *Atheroma*—*m. Contagiosum*, see *Atheroma*.

MOLOPS, *Vibices*.

MOLYBDÆNUM MAGNESII, *Manganese*, black oxide of.

MOLYBDOS, *Plumbum*.

MOLYNE, *Anus*.

MOMIE, *Mummy*.

MOMIN, *Mamei*.

MOMORDICA BALSAM'INA, *Balm-apple, Balsam apple*. (F.) *Balsamine, Pomme de merveille*. The fruit of this oriental tree, *Pomum hierosolymita'num*, was formerly considered vulnerary.

MOMORDICA ELATE'RIMUM, *Elate'rium, Cucumis agrest'is, C. asini'vus, C. sylvestris, Elate'rium officina'rum, Charan'tia, Boub'a'lios, Guarberba orba, Wild or Squinting cucumber, Echob'lium elate'rium*. (F.) *Concombre Sauvage, Momordique*. *Nat. Order, Cucurbitacæ*. The dried sediment from the juice is the elaterium of the shops. (See *Extractum Elaterii*.) It is a most powerful cathartic, and, as such, has been used in dropsies. Its active principle is the *Elatin*, *Elatérine*, or *Elatarium*. Dose, gr. $\frac{1}{4}$ to gr. j, until it operates.

MOMORDIQUE, *Momordica elaterium*.

MONAD, from *Monas*, 'unity.' A simple particle, or atom, or unit.—*Leibnitz*.

MONÆ, *Nates*.

MONARDA FISTULO'SA. The *Purple monarda*. The leaves have a fragrant smell; and an aromatic, somewhat bitter taste. They

are reputed to be nervine, stomachic, and deobstruent.

MONAR'DA PUNCTA'TA, *Horsemint*. *Sex. Syst. Diandria Monogynia. Nat. Ord. Labiatæ*. Indigenous in the United States. Stimulant and carminative. The *Oleum monardæ* is official in the United States.

MONARDA, *PURPLE, M. fistulosa*.

MONDER, (F.) from *mundus*, 'cleanly.' To render clean or pure. In *Pharmacy*, it means to separate any substance from its impure or useless portion. In *surgery*, *monder* ou *mon-difier une plaie*, is to clean or debride a wound.

MONDIFICATIFS, *Detergents*.

MONDIFIER UNE PLAÏE. See *Monder*.

MONE'MERON, *Mono'meron*; from *μνος*, 'one,' and *μεγα*, 'a day.' A name given to several collyria, which were supposed to be capable of curing diseases of the eyes in a day.

MONESIA. A vegetable extract, imported into Europe from South America within the last few years, in hard, thick cakes. It is prepared from the bark of a tree, whose botanical name is unknown. It is very friable, and its fracture very much resembles that of a well-torrefied cocoanut. It is wholly soluble in water; and its taste—which is at first sweet like liquorice, sometimes becomes astringent. It is on account of its astringent properties, that it has been prescribed in chronic bronchitis, hæmoptysis, diarrhœa, leucorrhœa, uterine hemorrhage, &c. It has been applied locally, in the form of ointment. (*Mones. p. 1. Adipis, p. vij.*) The dose of *Monesia*, is from 12 to 40 grains a day.

MONEYWORT, *Lysimachia nummularia*.

MONGO'LIAN. Anthropologists give the name *Mongolian race* to a variety of the human species, spread over a great part of the north of Asia, in China, India, Thibet, the Moluccas, &c. The individuals composing it have the skin of a brown red, forehead flat, nose broad, cheeks prominent, and lips large. See *Homo*.

MONKSHOOD, *Aconitum*—*m. Common*, *Aconitum napellus*—*m. Salutary, Aconitum anthora*.

MONNI'NA POLYSTA'CHIA. A beautiful South American plant. *Nat. Ord. Polygalææ. Sex. System, Diadelphia Octandria*. The bark of the root is a powerful astringent, and much used in South America, in diseases of the bowels.

MONOBLEP'SIS, from *μνος*, 'one,' and *βλεψις*, 'sight.' An affection, in which vision is confused, imperfect, and indistinct, when both eyes are employed; but quite perfect or nearly so, when either eye is used singly.

MONOCEPH'ALUS, from *μνος*, 'one,' and *κεφαλη*, 'head.' A compound monster having two bodies with a single head.

MONOCOLON, *Cæcum, Rectum*.

MONOCRA'NUS, from *μνος*, 'one, single,' and *κρανον*, *κρανιον*, 'cranium.' A monster with one cranium, but with the face in part double. *Gurlt*.

MONOC'ULUS, *Mon'ocle, Monophthal'mus*, from *μνος*, 'one,' and *oculus*, 'an eye.' A bandage employed to maintain topical applications over one of the eyes. This bandage, called by some surgeons *Simplex oc'ulus*, (F.) *Œil simpl.* is made of a roller three or four ell's long, rolled into a single ball. See *Cyclops*.

MONOEMERON, *Monemerone*.

MONOGAS'TRIC, *Monogast'ricus*, from *μῆρος*, 'one,' and *γαστήρ*, 'stomach.' That which has but one stomach. Man is *monogast'ric*. Ruminating animals, on the contrary, are *polygastric*.

MONOGRAPH, MED'ICAL. *Monograph'ia medica*; from *μῆρος*, 'one,' and *γραφῆν*, 'description.' An *ex professo* treatise on a single class of diseases, or on a single disease.

MONOMACHON, Cæcum.

MONOMANIA, Melancholy.

MONOMMATOS, Cyclops.

MONOPAGIA, *Clavus hystericus*, Hemiscrania.

MONOPHTHALMUS, Cyclops, Monoculus.

MONOPLASTIC, *Monoplastic'us*; from *μῆρος*, 'one,' and *πλασσω*, 'I form.' That which has one form. A *Monoplastic element* in histology is one which retains its primary form.—Gerber.

MONOPS, Cyclops.

MONOPSIA, Cyclopia.

MONOPUS, Symmeles.

MONOR'CHIS, from *μῆρος*, 'one,' and *ὄρχις*, 'testicle.' One who has only one testicle.

MONOSIT'IA, from *μῆρος*, 'one,' and *σιτος*, 'food,' 'repast.' The habit of taking only one meal in the day.

MONROIA'NUM FORA'MEN. A foramen at the anterior part of the lateral ventricles of the brain, by which they communicate with each other.—So called from the second Monro.

MONS VENERIS, *Monticulus Veneris*, *Ephebe'um*, (F.) *Mont de Venus*, *Pénil*, *Motte*, *Eminence sus-pubienne*. The more or less projecting eminence, situate at the base of the hypogastrium, above the vulva and in front of the os pubis. At the period of puberty it becomes covered with hair, formerly called *Tressoria*. (q. v.)

MONSTER, *Monstrum*, *Tercas*. Any organized being, having an extraordinary vice of conformation, or a preternatural conversion of every part, or of certain parts only. Three species of monsters are usually distinguished. The *first* comprehends those that are born with an excess of parts; as with two heads on one trunk, —two trunks with one head,—with five fingers or toes, &c. The *second* includes those with a deficiency of parts,—such as the acephali, monopes, &c.;—and the *third*, those with a deviation of parts,—as where the heart is on the right side, the liver on the left, &c. Amongst the numerous hypotheses entertained on the origin or cause of monsters, or *monstrosities*—as the state has been called—three only are worth mentioning. They have been attributed, 1. To the influence of the maternal imagination on the fœtus in utero. 2. To accidental changes, experienced by the fœtus at some period of its uterine existence: and, 3. To a primitive defect in the germs. The second seems to be the only one, that is philosophical.

As a med.co-legal question, monsters, if capable of action as individuals, have the same rights as other persons.

MONSTROSITY. See Monster.

MONT DE VÉNUS. Mons veneris.

MONTBRISON. MINERAL WATERS OF.

Montbrison is a town in France, in the department of the Loire; fifteen leagues from Lyons. There are three cold springs here, which are highly acidulous, and used as refrigerants and aperients.

MONT-DE-MARSAN, MINERAL WATERS OF. Mont-de-Marsan is a small French town, 10 leagues from Dax; where there is a chalybeate spring, somewhat frequented.

MONT-D'OR, MINERAL WATERS OF.

Mont-d'Or is a village seven leagues from Clermont (Puy-de-Dôme,) at which are several mineral springs, cold and thermal. Those of the Fountain *La Madelaine*, and of the *Great Bath*, are thermal; temp. 112° Fahr. and contain carbonic acid, subcarbonate, sulphate of soda, chloride of sodium, subcarbonate of lime and magnesia, alumine and oxide of iron. Those of *St. Margaret* are cold, and contain much carbonic acid.

MONTECATINI, MINERAL WATERS OF. This town is situate near Borgo-Bugigiano, in Tuscany. The springs are thermal; ranging from 78° to 118° Fahrenheit.

MONTHLY COURSES, Menses—m. Periods, Menses.

MONTICULUS VENERIS, Mons V.

MONTPELIER, CLIMATE OF. This seat of a celebrated medical school in the S. E. of France was at one time renowned for its climate, and especially in regard to its adaptation to consumptive cases. This is now exploded, and it is at present esteemed an unfit residence for them. The climate possesses the general characters of that of south-eastern France—being dry, hot, and irritating; subject to frequent vicissitudes, and especially to blasts of keen, cold, northerly winds. It is, indeed, most injurious in pulmonary diseases.

MOON, *Luna*, *Sel'ne*, *Menē*, Sax. *Mona*, (G.) *Mond*. (F.) *Lune*. The moon has been supposed to exert considerable influence over the human body, in health and disease. Such influence has been grossly exaggerated. Not many years ago, it would have been heretical to doubt the exacerbation of mania, at the full of the moon; yet it is now satisfactorily shown, that if the light be excluded at this period, the *lunatic* is not excited more than ordinarily.

MOONSTRUCK, Lunatic.

MOORBERRY, *Vaccinium oxycoccus*.

MOORSHEAD, Alembic.

MOORWORT, BROAD-LEAVED, *Andromeda mariana*.

MOPHETA. See Mephitism.

MORBI ACQUISITI, Acquired diseases—m. *Acuti*, see *Acute*—m. *Adventitii*, Acquired diseases—m. *Anniversarii*, Annual diseases—m. *Annuj*, Annual diseases—m. *Chronici*, Chronic diseases—m. *Cognati*, Innate diseases—m. *Complicati*, *Impliciti morbi*—m. *Congeniti*, Innate diseases—m. *Connati*, Connate diseases—m. *Connexi*, *Conjuncti morbi*—m. *Consequentes*, *Conjuncti morbi*—m. *Constrictorii*, see *Spasmodicus*—m. *Dispersi*, Sporadic diseases—m. *Interni*, Internal diseases—m. *Nervosi*, Nervous diseases—m. *Olfactus*, *Osmonosi*—m. *Sparsi*, sporadic diseases—m. *Spasmodici*, see *Spasmodicus*—m. *Subacute*, see *Acute*, m. *Tactus*, *Haphonosi*.

MORCEAU DU DIABLE, see Tuba Fallopi-
ana—*m. Frangé*, see Tuba Fallopiana.

MORDICANT, *Mordicans*, *Calor mordicans*. A morbid heat, causing a disagreeable pungent sensation in the fingers of the physician.

MOREA, *Morus nigra*.

MORELLE, *Boletus esculentus*—*m. à Fruit noir*, Solanum—*m. Furieuse*, Atropa belladonna—*m. en Grappes*, Phytolacca decandra—*m. Grimpante*, Solanum dulcamara.

MORETARIUM, Mortar.

MORETUS, *Morētum*, from *morum*, 'the mulberry.' Ancient name of a cordial julep, into the composition of which the syrup of mulberries entered.—Schröder.

MORGAGNI, HUMOUR OF. A peculiar, transparent, slightly viscid fluid, found between the crystalline and its capsule.

MORGELINE, *Alsine media*.

MORIA, Idiomania—*m. Demens*, Idiomania, Dementia—*m. Demens leprea*, see Dementia—*m. Imbecilis amnesia*, Amnesia.

MORINGA OLEIFERA, *Guilandina moringa*—*m. Zeylanica*, *Guilandina moringa*.

MORION, Genital organs.

MORIOPLASTICE, *Chirurgia cuto'rum*, *Ch. Anaplastica*, *Restitutio organica seu partium deperditarum*, *Transplantatio*, *Anaplastice Surgery*, *Autoplasty* or *Autoplastic* or *Plastic Surgery*, *Chirurgia plastica*, from *μοριον*, 'a part,' and *πλαστικός*, 'forming.' The restoration of lost parts. The operations for this purpose have various names, according to the part concerned, as *Cheiloplastice*, *Ceratoplastice*, *Rhinoplastice*, &c.

MORO, from *morum*, 'a mulberry.'—*Morium*. (F.) *Mare*. A small abscess, resembling a mulberry. A small tumour, of a similar appearance, particularly on the genital organs after impure coition.

MOROCOMIUM, *Morotrophium*.

MORODOCHIUM, *Morotrophium*.

MOROSIS, *Fatuitas*, *Idiotism*.

MOROSITATES, from *μωρία*, 'folly.' A generic name, given by Linneus to an order of Vesania; in which he included pica, bulimia, polydipsia, antipathia, nostalgia, panophobia, satyriasis, nymphomania, tarentisus, and hydrophobia.

MOROTROPHIUM, *Morocomi'um*, *Morodochi'um*, from *μωρος*, 'fatuous,' and *τροφή*, 'support.' *An insane establishment; a lunatic asylum; a mad-house*. Under proper management, a valuable institution; but liable to various abuses.

MORPHÆA ALBA, *Lepa alphoides*—*m. Nigra*, *Lepa nigricans*.

MORPHIA, *Morphina*—*m. Acetate* of, *Morphinæ acetas*—*m. Citrate* of, see *Morphina*—*m. Muriate* of, see *Morphina*—*m. Sulphate* of, *Morphinæ sulphas*.

MORPHIÆ ACETAS, *Morphinæ acetas*—*m. Sulphas*, *Morphinæ sulphas*.

MORPHICA, from *μορφη*, 'shape.' *Monstrosities of birth*. The 3d order, class *Typhica* of Good.

MORPHINA, *Morp'hia*, *Morp'hium*, *Morphine*, from *Morpheus*, the 'god of sleep.' A solid, colourless alkali; crystallizable in beautiful pyramids, truncated and transparent; soluble in alcohol, and slightly so in boiling water. It exists, combined with meconic acid, in opium. It may be obtained by decomposing, by means of ammonia or calcined magnesia, an aqueous solution of opium made in the cold.

The following is the process of the Pharm. U. S. *Opium*, sliced, lbj; *distilled water*, alcohol, each a sufficient quantity; *solution of ammonia* f. ʒvj. Macerate the opium with four pints of distilled water for 24 hours, and having worked it with the hand, digest for 24 hours, and strain. Macerate the residue twice successively with distilled water, and strain. Mix the infusions; evaporate to six pints, and filter; then add first five pints of alcohol, and afterwards three fluid-ounces of the solution of ammonia, previously mixed with half-a-pint of alcohol. After 24 hours, pour in the remainder of the solution of ammonia, mixed as before with half-a-pint of alcohol; and set the liquor aside for 24 hours, that crystals may form. To purify these, boil them with two pints of alcohol till they are dissolved; filter the solution, while hot, through animal charcoal, and set it aside to crystallize.

Morphia dissolves perfectly in the acids,

which it saturates; and with which it forms very crystallizable salts, with the exception of the acetate. All these salts have a bitter taste, and act upon the animal economy in the same manner as opium, but more powerfully. The *acetate* is the salt commonly employed in medicine. It was, at one time, supposed that Morphia is the purely sedative part of opium, divested of its irritating properties; but experience has not proved this. On the contrary, Morphia will generally disagree where opium does. Dose of Morphia $\frac{1}{4}$ to $\frac{3}{4}$ of a grain.

MORPHINÆ ACETAS, *Morphiæ Acetas, Acetate of Morphine, Acetate of Morphia*. A salt, formed by saturating morphia with acetic acid. (*Morphia*, in powder, freed from narcotina by boiling with sulphuric ether, $\frac{3}{4}$; distilled water, Oss; *acetic acid*, a sufficient quantity. Mix the morphia with the water; then carefully drop in the acid, constantly stirring until the morphia is saturated and dissolved. Evaporate the solution in a water-bath to the consistence of syrup. Lastly, dry the acetate with a gentle heat and rub it into powder.—Ph. U. S.) Dose, from $\frac{1}{4}$ of a grain to a grain.

MORPHINÆ SULPHAS, MORPHIÆ SULPHAS, *Sulphate of Morphia*. A salt, formed by saturating morphia with sulphuric acid, evaporating, and crystallizing. Dose, the same as of the acetate.

MURIATE and CITRATE OF MORPHIA have likewise been used; but they possess no advantages over the other salts. The sulphate and muriate are official in the Ph. U. S.

MORPHIUM, Morphia.

MORPHOLOGY, Anatomy.

MORPHONOMY, *Morphonom'ia*: from *μορφο*, 'shape,' and *νομος*, 'a law.' The laws of organic formation. The department of anatomical science which teaches the laws of organic configuration.

MORPHOTOMY. See Anatomy.

MORPIO. See Pediculus.

MORPION, Crablouse, see Pediculus.

MORS, Death—*m. Apparens*, Asphyxia—*m. Putativa*, Asphyxia—*m. Repentina*, Demotivus lapsus—*m. du Diable*, Scabiosa succisa.

MORSULI ANTIMONIALES, Tabellæ antimoniales Kunkelii.

MORSULI STIBII, Tabellæ antimoniales Kunkelii.

MORT, Death—*m. du Chien*, Cholera—*m. aux Chiens*, Colchicum autumnale—*m. aux Panthères*, Doronicum pardalianches.

MORTA, Pemphigus.

MORTAL, *Mortal'is*, from *mors*, *mortis*, 'death.' *Lethal'is*, *Leta'lis*, *Thanato'des*. That which is subject to death;—that which causes death:—*as, man is mortal; a disease is mortal*. Of old, it was the custom to have a division of mortal wounds, which gave rise to many errors in medico-legal investigations, as the mortality of wounds depends upon various circumstances; and it is often a matter of extreme difficulty, to pronounce whether or not a wound is necessarily mortal.

MORTALITY *Mortal'itas*, *Lethal'itas*, (F.) *Mortalité*. This word, taken in an extended sense, expresses the condition of all organized bodies,—of being subject to the cessation of

life. In the sense in which it is most frequently employed, it signifies,—the proportional quantity of individuals who, in a certain population, die in a given time. If we assume the population of the earth to be one thousand millions, and a generation to last thirty-three years; in that space of time the one thousand millions must all die; and, consequently, the number of deaths will be, by approximation,

Each year,	30,000,000
Each day,	82,109
Each hour,	3,421
Each minute,	57
Each second,	1 nearly.

If, on the other hand, as has been supposed, the number of deaths is to that of the births as TEN TO TWELVE: there will be born,

Each year,	36,000,000
Each day,	98,356
Each hour,	4,098
Each minute,	68
Each second,	1 & 2-15ths.

It has been estimated, that the average mortality of the Pays du Vaud, is 1 in 49; of Sweden and Holland, 1 in 48; of Russia, 1 in 41; of France, 1 in 40; of Austria, 1 in 38; of Prussia and Naples, 1 in 33 to 35; of England, 1 in 58; [?] and of South America, 1 in 30.

The same rate of mortality has been given to the United States as to France; but the statistical details on all this matter have been inadequate, and—it is not improbable—inaccurate. The following has been given as the annual mortality of some of the chief cities of this country and of Europe: (See the Author's Elements of Hygiène, p. 136: Philadelphia, 1835.) Philadelphia, 1 in 45.68; Glasgow, 1 in 44; Manchester, 1 in 44; Geneva, 1 in 43; Boston, 1 in 41.26; Baltimore, 1 in 41; London, 1 in 40; New York, 1 in 37.83; St. Petersburg, 1 in 37; Charleston, 1 in 36.50; Leghorn, 1 in 35; Berlin, 1 in 34; Paris, Lyons, Strasburg, and Barcelona, 1 in 32; Nice and Palermo, 1 in 31; Madrid, 1 in 29; Naples, 1 in 28; Brussels, 1 in 26; Rome, 1 in 25; Amsterdam, 1 in 24; and Vienna, 1 in 22½.

In the cities, the mortality under two years of age bears a large ratio. This is exhibited by the following table:

AGES.	London.	Philadelphia.	Baltimore.
Under 1 year,	23.52	22.7	24.11
From 1 to 2,	8.6	8.55	
2 to 5,	9.97	7.3	11.18
5 to 10,	4.33	4.	5.
10 to 20,	4.03	5.	6.3
20 to 30,	6.64	12.	9.87
30 to 40,	8.08	12.	10.58
40 to 50,	8.89	10.	8.88
50 to 60,	8.89	7.2	5.78
60 to 70,	9.15	5.	4.5
70 to 80,	7.83	3.5	3.
80 to 90,	3.18	1.9	1.67
90 to 100,	0.40	0.5	0.26
100 to 110,	—	0.09	0.18
110 to 120,	—	0.013	

MORTALITY, BILLS OF; *Bills of Necrology*, (F.) *Tables de Mortalité*. Tables, instituted for the purpose of exhibiting the number of deaths, &c. in a given time. Well kept bills of mortality are of great use to the physician and political economist. Those of London have been proverbial for their inaccuracy and insufficiency; especially as regards the complaints of which

the persons have died. They were formerly made out by the parish clerks, and the information was conveyed to them by two old women, who were appointed in each parish, and were called *Searchers*;—their duty being to see that the deceased had died a natural death. This miserable system has, however, been abolished: and the Registrar-General's annual reports of births, deaths, and marriages, exhibit how admirably vital statistics are now conducted in Great Britain.

MORTAR, *Mortarium*, *Mortetarium*, *Piso*, *Ac'onē*, *Pila*, *Holmos*, (F.) *Mortier*. A vessel for reducing to powder different solid substances; and for making certain mixtures. Different substances are employed in the construction of mortars;—iron, marble, glass, wedgewood-ware, &c.

MORTARIOLUM, *Alveolus*.

MORTIER, *Mortar*.

MORTIFER, *Lethiferous*.

MORTIFICATION, *Necrosis*, *Mortificatio*, from *mors*, 'death,' and *fio*, 'I become.' The loss of vitality in a part of the body. The incipient stage of mortification, when the case is still recoverable, is called *Gangrene* (q. v.); when totally destroyed, *Sphacelus* (q. v.) Mortification of a bone is called *Necrosis*, (q. v.)

MORTIFICATION, *Ergot*, *Ergotism*—m. *Mildew*, *Ergotism*.

MORTTOOTH, *Cupri sulphas*.

MORUM. See *Morus nigra*.

MORUS NIGRA. The *Mulberry-Tree*, *Morēa*, *Sycam'nos*. (F.) *Mûrier Noir*. The fruit of the mulberry-tree, *Morum*, *Sycam'num*, (F.) *Mûre*, is pleasant, sweet, subacid, and abounds with a deep violet-coloured juice. A syrup is directed in the London Pharmacopœia. The bark of the root has been regarded as anthelmintic.

MORVE, *Mucus*, *Nasal mucus*. See *Equinia*—m. *Farcinæuse*. See *Equinia*.

MOS, *Habit*.

MOSCHEL'EON, *Moscokē'a*. A compound aromatic oil, containing musk.

MOSCHUS, *Musk*—m. *Arabum*, *Hibiscus abelmoschus*—m. *Factitius*, *Musk*, *artificial*.

MOSCOLÆA, *Moschelmœon*.

MOSQUITTO (S.) Diminutive of (S.) *mosca*, 'a fly.' A very troublesome insect in warm, moist situations. Curtains, called *Mosquito curtains*, are used in India, by way of protection. The entrance of mosquitos into the bed-chamber may also be prevented, to a certain extent, by keeping the doors and windows closed until the light is extinguished. The pain and itching from the bites are alleviated by washing them with hartshorn.

MOSQUITA is a name given, by the Portuguese, to small, red pimples on the skin, resembling the bites of the mosquito.

MOSS, **CEYLON**, *Fucus amylaceus*—m. *Club*, *Lycopodium*—m. *Cup*, *Lichen pyxidatus*—m. *Iceland*, *Lichen Islandicus*—m. *Irish*, *Fucus crispus*—m. *Marine*, *Fucus amylaceus*.

MOTA, *Fagus castanea*.

MOTAMEN, *Motion*.

MOTATIO, *Motion*.

MOTHER'S MARKS, *Nævus*—m. *Spots*, *Nævus*.

MOTHERWORT, *Leonurus cardiaca*, *Matricaria*.

MOTILITY, *Motilitas*, from *motus*, 'move-

ment.' (F.) *Motilité*. Faculty of moving. Moving power, contractility.

MOTION, *Motus*, *Motio*, *Motatio*, *Motamen*, *Commotio*, *Permotio*, *Cine'sis*. The act of changing place. The various motions may be divided into, 1. The *excited*, of the *reflex function* of Dr. Marshall Hall and others,—as the closure of the larynx on the contact of acrid vapours, of the pharynx on that of the food,—a function of the spinal marrow; and 2. Those that are executed under the organic and other nerves of involuntary function. It is probable, too, that every living tissue is capable of moving responsive to its appropriate irritant. See *Irritability*.

MOTION, *Ciliary*, see *Cilia*—m. *Vibratory*, see *Cilia*.

MOTOR, *Motor*.

MOTOR OCULI EXTERNUS, *Nervus tim'idus*,—*Nervofculo-musculaire externe* (Ch.) *Nerv moteur oculaire externe*, or *sixth pair of nerves*, arises from the furrow, which separates the pons Varolii from the medulla oblongata. It enters the cavernous sinus; anastomoses on the outside of the carotid artery with two filaments furnished by the superior cervical ganglion; enters the orbit by the sphenoidal fissure, and is lost on the rectus externus oculi. This pair is, also, called *Abducentes*.

MOTOR ES OCULORUM, *Motorii Oculorum*, *Oculares communes*, *Ophthalmici externi*, *Commun Oculo-muscular Nerves*, (F.) *Nerfs moteurs oculaires communs*, (Ch.) *The third pair of nerves*. This nerve arises from a depression at the inner side of the peduncles of the brain, between the tuber annulare and corpora mammillaria. It enters the outer part of the cavernous sinus, and passes into the orbital cavity. Behind the sphenoidal fissure, it divides into two branches; the one, *superior*; and the other, *inferior*. The *former* is lost on the rectus superior oculi and the levator palpebræ superioris; the *latter*—the larger of the two—divides into three branches, which pass to the rectus internus, rectus inferior, and lesser oblique. The last furnishes a filament, which passes to the ophthalmic ganglion.

MOTORY, *Motive*, *Motor*, *Motrix*. That which moves or impresses movement, as *motor nerves*, in contradistinction to the *sensory*, (q. v.)

MOTOS, *Carbasus*, *Tent*.

MOTRIX, *Motor*.

MOTTE, *Mons veneris*.

MOTUS, *Motion*—m. *Compressorius*, *Peristole*—m. *Hæmorrhoidalis*, *Hæmorrhoids*—m. *Intestinorum*, *Borborygmus*—m. *Peristalticus*, *Peristole*—m. *Testudineus*, *Peristole*—m. *Vermicularis*, *Peristole*.

MOUCHE, *Cantharis*—m. *d'Espagne*, *Cantharis*.

MOUCHER, *L'ACTION DE*, *Munctio*.

MOUCHES. See *Pains*, *labour*.

MOUCHETURE. See *Scarification*.

MOUCHOIR EN TRIANGLE, *Couvrechef*, see *Bandeau*.

MOUFETTE. See *Mephitism*.

MOULD, *Fontanella*.

MOULE, *Mytilus edulis*.

MOULEUR, *Muller*.

MOUREILLER, *Malpighia mourella*.

MOUKON DES OISEAUX, *Alsine media*—*m. Rouge*, *Anagallis*.

MOUSE-EAR, *Alsine media*, *Hieracium pilosella*.

MOUSE-SIGHT, *Myopia*.

MOUSSE DE CORSE, *Corallina Corsicana*—*m. d'Islande*, *Fucus crispus*—*m. Perlée*, *Fucus crispus*.

MOUSSERON. See *Agaric*.

MOUSSEUX. Frothy.

MOUT DE LA BIÈRE, Wort.

MOUTARDE NOIRE, *Sinapis*.

MOUTH, *Sax. mus*, *Os*, *Cavum Oris*, *Stoma*. (F.) *Bouche*. This word sometimes signifies the cavity, situate between the jaws, and containing the tongue, &c.;—at others, the outer orifice of that cavity. The mouth, in the first acceptation, is the cavity; bounded, *above*, by the palatine arch; *below*, by the tongue; *before*, by the lips; and *behind*, by the velum palati and pharynx. The sides of the mouth and the organs it contains are lined by a mucous membrane. The anterior aperture of the mouth is, sometimes, called *facial*;—the posterior, *pharyngeal*. In the mouth are the teeth, gums, alveolar margins, tongue; the excretory ducts of the salivary glands, and those of a number of mucous follicles, &c. It is in this cavity that the food is cut, torn, or bruised by the teeth; is impregnated with saliva, and formed into a mass or *bolus*, which is then subjected to the act of deglutition. The mouth contains the organs of taste; and it serves in respiration, articulation, expectoration, suction, &c.

The condition of the mouth requires to be attended to in *Semeiology*. The state of the mucous membrane, like that of the tongue, indicates the condition of the membrane of the alimentary canal generally.

MOUTH is, also, applied to the open extremities of vessels.

MOUTH, SORE, *Aphthæ*—*m. Watering*, see *Salivation*.

MOXA, *Moxib'rium*. A word by which the Chinese and Japanese designate a cottony substance, which they prepared by heating the dried leaves of the *Artemisia moxa*,—a kind of mugwort. With this down, they form a cone, which is placed upon the part intended to be cauterized, and is set fire to at the top. The heat and pain gradually increase, in proportion as the combustion proceeds downwards, until ultimately an eschar may be formed. In Europe and this country, the same operation is usually practised with a cylinder of cotton wool, or with one formed from the pith of the greater sun-flower. This mode of cauterization is employed as a powerful counter-irritant; which it assuredly is. Sloughing may be, in some measure, prevented, according to Baron Larrey, by the application of liquid ammonia to the burnt part.

MOXIBURIUM, *Moxa*.

MOXIBUSTION, *Moxibustio*, *Encausis*. Mode of cauterization by means of moxa.

MUCAGO, *Mucilage*.

MUCARUM, *Mucharum*.

MUCHARUM, *Mucarum*. A barbarous term, formerly used for an aqueous infusion of roses, sweetened and evaporated to the consistence of syrup.

MUCILAGE, *Mucilago*, *Muca'go*, from the

Lat. *mucus*, itself presumed to be from *ungere*, 'to wipe.' A mixture of gum and a small quantity of matter analogous to mucus, which is found in abundance in linseed, quince seed, &c. It is obtained by heating with water the parts, or products, of plants which contain it. It is much used in the preparation of emollient cataplasms and of the greater part of the demulcent tisanes.

MUCILAGE, ANIMAL, *Mucus*—*m. of Quince seeds*, *Decoctum Cydoniæ*—*m. Starch*, *Mucilago amyli*.

MUCILAGINEUX, *Mucilaginous*.

MUCILAG'INOUS, *Mucilaginosus*, (F.) *Mucilagineux*. That which possesses the character of mucilage.

MUCILAGO, *Synovia*.

MUCILAGO ACA'CIE, *M. Acaciæ Arabicæ*, *M. Gummi Arabici*, *Mucilage of acacia*, *M. of gum Arabic*. (*Acaciæ gum. contus*. ζ iv, *aq. feræ*. Oss. Rub the gum with the water gradually added.) Demulcent. To allay cough; but, chiefly, to suspend insoluble matters in water, &c.

MUCILAGO AM'YLI, *Starch mucilage*. (*Amyli* ζ ijj, *aq. Oj*. Rub the starch with the water, gradually added; then boil till it forms a mucilage. *Ph. L.*) Demulcent. Generally given *per anum*.

MUCILAGO ARTICULORUM SEU JUNCTURARUM. *Synovia*.

MUCILAGO ASTRAG'ALI TRAGACANTHÆ, *M. tragacanthæ*, *M. gummi tragacanthæ*, *Mucilage of tragacanth*. (*Gummi tragacanth*. ζ i, *aq. bullient*. Oj. Macerate for 24 hours; triturate till the gum is dissolved, and press through linen. For pharmaceutical purposes.

MUCILAGO CRETICA, *Misturæ cretæ*—*m. Gummi Arabici*, *M. acaciæ*—*m. Seminis cydonii mali*, *Decoctum cydoniæ*—*m. Gummi tragacanthæ*, *M. astragali tragacanthæ*—*m. Tragacanthæ*, *M. astragali tragacanthæ*.

MUCOCELE OF THE LACHRYMAL SAC, *Fistula lachrymalis*.

MUCO-ENTERITIS, see *Enteritis*.

MUCOR, *Euros*, *Mucus*—*m. Narium*, *Nasal mucus*.

MUCOSITAS, *Mucus*.

MUCOSITY, *Mucositas*. A fluid, which resembles mucus or contains a certain quantity of it.

MUCOUS, *Mucosus*, *Myxo'des*. An epithet for all bodies containing mucilage. It is, also, sometimes used synonymously with gum. In *pathology*, it is occasionally employed to express the seat of a disease, as *mucous disease*, *mucous phlegmasia*; that is, having its seat in the mucous membrane.

MUCOUS MEMBRANES, *Membranes, mucous*—*m. Web*, *Corpus mucosum*.

MUCRO. The apex or point of the heart.

MUCRO HUMERI, *Acromion*.

MUCUNA, see *Dolichos pruriens*—*m. Pruriens*, *Dolichos pruriens*.

MUCUS, *Mucor*, *Mucosus humor*, *Mucositas*, *Myxa*, *Animal mucus*, *Blenna*, *Animal mucilage*, (F.) *Muqueux animal*, *Morve*, *Mucilage animal*, presumed to be from *ungere*, 'to wipe.' A substance, analogous to vegetable mucilage; from which, however, it differs, by affording subcarbonate of ammonia on distillation. Mucus exudes through the skin, in a state of combination with a peculiar oily matter; and, dry-

ing, forms the epidermis. It constitutes, in part, the different epidermeous productions, as the hair, nails, wool, and horn of animals, feathers of birds and scales of fish. It is found at the surface of the mucous membranes, and presents some difference in its composition and properties, according to the particular mucous membrane from which it is obtained. It preserves the membranes moist; and in a state best fitted for the performance of their functions. The French give the term *glaire* to the thick, stringy mucus, secreted by the mucous membranes, when in a state of disease.

MUCUS CATHARTICUS, Lichen islandicus—*m.* Malpighii, Corpus mucosum—*m.* Narium, Nasal mucus.

MUD-APPLE PLANT, Solanum melongena.

MUDAR, Madar. The *Calotropis mudarii*. In the Hindoo practice of physic, the bark of

the root, as well as the concrete juice of the plant, enters into various compound formulæ for the cure of elephantiasis and many other disorders. Experiments, instituted by Dr. Duncan, jun., exhibit its properties to be like those of ipecacuanha.

MUGUET, Aphthæ, Convallaria maialis—*m.* des Bois, Asperula odorata—*m.* de Mai, Convallaria maialis.

MUGWORT, Artemisia vulgaris.

MULATRE, Mulatto.

MULATTO, (F.) *Mulatre*, (S.) *Mulata*. An individual of the human species engendered of a white and black race; from *mulus*, 'a mule.'

The following Table exhibits the proportion of white blood in the various castes,—arising from the hybridous admixture of white and black,—according to the principles sanctioned by usage.

PARENTS.	OFFSPRING.	Degree of Mixture.	
Negro and White,	Mulatto,	1-2 White,	1-2 Black.
White and Mulatto,	Terceron,	3-4 —	1-4 —
Negro and Mulatto,	{ Griffo or Zambo, } or black Terceron,	1-4 —	3-4 —
White and Terceron,	Quarteron,	7-8 —	1-8 —
Negro and Terceron,	Black Quarteron,	1-8 —	7-8 —
White and Quarteron,	Quinteron,	15-16 —	1-16 —
Negro and Quarteron,	Black Quinteron,	1-16 —	15-16 —

The last two are considered to be respectively white and black, in the British West India Islands; and of these the former are white by law, and consequently free.

MULBERRY TREE, *Morus nigra*.

MULES, (F.) *Mulæ*. Chilblains on the heels.

MULIEBRIA, Meuses, Vulva.

MULIE'RITAS, Womanhood, from *mulier*, 'a woman.' The state of puberty in the female.

MULIER PLENA, Pregnant.

MULLEIN, BLACK, *Verbascum nigrum*—*m.* Broad-leaved, great, *Verbascum nigrum*—*m.* Yellow, *Verbascum nigrum*.

MULLER, (F.) *Mouleur*. A moulder. A stone held in the hand, with which any powder is ground upon a flat, horizontal stone. It is sometimes called *mullet*. (F.) *Mollette*.

MULLIGRUBS, Termina, Colic.

MULSA ACIDA, Oxyglycus.

MULSUM, Hydromeli.

MULTIFIDUS SPINÆ, Transversalis dorsi.

MULTIMAMMÆ; from *multus*, 'many,' and *mamma*, 'the breast.' A variety of hypergenesis, in which there are supernumerary mammae.

MULTITUDO, Plethora.

MULTIVORANTIA, Polyphagia.

MUMIA, Mummy.

MUMMY, *Mumia*. Arab. *Moumya*, from *mum*, 'wax.' *Rebolca*, *Rebona*. (F.) *Momie*. A dead body simply dried; or dried after having been embalmed. The latter acceptance is the most common. Formerly, the Egyptian mummy was extolled as useful in contusions. It was presumed, also, to have healing, tonic, and resolvent properties. It is now only regarded as an archaeological curiosity.

MUMPS, Cynanche parotideæ.

MUNCTIO, *Apomezis*. (F.) *l'Action de Moucher*. The act of blowing the nose.

MUNDIFICATIVA, Detergents.

MUNGOS RADIX, *Ophiorrhiza mungos*.

MUNIMENTUM CASTITATIS, Hymen.

MUQUEUX ANIMAL, Mucus.

MUR, Coryza.

MURAL, *Murd'lis*, from *murus*, 'a wall,' Vesical calculi are so called when rugous and covered with tubercles or asperities. They are composed of oxalate of lime.

MURE, Moro. See *Morus nigra*.

MU'RIA, *Halmē*, *Salsil'dgo*, *Brine*. (F.) *Saumure*. This was formerly used as a glyster in dysentery, in certain inveterate neuralgicæ, &c.

MURIA, Soda, muriate of.

MURIAS AURICO-NATRICUM. See Gold.

MURIATE D'AMMONIAQUE, Ammoniac murias—*m.* *d'Ammoniaque et de fer*, Ferrum ammoniatum—*m.* *d'Or*, Gold, muriate of. See Gold.

MURIATICUM ACIDUM, from *muria*, (q. v.) *Ac'idum salis*, *Spir'itus salis mari'ni*, *Sp. salis Glaube'ri*, *Acidum mari'num concentra'tum*, *Acidum salis culina'ris*, *Acidum salis marini*, *Spir'itus salis acidus seu fumans*, *Acidum hydrochloricum*, *Muriat'ic acid*, *Spirit of salt*. (F.) *Acide hydrochlorique ou muriatique*. An aqueous solution of chlorohydric acid gas of S. G. 1.16. The odour of muriatic acid is suffocating; taste very acid and caustic. It is nearly colourless when pure; but commonly of a pale yellow; volatile; the fumes visible. Muriatic acid is possessed of tonic and antiseptic properties. It is used in typhus, cutaneous eruptions; in gargles for inflammatory and putrid sore throats, (gtt. xxx to f. ʒvj of water,) &c. When added to a pediluvium, it renders it stimulating.

ACIDUM MURIATICUM DILUTUM of the Ph. U. S. contains four ounces, by measure, of muriatic acid to twelve ounces of distilled water.

MURIER NOIR, *Morus nigra*.

MURIGENE, Chlorine.

MURMUR, Borborygmus, *Bourdonnement*.

MURMUR, RESPIRATORY. The noise heard during inspiration and expiration, especially the former. It is produced by the passage of the air through the bronchial tubes and the air-cells. It has been also called the *murmur of the expansion of the lungs*; and, when distinctly vesicular, *Respiration of the cells or vesicular respiration*, (F.) *Respiration vésiculaire*. Vesicular respiration is of course absent when the cells of the lungs have been obliterated from any cause. When the murmur is much developed, as it is in children, the respiration is termed *puerile*. At times, also, there is a *blowing sound*, (F.) *Souffle*, *Respiration soufflante*, as if some one were blowing into the auscultator's ear through a tube. This is heard in the healthy state over the larynx, trachea, and about the bifurcation of the bronchia; but when it proceeds from the lungs, it denotes disease.

The respiration, perceived over the trachea and bronchia in health, is called *tracheal* or *bronchial*, according to the situation in which it is heard.

MURMUR, UTERINE, Bruit placentaire—m. Utero-placental, *Bruit placentaire*.

MURRAIN, Coryza.

MURREN, Coryza.

MUSA PARADISIACA, *Musa*, *Amusa*, *Palma hu'milis*, *Ficus Indica*, *Bata*, *Plat'anus*. The *Plantain tree*. Family, Musaceæ. Sex, Syst. Hexandria Monogynia. It grows in many parts of India and South America: The fruit, which is largely eaten for bread, consists of a mealy substance. It is clammy; has a sweetish taste, and will dissolve in the mouth without chewing. The whole spike of fruit often weighs forty or fifty pounds. The leaves of the tree serve the Indians for table cloths and napkins. Being smooth and soft, they are, also, employed as dressings after blisters. The water from the soft trunk is astringent, and is sometimes used in diarrhœa.

MUSA SAPIEN'TUM. The *Ban'na tree*. *Bacoba*. (F.) *Banajer*, *Bacove*. This differs somewhat from the last. The fruit is shorter, straighter, and rounder; the pulp softer and of a more luscious taste. When ripe, it is very agreeable; is eaten like the plantain, and relished by all ranks of people in the West Indies. Both varieties are natives of Guinea.

MUSC, Musk.

MUSCA HISPANICA, *Cantharis*.

MUSCADE. See *Myristica moschata*.

MUSCADIER, *Myristica moschata*.

MUSCLE, *Mus'culus*, *Lacer'tus*, *Mys*, *Myon*, from *μῦς*, 'a rat;' because, say some etymologists, the ancients compared the muscles to flayed rats. According to Diemerbroeck, Douglas, Chaussier, &c., *μῦς* comes rather from *μῦναι*, 'to close,' 'to move,' &c., a function proper to muscles. This etymon is the more probable. Muscles have been divided into those of *Animal life*, or of the *life of relation*,—*voluntary muscles*—which execute movements under the influence of the will; as the muscles of the limbs, head, trunk, &c., and into those of *organic life*,—*involuntary muscles*,—which contract under the influence of certain special stimuli; as the heart, fleshy fibres of the stomach, &c. *Mixed muscles* are those which belong partly to each of these divisions;—as the muscles of respiration; the sphincters, &c. Muscles that act in opposition to each other, are

called *antagonists*; thus, every extensor has a flexor for an antagonist, and *vice versâ*. Muscles that concur in the same action are termed *congenereous*. The muscles present numerous varieties in form, size, situation, use, &c., and have been divided, by some, into *long*, *broad*, and *short*. Each of these divisions comprises *simple* and *compound* muscles. *Simple* or *rectilinear muscles* have all their fibres in a similar direction: and only one body—as the *Sartorius*, *Pronator quadratus*, &c. *Compound muscles* are those which have only one belly and several tendons,—as the flexors of the fingers and toes: or several bellies and several tendons,—as the biceps flexor cubiti, sacro-lumbalis, &c. To the compound muscles belong, also, the *radiated muscles*. Their fibres set out from a common centre, and are arranged like the radii of a circle;—such are the diaphragm, iliacus, temporal, &c. *Pennated* or *Penniform Muscles*. Their fibres are arranged in two rows, which are united at a median line, at greater or less angles; nearly as the feathers are inserted into a quill. The palmaris longus is one of these. *Semi-penniform Muscles*. Their fibres are oblique, as in the last case; but they are inserted only on one side of the tendon. *Hollow Muscles* are,—the heart, intestines, urinary bladder, &c.

Much difference has existed in the enumeration of muscles. Some authors reckon them at upwards of 400. Chaussier admits only 368. The greater part of the muscles are in *pairs*. Very few are *azygous*.

Muscles have been variously named. 1. *According to their uses*, as diaphragm, buccinator, extensors, flexors, adductors, abductors, levators, depressors, &c. 2. *According to their position*, as interspinales, interossei, subclavius, popliteus, anconeus, cubitalis, iliacus, temporalis, &c. 3. *According to their shape*, as trapezius, splenius, lumbricales, serrati, digastric, deltoid, scalenus, rhomboidei, &c. 4. *According to their dimensions*. Pectoralis major, rectus capitis anticus major, pectoralis minor, gluteus maximus, medius, and minimus. 5. *According to their direction*, as obliquus abdominis, transversalis abdominis, rectus femoris, rectus abdominis, &c. 6. *According to their composition*, as semi-membranosus, semi-tendinosus, complexus, &c. 7. *According to their attachments*, or the different points of the skeleton to which they are attached by means of tendons or aponeuroses; as sterno-cleido-mastoideus, sterno-hyoideus, &c. On this is grounded the nomenclature of M. Dumas, and that of Chaussier.

The end of the muscle, which adheres to the most fixed part, is usually called the *origin* or *head*, (F.) *Tête*; and that which adheres to the more movable part, the *insertion* or *tail*, (F.) *Queue*; the intervening part or *body* of the muscle being called the *center* or *belly*: hence, the names gastrocnemii, digastricus, biceps, and triceps; according as they have two bellies, two or three heads, &c.

Muscles are formed,—1. Essentially of the *muscular* or *fleshy fibre*, (see *Muscular Fibre*.) 2. Of *Cellular tissue*, which unites together the fibres. This cellular tissue is not very visible between the fine and loose fibres; but becomes more so, when they unite in more considerable fasciculi. It forms, moreover, to each muscle an external envelope, which unites it to the

neighbouring parts, and admits of its motion. This envelope was formerly called *Tunica propria musculorum*. 3. Of *Arteries*. These proceed from neighbouring trunks, and are, generally, very large. Their size and number are always in proportion to the bulk of the muscle. With the exception of some viscera, as the lungs and the kidneys, there are few organs that receive as much blood as the muscles. 4. Of *Veins*. They follow the same course in the muscles as the arteries. Bichat asserts, that they are generally devoid of valves. 5. Of *Lymphatics*. Of these we know little, and cannot easily follow them between the fleshy fibres. 6. Of *Nerves*. These are numerous, and of different sizes. They, almost all, proceed from the encephalon; some, however, issue from ganglions, and accompany the arteries. In general, they penetrate the fleshy tissue along with the vessels, to which they are narrowly united. After they have entered the muscles, they divide and subdivide until they are lost sight of.

MUSCLE CANIN, Levator anguli oris—*m. Cannelé*, Ischio-trochanterianus—*m. Grand fessier*, Gluteus major—*m. of Guthrie*, Compressor Urethrae—*m. of Horner*, Tensor Tarsi—*m. très large du dos*, Latissimus dorsi—*m. of Wilson*, Compressor Urethrae.

MUSCULAR, *Musculd'ris*. That which belongs or relates to the muscles.

MUSCULAR ARTERIES. Arteries that are distributed to the muscles. The name, *Muscular Arteries of the Eye*, has been especially given to two branches sent off by the ophthalmic artery:—the one, *inferior*, which furnishes branches to the rectus inferior oculi, lachrymal sac, &c., and some of the anterior ciliary arteries: the other—the *superior*, which is sometimes wanting; but, when it exists, gives branches to the rectus superior oculi and levator palpebrae superioris.

MUSCULAR CONTRACTION. The exertion of the power, possessed by muscles, of shortening themselves, or of contracting to produce motion:—*muscular motion* being the change in the situation and relation of organs, induced by muscular contraction. When a muscle contracts, its fibres assume more the zigzag direction, and the extremities approximate; but the bulk of the whole muscle is not augmented. This contraction takes place, at times, with extreme velocity: a single thrill, in the letter *r*, can be pronounced in the 1-30,000th part of a minute. The force of contraction depends upon the healthy physical condition of the muscle, combined with due energy of the brain. The duration, in voluntary motion, is for a certain time dependent upon the will:—contractions, excited involuntarily, cannot be so long maintained.

MUSCULAR OR FLESHY FIBRE. A name given to the filaments, which, by their union, form the muscles. This fibre is flat, soft, downy, linear, little elastic, more or less red: and arranged in zigzag according to its length, which is variable. It is firmer in adults than in the young or the aged; of the same size in the great and small muscles; and runs its course without bifurcation or ramification. It is but slightly resisting in the dead body, tearing readily; but, during life, it supports very great efforts without laceration. It is, itself, com-

posed of a considerable number of fibrils, similar to each other, and subdividing almost *ad infinitum*. The ultimate filaments into which the fibre can be decomposed by mechanical means do not seem to be hollow, as has been asserted. Their colour is red in man, and white in several animals. A greater or less number of muscular fibres,—united in fasciculi, approximated to each other, and forming a distinct mass, of very variable size and shape, the extremities being attached to bones by means of tendons,—constitutes a muscle. In this are included cellular membrane, vessels, and nerves. See Muscle.

MUSCULAR NERVES. The nerves distributed to the muscles are so named. Winslow calls the 4th pair of nerves—*Nerv musculaire oblique supérieur*.

MUSCULAR SYSTEM. A term given to the aggregate of the muscles of the body.

MUSCULAR VEINS. These bring back the blood, which has been carried to the muscles by the muscular arteries.

MUSCULI ACCESSORII AD SACROLUMBALEM, see Sacro-lumbalis—*m. Papillares*, Carnæ columnæ.

MUSCULO-CUTANEOUS, *Mus'culo-cuta'neus*, from *musculus*, 'a muscle,' and *cutis*, 'skin.' That which appertains to muscles and skin.

MUSCULO-CUTANEOUS NERVE. This name is specially given to two nerves;—the *one*, the *External cutaneous nerve*, furnished by the brachial plexus (see Cutaneous:)—the *other*, given off from the popliteus externus, (F.) *Nervi Sciatique*, *Poplitæ externæ*;—*Prætibio-digital*, (Ch.) It descends on the anterior and outer part of the leg,—at first, hid amongst the muscles; and divides into two branches, which pass superficially on the back of the foot.

MUSCULO-RACHIDÆUS. Belonging or relating to muscles and to the spine. A name given to branches, furnished behind, by the intercostal, lumbar, and sacral arteries; and which are distributed to the spine and to the muscles of the neighbourhood.

MUSCULUS ACCLIVIS, Obliquus internus abdominis—*m. Auxiliarius*, Pyramidalis abdominis—*m. Cutaneus*, *Platysma myoides*—*m. Eustachii*, Laxator tympani—*m. Fallopii*, Pyramidalis abdominis—*m. Patientiæ*, Levator scapulæ—*m. Penicillatus*, Levator labii inferioris—*m. Pyxoides terrestres*, Lichen pyxidatus—*m. Subcutaneus*, *Platysma myoides*—*m. Succenturiatus*, Pyramidalis abdominis—*m. Succingens*, Diaphragm—*m. Supercillii*, Corrugator supercillii—*m. Testicondus*, Cremaster—*m. Testis*, Cremaster—*m. Tubæ novæ*, Circumflexus.

MUSCUS ARBOREUS, Lichen plicatus—*m. Caninus*, Lichen caninus—*m. Clavatus*, Lycopodium—*m. Corallinus*, Corallina Corsicana—*m. Cranii humani*, Lichen saxatilis—*m. Erectus*, Lycopodium selago—*m. Helminthocortos*, Corallina Corsicana—*m. Islandicus*, Lichen islandicus—*m. Marinus*, Corallina Corsicana—*m. Maritimus*, Corallina—*m. Pulmonarius quercinus*, Lichen pulmonarius—*m. Pyxidatus*, Lichen pyxidatus—*m. Villosus*, Peristroma.

MESEAU DE TANCHE, Os uteri.

MUSHROOM, Fungus.

MUSIC, *Mu'sica*, (F.) *Musique*, from *μουσα*, *musa*, 'a song.' The art of producing harmonious and cadenced sounds: an art, which has, at times, been beneficially used in diseases, particularly in those of the mind; or on which the mind could act in a salutary manner.

MUSICOMANIA, *Musoma'nia*, from *music*, and *mania*. A variety of monomania, in which the passion for music is carried to such an extent, as to derange the intellectual faculties.

MUSING, **LISTLESS**, *Aphelxia otiosa*.

MUSIQUE, *Music*.

MUSK, *Moschus*, *Mosch*, (Arab.) (F) *Musc*. A peculiar concrete animal substance, of a very diffusible odour, bitter taste, and a deep brown colour; solid and enclosed in a sac, found near the anus of the *Moschus moschiferus* or *Musk Deer*. It is possessed of stimulant and antispasmodic properties. Dose, gr. v to ʒj in bolus.

ARTIFICIAL MUSK, *Moschus fictit'ius*, *Resina Succini*. (*Ol. succini rectif.* 1 part, *acid. nitric.* 4 parts. Digest;—a black matter will be deposited, which must be well washed with water.)

MUSKGRAPE FLOWER, *Bulbus vomitorius*.

MUSKMALLOW, *Hibiscus abelmoschus*.

MUSKSEED. See *Hibiscus abelmoschus*.

MUSKWOOD, *Thymiana*.

MUSOMANIA, *Musicomania*.

MUSSÆNDA FRONDO'SA, *Behl'la*, *Beleson*. A decoction of this plant has been esteemed refrigerant.

MUSSEL, *Mytilus edulis*.

MUSSITATIO, *Mussitatio*, from *mussitare*, itself from *mussare*, 'to murmur.' A condition, in which the tongue and lips move, as in the act of speaking, but without sounds being produced. This sort of murmuring is an unfavourable sign in disease, as indicating great cerebral debility.

MUSTACHE, *Mustax*.

MUSTARD BLACK, *Sinapis*—m. Essence of, *Whitehead's*, see *Sinapis*—m. Essence of, *Whitehead's Pills* of, see *Sinapis*—m. Hedge, *Erysimum*—m. *Mithridate*, *Thlaspi campestre*—m. *Stinking hedge*, *Alliaria*—m. *Treacle*, *Thlaspi arvense*—m. *White*, *Sinapis alba*.

MUSTUM, *Wort*.

MUTACISMUS, *Mutacism*, from *μυταξισω*, "I use the letter *m* too frequently." A vitious pronunciation; consisting, according to Sauvages, in the frequent repetition of the letters *B*, *P*, and *M*, which are substituted for others.

MUTEO'SIS. Under this name is comprehended every phenomenon of expression, voluntary and involuntary, which impresses the sight or touch.

MUTILATION, *Mutila'tio*, *Maiming*, from *mutilus*, 'broken.' The removal or privation of a limb, or of some other external part of the body. In all countries, this crime has been punished with severity.

MUTINUM, *Penis*.

MUTISME, *Mutitas*.

MUTITAS, *mutus*, 'dumb.' *Dumbness*, *Aphonia*, *Ala'lia*, *Anan'lia*, *Speech'lessness*. (F.) *Mutisme*, *Mutité*. Impossibility of articulating sounds; although they can be elicited. Dumbness is often congenital, and united with deafness, of which it is an effect. In some cases, it is accidental.

MUTITAS SURDORUM, *Aphonia Surdorum*, *Deaf-dumbness*. *Speechlessness* from deafness;

congenital, or produced during infancy. The subjects of this affection are called *deaf-dumb*, (F.) *Sourds-muets*.

MUTITÉ, *Mutitas*.

MUTO, *Penis*.

MUTONIATUS, *Membrosus*.

MUTTERKORN, *Ergot*.

MYACANTHA, *Ruscus*.

MYASTHENIA, from *μυς*, 'a muscle,' and *ασθενεια*, 'debility.' Muscular debility.

MYCE, *Occlusion*.

MYCES, *Fungus*.

MYCHMUS, *Suspirium*.

MYCHTHISMOS, *Moaning*.

MYCHTHISMUS, *Suspirium*.

MYCTERES, *Nares*.

MYCTEROPHONIA, *Vox nasa'lis*, from *μυκτηρ*, 'the nose,' and *φωνη*, 'the voice.' A nasal voice. A nasal twang or accent.

MYDE'SIS, from *μυδαν*, 'I abound with moisture.' In its most general sense, it means *corruption*. By some, it is used for a mucous discharge from inflamed eyelids.

MYDON, *μυδον*. Same etymon. Fungous or putrid flesh in certain fistulous ulcers.—*Pollux*. Also, flesh putrid from mouldiness.

MYDRIASIS. Same etymon. *Platycoria*, *Amydriasis*. A name, given by several writers to morbid dilatation of the pupil; and, by others, to weakness of sight, produced by hydrophthalmia.

MYELITIS, *Inflamma'tio medul'læ spina'lis*, *Spini'tis*, *Spinodorsi'tis*, *Notomyelitis*, *Rhachialgitis*, (of some,) (F.) *Inflammation de la moëlle épinière ou rachidienne*, from *μυελος*, 'the marrow,' and *itis*, denoting inflammation. Inflammation of the spinal marrow or its membranes;—indicated by deep-seated burning pain in the spine, with various nervous and vascular irregularities of function. It is not common. Dr. Marshall Hall proposes to call the inflammation of the membranes of the brain *Meningitis*; that of the substance of the brain *Myelitis*.

MYELOPHTHISIS, *Tabes dorsalis*.

MYELOS, *Marrow*.

MYENERGIA, from *μυς*, 'a muscle,' *εν*, and *εργον*, 'work.' Muscular strength.

MYGMUS, *Suspirium*.

MYITIS, *Rheumatism*, acute.

MYLACRIS, *Patella*.

MYLE, *Patella*, *Mole*.

MYLICUS, *Molar*.

MYLO-GLOSSUS, from *μυλη*, 'the jaw,' and *γλωσσα*, 'the tongue.' Winslow has given this name to muscular fibres, which pass from the posterior part of the myloid line of the lower jaw, and from the sides of the base of the tongue to the parietes of the pharynx. These fibres belong to the constrictor superior pharyngis, (q. v.)

MYLO-HYOIDEUS, from *μυλη*, 'the jaw,' and *υοειδης*, 'the os hyoides.' (F.) *Mylo-hyoidien*. The *Mylo-pharyngeus* of Morgagni and Santorini. This muscle is situate at the upper and anterior part of the neck, behind the lower jaw. It is broad, flat, and has the form of a truncated triangle. It arises from the internal oblique line of the lower jaw bone, and is inserted at the fore part of the body of the os hyoides. Its innermost fibres unite with those of the opposite side to form a raphe on the median line. The mylo-hyoideus raises the os

hyoides and carries it forward, or it depresses the lower jaw.

MYLO-PHARYNGEUS, Constrictor pharyngis, Mylo-hyoideus.

MYOCEPHALON, Staphyloma.

MYOCELLALGIA, from *μύων*, 'muscle,' *κοιλία*, 'abdomen,' and *ἀλγέω*, 'I suffer.' Pain in the muscles of the abdomen.

MYOCELLITIS, from *μύων*, 'muscle,' *κοιλία*, lower belly, and *itis*, denoting inflammation. Inflammation of the muscles of the abdomen.

MYODESOPSIA, Metamorphopsia.

MYODYNAMIOMETER, Dynamometer.

MYODYNAMOMETER, Dynamometer.

MYODYNIA, from *μύων*, 'muscle,' and *ὄδυρ*, 'pain.' Pain in the muscles,—rheumatismal or other. Rheumatism (q. v.)

MYOGRAPHY, *Myographia*, from *μύων*, 'muscle,' and *γράφειν*, 'to describe.' An anatomical description of the muscles.

MYOLEMMA, *Myolemma*, from *μύων*, 'a muscle,' and *λεμμα*, 'a coat.' The membranous tribe of each muscular fibre. It has the same signification as *Sarcolemma* (q. v.)

MYOLOGY, *Myolog'ia*, *Sarcolog'ia*, *Mysiolog'ia*, from *μύων*, 'a muscle,' and *λογος*, 'a discourse.' That part of anatomy which treats of the muscles.

MYON, Muscle.

MYONARCO'SIS, from *μύων*, 'a muscle,' and *νάρκη*, 'stupor.' Numbness of the muscles.

MYONOSIS, *Myonosis*, from *μύς*, 'a muscle,' and *νόσος*, 'disease.' A disease of the muscles.

MYOPALMUS, *Subsultus tendinum*.

MYOPIA, *Myopi'asis*, *Lusciop'itas*, *Myo'sis*, *Parop'sis propin'qua*, *Amblyo'pia dissito'rum*, *Dyso'pia dissitorum*, *Visus j'u'venum*, from *μύω*, 'I close,' or from *μύς*, 'a mouse,' and *ὤψ*, 'the eye.' Near-sightedness, Mouse-sight, Purlblindness, (F.) *Vue courte*. Persons who can only see objects very near. The defect is owing to the too great convexity of the eye, and is palliated by wearing concave glasses.

MYOPODIORTHO'TICON, from *μύωψ*, 'one that is short-sighted,' and *διορθωτικόν*, 'having power to correct.' An apparatus for the cure of short-sightedness.—A. A. Berthold.

MYOPS, *μύωψ*, *Lusciop'sus*, *Myop'us*. Same etymon. One who is attacked with *myopia* or short-sightedness.

MYO'SIS, from *μύω*, 'I close.' *Phthi'sis pupillaris*. Permanent contraction of the pupil. It is usually caused by iritis, and is extremely difficult of cure. When it exists to such an extent as to obliterate the pupil, it is called Synizesis, (q. v.) Also, *Myopia*, (q. v.)

MYOSITIS, from *μύων*, 'a muscle' A name proposed by Sagar for inflammation of the muscles. Rheumatism.

MYOSOTIS, *Hieracium pilosella*, Rheumatism, Rheumatism, acute.

MYOTOMY, *Myotom'ia*, from *μύων*, 'a muscle,' and *τέμνειν*, 'to cut.' The part of practical anatomy, which treats of the dissection of the muscles. Also, the surgical operation of the division of muscles to remove deformity.

MYOTYRBE, Chorea.

MYREPSUS, Unguentarius.

MYRIAGRAMME, from *μυρία*, '10,000,' and *γράμμα*, 'gramme.' A weight equal to 10,000 grammes, or to 26 pounds, 9 ounces, and 6 drachms Troy.

MYRIAMÈTRE. A measure of 10,000 metres; equal to 16 miles, 1 furlong, 156 yards, and 14 inches.

MYRICA CERIFERA. See *Cera flava* et alba, and Wax, Myrtle

MYRICA GALE, *Myrtus Brabantica*, *M. Anglica*, *Myrtifolia Belgica*, *Gale*, *Gagel*, *Rhus sylvestris*, *Acaron*, *Eleagnus*, *E. cordo*, *Chamaeagnus*, *Dodona*. Dutch myrtle, Sweet gale, Sweet willow, Candleberry myrtle, (F.) *Piment Royal*, *Thé de Simon Pauli*, *Gale odorant*. Family, Amentaceae. Sez. Syst. Diœcia Tetrandria. The leaves, flowers, and seeds have a strong, fragrant smell, and a bitter taste. They are used for destroying moths and cutaneous insects, and the infusion is given internally as a stomachic and vermifuge.

MYRINGA. See Tympanum.

MYRINX. See Tympanum.

MYRISTICA, see *M. Moschata*.

MYRISTICA MOSCHATA, *M. aromatica*, *Comacon*. Nat. Ord. Myristicæ. The tree which produces the nutmeg and mace. (F.) *Muscadier*. The Nutmeg, *Myristica* (Ph. U. S.) *Myristicæ nucleus*, *Myristicæ moschatæ nucleus*, *Nux moschata*, *Nucis'ta*, *Nux myristica*, *Chrysobalanus Galei*, *Unguental'ria*, *As'sala*, *Nux aromatica*, (F.) *Muscade*, is the seed or kernel. It has a fragrant, aromatic odour; an agreeable, pungent taste, and is much used for culinary purposes. Alcohol extracts its active matter. It has the properties of aromatics in general; being stimulant and stomachic. The oil—*Oleum myristicæ*—possesses the virtues of the nutmeg. Dose of the nutmeg, gr. v. to ʒj;—of the oil grt. iij. to grt. vj.

MACE, *Macis*, *Maces*, *Flores macis*, (F.) *Fleurs de muscade*, is the involucre of the fruit; it is membranous, with the odour and taste of the nutmeg, and is possessed of similar qualities. The *Oleum macis* is a fragrant, sebaceous substance, expressed in the East Indies. It is only used externally.

MYRISTICÆ NUCLEUS. See *Myristica moschata*.

MYRMECIASIS, Formication.

MYRMECIASMOS, Formication.

MYRMECIZON, Formicant.

MYRMEX, Formica.

MYROBALANUS, from *μύρον*, 'an ointment,' and *βάλανος*, 'a nut;' so called, because formerly used in ointments, *Angelocacos*, *Myrobalan*. A dried Indian fruit of the plum kind. Of this there are several varieties—the *M. Bellirica* or *Belliric myrobalan*, *Bellegu*, *Bellerigi*, *Behileg*—the *M. chebulica* or *Chebulic myrobalan*; the *M. citrina* or *Yellow myrobalan*, *Ara'ra*; the *M. emblica* or *emblic myrobalan*, and the *M. Indica*, *As'sar*, *Indian*, or *Black myrobalan*. All the myrobalans have an unpleasant, bitterish, very austere taste; and strike an inky blackness with a solution of steel. They are said to possess laxative as well as astringent properties.

MYRON, Unguentum.

MYROPISSOCERON. A topical application in alopecia, referred to by Galen; from *μύρον*, 'ointment,' *πίσσα*, 'pitch,' and *πλεξ*, 'wax.'

MYROPEAS, Unguentarius.

MYROPOLES, Apothecary, Unguentarius.

MYROSPERMUM PERUIFERUM. See *Myroxylon peruiferum*.

MYROXYLON, see *M. peruiferum*.

MYROXYLON PERUIFERUM, from μυρον, 'an ointment,' and ξύλον, 'wood,' *Cabureiba*. *Nat. Ord. Leguminosæ*. The tree which affords the *Peruvian balsam*, *Balsamum Peruvia-num*, *Putzochill*, *Myroz'yl Peruif'eri bal'samum*, *Myroxylon* (Ph. U. S.) *Indian*, *Mexican*, or *American balsam*, *Balsamum Perua-num*, *Cabureiciba*, (F.) *Baume de Pérou*. This balsam consists of Benzoic acid, resin, and essential oil. Its odour is fragrant and aromatic; taste hot and bitter; soluble in alcohol, and miscible in water by the aid of mucilage. It is stimulant and tonic, and considered to be expectorant: as such, it has been employed in paralysis, chronic asthma, chronic bronchitis and rheumatism, gleet, leucorrhœa, &c., and, externally, for cleansing and stimulating foul indolent ulcers. Dose, gr. v to gr. xxx.

WHITE BALSAM OF PERU, *Natural balsam*, *Balsamum album*, *Styrax alba*, *Balsamelæon*, is obtained by incision from the *Myrospermum peruiferum*.

MYROXYLON TOLUIFERUM, *Toluifera Balsamum*.

MYRRHA, μυρρα, Heb. כר; *Bola*, *Stactæ*, *Ergasma*, *Myrrh*, *Caldinia*, *Smyna*, *Myrrha rubra*, (F.) *Myrrhe*. The exudation of an unknown plant of Abyssinia or Arabia Felix, said to be the *Balsamaden'dron myrrha*. This gum-resin has a fragrant, peculiar odour; and bitter aromatic taste. It is in reddish-yellow, light, brittle, irregular tears; partially soluble in distilled water, when aided by friction. S. G. 1.360. It is stimulant; and has been used in cachectic affections, humoral asthma, chronic bronchitis, &c. Dose, gr. x. to ʒj.

MYRRHA IMPERFECTA, *Bdellium*.

MYRRHINE, *Myrtus*.

MYRRHIS ANNUA, *Athamanta Cretensis*—m. *Odorata*, *Cherophyllum odoratum*.

MYRSINE, *Myrtus*.

MYRSINELÆON, from μυρσινῆ, 'the myrtle,' and ἔλαιον, 'oil.' Oil of myrtle.—*Dioscorides*.

MYRSINITES, μυρσινίτης. Wine, in which branches of myrtle have been macerated.

MYRTACANTHA, *Ruscus*.

MYRTE COMMUN, *Myrtus*.

MYRTIDANON, μυρτιδανον. An excrecence, growing on the trunk of the myrtle, and used as an astringent. Also, a wine—*Vinum myrtidanum*—made from wild myrtle berries.

MYRTIFOLIA BELGICA, *Myrica gale*.

MYRTIFORM, *Myrtiformis*; from *myrtus*, 'a myrtle,' and *forma*, 'shape.' Having the shape of a leaf of myrtle. A name given to a muscle (depressor *alæ nasi*, q. v.) to the fossa incisiva; to certain caruncles, (q. v.) &c.

MYRTIFORMIS, *Compressor naris*, *Depressor alæ nasi*.

MYRTITES. A name, given to a medicine prepared with honey and myrtle berries.

MYRTLE, *Myrtus*—m. *Berry*, *Vaccinium myrtillus*—m. *Candleberry*, *Myrica gale*—m. *Dutch*, *Myrica gale*—m. *Wild*, *Ruscus*.

MYRTOCHEILIDES, *Nymphæ*.

MYRTON, *Clitoris*.

MYRTUS, *Myrtus communis*, *M. communis Italica*, *Myrsinæ*, *Myrrhinæ*, *The myrtle*, (F.) *Myrte commun*. The berries of this plant have been recommended in alvine and uterine fluxes and other disorders of relaxation and debility. They are moderately astringent and somewhat aromatic.

MYRTUS ANGLICA, *Myrica gale*—m. *Brabantica*, *Myrica gale*.

MYRTUS CARYOPHYLLATA, *Cassia caryophyllata*, *Canelin caryophyllata*, (F.) *Capelet*, *Cannelle giroflée*. The tree which affords the *Clove bark*;—*Cortex carophyllatus*. This bark is a warm aromatic; resembling clove with an admixture of cinnamon. It may be used with the same views as cloves or cinnamon.

MYRTUS PIMENTA. The tree which bears the *Jamaica pepper*, *Pimenta baccæ*, *Pimento berries*, *Pimento*, *Piper caryophyllatum*, *Cocculi Indi aromat'ici*, *Piper chû'pæ*, *Amomum pimentæ*, *Fructus pimenti*, *Carive*, *Caryophyllus Americanus*, *Piper odoratum Jamaicenses*, *Allspice*, *Piper Jamaicenses*, *Piper tabas'cum*, (F.) *Poivre de Jamaïque*, *Toute épice*, *Assourou*. These unripe berries—*Pimenta* (Ph. U. S.)—have an aromatic odour; resembling a mixture of cinnamon, nutmeg, and cloves; the taste is pungent, but mixed, like the odour. Like other peppers, this is stimulant and carminative. The oil—*Oleum Pimentæ*—possesses the virtues of the berries. The powdered fruit has been called *Quatre-épices* or *Four spices*. Dose, gr. v. to ʒij.

MYS, *Muscle*.

MYSIOLOGIA, *Myology*.

MYSTAX, μυσταξ. The hair growing on each side of the upper lip in men. The *mustache* or *mustachio*. Also, the upper lip.

MYSTERION, μυστήριον, 'a mystery.' An arcanum, nostrum, or secret preparation in general. Also, an antidote, referred to by Galen and others.

MYSTRON, μυστρον. A Greek measure, which held about three drachms.

MYTILUS EDULIS. The common *muscle* (F.) *Moule*. A bivalve, the flesh of which, when at all in a state of decomposition, is highly poisonous. When fresh, it is an agreeable article of diet.

MYURUS, *Meiurus*. A pulse is so called when it sinks progressively, and becomes smaller and smaller like a rat's tail; from *μυς*, 'rat,' and *ουρα*, 'tail.' *Pulsus myurus reciprocus*, a pulse, which, after having become gradually weaker, resumes, by degrees, its former character.

MYXA, *Mucus*, *Sebestina*.

MYXODES, *Mucous*.

MYXORRHOOS, μυξόρροος, from *μύξα*, 'mucus,' and *ῥεω*, 'I flow.' One who is subject to mucous discharge. Applied to infants, that discharge a considerable quantity of mucus and saliva.

MYXOSARCOMA, from *μύξα*, 'mucus,' and *σάρξ*, 'flesh.' A tumour which is *mucocarnæous*; partly mucous and partly fleshy.

MYXOTER, *Nasus*.

MYZESIS, *Sucking*.

N.

N: This letter, in prescriptions, is an abridgment of *Numero*, 'by number.'

NABOT, *Saccharum candidum*.

NABOTHI GLAN'DULE, *O'cula Nabothi*, *Ovarium Nabothi*, *Folliculi rotundi et oblongi*, *Vesiculae seu Bullae rotundae cervicis uteri*, *Vesiculae seminales mulierum*, *Corpora globosa*, *Corpuscula globosa*, *Glandulae seu Hydatides cervicis uteri*. Some small, mucous crypts or follicles situate in the interstices of the duplicatures of the lining membrane of the cervix uteri. Naboth, from noticing them in a morbid condition, mistook them for ova; and hence they received the name *Orula Nabothi*.

NACRA, *Nakra*, *Nusa*. A kind of Influenza, common in the East Indies.

NEVUS, *Nævus mater-nus*, *Nævus*, *Maculae matricis*, *M. Mater-næ*, *Stigmata*, *Metrocelides*, *Mother's marks*, *Fancy marks*, *Mother's spots*, *Congenitæ notæ*, (F.) *Envie*. Spots of various kinds on the skin of children when born, which have been idly attributed to the influence of the maternal imagination on the fœtus in utero. They are of various appearances, some much better supplied with blood than others. Some are merely superficial or stain-like spots. Others are prominent; and, often, have long, irregular hairs growing from them. These have usually been called *Moles*, *Spili*, *Epichro'es spili*, &c.

When nævi are superficial, without any disposition to enlarge or spread, they need not be meddled with; but all those that partake of the character of aneurism by anastomosis, had better be removed by the knife, where practicable.

NAPDA, *Naphtha*.

NAIL, Sax. nægl. (G.) Nagel. *Unguis*, *Onyx*, (F.) *Ongle*. A whitish transparent substance, similar to horn, which covers the dorsal extremity of the fingers. Three portions are distinguished in it; the *extremity*, which is free, at the end of the finger;—the *body* or middle portion adherent by its inner surface; and the *root*. The last presents two distinct parts; the one, terminated by a thin, serrated edge, is buried in a duplicature of the skin; the other, called *lu'nula seu semilu'nula unguis*, is whitish and of a semilunar shape, and is situate above the part where the epidermis terminates. The nails are composed of a horny tissue, of the same nature as that which forms the hoofs, horns, and scales of different animals. When the nail has been torn off, the papillæ of the skin become covered by a soft, whitish lamina, whose consistence gradually augments. New laminae are then formed underneath, and give the nail the thickness it ought to possess. The corneous substance, being thus constantly produced at the extremity of each of these laminae, the whole of the nail is pushed forwards, and it would grow indefinitely, were it not cut or worn by friction.

The nails protect and support the extremities of the fingers against the impression of hard bodies. They are, also, useful in laying hold of small bodies; and dividing those that have but little consistence.

NAIN, *Nanus*.

NAKRA, *Nakra*.

NANUS, *Pumilio*, *Pumilo*, 'a dwarf.' *Pumilus*, *Pomilius*, 'dwarfish.' (F.) *Nain*. An

individual, who is much below the usual stature. The term is applicable to all organized beings, from man to the vegetable. Trees have their dwarfs, as the human species have theirs. Some curious authenticated instances of human dwarfs are on record. Bebe, the dwarf of Stanislaus, king of Poland, was 33 inches (French,) long, and well proportioned. The Polish nobleman, Borwlaski, who was well made, clever, and a good linguist, measured 28 Paris inches. He had a brother, 34 inches high, and a sister 21. A Friesland peasant, at 26 years of age, had attained 29 Amsterdam inches. C. H. Stöberin, of Nürnberg, was not 3 feet high at 20, yet he was well proportioned and possessed of talents.

NAPE OF THE NECK, *Nucha*.

NAPELLUS VERUS, *Aconitum napellus*.

NAPHÆ FLORES. See *Citrus aurantium*.

NAPHTHA, *Nafda*, *O'leum petrae album*, from a Chaldaic and Syriac word signifying *bitumen*. A bituminous substance, found in Persia, Calabria, Sicily, &c. It is liquid, limpid, of a yellowish white colour, a smell slightly resembling that of oil of turpentine, and lighter than water. It resembles petroleum in its properties, and has been chiefly used as an external application; although, occasionally, as an anthelmintic, and in inhalation in phthisis pulmonalis.

NAPHTHA VITRIOLI, *Æther sulphuricus*—n. *Vitrioli camphorata*, *Tinctura ætherea camphorata*—n. *Vitrioli martialis*, *Tinctura seu alcohol sulfurico æthereus ferri*.

NAPIUM, *Lapsana*.

NAPLES (CLIMATE OF.) The climate of Naples in its general characters resembles that of Nice, but it is more changeable: the sirocco, too, which is little known in Nice, is severely felt at Naples. It is not a good residence for the phthisical invalid: Sir James Clark, indeed, considers it altogether an unsuitable residence for such.

NAPLES, MINERAL WATERS OF. In the Quarter, Santa Lucia, near the coast, is a cold spring, rich in sulphuretted hydrogen and carbonic acid. It is much used as an aperient tonic, and in cutaneous affections.

NAPLES WATER, FACTITIOUS. (F.) *Eau de Naples*, *Aqua Neapolitana*, *Aqua acidula hydro-sulphurata*. (*Acidulous water*, containing four times its bulk of carbonic acid, $\frac{3}{4}$ xv, and $\frac{1}{2}$ ij; *hydrosulphuretted water*, $\frac{3}{4}$ ix; *carbonate of soda*, gr. viij; *carbonate of magnesia*, gr. x. M Ph. P.)

NAPTA, *Nata*.

NAPUS, *Sinapis*—n. *Sylvestris*, *Brassica napus*.

NARCAPHITE, *Thymiana*.

NARCAPHTHON, *Nascaphthon*. The bark of an aromatic tree formerly brought from India. By some, supposed to be that of the tree which affords the olibanum. It was used in fumigation, in diseases of the lungs.

NARCE, *Narcosis*.

NARCEMA, *Narcosis*.

NARCISSA FAUX, *Narcissus pseudo-narcissus*—n. *des Prés*, *Narcissus pseudo-narcissus*—n. *Sauvage*, *Narcissus pseudo-narcissus*.

NARCISSUS PSEUDO-NARCISSUS. The *Daffodil*. (F.) *Narcisse sauvage*, *Narcisse des prés*, *Faux narcisse*. The root is emetic and

cathartic, in the dose of ζij . The flowers are antispasmodic. Dose, 24 grains.

NARCO'SIS, *Nar'cotism, Narcē, Narca, Narce'ma*, from $\nu\alpha\rho\kappa\omega$, 'I benumb.' *Torpe'do, Torpor, Stupor, Stupefactio*. The aggregate effects produced by narcotic substances. At times, narcotism is confined to a state of more or less profound stupor; and constitutes, in certain cases, a useful remedial condition; at others, it is true poisoning, characterized by vertigo, nausea, a state of intoxication or apoplexy, constant delirium, convulsive motions, &c. Emetics, in strong doses, and not much diluted with water; purgatives and glysters are the first means to be used in this condition. The stupor may afterwards be combated by the use of exciting and stimulating drinks.

NARCOTIA, *Narcotine*.

NARCOT'ICS, *Narcot'ica, Card'tica, Obstupescien'tia, Stupefacien'tia, Cerebro-spinatus*, (F.) *Stupefactifs, Stupéfians*. Same etymon. Substances, which have the property of stupefying;—as opium, stramonium, hyoscyamus, belladonna, &c. They are used in medicine as soothing agents; exerting their particular influence on the brain. In small doses, as a general principle, narcotics stimulate; in large, they act as sedatives. The following is a list of the chief narcotics:

Aconitum,	Stramonii Folia,
Ætherea,	————— Semina,
Belladonna,	
Camphora,	Mental Narcotics,
Conium,	(Appropriate Music,
Digitalis,	Monotonous Sounds,
Humulus,	or any succession of
Hyoscyamus,	monotonous impres-
Lactucarium,	sions.)
Opium and Morphia,	

NARCOTINE, *Narcoti'na, Narcotia, Narcotin*; same etymon; *Sel de Derosne, Opiane, Sel d'opium, Principe crystallizable de Derosne*. A solid, white, inodorous, and insipid substance; by some considered to be alkaloid, by others neuter; crystallizable in straight prisms with a rhomboidal base; fusible like the fats; soluble in boiling alcohol and ether, and scarcely soluble in water. Narcotine produces all the unpleasant effects of opium; but, at the same time, throws the animal into a state of stupor. It is not used in medicine, on account of these objections. The salts, which are very bitter, have been used successfully in India for the cure of intermittents.

NARCOTISM, *Narcosis*.

NARD, CELTIC, *Valeriana Celtica*—*n. Indica, Nardus Indica*—*n. Indien, Nardus Indica*—*n. Indique, Nardus Indica*—*n. Sauvage, Asarum*.

NARDUM GAILLICUM, *Valeriana Celtica*.

NARDUS CELTICA, *Valeriana Celtica*—*n. Montana, Asarum*.

NARDUS IN'DICA, *Spica nardi, Spica In'dica, Indian nard, Spikenard, Andropogon nardus*. The root of this plant is one of the ingredients in the mithridate and theriaca. It is moderately warm and pungent, and has a flavour by no means disagreeable. It is used by the Orientals as a spice:—(F.) *Nard Indien, N. Indique*. An ointment was formerly used, called *Unguentum nardi'num*. It was prepared of *Nard, Ma-*

labathrum leaves, Oil of worms, Costus, Amomum, Myrrh, &c., and was used as a detergent.

NARDUS RUSTICA, *Asarum*.

NARES, *Rhines, Cavitas Na'rium, Cavum seu Ca'vca seu Caver'na narium, Nasus inter'nus, Mycle'res, Na'rimum ad'itus, Ocheteu'mata. The nostrils*. (F.) *Narines*. Two elliptical apertures, situate beneath the nose, and separated from each other by the cartilaginous septum nasi. These apertures are continually open, and give passage to the air we breathe; and to the mucous fluids secreted in the nasal fossæ.

NARES, INTERNÆ, *Nasal Fossæ*.

NARES, POSTERIOR, *Nares postre'mæ, Extré-mæ nares, Ostia posteriora seu Cho'anæ na'rimum, Na'rimum Ex'itus*, (F.) *Arrières narines, Ouvertures postérieures des fosses nasales*, are the posterior apertures of the nasal cavities, which establish a communication between those cavities and the pharynx. They are bounded, *above*, by the body of the sphenoid bone; *below*, by the palate bone, and the base of the velum pendulum; and, on the *outside*, by the internal ala of the pterygoid process. They are separated from each other by a septum, of which the vomer is the bony part.

NARIFUSO'RIA, from *Nares*, 'the nostrils,' and *fundere, fusum*, 'to pour.' Medicines dropt into the nostrils.

NARINES, *Nares*.

NARIUM ADITUS, *Nares*.

NARTHEX, *Splint*.

NASA, *Nacra, Nata*.

NASAL, Nasal'is, from *nasus*, 'the nose.' That which relates to the nose.

NASAL ARTERY. This is the largest of the two branches in which the ophthalmic artery terminates. It issues from the orbit, above the tendon of the orbicularis palpebrarum, passes above the side of the root of the nose, and anastomoses with the last extremity of the facial. Haller gave the name *nasal* to the sphenopalatine. He also called the dorsales nasi, furnished by the external maxillary, *Nasales laterales*.

NASAL BONES, *Ossa nasi, Ossa nasal'ia, Ossic'ula nasi, Ossa maxill'æ superio'ris quarta seu quinta seu secun'da*, (F.) *Os nasaux, Os propres du nez*. These bones are situate beneath the nasal notch of the os frontis, and occupy the space between the nasal or angular processes of the superior maxillary bone. Their shape is nearly quadrilateral. They have an *external* or *cutaneous* surface; an *internal* or *nasal*, and four margins. Each is articulated with its fellow, with the os frontis, ethmoid, and superior maxillary bone. They ossify from a single point.

NASAL CAR'TILAGE, *Cartila'go triangula'ris Nasi*. A cartilage formed of three portions, which unite at the dorsum nasi, and are distinguished into the *cartilage of the septum*, and the *lateral cartilages*. This cartilage is continuous, *above*, with the ossa nasi; and, *inferiorly*, with membranous fibro-cartilages, which form the supple and movable part of the nostrils. They are two in number—the one before, the other behind.

NASAL FOSSÆ, *Cavi na'rimum, Nares inter'næ* are two large, anfractuous cavities, situate between the orbits below the cranium, and lined by the pituitary or Schneiderian membrane. These cavities have no communication with each other; but the various sinuses in the neighbour-

ing bones;—the ethmoidal, sphenoidal, superior maxillary, &c., all communicate with them. The general cavity of each nostril is divided by the ossa spongiosa into three *meatus* or *passages*, which run from before backwards. 1. The *Meatus narium superior*, placed at the upper, inner, and back part of the superior spongy bone. 2. The *Meatus medius*, situate between the superior and inferior spongy bones; and 3. The *Meatus inferior*, situate between the inferior spongy bone and the bottom of the nose. The Schneiderian membrane receives the first pair of nerves, and various branches from the fifth pair. The arteries are furnished by the branches of the *internal maxillary*, known under the names of sphenopalatine, infra-orbital, superior alveolar, palatine, pterygo-palatine; by the supra-orbital, and ethmoidal branches of the ophthalmic artery, by the internal carotid, superior labial, and dorsales nasi. Its veins are little known, and generally follow the course of the arteries. The lymphatics are almost unknown. The nasal fossæ are the seat of smell; they aid, also, in respiration and phonation.

NASAL MUCUS, *Mucus narium*, *Mucor* seu *Pituïta*, seu *Blenna*, seu *Lympha muculentaria narium*, vulgarly called *Snot*, (F.) *Morce*, is the mucus secreted by the Schneiderian membrane.

NASAL NERVE,—*Naso-palpébral* (Ch.),—*Naso-ocularis* (Sömmering.) One of the three branches of the ophthalmic nerve of Willis. It enters the orbit of the sphenoidal fissure, passes along the inner paries of that cavity, and divides, opposite the internal and anterior orbital foramen, into two branches. 1. The *internal and posterior*, which passes into the *Foramen orbitarium internum anterius*, enters the cranium beneath the dura mater, and passes into the nasal fossæ, through an aperture at the sides of the *Crista galli*. It afterwards divides into several filaments: one of them—the *Naso-lobar*, of Clausier—is very small, and descends on the posterior surface of the os nasi, and ramifies in the integuments of the ala nasi. A second terminates near the septum; others descend along the outer paries of the nasal fossæ. 2. The other is *external and anterior*, and is called the *external nasal nerve*. It is distributed to the outside of the orbit. Before dividing, the nasal nerve communicates with the ophthalmic ganglion, and gives off two or three ciliary nerves:—the *Posterior Nasal Nerves*. Sömmering has given this name to the nerves, which arise from the internal part of the sphenopalatine ganglion.

NASAL NOTCH, (F.) *Échancrure nasale*. A semicircular notch, situate between the nasal prominence of the frontal bone, and articulated with the nasal bones and the nasal processes of the superior maxillary bones.

NASAL PROMINENCE, (F.) *Bosse nasale*. A prominence, situate on the median line, at the anterior surface of the os frontis, between the two superciliary arches.

NASAL SPINES. These are three in number. 1. The *Superior nasal spine* of the os frontis, occupying the middle of its nasal notch, and articulated before with the nasal bones, behind with the ethmoid. 2. The *inferior and anterior nasal spine*, situate at the inferior part of the anterior opening of the nasal fossæ. It is formed by the two superior maxillary bones; and 3.

The *inferior and posterior nasal spine*, *Épine gutturale*, (Ch.) a process, formed on the median line by the two palate bones at the posterior part of the palatine arch.

NASALIS, Compressor naris.

NASALIS LABII SUPERIORIS. A small muscular slip, which runs up from the middle of the orbicularis and the lip to the tip of the nose. It lies exactly in the furrow, and is occasionally a levator of the upper lip, or a depressor of the tip of the nose.

NASATUS, Membrosus.

NASCALE. A kind of pessary, made of wool or cotton, which was formerly introduced into the vagina, after being impregnated with oil, ointment, or some other proper medicament.

NASCAPHTHON, Narcaphthon.

NASDA, Nata.

NASITIS, Rhinophonia.

NASITIS.POSTICA, Angina nasalis.

NASO-PALATINE, *Naso-palati'nus*. That which belongs to the nose and velum palati.

NASO-PALATINE GANGLION is situate in the foramen palatinum anterius. Its greater extremity receives the two naso-palatine branches; whilst the smaller gives off two or three filaments, which reach the palatine vault, where they ramify on the membrane of the same name, anastomosing with filaments of the great palatine nerve.

NASO-PALATINE NERVE is furnished by the sphenopalatine, which proceeds from the ganglion of Meckel. It traverses the vault of the nasal fossæ, and proceeds upon the septum between the two layers of the pituitary membrane. It enters the anterior palatine canal, and terminates at the superior angles of the naso-palatine ganglion, without attaining the mouth.

NASO-PALPÉBRAL, Orbicularis palpebrarum.

NASTURTIIUM AQUATICUM, *Cardamine pratensis*, *Sisymbrium nasturtium*—n. *Hortense*, *Lepidium sativum*—n. *Indicum*, *Tropæolum majus*—n. *Pervivium*, *Tropæolum majus*—n. *Pratense*, *Cardamine pratensis*.

NASUM DILATANS, *Pyramidalis nasi*.

NASUS. The *Nose*, *Rhin*, *Rhis*, *Organon olfactûs* seu *odoratûs* seu *olfactorium*, *Promontorium faciei*, *Myzoter*. (F.) *Nez*. The nose is a pyramidal eminence, situate above the anterior apertures of the nasal fossæ, which it covers; and, consequently, occupying the middle and upper part of the face, between the forehead and upper lip, the orbits and the cheeks. Its lateral surfaces form, by uniting angularly, a more or less prominent line, called the *Dorsum Nasi*, (F.) *Dos du nez*. This line terminates, anteriorly, by the *lobe*. The sides are called *Ale Nasi*, *Pinnæ Naris*, (F.) *Ailes du nez*. The columna is the inferior part of the partition.

The chief varieties of the nose are the *aquiline*, the *flat nose*, (F.) *Nez camarot* ou *épaté*, and the *snub nose*, (F.) *Nez retroussé*. The nose is formed, besides its bones, of fibro-cartilage, cartilage, muscles, vessels, and nerves; and its use seems to be, to direct odours to the upper part of the nasal fossæ.

NASUS INTERNUS, Nares.

NATA, *Natta*, *Nasa*, *Nasda*, *Napta*. A fleshy, indolent excrescence, having the shape of the nates.

NATARON, Natron.

NATA'TION, *Nata'tio*, from *natare*, itself from *nare*, 'to swim.' *Swimming*. The action of swimming, or of supporting one's self, or moving upon the water. Swimming resembles the horizontal leap in its physiology—the medium being water instead of air. The difference between the specific gravity of the human body and that of water is not great; so that but little exertion is required to keep a part of the body above water. Swimming is a healthy gymnastic exercise, combining the advantages of bathing.

NATES, *Ephed'rana*, *Nat'ulæ*, *Scaphia*, *Clunes*, *Glutoi*, *Monæ*; the *Bottom*, *Backside*, *Postérieurs*, *Buttocks*, &c. (F.) *Fesses*. Two round projections, at the inferior and posterior part of the trunk, on which we sit. Amongst the mammalia, man alone has the nates prominent and round. They are formed chiefly by the skin, and a thick layer of cellular tissue, which covers the three glutei muscles.

NATES ET TESTES, *Quadrigemina corpora*.

NATRON, *Natrum*, *Nat'aron*, *Nitrum*, from *Natron*, a lake in Judæa. A saline compound, very abundant in Egypt, which is almost wholly formed of subcarbonate of soda, (q. v.)

NATRON MURIATUM, Soda, muriate of—n. *Præparatum*, Soda, subcarbonate of—n. *Tartarizatum*, Soda, tartrate of—n. *Vitriolatum*, Soda, sulphate of.

NATRUM CHLORATUM LIQIDUM, *Liquor sodæ chlorinatæ*—n. *Muriaticum*, Soda, muriate of—n. *Oxymuriaticum*, Soda, chloride of—n. *Oxyphosphorodes*, Soda, phosphate of—n. *Sulphuricum*, Soda, sulphate of.

NATTA, *Nata*.

NATULÆ, *Nates*.

NATURA, *Genital organs*.

NATURAL PARTS, *Genital organs*.

NATURALIA, *Genital organs*.

NAUCLEA GAMBIR, see *Kino*.

NAUSEA, *Nausio'sis*, *Naut'ia*, (F.) *Nausée*, *Envie de vomir*; from *navis*, *navis*, 'a ship;' because those unaccustomed to sailing are so affected. *Sickness*. A desire to vomit.

NAUSEA MARI'NA; *Morbis nauticus*, *Seasickness*, *Vomitus navigantium*, (F.) *Mal de mer*. The sickness, vomiting, &c., experienced at sea by those unaccustomed to a sea life; and from which those who are so accustomed are not always exempt. It generally ceases when the person becomes habituated to the motion of the vessel, and not till then.

NAU'SEANT, *Nau'seans*. An agent that excites nausea, which is a state of diminished action. Nauseants are, hence, valuable remedies in diseases of excitement.

NAUSIO'SIS. This word, besides being synonymous with nausea, (q. v.) has been used to express the state of venous hemorrhage, when blood is discharged by jets.

NAUTIA, *Nausea*.

NAVEL, *Umbilicus*—n. *String*, *Funiculus umbilicalis*.

NAVET, *Brassica rapa*.

NAVETTE, *Brassica napus*.

NAVICULAR, *Navicula'ris*, *Naviformis*, from *navic'ula*, 'a little ship.'

FOSSA NAVICULAR'IS, *F. Scaphoides*, *Navic'ula*, *Scaph'ula*. See *Scaphoid*. This name has been given, 1. To a small depression between the entrance of the vagina and the posterior commissure of the labia majora or fourchette. 2. To a perceptible dilatation, presented by the

urethra in man, near the base of the glans. 3. To the superficial depression which separates the two roots of the helix. This is also called *Scapha*.

NAVIFORMIS, *Navicular*.

NAVIS, *Vulva*.

NEAR-SIGHTEDNESS, *Myopia*.

NEB'ULA, *Nubes*, *Nube'ula*, *Nephos*, *Neph'clæ*, *Neph'e'lon*, (F.) *Nuage*, *Ombra'ge*. See *CLIGO*. A slight speck on the cornea. A mist or cloud suspended in the urine.

NEBULOUS, *Nepheloid*.

NEC'ESSARY, *Necessa'rius*, (*ne*, and *ces-sare*.) *The Necessaries of Life*, *Vitæ necessitates*, (F.) *Besoins de la vie*, include every thing requisite for the maintenance of life; and particularly food.

NECK, *DERBYSHIRE*, *Bronchocele*—n. *Swelled*, *Bronchocele*—n. *Wry*, *Torticollis*.

NECKLACE, *ANODYNE*. These are formed of the roots of hyoscyamus, Job's tears, allspice steeped in brandy, or the seeds of the wild liquorice vine, to suit the fancies of the prescribers. They are employed to facilitate dentition in children, and to procure sleep in fever.

NECRÆ'MIA; from *νεκρος*, 'death,' and *αἷμα*, 'blood.' *Death of the blood*. Death beginning with the blood—C. J. B. Williams.

NECENCEPHALUS, *Mollities cerebri*.

NECRODES, *Cadaverous*.

NECROLOGY, *BILLS OF*, *Mortality*, *bills of*.

NEC'ROMANCY, *Necromanti'a*, *Negroman-ti'a*, *Nigromanti'a*, *Necyomanti'a*, *Nicromanti'a*; from *νεκρος*, 'death,' and *μαντεία*, 'divination.' *Divination by the dead*.

NECROMANTIA, *Necromancy*.

NECRON, *Cadaver*.

NECROPHOB'IA, from *νεκρος*, 'death,' and *φοβος*, 'fear.' *Exaggerated fear of death*. This symptom occurs in patients where the disease is not mortal; as in hypochondriasis. In fevers, it is not a good symptom.

NECROPNEUMON'IA, *Gangræ'na Pulmo-nium*, (F.) *Gangrène du Poupon*; from *νεκρος*, 'death,' and *Pneumonia*. *Gangrenous inflammation of the lungs*. This may be *diffused* or *circumscribed*. The only pathognomonic symptom is the extraordinary and repulsive odour of the breath and expectoration. The treatment consists in the use of the chlorides internally, or of chlorine by inhalation; allaying irritation by opium, and supporting the patient by wine whey, and nourishing diet.

NECROPSY, *Autopsia cadaverica*.

NECROSCOPY, *Autopsia cadaverica*.

NECRO'SIS, from *νεκρωω*, 'I kill.' *Mortification*, (q. v.) *State of a bone or of a portion of a bone deprived of life*. *Necrosis* may take place without the surrounding soft parts being struck with gangrene. It is to the bones what gangrene is to the soft parts. The part of the bone affected with necrosis becomes a foreign body, similar to the gangrenous eschar, and its separation must be accomplished by the efforts of nature or by art. When necrosis occurs in the centre of long bones, it never extends to their articular extremities. The exterior layers of bone form a canal round the dead portion or *sequestrum*; between these swollen layers and the sequestrum, suppuration takes place; the matter presses against the bony canal; perfo-

rates it, and is discharged by apertures, which become fistulous.

In the treatment, the exit of the sequestrum must be facilitated by proper incisions, by the application of the trepan to the bone, &c.

NECROSIS DENTUM, Dental gangrene—n. Ustilaginea, Ergotism.

NECROTOMY, Dissection.

NECTAR, from νε, 'a particle of negation,' and κταω, 'to kill.' A pleasant liquor, feigned by the poets to have been the drink of the gods, and to have rendered immortal those who partook of it. A name given, by the ancients, to many drinks; and particularly to one made with wine, evaporated and sweetened with honey.

NECUSIA, see Wound.

NECYOMANTIA, Necromancy.

NEDYIA, Intestine.

NEDYS, νηδys. The belly; abdomen (q. v.); stomach (q. v.); womb.

NEEDLE. Sax. neðl, næðl. from Teut. neten, 'to sew.' *Acus*, *Bel'onæ*, *Raphis*, *Raph'ion*, *Acestra*. (F.) *Aiguille*. A steel instrument, used in many professions. In *Surgery*, a steel, gold, silver, or platina instrument, that may be round, flat, or triangular, straight or curved, supported or not by a handle, but having *always* a point, by means of which it penetrates the textures; and *often* having, either near the point, or, more commonly, near the other extremity, an aperture for the reception of a thread or tape, which it introduces into the parts. The *Aiguille à appareils* of the French is the ordinary sewing needle, used in the making of bandages, &c.

ACUPUNCTURE NEEDLE, (F.) *Aiguille à Acupuncture*. An inflexible gold or silver needle: conical, very delicate, four inches long; furnished with a handle, and at times, with a canula shorter than it by about half an inch. An ordinary needle waxed at the head, will answer as a substitute for this. See *Acupuncture*.

CATARACT NEEDLE, *Acus Ophthalmica*, (F.) *Aiguille à cataracte*. Needles of gold, silver, and steel have been used; the latter, alone, at the present day. The cataract needle is employed to depress or tear the crystalline, when opaque. This needle is usually made from 15 to 24 lines long; and is attached to a fine handle. The extremity may be, as in Scarpa's and Langenbeck's, pointed, prismatic, triangular, and curved; in Dupuytren's and Walther's, flat, curved, and sharp-edged; in Hey's, flat, with a semicircular and sharp end; or, as in Beer's, Siebold's, Schmidt's, Himly's, Von Gräfe's, &c., straight and spear-pointed. A mark is generally placed upon the handle to inform the operator,—when the instrument is engaged in the eye,—what side corresponds to the crystalline.

NEEDLE FOR A COUNTER-OPENING, *Aiguille à Contre Overture*, (F.) *Aiguille engagée*, *Acus invagina'ta*, *Aiguille à gaine*,—is a long, narrow instrument of steel; the point of which is fine and sharp on both sides;—the heel (*talon*) having an aperture to receive a thread, tape, &c., provided with a flat, silver sheath, shorter than the blade, the point of which it covers when passing through parts that have to be respected.

DESCHAMP'S NEEDLE, *Aiguille de Deschamps*,—*Paupé's needle*, *Aiguille à Manche*, &c., is the

last described needle, fixed to a handle, the eye of which is placed near the point. It is employed in the ligature of deep-seated arteries.

FISTULA NEEDLE, *Aiguille à Fistule*. A long, flat, flexible, silver instrument; having an aperture near one extremity; blunt at the other. This was formerly used for passing a seton into fistulous ulcers. On one of its sides was a groove for guiding a bistouri in case of necessity.

Also, a long steel instrument, terminated by a point like that of a trocar, which Desault employed for penetrating the rectum, when operating for fistula that had no internal aperture.

HARE-LIP NEEDLE, (F.) *Aiguille à Bec de Lièvre*. A small, silver canula, to which is attached a spear point, that can be readily withdrawn. This needle, armed with the point, is introduced at one side of the fissure in the lip, and through the other. The twisted suture (q. v.) is then applied, and the pin withdrawn.

LIGATURE NEEDLE, *Aiguille à ligature*. A long, steel instrument, sharp towards one extremity, with an eye near the other, which was formerly used for suspending the circulation of blood, prior to amputation; by being passed through the limb, so as to include the principal artery and a part of the muscles and integuments.

Also, a steel instrument of various dimensions, round towards one of its extremities, which was straight, and furnished with an aperture; curved and flat towards the opposite, which was pointed, and had a slight ridge on its concave side. At the commencement of the last century, this instrument was used to pass ligatures around vessels.

Also, a steel instrument of various dimensions, flat, regularly curved in the form of a semicircle, with a sharp or lance point, and a long eye, used with advantage in place of the last.

SETON NEEDLE, (F.) *Aiguille à Seton*. A long, narrow, steel blade; pointed and sharp at one extremity; pierced at the other by an aperture. The *Aiguille à contre-ouverture* may be used for the same purpose.

SUTURE NEEDLE, (F.) *Aiguille à Suture*. For the twisted suture, the hare-lip needle is used; for the others, the straight or curved needle; the straight needle is preferable for stitching up the abdomen, &c., in dissection. In the suture of the tendons, a curved needle has been used; flat on both sides, and cutting only at the concave edge, in order that the instrument may pass between the tendinous fibres without dividing them.

NEEDLEBEARER, *Porte-aiguille*.

NEEDLECARRIER, *Porte-aiguille*.

NÉFLE, *Mespilus* (the fruit.)

NÉFLIER, *Mespilus*.

NEFREN'DES, *Nodoi*, νωδοι, (νν, privative, and οδον, 'a tooth.') Persons devoid of teeth. Young children, for instance, who have not cut them; or aged persons, who have lost them. This state is called *Nefrendis*, *Nodo'sia*, *Odon'tia eden'tula*.

NÈGRE BLANC, Albino.

NEGRO, *Ny'grita*. One of the Æthiopian race. See *Homö*.

NEGROMANTIA, Necromancy.

NELE'RA, *Imus Venter*. The lower part of the belly.—Hippocr.

NEIGE, Snow.

NENUPHAR, *Nymphæa alba*—*n. Blanc*, *Nymphæa alba*—*n. Jaune*, *Nymphæa lutea*.

NEOG'ALA, from *neos*, 'new,' and *γαλα*, 'milk.' Milk secreted immediately after the colostrum. Also, the colostrum. (q. v.)

NEOPLASTY, NEOPLAS'TICĒ: from *neos*, 'new,' and *πλασσω*, *πλαττω*, 'I form.' A process or operation for the formation of new parts. It includes autoplasty, cicatrization of wounds, the formation of adhesions.—Burdach.

NEP, Nepeta.

NEPENTHA DESTILLATORIA, *Banisteria*. A Ceylonese plant, the root of which is astringent.

NEPENTHES, from *νη*, negative particle, and *πενθος*, 'grief.' A remedy, much extolled by the ancients against sadness and melancholy.

The women of Thebes, according to Diodorus Siceliotus, alone possessed the secret of its composition; and, according to Homer, Helen introduced it from Egypt. Some suppose it to have been opium.

NEPENTHES, Banguē—*n. Opiatum*, *Pilulæ opiatæ*.

NEP'ETA, *N. Cat'aria*, *Herba felis*, *Nep* or *Catmint*, (F.) *Herbe aux Chats*, so called, because cats are fond of it. The leaves, *Cat'aria* (Ph. U. S.), have a smell and taste like those of an admixture of spearmint and pennyroyal. It has been recommended in uterine disorders, dyspepsia, flatulency, &c. like pennyroyal; and is much used in domestic medicine, on the American continent, in flatulencies, &c. of children.

NEPETA AGRESTIS, *Melissa nepeta*.

NEPHALIOTES, Temperance.

NEPHELE, Enæorema, Nebula.

NEPHELION, Nebula.

NEPH'ELOID, *Nepheloides*, *Neb'ulous*, *Nubilo'sus*. An epithet applied to urine, when it is cloudy.

NEPHOS, Nebula.

NEPHRAL'GIA, *Dolor Nephret'icus*, *Neuralgia Renum*, (F.) *Néuralgie des Reins*, *Dysnéphronerie*, from *νεφρος*, 'a kidney,' and *αλγος*, 'pain.' Pain and neuralgia in the kidney.

NEPHRALGIA CALCULOSA, see Gravel—*n. Rheumatica*, *Lumbago*.

NEPHRELMIN'TIC, *Nephrelmin'ticus*, from *νεφρος*, 'a kidney,' and *ελμινς*, 'a worm.' That which is owing to the presence of worms in the kidney.

NEPHREMPHRAX'IS, from *νεφρος*, 'a kidney,' and *εμφρασσω*, 'I obstruct.' A name given by Plouquet, to obstruction of the kidneys.

NEPHRET'IC or NEPHRIT'IC, *Nephrit'icus*, from *νεφρος*, 'a kidney.' That which relates to the kidney. Applied, especially, to pain, &c. seated in the kidney.

LAPIS NEPHRET'ICUS, (F.) *Pierre néphrétique*, *Jade néphrite ou orientale*. A green, fatty kind of stone,—once used as an amulet against epilepsy.

In *Materia Medica*, *Nephret'icum* means a medicine employed in the cure of diseases of the kidney.

NEPHRIDION, *Pingue'do ren'al'is*. The fat which surrounds the kidneys.—Hippocr.

NEPHRITIC, Nephretic.

NEPHRITIS, *Empres'na Nephritis*, from

νεφρος, 'kidney,' and *itis*, denoting inflammation. *Renum inflammatio*, *Inflammation of the Kidney*, (F.) *Inflammation des Reins*,—characterized by acute pain; burning heat, and a sensation of weight in the region of one or both kidneys; suppression or diminution of urine; fever; dysuria; ischuria; constipation, more or less obstinate; retraction of the testicle, and numbness of the thigh of the same side. It may be distinguished into *simple* and *calculous nephritis*. In the latter, the urine often contains small particles of uric acid or of urate of ammonia. The most common causes of nephritis are,—excess in irritating and alcoholic drinks; abuse of diuretics; blows or falls on the region of the kidneys: the presence of renal calculi, &c. It may be distinguished from lumbago, by the pain which attends the latter on the slightest motion, &c. It usually terminates by resolution in from one week, to two or three. It may, however, end in suppuration—*pyonéphrite*; or may become chronic—*chrononéphrite*, (*Piorry*.) In the treatment, antiphlogistics, as V. S., baths, &c., are required to the full extent; with the use of diluents, opiates, &c.

NEPHRITIS ALBUMINENSIS, *Kidney*, *Bright's disease of the*—*n. Albuminosa*, *Kidney*, *Bright's disease of the*.

NEPHRODIDIUM FILIX MAS, *Polypodium filix mas*.

NEPHROGRAPHY, from *νεφρος*, 'a kidney,' and *γραφη*, 'a description.' An anatomical description of the kidney.

NEPHROHÆ'MIA, from *νεφρος*, 'kidney,' and *αἷμα*, 'blood.' Hyperæmia or congestion of the kidney.

NEPHROLITH'ASIS, from *νεφρος*, 'a kidney,' and *λίθος*, 'a stone.' The disease of calculus in the kidney. *Lith'ia ren'al'is*, *Lith'iasis nephritica*, *L. ren'al'is*. See Gravel.

NEPHROLITH'IC, same etymon. Belonging to calculi in the kidneys. This epithet has been applied to ischuria, occasioned by calculi formed in the kidneys.

NEPHROLOGY, *Nephrolog'ia*, from *νεφρος*, 'kidney,' and *λογος*, 'a treatise.' A treatise on the kidneys. Dissertation on the kidneys and their functions.

NEPHROMETRÆ, Psom.

NEPHRON'CYTE, from *νεφρος*, 'kidney,' and *ογκος*, 'a tumour.' A tumefaction of the kidney.

NEPHRO-PHLEGMA'TIC, *Nephro-phlegmat'icus*, from *νεφρος*, 'kidney,' and *φλεγμα*, 'phlegm.' A name given, by some authors, to ischuria produced by mucus contained in the urine.

NEPHRO-PLETHOR'IC, *Nephro-plethor'icus*, from *νεφρος*, 'a kidney,' and *πληθωρα*, 'plethora.' Belonging to plethora of the kidneys. An epithet given to ischuria dependent upon this cause.

NEPHRO-PY'IC, *Nephro-py'icus*, from *νεφρος*, 'a kidney,' and *πυρ*, 'pus.' Belonging to suppuration of the kidney.

NEPHROS, *Kidney*.

NEPHRO-SPASTIC, *Nephrospas'ticus*, from *νεφρος*, 'a kidney,' and *σπασω*, 'I draw.' That which depends upon spasm of the kidney. An epithet given to a variety of ischuria.

NEPHRO-THROM'BOLD, *Nephro-thrombol'des*, from *νεφρος*, 'a kidney,' and *θρομβος*, 'a

clot.' That which depends upon clots of blood, contained in the kidneys or their ducts. An epithet for a species of ischuria.

NEPHROTOMY, *Nephro-lithot'omy*, *Nephrothot'ia*, *Nephro-lithotom'ia*, *Sectio renalis*, *S. renis*, from *rennos*, 'a kidney,' and *τεμνειν*, 'to cut.' Dissection of the kidneys. Also, an operation proposed with the view of extracting calculi, formed in the kidney, by means of an incision into the tissue of that organ.

NEPION, Infans.

NEPIOTES, Infancy.

NEPTA, Asphaltum.

NERANTIA. See *Citrus aurantium*.

NERF, Nerve—*n. Circumflexe*, Axillary nerve—*n. Dentaire*, Dental nerve—*n. Fessier*, Gluteal nerve—*n. Glosso-pharyngien*, Pharyngoglossal nerve—*n. Gustatif innominé*, Trigemini—*n. NERFS BRONCHIQUES, Bronchial nerves—*n. Ciliaires*, Ciliary nerves—*n. Moteurs oculaires communs*, Motores oculorum—*n. Sacrés*, Sacral nerves—*n. Sous-costales*, Intercostal nerves.

NERIUM, *N. Oleander*.

NERIUM ANTIDYSENTERICUM. The tree which affords the *Codagapala Bark*, *Cones'si cortex*, *Cortex proslutrit*. Family, Apocynæ. *Sez. Syst.* Pentandria Monogynia. (F.) *Codagapale* and *Cropale*. The bark of this Malabar tree is of a black colour, externally, and is generally covered with a white moss or scurf. It has an austere, bitter taste, and has been recommended as an astringent, in diarrhœa, dysentery, &c.

NERIUM OLEANDER, *Nerium*, *Rhododaphnis*, *Roségo*. (F.) *Laurier rose*. The leaves are reputed to be narcotic. The infusion is em-

ployed internally, in herpetic affections, and the powder, incorporated with lard, is used in the itch.

NERONIA'NA (PHLEBOTOM'IA.) An epithet, given, for some cause, to phlebotomy, when more than one vein was opened on the same day.

NERPRUN PURGATIF, Rhamnus.

NERVE, *Nervus*, *Neuron*, *νευρον*, 'a string,' (F.) *Nerf*. This word originally meant the tendons and ligaments; and hence the different acceptations of 'nervous';—a man of nerve—a strong, *nervous* man; and a weak, *nervous* woman. The nerves are cords of the same substance as composes the encephalon and spinal marrow. They extend from one or other of the nervous centres to every part of the body, communicating, frequently, with each other; forming *plexuses*, and, occasionally, *ganglions*; and being, at length, lost in the parenchyma of organs. There are 42 pairs, and, according to their origin, they are termed *Cranial* or *Encephalic*, and *Spinal*. Each nerve is composed of several filaments or cords placed alongside each other, and is surrounded by a *Neurilemma*, (q. v.) The encephalic nerves, except the 5th pair, have only one root in the brain, whilst the spinal arise from the marrow by two roots: the one from an anterior fasciculus of filaments, the other from a posterior, separated from each other by the *Ligamentum denticulatum*; uniting outside this ligament, and presenting, near the intervertebral foramen, a ganglion formed only by the posterior root. The two roots make, afterwards, but one nerve; and, like the encephalic nerves, proceed to their destination, subdividing into rami and ramusculi, until they are finally lost in the texture of the organs. The trunks first formed are commonly round, and proceed alone, or accompany the great vessels, being placed in the cellular spaces which separate the organs, and are thus protected from injury. Their manner of termination we are not acquainted with; whether the nervous pulp, for instance, be distributed or lost in a membrane,—as seems to be the case with the nerves of sight, hearing, and smell,—or form papille. Certain it is, that there is considerable difference in the organs, as respects the quantity of nerves that terminate in them; and the particular arrangement of the nervous extremities. Some organs have numerous nerves; others seem to have none: a circumstance which influences considerably the sensibility of parts.

The *Encephalic Nerves* arise from the encephalon, or are inserted into it; (according as we consider the brain the origin or termination of the nerves;) and make their exit by foramina at the base of the skull. They are 12 in number. The spinal nerves are 30 in number, 8 cervical, 12 dorsal, 5 lumbar, and 5 or 6 sacral: the four inferior cervical being much larger than the superior, because they furnish the nerves of the upper extremities.

SYNOPTICAL TABLE OF THE NERVES.

I. *Cranial or Encephalic Nerves.*

1. <i>Olfactory.</i> (1st Pair.)	Divided into internal, external, and middle branches, which are distributed on the Schneiderian membrane.	6. <i>Abducentes.</i> (6th Pair.)	To the rectus externus oculi.
2. <i>Optic.</i> (2d Pair.)	Terminates in the retina.		
3. <i>Motores Oculorum.</i> (3d Pair.)	<i>Superior Branch.</i> To the rectus superior oculi and levator palpebræ superioris. <i>Inferior Branch.</i> To the rectus internus, rectus inferior and lesser oblique muscles; a filament which goes to the ophthalmic ganglion.	7. <i>Facial.</i> (Portio dura of the 7th pair.)	1. At its exit from the cranium, the posterior auricular, stylohyoid, and infra-mastoid, to the pavilion of the ear, the mastoid process, the digastricus, and the muscles attached to the styloid process. 2. Near the parotid gland, the temporal, malar, buccal, supra-mazillary, and infra-mazillary to the whole superficies of the face.
4. <i>Pathetici.</i> (4th Pair.)	To the greater oblique muscle of the eye. <i>Ophthalmic Branch.</i> Divided into three branches. 1. The lachrymal branch, to the lachrymal gland and upper eyelid. 2. Frontal branch, to the forehead and upper eyelid. 3. Nasal branch, to the eyelids, nasal fossæ, and nose. <i>Superior Mazillary Branch.</i> 1. The orbital branch, to the orbit. 2. The posterior and superior dental, to the last three molar teeth and gums. 3. The anterior dental, to the incisor, canine, and two lesser molares. 4. <i>Infra-orbital</i> , to the upper lip, cheek, and nose. <i>Inferior Mazillary Branch.</i> 1. Temporal (profund) branches, to the temporal muscle. 2. Masseterine branch, to the masseter muscle. 3. Buccal, to the inner surface of the cheek. 4. Pterygoid, to the internal pterygoid muscle. 5. Lingual, to the mucous membrane of the tongue. 6. Inferior dental, to the teeth of the lower jaw, and to the lower lip. 7. Auricular branch, to the pavilion of the ear and forehead.	8. <i>Auditory.</i> (Portio mollis of the 7th Pair.) 9. <i>Glosso-pharyngeal.</i> (Portion of the 8th pr.)	To the vestibule, semi-circular canals, and cochlea. To the base of the tongue and pharynx.
5. <i>Par Trigeminum.</i> (5th Pair.)		10. <i>Par Vagus.</i> (8th Pair.)	1. <i>IN THE NECK</i> ,—a pharyngeal branch to the pharynx; superior laryngeal branch to the larynx, and to some muscles of the inferior hyoid region. Cardiac branches to the cardiac plexus. 2. <i>IN THE CHEST</i> ,—the inferior laryngeal branch to the larynx; pulmonary branches, which form the plexus of the same name; œsophageal branches to the œsophagus. 3. <i>IN THE ABDOMEN</i> ,—gastric branches to the parietes of the stomach; filaments which go to the neighbouring plexuses.
		11. <i>Spinal or Accessory</i> of Willis.	At its exit from the cranium—the accessory of the pneumogastric nerve anastomosing with this nerve. In the neck—filaments to the trapezius muscles.
		12. <i>Hypoglossal.</i> (9th Pair.)	<i>Cervicales descendens</i> , to the muscles of the inferior hyoid region, and to the cervical nerves. Filaments to the muscles of the tongue.

II. *Spinal or Vertebral Nerves.*1. *Cervical Nerves.*

1st Cervical Pair.	<i>Anterior Branch.</i> Anastomosing par arcade with the second pair.	5th, 6th, and 7th Cervical Pairs.	<i>Anterior Branches.</i> Assisting in the formation of the brachial plexus.
2d Cervical Pair.	<i>Anterior Branch.</i> A branch anastomosing with the first pair: a branch which goes to the cervical plexus.		<i>Posterior Branches.</i> To the muscles and integuments of the posterior part of the neck and upper part of the back.
3d and 4th Cervical Pairs.	<i>Anterior Branch.</i> Concurring in the cervical plexus.		1. <i>Thoracic Branches</i> , (2.) to the anterior and lateral parts of the chest. 2. <i>Supra-scapular</i> branch to the muscles of the posterior scapular region. 3. <i>Infra-scapular</i> branches (3.) to the subscapularis, teres major, teres minor, and latissimus dorsi. 4. The <i>brachial internal cutaneous</i> , to the integuments of the palmar and dorsal surfaces of the forearm, near the ulnar margin. 5. The <i>brachial external cutaneous</i> , principally to the integuments of the palmar and dorsal surfaces of the forearm, near the radial margin. 6. The <i>median nerve</i> , to the forearm, hand, and palmar surface of all the fingers. 7. The <i>cubital nerve</i> , to the last two fingers. 8. The <i>radial</i> , to the first three. 9. The <i>axillary</i> , around the shoulder-joint, and to the neighbouring muscles.
The Posterior Branch of these four pairs ramifies on the occiput and muscles of the superficial and deep-seated cervico-occipital regions.			
Cervical Plexus.	DESCENDING BRANCHES. —1. <i>Internal descending</i> , anastomosing with a branch of the hypoglossus. 2. <i>Phrenic branch</i> , to the diaphragm. 3. <i>External descending branches</i> , dividing into supra-clavicular, supra-acromial, infra-clavicular, and cervicales profundæ, to the muscles and integuments of the upper part of the chest and shoulder, to the trapezius, levator scapulæ, rhomboidens, &c. ASCENDING BRANCHES. —1. <i>Mastoid</i> , to the posterior and lateral part of the head, and the inner surface of the pavilion of the ear. 2. <i>Auricular</i> , to the parotid gland and pavilion of the ear. <i>Superficial Cervical Branches.</i> (2.) To the platysma myoides, digastricus, the integuments of the neck, &c.	Brachial Plexus.	
			2. <i>Dorsal Nerves, (Nervi costales.)</i>
		1st Dorsal Pair.	<i>Anterior Branch.</i> To the brachial plexus.
		2d and 3d Dorsal Pairs.	<i>Anterior Branches.</i> An intercostal and brachial branch.

1th, 5th, 6th, and 7th <i>Dorsal Pairs.</i>	<i>Anterior Branches.</i> Internal branches, to the intercostals, triangularis sterni, pectoralis major, and to the skin. <i>External</i> branches to the integuments of the chest, the obliquus externus abdominis, and the skin of the abdomen.		
8th, 9th, 10th, and 11th <i>Dorsal Pairs.</i>	<i>Anterior Branches.</i> Internal branches, to the transversalis, obliquus internus, and rectus muscles, and to the skin of the abdomen. <i>External</i> branches, to the integuments of the chest, and to the muscles and skin of the abdomen.	<i>Lumbar Plexus.</i>	groin, and the thigh. 3. The <i>crural</i> nerve, to the integuments and muscles of the thigh, skin of the leg, and foot. 4. The <i>obturator</i> nerve, to the muscles at the inner part of the thigh. 5. The <i>lumbo-sacral</i> , to the sciatic plexus. It gives off the <i>gluteal</i> nerve to the glutei muscles.
12th <i>Dorsal Pair.</i>	<i>Anterior Branch.</i> To the first lumbar nerve and to the muscles and skin of the abdomen as far as the iliac crest.		<i>Sacral Nerves.</i>
The <i>Posterior Branches</i> of the dorsal nerves are distributed to the muscles and integuments of the back and loins.		1st, 2d, 3d, and 4th <i>Sacral Pairs.</i>	<i>Anterior Branches.</i> They form by their union the sciatic plexus.
3. Lumbar Nerves.		5th and 6th <i>Pairs.</i>	<i>Anterior Branches.</i> To the parts in the vicinity of the coccyx.
1st, 2d, 3d, and 4th <i>Lumbar Pairs.</i>		The <i>Posterior</i> branches ramify on the muscles and integuments of the nates.	
5th <i>Pair.</i>	<i>Anterior Branch.</i> Aiding in forming the sciatic plexus.	1. <i>Hæmorrhoidal</i> nerves, to the rectum. 2. <i>Vesical</i> , to the bladder. 3. <i>Uterine</i> and <i>vaginal</i> , to the vagina and uterus. 4. <i>Inferior gluteal</i> , to the gluteal muscles, perineum, and integuments of the posterior part of the thigh. 5. <i>Pubic</i> , to the perineum, penis, or vulva. 6. <i>Sciatic</i> , divided into the <i>external popliteal</i> , which ramifies on the integuments and muscles of the external side of the leg, on the dorsum of the foot, and the dorsal surface of the toes; and into the <i>internal popliteal</i> , distributed on the dorsal surface of the two last toes, to the muscles of the foot, and on the plantar surface of all the toes.	
The <i>Posterior Branches</i> of the lumbar nerves are distributed to the loins, sacrum, and nates.		<i>Sciatic Plexus.</i>	
<i>Lumbar Plexus.</i>	1. <i>Musculo-cutaneous</i> Branches, to the number of three. One <i>superior</i> to the muscles of the abdomen, to the fold of the groin, and the scrotum: a <i>middle</i> , to the integuments and muscles of the abdomen; and an <i>inferior</i> , to the skin of the thigh. 2. A <i>genito-crural</i> branch to the integuments of the scrotum, the		

Classifications of the nerves have been recommended according to their uses, in preference to the ordinary anatomical arrangement. It has been remarked, that the encephalic nerves have but one root; while the spinal have two. Now, experiments and pathological facts have proved, that the anterior fasciculus of the narrow and the anterior roots of the spinal nerves are inservient to volition or voluntary motion: and that the posterior fasciculus and roots are destined for sensibility. Hence the spinal nerves, which have two roots, must be the conductors both of motion and feeling; whilst the encephalic, which, with the exception of the fifth pair, have but one, can possess but one of these properties:—they must be either *sensitive* or *motive*, according as they arise from the posterior or anterior fasciculus of the medulla: and, consequently, three classes of nerves may be distinguished.

1. *Sensitive.* ... { Arising, by a single root, from the posterior fasciculus of the medulla oblongata or spinal marrow.
2. *Motive.* { Arising, by a single root, from the anterior fasciculus of the same parts.
3. *Sensitive and Motive.* { Which have two roots; one from the anterior, and one from the posterior fasciculus.

According to Sir Charles Bell, the medulla oblongata is composed of three fasciculi on each side; an *anterior*, *middle*, and *posterior*. Now, whilst the anterior and posterior fasciculi produce the nerves of motion and sensation respectively; the middle, according to Sir Charles,

gives rise to a third set of nerves—the *respiratory*. To this order belong:—

1. The accessory nerve of Willis, or *superior respiratory*.
2. The par vagum.
3. The glosso-pharyngeal.
4. The facial, or *respiratory of the face*.
5. The phrenic.
6. A nerve which has the same origin as the phrenic;—the *external respiratory*.

When a horse has been hard ridden, every one of these nerves is in action.

Sir C. Bell, again, has reduced the system of nerves to two great classes. 1. Those that are *regular, primitive, symmetrical*, and common to all animals, from the worm to man; which have double roots, and preside over sensibility and motion; and, 2. The *irregular or super-added*, which are added to the preceding, in proportion as the organization of animals offers new or more complicated organs. To the first class belong all the spinal nerves and one encephalic—the 5th pair;—to the second, the rest of the nervous system.

Lepelletier thinks we are justified in dividing the nerves into five classes;—the *first* comprising the *nerves of special sensibility*—the olfactory, optic, lingual branch of the fifth pair, and the auditory;—the *second*, the *nerves of general sensibility*, the fifth pair; and the spinal nerves, through their posterior root;—the *third* comprising the *voluntary motors*, the spinal nerves, by their anterior roots, the motores oculorum, or common oculo-muscular, the *external* oculo-muscular, and the hypo-glossal:—the *fourth*, *instinctive motors*, involuntary, respiratory nerves of Sir Charles Bell, the pathetic,

facial, glosso-pharyngeal, pneumogastric, and spinal accessory; and the *fifth, nerves of vital association and nutrition*—the filaments and plexuses of the ganglionic system.

Dr. Fletcher adopts a different arrangement. He divides them into *ganglionic* and *cerebro-*

spinal; the latter being subdivided into the respiratory, motiferous, sensiferous, and regular: the last including those which communicate both the faculty of sensibility and the stimulus of volition. His arrangement is contained in the following table.

GANGLIONIC.	CEREBRO-SPINAL.			
	Respiratory.	Motiferous.	Sensiferous.	Regular.
Those immediately connected respectively with				
The Ophthalmic,	The Pathetic,	The Motor oculi	The Olfactory.	The Sub-occipital.
The Cavernous,	The Facial,	A part of the lower	The Optic.	The seven Cervical.
The Otic,	The Glosso-pharyngeal,	maxillary branch of the Trigemini-	The Ophthalmic branch of the Trigemini-	The twelve Dorsal.
The Spheno-palatine,	The Pneumo-gastric,	nus	The upper Maxillary branch of the Trigemini-	The five Lumbar.
The Sub-maxillary,	The Accessory,	The Abductor.	A part of the lower Maxillary branch of the Trigemini-	The five Sacral.
The three Cervical,	The Phrenic, and	The Hypo-glossal.	The Auditory.	
The Cardiac,	The external Respiratory.			
The twelve Dorsal,				
The Celiac,				
The five Lumbar,				
The five Sacral, and				
The Coccygeal Ganglions.				

Dr. Marshall Hall has proposed another division of the nervous system, which is calculated to explain many of the anomalous circumstances we so frequently witness. He proposes to divide all the nerves into, 1. The cerebral or the sentient and voluntary. 2. The true spinal or excitomotor. 3. The ganglionic or the nutrient and secretory. If the sentient and voluntary functions be destroyed by a blow upon the head, the sphincter muscles will still contract when irritated, because the irritation is conveyed to the spine, and the reflex action takes place to the muscle so as to throw it into contraction. But if the spinal marrow be now destroyed, the sphincters remain entirely motionless, because the centre of the system is destroyed. Dr. Hall thinks, that a peculiar set of nerves constitutes, with the true spinal marrow as their axis, the second subdivision of the nervous system; and as those of the first subdivision are distinguished into sentient and voluntary, these may be distinguished into the *excitor* and *motory*. The *first*, or the excitator nerves, pursue their course principally from internal surfaces, characterized by peculiar excitabilities, to the true medulla oblongata and m. spinalis, the *second*, or the motor nerves, pursue a reflex course from the medulla to the muscles, having peculiar actions, concerned principally in ingestion and egestion. The motions connected with the first or cerebral subdivision are sometimes, indeed frequently, *spontaneous*; those connected with the true spinal are, he believes, *always excited*. Dr. Hall thinks, too, that there is good reason for viewing the fifth, and posterior spinal nerves as constituting an external ganglionic system, for the nutrition of the external organs; and he proposes to divide the *ganglionic* subdivision of the nervous system, into 1. The *internal* ganglionic, which includes that usually denominated the sympathetic, and probably filaments of the pneumogastric; and 2. The *external* ganglionic, embracing the fifth and posterior spinal nerves. To the *cerebral* system he assigns all diseases of sensation, perception, judgment, and volition—therefore all painful, mental, and comatose, and some paralytic, diseases. To the true *spinal* or *excitomotor* system, belong all spasmodic and certain paralytic diseases. He properly adds, that these two parts of the nervous system influence

each other both in health and disease, as they both influence the ganglionic system.

The main views of Dr. Hall on the excitomotor function have been embraced by Müller, Grainger, Carpenter, and others.

The nerves are covered and united to the neighbouring parts by an abundant layer of fatty cellular texture, which sends, inwards, prolongations that separate the nervous cords and filaments from each other. The arterial trunks, which furnish them, transmit branches into their interior. The veins follow the same course as the arteries. Absorbents are not easily traced even in the greatest trunks.

NESTIATRIA, *Nestitherapi'a*, from *νησις*, 'a faster,' and *θεραπεια*, 'treatment.' Treatment of a disease by causing the patient to fast.

NESTITHERAPEIA, Nestiatria.

NETTLE, ARCHANGEL, WHITE, *Lamium album*—n. Dead, *Lamium album*—n. Hedge, Galeopsis—n. Pill-bearing, *Urtica pilulifera*—n. Rash, *Urticaria*—n. Stinging, common, *Urtica*.

NEURAL'GIA, from *νευρον*, 'a nerve,' and *αλγος*, 'pain.' *Rheumatism's spur'ius nerv'us*, *Neurodyn'ia*. (F.) *Néuralgie*, *Nervous pain*. A generic name for a certain number of diseases; the chief symptom of which is a very acute pain, exacerbating or intermitting, which follows the course of a nervous branch; extends to its ramifications, and seems, therefore, to be seated in the nerve. The principal neuralgiæ have been distinguished by the names *facial* (of which the *infra-orbital*, *maxillary* and *fron-*

tal are but divisions)—the *ilio-scrotal*, *femoro-popliteal*, *femoro-pretibial*, *plantar*, and *cubito-digital*. A division of *anomalous neuralgiæ* has likewise been admitted.

ANOMALOUS NEURAL'GIÆ. Under this name Chaussier has included different neuroses, some of which are characterized by acute pains circumscribed within a short compass, or extending by irradiations, but not having their seat in the course of a nerve; and others which are occasioned by tumours in the course of a nerve, or which succeed contusions or incomplete division of nerves.

NEURALGIA CU'BITO-DIGITA'LIS, *Is'chias nervo'sa digita'lis*. In this variety, the pain extends from the part where the nerve passes under the inner condyle to the back of the hand and to its cubital edge.

FACIAL NEURALGIA, *Neuralgia faciei*, *Trismus maxilla'ris*, *T. Dolorif'icus*, *Opsiop'gia*, *Dolor cru'cians faciei*, *Hemicra'nia idiopath'ica*, *Aural'gia doloro'sa*, *Tic douloureux*, *Dolor faciei*, *Dolor faciei typico caracte're*, *D. F. Fothergilli*, *Trismus clon'icus*, *Rheumatism's cancro'sus*, *Rheumatism's larcu'tus*, *Prosopop'gia*, *Dolor faciei period'ica*, *Febris top'ica*, *Ophthalmodyn'ia period'ica*, is characterized by acute, lancinating pains, returning at intervals; and by twinges in certain parts of the face, producing convulsive twitches in the corresponding muscles. It may be seated in the frontal nerve, infra-orbital, or in the maxillary branch of the 5th pair.

Metopodyn'ia, *Brow-ague*, *Neural'gia fronta'lis*, *Ophthalmodyn'ia*, *Tic douloureux*, *Dolor period'icus*, &c., commences at the superciliary foramen and extends along the ramifications of the frontal nerve that are distributed on the forehead, upper eyelid, caruncula lacrymalis, and nasal angle of the eyelids. Sometimes it is felt particularly in the orbit.

Neuralgia infra-orbita'ria, *Dolor faciei atrox*, *Rheumatism's cancro'sus*, *Trismus clon'icus*, *Prosopop'gia*, *Febris top'ica*, *Odontal'gia remittens et intermit'tens*, *Hemicra'nia s'cra*, *Infra-orbital neuralgia*, *Tic douloureux*, is chiefly felt in the infra-orbital foramen, whence it passes to the cheek, upper lip, ala nasi, lower eyelid, &c.

In *Neuralgia maxilla'ris*, *Tic douloureux*, *Trismus catarrha'lis maxillaris*, the pain usually sets out from the mental foramen and passes to the chin, lips, temple, teeth, and tongue.

ILIO-SCROTAL NEURALGIA has been rarely observed. It is characterized by a very acute pain in the course of the branches of the first lumbar pair; this pain follows the crista ilii and accompanies the spermatic vessels to the testicle, which is often painfully retracted.

NEURALGIA FEMORO-POPLITE'A, *Sciatic'en*, *Schias*, *Mahun ischiad'icum*, *Morbus ischiad'icus*, *Passio ischiad'ica*, *Ischiagra*, *Ischial'gia*, *Ischiol'sis*, *Coxal'gia*, *Neural'gia Ischiad'ica*, *Dolor Ischiad'icus nervo'sus*, *Ischias nervo'sa Cotunnii* vel *Cotunnii*, *Neurisch'ias*, *Ischias nervo'sa post'ica*, *Ischias*, *Cox'agra*, *Ischias rheumat'icum*, *Ischial'ica*, *Goutte sciaticque*. This is characterized by pain, following the great sciatic nerve from the ischiatic notch to the ham, and along the peroneal surface of the leg to the sole of the foot.

NEURALGIA FEMORO-PRETIBIA'LIS, *Ischias nervo'sa ant'ica*. In this, the pain, setting out

from the groin, spreads along the fore part of the thigh, and passes down, chiefly, on the inner side of the leg, to the inner ankle and back of the foot.

NEURALGIA PLANTARIS. This is rare; and the pain is confined to the course of the plantar nerves.

All varieties of neuralgia are obstinate, and the greatest diversity of means has been made use of:—bleeding, general and local,—emetics, purgatives, rubefacients, vesicants, actual cautery, narcotics, mercurial frictions; electricity; destruction of a portion of the nerve, &c. The most successful remedy, perhaps, is the *Carbonate of iron*, given in doses of some magnitude; as, for instance, ʒss or ʒij, twice or thrice a day in molasses. This plan of treatment, continued for a month or two, will generally relieve and ultimately remove this much dreaded affection. The mode in which it acts is by no means clear; but it is almost as certain as any other remedy used in disease in producing its salutary effects. The bowels must be kept free; and all inflammatory symptoms be removed during its administration.

The term **FALSE NEURALGIA** has been assigned to pains along a nerve, or its ramifications, produced by some body compressing it: those pains terminating with the removal of the compressing cause.

NEURALGIA DENTALE, Odontalgia nervosa—*n.* of the Heart, Angina pectoris—*n.* Renum, Nephralgia.

NEURASTHENIA, *Neurosthen'ia*, *Debilitas nervosa*. Debility or impaired activity of the nerves; and *neur'ia*, 'a nerve,' and *ασθενεια*, 'debility.'—See Irritable.

NEURILEMMA, *Neurilem'a*, *Neurilyma*, *Neur'ymen*, *Perineur'ion*, *Fistula sen Tu'bulus seu Cap'sula seu Intolu'crum nervo'rum*, *Membran'a seu Membran'ula seu Tu'nica seu Indumentum nervo'rum*, *Vagi'na nervo'rum*; (F.) *Néurilème*; from *νευρον*, 'a nerve,' and *λεμμα*, 'a coat.' The fine, transparent, and apparently fibrous membrane that surrounds the nerves—to every filament of which it forms a true canal.

NEURILEMMITIS. Same etymon. Inflammation of the neurilemma.

NEURILYMA, *Neurilemma*.

NEURINE. The substance of which the nervous system is composed. It consists chiefly of albumen and a peculiar fatty matter.

NEURISCHIAS, Neuralgia femoro-poplitea.

NEURITIC, Nervine.

NEURITIS, *Inflammatio nervo'rum*, (F.) *Inflammation des Nerfs*, *Nérite*, from *νευρον*, 'a nerve,' and *itis*, a suffix denoting inflammation. Inflammation of a nerve.

NEUROBLACIA, from *νευρον*, 'a nerve,' and *βλακεια*, 'stupor.' Insensibility of the nerves.

NEUROCHONDRODES, from *νευρον*, 'a sinew,' *χονδρος*, 'a cartilage,' and *ειδος*, 'resemblance.' A hard substance between a sinew and a cartilage.

NEURODES, Nervous.

NEURODYNIA, Neuralgia.

NEUROGAMIA, Magnetism, animal.

NEUROGRAPHY, *Neurogra'phia*; from *νευρον*, 'a nerve,' and *γραφειν*, 'a description.' The part of anatomy which describes the nerves.

NEUROL'OGY, *Neurolog'ia*, (F.) *Névrologie*,

from *νευρον*, 'a nerve,' and *λογος*, 'a discourse.' That part of anatomy which treats of the nerves.

NEUROMA; from *νευρον*, 'a nerve.' A morbid enlargement of a nerve.

NEUROMETRES, Psoæ.

NEURON, Nerve.

NEURONOSOS, *Neuronu'sos*, from *νευρον*, 'a nerve,' and *νοσος*, 'a disease.' A disease of the nerves.

NEUROPATH'IC, *Neuropath'icus*, from *νευρον*, 'a nerve,' and *παθος*, 'a disease.' Belonging to disease of the nerves, to *Neuropath'ia* or *Neuron'osus*.

NEUROPYRA, Typhus mitior.

NEUROSES, from *νευρον*, 'a nerve.' A generic name for diseases supposed to have their seat in the nervous system, and which are indicated by disordered sensation, volition, or mental manifestation; without any evident lesion in the structure of the parts, and without any material agent producing them. Such is the usual definition. Broussais attributes them to a state of irritation of the brain and spinal marrow.

NEUROSTHENIA, Neurasthenia, see Irritable.

NEUROTHELIC APPARATUS, Corpus papillare.

NEUROTIC, Nervine.

NEUROTICA. Diseases of the nervous function. The 4th class of Good's Nosology.

NEUROTOME, *Neurot'omos*; from *νευρον*, 'a nerve,' and *τομειν*, 'I cut,' 'I dissect.' An instrument used, by anatomists, to dissect the nerves. It is a long and very narrow scalpel, having two edges.

NEUROTOMY, *Neurotom'ia*. Same etymon. Dissection of the nerves. Also, an incised wound of a nerve.

NEURYMEN, *Neurilemma*.

NEUTRAL, from *Neuter*, 'neither.' Belonging to neither in particular.

NEUTRAL SALTS, *Sec'ondary salts*, (F.) *Sels neutres*. A salt, composed of two primitive saline substances, combined together, and not possessing the characters of acid or of base.

NÉVIS, MINERAL WATERS OF. Thermal springs in the department of Allier, France. Temperature, 136° to 143° Fahrenheit.

NÉVRALGIE, Neuralgia—*n. du Foie*, Hepatalgia—*n. des Reins*, Nephralgia—*n. de l'Utérus*, Hysteralgia.

NÉVRILEME, *Neurilemma*.

NÉVRITE, Neuritis.

NÉVROLOGIE, Neurology.

NÉVROSE DU CŒUR, Angina pectoris.

NEVUS, Nevus.

NEW JERSEY, MINERAL WATERS OF.

In the upper part of Morris county and in the county of Hunterdon, near the top of Musconetcong mountain, there are chalybeate springs, which are resorted to. See Schooley's Mountain.

NEW YORK, MINERAL WATERS OF. The chief waters are those of Ballston and Saratoga, (q. v.)

NEZ, Nasus.

NICE, CLIMATE OF. The climate of Nice possesses some advantages over the neighbouring countries of Provence and Italy, being free from the sirocco of the latter, and protected from the mistral of the former. Spring is the most unfavourable season. The climate is very

dry. It has been a great winter retreat for the consumptive; but does not deserve the encomiums that have been passed upon it.

NICODEMI OLEUM, *Oil of Nicodemus*. An oil made by digesting, for some time,—in a mixture of white wine and olive oil,—old turpentine, litharge, aloes, saffron, oxyd of zinc, &c.

NICOTIANA, *N. tabacum*—*n. Minor*, *N. rustica*.

NICOTIANA RUS'TICA, called after Nicot, who carried it to Europe; *N. minor*, *Priapeia*, *Hyoscyamus luteus*, *English tobacco*. The leaves possess the properties of tobacco, but are milder.

NICOTIANA TAB'ACUM, *Nicotiana*, *Herba tabaci*, *Tabacum*, *Petum*, *Petun*, *Hyoscyamus Peruvianus*, *Tobacco*, *Virgin'ia tobacco*, (F.) *Tabac*, *Nicotiane*. Tobacco is a violent acro-narcotic; its properties seeming to depend upon a peculiar principle, *Nicotin* or *Nicotianin*. It is narcotic, sedative, diuretic, emetic, cathartic, and errhine. In incarcerated hernia, it is injected, in the form of smoke or infusion, but requires great caution. It is most extensively and habitually used as an errhine and sialogogue. The infusion is used to kill vermin, and in some cutaneous eruptions.

NICOTIANE, *Nicotiana tabacum*.

NICOTIANIN. See *Nicotiana tabacum*.

NICOTIN. See *Nicotiana tabacum*.

NICTA'TION, *Nicta'tio*, *Nictita'tio*, from *nictare*, 'to wink.' *Nystag'mus*, *Clonus nictita'tio*, *Twinkling of the eye*, (F.) *Clignotement*, *Clignement*, *Cillement*, *Souris*. A rapid and repeated movement of the eyelids, which open and shut alternately. As occasionally performed, it is physiological; if repeatedly, a disease. It seems to be executed chiefly by the 7th pair of nerves; but it is necessary that the 5th pair should likewise be in a state of integrity.

NIDAMENTUM, *Decidua*.

NIDOROUS, *Nidoro'sus*, from *Nidor*, *Cnissa*, 'the smell of any thing burnt,' &c. Having the smell of burnt or corrupt animal matter.

NIEDERBRONN, MINERAL WATERS OF. Saline waters in the department of Bas-Rhin, France, which contain chloride of sodium, sulphate of magnesia and carbonic acid.

NIELLE, *Nigella*.

NIGELLA, *Coptis*.

NIGELLA, *N. Sati'ra*, *Melan'thium*, *Fennel flower*, *Cuni'mum Nigrum*, *Devil in a bush*, (F.) *Nigelle*, *Nielle*. This was formerly used medicinally as an expectorant and deobstruent, errhine, sialogogue, &c.

NIGELLE, *Nigella*.

NIGHT-BLINDNESS, *Hemeralopia*.

NIGHT EYES, *Crusta genu equinæ*—*n. Mare*, *Incubus*.

NIGHTSHADE, AMERICAN, *Phytolacca decandra*—*n. Common*, *Solanum*—*n. Deadly*, *Atropa belladonna*—*n. Enchanter's*, *Circæa luteoliana*—*n. Garden*, *Solanum*—*n. Palestine*, *Solanum sanctum*—*n. Woody*, *Solanum dulcamara*.

NIGREDO À SOLE, *Ephelides*.

NIGRITA, *Negro*.

NIGRITIES OSSIUM, *Caries*.

NIGRITUDO, *Melanosis*—*n. Pulmonum*, *Melanosis pulmonum*.

NIGROMANTIA, *Necromancy*.

NIGROR, *Melasma*.

NIGRUM OCULI, *Pupil*.

NIHIL ALBUM, *Zinci oxydum*—*n. Griseum*, *Zinci oxydum*.

NIHIACUM, *Mel*.

NINDSIN, *Sium ninsi*.

NINSI, *Sium ninsi*.

NINSING, *Panax quinquefolium*.

NINZIN, *Sium ninsi*.

NIPPLE, *Sax. nypele*. The *Teat*. The *dug*, *Mammil'la*, *Mammella*, *Papilla*, *Thelæ*, *Tiththæ*, *Tiththos*, *Tiththion*, *Tiththis*, (F.) *Mamelon*. The conical tubercle, situate at the centre of the breast. Towards the central part of each breast the skin changes colour, and assumes a rosy tint in young females, or a reddish brown in those who have suckled several children. This circle is called the *Areola* or *Aureola* (q. v.) of the nipple. The nipple is capable of erection on being excited.

NIPPLEWORT, *Lapsana*.

NIRLES, *Herpes exedens*.

NISUS, *Nizus*, *Peira*, *Straining*, from *Lat. nitor*, 'to endeavour.' A voluntary retention of the breath; so as to force down the diaphragm; the abdominal muscles being at the same time contracted forcibly. In this manner the contents of the abdomen are compressed; and the evacuation of the fæces, urine, &c. is effected.

NISUS, *Effort*—*n. Formativus*, *Plastic force*.

NITEDULA, *Cicindela*.

NITON, MINERAL WATERS OF. These springs in the Isle of Wight, contain iron, and sulphate of alumina and potassa.

NITRAS KALICUM, *Potassæ nitras*—*n. Lixiviæ*, *Potassæ nitras*—*n. Natricum*, *Soda*, *nitrate of*—*n. Potassæ cum sulphure fusus*, *Potassæ nitras fusus sulphatis pauçillo mixtus*—*n. Sub-bismuthicum*, *Bismuth*, *sub-nitrate of*. **NITRATE**, *Nitras*. A salt, formed of a base and nitric acid. Several nitrates are employed in medicine.

NITRATE D'AMMONIAQUE, *Ammonie nitras*.

NITRE, *Potassæ nitras*.

NITRIC ACID, *Acidum nitricum*, *Aqua fortis*, *Nitrous acid*, *Spir'itus nitri duplex*, *Sp. nitri fumans*, *Sp. nitri Glaube'ri*, *Azot'ic acid*, *Dephlogisticated nitrous acid*, *Oxysepton'ic acid*, *Spir'itus nitri acidus*. Nitric acid is obtained from nitre—the *Nitrate of potass*. Its odour is suffocating; taste very acid and caustic. It is corrosive, liquid, colourless, and transparent. S. G. 1.500.

Strong nitric acid is rarely used except as an application to foul, indolent ulcers, or to warts. When given internally, it is in the form of the *Acidum Nitricum Dilu'tum*. *Spir'itus nitri simplex*, *Sp. nitri vulg'a'ris*—the *Diluted nitric acid*, which, in the Pharmacopœia of the United States, consists of *nitric acid*, ʒj, *water*, ʒix, by measure. Diluted largely with water, it is used, as a drink, in fevers of the typhoid kind, in chronic affections of the liver; syphilis, &c. but, in the latter affections, it is not to be depended upon.

NITROGEN, *Azote*.

NITROGEN, *GAZEOUS OXIDE OF*, *Nitrous oxide*, *Protoxide of azote*, *Paradise gas*, *Intoxicating gas*, *Laughing gas*, *Dephlogisticated nitrous gas*, *Gas azot'icum oxygentum*. This gas, when respired, produces singular effects: great mental and corporeal excitement; and, generally, so much exhilaration as to render

the appellation, "*laughing gas*," by no means inappropriate. It has not been much used in medicine, although recommended in paralysis. Its effects are too violent and too transient to render it a valuable remedial agent; and, in the delicate, it has been productive of unpleasant effects, inducing palpitation, fainting, and convulsions.

NITROGENIZED, *Azoted*, *Azotized*. Containing nitrogen or azote:—as a *nitrogenized azote*, or *azoted principle* or *tissue*.

NITRO-MURIATIC ACID, *Ac'idum nitro-muriat'icum*, *Nitro-hydrochlor'ic acid*, *Hydrochloro-nitric acid*, *Aqua regia*, *Aqua stygia*, *Chrysulea*, *Aqua regis*, *Acidum muriaticum nitro-so oxygenu'm*, *Menstruum auri*, (F.) *Eau régale*. A mixture of the nitric and muriatic acids has been used in diseases of the liver, in the form of a bath for the feet and legs, made sharply acidulous. It has, also, been employed, and with more uniform results, in cutaneous affections. Whatever advantage it may possess in internal diseases—and these advantages are doubtful—they are probably dependent upon the chlorine formed by the mixture, or upon the properties, possessed by the mineral acids in general. See Chlorine.

The *Acidum nitro-muriaticum* of the Pharmacopœia of the United States, is formed by mixing four fluid ounces of nitric acid with eight of muriatic acid.

NITROUS OXIDE, Nitrogen, gaseous oxide of.

NITRUM, Natron, Potassæ nitras—n. Antiquorum, Soda—n. Cubicum, Soda, nitrate of—n. Factitium, Borax—n. Flammans, Ammoniæ nitras—n. Lunare, Argenti nitras—n. Rhomboidale, Soda, nitrate of—n. Vitriolatum Schroederi, Potassæ sulphas—n. Tabulatum, Potassæ nitras fusus sulphatis paucillo mixtus—n. Vitriolatum, Potassæ sulphas.

NIX, Snow.

NIX FUMANS, Calx viva.

NIXUS, Nisus.

NOBLE, *Nob'ilis*, *Prin'cipal*, *Essen'tial*.

NOBLE PARTS, *Partes essen'tiales*:—Some anatomists have given this name to parts, without which life cannot exist; such as the heart, liver, lungs, brain, &c. The organs of generation have, likewise, been so called.

NOBLE PARTS, Genital organs.

NOCTAMBULATIO, Somnambulism.

NOCTILUCA, Cicindela.

NOCTISURGIUM, Somnambulism.

NOCTUINI OCULI. Gray or blue eyes.—Castelli.

NODE, *Nodus*, *Emphy'ma exosto'sis perios'tea*; (F.) *Nodosité*, *Nœud*; from Hebr. נֶדֶן, 'a heap.' A hard concretion or incrustation, which forms around joints attacked with rheumatism or gout. Some include, under this name, exostoses, articular calculi, ganglions, and even the chronic swellings of the joints, known under the name of white swellings.

NODDING, Annuitio.

NODI DIGITORUM MANUS, Phalanges of the fingers—n. Nervorum, Ganglions, nervous.

NODOI, Nefrendes.

NODOSIA. See Nefrendes.

NODOSITÉ, Node.

NODULI ARAN'TII, *Noduli Morgagnii*, *Cor'pora Aran'tii*. The small sesamoid bodies situate on the periphery of the semilunar valves

of the aorta and pulmonary artery, for the better occlusion of the artery.

NODULI MORGAGNII, N. Arantii—n. Nervorum, Ganglions, nervous.

NODUS, Articulation, Hamma—n. Cerebri, Pons Varolii—n. Encephali, Pons Varolii—n. Hystericus, Globus hystericus.

NOESIS, Intellect.

NŒUD, Node—n. *du Chirurgien*, Knot, surgeon's—n. *Emballeur*, Knot, picker's.

NŒUDS, Calculi, arthritic.

NOISETIER, *Corylus avellana*.

NOISETTE, *Corylus avellana* (nut.)

NOIX, Juglans regia (nux)—n. *Americaine*, *Jatropha curcas*—n. *des Barbades*, *Jatropha curcas*—n. *Cathartique*, *Jatropha curcas*—n. *d'Eau*, *Trapa natans*—n. *de Galle*, see *Quercus infectoria*—n. *de Serpent*, see *Thevetia Ahouai*—n. *Vomique*, see *Strychnos nux vomica*.

NOLA CULINARIA, *Anemone pulsatilla*.

NOLI ME TANGERE, Lupus, see *Chancieux* (*Bouton*.)

NOMA, Cancer aquaticus.

NOM'ADE, *Nomas*, from νομή, 'pasturage.' An epithet given to people who have no fixed habitation, and who travel with their flocks, from country to country, for pasturage. Such are the Tartars. By analogy, the word *Nomad'ic* has been applied to spreading ulcers.

NOMBRIL, Umbilicus.

NOME, Phagedenic ulcer.

NOMENCLATURE, *Nomenclat'io*, *Nomenclatur'a*, *Onomatolog'ia*, *Onomatocesis*, from νομα, 'name,' and καλεω, 'I call.' A collection of terms or words peculiar to a science or art. In all sciences, nomenclature is an object of importance; and each term should convey to the student a definite meaning. The Lavoisierian nomenclature was a valuable gift to chymistry; and anatomy has derived advantages from the labours of Barclay, Dumas, and Chaussier, who have given names to parts indicative of their situation. See Muscle. The nomenclature of pathology has required the greatest attention; and although repeated attempts have been made to improve it, the barbarous terms that disgrace it, are still most frequently adopted. It consists of Hebrew and Arabic terms; Greek and Latin, French, Italian, Spanish, German, English, and even Indian, African, and Mexican; often barbarously and illegitimately compounded. A want of principle in founding the technical terms of medicine is every where observable. They have been formed:—1. From colour; as *Melena*, *Melus*, *Atrabilis*, *Leuce*, *Alphos*, *Chlorosis*, *Rubcola*, *Scarlatina*, *Purpura*, &c. 2. From duration, as *Ephemeral*, *quotidian*, *tertian*, and *quartan*, *continued*, and *intermittent*, &c. 3. From Birds, Beasts, Fishes, Insects, and Plants, as *Rabies canina*, *Cynanche*, *Boulimia*, *Pica*, *Hippopony*, *Elephantiasis*, *Urticaria*, *Lichen*, *Ichthyosis*, &c. 4. From Persons or Places, as *Morbus Hercules*, *Facies Hippocratica*, *Lep'ra Arabum*, *Plica Polonica*, *Sudor Anglicus*, *Morbus Gallicus*, &c., and *Ignus Sancti Antonii*, *Chorea Sancti Viti*, &c.

NON-NATURALS, *Non natura'tia*. Under this term the ancient physicians comprehended air, meat and drink, sleep and watching, motion and rest, the retentions and excretions, and the affections of the mind.

NONUS HUMERI PLACENTINI, Teres

minor—*n.* Lingue musculus, Genio-glossus—*n.* Vesalii, Peronæus tertius.

NOSE, Nasus—*n.* Running at the, Coryza.

NOSEMA, Disease.

NOSEROS, Insalubrious, Sick.

NOSOCOMIUM, Hospital.

NOSOCOMUS, Infirmary.

NOSODES, Insalubrious, sick.

NOSODOCHIUM, Hospital.

NOSOG'ENY, *Nosogen'ia*, from *nosos*, 'a disease,' and *γενος*, 'origin.' The department of medicine, which regards the formation of diseases.

NOSOG'RAPHY, *Nosogra'phia*, from *nosos*, 'a disease,' and *γραφω*, 'I describe.' A description of diseases.

NOSOL'OGY, *Nosolog'ia*, from *nosos*, 'a disease,' and *λογος*, 'a discourse.' A name given to that part of medicine, whose object is the classification of diseases. The most celebrated nosological systems have been those of Sauvages, (1763,) Linneus, (1763,) Vogel, (1764,) Sagar, (1776,) Macbride, (1772,) Cullen, (1772,) Darwin, (1796,) Selle, Crichton, (1804,) Parr, (1809,) Swediaur, (1812,) Pinel, (1813,) Young, (1813,) Good, (1817,) Hosack, (1818,) &c. Besides these general nosographies, others have been published on *Surgery* exclusively, none of which are particularly worthy of enumeration amongst nosological systems. Nosological arrangements have, also, been formed of single families or groups of disease. Plenck, of Baden, is the author of two separate treatises of this kind: the one, a methodical arrangement of the diseases of the eyes, and the other, of cutaneous diseases. Dr. Willan published an arrangement of cutaneous diseases, which was completed by Dr. Bateman, and adopted into the *Nosology* of Dr. Hosack. Mr. Abernethy, also, published a methodical classification of tumours, and many other partial nosological classifications might be enumerated.

NOSON'OMY, *Nosonom'ia*; from *nosos*, 'a disease,' and *ονομα*, 'name.' The nomenclature of diseases.

NOSOS, Disease.

NOSOTAX'Y, *Nosotax'ia*; from *nosos*, 'a disease,' and *ταξις*, 'arrangement.' The distribution and classification of diseases.

NOSTAL'GIA, from *nostos*, 'return,' 'a journey home,' and *αλγος*, 'pain.' *Nostoma'nia*, *Pathopatri'dal'gia*, *Philopatri'dal'gia*, *Philopatri'doma'nia*. (F.) *Nostalgie*, *Maladie du pays*. An affection, produced by the desire of returning to one's country. It is commonly attended by slow wasting, and sometimes by hectic, which may speedily induce death. M. Pinel properly regards it as a variety of melancholy.

NOSTOMANIA, Nostalgia.

NOSTRIL'S, Nares.

NOTAL'GIA, *Notal'gia*, (*Nostal'gia*, improperly, of Kochlin and others,) from *notos*, 'the back,' and *αλγος*, 'pain.' Pain in the back.

NOTCH, Teut. *Nocke*, Ital. *Nocchia*, *Emarginatio*, *Emarginatu'ra*, (F.) *Échancrure*. Depressions or indentations of different shapes and sizes, observed on the circumference or edges of certain bones.

ETHMOID'AL NOTCH, (F.) *Échancrure ethmoïdale*, is situate on the frontal bone, and joins the ethmoid.

ISCHIAT'IC NOTCHES, (F.) *Échancrures Ischiatiques*, are two in number,—the greater and

the less. The former is large, situate at the inferior part of the pelvis, and formed by the sacrum and ilium. It gives passage to the sciatic nerve, pyramidalis muscle, and to the superior gluteal vessels and nerves. The latter is much smaller than the other, from which it is separated by the sciatic spine. It gives passage to the tendon of the obturator internus, and to the internal pudic vessels and nerves.

PAROT'ID NOTCH, (F.) *Échancrure parotidienne*, is the triangular space, comprised between the parotid edge of the inferior maxillary bone and the mastoid process; so called, because it lodges the parotid gland. The notches in soft parts are generally called *Fissures*, (q.v.)

NOTENCEPH'ALUS, from *notos*, 'the back,' and *εγκεφαλον*, 'the head.' A monster, whose head, with the brain, is on the back.—G. St. Hilaire.

NOTHEUSIS, Degeneration.

NOTHIA, Degeneration.

NOTHUS, False.

NOTIÆUS, Dorsal, Medulla spinalis.

NOTIALGIA, Notalgia.

NOTOMYELITIS, Myelitis.

NOTON, Dorsum.

NOTOS, Dorsum, Vertebral column.

NOU'AGE DE LA CORNÉE, Caligo.

NOU'E (Bandage) (F.); 'knotted,' from *nodus*, 'a knot.' A bandage, which has a considerable number of knots placed above each other. It is made with a roller, 6 or 7 ells long, rolled into two balls, and is used to compress the parotid region, after the extirpation of the parotid gland. Also, an epithet applied to children in whom the disease of rickets has swollen the articulations. It is, likewise, applied to the gout, when it has caused nodes on the joints.

NOU'ET (F.), *Nod'ulus*. A bag, filled with medicinal substances, and infused in a liquid to communicate their properties to it.

NOUFFER'S, MADAME, REMEDY, Poly-podium filix mas.

NOURRICE, Nurse.

NOURRICIER, Nutritious.

NOURRITURE, Aliment.

NOUS, Intellect.

NOU'URE, Rachitis.

NOYAU CENTRAL DES PÉDONCULES DU CERVELET, Corpus dentatum.

NOYER, Juglans regia—*n.* de Ceylon, Ad-hatoda.

NU'AGE, Nebula.

NUBECULA, Enæorema, Nebula.

NUBES, Enæorema, Nebula.

NUBILOSUS, Nepheloid.

NUCES AQUATICÆ, see *Trapa natans*—*n.* Quercûs, see *Quercus alba*.

NUCHA, (F.) *Nuque*. The nuke, hinder part, or nape of the neck. The part where the spinal marrow begins.

LIGAMENTUM NUCHÆ. A strong ligament from the neck, proceeding from one spinous process to another, and inserted into the occipital bone. It is very strong in quadrupeds.

NUCISTA. See *Myristica moschata*.

NUCK, CANAL OF. A small prolongation of the peritoneum often sent into the inguinal canal of the female fetus. So called from Nuck, who first described it.

NUCLEATED CELL, see *Cytoblast*.

NUCLEOLUS, see *Cytoblast*.

NUCLEUS, see *Cytoblast*—*n.* Centralis,

Corpus dentatum—n. Dentatus, Corpus dentatum—n. Encased, Cytoblast—n. Fimbriatus, Corpus dentatum—n. Germinal, see Molecule—n. Germinativus, see Molecule—n. Rhomboidalis, see Corpus dentatum.

NUCULA TERRESTRIS, Bunium bulbocastanum.

NUKA, Nucha.

NUMMULAR, *Nummul'aris*. Relating to money, from *nummus*, 'money.' An epithet applied to the sputa in phthisis, when they flatten at the bottom of the vessel, like a piece of money.

NUMMULARIA, *Lysimachia nummularia*.

NUQUE, Nucha.

NURSE, Sax. *noprice*, *Nutrix*, (from *nourish*, itself from *nutrire*), *Trep'housa*, (I.) *Nutrice*, (F.) *Nourrice*, *Garde-malade*. One who suckles her own child or another's. One that has the care of a sick person.

DRY NURSE. One who gives every care to the child, but does not suckle it.

WET NURSE. A female, who suckles the child of another.

NUT, BUTTER, *Juglans cinerea*—n. Cembros, see *Pinus cembra*—n. Physic, *Jatropha curcas*—n. Pine, see *Pinus picea*—n. Pistachio, see *Pistacia vera*—n. Poison, see *Strychnos nux vomica*—n. Purgine, see *Jatropha*—n. Soap, see *Sapindus saponaria*—n. Tree, Malabar, *Adhatoda*—n. Vomic, see *Strychnos nux vomica*—n. Zirbel, see *Pinus Picea*.

NUTATION, *Nuta'tio*, from *nutare*, 'to nod.' Constant oscillation of the head, in which it moves involuntarily in one or more directions.

NUTMEG. See *Myristica moschata*.

NUTRICATIO, Nutrition.

NUTRICIER, Nutritious.

NUTRICIUS, Nutritious.

NUTRIMENTUM, Aliment.

NUTRITION, *Nutri'tio*, *Nutrici'tio*, *Alitu'ra*, *Threpsis*, from *nutrire*, 'to nourish.' Nutrition is that function, by which the nutritive matter, already elaborated by the various organic actions, loses its own nature, and assumes that of the different living tissues,—to repair their losses and support their strength. Sometimes the word is used in a more extended signification, to express the whole series of actions by which the two constant movements of composition and decomposition are accomplished, in organized bodies. Nutrition, then, would comprehend digestion, absorption, respiration, circulation, and assimilation; the latter being *nutrition*, properly so called, and being operated in the intermediate system over the whole of the body,—the tissues attracting from the blood the elements necessary for their reparation.

NUTRITION, FORCE OF, Plastic force.

NUTRITIOUS, *Nutrici'us*, *Nutritive*, *Aliv'ilis*, *Trophimos*, *Tropho'des*, (F.) *Nourricier*, *Nutricier*. Having the quality of nourishing: as nutritious food, nutritious lymph, &c.

NUTRITIOUS OR NUTRITIVE ARTERIES. (F.) *Artères nutritières*. Arterial branches, which enter the *foramina nutritia* of long bones, and penetrate to the medullary membrane.

NUTRITUS, Aliment.

NUTRIX, Nurse.

NUX AROMATICA, see *Myristica moschata*—n. Avellana, *Corylus avellana* (nut)—n. Barbadosensis, *Jatropha curcas*—n. Becuiba, *Ibicuiba*—n. Cathartica Americana, *Jatropha cur-*

cas—n. Gallæ, see *Quercus cerris*—n. Juglans, *Juglans regia*—n. Medica, *Coco* of the Maldives—n. Metella, *Strychnos nux vomica*—n. Moschata, see *Myristica moschata*—n. Myristica, see *Myristica moschata*—n. Pistacia, see *Pistacia vera*—n. Vomica, *Strychnos nux vomica*.

NYCTALOP'IA, from *νύξ*, 'night,' and *οπτομαί*, 'I see.' *Parop'sis Lucif'uga*, *Nyctalop'iasis*, *Cæcitas diur'na*, *Visus nocturnus*, *Oxyo'pia*, *Hemeralo'pia* (moderns,) (q. v.) *Amblyo'pia meridiana*, *Photopho'bia*, *Photophobophtal'mia*, *Dyso'pia lūminis*, *Visus acrior*, (F.) *Vue nocturne*, *Àveuglement de Jour*. The faculty of seeing during the night, with privation of the faculty during the day. It affects both eyes at once, when idiopathic. Its duration is uncertain, and treatment very obscure. It is, however, a disease of nervous irritability, and one of excitement of the visual nerve in particular. The indications of cure will, consequently, be—to allay direct irritation in every way; to excite counter-irritation by blisters; and to gradually accustom the eye to the impression of light.

One labouring under this affection, is called a *Nyctalope*, *Nyctalops*, *νυκταλωπ*.

NYCTHEMERON. See Dies.

NYCTHEMERUM, from *νύξ*, 'night,' and *ἡμερα*, 'day.' The space of 24 hours, or of a day and night. Certain complaints continue only so long.

NYCTOBASIS, Somnambulism.

NYCTOBATESIS, Somnambulism.

NYMPHÆ, from *νυμφη*, 'a water nymph.' *Alæ inter'næ mino'res clitor'idis*, *Carunculæ cuticul'ares*, *Alæ mino'res*, *Collicula vagin'æ*, *Myrtocœlides*, *Labia mino'ra seu inter'na*. (F.) *Nymphes*, *Petites lèvres*. Two membranous folds, which arise from the lateral parts of the prepuce of the clitoris, and descend on the inner surface of the labia majora; terminating by becoming gradually thinner, about the middle of the circumference of the orifice of the vagina. They are formed each of two folds of the mucous membrane of the vulva; and contain, in their substance, a thin layer of spongy, erectile tissue. Their use seems to be,—not, as was once supposed, to direct the course of the urine, which notion gave rise to their name, but to favour the elongation and dilatation of the vagina in pregnancy and labour.

The word *νυμφη* has also been used synonymously with clitoris by Oribasius, Aëtius, &c.

NYMPHÆA ALBA, *Leuconymphæa*, *Nenuphar*, *Microleuconymphæa*, *White Water Lily*. (F.) *Nenuphar blanc*. *Nat. Ord.* Ranunculacæ. *Sex. Syst.* Polyandria Monogynia. Formerly employed as a demulcent, antaphrodisiac, emollient, and slightly anodyne remedy.

NYMPHÆA INDICA, *N. nelumbo*—n. Major lutea, *N. lutea*.

NYMPHÆA LUTEA, *N. major lutea*, *Yellow Water Lily*. (F.) *Nenuphar jaune*. Used for the same purposes.

NYMPHÆA NELUM'BO, *Faba Ægypti'aca*, *Cy'amus Ægypti'acus*, *Nymphæa In'dica*; *Pontic* or *Ægyptian Bean*. The fruit of this is eaten raw in Egypt and some of the neighbouring countries; and is considered to be tonic and astrigent.

NYMPHES, *Nymphæ*.

NYMPHOCLŪIA, *Nymphomania*.

NYMPHOMA'NIA, from *νυμφη*, 'a bride,'

and *mania*, 'fury.' *Furor uterinus*, *Uteromania*, *Lagne'sis furor famini' nus*, *Metromania*, *Erotomania*, *Edaomania*, *Aidoiomania*, *Melancho'lia uteri'na*, *Nymphoclu'ia*, *Tenia*, *Symptom'ia turpitudinis*, *Andromania*, *Gynacomania*, *Machlos'ynē*, *Entelipathi'a*, *Tentigo vene'rea*, *Hysteromania*, *Salac'itas vulvæ*, *Uteri pruritus*, *Brach'ina*, *Ara'scon*, *Arsat'um*, *Estromania*, (F.) *Nymphomanie*, *Fureur utérine*. An irresistible and insatiable desire, in females, for the venereal act. It occurs in those particularly, who possess a nervous temperament, and vivid imagination, especially if excited by improper language, masturbation, &c. Its course, as described, is as follows. In the commencement, the sufferer is a prey to perpetual contest between feelings of modesty and impetuous desire. At an after period, she abandons herself to the latter, seeking no longer to restrain them. In the last stage the obscenity is disgusting; and the mental alienation, for such it is, becomes

complete. The treatment consists in the use of the same means as are required in the satyriasis of man. When the mental alienation is complete, solitude is indispensable.

NYPHON'CUS, from *νυμφη*, 'the nymph,' and *ογκος*, 'a tumour.' A morbid tumefaction of the nymphæ.

NYPHOT'OMY, *Nymphotom'ia*, *Nympharum Sectio*, from *νυμφη*, 'nymph,' and *τεμνειν*, 'to cut.' An operation, known and practised for a long time; and which consists in the excision of the nymphæ. The operation is had recourse to, when they are attacked with scirrhus, cancer, fungus, or gangrene; or when they are so large as to interfere with walking or coition. *Nymphotomy* is the circumcision of the female. It is practised in some countries.

Some authors have used the term *Nymphotomy* for amputation of the clitoris.

NYSTAGMUS, Nictation.

O.

OAK, BLACK, *Quercus tinctoria*—o. Common, *Quercus robur*—o. Jerusalem, *Chenopodium botrys*—o. Lungs, *Lichen pulmonarius*—o. Poison, *Rhus toxicodendron*—o. Red, *Quercus rubra montana*—o. Sea, *Fucus vesiculosus*—o. Spanish, *Quercus rubra montana*—o. White, *Quercus alba*.

OARION, Ovary.

OARI'TIS, *Oöphoritis*, *Ooritis*, *Inflammatio Ovarii*, *Ovaritis*, (F.) *Inflammation de l'Ovaire*, from *οαριον*, 'the ovary,' and *itis*, the termination denoting inflammation. Inflammation of the ovarium.

OATMEAL, see *Avena*.

OATS, *Avena*.

OBAUDITIO, Baryecolia.

OBELEA RAPHE, Sagittal suture.

OBESITAS, Polysarcia.

OBESITY, Corpulencia.

OBFUSCATIO, Amaurosis.

OBLIQUE, *Obliquus*. Any thing inclined:—which deviates from the vertical line. Anatomists have given this name to certain muscles, which have an oblique direction as regards the plane that divides the body into two equal and symmetrical halves. These are:—

OBLIQUE MUSCLES OF THE ABDOMEN. They are two in number, and distinguished into: *a. Obliquus Externus Abdominis*, *O. descendens externus*, *O. descendens*, *O. major*, *Ilio-pubo-costo-abdominal*, *Costo-abdominal* (Ch.) (F.) *Grand oblique*, *Oblique externe*. One of the broadest muscles of the body. It is situate at the lateral and anterior part of the abdomen; and is flat and quadrilateral. It is attached, above, to the outer surface and lower edge of the 7 or 8 last ribs; below, to the anterior third of the external lip of the crista ilii; before, it terminates at the linea alba by means of a broad and strong aponeurosis, which covers the rectus, and presents, towards its inferior part, two very solid fibrous fasciculi, which are inserted:—the one at the symphysis, the other at the spine of the pubis,—under the name of *Pillars of the Abdominal Ring*. These pillars leave between them an

opening, which forms the inferior orifice of the inguinal canal. The obliquus externus abdominis depresses the ribs, and carries them backwards, during a strong expiration. It impresses on the chest a movement of rotation; and bends the thorax upon the pelvis, *on vice versâ*. It contracts, also, the abdominal cavity. *b. Obliquus Internus Abdominis*, *M. acclivis*, *O. ascendens*, *O. minor*, *O. internus*, *O. ascendens internus*, *Ilio lombo-costo-abdominal*, *Ilio-abdominal* (Ch.) (F.) *Muscle petit oblique*; *ou oblique interne*, is broad, especially before; thin; and irregularly quadrilateral, like the preceding, beneath which it is situate. It is attached, above, to the inferior edge of the cartilages of the 5th, 4th, 3d, and 2d false ribs; below, to the anterior two-thirds of the interstice of the crista ilii, to the posterior part of the crural arch, and to the pubis; behind, to the spinous processes of the last two lumbar vertebrae, and to those of the first two portions of the sacrum; before, to the linea alba. Its upper fibres run obliquely upwards and forwards; the middle are horizontal; and the lower pass obliquely downwards and forwards.

These last, in the male, are dragged down through the inguinal ring, when the testicle descends; and form the two fasciculi of the cremaster.

The obliquus internus resembles the *O. externus* in function.

OBLIQUE MUSCLES OF THE EYE, *Amato'ria*, *Circumagen'tes* are two in number. They are distinguished into:—*a. Obliquus Superior Oculi*, *Amato'rius mus'culus*, *Trochlea'ris*, *Obliquus major*, *Optico-Trochlei scleroticien*, *Grand trochléateur* (Ch.) *Circumductio'nis op'ifex*, *Longis'simus oculi*, (F.) *Grand oblique de l'œil*, *O. supérieur de l'œil*, *Amoureux (Muscle)*, is situate at the inner and upper part of the orbit. It is small, round, fusiform, and reflected upon itself in the middle of its course. Behind, it is attached to the inside of the foramen opticum; and when it arrives opposite the internal orbital process, it becomes a small, round tendon, which slides in

a cartilaginous pulley, fixed to the os frontis, and is reflected, at an acute angle, to proceed downwards and outwards, and to attach itself to the outer and back part of the globe of the eye. This muscle carries the globe of the eye forwards and inwards; making it experience a movement of rotation, which directs the pupil downwards and inwards. This is conceived to be an involuntary muscle as well as the next. In sleep, according to Sir C. Bell, when the power over the straight or voluntary muscles of the organ is nearly lost, the eye is given up to the oblique muscles, which lodge the transparent cornea under the upper eyelid. At the approach of death, the same thing is observable; hence, the turning up of the eye, at such a time, is not an evidence of agony or suffering, but of insensibility. *b. Obliquus Inferior Oculi*, *O. minor oculi*, *Maxillo-scleroticien*, *Petit Trochéléateur* (Ch.) (F.) *Petit oblique ou oblique inférieur de l'œil*, is situate at the anterior and inferior part of the orbit. It is flat and attached to the inner and anterior part of the orbital surface of the superior maxillary bone, on the outside of the lachrymal gutter; from thence it passes outwards and backwards, and terminates by an aponeurosis, at the posterior and inner part of the globe of the eye. It carries the globe of the eye inwards and forwards; and directs the pupil upwards and outwards.

OBLIQUE MUSCLES OF THE HEAD. These are two in number. *a. Obliquus Superior Capitis*, *O. minor capitis*, *Trachélo-atloïdo-occipital*, *Atloïdo-sous-mastoidien* (Ch.) (F.) *Muscle oblique supérieur ou petit oblique de la tête*. This muscle is situate at the sides of, and behind, the articulation of the head: it is flat and attached, on the one hand, to the top of the transverse process of the atlas; and, on the other, terminates at the occipital bone, beneath the inferior curved line, and sometimes, also, at the mastoid region of the temporal bone. It extends the head,—inclining it to one side. *b. Obliquus Inferior Capitis*, *Obliquus major*, *Spini-axoïdo-trachéli-atloïdien*, *Axoïdo-atloïdien* (Ch.) (F.) *Oblique inférieur ou grand oblique de la tête*, is situate at the posterior part of the neck and head. It is round, fusiform; attached to the spinous process of the axis, and proceeds to terminate behind and below the summit of the transverse process of the atlas. It impresses, on the first vertebra and the head, a movement of rotation, which turns the face to one side.

OBLIQUE EXTERNE, *Obliquus externus abdominis*—*o. Grand*, *Obliquus externus abdominis*—*o. Grand de l'œil*, *Obliquus superior oculi*—*o. Grand de la tête*, *Obliquus inferior capitis*—*o. Inférieur de l'œil*, *Obliquus inferior oculi*—*o. Inférieur de la tête*, *Obliquus inferior capitis*—*o. Interne*, *Obliquus internus abdominis*—*o. Petit*, *Obliquus internus abdominis*—*o. Petit de l'œil*, *Obliquus inferior oculi*—*o. Petit de la tête*, *Obliquus superior oculi*—*o. Supérieur de l'œil*, *Obliquus superior oculi*—*o. Supérieur de la tête*, *Obliquus superior capitis*.

OBLIQUITÉ DE LA MATRICE, *Retroversio uteri*.

OBLIQUUS ASCENDENS, *O. internus abdominis*—*o. Auris*, *Laxator tympani*—*o. Descendens externus*, *O. externus abdominis*—*o. Major*, *O. externus abdominis*, *O. inferior capitis*, *O. superior oculi*—*o. Minor*, *O. internus*

abdominis *o. Minor capitis*, *O. superior capitis*—*o. Minor oculi*, *O. inferior oculi*.

OBLITERATED, *Obliteratus*; from *obliterare*, 'to efface,' (*literæ*, 'letters'?) A vessel or duct is said to be obliterated, when its parietes have approximated and contracted such adhesion to each other that the cavity has completely disappeared.

OBLIVIO, *Amnesia*—*o. Iners*, *Lethargy*.

OB'OLUS, *ὀβολος*, a weight of 9 or 10 grains.

OBSCURCISSEMENT DE LA VUE, *Caligo*.

OBSERVATION, *Observatio*, (from *ob*, and *servare*, 'to keep,' e.g. in sight.) *Tere'sis*, *Symparateres'sis*. Act of examining a thing, by means of the external senses. This word is employed in several acceptations. It expresses—1. The action of observing—2. The aggregate of knowledge, afforded by observation. In French—but not in English—it means the case or history of the phenomena, presented by a patient in the course of a disease.

OBSERVATION, *Case*.

OBSERVATION, *METHOD OF*, *Numerical method*.

OBSTETRICIANS, *Accoucheur*.

OBSTETRICES, from *Obstetrix*, 'a mid-wife,' *Tokol'ogy*, *Tocology*, *Μαιεία*, *Maei'a*, *Mæia*, *Ars obstetri'cia*, *Obstetricy*. The art of midwifery.

OBSTETRICY, *Obstetrics*.

OBSTETRIX, *Midwife*.

OBSTIPATIO, *Constipation*—*o. Tenesmus*, *Tenesmus*.

OBSTIPATIO. See *Hump*.

OBSTIPITAS, *Torticollis*.

OBSTRUCTION, *Emphraxis*, *Stegnosis*—*o. Alvi*, *Constipation*—*o. Ductus Alimentarii*, *Constipation*—*o. Intestinalis*, *Constipation*—*o. Recti Spastica*, *Stricture of the Rectum*, *spasmodic*—*o. Pulmonum pituitosa febrilis*, *Peripneumonia notha*.

OBSTRUCTION OF THE INTESTINES, *Enteremphraxis*.

OBSTRUENS, from *obstruo*, (*ob*, and *struere*, 'to build,') 'I stop up by building against,' *Oppilatus*. A medicine which closes the orifices of ducts or vessels.

OBSTUPEFACIENTIA, *Narcotics*.

OBTONDANT, *Obtundens*.

OBTUNDENS, (F.) *Obtondant*, from *obtundere* (*ob*, and *tundere*, 'to beat,') 'to beat against,' and therefore to blunt the edge. An epithet applied to remedies that were supposed, according to an erroneous theory, to be possessed of the power of blunting the acrimony of the humours. A demulcent is one of these.

OBTURAMENTUM, *Emphragma*.

OBTURATEUR DU PALAIS, *Palate*, *artificial*.

OBTURATIO, *Emphraxis*.

OBTURATOR, *Obturatorius*, (F.) *Obturator*, from *obtura're*, 'to close,' 'stop up the entrance.' A name given to several parts.

OBTURATOR ARTERY, *Sous-pubio fémorale* (Ch.) *Arteriu obturato'ria*, *A. obtura'trix*, (F.) *Ar'tère obturatrice*, arises, most commonly, from the hypogastric. It is, however, frequently given off from the epigastric; a matter of importance to be determined in cases of femoral hernia. Of 500 obturator arteries examined by Mr. J. Cloquet, 348 were furnished by the hypogastric, and 152 by the epigastric or crural. When it

arises from the hypogastric, it passes forwards and outwards, and then turns horizontally into the cavity of the pelvis, to issue from this cavity by the opening left at the upper part of the obturator membrane. When, on the contrary, the obturator artery arises from the epigastric or the crural, it descends obliquely inwards, behind the os pubis, to the obturator foramen. At its exit from the pelvis, the artery divides into two branches, a *posterior* and an *anterior*, which are distributed to the muscles of the anterior and superior part of the thigh.

OBTURATOR FORAMEN, *Fora'men Obturatorium*, (F.) *Trou sous-pubien*, *F. infra-pubidnum*, *Fora'men osale*, *F. thyroideum*, *F. Thyroïdes*, *F. Amplum Pelvis*. A large opening of an oval or triangular form, in the anterior part of the os innominatum, on the outside of the symphysis pubis and beneath the horizontal ramus of the os pubis. This foramen is closed by a membranous ligament.

OBTURATOR LIGAMENT OR MEMBRANE is a fibrous membrane, fixed to the whole circumference of the obturator foramen, except above, where an opening remains for the passage of the vessels and nerves of the same name.

OBTURATOR MUSCLES. These are two in number. They are divided into

a. Obturator Externus, *Extra-pelcio-pubi-trochanterien*, *Sous-pubio-trochanterien externe* (Ch.) A muscle, situate at the anterior and inner part of the thigh. It is broad, flat, and triangular; and is attached, on the one hand, to the anterior surface of the os pubis, to that of the ischium, and to the anterior surface of the obturator ligament. Its fleshy fibres converge to the tendon, which proceeds to be inserted at the inferior part of the cavity of the great trochanter. This muscle rotates the thigh outwards.

b. Obturator Internus, *Marsupialis*, *Bursalis*, *Intra-pelcio-trochanterien*, *Sous-pubio-trochanterien interne* (Ch.) is seated, almost entirely, in the pelvis. It arises from the inner surface of the obturator ligament, and from the posterior part of the circumference of the obturator foramen, and is inserted, by means of a strong tendon, running between the two portions of the gemini, into the cavity at the root of the great trochanter; after having turned upon the ischium, which forms for it a kind of pulley. This muscle also rotates the thigh outwards.

OBTURATOR NERVE, *Sous-pubio-fémoral* (Ch.) proceeds principally from the 2d and 3d lumbar nerves. It descends into the pelvis; gains the obturator foramen; gives branches to the obturator muscles, and divides, behind the adductor primus and pectinalis, into two branches; one *anterior*, whose branches are distributed to the first two adductors, gracilis, and integuments; the other, *posterior*, distributing its ramifications to the obturator externus and third adductor.

OBTURATOR VEIN has, ordinarily, the same arrangement as the artery. It is common, however, to find it arising from the epigastric; whilst the corresponding artery proceeds from the hypogastric, and *vice versâ*.

OBVOLVENTIA, *Demulcents*.

OCCIPITAL, *Occipitalis*. That which belongs to the occiput.

OCCIPITAL ARTERY. This arises from the posterior part of the external carotid, beneath

the parotid. It proceeds backwards, passes between the mastoid process and the transverse process of the atlas; reaches the occipital bone and divides into two branches, which may be called ascending posterior and anterior, and are distributed to the neighbouring muscles and ligaments.

OCCIPITAL BONE, *Os occipitis seu occipit'is seu occipital'e*, *Os sphano basilare*, *Os memor'ie*, *Os nerod'sum*, *Os basilare*, *Os proræ*, *Os pyxididis*, seu *sextum cranii*, seu *lambdoïdes*, seu *lambdæ*, seu *laude*, seu *puppis*, seu *nerod'sum*, seu *fibrôsum*, seu *pelvicephalicum*, (F.) *Os occipital*, is situate at the posterior and inferior part of the cranium, which it assists in forming. It is flat, symmetrical, and curved upon itself. It presents, 1. an *occipital or posterior surface*, which is convex, and has, upon the median line, the *basilary surface*, the *foramen magnum*, through which passes the spinal marrow with its membranes and vessels;—the *external occipital crest*, the *external occipital protuberance*; and, at the sides, the *upper curved line*, *large rough arched ridge or transverse arch or linea semicircularis*, the *lower curved line*, the *posterior condyloid fossæ*, the *condyles* for the articulation of this bone with the atlas; and the *anterior condyloid fossæ*, pierced by a foramen for the passage of the ninth pair of nerves. 2. A *cerebral or anterior surface*. On the median line are:—the *basilary fossæ*, the *inner orifice* of the foramen magnum, the *internal occipital crest*, the *internal occipital protuberance*, the *cruciform spine*; a *channel*, which lodges the termination of the straight sinus, and on each side, the *occipital fossæ* distinguished into *superior or cerebral*, and *inferior or cerebellous*, and separated by a groove which lodges the lateral sinus. 3. The surfaces of the occipital bone are separated by four ridges and four angles. The two superior edges are articulated with the parietal bones; the two lower join the temporal; and the anterior angle, under the name *basilary process*, is united to the sphenoid.

The occipital bone is developed from four points of ossification; and sometimes from a greater number.

OCCIPITAL MUSCLE, *Occipitalis*. Many anatomists have given this name to the posterior fasciculus of the Occipito-frontalis, (q. v.)

OCCIPITAL NERVE, *Sub-occipital nerve*, *Pre-mière paire trachélienne*, (Ch.) (F.) *Nerf occipital ou sous-occipital*. It arises from the upper part of the spinal marrow by eight or ten filaments, united in two fasciculi. Thus formed, it passes between the foramen magnum and the posterior arch of the atlas; and, at this place, forms a long ganglion, afterwards dividing into two branches. Of these, the *anterior*, which is long and small, makes a turn above the transverse process of the atlas, and forms an anastomotic noose with a branch of the second cervical nerve. The *posterior* branch, larger and shorter, divides into seven or eight branches, which are distributed to the muscles of the upper and back part of the neck.

OCCIPITAL VEIN. Its roots follow exactly the course of the branches of the artery, and unite into a single trunk, which opens into the internal jugular vein, and sometimes into the external.

OCCIPITUM, *Occiput*.

OCCIPITO ATLOID, *Occipito-atloïdeus*, (F.)

Occipito-atloldien. That which has reference to the occiput and atlas.

OCCIPITO-ATLOLD ARTICULATION is the articulation of the condyles of the occipital bone with the superior articular cavities of the atlas. It is strengthened by two ligaments:—the one anterior, the other posterior, called *occipito-atlold ligaments*; the one extends from the anterior, the other from the posterior, arch of the atlas, to the corresponding portion of the circumference of the foramen magnum.

OCCIPITO-AXOID, *Occipito-axoideus*, (F.) *Occipito-axoidien.* That which relates to the occipital bone and the axis or second vertebra.

OCCIPITO-AXOID ARTICULATION is the connexion of the occipital bone with the axis or second vertebra, although these bones are not really articulated, but are merely retained in apposition by three strong ligaments; the posterior of which is called the *occipito-axoid*, and the two others *odontoid*.

OCCIPITO-FRONTALIS, *Digastricus cranii*, *Epicranius*, *Frontalis et occipitalis*. The majority of anatomists call, by this name, the whole of the fleshy plane, with the epicranial or coronal aponeurosis, (see Calotte,) which covers the head from the occiput to the forehead. It is attached, by its posterior fasciculus, to the two outer thirds of the upper curved line of the occipital bone, and to the outer surface of the mastoid portion of the temporal; and, by its anterior fasciculus, it terminates at the eyebrow, where it becomes confounded with the superciliaris, pyramidalis nasi, and orbicularis palpebrarum.

The occipito-frontalis, by the contraction of its anterior fasciculus, draws forwards a part of the integuments of the cranium. It wrinkles the skin of the forehead transversely, and may, also, contribute to open the eye by its decussation with the orbicularis palpebrarum. The posterior fasciculus of the muscle draws backwards a part of the skin of the cranium and assists in stretching the common aponeurosis.

OCCIPITO-MENINGEAL. That which belongs to the occipital bone, and to the meninge or dura mater.

OCCIPITO-MENINGEAL ARTERY, in Chaussier's nomenclature, is a branch of the vertebral, given off to the dura mater at its entrance into the cranium.

OCCIPUT, *In'ion*, from *ob*, and *caput*, *Opisthocranium*, *Opisthocephalon*, *Prora*, *Occipitium*. The back part of the head, formed by the occipital bone.

OCCLUSION, *Oclusio*, *Myce*, from *occludere*, 'to shut up.' Sometimes this word signifies, simply, the transient approximation of the edges of a natural opening—the *occlusion of the eyelids*, for example; at others, it is synonymous with imperforation, as *occlusion of the pupil*, *ragina*, &c.

OCHEMA, Vexicle.

OCHETEUMATA, Nares.

OCHETOS, Canal.

OCHBUS, Scrotum.

OCHREA, Shin—o. Rubra, Hæmatites.

OCHROMA, Paleness.

OCHROPYRA, Fever, yellow.

OCHROTES, Paleness.

OCHTHODES, Callous.

OCCITHUM BASILICUM, *Basilicum*, *Ben'daros*, *Basilicum majus*, *B. citratum*, *Com-*

mon or *Citron basil*, (F.) *Basilic commun.* *Nat. Ord.* Labiatæ. *Sez. Syst.* *Dydynamia Gymnospermia*. This herb has a fragrant odour and aromatic taste. It is used as a condiment, and has been supposed to possess nervine properties.

OCCIMUM CARYOPHYLLATUM, *O. minimum*, *Small or Bush basil*. Possesses properties similar to the former. It is sometimes used as snuff.

OCTA'NA, *Hebdomada'ria*, from *octo*, 'eight.' A fever, whose paroxysms recur every week. A supposititious case.

OCTA'RUS. The eighth part of a wine-gallon. It contains sixteen fluidounces.—Ph. U. S. 20 fluidounces Imperial measure.

OCTOPUS, *Synpheocephalus*, Hemipages.

OC'TUNX. A weight of eight ounces.

OCULARES COMMUNES, *Motores oculorum*.

OCULARIA, *Euphrasia officinalis*.

OCULI PALPEBRARUM SCABIES PRURIGINOSA, *Ophthalmia tarsi*.

OC'ULIST, *Oculis'ta*, *Ophthalmia'ter*. One who occupies himself, chiefly, with the management of diseases of the eye.

OCULISTIQUE, Ophthalmology.

OCULO-MUSCULAR NERVES, COMMON, *Motores oculorum*.

OCULUM MOVENS PRIMUS, *Rectus internus oculi*—o. *Movens quartus*, *Rectus inferior oculi*—o. *Movens secundus*, *Rectus externus oculi*—o. *Movens tertius*, *Rectus superior oculi*.

OCULUS, Eye—o. *Bovinus*, *Hydrophthalmia*—o. *Bovis*, *Chrysanthemum leucanthemum*—o. *Bubulus*, *Hydrophthalmia*—o. *Cæsius*, *Glaucoma*—o. *Duplex*, *Binoctulus*—o. *Elephantinus*, *Hydrophthalmia*—o. *Genu*, *Patella*—o. *Lachrymans*, *Epiphora*—o. *Purulentus*, *Hypopyon*—o. *Simplex*, see *Monoculus*—o. *Typhonis*, *Scilla*.

OCYTOC'IC, *Oxytocic*; from *ὀξύς*, 'quick,' and *τοκος*, 'labour.' Any thing that expedites parturition.

ODAXIS'MUS, from *ὀδύς*, 'a tooth.' The painful itching of the gums, which precedes the appearance of the teeth. Dentition, (q. v.)

ODES, a suffix. See *Eidos*.

ODIN, Pains, (labour.)

ODME, Odour.

ODONTAGOGON, *Dentagra*.

ODONTAGRA, from *ὀδύς*, 'a tooth,' and *αἶμα*, 'a seizure.' A rheumatic or gouty pain in the teeth. *Dentagra*, (q. v.)

ODONTAL'GIA, from *ὀδύς*, 'a tooth,' and *αλγος*, 'pain.' *Odont'ia*, *Dent'ium dolor*, *Toothache*, *Odont'ia dolor'osa*, (F.) *Douleur des dents*, *Fluxion sur les dents*, *Mal de dent*, *Mal d'amour*.

A disease, dependent upon a variety of causes affecting the cavity of the tooth; but generally owing to caries, which exposes the cavity to the action of the air, and to extraneous matters in general. Hence, the treatment consists in plugging the caries, or destroying the sensibility of the nerve, by powerful stimulants; and, if these means fail, in extracting the tooth.

ODONTALGIA CARIOSA, Dental gangrene—o. *Dentitionis*, *Dentition*—o. *Hæmodia*, *Hæmodia*.

ODONTALGIA NERVOSA, *Neuralgia Denta'lis*. Neuralgia of the Teeth. Characterized by periodical pain, shooting with the utmost violence along the branches of the fifth pair distributed to the affected jaw.

ODONTALGIA REMITTENS ET INTERMITTENS, Neuralgia infra-orbitaria.

ODONTALGIC, Anti-odontalgic.

ODONTIA, Odontalgia.

ODONTIA DEFORMIS. Deformity of the teeth, from error of shape, position, or number.—Good.

ODONTIA DENTITIONIS LACTANTII, see Dentition (first)—o. Dentitionis puerilis, see Dentition, (second)—o. Edentula, see Nefrendes—o. Exerescens, Epulis—o. Incrustans, Odontolithos—o. Stuporis, Hæmodia.

ODONTIASIS, Dentition.

ODONTIC, Anti-odontalgic.

ODONTITIS, Endodontitis.

ODONTOGLYPHON, Gum lancet.

ODONTOGLYPHUM, Denticulipium.

ODONTOID, *Odontoïdes*, *Dentiformis*, *Dentalis*, *Dentoideus*, *Pyrenoides*, from *odontos*, 'a tooth,' and *eidos*, 'shape,' 'resemblance.' This epithet is given to the *Processus dentatus* of the second vertebra or axis, (q. v.)

ODONTOID LIGAMENTS, (F.) *Ligaments odontoidiens*, are two strong and short conical fasciculi, whose truncated summits embrace the sides of the odontoid process, and whose bases are fixed in the fossæ at the inner side of the condyles of the occipital bone. Their direction is obliquely outwards and slightly upwards. They enter into the composition of the occipito-axoid articulation; strengthen the junction of the head with the vertebral column, and limit the movement of rotation of the atlas on the axis.

ODONTOLITHOS, from *odontos*, 'a tooth,' and *lithos*, 'a stone.' A sort of incrustation, of a yellowish colour, which forms at the base of the teeth, and is called *Tartar*, *Tartarus Dentium*, *Odontia incrustans*, (F.) *Tartre des Dents*. It consists of seventy-nine parts of phosphate of lime; twelve and a half of mucus; one of a particular salivary matter, and seven and a half of an animal substance, soluble in muriatic acid.

ODONTOLOGY, *Odontolog'ia*, from *odontos*, 'a tooth,' and *logos*, 'a discourse.' An anatomical treatise of the teeth.

ODONTOPHYIA, Dentition.

ODONTOSMEGMA, Dentifrice.

ODONTOTECHNY, Dentistry.

ODONTOTRIMMA, Dentifrice.

ODORAT, Olfaction.

ODORATUS, Olfaction—o. Deperditus, Anosmia.

ODOS, Way.

O'DOUR, *Odor*, *Odmē*, *Osmē*. A smell. Odours are subtle particles, constantly escaping from the surface of certain bodies. They act, in some manner, by actual contact on the nerves of the Schneiderian membrane, and give occasion to the sense of smell or Olfaction, (q. v.)

ODOUS, Tooth.

OD'YNE, *odynē*, 'pain,' (q. v.) *Dolor*, *Odyne'ma*. A very common suffix to words; as in Pleurodyne.

ODYNEMA, Odyne.

ECONOMIA, Economy—æ. Animalis, Physiology.

CEDE'MA, from *οιδεω*, 'I am swollen.' *Hydrops cellulæris acutum*, *Phlegmatia*. Swelling produced by the accumulation of a serous fluid in the interstices of the cellular texture. This swelling is soft; yields under the finger;

preserves the impression for some time, and is pale and without pain. It presents the same characters as anasarca, which is general œdema. Its etiology and treatment are also the same. See Anasarca.

CEDE'MA ARSENICA'LIS. The swelling of the eyelids and face, induced by continued use of the preparations of arsenic.

CEDE'MA CEREBRI, (F.) *Œdème du cerveau*. Oedema of the Brain. A condition of the cerebral pulp, in which there is an infiltration of serous fluid into it, so that it appears more moist or watery than common; and, when sliced or pressed, small drops of water are seen to ooze out.

CEDEMA, COMPACT, Induration of the cellular tissue—æ. Fugax, Anathymiasis—æ. Hystericum, Anathymiasis.

CEDEMA OF THE GLOTTIS, *Œdem'atous Laryngitis*, *Œde'ma glottidis*, *Hydrops glottidis*, *Submucous Laryngitis*, *Œdem'atous angina*, (F.) *Laryngite œdémateuse*, *Œdème de la glotte*. A disease consisting of serous or sero-purulent infiltration into the submucous tissue of the glottis. The symptoms resemble those of croup; but the disease attacks the adult rather than the child. The age is, indeed, a principal means of diagnosis between the two affections.

The disease is almost always fatal. The treatment has to vary according to the accompanying general symptoms.

CEDEMA LACTEUM, Phlegmatia dolens.

CEDEMA OF THE LUNGS, *Hydrops Pulmonum*, *Hydropneumonia*, (q. v.) *Anasarca Pulmonum*, (F.) *Œdème du poulmon*. Laënnec has so called the infiltration of serum into the tissue of the lung, carried to such an extent as to diminish its permeability to air. It is not an uncommon sequela of pneumonia, and the major exanthemata. The respiration is laborious; the respiratory murmur scarcely perceptible, although the thorax is largely expanded, and there is a slight *râle crepitant*, particularly at the base and inferior part of the lungs. The sound on percussion is clear, and on both sides equally so. The cough is attended with aqueous expectoration. In some cases, the respiration becomes puerile in a small portion of the summit of the lung.

CEDEMA PUERPERARUM, Phlegmatia dolens—æ. Spasticum, Anathymiasis—æ. Uvulæ, Staphylœdema.

CEDEME ACTIF DES NOUVELLES ACCOUCHÉES, Phlegmatia dolens—æ. du Cerveau, *Edema cerebri*—æ. de la Glotte, *Edema of the glottis*—æ. de la Glotte, *Angina œdematosa*—æ. du Tissu cellulaire des nouveau-nés, Induration (of the cellular tissue.)

CEDEMOSARCA. A species of tumour, mentioned by M. A. Severinus, which holds a middle place between œdema and sarcoma.

CEL, Eye—æ. de Banf, *Anthemis tinctoria*—æ. Double, *Binoculus*—æ. de Lièvre, *Lagophthalmus*—æ. Simple, see *Monoculus*.

CELLET GIROFLEE, *Dianthus caryophyllus*.

CENANTHE, *C. crocata*, *C. chærophylli foliis*, *C. cicutaefolii lobellii*, *Hemlock dropwort*. *Nat. Ord. Umbelliferae*. *Sex. Syst. Pentandria Digynia*. A violent poison of the acro-narcotic class. Its juice has been recommended in certain cutaneous diseases; but it is scarcely ever used. It is employed in fomentations.

ÆNELÆ'ON, *οινελαιον*, from *οινος*, 'wine,' and *ελαιον*, 'oil.' A mixture of oil and wine.—Galen.

ÆNOG'ALA, *οινογαλα*, from *οινος*, 'wine,' and *γαλα*, 'milk,'—a mixture of wine and milk.' According to some, wine as warm as new milk.

ÆNOG'ARON, *Garum vino mistum*. Wine mixed with garum.—Aëtius.

ÆNOMANIA, Delirium tremens.

ÆNOS, Wine.

ÆNOSTAGMA, Spiritus vini rectificatus.

ÆNOTHE'RA BIEN'NIS, *Æ. Mollis'sima*, *Evening Primrose*, *Scabish*. An indigenous plant, common on the borders of fields, and in natural hedges. Octandria Monogynia, (Linn.) Its properties are mucilaginous and slightly acid. A decoction has been used in cases of infantile eruptions.

ÆSOPHAGE'AL, *Æsophagæus*, (F.) *Æsophagien*. Relating or belonging to the œsophagus.

ÆSOPHAGEAL AP'ERTURE OF THE DIAPHRAGM, (F.) *Ouverture œsophagienne du diaphragme*. An opening in the diaphragm, for the passage of the œsophagus.

ÆSOPHAGEAL APERTURE OF THE STOMACH. A name, given to the superior or cardiac orifice of the stomach, to distinguish it from the inferior or pyloric.

ÆSOPHAGE'AL MUSCLE, *Æsophagæus*. Some anatomists have given this name to the transverse muscular fibres, which surround the œsophagus at its upper extremity.

ÆSOPHAGEAL TUBE, see Tube, œsophageal.

ÆSOPHAGIALGIA, *Æsophagismus*.

ÆSOPHAGIARCTIA, Dysphagia constricta.

ÆSOPHAGIEN, (muscle,) Constrictor œsophagi.

ÆSOPHAGIS'MUS. A name given by Vogel to spasm of the œsophagus. *Dysphagia spasmodica*, *Stricture œsophagi spasmodica*, *Æsophagial'gia*. By some, used synonymously with œsophagitis, dysphagia, and contraction of the œsophagus.

ÆSOPHAGI'TIS. Inflammation of the œsophagus.—*Angina œsophagæa*, *Cynanche œsophagæa*, (q. v.) *Inflammatio œsophagi*, (F.) *Angine œsophagienne*.

ÆSOPHAGORRHAGIA, Hæmatemesis.

ÆSOPHAGOT'OMY, *Æsophagotomia*, from *οισοφάγος*, 'the œsophagus,' and *τεμνειν*, 'to cut.' An incision made into the œsophagus for the purpose of extracting foreign bodies from it.

ÆSOPH'AGUS, from *οιω*, 'I carry,' and *φαγω*, 'I eat'; *Gula*, *Fistula cibi'lis*, *Via stom'achi et ventris*, *Fistula vel Infundibulum Ventriculi*, *Glutius*. The Gullet. A musculo-membranous canal, cylindrical, and depressed from before to behind, which extends from the inferior extremity of the pharynx to the upper orifice of the stomach. At its origin, it is situate in the median line; but, beneath the larynx, it deviates to the left, and in the chest experiences different inflections. In its cervical portion, it corresponds, behind, with the spine; before, with the larynx and trachea; and, at the sides, it is close to the primitive carotids, internal jugular veins, par vagum, recurrent nerves, &c. In its inferior or thoracic portion, the œsophagus is entirely contained in the posterior mediastinum; and enters the abdomen

through the œsophageal aperture of the diaphragm. The œsophagus is composed of a very strong muscular layer, sometimes called *Tunica vaginalis gulæ*; formed, itself, of two sets of fibres, the external being generally longitudinal, the internal transverse or annular. 2. Of a mucous membrane which is soft, fine, thin, and white, especially at its lower part. It is continuous, above, with the mucous membrane of the pharynx. The mucous follicles, found beneath it, are not numerous, and have been called *Æsophageal glands*. The arteries of the œsophagus proceed, in the neck, from the thyroid; in the chest, from the bronchial arteries and directly from the aorta;—in the abdomen, from the inferior phrenic, and coronaria ventriculi. Its veins empty themselves into the inferior thyroid, the vena cava superior, the internal mammary, azygos, bronchial, phrenic, and coronaria ventriculi. Its lymphatics pass into the ganglia surrounding it. Its nerves are afforded by the pharyngeal and pulmonary plexuses; by the cardiac nerves; the thoracic ganglia, and, especially, by the pneumogastric and their recurrent branches.

ÆSTROMANIA, Nymphomania.

ÆSTRUM, Clitoris.

ÆSTRUM VENE'ERIS, *Æstrum venereum*, *Æstrus venereus*; from *οιστρος*, *æstrus*, 'a violent impulse or desire.' An immoderate desire for sexual intercourse. With some, *æstrum* signifies Clitoris.

ÆUFS, Ova.

OFFICINA, Pharmacopolium.

OFFIC'INAL, *Officina'lis*, from *offici'na*, 'a shop.' An epithet for medicines found in the shop of the apothecary, ready prepared; in opposition to *magistral* or *extemporaneous*,—those prepared after the prescription of the physician.

OFFIUM, Affion, Opium.

OFFUSCATIO, Amaurosis.

OG'NON, a Corn—o. *Marin*. Scilla.

OH'IO, MINERAL WATERS OF. *Yellow Spring* is a chalybeate, situate in Green county, 64 miles from Cincinnati. It is sometimes frequented.

OLE, *Sorbus domestica*.

OIG'NON, *Allium cepa*.

OIL, *Oleum*, *Elæon*, (F.) *Huile*; from *ελαια*, 'the olive.' A collective name, under which two classes of fluids are included, very different from each other: those, belonging to the one class, are viscid; mawkish or almost insipid: those of the other are nearly devoid of viscosity, and are caustic and very volatile. The former are called *fat* or *fixed oils*; the latter *volatile* or *essential oils*, or *essences*, (q. v.)

OIL OF ALMONDS, *Oleum amygdalarum*—o. of Amber, rectified, see *Succinum*—o. Animal, *Oleum animale*—o. Animal, of Dippel, *Oleum animale Dippelii*—o. of Bay, *Daphnelæon*—o. of Bays, *Oleum laurinum*—o. and Beeswax, *Unguentum ceræ*—o. of Benjamin or benzoin, *Oleum benzoini*—o. Benne, see *Sesamum orientale*.

OIL, BRITISH. An empirical preparation, often used in cases of sprains.

A committee of the Philadelphia College of Pharmacy recommend the following form for its preparation: (*Ol. Terebinth. Ol. Lini usitata*. aa. f. ʒviij, *Ol. Succini, Ol. Juniper*. aa. f. ʒiv, *Petrol. Barbados. f. ʒiij, Petrol. Americ. (Seneca Oil.) f. ʒj. M*.)

OIL OF CACAO, Butter of Cacao—o. of the Cashew nut, see *Anacardium occidentale*—o. Castor, see *Ricinus communis*—o. of Cinnamon, see *Laurus cinnamomum*—o. of Cloves, *Eugenia caryophyllata*—o. Codliver, *O. Jecoris aselli*—o. of Cubebs, see *Piper cubeba*—o. of Cypress, *Cyprinum oleum*—o. of Dill, see *Anethum graveolens*—o. Dippel's, *Oleum animale Dippelii*—o. of Egg, see *Ovum*—o. Ethereal, *Oleum Æthereum*—o. Flaxseed, see *Linum usitatissimum*.

OIL, HAERLEM. An empirical preparation, supposed to consist chiefly of petroleum, turpentine, and balsam of sulphur. Used internally in renal and rheumatic affections.

OIL, KRUMHOLZ, see *Pinus mughos*—o. of Lemons, see *Citrus medica*—o. Lily, see *Lilium candidum*—o. of Mucilages, *Oleum e. mucilaginosus*—o. Neatsfoot, *Oleum bubulum*—o. of Nicodemus, *Nicodemi oleum*—o. of Nutmegs, see *Myristica moschata*—o. Olive, *Oleum olivæ*—o. of Pennyroyal, see *Hedeoma pulegioides*—o. of Pike, *Oleum lucii piscis*—o. Rock, *Petroleum*—o. of Roses, see *Rosa centifolia*—o. of Rue, *Peganelæon*, see *Ruta*—o. of Spike, *Oleum terebinthinæ*—o. of St. John's Wort, see *Hypericum perforatum*—o. Salad, *Oleum olivæ*—o. of Scorpion, see *Scorpion*—o. Sulphuretted, *Balsamum sulphuris simplex*—o. of Tartar, *Liquor potassæ subcarbonatis*—o. of Turpentine, *Oleum terebinthinæ*—o. of Turpentine, rectified, *Oleum terebinthinæ rectificatum*—o. of Vitriol, *Sulphuric acid*—o. of Wine, *Oleum æthereum*.

OILS, ANIMAL, *Olea animalia*—o. Distilled, *Olea volatilia*—o. Empyreumatic, *Olea empyreumatica*—o. Essential, *Olea volatilia*—o. Ethereal, *Olea volatilia*—o. Expressed, *Olea fixa*—o. Fatty, *Olea fixa*—o. Fixed, *Olea fixa*—o. Fugacious, *Olea fugacia*—o. Grain, *Sesamum orientale*—o. Medicinal, *Olea medicinalia*—o. Volatile, *Olea volatilia*.

OILNUT, *Juglans cinerea*.

ointment, OF ANTIMONY, TARTARIZED, *Unguentum antimonii tartarizati*—o. Basilicon, *Unguentum resinæ*—o. Bay, *Unguentum laurinum*—o. Blister, *Cerate of cantharides*—o. Blistering, green, *Unguentum lyttæ medicatum*—o. Blistering, milder, *Unguentum lyttæ*—o. Blistering, yellow, *Unguentum lyttæ medicatum aliud*—o. Blue, *Unguentum hydrargyri*—o. Citrine, *Unguentum hydrargyri nitratis*—o. of Creasote, *Unguentum creasoti*—o. Cyrillo's, *Unguentum muriatis hydrargyri oxygenati medicatus*—o. Digestive, simple, *Unguentum digestivum simplex*—o. Edinburgh, see *Unguentum veratri*—o. Elder, *Unguentum sambuci*—o. of Elemi, *Unguentum elemi compositum*—o. for the Eyes, (Smellome's,) see *Ceratam resinæ*—o. Golden, *Unguentum hydrargyri nitrico-oxydi*—o. Goulardi, *Ceratam plumbi compositum*—o. Green, *Unguentum sambuci*—o. Hellebore, white, *Unguentum veratri*—o. of Hydriodate of potass, *Unguentum potassæ hydriodatis*—o. of Iodine, *Unguentum Iodini*—o. of Iodine, compound, *Unguentum iodini compositum*—o. Itch, *Unguentum sulphuris compositum*—o. Itch, Bateman's, see *Unguentum sulphuratum alcalinum ad scabiem*—o. Itch, Bailey's, see *Unguentum sulphuratum ad scabiem*—o. Itch, Helmerick's, *Unguentum sulphuratum alcalinum ad scabiem*

—o. Issue, Dr. Physick's, see *Unguentum lyttæ medicatum aliud*—o. of Lydia, *Bacaris*—o. Marshmallow, *Unguentum de Althæa*—o. Mercurial, *Unguentum hydrargyri*—o. of Nitrate of mercury, *Unguentum hydrargyri nitratis*—o. of Nitrous acid, *Unguentum acidi nitrosi*—o. of White oxide of lead, *Unguentum oxidi plumbi albi*—o. of Gray Oxide of mercury, *Unguentum oxidi hydrargyri cinereum*—o. of Nitric oxyd of mercury, *Unguentum hydrargyri nitrico-oxydi*—o. of Impure oxide of zinc, *Unguentum oxidi zinci impuri*—o. Red precipitate, *Unguentum hydrargyri nitrico-oxydi*—o. of White precipitate, *Unguentum hydrargyri præcipitati albi*—o. Resin, *Ceratam resinæ flavæ*—o. Resin, black, *Unguentum resinæ nigræ*—o. of Rose-water, *Unguentum aquæ rosæ*—o. Soldier's, *Martiatum unguentum*—o. of Spanish flies, *Cerate of Cantharides*, *Unguentum lyttæ c.* *Spermaceti*, *Unguentum cetacei*—o. of Stramonium, *Unguentum stramonii*—o. of Subacetate of copper, *Unguentum subacetatis cupri*—o. of Sugar of lead, *Unguentum plumbi subperacetatis*—o. Sulphur, *Unguentum sulphuris*—o. Sulphur, compound, *Unguentum sulphuris compositum*—o. Tar, *Unguentum picis liquidæ*—o. Tobacco, *Unguentum Tabaci*—o. Tutty, *Unguentum oxidi zinci impuri*—o. Verdigris, *Unguentum subacetatis cupri*—o. Wax, *Unguentum ceræ*—o. White, *Unguentum oxidi plumbi albi*—o. Zinc, *Unguentum zinci*.

OLD AGE, *Senectus*.

OLEA ANIMALIA, *Animal oils*, (F.) *Huiles animales*. A name given to fixed oils, holding in solution the mucilaginous and gelatinous principles of certain animals, as the *Oil of frogs*, *Oil of Scorpions*, *Oil of spiders*, &c. Sometimes, also, the term *animal oils* is given to empyreumatic oils, produced during the decomposition of animal substances by heat.

OLEA DESTILLATA, *O. Volatilia*.

OLEA EMPYREUMATICA, *Empyreumatic oils*, (F.) *Huiles empyreumatiques*. Oils which have an empyreumatic or burnt smell. They are obtained by treating vegetable or animal matters by heat, in close vessels. They do not exist in organized bodies, but are formed during their decomposition by fire. The animal oil of Dippel is an empyreumatic oil.

OLEA EUROPEA, *Ol'iva*, *Olea sativa*. The *Olive tree*, *ελαία*, *Elæ'a*, (F.) *Olivier*, (Fruit) *Olive*. *Nat. Ord.* *Jasmineæ*. *Sex. Syst.* *Dianthria Monogynia*. The fruit of the olive tree, when pickled, is extremely grateful to some stomachs. Olives, as met with in the shops, are prepared from the green, unripe fruit, repeatedly steeped in water. To this, some quicklime or alkaline salt is added, and afterwards, they are washed and preserved in a pickle of common salt and water. From this fruit is prepared the *Olive oil* or *Salad oil* of the Pharmacopœias, which is obtained by grinding and pressing the olives, when thoroughly ripe. The finer and purer oil issues first by gentle pressure, and the inferior sorts on heating what is left and pressing it more strongly. See *Oleum Olivæ*. In Calabria, an odorous resin exudes from its trunk, which is employed as a perfume by the Neapolitans.

A gum flows from certain wild olives, in warm countries, which consists, according to Pelletier, of a resin, a little benzoic acid, and a peculiar substance, called *Olivic*. It is in yel-

low masses, of a slightly acrid taste, and of a vanilla smell. It is called *Oleæ gummi*, *O. resina*, and *O. balsamum*, (F.) *Gomme olivier*,) and is esteemed astringent and detersive.

OLEA FIXA VEL PIN'GUA, *Expressed oils*, *Fixed oils*, *Fatty oils*, (F.) *Huiles fixes ou grasses*. All the oils obtained from the seeds or pericarps of vegetables, without distillation, and which are viscid, but slightly odorous and sapid; lighter than water, and insoluble in alcohol. The rancidity of oils depends on the absorption of oxygen, and, therefore, they should be kept in bulk as much as possible; and in narrow-necked bottles, so that a very small surface only can be exposed to the air. All the fixed oils are emollient, and, in a certain dose, they act as purgatives and emetics. They are prepared by expressing the fruit or seed containing them.

OLEA FUGACIA, *Fugacious oils*, (F.) *Huiles fugaces*. A name given to oils which are so volatile that, in order to obtain them, recourse must be had to a different process from that employed for other essential oils. Such are the oils of jessamine, lily, violet, &c.

OLEA MEDICINALIA, *Medicinal oils*, (F.) *Huiles Medicinales*. A name given to oils, prepared by macerating, infusing, or boiling medicinal substances in olive or any other fixed oil. These oils may then be regarded as oily solutions of certain medicinal substances; whence they can never be simple. They have, however, been divided into *simple* and *compound medicinal oils*. To the former belong the *Oils of St. John's wort*, of the *Solanum nigrum*, &c.; to the other,—which have often been called *Oily balsams*, (F.) *Baumes huileux*,—the *Balsams of Fioraventi*, Metz, &c. Medicinal oils are, almost always, employed externally.

OLEA VOLATILIA, *Olea destilla'ta*, *Volatile oils*, *Æthero'lea*, *Eth'ereal oils*, *Essential oils*, *Distilled oils*, *Es'sences*, (F.) *Huiles volatiles*, *H. essentielles*. Oils, found in aromatic vegetables, and in every part of them, except in the interior of the seeds. The majority are obtained by distillation; but some by expression. They possess unctuousity, inflammability, and viscosity, like the fixed oils; but they are generally odoriferous, pungent, and acrid. The greater part are lighter than water; but some are heavier, and congeal at a moderate temperature. They dissolve, in small quantity, in distilled water, by simple agitation. Almost all are soluble in alcohol. The odour and taste are the usual tests of their goodness. To preserve them, they should be kept in a cool place, in small bottles quite full and well corked. Volatile oils are possessed of the aromatic properties of the plant whence they are obtained. They are all, when applied externally, stimulant and rubefacient.

OLEAMEN, *Oleamen'tum*. Any soft ointment prepared of oil.—Scribonius.

OLEANDER, *Rhododendron chrysanthemum*.

OLECRANON, or **OLECRANON**, *Olecr'ranum*; from *ὠλεον*, 'the elbow,' and *κρᾶνον*, 'the head,' *Acrole'nion*, *Additamentum neca'tum*, *Ancon*, *Proces'sus anconeus*, *Glans seu Coro'na seu Coro'na posterior*, seu *Additamentum unca'tum* *Ulnæ*, *Vertex Cu'biti*, *Patella fixa*, *Top of the cubit*. Head or projection of the elbow. A

large process at the upper extremity of the ulna, on which we lean. When this process is fractured, it is apt to be drawn up by the triceps; and much care is required to keep the parts in apposition.

OLENE, *Ulna*.

OLEE-CERATUM AQUA SUBACTUM, *Ceratum Galeni*.

OLEE-SACCHARUM, *Elæo-saccharum*.

OLETTE, *MINERAL WATERS OF*. At Olette, in the department Pyrenees Orientales, is a thermal spring, which raises the thermometer to 190° Fahr. It is the hottest in France.

OLEUM, *Oil*—o. *Abietis*, see *Pinus picea*—o. *Absinthii*, *Artemisia absinthium*, (oil of)—o. *Acusticum*, *Huile acoustique*.

OLEUM ÆTHEREUM, *Eth'ereal oil*, (formed in the distillation of ether,) *Oleum vini*, *Oil of wine*, (F.) *Huile douce de vin*. A peculiar oleaginous matter, obtained by continuing the distillation, after the whole of the sulphuric ether has passed over, in the process for the preparation of the latter. It is used only as an ingredient in the compound spirit of ether.

OLEUM AMMONIATUM, *Linimentum ammoniæ fortius*.

OLEUM AMYGDALARUM, *Oleum amygdalæ* *Oil of almonds*, (F.) *Huile d'amandes*. (Expressed from both sweet and bitter almonds; (*Amygdalus communis*.) 3vj of almonds yield 3v of oil.) It is inodorous, insipid, and of a pale straw-colour, and is employed as a demulcent and emollient.

OLEUM ANACARDII, see *Anacardium occidentale*.

OLEUM ANIMALÆ, *Animal oil*, (F.) *Huile animale*. An oil, obtained by the decomposition of the immediate principles of animals, subjected to the action of heat. It is fetid, and always contains a certain quantity of subcarbonate of ammonia. See *Olea Empyreumatica*. The name, *animal oil*, is sometimes also given to the fat contained in the fatty vesicles. The composition of this fat does not, indeed, differ from that of the fixed oils.

OLEUM ANIMALÆ DIPPELII, or *Animal oil of Dippel*, *Oleum cornu cervi*, *O. C. C. rectificatum*, *Animal oil*, *Dippel's oil*, *Oleum pyro-animalæ depuratum*, *O. animalæ æthereum*, *Pyro-oleum ossium rectificatum*, (F.) *Huile animale de Dippel*, *Huile de corne de cerf*, is obtained by distilling animal matters, especially hartshorn, on the naked fire. The subcarbonate of ammonia, which it contains, renders it partly soluble in water, and communicates to it its stimulant properties for which it is used in medicine. It is employed as an antispasmodic.

OLEUM ANIMALIZATUM PER INFUSIONEM, (F.) *Huile animalisée par infusion*, *Huile aromatique*, *H. de petits chiens*. A preparation, formerly esteemed tonic and cephalic. It was obtained by boiling new-born puppies in oil, first depriving them of their blood, skin, and intestines. When the decoction was cold, origanum, thyme, pennyroyal, St. John's-wort, and marjoram were added.

OLEUM ANISI, see *Pimpinella anisum*—o. *Balaninum*, *Guilandina moringa* (oleum)—o. *Balsami*, see *Myrris opobalsamum*.

OLEUM BENZOINI, *Oil of Benzoin* or *Benjamin*. An oil obtained by heating, in a sand bath, the matter which remains, after benzoic acid has been separated from benzoin by the aid

of heat. It has been regarded as balsamic and sudorific.

OLEUM BERGAMII. See Bergamote.

OLEUM BU'BUM, *Neats-foot oil*. The oil prepared from the bones of *Bos domesticus*. It is obtained by boiling in water for a long time the feet of the ox, previously deprived of the hoof. It is introduced into the official list of the Ph. U. S. as an ingredient of the ointment of nitrate of mercury.

OLEUM CACAO SPISSATUM, Butter of cacao—o. Cajuputi, Caieput (oil)—o. Camphoratum, Linimentum camphoræ—o. Cari seu Carui, Carum (oleum)—o. Caryophylli, see *Eugenia Caryophyllata*.

OLEUM CED'RINUM, *Essentia de cedro*, (F.) *Huile de cédrat*. The oil of the peel of citrons, obtained in a particular manner, without distillation, in Italy.

OLEUM CHENOPODII, see *Chenopodium Anthelminticum*—o. Cinicum, see *Ricinus communis*—o. Cinnamonii, see *Laurus Cinnamonii*—o. Cornu cervi, O. animale Dippelii—o. Cubebæ, see *Piper Cubeba*—o. Euphorbiæ Lathyridis, see *Euphorbia Lathyris*—o. Fixum nucum cocos butyraceæ, see *Cocos butyracea*—o. Fœniculi, see *Anethum*—o. Gabianum, Petrolæum—o. Gallinæ, Alkalæ—o. Gaultheriæ, see *Gaultheria*—o. Hedeomæ, see *Hedeoma pulegioidis*—o. Hyperici, see *Hypericum perforatum*.

OLEUM JEC'ORIS ASELLI, *O. Morrhue*, *O. Jec'oris Aselli*, *Codliver Oil*, (F.) *Huile de morue*. The animal oil, which appears under this name in commerce, is obtained from several of the species belonging to the genus *Gadus*. The clearest sorts are generally used. It appears to have no sensible effects upon the economy; but it has been given in strumous affections, rheumatism, chronic cutaneous diseases, and tumours of the mammae. The dose for an adult is from f. ʒij to f. ʒiiss.

OLEUM JUNIPERI, see *Juniperis communis*—o. de Kervâ, see *Ricinus communis*—o. Kervinum, see *Ricinus communis*.

OLEUM LAURI'NUM, *Oleum lauri*, *Oil of bays*. An oil obtained from bayberries, and sometimes used in sprains and bruises, unattended with inflammation.

OLEUM LAVORINUM, *Daphnelæon*, *Unguentum L.*—o. Lavendulæ, see *Lavendula*—o. Lentiscium, Schinelæon—o. Limonis, see *Citrus medica*—o. Lini, see *Linum usitatissimum*—o. Lini cum calce, Linimentum aquæ calcis.

OLEUM LUCHI PISCIS, *Oil of Pike*. From the liver of the *Esox lucius* an oil is spontaneously separated, which is used, in some countries, to destroy specks on the cornea.

OLEUM MALABATHRI, see *Malabathrum*—o. Maris, see *Fagara octandra*—o. Melaleucæ leucodendri, Caieput (oil)—o. Menthæ piperitæ, see *Mentha piperita*—o. Menthæ viridis, *Mentha viridis*—o. Monardæ, *Monarda punctata*—o. Morrhue, O. jecoris aselli.

OLEUM E MUCILAGIN'IBUS, *Oil of Mucilages*. (*Rad. althææ rec. lss, sem. lini, sem. fenugræci* aa ʒiij, aquæ Oij. Boil for half an hour, add ol. olive. Oiv. Continue boiling till the water is nearly consumed, and pour off the oil.) Emollient.

OLEUM MYRISTICÆ, see *Myristica moschata*—o. Neroni, see *Citrus aurantium*.

OLEUM OLIVÆ, *O. olivæ*, *Olive oil*, *Salad oil*. It is an inodorous, insipid, and transparent

oil; obtained by expression from the olive, when ripe. It is demulcent and emollient,—possessing the qualities of the fixed oils in general.

An inferior kind, obtained by boiling the olives in water, and skimming the oil from the surface, is used, also, in Pharmacy. See *Olea Europæa*.

OLEUM OMPHACINUM, *Omotribes*—o. Origani, see *Origanum*—o. Oxydi cupri viride, *Balsam green*, of Metz—o. Palmæ, see *Cocos butyracea*—o. Palmæ liquidum, see *Ricinus communis*—o. Petræ, *Petrolæum*—o. Petræ album, *Naphtha*—o. Picinum, *Brutia*, *Pisselæum*—o. Pimentæ, see *Myrtus pimenta*—o. Pini purissimum, *O. terebinthinæ rectificatum*—o. Pulegii, see *Mentha pulegium*—o. Pyro-animale, *O. animale Dippelii*—o. Ricini, see *Ricinus communis*—o. Rosæ, see *Rosa centifolia*—o. Rutaceum, *Peganelæon*—o. Rosmarini, see *Rosmarinus*—o. Rutæ, see *Ruta*—o. Sabinæ, see *Juniperus Sabina*—o. Sassafras, see *Laurus Sassafras*—o. Sesami, see *Sesamum orientale*—o. Sinapis, see *Sinapis*—o. Spicæ vulgaris, *O. terebinthinæ*—o. Succini, see *Succinum*—o. Succini rectificatum, see *Succinum*.

OLEUM SULPHURATUM, *Balsamum sulph'uris simplex*, *Sulphurated oil*. (*Sulphur. lot. ʒij, olive oil lbj*. Heat the oil in a large iron pot, and throw in the sulphur, by degrees; stirring the mixture after each addition till they unite.) It is stimulating, and was formerly much used in coughs, asthma, &c., and, externally, to foul ulcers.

OLEUM TARTARI PER DELIQUIM, *Liquor potassæ subcarbonatis*—o. Templinum, see *Pinus inughos*.

OLEUM TEREBIN'THINÆ, *Oil of Turpentine*. The volatile oil of the juice of *Pinus palustris*, and other species of *Pinus*.

OLEUM TEREBIN'THINÆ RECTIFICATUM, *Oleum pini purissimum*, *Rectified oil of turpentine*, *Oleum terebinthinæ æthereum*, *Sp. of turpentine*. Common oil of turpentine is also called *Common oil of spike*, *Oleum spicæ vulgaris*. (*Olei terebinth. Oj, aquæ Oiv*. Distil over the oil.) It is stimulant, diuretic, anthelmintic, and rubefacient. Dose, ʒss to ʒj.

Guestonian embrocation for Rheumatism consists of ol. terebinth., ol. olive. aa ʒiiss acid sulph. dil. ʒiij.

OLEUM THEOBROMÆ CACAO EXPRESSUM, *Butter of cacao*—o. Tiglii, *Croton tiglium*—o. Vini, O. æthereum—o. Vitrioli, *Sulphuric acid*.

OLFACT'ION, *Olfactus*, from *olfacere*, for *odofacere*, (odor, and facere,) *Osphræsis*, *Odo-ratus*, *Sense of smell*, *Smelling*, (F.) *Odo-rat*. The sense by which we perceive the impressions made on the olfactory nerves by the odorous particles suspended in the atmosphere. The olfactory nerve, or 1st pair, has usually been considered the great nerve of smell; and it is probably the nerve of special sensibility, general sensibility being communicated by the branches of the 5th pair, distributed on the pituitary membrane of the nose and sinuses.

OLFACTORY, *Olfact'ivus*, *Olfact'orius*, *Osphrant'icos*, from *olfactus*, 'the smell.' That which belongs or relates to the sense of smell.

OLFACTORY FORAM'INA, (F.) *Trous olfactifs*, are the holes in the cribriform plate of the ethmoid bone, through which the olfactory nerve passes.

OLFACTORY NERVES, *Ethmoidal nerves*, (Ch.)

Par primum Nervorum cerebri, Nervi odoratorii, Processus mamillares, Processus mamillares cerebri ad naves. P. papillares, Carunculae mamillares,—the first pair of encephalic nerves. This nerve, which probably arises from the medulla oblongata, is observed to leave the brain, opposite the inner part of the fissure of Sylvius, by three roots; which, by their union, form a triangular knot or expansion. When it reaches the ethmoid fossa it expands and forms a triangular ganglion or grayish, soft bulb, which furnishes, from its inferior surface, the branches that have to be distributed to the nasal fossæ. These filaments are very numerous: they pass through the foramina in the cribriform plate and enter the nasal fossæ. They are distinguished into the *internal*, *external*, and *middle*. The former are distributed over the mucous membrane, covering the outer paries of the nasal fossæ; the second descend upon the septum, and the third are lost, almost immediately, on the portion of the pituitary membrane, that lines the vault of the fossæ.

OLFACTUS AMISSIO, Anosmia.

OLIBANUM, Juniperus lycia—o. Vulgare, see Pinus abies.

OLIGÆMIA, Anæmia, Hæmaporia, Hypæmia.

OLIGOCHYLUS, from *ολιγος*, 'little,' and *χυλος*, 'juice,' 'chyle.' An epithet for food which is but little nutritive; which furnishes little chyle.

OLIGO GALIA, Agalaxis.

OLIGOPO'SIA, from *ολιγος*, 'little,' and *ποσις*, 'drink.' Diminution in the quantity of drinks.

OLIGOSPONDYLUS; from *ολιγος*, 'few,' 'small,' and *σπονδυλος*, 'a vertebra.' A monster with defective vertebrae.—Gurlt.

OLIGOTROPHIA, *Parcior nutritio*; from *ολιγος*, 'little,' and *τροφω*, 'I nourish.' Deficient nourishment.

OLISTHEMA, Luxation.

OLIVA, Olea Europæa.

OLIVARIS, Olive-shaped.

OLIVE, see Olea Europæa—o. Tree, Olea Europæa.

OLIVES, PICKLED, Colymbades.

OLIVE-SHAPED, *Olivearis, Oliviformis*, from *olivæ*, 'an olive.' Resembling an olive. (See Corpora Olivariorum.)

CAUTÈRE OLIVAIRE, of the French surgeons, is a cautery whose extremity is terminated by a button, having the shape of an olive.

PROCESSUS OLIVARIS is a small ridge, running transversely between, and a little behind, the roots of the anterior clinoid processes of the sphenoid bone, which by some has been considered as a 4th clinoid process.

OLIVIER, Olea Europæa.

OLMITELLO, MINERAL WATERS OF. A thermal spring in the Isle of Ischia. Temperature, 100° Fahrenheit.

OLOPHLYCTIDE, Herpes.

OLOPHONIA, from *ολλω*, *ολλω*, 'I lose,' and *φωνη*, 'voice.' Congenital misconstruction of the vocal organs.—Good.

OLOPHONIA LABII LORATA, Harelip—o. Lingua frænata, see Ankyloglossum.

OM'AGRA, *Honi'agra*, from *ωμος*, 'the shoulder,' and *αγρα*, 'a prey.' Gout in the shoulder.

OMASUM, Omasus, Manyplies. The third stomach of ruminant animals.

OMBILIC, Umbilicus.

OMBILICALE, Umbilical.

OMBRAGE, Nebula.

OMENTA, Meninges.

OMENTESIS, Epiploitis.

OMENTITIS, Epiploitis.

OMENTUM, Epiploon—o. Colicum, Epiploon, colic—o. Gastro-colicum, Epiploon, gastro-colic—o. Gastro-splenic, Epiploon, gastro-splenic—o. Great, Epiploon, gastro-colic—o. Hepato-gastricum, Epiploon, gastro-hepatic—o. Lesser, Epiploon, gastro-hepatic—o. Majus, Epiploon, gastro-colic—o. Minus, Epiploon, gastro-hepatic—o. Ossium, Periosteum—o. Third, Epiploon, colic.

OMMA, Eye.

OMNIPHAGUS, Omnivorous.

OMNIV'OROUS, *Omnivorus, Omniph'agus*.

Pantoph'agus, from *omnis*, 'all,' and *toro*, 'I eat.' An epithet for animals which eat every kind of food,—animal or vegetable.

OMO-CLAVICULAR. See Coracoclaviclar.

OMOCOTYLE. See Glene.

OMO-HYOIDE'US, *Cor' uco-hyoide'us, Scapulo-hyoïdien, Omo-hyoïdien, Omoplat-hyoïdien, Hyoïdis Quartus Musculus*. This muscle is situate, obliquely, at the sides and front of the neck. It is slender, long, and flat. It arises from the superior costa of the scapula, near the semilunar notch, and from the ligament that runs across it, and is inserted at the sides of the inferior margin of the body of the os hyoides. It consists of two fasciculi, united by a common tendon, and is a true digastric muscle. It depresses the os hyoides, carrying it a little backwards, and to one side, except when it acts with its fellow, when the bone is depressed, and drawn obliquely backwards.

OMOPLATE, Scapula—o. *Col de l'*, Collum scapulae.

OMOPLAT-HYOIDIEN, Omo-hyoideus.

OMOS, Humerus.

OMOTARICHOS, from *ωμος*, 'the shoulder,' and *ταριχος*, 'pickled.' *Salsamentum crudum*; Salted Tunny Fish, in particular. Properly, the neck or shoulder piece of a salted animal. Once much recommended against the bites of vipers, and in hydrophobia.

OMOTOCIA, Abortion.

OMOTRIBES, *Omphac'inum O'leum*, from *ωμος*, 'crude,' and *τριβω*, 'I bruise.' Oil expressed from unripe olives.

OMPHAC'ION, *ομφακιον*, from *ομφακος*, 'an unripe grape';—*Succus uvæ acer' bæ*, *Omphac'ium*. The juice of unripe grapes. Also, *Verjuice*.

OMPHACITES (VINUM). A name given to wine prepared from the unripe grape. *Omphac'itis*, is also the name of a small gall.—Dioscorides.

OMPHACIUM, Verjuice.

OMPHACOM'ELI, from *ομφακος*, 'an unripe grape,' and *μελι*, 'honey.' A sort of oxymel, made of the juice of unripe grapes and honey.

OMPHALELC'OSIS, from *ομφαλος*, 'the navel,' and *ελκος*, 'an ulcer.' Ulceration of the navel.

OMPHALOCARPUS, Galium aparine.

OMPHALOCÉLE, Exomphalos.

OMPHALOMANTIA, from *ομφαλος*, 'the navel,' and *μαντια*, 'prophecy.' A species of divination, practised by credulous matrons, who pretend to be able to know the number of children a female will have, by the number of knots in the navel string of the child.

OMPHALO-MESERAIC, *Omphalo-mesenteric*.

OMPHALO-MESENTERIC, *Omphalo-mesentericus*, *Om'phalo-mesaru'icus*; from *ομφαλος*, 'the navel,' and *mesenterium*, 'the mesentery.'

OMPHALO-MESENTERIC VESSELS, *Vitello-mesenteric*, *Vitelline vessels*. Haller gave this name to two very fine vessels, which spread their ramifications on the parietes of the umbilical vesicle. There is an *omphalo-mesenteric artery* and *vein*. The *omphalo-mesenteric artery* is a branch of the superior mesenteric;—the vein empties itself into the trunk, or into one of the branches, of the superior mesenteric. Velpeau affirms, that they insinuate with a branch of the second or third order of those great vessels, with those in particular that are distributed to the cæcum, and he regards them to be the vessels of nutrition of the umbilical vesicle. They are occasionally met with in the fœtus, at the full period, under the form of whitish filaments, which extend from the mesenteric vessels to the umbilicus.

OMPHALONCUS, *Omphalophyma*.

OMPHALOPHYMA, *Omphalon'cus*, from *ομφαλος*, 'the navel,' and *φυμα*, 'tumour.' A tumefaction of the navel.

OMPHALORRHA'GIA, from *ομφαλος*, 'the umbilicus,' and *ρρηνναι*, 'I break out.' Hemorrhage from the umbilicus, in the new-born, in particular.

OMPHALOS, *Umbilicus*.

OMPHALOSITE, from *ομφαλος*, 'the navel,' and *σιτες*, 'nourishment.' A monster, which possesses an imperfect kind of life, that ceases when the umbilical cord is divided.

OMPHALOT'OMY, from *ομφαλος*, 'the umbilicus,' and *τεμνω*, 'I cut.' The division of the navel string.

ONANIA, *Masturbation*.

ONANISM, *Masturbation*.

ONCOS, *Tumour*.

ONCOSSES, from *ογκος*, 'a tumour.' Tumours, as diseases.

ONCOSIS, *Tumour*.

ONCOT'OMY, *Oncotom'ia*, from *ογκος*, 'a tumour,' and *τεμνη*, 'incision.' The opening of a tumour or abscess with a cutting instrument.

ONCTION, *Inunction*.

ONDULATION, *Fluctuation*.

ONEBERRY, *Paris*.

ONEIROCRITICUS, from *νειρος*, 'a dream,' and *κρισις*, 'judgment.' One, who judges according to dreams.

ONEIRODYN'IA, from *νειρος*, 'a dream,' and *δυνη*, 'pain.' Painful dreams. *Incubus* and *Somnambulism* are oneirodyniæ.

ONEIRODYSIA ACTIVA, *Paroniria*, *Somnambulism*—*o. Gravans*, *Incubus*.

ONEIRODYNIE GRAVATIVE, *Incubus*.

ONEIROG'MOS, *Oneirog'ynê*, *Oneiropol'esis*, from *νειρος*, 'a dream,' *A lascivious dream;—pollution*, (q. v.) nocturnal pollution.

ONEIROGONOS, *Pollution*.

ONEIROMANTIA, from *νειρος*, 'a dream,'

and *μαντια*, 'divination.' The art of divining by dreams; of interpreting them.

ONEIROPOLESIS, *Oneirogmos*.

ONERA ALVI, *Excrement*.

ONGLE, *Nail*.

ONGLEE, (F.) *Digit'orum stupor a gelû*.

Painful numbness at the extremities of the fingers, caused by cold.

ONGLET, *Pterygion*.

ONGUENT, *Unguentum—o. d'Althéa*, *Unguentum de Althæa—o. de Blanc de baleine*, *Unguentum cetacei—o. Blanc de Rhazes*, *Unguentum plumbi subcarbonatis—o. de Cérusse*, *Unguentum plumbi subcarbonatis—o. Citrin contre la gale*, *Unguentum hydrargyri nitratis—o. Digestif simple*, *Unguentum digestivum simplex—o. Gris*, *Unguentum oxidi hydrargyri cinereum—o. de Guimauve*, *Unguentum de althæa—o. de Laurier*, *Unguentum laurinum—o. Mercuriel*, *Unguentum hydrargyri—o. Napolitain*, *Unguentum hydrargyri—o. de Nitrate de mercure*, *Unguentum hydrargyri nitratis—o. de Poix et de cire*, *Basilicon—o. de Soltat*, *Martiatum unguentum—o. de Sureau*, *Unguentum sambuci—o. de Tornamira*, *Unguentum plumbi subcarbonatis*.

ONION, *COMMON*, *Allium cepa—o. Sea*, *Scilla*.

ONIS'CUS, *Asell'us*, *Cu'tio*, *Porcel'lio*. Diminutive of *ovos*, 'a small ass.' A genus of insects, very common in cellars and dark and moist places.

ONISCI ASELLI, *Millep'edes*, *Aselli*, *Millep'edæ*, *Wood-lice*, *Slaters*, *Hog-lice*, (F.) *Gloportes ordinaires*, had, at one time, a place in the pharmacopœias. They were considered stimulant and diuretic, and useful in jaundice.

ONITIS, *Origanum dictamnus*.

ONOMATOCLESIS, *Nomenclature*.

ONOMATOLOGIA, *Nomenclature*.

ONONIS ANTIQUORUM, *O. spinosa*.

ONONIS ARVEN'SIS, (F.) *Bugrane des champs*, has properties like the next.

ONONIS SPINOSA, *Resta bovis*, *Arresta bovis*, *Remora Ard'ri*, *Ononis antiquorum*, *Rest-harrow*, (F.) *Arrête-bœuf*, *Bugrande épincuse*, *Bugrane*. *Nat. Ord. Leguminosæ. Sex. Syst. Diadelphia Decandria*. The root of this plant was, once, used as a diuretic.

ONOPORDIUM ACANTHIUM, *Car'duus tomentosus*, *Acan'thium*, *Ac'anos*, *Cotton Thistle*. (F.) *Chardon aux Anes*. *Family, Cinarocephalæ. Sex. Syst. Syngenesia Polygamia æqualis*. The expressed juice has been recommended as a cure for cancer, applied externally.

ONYCHIA, *Paronychia*.

ONYCHOGRYPHO'SIS, *Onychogryp'o'sis*, *Onychogryp'o'sis*, from *ονυξ*, 'the nail,' and *gryposis*, (q. v.) *Curvature of the nails; such as occurs in hectic individuals*.

ONYCHON'OSI, *Onychon'u'si*, from *ονυξ*, 'a nail,' and *νοσος*, 'a disease.' *Diseases of the nails*.

ONYCHOPH'THORA, *Onychophtho'ria*, *Onycoph'thora*, *Onycophtho'ria*, from *ονυξ*, 'the nail,' and *φθορα*, 'degeneration.' *A degenerate condition or destruction of the nails*.

ONYCHOPHY'MA, from *ονυξ*, 'the nail,' and *φυμα*, 'a tumour.' *A painful degeneration of the nails, which become thick, rough, and crooked. It occurs as a symptom of syphilis and of lepra*.

ONYCHOPTOSIS, from *ονυξ*, 'a nail,' and *πτωσις*, 'falling.' The falling off of the nails.

ONYCOPHTHORA, Onychophthora.

ONYX, Nail, Pterygion. Also, a collection of purulent matter between the laminae of the cornea, having the shape of a nail.

OOEIDES, Aqueous humour.

OOLOG'IA, *Ovolog'ia*, *Ovolog'y*, from *ovon*, 'an ovum or egg,' and *λογος*, 'a discourse,' 'a description.' A description of the ovum.

OON, Ovum.

OOPHORITIS, Ooritis.

OOPHORON, Ovary.

OORITIS, Oaritis.

OPAC'ITY, *Opac'itas*, from *opacare*, 'to obscure.' Quality of that which is opaque. The property, possessed by some bodies, of not allowing the light to traverse them. It is opposed to transparency. *Opacity of the cornea* constitutes *albugo* or *leucoma*;—opacity of the crystalline causes cataract.

OP'ALINE. That which resembles the opal. A fluid is said to be opaline, when milky, and when it presents an appearance more or less like that of the opal.

OPAQUE, *Opac'us*. An epithet given to bodies, which do not permit the passage of rays of light. The *opaque cornea* is the sclerotica, in contradistinction to the *transparent cornea* or true cornea.

OPERATIO, Action.

OPERATION, *Opera'tio*, from *opus*, 'work.' The application of instruments to the human body with the view of curing disease. The object of operations is generally to divide or reunite parts, to extract extraneous or noxious bodies, and to replace organs that are wanting, by different instruments or artificial means. The principal operatory methods have been called *Synthesis*, *Diæresis*, *Exæresis*, and *Prothesis*, (q. v.) Frequently, the most difficult subject, connected with an operation, is to decide when it is absolutely called for or advisable, and when it is improper.

CHYMICAL or PHARMACEUTICAL OPERATION is any process, whose object is the preparation of medicines; their combinations with each other, analysis, and decomposition;—such are, *solution*, *distillation*, *sublimation*, *evaporation*, *digestion*, *maceration*, *infusion*, *decoction*, *calcination*, &c. Some of these operations are mechanical; others, really chymical.

OPERATION, BILATERAL, see Lithotomy—o. *Césarienne*, Cæsarean section—o. High, see Lithotomy—o. Lateral, see Lithotomy—o. Sigaultian, Symphyseotomy.

OPERATOR. A surgeon, who is in the habit of practising the greater operations. One who performs any operation. To be a good operator, the surgeon must be well acquainted with anatomy, and be possessed of strong nerve. See Surgeon.

OPERCULUM ASPERÆ ARTERIÆ, Larynx—o. *Ilei*. Bauhin, valve of.

PERIMENTUM PRÆTENSUM ABDOMINIS, Peritonæum.

OPHIASIS, Calvities.

OPHIOGLOSSUM VULGATUM, *Echiogloss'um*, *Lingua serpentaria*, *Adder's Tongue*, (F.) *Langue de Serpent*. Family, Filicoidæ. *Sec. Syst.* Cryptogamia. This plant was formerly considered to be vulnerary.

OPHIOPHAGUS, from *οφις*, 'a serpent,'

and *φαγω*, 'I eat.' An epithet for animals, which feed on serpents. Pliny has called certain African tribes by this name.

OPHIORRHIZA MUNGOS, from *οφις*, 'a serpent,' and *ρίζα*, 'root.' Family, Gentianeæ. *Sec. Syst.* Pentandria Digynia. The name of the plant whose root has been called *Radix Serpentum*, *Mungos Radix*. The bitter root is much esteemed in Java, Sumatra, &c. for preventing the effects that usually follow the bite of the *naja*, a venomous serpent; with which view it is eaten by the natives. It is, also, a reputed anthelmintic.

OPHIOX'YLUM, from *οφις*, 'a serpent,' and *ξύλον*, 'wood.' Serpentine-wood plant.

OPHIOXYLUM SERPENTINUM, *Acave'ria*, *Lignum serpentum*, has also been recommended in the bites of serpents, and in intermittents. It is said to be very bitter.

OPHIS, Serpent.

OPHITES, from *οφις*, 'a serpent,' *Serpentinus*, *Serpentine* or *Black Porphyry*. This rock was, formerly, worn as an amulet to cure diseases of the head.

OPHROSTAPHYLON, *Bryonia alba*.

OPHRY, *Supercilium*.

OPHTHALMAL'GIA, from *οφθαλμος*, 'the eye,' and *αλγος*, 'pain.' Pain in the eye.

OPHTHAL'MIA, *Ophthalmi'tis*, from *οφθαλμος*, 'the eye.' *Oculo'rum inflamma'tio*, *Cauma ophthalmitis*, *Ophthalmopo'nia*, *Inflamma'tio of the Eye*, *Ophthalm'y*, (F.) *Ophthalmie*, *Ophthalmie*, *Inflammation de l'œil*, *Catarrhe oculaire*. Three great varieties of ophthalmia, independently of the *acute* and *chronic* (which conditions occur in all inflammations,) may be reckoned:—the *Ophthalmia membranarum*, *O. purulenta*, and *O. tarsi*. The first is characterized by the general symptoms of ophthalmia;—pain and redness of the eye or its appendages; with intolerance of light, and unusual flow of tears: the inflammation being seated chiefly in the coats of the eyeball. It is the *Ophthalmia tarax'is*, *Conjunctivitis*, *Inflamma'tio conjunctivæ*, *Catarrhal ophthalmia*, *Ophthalmo-conjunctivitis*, *O. h'mida*, *O. cæra*, *Epiph'ora* (Galen,) *Conjunctival Ophthalmia*, *Taraxis*, (Paulus of Ægina,) *Chemo'sis* (Aëtius,) *O. Chemosis*, *Lachrymose Ophthalmia*, (F.) *Conjunctivite*, *Inflammation de la conjonctive*. In the second—*Ophthalmia purulen'ta*, *Blennophthal'mia*, *Bleph'aroblennorrhæ'a*, *Ophthalmoblennorrhæa*, *Blennorrhæa oculi*—the internal surface of the palpebræ associates in the inflammation of the eye-ball; and there is a copious secretion of a purulent fluid. An epidemic and contagious (?) variety of this is the *Ægyptian Ophthalmia*, *Ophthalmia epidem'ica*, *O. purulen'ta epidem'ica*, *O. contagiosa*, *O. bellica*, *O. Asiatica*, *Blennorrhæ'a Oculi Ægyptiaca*, *Ophthalmie puriforme des nouveau-nés*,—called *Egyptian*, from its prevalence in Egypt during the British expedition under Sir Ralph Abercromby. The inflammation, here, is rapid and destructive; granulations shoot from the tunica conjunctiva, and occasionally there is intolerable pain, often succeeded by delirium. In new-born children, a species of purulent ophthalmia, *O. purulen'ta infantum*, *O. neonatorum*, *Blephrophthal'mia neonatorum*, *Lippitu'do neonatorum*, *Blennorrhæ'a Oculi neonatorum*, in which the palpebræ are florid and peculiarly tumid, is by no means uncommon. It seems to be caused by acrid

discharges from the mother, applied to the eye of the infant during its exit; or to the stimulus of the light, when the child first opens its eyes. A severe form of purulent ophthalmia—*Hyper-conjunctivitis* (Piorry)—is produced by the application of gonorrhœal matter to the eye. It is the *Ophthalmia gonorrhœica*, *Blennorrhœa oculi gonorrhœica*, *Conjunctivitis blennorrhœica*, *Gonorrhœica*, *Gonorrhœal Ophthalmia*, (F.) *Ophthalmie blennorrhagique*, *Conjunctivitis blennorrhagique*.

Ophthalmia is likewise modified by the condition of the constitution, and hence we have *strumous*, *variolous* and other inflammations of the conjunctiva.

The third variety—the *Ophthalmia Tarsi*, *Blepharophthalmia*, *Blepharitis*, *Blepharotitis*, *Blepharitis*, *Psorophthalmia*, *O. glutinosa*, *Oculi palpebrarum scabiei pruriginosa*, *Adenophthalmia*—is seated chiefly in the tarsus; the sebaceous crypts secreting a viscid and acrid fluid, that glues and ulcerates its edges, and irritates the eye.

Ophthalmia Membranarum, when slight, requires little treatment: the antiphlogistic regimen—and, particularly, avoiding exposure to light,—being all that is necessary. When more severe, along with this, general and local blood-letting, especially by leeches to the sides of the septum narium, must be employed, so as to make a decided impression on the system, with nauseating doses of antimony, purgatives, blisters (at some distance from the organ,) refrigerants; and astringents, cold or warm, according to circumstances, to the eye. In *Purulent Ophthalmia*, these measures must be still more actively employed, otherwise disorganization will speedily follow:—the granulations, which form on the adnata of the eyelids, may be removed with the scissors, and the sore touched with a solution of alum. *Ophthalmia Tarsi* must be treated on general principles, when severe. It usually, however, requires merely the antiphlogistic regimen, with the occasional use, especially at night, of a slightly stimulating ointment; such as the unguentum hydrargyri nitrico-oxydi, considerably reduced with lard. The ointment prevents the eyelids from being glued together during the night, and thus obviates the irritation caused by attempts at separating them.

OPHTHALMIA ASIATICA, see *Ophthalmia*—*o.* Bellica, see *Ophthalmia*—*o.* Catarrhal, see *Ophthalmia*—*o.* Chronica, Lippitudo—*o.* Contagiosa, see *Ophthalmia*—*o.* Epidemica, see *Ophthalmia*—*o.* Gonorrhœica, see *Ophthalmia*—*o.* Gonorrhœal, see *Ophthalmia*—*o.* Neonatorum, see *Ophthalmia*—*o.* Phlyctenular, *O. strumous*—*o.* Purulenta epidemica, see *Ophthalmia*—*o.* Purulenta infantum, see *Ophthalmia*—*o.* Rheumatic, Scleritis—*o.* Sicca, Xerophthalmia—*o.* Variose, Girsophthalmia.

OPHTHALMIATER, Oculist.

OPHTHALMIC, *Ophthalmicus*, from *οφθαλμος*, 'the eye.' That which relates or belongs to the eye.

OPHTHALMIC ARTERY, *A. orbitaire*, (Ch.) arises from the internal carotid, and issues from the cranium by the foramen opticum. At first, it is situate at the outer and lower side of the optic nerve, but ascends above this nerve, and passes towards the inner angle of the orbit. It furnishes, in its course, the *lachrymal*, *centralis* re-

tinæ, *infra-orbitaris*, *ciliaries*, *anterior ciliaries*, *inferior and superior musculars*, *anterior and posterior ethmoidals*, and *superior and inferior palpebrals*. After having given off these, it divides into two branches—the *frontal* and *nasal*, which furnish a number of ramifications,—some superficial, others deep seated.

OPHTHALMIC GANGLION, *Lenticular G.*, *G. orbitaire*, (Ch.) is one of the smallest ganglions of the body. It is situate at the outer side of the optic nerve, near the bottom of the orbit; is irregularly quadrilateral and flat: its colour being of a reddish gray. Behind, it communicates by its posterior angles—by means of nervous filaments—with the nasal nerve of the ophthalmic and the motor oculi. Each of its anterior angles furnishes a fasciculus of small nerves. These are the ciliary nerves.

OPHTHALMIC NERVE, or *Ophthalmic Nerve* of Willis, *Orbital frontal*, (Ch.) is the smallest and first of the three branches given off by the 5th pair. It proceeds along the external paries of the cavernous sinus, and enters the orbit by the sphenoidal fissure. It divides into three branches: one, *external*—the lachrymal nerve; another, *superior*—frontal nerve, and the last, *internal*—the nasal nerve. See *Lachrymal*, *Frontal*, *Nasal*.

OPHTHALMIC OR OPTIC REMEDY, (F.) *Topique ophthalmique*, is a medicine employed in ophthalmia.

OPHTHALMIC VEIN has the same arrangement as the artery, which it accompanies in all its divisions. It issues from the orbit at the inner part of the sphenoidal fissure, and discharges its blood into the cavernous sinus.

The name *Facial Ophthalmic* has been given to the branch, by which the facial vein communicates with the ophthalmic.

OPHTHALMICA, *Euphrasia officinalis*.

OPHTHALMICI EXTERNI, *Motores oculorum*.

OPHTHALMIE PURIFORME DES NOUVEAUX-NÉS. See *Ophthalmia*—*o.* *Blennorrhagique*. See *Ophthalmia*.

OPHTHALMITE, *Ophthalmia*.

OPHTHALMITIS, *Ophthalmia*. This term is occasionally restricted to inflammation of the globe of the eye, in which both the external and internal structures are involved.

OPHTHALMO-BLENNORRHOEA, *Ophthalmia* (purulent.)

OPHTHALMO-CARCINOMA, from *οφθαλμος*, 'the eye,' and *καρκινωμα*, 'cancer.' Cancer of the eye.

OPHTHALMOCELE, *Exophthalmia*.

OPHTHALMODYNIA, from *οφθαλμος*, 'the eye,' and *δυστη*, 'pain,' especially rheumatic pain of the eye. Fleuck has given this name to neuralgia of the frontal nerve, in which the pain irradiates, particularly towards the bottom of the orbit. See *Neuralgia*, *Frontal*.

OPHTHALMODYNIA PERIODICA, *Neuralgia*, *facial*.

OPHTHALMOGRAPHY, from *οφθαλμος*, 'the eye,' and *γραφη*, 'a description.' The part of anatomy which gives a description of the eye. An anatomical description of the eye.

OPHTHALMOLOGY, *Ophthalmologia*, (F.) *Oculistique*, from *οφθαλμος*, 'the eye,' and *λογος*, 'a discourse.' The part of anatomy which treats of the eye. An anatomical treatise

on the eye. A description of the eye in health and in disease.

OPHTHALMOMETER, from *οφθαλμος*, 'the eye,' and *μετρον*, 'measure.' An instrument of the nature of compasses, invented by F. Petit, for measuring the capacity of the anterior and posterior chambers of the eye in anatomical experiments.

OPHTHALMOPLEGIA, from *οφθαλμος*, 'the eye,' and *πλησσω*, 'I strike.' Paralysis of one or more of the muscles of the eye.

OPHTHALMOPONIA, Ophthalmia.

OPHTHALMOPTO'SIS, from *οφθαλμος*, 'an eye,' and *πτωσις*, 'a prolapse.' A word employed by some authors in the sense of exophthalmia (q. v.): by others, in that of hydropthalmia (q. v.).

OPHTHALMORRHA'GIA, from *οφθαλμος*, 'the eye,' and *εξηγυμι*, 'I break forth.' Hemorrhage from the tunica conjunctiva. It is rare.

OPHTHALMOS, Eye.

OPHTHALMOSCOP'IA, from *οφθαλμος*, 'the eye,' and *σκοπεω*, 'I regard attentively.' The art of judging of the temperament, &c. of a person, by examining his eyes. The art of judging of health or disease by inspection of the eyes.

OPHTHALMOSTATUM, from *οφθαλμος*, 'the eye,' and *στασις*, 'station.' *Speculum Oculi*. An instrument for fixing the eye.

OPHTHALMOTOMY, *Ophthalmotomia*, from *οφθαλμος*, 'the eye,' and *τεμνω*, 'I cut.' The part of anatomy which treats of the dissection of the eye. It has, also, been applied to extirpation of the eye.

OPHTHALMOXY'SIS, from *οφθαλμος*, 'the eye,' and *ξυω*, 'I scrape.' A name given to the scarifications sometimes practised on the conjunctiva, in cases of ophthalmia.

OPHTHALMOXYSTRUM. An instrument for scraping the eye. Name given to a small brush, with barbs like an ear of barley or rye, intended to scarify the eyelids in certain cases of ophthalmia.

OPI'ANE, Narcotine.

OPIAT, Opiate—o. *Dentifrice*, Dentifrice.

OPIATE, *Opiatum*, (F.) *Opiat*, from *οπιον*, *επος*, 'juice,' 'opium.' A medicine containing opium. A medicine that procures sleep. An electuary. Formerly, an electuary, which contained opium. In this sense, the *Codex* of Paris retains it.

OPIATUM FEBRIFUGUM,—*Electuarium de Kinâ-Kinâ*; *Electuary of Cincho'na*. (Pulv. cinch. ʒxxvij, ammon. muriat. ʒi, mellis, syrup. absinth. aa ʒij. Make into an electuary. Ph. P.) Given, when cinchona is indicated.

OPIATUM MESENTERICUM, *Electuarium de Aloë, Mirriatâ Hydragryri et Ferro*. (Gum. ammon. ʒss, sennæ ʒvj, hydrargyri submuriat. rad. ari. aloës socotrin. aa ʒij, pulv. scammon. comp. (vulg. de tribus,) rhej. rad. aa ʒijj, ferri linatur. porphyrisat. ʒss. Bruise and mix together, add compound syrup of apples double the weight of the other matters, and make into an electuary. Ph. P.) Dose, ʒss to ʒij, in obstructions of the liver, mesentery, &c.

OPION, Opium.

OPISTHENAR, *οπισθεναρ*, from *οπισθε*, 'backwards,' and *εναρ*, 'the flat of the hand.' The back of the hand.

OPISTHOCEPHALON, Occiput.

OPISTHOCRANIUM, Occiput.

OPISTHOCYPHOSIS, Cyphoma.

OPISTHOTONOS, *Raptus posterganeus*, *Tetanus dorsalis*, *T. posticus*, *T. posterganeus*, from *οπισθε*, 'backwards,' and *τεινω*, 'I stretch.' A species of tetanus, in which the body is bent backwards.

OPIUM, see Papaver.—o. *Colatum*, *Extractum opii*—o. *Depuratum*, *Extractum opii*.

OPOBALSAMUM. See *Amyris opobalsamum*.

OPOCARPASON, *Carpasium* (juice.)

OPODELDOCH, *Opodeltoch*. An unmeaning term, frequently used by Paracelsus. Formerly, it signified a plaster for all external injuries; now, it is applied to the *Linimentum Saponis Compositum*, (q. v.).

OPODELDOCH, *STEER'S*. A liniment, called after the inventor. There are many formulæ for its preparation. The following is one. *Sap. alb. lbj, camphor ʒij, ol. rosmarini f. ʒiv, spiritus vini rectificati Oij*. See *Linimentum Saponis Compositum*.

OPODYMUS, *Diprosopus*.

OPOIOS, Optic.

OPOPONACUM, *Pastinaca opoponax*.

OPOPONAX. See *Pastinaca opoponax*.

OPOPONAXWORT, *Pastinaca opoponax*.

OPO'RICE, from *οπωρα*, 'autumnal fruits.'

A medicine, composed of several autumnal fruits, particularly of quinces, pomegranates, &c. and wine. It was formerly administered in dysentery, diseases of the stomach, &c.

OPOS, *Extract—o. Silphion*, *Laserpitium*.

OPPIDULUM, *Vulva*.

OPPILATIO, *Emphraxis*.

OPPILATIVUS, *Obstruens*.

OPPO'NENS, (F.) *Opposant*, *ob*, and *ponere*, 'to place.' That which faces or is put in opposition to something. The name has been given to two muscles of the hand.

OPPONENS MINIMI DIGITI, *Carpometacarpian du petit doigt* (Ch.) *Métacarpian du petit doigt*, (F.) *Opposant du petit doigt*. This muscle has the same shape and arrangement as the preceding, but is of less size. It is situate in the hypothenar eminence. Its fibres are inserted into the anterior annular ligament of the carpus, and terminate on the whole length of the inner edge of the 5th metacarpal bone. This muscle carries the 5th metacarpal bone forwards, and outwards, and thus augments the concavity of the palm of the hand.

OPPONENS POL'ICIS, *Flexor ossis metacarpi pollicis*, *Opponens pollicis manus*, *Flexor primi interossei* (Douglas), *Antithenar sive semi-interossei pollicis*, *Carpometacarpian du pouce* (Ch.), *Métacarpian du pouce*, (F.) *Opposant du Pouce*. A small, flat, triangular muscle, situate in the substance of the thenar eminence. It is attached, on the one hand, to the anterior annular ligament of the carpus and to the trapezium; and, on the other, to the whole of the outer margin of the first metacarpal bone. This muscle impresses on the first bone of the metacarpus a movement of rotation, which opposes the thumb to the other fingers.

OPPOSANT, *Opponens—o. du petit doigt*, *Opponens minimi digiti—o. du pouce*, *Opponens pollicis*.

OPPRESSION, *Catalepsy—o. Nocturna*, *Incubus*.

OPPRESS'ION, *Oppres'sio*, *Thlipsis*, *Cata-*

thlipsis, from *opprimere*, (*ob*, and *primere*, *pressum*), 'to press against.' A state, in which the patient experiences a sensation of weight in the part affected. When employed abstractedly, it means, particularly, *oppression of the chest*—*Oppressio Pectoris*, (F.) *O. de Poitrine*.

OPPRESSION, (F.) *Oppression des forces*, *Oppressio virium*, is, also, used for that condition, at the commencement of fevers, &c., in which the system is oppressed rather than debilitated, and where the vascular action rises, as the obstruction to free circulation is relieved by bleeding, purging, &c.

OPS, Eye.

OPSIALGIA, Neuralgia, facial.

OPSIONUSI, from *opsis*, 'vision,' and *nosos*, 'a disease.' *Morbi visus*. Diseases of vision.

OPSIS, Vision.

OPSOMANIAC, *Opsom'anes*, (F.) *Opsomane*, from *opsis*, 'aliment,' and *mania*. One, who loves some particular aliment to madness.

OPTESIS, Assatio.

OPTIC, *Opticus*, *Op'pios*, from *optouai*, 'I see.' That which relates to vision.

OPTIC FORAMEN, *Fora'men opticum*, (F.) *Trou optique*. A round opening in the sphenoid bone, near the base of its lesser ala, through which the optic nerve passes.

OPTIC NERVE, *Nervus opticus*, *Par secundum seu opticum seu visorium*, *Nerve of the 2d pair*, *Nervus visivus seu visorius*, *Ocular nerve of Chaussier*. These nerves are remarkable for their size; for their running a longer course within than without, the cranium; and for their furnishing no branch from their origin to their termination. They do not seem to arise, as was long supposed, from the optic thalami, but from the tubercula quadrigemina. Immediately after their origin they proceed forwards; are, at first, broad and flat; but afterwards become narrower and round. In front of the fossa pituitaria, they unite and decussate, each nerve proceeding through the optic foramen with the ophthalmic artery. The nerve passes to the back part of the globe of the eye, becomes narrower, and enters that organ to give rise to the nervous expansion called the Retina, (q. v.) Besides its neurilema, the optic nerve is surrounded by a sheath, furnished by the dura mater. This accompanies it as far as the eye.

The optic nerve is the nerve of special sensibility of the eye.

OPTICO-TROCHELI-SCLÉROTICIEN, *Obliquus superior oculi*.

OPTILOS, Eye.

OPUNTIA, Cactus opuntia.

OR, Gold.

ORA SERRATA, see Ciliary (Body.)

ORACH, *STINKING*, *Chenopodium vulvaria*.

ORANGE, FLOWERS OF THE, see *Citrus aurantium*—o. Tree, *Citrus aurantium*.

ORANGEADE (F.) A drink, made with orange juice diluted with water. It is antiphlogistic, and often recommended in acute diseases.

ORANGES, see *Citrus aurantium*—o. Curassoa, *Aurantia Curassaventia*.

ORBICULAIRE DES LEVRES, *Orbicularis oris*—o. *des Paupières*, *Orbicularis palpebrarum*.

ORBITULAR, *Orbicul'ris*, from *orbis*, 'a circle.'

ORBITULAR BONE, *Os Orbicul'rè seu lenticulārè seu Sylei seu orbicul'rè Syl'cii*, *Glob'ulus stapedis ossis*, *Epiph'ysis cruris longioris incudis*; is the smallest of the four bones of the ear. It is scarcely perceptible, round, convex on two surfaces, and situate between the long ramus of the incus and the head of the stapes.

ORBITULAR MUSCLES are muscles with circular fibres surrounding some natural opening of the body. 1. *Orbicul'ris Oris*, *Sphincter Labio'rum*, *Semi vel Demi-orbicul'ris*, *Supra-semi-orbicul'ris*, *Constrictor Oris*, *Labial'is*, *Osculat'rius*, *Basia'tor*, (F.) *Labial*, *Orbiculaire des lèvres*. A muscle situate in the substance of the lips, and, extending from one commissure to the other. It is formed of two very distinct portions, of a semi-oval shape; one belonging to the upper lip, the other to the lower. Their extremities cross at the commissures, and are confounded with the other muscles of the parts. The use of this fleshy muscle is to bring the lips together, and to close the aperture of the mouth, by making it represent a sort of *Bourrelet* (q. v.) with radiated wrinkles. It is an antagonist to every other muscle of the lips. *Orbicularis Palpebrarum*, *Orbicularis oculi*, *Orbicularis palpebrarum ciliaris*, *Palpebrarum duo muscoli*, *Maxillo-palpebr'al*, *Palpebra'tis*, *Constrictor palpebrarum*, *Sphincter Palpebrarum seu Oculi*, *Naso-palpebr'al* (Ch.), (F.) *Palpebr'al*, *Orbiculaire des paupières*. A muscle common to both the eyelids, and seated in their substance. It is broad, thin, transversely oval, and cleft in its great diameter. It is attached to the nasal process of the superior maxillary bone; to the internal angular process of the frontal bone, and to the orbital process of the superior maxillary bone. From these origins the muscle passes outwards, under the skin of the eyelids, surrounding the orbit in a circular manner, extending somewhat beyond it, and covering the upper part of the cheek. It is inserted into the skin of the eyelids, its upper and inner edge being intimately connected with the frontal and corrugator muscles. Its use is to close the eye, by bringing the eyelids together. The part of the orbicularis, which covers the cartilages of the eyelids, and which is remarkably thin, is the *Musculus Ciliaris* of some authors.

ORBITULARIS OCULI, *O. palpebrarum*—o. *Recti*, *Sphincter ani externus*.

ORBIT, *Or'bita*, *Troch'ia*, from *orbis*, 'a circle.' The circular cavities so called, which lodge the organs of sight. The *orbis* or *orbital fossæ* or *cavities*, *conchi*, *σχηματα*, are situate at the upper part of the face, and are composed of seven bones, viz:—the *frontal*, above; the *palate* and *superior maxillary*, below; the *sphenoid* and *malar*, externally, and the *ethmoid* and *lachrymal*, internally. The orbit is filled by the globe of the eye, with its different accessory parts—muscles, nerves, vessels, the lachrymal gland, &c.

ORBITAL FISSURE, SUPERIOR, *Sphenoidal fissure*—o. *Fissure*, inferior, *Maxillary fissure*.

ORBITAR, *Orbita'rius*, *Orbita'lis*; same etymon. Relating or belonging to the orbit.

ORBITAR APOPH'YES or *Proc'esses* terminate the two extremities of the orbital arch. The *external* is much more prominent, and is articulated with the cheek bone; the *internal* is thinner, and joins the os unguis.

ORBITAR ARCH, (F.) *Arcade orbitaire*, is the projecting, round margin, which separates the *frontal* and *orbital* surfaces of the *os frontis*; and forms a part of the circumference of the orbit.

ORBITAR FISSURES, (F.) *Fentes orbitaires*. These are situate in the orbit. They are two in number: one *superior*, the *Sphenoidal*, (q. v.); the other *inferior*, *Spheno-maxillary*, (q. v.)

ORBITAR FORAM'INA. Of these there are several:—1. The *Foramen orbitarium superius*, (F.) *Trou orbitaire supérieur*, is situate at the junction of the inner third of the orbital arch with its two outer thirds, and gives passage to the frontal nerve. 2. The *Foramina orbitalia interiora vel interna*, *Foramina ethmoidæa*. These are situate at the upper part of the internal paries of the orbit, and are formed by the union of two notches of the *os frontis* with two similar ones of the *ethmoid*; and are distinguished into *anterior* and *posterior*. The former gives passage to the ethmoidal filament of the nasal nerve and to a small artery.

ORBITAR NERVE, *Nervus orbit'alis seu orbital'is*, is a branch given off from the superior maxillary. It enters the orbit by the sphenomaxillary fissure, and divides into two filaments; the one—*malar*—which passes over the cheek bone, is distributed to the *orbicularis palpebrarum*, and anastomoses with the facial nerve; the other—*temporal*—which passes to the temporal fossæ, and anastomoses with the inferior maxillary and facial, to become afterwards subcutaneous.

ORBITO-EXTUS-SCLÉROTICIEN, *Rectus externus oculi*—o. *Intus-scléroticien*, *Rectus internus oculi*—o. *Maxillo-labial*, *Levator labii superioris proprius*—o. *Palpébral*, *Levator palpebræ superioris*—o. *Sus-palpébral*, *Levator palpebræ superioris*.

ORCANETTE, *Achusa officinalis*.

ORCHEA, *Scrotum*,

ORCHEOCATABASIS, *Orchidocatabasis*.

ORCHEOCELE, *Orchiocèle*.

ORCHEOTOMY, *Castration*.

ORCHESTROMANIA, *Chorea*.

ORCHIDOCATAB'ASIS, *Orcheocatab'asis*, from *ορχις*, 'the testis,' and *καταβασις*, 'descent.' The descent of the testes into the scrotum.

ORCHIDOCELE, *Hernia humoralis*.

ORCHIDONCUS, *Hernia humoralis*.

ORCHIDOTOMY, *Castration*.

ORCHILL, *Lichen roccella*.

ORCHIOCE'LE, *Orcheocel'le*, from *ορχις*, 'the testicle,' and *ρηγη*, 'a rupture.' A tumour of the testicle. *Hernia humoralis*, (q. v.) A name given to several diseases of the testicles and its envelopes, essentially differing from each other.

ORCHIS, *Testicle*—o. *Butterfly*, *O. bifolia*.

ORCHIS MAS'cula, *Satyri'on*, *Male Orchis*, *Testic'ulus can'nus*, *Cynosor'chis*, *Dogs' stones*, *Male Fools' stones*. The root has had a place in some pharmacopœias, on account of the glutinous, slimy juice it contains. The root of the *Orchis bifolia* or *Butterfly orchis* has likewise been collected. It has been used as a demulcent. Its fancied aphrodisiac virtues seem to be owing to its resemblance to *ορχις*, 'a testicle,' whence its name.

Salep is obtained from a variety of the orchis;—the *Orchis morio*. See *Salep*.

ORCHITIS, *Hernia humoralis*,

ORCHOI, See *Tarsus*.

ORCHOTOMIA, *Castration*.

ORDINAIRES, *Menses*.

ORDONNANCE, *Formula*, *Prescription*.

OREILLE D'HOMME, *Asarum*—o. *de Souris*, *Hieracium pilosella*.

OREILLETTE, *Asarum*, *Auricle of the heart*.

OREILLOX, *Parotis*, *Cynanche parotidæa*.

ORELIA GLANDIFLORA, *Allamanda*.

OREOSELINUM, *Athamanta aureoselinum*—o. *Africanum*, *Bubon galbanum*.

OREXIS, *Appetite*.

ORGAN, *Organum*, *Organon*. 'An instrument.' Part of an organized being, destined to exercise some particular function. Thus—the eyes are organs of sight; the muscles are organs of motion, &c. The collection of organs, which concur in any function, is called *apparatus*, (q. v.)

ORGANA GENERATIONI INSERVIENTES, *Genital organs*.

ORGANES GÉNITAUX, *Genital organs*.

ORGAN'IC, *Organ'icus*, relating to an organ or organs. It is also used synonymously with *vital*, in contradistinction to *physical*.

ORGANIC DISEASES or LESIONS are such as concern the organ itself; in contradistinction to *functional*, which merely concern the function. Of course, *organic* diseases of a part are always more serious than *functional*.

ORGANISM. Same etymon. The living economy. Many physiologists have used this word synonymously with *organization*; but more especially to designate the aggregate of forces which govern organized beings, animals as well as vegetables.

ORGANIZA'TION. *Organisa'tio*, from *οργανος*, 'an organ.' The manner of structure proper to different beings. The collection of parts composing an organized body, and the laws which govern it. It is also employed in the sense of the structure of a part; as, the *organization of the heart*, &c.

ORGANIZATION, COMPOUNDS of, Principles, *immediate*.

ORGANIZED, *Organis instructus*. That which is composed of organs.

ORGANIZED BODIES, (F.) *Corps organisés*, are those endowed with life; i. e. animals and vegetables; in opposition to *inorganic* bodies which term comprises the mineral kingdom.—See *Corpus*.

ORGANOGEN'ENY, *Organogen'ia*; from *οργανον*, 'an organ,' and *γενεσις*, 'generation.' The doctrine of the formation of the different organs.

ORGANOGRAPHY, *Organograph'ia*, from *οργανον*, 'an organ,' and *γραφη*, 'a description.' A description of the organs of a living body.

ORGANOLOGY, *Anatomy*, *Craniology*.

ORGANON OLFACTUS, *Nasus*.

ORGASM, *Orgas'mus*, *Orgo'sis*, from *οργαω*, 'I desire ardently.' State of excitement and turbulence of any organ whatever. Applied particularly to the genital organs.

ORGASMUS, *Turgescence*.

ORGAS'TICA. Same etymon. The second order of the glass *Genetica* of Good. Defined: diseases affecting the orgasm; organic or constitutional infirmity disordering the power or the desire of procreating.

ORGE, *Rage*.

ORGE, Hordeum.—o. *Perle*, see Hordeum.

ORGEAT, Syrupus Amygdalæ.

ORGELET, Hordeolum.

ORGEOLET, Hordeolum.

ORGOSIS, Orgasm.

ORICHALCUM, Brass.

ORICULAR, Auricular.

ORICULE, Pavilion of the ear.

ORIFICIUM DEXTRUM VENTRICULI,

Pylorus.

ORIGANUM, *Origanum vulgare*, *Cunila bulbula*, *Marjorana mancurd'na*, *O. heracleoticum*, *Zazarhen'di herba*, *Wild marjoram*, *Common marjoram*, *Mancur'd'na*, (F.) *Pied de lit*. Family, Labiate. *Ser. Syst.* *Didynamia Gynnosperma*. This plant resembles marjoram in smell; and has a pungent taste, much like thyme. It is aromatic and stimulant; and its oil possesses the properties of the essential oils in general. The oil—*oleum origani*. Ph. U. S.—is very pungent, and is rarely given internally. It is used in toothache.

ORIGANUM AQUATICUM, *Eupatorium cannabinum*—o. *Creticum*, *O. dictamnus*.

ORIGANUM DICTAMNUS, *Dictamnus Creticus*, *O. Creticum*, *Oni'us*, *Dict'any of Crete*, (F.) *Dictanne de Crête*. The leaves of this plant were once recommended as emmenagogue and a lexi-pharmic.

ORIGANUM HERACLEOTICUM, *Origanum*.

ORIGANUM MAJORANA, *Marjorana*, *O. majoranoides*, *Majorana*, *Sicet marjoram*, *Samp'sucus*, *Agriorig'anum*, *Amar'acus*, (F.) *Marjolaine*. Its odour is strong and fragrant; taste aromatic and bitterish. Its properties are those of a stomachic and emollient. It is chiefly used, however, for culinary purposes, and as a snuff in headache.

ORIGANUM SYRIACUM, *Teucrium marum*.

ORIGINAIRE, (F.) from *origo*, 'origin.' This term has been used, by French writers, in the same sense as *congenital*. It is particularly applied to affections depending upon faulty conformation, or to faulty conformation itself.

ORME, Appetite.

ORME, Ulmus.

ORMSKIRK MEDICINE. A celebrated antilyssic remedy, supposed to consist of *Pulv. Cretæ*, $\frac{3}{4}$ ss; *Bol. Armen.* $\frac{3}{4}$ ij; *Alumin.* gr. x; *Pulv. Inulæ* $\frac{3}{4}$ j; *Ol. Anisi*, gutt. vj.

This is taken for a dose every morning for six times, in a glass of water, with a small proportion of fresh milk.

ORNITHOGALUM MARITIMUM, *Scilla*.

ORNUS EUROPEA, see *Fraxinus Ornus*—o. *Sylvestris*, *Fraxinus excelsior*.

OROBANCHÆ VIRGINIANA, *Virginica broom rape*, *Beech-drops*, *Cancer root*. Family, *Orobanchoides*. This plant is astringent, and a peculiar and extremely nauseous bitter. It is most powerful when fresh. It has been used in dysentery; and, externally, to obstinate ulcers.

OROBE, *Ervum ervilia*.

OROBION. See *Ervum ervilia*.

OROBIDES, from *οροβας*, 'the orobus,' and *ιδος*, 'form.' Having the shape of the orobus. A name given to the sediment in urine, when of a fawn colour,—like the orobus.

OROBUS, *Ervum ervilia*.

ORONGE. See *Agarie*.

OROPHALI'US; from *ορος* or *ορρος*, 'the rump,' and *φάλλος*, 'the male organ.' A mon-

ster having a second male organ originating from the rump.—Gurlt.

ORPIMENT, *Auripigmentum*, *Orpin*, *Risigalium*, *Cloanz*, *Elome*, *Sira*, *Lempnias*, *Speculum cul'rinum*, *Yrides*, *Yride*. The native yellow sulphuret of arsenic. It is poisonous, but less so than the oxide. It is, also, called *Adarigo*, *Adarnech*, *Ahusal*, *Althanacha*, *Azarnet*. The Turks prepare a depilatory with it, which they call *Rusma*.

ORPIN, *Orpiment*—o. *Brûlant*, *Sedum*—o. *Grand*, *Sedum telephium*—o. *Reprise*, *Sedum telephium*.

ORPINE, *Sedum telephium*.

ORRHOPYG'ION. The inferior extremity of the vertebral column; from *ορος*, 'extremity,' and *πυγη*, 'the nates.' Also, the raphe, extending from the penis to the anus, and separating the scrotum into two parts.

ORRHOS, *Perinæum*, *Serum*.

ORRIS, *Iris florentina*—o. *Common*, *Iris germanica*.

ORSEILLE, *Lichen roccella*.

ORTEIL, *Digitus pedis*.

ORTHOCCOLON, *Ankylosis*.

ORTHOCYLOSIS, *Ankylosis*.

ORTHODORON. A measure with the Greeks, equal to eleven finger-breadths.

ORTHOPEDIA, from *ορθος*, 'right,' and *παις*, 'a child.' The part of medicine whose object is to correct and prevent deformity in the bodies of children.

ORTHOPNEA, *Suffocatio*, *Strangulatio*, *Præfocatio*, *Præfix*, *Prægnus*, *Angor*, *Apnæa*, from *ορθος*, 'right,' 'straight,' and *πνέω*, 'I respire.' Impracticability of breathing in the horizontal posture. Necessity of being in the erect posture, in order to respire.

ORTHOPNEA CARDIACA, *Angina Pectoris*—o. *Convulsiva*, *Asthma*—o. *Cynanchica*, *Cynanche trachealis*—o. *Hydrothoracica*, *Hydrothorax*—o. *Hysterica*, *Angone*—o. *Tussiculosa*, *Pertussis*.

ORTIE, *Urtica*—o. *Blanche*, *Lamium album*—o. *Brûlante*, *Urtica urens*—o. *Morte*, *Lamium album*—o. *Morte des Bois*, *Galeopsis*—o. *Romaine*, *Urtica pilulifera*.

ORTYX, *Tetrao coturnix*.

ORVALE, *Salvia sclarea*.

ORVIETA'NUM. From the Italian *Orvieta*—no. An electuary regarded as an invaluable antidote, and composed of *Old theriac*, *Dried vipers*, *Scorzonera*, *Carlina*, *Imperatorium*, *Angelica*, *Bistort*, *Rosemary*, *Juniper*, *Cinnamon*, *Clives*, *Mace*, *Honey*, and a crowd of other substances. Its medical properties resembled, in some respects, those of the theriac. It was so called, according to some, because invented by Orvietano, a celebrated charlatan; or, according to others, from Orvietto, a town in Italy.

ORYZA, from *Oréz*, (Arab.) *Oryza sativa*, *Rice*, (F.) *Riz*. Family, *Gramineæ*. *Ser. Syst.* *Hexandria Monogynia*. A plant, almost aquatic, and indigenous in China; which is one of the richest productions of Egypt, and prospers in the warmer regions of the four quarters of the globe. Its amylaceous seeds nourish more men than those of wheat and rye together. Besides being alimentary, they are demulcent and emollient.

OS. Bone, Mouth—o. *Acromii*, *Acromion*—o. *ad Cubitale*, *Radius*—o. *Adjutorium*, *Humeri*—o. *Os alagorne*, *Sphenoid*—o. *Alagas*, *Coccyx*, *Sacrum*—o. *Amphideon*, *Os uteri*—o. *Anouynne*

Innominatum os—o. Anticum, *Avant bouche*—o. Arcuale, Temporal bone—o. Armale, Temporal bone—o. Asser, Sternum—o. de l'*Assiette*, Ischion—o. Azygos, Sphenoid—o. Ballistæ, Astragalus—o. Basilare, Occipital bone, Palate bone, Sacrum, Sphenoid—o. Baxillare, Sphenoid—o. Bicornæ, Hyoides os—o. Brachiale, Humeri os—o. Brachii, Humeri os—o. Calcis, Calcaneum—o. Capitulum, Magnum os—o. Caudæ, Occipital bone—o. Coccygis, Coccyx—o. Coliforme, Ethmoid—o. Convolutum superius, Turbinate bone, middle—o. Coronale, Frontal bone—o. Coxæ, Innominatum os—o. *Coxal*, Innominatum os, Ischion—o. *Cribleux*, Ethmoid—o. Cribiforme, Ethmoid—o. Cribrosum, Ethmoid—o. *Crochu*, A. os unciniforme.

OS CROTOPHALE. A name, given by M. Béclard, to a bone sometimes met with at the anterior and inferior angle of the parietal bone; from *σφαγος*, 'the temple.'

OS CUBITI INFERIUS, Ulna—o. de la *Cuisse*, Femur—o. Cuneiforme, Sphenoid—o. Cuneo comparatum, Sphenoid—o. Durum, Temporal bone—o. Ensiforme, Sternum.

OS ÉPACTALE. A name given to one of the ossa Wormiana; particularly to one met with in the posterior fontanelle, and which has been described by G. Fischer, under the name, *Os epactale sive Goethianum*.

OS ÉPACTAUX, Wormiana ossa.

OS EXTERNUM. The entrance into the vagina, in contradistinction to the *Os internum*, or *Os uteri*.

OS EXTRA ORDINEM CARPI, Os pisiforme—o. Fibrosum, Occipital bone—o. Foraminulentum, Ethmoid—o. Frontis, Frontal bone—o. Genæ, Malæ os—o. Gladioli, Sternum—o. *Grand*, Magnum os—o. *Grand*, *col du*, Collum ossis magni—o. Grandinosum, Cuboid—o. Gutturis, Hyoides os—o. Hamatum, Os unciniforme—o. *Hors du rang*, Os pisiforme—o. Hypseloides, Hyoides os—o. Inconjugatum, Sphenoid—o. Incudi simile, Incus—o. Inferius ventriculi, Pylorus—o. *Innominé*, Innominatum os—o. *Intercalés*, Wormiana ossa—o. Internum, Os uteri—o. Inverecundum, Frontal bone—o. Ischii, Ischion—o. Jugale, Malæ os—o. Jugamentum, Malæ os—o. Juguli, Clavicula—o. Lachrymale, Unguis os—o. Lambda, Occipital bone—o. Lambdoides Hyoides os, Occipital bone—o. Lapideum, Temporal bone—o. Lenticulare, os orbiculare, Os pisiforme—o. Lepidoides, Temporal bone—o. Linguae, Hyoides os—o. Linguale, Hyoides os—o. Lithoides, Temporal bone—o. Magnum, neck of the, Collum ossis magni—o. *Maluire*, Malæ os—o. Maxillæ superioris undecimum, Vomer—o. *Maxillaire inférieure*, Collum mandibulæ—o. Memoræ, Occipital bone—o. Mendosum, Temporal bone—o. Morsus Adami, Thyroid cartilage—o. Mucronatum, Xiphoid cartilage—o. Multangulum majus, Trapezium os—o. Multangulum minus, Trapezoides os—o. Multiforme, Ethmoid, Sphenoid—o. *Nasaux*, Nasal bones—o. Naviculare, Os scaphoides—o. Nervale, Temporal bone—o. Nervosum, Occipital bone—o. Occipitis, Occipital bone—o. Orbiculare, Os pisiforme—o. *du Palais*, Palate bone—o. Palati, Palate bone—o. *Palatin*, Palate bone—o. Papillare, Sphenoid—o. Pectinis, Pubis, os—o. Pectoris, Sternum—o. Pelvicephalicum, Occipital bone—o. Perone, Fibula—o. Petrosum, Temporal bone—o. Polymorphon, Sphenoid—o. *de la Pommette*, Malæ

os—o. Posterum, Pharynx—o. Præruptæ rupi assimilatum, Temporal bone—o. Procubitale, Ulna—o. *Propres du nez*, Nasal bones—o. Prore, Occipital bone—o. Puppis, Frontal bone, Occipital bone—o. Pyramidale carpi, Trapezoides os—o. Pyxidis, Occipital bone—o. Rationis, Frontal bone—o. *du Rayon*, Radius—o. Sacrum, Sacrum—o. Saxeum, Temporal bone—o. Scutiforme, Patella—o. Sedarium, see Ischiatic—o. Semilunare, Lunare os—o. Sextum cranii, Occipital bone—o. *Sous-ethmoidal*, Turbinate bone, inferior—o. Sphæno-basilare, Occipital bone—o. Sphecodes, Sphenoid—o. Sphenoidale, Sphenoid—o. Sphenoides, Sphenoid—o. Spongiosum, Ethmoid—o. Spongiosum inferius, Turbinate bone, inferior—o. Spongiosum medium, Turbinate bone, middle—o. Spongiosum superius, Turbinate bone, middle, Turbinate bone, superior—o. Spongoides, Ethmoid—o. Squamosum, Temporal bone—o. *Sur-numéraires*, Wormiana ossa—o. Sylvi, Os orbiculare—o. Temporis, Temporal bone—o. Tessera, Cuboid—o. Tincæ, Os uteri—o. *Triangulaires*, Wormiana ossa—o. Turbinatum, Turbinate bone, middle—o. Turbinatum inferius, Turbinate bone, inferior—o. Uncinatum, Os unciniforme—q. Upsiloides, Hyoides os—o. Varium, Cuboid—o. Vespiforme, Sphenoid—o. Vomeris, Vomer—o. *Wormiens*, Wormiana ossa—o. Xiphoides, Sternum—o. Ypseloides, Hyoides os—o. Zygomatium, Malæ os.

OS UTERI, *Os tincæ*, *Protosporos*, *Os internum*, *Os amphidæon* seu *amphidæum*, *Osccheon*, (F.) *Museau de Tanche*. The mouth of the womb. See Uterus.

OSCHEOCARCINOMA, Cancer, chimney-sweepers.

OSCHEOCÈLE, from *σχαρ*, 'the scrotum,' and *κηλη*, 'tumour.' *Scrotal hernia*. See Bubonocoele. Sauvages uses it in the sense of *Dropsy of the scrotum*. See Hydrocele.

OSCHEOCÈLE HYDROCÈLE—o. *Flatulenta*, Physocoele—o. Hydatidosa, Hydatidocoele—o. Seminalis, Spermatocoele—o. Varicosa, Varicocele.

OSCHEON, Scrotum. Os uteri.

OSCHEOPHYMA, Hydrocele.

OSCHEOPLAS'TIC, *Oscheoplasticus*, from *σχαρ*, 'the scrotum,' and *πλασσω*, 'I form.' An epithet given to the operation for restoring the scrotum when lost.

OSCHITIS, from *σχαρ*, 'the scrotum,' and *itis*, 'inflammation.' Inflammation of the scrotum.

OSCILLATIO, Irritability.

OSCITANT, (FEVER,) *Febris oscitans*, (F.) *Fièvre oscitante*, from *oscitare*, 'to yawn.' A fever, in which the patient is continually yawning.

OSCITATIO, Yawning.

OSULATORIUS, Orbicularis oris.

OSCUS, Scrotum.

OSEILLE, Rumex acetosa—o. *Boucher*, Rumex scutatus—o. *Petite*, Rumex scutatus—o. *Ronde*, Rumex scutatus—o. *Rouge*, Rumex sanguineus.

OS'MAZOME, *Os'mozome*, *Matière extractive du Bouillon*, *Extrac'tive of meat*, *Saponaceous extract of meat*; from *osur*, 'smell,' and *ζωμος*, 'soup.' M. Thénard has given this name to an extractive matter, contained in muscular flesh and in the blood of animals, which he considers of a peculiar nature. It has an agreeable smell

and taste, and is found in *Bouillons* of meat, in the proportion of one part to seven of gelatin. Vauquelin discovered it in some fungi. It is the substance which gives the flavour of meat to soups, and hence its name.

OSME, Odour.

OSMON'OSI, *Osmonu'si*, *Morbi olfactus*; from *osm*, 'odour,' and *oosis*, 'a disease.' Diseases of olfaction.

OSMOZOME, *Osmazome*.

OSMUND, ROYAL, *Osmunda regalis*.

OSMUN'DA REGA'LIS, *Filix flor'ida*, *Osmund-royal*. Family, Filicoideæ. This plant was once thought to possess astringent and emmenagogue virtues.

OSORON, Opium.

OSPHRANTICOS, Olfactory.

OSPHRESIOLOGY, *Osphresiolog'ia*; from *osphresis*, 'odour,' and *logos*, 'a discourse.' A treatise on olfaction and odours.

OSPHRESIS, Olfaction.

OSPHYALGIA, Coxalgia.

OSPHYI'TIS, from *osphyz*, 'the hip,' and *itis*, denoting inflammation. Inflammation of the parts about the hip.

OSPHEYS, Lumbi.

OSSA BREGMATIS, Parietal bones—o. *Convoluta inferiora*, Turbinate bones, inferior—o. *Digitorum manus*, Phalanges of the fingers—o. *Digitorum pedis*, Phalanges of the toes—o. *Epactalia*, Wormiana ossa—o. *Maxillæ superioris quarta seu quinta seu secunda*, Nasal bones—o. *Nasalia*, Nasal bones—o. *Nasi*, Nasal bones—o. *Nervalia*, Parietal bones—o. *Sincipitis*, Parietal bones—o. *Spongiosa*, Turbinate bones—o. *Tertia maxillæ superioris*, Turbinate bones—o. *Triangularia*, Sphenoidal cornua—o. *Triangularia Blasii*, Wormiana ossa—o. *Triquetra*, Wormiana ossa—o. *Turbinata*, Turbinate bones—o. *Verticalia*, Parietal bones.

OSSELETS DE L'OREILLE, Ossicula auditus.

OSSICULA NASI, Nasal bones.

OSSICULUM, *Ost'ion*. Diminutive of *os*, a bone:—a small bone.

OSSIC'ULA AUDI'TUS, O. AURIS, (F.) *Ossclets de l'oreille*, *O. de l'ouïe*. The small bones situate in the cavity of the tympanum, and forming an uninterrupted chain from the membrane of the tympanum to that of the fenestra ovalis. They are four in number; and their series, from without to within, is as follows, *Malleus*, *Incus*, *Os orbiculare*, *Stapes*, (q. v.)

OSSICULUM INCUDI COMPARATUM, *Incus*—o. *Malleolo assimilatun*, *Malleus*—o. *Molari denti comparatum*, *Incus*.

OSSIFICA'TION, *Ossifica'tio*; from *os*, 'a bone,' and *facere*, 'to make.' *Osteogen'ia*, *Osteogen'es*, *Osteo'sis*. Formation of bones. Development, or increase of the osseous system. Ossification takes place in the same manner as the nutrition of other organs. The bones are, at first, mucous, and afterwards cartilaginous; the cartilage, at length, receives the phosphate of lime, and is, at the same time, replaced by a gelatinous parenchyma, when the bone has acquired the whole of its development.

OSSIFICATION, POINTS OF, *Puncta ossificatio'nis*, are the points where the ossification of a bone commences, whence it extends to other parts. Almost all the bones present a greater or less number of points of ossification. Besides the natural ossification, which we observe

in the fœtus and in the first periods of life, there are, also, *accidental ossifications*, such as those frequently remarked after the inflammation of serous membranes, in the parietes of arteries, and to which the terms *Osthe'ia*, *incrustedum*, or *petrification* have, sometimes, been applied.

OSSIFRAGA, Osteocolla.

OSSIS SACRI ACUMEN, Coccyx.

OSSISANA, Osteocolla.

OSSIV'OROUS, from *os*, 'a bone,' and *voros*, 'I devour.' A species of tumour, mentioned by Ruysch, which destroys the bone.

OS'TAGRA, *Osteagra*, from *osteon*, 'a bone,' and *aggra*, 'seizure.' A forceps to cut or remove portions of bone.

OSTALGI'TIS, *Osti'tis*, from *osteon*, 'a bone,' and *itis*. Inflammation of the bones; characterized by violent shooting and lancinating pains in the bones.

OSTEAGRA, Ostagra.

OSTEALGIA, Osteocopus.

OSTEITES, Osteocolla.

OSTEMPYE'SIS, *Osteëmpye'sis*, *Ostempy'sis*, from *osteon*, 'a bone,' and *εμπυησις*, 'effusion of pus.' An abscess in the interior of a bone.

OSTEMPYOSIS, Osteompyesis.

OSTEOCE'LE, from *osteon*, 'a bone,' and *κηλη*, 'a tumour.' A hernia, in which the sac is cartilaginous and bony:—a rare case.

OSTEOCOL'IA, from *osteon*, 'a bone,' and *κόλλα*, 'glue.' *Glue-bone*, *Stone* or *bone binder*, *Ossif'raga*, *Holos'teus*, *Ossisa'na*, *Ostri'tes*, *Ostei'tes*, *Amos'teus*, *Osteolithos*, *Stelochi'tes*. A name given to a petrified carbonate of lime, found in some parts of Germany and other portions of the globe; so called, because it was supposed to possess the power of favouring the formation of callus in fractures. It is the *Chaux carbonatée concretionnée incrustante* of Haüy. Not used.

OSTEOCOPUS, *Osteal'gia*, *Ostcodyn'ia*, from *osteon*, 'a bone,' and *κόπος*, 'fatigue.' An epithet given to pains felt in bones, which are commonly owing to constitutional syphilis.

OSTEODYNIA, Osteocopus.

OSTEOGENIA, Ossification.

OSTEOGRAPHY, *Osteogra'phia*, from *osteon*, 'a bone,' and *γραφειν*, 'to describe.' Description of the bones. The part of anatomy which describes the bones.

OSTEOLITHOS, Osteocolla.

OSTEOLOGY, *Osteolog'ia*, from *osteon*, 'a bone,' and *λογος*, 'a discourse.' The part of anatomy which treats of bones.

OSTEOMALACIA INFANTUM, Rachitis, Mollities ossium.

OSTEON. Bone—o. Hieron, Sacrum.

OSTEON'OSI, *Osteonu'si*, from *osteon*, 'a bone,' and *oosis*, 'a disease.' Diseases of the bones. *Morbi os'tium*.

OSTEOP'EDION, Lithopædion.

OSTEOPOLIN'CLASIS, from *osteon*, 'a bone,' *πολιν*, 'again,' and *κλασις*, 'fracture.' The breaking again of a bone, which has united unfavourably.

OSTEOP'SATHYROSIS, Fragilitas ossium.

OSTEO-SARCO'MA, *Osteo-sarcosis*, *Sarcos'tosis*, from *osteon*, 'bone,' and *σαρξ*, 'flesh.' Disease of the bony tissue, which consists in softening of its laminae, and their transformation into a fleshy substance, analogous to that

of cancer, and which is accompanied with general symptoms of cancerous affection. The word has often, also, been used synonymously with *spina ventosa*.

OSTEOSARCOSIS, *Mollities ossium*.

OSTEO-STEATO'MA, *Exostosis steatomatodes*, from *οστέον*, 'a bone,' and *στέας*, 'suet or fat.' A name given to bony tumours or degenerations, which sometimes belong to osteo-sarcoma; at others to *spina ventosa*, *exostosis*, &c.

OSTEOSIS, *Ossification*.

OSTEOTOMIST; same etymon as the next. An instrument, invented by Dr. D. Davis, for cutting the bones of the fetal cranium, where it becomes necessary to greatly reduce the size of the head in parturition.

OSTEOTOMY, *Osteotomy*, from *οστέον*, 'a bone,' and *τεμνειν*, 'to cut.' The part of practical anatomy whose object is the dissection of bones.

OSTHEXIA. See *Ossification*.

OSTIARIUS, *Pylorus*.

OSTITIS, *Ostalgitis*.

OSTIUM, *Orificium*, a door or gate;—of the heart, for example. The opening between the auricle and ventricle of each side; *Ostium venteris*, that of the right side; *Ostium arteriosum*, that of the left.

OSTIUM U'TERI. The vulva; the vagina;—the neck of the uterus.

OSTIUM VENTRICULI DUODENALE seu **PYLORICUM** seu **DEXTRUM** seu **INFERIUS**, *Pylorus*.

OSTOIDEA SUBSTANTIA, see *Tooth*.

OSTREA, *Ostreum*, (F.) *Huitre*. The oyster. The oyster is a wholesome article of diet, often advised as analeptic and easy of digestion.

The shells, **TESTÆ OSTREÆ**, *Testa*, (Ph. U. S.) (F.) *Écailles d'huîtres*, have been received into the Pharmacopœias, and used medicinally. Their virtues are similar to those of the carbonate of lime. See *Creta*.

OSTREUM, *Ostrea*.

OSTRITES, *Osteocolla*.

OSTRUTHIUM, *Imperatoria*.

OSYRIS, *Antirrhinum linaria*.

OTACOUS'TIC, *Otacus'ticus*; from *οὐς*, *ωτός*; 'the ear,' and *ακουω*, 'I listen.' Any instrument is so called which improves the sense of hearing,—as the different species of trumpets.

OTAGRA, *Otalgia*.

OTAL'GIA, *Ot'agra*, *Otod'ynē*, from *οὐς*, 'the ear,' and *αλγος*, 'pain.' Pain in the ear; *Dolor aurium*, *Spasmus aurium*, *Earache*. See *Otitis*.

OTAL'GIC, *Otal'gicus*. An epithet for remedies used in *otalgia*.

OTEN'CHYTES, *Oten'chyta*, from *οὐς*, 'the ear,' *εν*, 'into,' and *χυνω*, 'I pour.' *Sypho auricularis*. A species of syringe, used for injecting the ear.

OTHONE, *Lintum*.

OTHONION, *Lintum*.

OTICUM, from *οὐς*, *ωτός*, 'the ear.' A medicine employed in diseases of the ear.

GANGLION OTICUM, *Otic ganglion*, *Auricular ganglion*, *Ganglion maxillo-tympanique*. This is a small ganglion, although more than double the size of the ophthalmic, ash-coloured and pulpy like the ganglions of the sympathetic. It is situate in advance of the ganglion of Gasser, on the lower surface of the inferior maxillary nerve at the inner margin of the foramen ovale of the sphenoid bone. See *Petrous Ganglion*.

OTIRRHŒ'A, *Otorrhœa*, *Blennorrhœa*, (F.) *Catorrhe de l'oreille*, *Pygo-orrhœe*, from *οὐς*, 'the ear,' and *ρεω*, 'I flow.' Discharge of a puriform liquid from the meatus auditorius externus. It is a symptom of chronic otitis. Some authors have used the term synonymously with chronic otitis. When it extends to the brain, it is termed *cer'ebrai otirrha'a*.

OTIRRHŒA, *CEREBRAL*, see *Otirrha'a*.

OTITES. See *Digitus*.

OTITIS, *Empres'na otitis*, *Inflammat'io auris*, *Inflammation of the ear*, (F.) *Inflammation de l'oreille*. Inflammation of the mucous membrane of the ear, characterized by excruciating pain; insupportable humming in the ear, with a discharge of mucus generally from the meatus externus or from the Eustachian tube. When the inflammation is restricted to the lining membrane of the meatus, it is termed *otitis catarrhalis*. Otitis is divided into *external* or *internal*, according as it affects the meatus auditorius, or the cavity of the tympanum or internal ears. It may be *acute* or *chronic*. *Acute otitis* commonly terminates in a few days in a favourable manner, with the aid of antiphlogistics. *Chronic otitis*, *otirrha'a*, (q. v.) is almost always accompanied by a purulent discharge from the meatus auditorius. It is often incurable, and may ultimately give occasion to disease of the internal ear, and even of the brain.

OTITIS CATARRHALIS, see *Otitis*.

OTOCEPH'ALUS, from *οὐς*, 'the ear,' and *κεφαλή*, 'head.' A monster, whose ears are in contact or united into one.

OTOCONIES, see *Otolithi*.

OTODYNE, *Otalgia*.

OTOLYPTIIS, *Earpick*.

OTOG'RAPHY, *Otogra'phia*; from *οὐς*, 'the ear,' and *γραφη*, 'a description.' The part of anatomy which describes the ear.

OTOL'ITHI, (F.) *Otolithes*, from *οὐς*, 'the ear,' and *λίθος*, 'a stone.' A white calcareous substance contained in the membranous vestibule, and seeming to be suspended in the fluid of the vestibule by means of a number of nervous filaments proceeding from the auditory nerve. Their universal presence in the ear of the mammalia would seem to show that they are inservient to audition. When of a looser consistence, they are called *Otoconies*, from *οὐς*, 'the ear,' and *κονια*, 'dust.'

OTOL'OGY, *Otolog'ia*; from *οὐς*, 'the ear,' and *λογος*, 'a discourse.' The part of anatomy which treats of the ear. An anatomical treatise on the ear.

OTOPLAS'TICE, from *οὐς*, 'the ear,' and *πλαστικός*, 'forming.' The operation for restoring a lost ear.

OTORRHŒA, *Otirrha'a*.

OTOT'OMY, *Ototom'ia*; from *οὐς*, 'the ear,' and *τεμνειν*, 'to cut.' The part of practical anatomy which teaches the mode of dissecting and preparing the ear.

OULA, *Gingivæ*.

OULE, *Cicatrix*.

OUNCE, *Uncia*. A weight, equal to the 16th part of a pound avoirdupois, the 12th of a pound troy. It is composed of 8 drachms. See *Weights and Measures*.

OURAQUE, *Urachus*.

OUREMA, *Urine*.

OURON, *Urine*.

OURLE, *Parotis*.

OUS, Ear.

OUTRE MER, Lapis lazuli.

OUVERTURE CADAVÉRIQUE, Autopsia cadaverica.

OVAL, *Ova'lis*; from *ovum*, 'an egg.' That which is round and oblong like an egg.

FOSSA OVALIS, *Vul'culuseu Vestig'ium Foram'inis ovalis*, is a depression observed in the right auricle of the heart, on the septum, which separates it from the left auricle. It has thick and strong edges, at its upper and fore part, called *Colum'næ foram'inis ova'lis*, *Isthmus Viesse'nii* vel *an'nulus fossæ ovalis*; in the fœtus called *an'nulus foram'inis vel fossæ ova'lis*. The fossa ovalis, in the adult, replaces the inter-auricular aperture in the septum, which, in the fœtus, is called *foramen oval*, (F.) *Trou ovale*, *Trou de Botal*.

FORAMEN OVALE, (F.) *Trou ovale*; the foramen obturatorium; also the foramen in the inner paries of the middle ear, which opens into the vestibule; and the foramen in the sphenoid bone, through which the third branch of the fifth pair issues from the cranium.

O'VARISTS, *Ovists*. Same etymon. Those physiologists who think that the phenomena of generation, in the human species and in every species of animal, result from the development of the ova or ovula of the female, merely incited by the male. Not many of the physiologists of the present day can be classed among the ovarists.

OVARITIS, Ooitis.

OVARIUM, Same etymon. The *Ovary*, *Testis mulie'bris*, *T. femineus*, *Oar'ion*, *Ooph'oron*. The ovaries are the organs in which the ova are formed in oviparous animals. By analogy, the name has been given to the organs which the ancients called the *testicles* of the female. They are two ovoid bodies, almost as large as the testicles in men, placed on each side of the uterus between the Fallopian tube and round ligament, and in the substance of the broad ligament. Their outer extremity gives attachment to one of the projections of the fimbriated extremity of the Fallopian tube; and the internal is fixed to the uterus by a small ligamentous cord, called *Ligamentum rotundum ova'rii*. The ovaries are composed of a very close, spongy texture, and of small vesicles filled with a clear fluid; these have been regarded as so many ova, which detach themselves from the ovarium after fecundation, and are carried into the cavity of the uterus by the Fallopian tube.

OVARIUM NABOTHI, Nabothi glandulæ.

OVERO BUTUA, Pareira brava.

OVIDUCTUS MULIEBRIS, Tuba Fallopiana.

OVIPAROUS, *Ovip'arus*; from *ovum*, 'an egg,' and *par'io*, 'I bring forth.' An epithet applied to animals which are hatched from eggs outside of the body.

OVIISTS, Ovarists.

OVOLOGY, Oologia.

OVULA GRAAFIANA, Folliculi Graafiani —o. Nabothi, Nabothi glandulæ.

OVULINE, Decidua reflexa.

OVUM, *ovon*, *Oon*, an egg. The eggs of poultry are chiefly used as food. The different parts are, likewise, employed in medicine. The shell, *Auran'cum*, *Auran'tum*, (calcined,) (F.) *Coque d'œuf*, *Coquille d'œuf*, is esteemed an absorbent. The Oil of the egg is emollient, and

is used, externally, to burns and chaps. The *Yolk of the egg*—*Vitellum ori*—renders oils, &c. miscible with water. Eggs, when lightly boiled, are easy of digestion; but, when very hard-boiled or fried, they are more rebellious.

In pharmacy, *white of egg*, which consists chiefly of albumen, is used for clarifying syrups, &c. *Yolk of egg*, (F.) *Jaune d'œuf*, beaten up with warm water and sugar, and aromatized with orange-flower water, forms an emulsion, which is emollient, and known under the name —*Lait de poule* or chicken's milk.

Anatomists give the name *Ova*, (F.) *Œufs*, to round vesicles, containing a humour similar to the white of egg, which are situate in the ovaries of the female, and, when fecundated, constitute the rudiments of the fœtus. During gestation, the embryo and its enveloping membranes retain the name *Ovum*, (F.) *Œuf*. The changes induced in the mammalia after impregnation greatly resemble those in the bird.

OVUM, Testicle—o. Hystericum. See *Clavus hystericus*.

OXALAS SUBPOTASSICUS, Potass, oxalate of.

OXALIC ACID, *Acidum oxal'num*, *A. sacchar'num*, *A. hydro-carbon'icum*, *A. acetosell'a*, *A. oxal'icum*, *Acidum sac'chari*, *Acid of sugar*; *Acid of sorrel*, *Carbonous acid*, from *οξ'alis*, 'sorrel.' An acid found in sorrel. It crystallizes in long, colourless, quadrangular prisms, and is generally found, in nature, united with lime or potassa. It has been proposed, in a diluted state, as a refrigerant, but it is unnecessary; and, besides, in quantity, it is a virulently acid poison. It is largely employed for cleaning boot tops; and, as it strongly resembles the sulphate of magnesia, has often been mistaken for it. Several fatal cases are, indeed, on record. For its antidotes, &c.—See *Poison*.

OXALIDE, Oxalis acetosella.

OXALIS ACETOSA, Rumex acetosa.

OX'ALIS ACETOSELL'A. The systematic name of the *Woodsorrel*, *Cuckowbread*, *Trifo'lium acetosum*, *Oxitriphyllum*, *Lujula*, *Allelu'ja*, *Acetosell'a*, *Oxyphyllon*, *Oxytriphylon*, *Panis cu'culi*, (F.) *Surelle*, *Oxalide*, *Pain a Coucou*, *Alleluia*. Family, Geraniæ. *Sex. Syst.* Decandria Decagynia. The plant has a gratefully acid taste, and is used in salads. It has been esteemed refrigerant, antiscorbutic, and diuretic.

OXALIMUM, Potass, oxalate of.

OXAL'ME, from *οξ'us*, 'acid,' and *αλς*, 'salt.' A mixture of vinegar and salt.

OXALURIA, Urine, oxalic.

OXELÆ'ON, from *οξ'us*, 'acid,' and *ελα'ιον*, 'oil.' A mixture of vinegar and oil, used as a condiment.

OXID, Oxyd.

OXIDATION, Oxyd.

OXIDE, Oxyd.

OXINES, *οξινες*, *ovinos*, from *οξ'us*, 'acid.' Wine already sour, but not yet vinegar.

OKITRIPHYLLUM, Oxalis acetosella.

OXODES, Acidulous.

OXOS, Aceticum acidum.

OXYA, Fagua sylvatica.

OXYACANTHA, Mespilus oxyacantha.

OXYBAPHON. See *Acetabulum*.

OXYCANTHA GALE'NI, *Berberis*, *Berberis vulgar'is*, *Spina ad'ida*, *Crespinus*, (F.) *Épine vinette*, *Vinettier*. Family, Berberidæ. *Sex. Syst.* Hexandria Monogynia. The *Bai'*

berry. The fruit of the berries is gratefully acid, and moderately astringent. By preparing an alcoholic extract of the root and adding water to it, a pulverulent brown substance is thrown down, which when dissolved in alcohol and evaporated yields the bitter principle, *Berberin*. It is an excellent stomachic in the dose of 2, 5, or 10 grains.

OXYCOCCOS, *Vaccinium oxycoccus*.

OX'YCRATE, *Oxyerat'um*, from *ὄξυς*, 'acid,' and *κραω*, 'I mix.' *Posca*, *Phusca*. A mixture of vinegar and water; frequently used in medicine as refrigerant and antiseptic.

OXYCRO'CEUM (EMPLASTRUM), from *ὄξυς*, 'acid,' and *κροκος*, 'saffron.' A plaster, composed of *saffron*, *pitch*, *colophony*, *yellow wax*, *turpentine*, *gambanum*, *gum ammoniac*, *myrrh*, *olibanum*, and *mastic*. It was employed as a strengthening plaster.

OXYCUM, Oxygen.

OXYD, *Oxid*, *Oxide*, *Oxyde*, *Oxydum*, from *ὄξυς*, 'acid.' A combination, not acid, of a simple body with oxygen.

OXYDA'TION, *Oxyda'tio*, *Oxida'tion*, *Oxygenation*. The action of oxidizing a body; that is, of combining it with oxygen; a combination from which results an oxyd.

OXYDE, *Oxyd*.

OXYDE, *Cystic*. A species of urinary calculus, having the shape of confused, yellowish, semi-transparent, insipid, very hard crystals. When distilled, it furnishes subcarbonate of ammonia, like all azoted matters. It dissolves in the nitric, sulphuric, phosphoric, and oxalic acids.

OXYDE D'ANTIMOINE SULFURÉ, *Oxydum stibii sulphuratum*.

OXYDER'CICUS, *Oxyder'ces*, from *ὄξυς*, 'sharp,' and *δερκω*, 'I see.' A medicine which sharpens the sight.

OXYDUM, *Oxyd*—o. *Antimonii cum phosphate calcis*, *Antimonial powder*.

OXYDUM FERRI NIGRUM, *Black oxyd of iron*. The scales, which fall from iron, when heated, consist of iron, combined with oxygen. They have been used like the chalybeates in general.

OXYDUM FERRICUM CRYSTALLIZATUM NATIVUM, *Hæmatites*—o. *Hydrargyri completum*, *Hydrargyri nitrico-oxydum*—o. *Hydrargyricum*, *Hydrargyri nitrico-oxydum*—o. *Hydrargyricum præparatum*, *Hydrargyri oxydum cinereum*—o. *Hydrargyrosus*, *Hydrargyri oxydum cinereum*.

OXYDUM STIBII SULPHURATUM, *Hepar antimoni'i*, *Crocus metallo'rum*, *Crocus antimoni'i*, (F.) *Oxyde d'antimoine sulfuré*, *Foie d'Antimoine*. This was formerly exhibited in the cure of fevers, but it is now rarely employed.

OXYG'ALA, from *ὄξυς*, 'sour,' and *γάλα*, 'milk.' *Sour milk*. The *Oxygala equinum*, *Caracas' mos*, is reckoned amongst the delicacies of the Tartars.

OXYG'ARON, from *ὄξυς*, 'acid,' and *αρον*, 'garum.' A composition of garum and vinegar.

OXYGEN, *Oxygen'ium*, *Empyr'cal air*, *Pure air*, *Vital air*, *Dephlogisticated air*, *Oxygenes*, *Oxy'um*, *Princip'um oxyg'enans* seu *oxygeneticum* seu *acid'ificans* seu *ac'idum*, *Elementum acid'ificum*, (F.) *Air du feu*, from *ὄξυς*, 'acid,' and *γενναι*, 'I engender,' i. e. *generator of acids*; and such it was believed to be, exclusively, at the period when the name was given to it. This is now known not to be the case.

Oxygen is largely distributed in nature. It exists in the air, in water, in several acids, all the oxyds and all the salts, except in some ammoniacal salts, and in vegetable and animal substances, &c. It is obtained by decomposing the peroxyd of manganese or the chlorate of potassa by heat and in close vessels. Although oxygen, in the state of admixture in which it is found in the atmosphere is of vital importance, yet it cannot be respired in a pure state with impunity. Animals die in it long before the whole of the oxygen is consumed. The properties of oxygen seem to be stimulant. It increases the force and velocity of the pulse, and has, accordingly, been used in cases of chronic debility, chlorosis, asthma, scrofula, dropsy, paralysis, &c. It requires to be diluted with from 10 to 20 parts of atmospheric air; one to two quarts being given during the day.

OXYGENATION, *Oxydation*.

OXYGENESES. A name given by Baumes to diseases which he attributed to disordered oxygenation.

OXYG'LICUS, *Oxyg'lices*, from *ὄξυς*, 'acid,' and *γλυκός*, 'sweet.' *Mulsa acida*, *Acetum mulsum dulcè*. Prepared by macerating and boiling honey-comb (from which the greater part of the honey has been taken) in water, and adding vinegar. An *oxymel*.

OXYLAPATHUM, *Rumex acutus*.

OXYMEL, *Apom'eli*, *Mel acetatum*, from *ὄξυς*, 'acid,' and *μελι*, 'honey.' Honey and vinegar boiled to a syrupy consistence.

SIMPLE OXYMEL, *Oxymel simplex*, is prepared as follows; (*Mellis despumati* ℥ij, *acidi acetici* ℥ij. Boil in a glass vessel, over a slow fire, to a proper thickness. *Ph. L.*) It is cooling;—externally, detergent.

OXYMEL ÆRUGINIS, *Linimentum Æruginis*.

OXYMEL COL'CHICI, *Oxymel of meadow saffron*, (F.) *Oxymel colchique*. (*Rad. colch. recent. in laminas tenues secta* ʒj, *aceti destillati* ℥ij, *mellis despumati* pond. ℥ij. Macerate in a gentle heat for 48 hours. Press and boil the liquor with the honey to the thickness of a syrup; stirring with a wooden spoon. *Ph. D.*) It is expectorant and diuretic. Dose f. ʒj, in gruel.

OXYMEL COLCHIQUE, *O. colchici*—o. of Meadow saffron, *O. colchici*.

OXYMEL SCILLÆ, *Oxymel of squill*, *Mel scillæ*, *Oxymel scillit'icum*. (*Mellis despumati* ℥ij, *aceti scillæ* Oj. Boil in a glass vessel over a gentle fire to a proper consistence. It is reputed to be expectorant and diuretic. Dose ʒj.

OXYMEL OF SQUILL, *O. scillæ*.

OXYMYRRHINE, *Ruscus*.

OXYMYRSINE, *Ruscus*.

OXYNGIUM, *Adeps suilla*.

OXYNITRON, from *ὄξυς*, 'acid,' and *νιτρον*, 'nitre.' Name of a plaster, composed chiefly of vinegar and nitre, and recommended by Aëtius.

OXYNOSEMA, *Acute disease*.

OXYNOSOS, *Acute disease*.

OXYNUSOS, *Acute disease*.

OXYO'PIA, *Acies visus*, from *ὄξυς*, 'quick,' and *ωπ*, 'sight.' Excessive acuteness of the sense of sight. Instances have occurred, where persons could see the stars in the daytime. The cause is seated in great sensibility of the retina. The term has been used synonymously with *nyctalopia* (q. v.)

OXYOSPHRE'SIA, from οξύς, 'acute,' and σφρηξίς, 'smell.' Acuteness of the sense of smell.

OXYPHLEGMA'SIA, οξύπλεγμασις, *Acuta et vehemens inflammatio*. A very violent inflammation.

OXYPHO'NIA, Vox acu'ta, from οξύς, 'sharp,' and φωνή, 'voice.' *Parapho'nia clun-gens*, *P. ulcero'sa*, *Leptopho'niu*. A shrill and squalling voice; frequently, a symptom of morbid affection of the larynx.

OXYPHENICON, Tamarindus.

OXYPHYLLON, Oxalis acetosella.

OXYREG'MIA, *Acidus rectus*, from οξύς, 'sour,' and ῥεγγω, 'I belch.' Acid eructations.

OXYRRHOD'INON, from οξύς, 'acid,' and ῥόδον, 'a rose.' A composition of vinegar and roses. (*Ol. rosat. 3ij, acet. rosat. 3j.*) Used as a liniment in herpes and erysipelas.

OXYS, Acetum, Acute.

OXYSAC'CHARON, from οξύς, 'acid,' and σάκχαρον, 'sugar.' A mixture of sugar and vinegar. It was called *Oxysac'charum vomiti-um*, when it held in solution the glass of antimony; and *Oxysac'charum scillit'icum*, when it contained squills.

OXYSAL DIAPHORETICUM AN'GELI SALÆ. A preparation of Angelo Sala. Acetate of potass exposed to the atmosphere; and, consequently, fallen into a state of deliquium.—Orfila.

OXYTARTARUS, Potassæ acetas.

OXYTOC'IC, *Oxytocos*, from οξύς, 'quick,' and τίκτω, 'I bring forth.' A medicine, which promotes delivery.

OXYTRIPHYLLON, Oxalis acetosella.

OYSTER SHELLS, *Ostreæ testæ*—o. Prepared, Testa præparata.

OZÆ'NA, *Coryza enton'ica*, *C. ozæno'sa*, *Coryza virulen'tu*, *C. maligna*, *Ulcus na'rurum fatens*, from οζών, 'I smell of something.' (F.) *Ozène*. An affection of the pituitary membrane, which gives occasion to a disagreeable odour, similar to that of a crushed bed-bug: hence the name *Punais*, by which the French designate one labouring under ozæna. It is, sometimes, owing to caries of the bones; but is, perhaps, most frequently dependent upon syphilitic ulceration of the pituitary membrane, with or without caries of the bones of the nose.

OZÈNE, Ozæna.

P.

P. A contraction of *Pugillus*.

P. Æ. A contraction of *Partes æquales*.

P. P. A contraction of *Puleis putrum*.

See Abbrevia-tion.

PAB'ULUM, *Trophæ*, *Phorbé*, *Alimentum*. Food, aliment. The animal heat and animal spirits—unmeaning terms—were formerly considered the *Pabulum vite*.

PACCHION'I, GLANDS OF, *Glandulæ Duræ Matris*, *G. duræ menin'gis*, *Tubercula puræ duræ matris*, *Cor'pora glandifor'mia duræ matris*, (F.) *Granulations cérébrales*. Small, whitish, or yellowish bodies, sometimes separate, at others united like a bunch of grapes, which are observed in several parts of the dura and pia mater. They receive vessels, but apparently no nerves. Their texture and uses are unknown. A considerable number is observed in the longitudinal sinus, covered by the internal membrane.

PACHÆ'MIA, *Pachyæ'mia*, from παχύς, 'thick,' and αἷμα, 'blood.' Too great thickness of the blood.

PACHEABLEPHARO'SIS, *Pncheableph'ara*, *Pachybleph'aron*, *Puchyblephar'osis*, *Pach'ytes*, from παχύς, 'thick,' and βλέφαρον, 'an eyelid.' A name given, by some authors, to a thickening of the eyelids, produced by tubercles or excrescences formed on their margins. It is the same affection as that which Sauvages designates *Cal'gò à Pncheablephar'osi*.

PACHETOS. See Laqueus.

PACHYÆMIA, Pachæmia.

PACHYBLEPHARON, Pacheablepharosis.

PACHYNTICA, Incrassantia.

PACHYTES, Pacheablepharosis.

PAD, (S.) *Pajado*, from *paja*, 'straw,' *Plumaccolus*, *Pulv'ulus*, *Parvum pulv'inar*;—a

cushion; a little cushion; a junk; (F.) *Cousinet*. Small bags, filled with feathers, wool, hair, bran, chaff, &c. They are used to compress or support certain parts. In the treatment of fractures, soft pads or cushions, called by the French *Remplissages*, are placed between the splints and the fractured limb, in order that the prominent parts may not be chafed by the splints.

PADNOON, Bit noden.

PAD'UA, MINERAL WATERS OF. Near Padua, in Italy, there are several thermal, sulphureous springs; the hottest of which is 188° Fahr. The chief establishments are Abano, Battaglia, and Montegrotto.

PADUS, Prunus padus.

PÆDICATIO, Pæderastia.

PÆDANCHONÊ, from παις, παῖδος, 'a child,' and ἀγγω, 'I strangle.' *Angi'na Sicca*. Name of a fatal species of cynanche, mentioned by M. A. Severinus;—probably the *Cynanche Trachealis*, (q. v.) or *Cynanche Maligna*, (q. v.)

PÆDARTHROCACE, Spina ventosa.

PÆDATROPHIA, from παις, παῖδος, 'a child,' α, privative, and τροφή, 'nourishment.' Atrophy of children. Tabes mesenterica.

PÆDATROPHIA GLANDULOSA, Scrofula, (q. v.)

PÆDERASTIA, *Padogog'ium*, *Pædicatio*, from παις, 'a boy,' and ἔρω, 'love.' The love of boys. A disgraceful passion, common in ancient times, but now unknown. These terms are likewise applied to the crime of sodomy.

PÆDIATRI'A, *Pædiat'rica*, from παις, 'a child,' and ἰατρεία, 'medical management.' Treatment of the diseases of children.

PÆDICTERUS, Icterus infantum.

PÆDOGOGIUM, Pæderastia.

PÆDOPHLEBOTOM'IA, from παις, 'a

child,' *αλεψ*, 'a vein,' and *τομή*, 'incision.' *Venæsectio puerorum*. Bleeding performed on children.

PÆDOTRIBA, *Min'ister Gymnas'tæ*, from *παις*, 'a child,' and *τρέφω*, 'I train.' In ancient gymnastics, the officer acquainted with all the prescribed exercises, and who carried them into effect, according to the directions of the superior.

PÆONIA, *P. officinalis*, *Glycy's'idæ*, *Hæmago'gum*, *Pæony*, male and female, (F.) *Pivoine*, *Pione*. The root, flowers, and seeds were long esteemed powerful medicines. They are feebly astringent, and have been considered to be narcotic and antispasmodic. They have been given, particularly, in intermittents and epilepsy, but are not now used. The flowers are called *Rosæ benedict'æ*, *R. regizæ*.

PAIDIA, Infancy.

PAIDION, Infans.

PAIGIL, *Primula veris*.

PAIN, (old F.) *painer*, 'to torment,' Sax. *pinan*, 'to torture.' *Dolor*, *Algos*, *Alge'ma*, *Alge'do*, *Alge'ss*, *Od'ynê*, (F.) *Douleur*. A disagreeable sensation, which scarcely admits of definition. It is generally symptomatic, and is called *acute*, (F.) *aigue*, when very violent: *pungent*, (F.) *pungitive*, when it resembles that which would be produced by a sharp instrument run into the part: *heavy*, (F.) *gravative*, when attended with a sensation of weight: *tensive*, when the part seems distended: *luc'inating*, when occurring in shoots: *luc'erating* or *tearing*, when the part seems to be tearing: *burning*, (F.) *brûlante*, when resembling that produced by a burn, &c.

PAIN, SUN, Hemierania.

PAIN, see *Triticum*—*p. à Coucou*, *Oxalis acetosella*—*p. de Madagascar*, *Jatropha manihot*—*p. de Pourceau*, *Cyclamen*.

PAINS, AFTER. See *P. labour*.

PAINS, *Labour pains*, *Parturientis dolores*, *Odin*, *Dolores ad partum*, *Mal d'Enfant*, *Douleurs*. The uneasy sensations that accompany labour, and are owing to uterine contraction. The pains that precede actual delivery, and are simply employed in dilating the os uteri, are called *grinding*; those which extrude the child, *forcing*. Those which take place in the first days after delivery, and are employed in forcing away coagula, &c., are termed *After pains*, *Dolores post partum*, *D. puerperarum*, (F.) *Tranchées utérines*.

"To take a Pain,"—"To try a pain,"—is to make an examination *per vaginam*, during labour, to discover its progress, character, &c.

The French term the pains, which precede and announce labour, *mouches*; those which accompany it, *douleurs*; and those which occur immediately afterwards, *tranchées* ou *coliques*.

PAINT, from *pingere*, *pinctum*, 'to paint,' (I) *pinto*, (F.) *peint*. *Pigmentum*, *Fucus*, (F.) *Pard*. A name given to different substances, employed for embellishing the complexion, or rendering the skin softer. The substances most commonly used for this purpose are:—the *Subnitrate of Bismuth*, (F.) *Blanc de fard*. A spirituous solution of Benzoin, precipitated by water, and forming the *Virgin's milk*, (F.) *Lait virginal*; the red or *rouge* of the earthenware; *Spanish white*, the oxides of lead, tin, and mercury, vermillion, red saunders, &c. All paints may be said to be noxious. They injure the skin,

obstruct perspiration; and, thus, frequently lay the foundation for cutaneous affections. See *Cosmetic*.

PAINT, INDIAN, *Sanguinaria Canadensis*.

PALÆSTRA, *Gymnasium*.

PALAIS, *Palate*.

PALATAL, *Palatine*.

PALATE, *Palatum*, *Hypero'a*, *Uranis'cos*, the *Roof of the mouth*, *Fossa Palati'na*, *Palatum stuv'ile*, (F.) *Palais*. The upper part of the cavity of the mouth; a kind of parabolic vault, formed by the two superior maxillary bones and the two palate bones, covered with a thick and dense mucous membrane: bounded, before and at the sides, by the superior dental arch; and, behind, by the *velum palati*. A whitish line runs along the middle, from before to behind; at the anterior extremity of which is a tubercle corresponding to the inferior orifice of the anterior palatine canal. The arteries of the palate and corresponding gums proceed from the palatine, alveolar, infra-orbital, labial, and buccal branches. The veins follow a similar course. The nerves are given off from the palatine, facial, infra-orbital, superior dental, and from the naso-palatine ganglion.

PALATE, FALLING DOWN OF, *Uvulitis*.

PALATE, ARTIFIC'IAL, (F.) *Obtuteur du Palais*. A plate of tortoise shell, silver, &c., used to close the deficiency of the palate in cases of such affection.

PALATE BONE, *Os Palati*, *Os Basilar'e*, (F.) *Os Palatin*, *Os du Palais*, is a small bone of an irregular shape, situate at the posterior part of the nasal fossæ and palate. It seems formed by the union of two bony plates joined at right angles to each other; so that one is *inferior* and *horizontal*;—the other, *superior* and *vertical*. The *horizontal* or *palatine portion* is quadrilateral. Its upper surface forms part of the nasal fossæ; the lower, of the palatine arch, and contains the inferior orifice of the *posterior palatine canal*. Its *anterior* edge is articulated with the palatine process of the superior maxillary bone; the *posterior* is free and sharp. It gives attachment to the *velum palati*, and presents an eminence, which, when joined with one on the opposite side, forms the posterior nasal spine. Its inner edge is articulated with the corresponding bone; its outer is confounded with the vertical portion. The *vertical* or *ascending portion* has the form of a long square. The inner surface forms part of the outer paries of the nasal fossæ. Its outer surface is unequal, and is articulated with the superior maxillary bone; behind, it presents a vertical groove, which forms part of the posterior palatine canal; and, above, a small free surface, which looks into the zygomatic fossa. Its anterior edge is united with the superior maxillary bone; the posterior is unequal, and rests on the internal ala of the pterygoid process. The angle, which it forms by uniting with the posterior edge of the horizontal portion, presents a very prominent pyramidal eminence, called the *tuberosity of the palate bone*. Its upper margin is surmounted by two eminences;—the one, anterior, called the *orbital process*;—the other, posterior, the *sphenoid process*. These two processes are separated by an almost circular notch, which the sphenoid bone forms into a foramen, called the *spheno-palatine*.

This bone appears to be developed from a

single point of ossification. It is articulated with the sphenoid, ethmoid, the cornua sphenoidalia, superior maxillary bone, the inferior spongy bone, the vomer, and its fellow.

PALATE, Soft, Velum pendulum palati.

PAL'ATINE, *Pal'atal*, *Palati'nus*, from *palatum*, 'the palate.' Relating or belonging to the palate.

PALATINE OR PALATAL ARTERIES are two in number. They are distinguished into, 1. The superior palatal or palatine, *Palati'na descendens* or *Palato-maxillary*, which leaves the internal maxillary behind the top of the orbit; descends into the pterygo-maxillary fissure, and enters the posterior maxillary canal. Its branches are distributed to the velum palati and the nasal fossæ. 2. The inferior or ascending palatine or palatal, which is very small, and separates from the facial near its origin. It passes along the lateral and superior part of the pharynx, between the pillars of the velum palati, and divides into a number of ramusculi, which are distributed to the pharynx, the corresponding tonsil, the Eustachian tube, and the velum palati.

PALATINE CANALS OR DUCTS. These are two in number. The anterior, *Ductus incisivus*, vel *Nusulo-palati'nus*, is situate at the anterior part of the palatine arch, and is formed by the two superior maxillary bones. It is single beneath, but opens above by two apertures, one into each nasal fossa. The foramen is called the *Foramen incisivum*, vel *F. Palatinum anterius*, *F. Alveolarè anterius*, *F. cæcum ossis maxillaris superioris*. The posterior palatine canal is situate at the posterior part of the palate. It is formed by the palate and superior maxillary bones, ascends between these two bones; and, in its course, gives rise to two or three small accessory palatine canals, which open above the tuberosity of the palate bone. It transmits the nerves and vessels which bear its name. The foramen is called, *F. Palati'num posterius*, *F. Palato-maxillare*, *F. alveolarè posterius*.

PALATINE MEMBRANE is the fibro-mucous membrane that lines the palate or roof of the mouth.

PALATINE OR PALATAL NERVES, *Gutturopalatins*, (Ch.) are three in number; and arise from the inferior part of the spheno-palatine ganglion. 1. The great palatine, *Palatin inférieur*, (Ch.) is situate anteriorly to the two others, and descends into the posterior palatine canal; gives a nasal filament and a staphyline filament, and is distributed on the palate. 2. The middle palatine, *Guttural*, (Ch.) which arises behind the preceding: enters one of the accessory palatine canals, and is distributed to the tonsils and velum palati. 3. The little palatine nerve, situate still more backward than the last, which loses itself by several filaments in the uvula, tonsils, and follicles of the palatine membrane.

PALATO-PHARYNGIEN, *Palato-pharyngeus*—p. *Salpingeus*—p. *Salpingeus*, *Circumflexus*—p. *Salpingien*, *Circumflexus*.

PALATO-PHARYNGEUS, *Pharyngo-staphyl'ius*, *Staphyl'no-pharyngeus*. *Thyro-pharyngo-staphyl'ius*, part of the *Stylo-pharyngien* (Ch.) *Hypero-pharyngeus*, (F.) *Palato-pharyngien*. A membranous muscle, broader at its middle than at its extremities, and situate vertically in the lateral paries of the pharynx and

velum palati. It includes the peristaphylo-pharyngeus, pharyngo-staphylinus, and thyro-staphylinus of Winslow. When the two palatopharyngei contract together, they depress the velum. They elevate and shorten the pharynx, and act principally in deglutition.

PALATUM MOLLE, Velum pendulum palati.

PALENESS, *Pallor*, *Och'rotes*, *Ochroma*, (F.) *Puleur*. Whiteness of complexion. It appears to be owing to a diminution of the blood circulating in the capillary vessels, and is often a sign of disease.

PALES COULEURS, Chlorosis.

PALETTE (F.), *Pal'mula*, *Fer'ula*. An instrument of percussion. It has the shape of a spatula with a long handle; is made of very light, white wood, and has been proposed, by Percy, for what is called the *Massage*, a kind of pressure or kneading, exerted by the hand on the body and limbs, to excite the tone of the skin and subjacent tissues.

Palette also means a Cup (q. v.) and the Xi-phoid cartilage (?).

PALETTE A PANSEMENT. A small splint of thin, scooped wood; having the shape of the hand, and used to support the hand in certain cases—when burnt, for example—in order to prevent the fingers from being deformed by the cicatrices.

PALETTE DE CABANIS. An instrument, invented by Cabanis of Geneva, to draw out the extremity of the stylet when passed into the nose, in the operation for fistula lachrymalis. It is composed of two plates of silver, pierced with several holes, and movable on each other. To use it, the instrument must be carried into the nose, so that the holes of the two plates correspond. When the end of the stylet is received into one of these holes, it is pinched, by sliding one of the plates on the other, and is easily withdrawn.

PALEUR, Paleness.

PALIMPISSA. See *Pinus sylvestris*.

PALINCOTESIS, Recrudescencia.

PALINDROM'IA, from *παλιν*, 'again,' and *δρομος*, 'a course.' This word signifies, with some, a reflux of fluids from the exterior towards the interior; and, according to others, the relapse of an affection—the recurrence of a paroxysm. *Rekursio*, *Repetitio*.

PALINGENESIA, Regeneration.

PALLI'ATION, *Palliatio*, from *palliare*, 'to cover, mask;' from *pallium*, 'a mantle.' The act of palliating, that is, of causing the symptoms of a disease to mitigate, without curing it. The medical art can frequently only moderate the symptoms of a disease, prevent it from making progress, prolong the days of the patient, and diminish his sufferings. This is a *palliative treatment*.

PALLIATIVE, *Palliati'vus*, *Antipath'ic*, *Euantiopath'ic*. A remedy or mode of treatment, which only relieves a disease, without curing it.

PALLIDULUS, *Blafard*.

PALLOR, Paleness.

PALM, *Palma*, *Vola*, *Thenar*, *Agæ*, *Agos'tus*, (F.) *Paume de la main*. The hollow or inside of the hand. It is limited, *without*, by the thenar eminence, which answers to the thumb; *within*, by the hypothenar eminence, which an-

swers to the little finger; *above*, by the wrist-joint; and, *below*, by the four fingers.

PALMA CHRISTI, Ricinus communis—p. Humilis, Musa paradisiaca.

PALMAIRE CUTANÉ, Palmaris brevis—p. Grand, Palmaris magnus—p. Grêle, Palmaris longus—p. Long, Palmaris longus.

PALMAR, *Palma'ris*, from *palma*, 'the palm of the hand.' That which concerns the palm of the hand. The palm has, sometimes, been divided into three regions, called *pulmar*. 1. The *external pulmar region* corresponds to the thenar eminence. 2. The *internal pulmar region* is formed by the hypothenar eminence; and, 3. The *middle pulmar region* is the hollow of the hand, (F.) *Creux de la main*.

PALMAR APONEURO'SIS. A strong triangular aponeurosis, which arises from the inferior tendon of the palmaris brevis, and the anterior annular ligament of the carpus. It covers the whole palm of the hand, and adheres, somewhat strongly, to the skin of the part. The *pulmar ligaments* are small, very numerous, fibrous fasciæ, which unite the different bones of the carpus and metacarpus.

PALMAR ARCHES, (F.) *Arcades ou Crosses palmaires*. The curved extremities of the radial and cubital arteries in the palm of the hand. There are two palmar arches:—the one *cubital or superficial*,—*grande Arcade palmaire* of Chaussier, furnishes, at its convexity towards the fingers, the collateral arteries of the fingers, and the internal collateral of the thumb; the other, the *radial, profound, or deep-seated*,—*petite Arcade palmaire* of Chaussier, is deep in the palm of the hand beneath the tendons of the flexor muscles of the fingers. It gives some small branches only to the surrounding parts.

PALMAR MUSCLES. These are three in number. 1. *Pulma'ris Magnus, Flexor carpi radialis, Radialis internus, Epitrochlo-metacarpien*, (F.) *Palmaire grand, Radial antérieur*. A long fusiform muscle, which passes obliquely from the inner tuberosity of the humerus to the upper extremity of the second metacarpal bone. It bends the hand. 2. *Palmaris Longus, Latentes chordæ, Ulnaris gracilis, Epitrochlo-carpi-palmaire*, (F.) *Palmaire long, P. grêle*. This muscle is situate on the inner side of the last. It is very slender, and passes from the inner tuberosity of the humerus to the anterior annular ligament of the carpus, and to the palmar aponeurosis, which it seems to form by the vanishing of its fibres. It stretches the palmar aponeurosis, and bends the hand. 3. *Palmaris Brevis, P. Brevis vel Caro quadrata, Palmaire cutané, Carpiæus*, (F.) *Palmaire cutané*. A small, thin, quadrilateral muscle; situate before the thenar eminence. It passes from the annular ligament of the carpus to the integuments of the palm of the hand, which it wrinkles by its contractions.

PALMI-PHALANGIENS, Lumbricales manus.

PALMULA, Date, Palette.

PALMUS, Palpitation—p. Plumbarius, Colic, metallic—p. Vomitus, Vomiting.

PALO DE CALENTURAS, Calenturas.

PALOS DE CALENTURA, Cinchona.

PALPATION, from Fr. *palper*, to feel. The sense of Touch (q. v.) It is also used for the mode of exploring disease by feeling or pressing upon the diseased organ.

PAL/PEBRA, supposed to be from *palpitare*, 'to palpitate,' owing to its frequent motion. (?) *Bleph'aron*, (F.) *Paupière*. The eyelids are two movable vela, situate in front of the eye; which by their separation permit the organ to receive the impression of light, or by their greater or less occlusion protect it from the influence of too great light, or from the action of extraneous bodies. They are separated, above, from the forehead, by the eyebrows; and, below, are confounded with the cheeks. They are distinguished into *upper* and *lower*. The former is much broader and more movable than the latter. They are separated by a transverse cleft; and their edges are thick, and furnished with the cilia or eyelashes. Supported by the tarsal cartilages, they unite at the extremities of the transverse diameter of the orbit, forming two angles,—the innermost being called the *greater angle of the eye*, or *inner or greater canthus*; the other, the *lesser or external angle or canthus*. They are formed, 1. Of a thin dermoid texture: 2. Of a muscular membrane,—a portion of the orbicularis: 3. Of a particular fibrous membrane: 4. Of the tarsi: and 5. Of a mucous membrane,—a part of the tunica conjunctiva.

Their vessels and nerves are called Palpebral, (q. v.)

PALPEBRA INFERIOR EXTRORSUM FLEXA, Ectropion—p. Tertia, Valvula semilunaris.

PALPEBRÆ SUPERIORIS PRIMUS, Levator palpebræ superioris.

PAL/PEBRAL, *Palpebra'lis*, from *palpebra*, 'the eyelid.' That which belongs or relates to the eyelid.

PALPEBRAL ARTERIES are those distributed to the eyelids. They are two in number; an *upper* and a *lower*. The *former* arises from the ophthalmic, a little beyond the cartilaginous pulley of the greater oblique muscle, and descends towards the upper eyelid, over which it is distributed. The *latter* arises at the side of, and a little behind, the preceding, and sends its ramifications to the lower eyelid and the neighbouring parts. The palpebral veins have a similar arrangement; except that some of them open into the temporal and labial veins.

PALPEBRAL FLUX, Puriform. A puriform discharge, furnished by the glands of Meibomius, when inflamed; and to which Scarpa attributes fistula lachrymalis, in many cases.

PALPEBRAL LIGAMENTS are distinguished into *superior* and *inferior*. Some anatomists, with Winslow, have described, under this name, the fibrous layer, which is attached,—on the one hand, to the outer part of the circumference of the orbit; on the other, to the tarsal cartilages.

PALPEBRAL NERVES, or *Nerves of the Eyelids*, arise, particularly, from the frontal and lachrymal branches; from the ophthalmic nerve of Willis; and from the facial, nasal, and infra-orbital branch of the superior maxillary nerve.

PALPEBRALIS, Orbicularis palpebrarum.

PALPEBRARUM APERIENS RECTUS, Levator palpebræ superioris—p. Duo musculi, Orbiculares palpebrarum.

PALPITATIO ARTERIARUM, see Palpitation—p. Cordis trepidans, Cardiotromus.

PALPITATIO MEMBRORUM. A term used by Gaubius for involuntary shaking of the legs.

PALPITATION, *Palpitu'tio, Palmus, Palpita'tio Cordis, Cardiopal'mus*, (q. v.) *Subsul'tio*,

Clonns Palpita'tio, (F.) *Palpitation*, *P. du Cœur*. A name given to the pulsations of the heart, when they become stronger, more extensive, or more sensible to the individual, than ordinarily. Palpitations occur in a number of affections. They are, sometimes, owing to organic disease of the heart, hypertrophy, inflammation, &c.; at others, to a disease in some other viscus; whilst, frequently, they are merely nervous.

PALPITATION is sometimes felt in the arteries, constituting *Palpitatio Arterio'sa*.

PALPITATION DU CŒUR, Palpitation.

PALSY, Paralysis—p. Bell's, Paralysis, Bell's.

PALSY, LEAD. The paralysis of the upper extremities especially, induced by the poison of lead.

PALSY, SHAKING, Paralysis agitans.

PALUDAPIUM, Apium graveolens.

PALUS, Marsh, Penis—p. Sanctus, Guaiacum.

PAMBIOMA, Panbioma.

PAMPOISON, Syncope.

PAMPLE'GIA, *Punplegia*; from *πav*, 'all,' and *πληγω*, 'I strike.' General paralysis. Palsy of the whole body.

PANACE'A from *πav*, 'all,' and *αἰσθα*, 'I cure.' *Universa'le remedium*, *Panchrestos*. A pretended universal remedy. There is no such thing in existence.

PANACEA DUCIS HOLSATIE, Potassæ sulphas —p. Duplicata, Potassæ sulphas—p. Lapsorum, Arnica montana—p. Mercurialis, Hydrargyri subnurius—p. Mercurii rubri, Hydrargyri nitrico-oxylum—p. Vegetabilis, Crocus.

PANA'DA. Diminutive of Ital. *Pane*, 'bread,' (Lat. *Panis*), *Puna'ta*, *Panatel'la*. Bread, boiled in water to the consistence of pap. Sometimes administered to the sick.

PANARIS, Paronychia.

PANARITIUM, Paronychia.

PANARIUM, Paronychia.

PANATA, Panada.

PANATELLA, Panada.

PANAX COSTINUM, Pastinaca opoponax —p. Heracleum, Pastinaca opoponax—p. Pastinacea, Pastinaca opoponax.

PANAX QUINQUEFO'LIUM, *Ginseng*, *Ninsing*. Family, Araliaceæ. Sez. Syst. Polyandria Monœcia. This plant grows in Tartary and North America. The root is about the thickness of the little finger; an inch or two in length, often dividing into two branches; of a whitish-yellow colour; wrinkled on the surface, and of a compact, almost horny, texture. It has no smell, but a very sweet taste, combined with a slight degree of aromatic bitterness. It is much esteemed by the Chinese, who pay a high price for it. It is a gentle and agreeable stimulant.

PANBIO'MA, *Pambio'ma*, from *πav*, 'all,' and *βίος*, 'life.' The original animating principle. The general principle of life.

PANCHRESTOS, Panacea.

PANCHYMAGO'GUM, *Pantago'gon*, from *πav*, 'all,' *χυμας*, 'juice,' and *αγω*, 'I drive away.' A medicine, which the ancients believed capable of purging away all sorts of humours.

PANCHYMACOGUM MINERALE, Hydrargyri submariis.

PANCENOS, Epidemy.

PAN'CREAS, from *πav*, 'all,' and *κρεας*, 'flesh,' i. e. 'quite fleshy.' *Callic'reas*, *Totum*

carno'sum, *Gland'ula saliva'lis abdom'inis*, *Panc're'nē*. A gland, deeply seated in the abdomen, and lying transversely on the vertebral column, between the three curvatures of the duodenum, behind the stomach, and to the right of the spleen. Its left extremity is called the *tail* of the pancreas; it is smaller than the right, which is called the *head*. At its right portion, it has, almost always, a greater or less prolongation; called, by Winslow and some others, the *lesser pancreas*, (F.) *Petit pancréas*, *Pancreas of Aselli*, *Pancreas minus*. The pancreas resembles the salivary glands in structure, and has been called the *Abdominal Salivary Gland*. It is composed of lobes and granulated lobules, distinct and united by cellular tissue. From each of the granulations of these lobes arise the radicles of its excretory duct, which are very delicate, and are united like veins. The duct itself, *Ductus Pancreat'icus*, *Canal or Duct of Wirsung* or *Wirsungus*, (F.) *Canal pancréatique*, proceeds in a serpentine course into the substance of the organ; and, when it has reached behind the second portion of the duodenum, it becomes free, and is of the size of a crow's quill. It opens at an acute angle into the choledoch duct, or proceeds close to it, opening separately into the duodenum. The *Pancreatic arteries* are very numerous and small. They proceed from the celiac, splenic, superior mesenteric, right gastro-epiploic, coronaria venticuli, and left capsular. Its veins open into the radicles of the vena porta; and, particularly, into the splenic and lesser mesenteric. Its nerves emanate from the solar plexus, and its lymphatics pass into ganglions, to which it gives its name. The pancreas secretes the pancreatic juice, *Succus seu Liquor Pancreaticus*, *Lympha Pancreatis*, which resembles the saliva.

PANCREATEMPHRAX'IS, from *παγκρεας*, 'the pancreas,' and *εμφρασσω*, 'I obstruct.' Obstruction of the pancreas.

PANCREAT'IC SARCO'MA OF ABERNETHY, *Emphy'ma Sarco'ma pancreat'icum*. A tumour, in irregular masses, connected by loose fibrous substance, like the irregular masses of the pancreas. Found in the cellular substance; but, more usually, in lymphatic glands chiefly in the female breast.

PANCREATIT'IS, *Inflamma'tio Pancreatis*, (F.) *Inflammation du Pancréas*. Inflammation of the pancreas;—an affection, the phenomena of which are not well known to us.

PAN'CREATOID, from *παγκρεας*, 'the pancreas,' and *ειδος*, 'appearance.' A tumour, resembling the pancreas in structure.—Maunoir.

PANCRENE, Pancreas.

PANDALITIUM, Paronychia.

PANDEMIOS, Epidemy.

PANDICULA'TION, *Pandicula'tio*, *Scordine'ma* or *Scordin'e'ma*, *Scordinis'mos*, *Clonns Pandicula'tio*, from *pandere*, 'to stretch out,' *Stretching*, *Hol'ices* (Pl) An action, which consists in elevating the upper limbs, and throwing the head and trunk backwards, at the same time that the lower limbs are extended. This series of motions of the extensor muscles is, in some measure, independent of the will, and is accompanied with yawning, which is equally involuntary. In the state of health, stretching occurs before and after sleep; especially when we are fatigued. It is, also, observed at the onset of certain paroxysms of fever, hysteria, &c.

PANICAUT, *Eryngium campestre*—*p. Maritima*, *Eryngium maritimum*.

PANICUM ITALICUM, *Italian Panic Grass*, *Indian Millet*, *Guinea Corn*, *Barbadoes Millet*, *Milium Indicum*, *Sorghum*, *Holcus Sorghum*, (F.) *Millet des oiseaux*. *Nat. Ord. Gramineæ*. The seed—*Mil'ii Sem'ina*—are much esteemed in Italy, being a constant ingredient in the soups, and made into a variety of forms for the table.

PANICUM MILIA'CEUM, *Common Millet*, *Milium*, *Cenchrus*, (F.) *Millet ordinaire*. Millet seed are esteemed a nutritious article of diet and are often made into puddings.

PANIS CANICACEUS, see *Canicæ*—*p. Ciliaris seu secundarius*, *Syncomistos*—*p. Cuculi*, *Oxalis acetosella*—*p. Porcinus*, *Cyclamen*.

PANNI, Swathing clothes.

PANNICULE CHARNU, *Carnosus panniculus*.

PANNICULUS. Diminutive of *Pannus*, cloth. A piece of fine cloth. *Pterygion*, (q. v.)

PANNICULUS ADIPOSUS, Cellular membrane—*p. Cordis*, *Pericardium*—*p. Hymenæus*, *Hymen*.

PANNICULUS CARNO'SUS, *Tu'nica carnosa*, *Muscular Web*, *Mantle*, is a general covering, found in the quadruped, and formed by a thin, subcutaneous muscle, which serves to move the skin. It exists only in certain parts of the human body; as in the forehead, where it is formed by the occipito frontalis; in the neck, by the platysma myoides; and, in the scrotum, by the cremaster muscle.

PANNUS. A piece of cloth. This word has several other meanings, which are equivocal. It means a tent for a wound. Also, a speck in the eye, likened to a piece of rag; the vessels over the corneal epidermis being so numerous as to form a vascular network; also, an irregular nevus or mark on the skin.—Castelli.

PANNUS HEPATICUS, *Chloasma*—*p. Lenticularis*, *Ephelides*.

PANOCHIA, *Bubo*.

PANOPHOBIA, *Pantopho'bia*, *Athym'ia*, *Pavor*, (F.) *Frayeur nocturne*, *Souci*, *froni Iar*, 'the god Pan,' and *φοβος*, 'fear.' A panic or fear—inspired by the god Pan, according to the opinion of the ancients. Some derive it from *παν*, 'all,' and *φοβος*, 'fear.' This is sometimes morbid, and is a symptom of melancholy.

PANOPHTHALMITIS, from *παν*, 'all,' and *ophthalmitis*; inflammation of the eye. Inflammation of the whole eye.

PANPLEGIA, *Pamphlegia*.

PANSEMENT, Dressing.

PANSIES, *Viola tricolor*.

PANSERMIA, from *παν*, 'all,' and *σπερμα*, 'sperm.' The theory of *Dissemination of Germs*, according to which, ova, or germs, are disseminated over all space, undergoing development under favourable circumstances.

PANTAGOGON, *Panchymagogum*.

PANTICES, Intestine.

PANTING, Anhelatio.

PANTOPHAGUS, Omnivorous.

PANTOPHOBIA, *Hydrophobia*, *Panophobia*.

PANUS, *Phygethlon*—*p. Faucium*, *Stomatopanus*—*p. Inguinalis*, *Bubo*.

PAP OF THE THROAT, *Uvula*.

PAPAS AMERICANUS, *Solanum tuberosum*.

PAPA'VER, *P. somniferum*, *Mecon*. The *White Poppy*, *Papaver sativum*. (F.) *Pavot des*

Jardins. *Family*, *Papaveracæ*. *Sez. Syst. Polyandria Monogynia*. The CAPSULE OF THE *WHITE POPPY*, *Codia*, *κωδία* or *κωδία*, *Scaphion*, *σκαφίον*, *Papav'eris Caput vel Cap'sula*, *Poppy-head*, is used in fomentation, as an anodyne and relaxant, to inflamed or ulcerated parts. The expressed oil of the seeds is called by the French *Huile d'Œillette*. It is from this poppy that we procure—*OPIMUM*; called, also, *Opium Thebæicum*, *Meco'nium*, *Opion*, *Manus Dei*, *Affion*, *Amphiam*, *Affum*, *Osoron*, *Lau'danum*. It is the milky juice obtained, after the flowering of the plant, by making longitudinal incisions in the capsules and stalks. It is commonly obtained from the *Levant* or *India*, where the poppy grows abundantly. *Opium* is a compound of morphia, meconic acid, narcotine, caoutchouc, fecula, resin, oil, and several other substances. *Turkey Opium* is of a heavy, and slightly fetid odour. Its taste is nauseous, bitter, acrid, and warm: it is in flat pieces; solid and tenacious; of a dark brown colour and yellowish, when powdered; marking a light brown, interrupted streak on paper. In *East India Opium*, the odour is the same, and empyreumatic; the taste is less bitter, but more nauseous, and the colour darker. *Opium* is stimulant, in small doses; sedative, in large; narcotic and anodyne; operating through the nervous system. It is a most valuable remedy in all painful affections, and in inflammations, when given so as to produce its full, sedative effect, especially in peritonitis. In diarrhœa and dysentery, it acts as an astringent; in intermittents, it will often prevent the paroxysm. In typhus, in small doses, it acts as a cordial; in larger, it allays irritation and produces sleep. When applied externally, its narcotic effects are developed: and, hence, it is a useful application to irritable sores, painful tumours, &c. Dose, gr. $\frac{1}{4}$ to $\frac{1}{2}$ as a stimulant; gr. j to iv as a sedative.

PAPAVER CEREALE, *P. rhœas*—*p. Corniculatum*, *Chelidonium majus*—*p. Erraticum*, *P. rhœas*—*p. Luteum*, *Chelidonium majus*.

PAPAVER NIGRUM. This is merely a variety of the white poppy, producing black seeds.

PAPAVER RHÆAS. The systematic and pharmacopœial name of the *Red corn-poppy*, *Papaver erraticum*, *Papaver cereale*, *Rhœas*, (F.) *Coquelicot*. The heads of this species contain, also, a milky juice of a narcotic quality. A syrup has been directed of its flowers, which has been esteemed diaphoretic and slightly soothing; but is more admired for its colour than for any other property.

PAPAVERCULUM, *Meconium*.

PAPAW TREE, *Carica Papaya*.

PAPAYER, *Carica Papaya*.

PAPIL'LA, *Thele*. Diminutive, perhaps, from *papa*, one of the earliest cries of the infant, ascribed to a craving for food. The end of the breast, or nipple. An eminence similar to a nipple, (q. v.) A name given to small eminences, more or less prominent, at the surface of several parts particularly of the skin and mucous membranes, in which latter situation they are also called *Villi*. See *Villous*. They appear formed by the ultimate expansion of the vessels and nerves, and are susceptible, in some cases, of a kind of erection. They are also called *Papillæ nervosæ*, *P. pyramida'les*, *Nervous papillæ*, (F.) *Papilles ou Papilles nerveuses*, *Houppes nerveuses*.

PAPILLÆ CALICIFORMES, see P. of the tongue—p. Capitata, see P. of the tongue—p. Conical, see P. of the tongue—p. Conoidal, see P. of the tongue—p. Filiform, see P. of the tongue—p. Fungiform, see P. of the tongue—p. Fungoid, see P. of the tongue.

PAPILLÆ OF THE KIDNEY, (F.) *Mamelons du rein*, are the projections into the pelvis of the kidney of the apices of the cones of the tubular substance of the kidney. They are also called *Processus mamillares*, *Carunculae papillares*, *Pyramides Mulpighianæ*, *Papillæ renum*.

PAPILLÆ LENTICULAR, see P. of the tongue—p. Maximæ, see P. of the tongue—p. Mediæ, see P. of the tongue—p. Minimæ, see P. of the tongue—p. Mucosæ, see P. of the tongue—p. Nervous, see Papilla—p. Pyramidal, see P. of the tongue—p. Pyramidales, see Papilla—p. Renum, see P. of the kidney—p. Semilenticulares, see P. of the tongue.

PAPILLÆ OF THE TONGUE are very numerous and marked. They are observed, particularly, at the upper surface of the organ, and are distinguished into—1. The *Lenticular papillæ*, *Papillæ mucosæ*, *P. maxillæ*, *P. capitata*, *P. vallatæ*, *P. truncatæ*, *P. caliciformes*. They are arranged at the base of the tongue in two oblique lines having the shape of the letter V; and united angularly at the foramen cæcum. They have, in general, an ovoid or spherical shape, and are merely mucous follicles similar to those of the palate, lips, &c. 2. The *Fungiform or Fungoid papillæ*, *Papillæ mediæ*, *P. Semilenticulares*, are of indeterminate number, but always more numerous than the preceding. They are irregularly disseminated near the edges and the point of the tongue; have a rounded and flattened head, supported by a short and narrow footstalk. Their tint is whitish. Of their real nature we are ignorant. 3. The *Conical*, *Conoidul*, or *Pyramidal papillæ*, *P. minillæ*, *P. villosæ*, are the most numerous of all. Their arrangement is more regular in the forepart of the tongue than behind. They resemble small cones; the base being towards the tongue, and the apex free. The anterior are very small, and have been called *Filiform papillæ*. They appear to be produced by the terminations of the filaments of the lingual nerve, and are surrounded by an evident vascular network.

PAPILLÆ TRUNCATÆ, see P. of the tongue—p. Vallatæ, see P. of the tongue—p. Villosæ, see P. of the tongue.

PAPILLI-ÆUT-MAMILLI-FORMIS, Mastoid.

PAPULA. A pimple, *Exor'nia*. (F.) *Bouton*, *Bourgeon*. A small, acuminated elevation of the cuticle, with an inflamed base; very seldom containing a fluid, or suppurating, and commonly terminating in scurf or desquamation.

Papulæ form the first order of Willan and Bateman's arrangement of cutaneous diseases.

PAPULA AGRIA, Lichen agrius—p. Fera, *Herpes exedens*.

PAPULÆ, Lichen—p. Siccæ, Lichen—p. Sudoris, Miliary Fever.

PAPPUS AMERICANUS, *Solanum tuberosum*.

PAQUERETTE VIVACE, Bellis.

PAR OPTICUM NERVORUM, Optic nerve—p. Primum nervorum cerebri, Olfactory nerves—p. Quintum nervorum cerebraliū, Trigemini—p. Secundum nervorum, Optic nerve—p.

Septimum sive faciale, Facial nerve—p. Trigemini, Trigemini—p. Trium funicularum, Trigemini—p. Vagus, Pneumogastric—p. Visorius, Optic nerve.

PARA, παρα, a common prefix, 'by, near, contrary to, through,' (*per*;) 'above and beyond,' (*ultra*;) 'besides,' (*prater*.) In certain terms, as in *Paracousis*, *Parapsis*, *Parabysina*, &c., used by Dr. Good, *Para* means a defective or morbid condition.

PARABALANUS, from παραβαλλειν, (*para*, and βαλλειν, 'to cast,') 'to expose.' A name given, by the ancients, to a person who devoted himself to the service of the sick in hospitals; and particularly during epidemics and the plague.

PARACENTERIUM. Same etymon as the next. Woolhouse has given this appellation to a small trocar, employed by Nuck for puncturing the eye in cases of dropsy of that organ.

PARACENTE'SIS, *Perforatio*, *Punctio*, *Punctura*, *Cenembat'esis*, *Cente'sis*, *Compunctio*: from παρακεντω, (*para*, and κεντω, 'I pierce,') 'I pierce through.' The operation of tapping to evacuate the collected fluid in ascites, ovarian dropsy, &c.

PARACENTE'SIS; Puncturing.

PARACENTICION, Trocar.

PARACEPHALUS, Anencephalus, Pseudocephalus.

PARACMASTIC, *Paracmas'ticus*, from παραματω, 'I decrease.' Decreasing. An epithet to a distemper, which gradually decreases. Also, according to Galen, the period of life when a person is said to grow old, which he places at from 35 to 49, after which he is said to be old,—a definition that would not suit us at the present day.—Gorræus and Castelli.

PARACMASTICOS. See Acmaستicos.

PARACME, Decline.

PARACOE. See Copiosis.

PARAC'OEPE, *Paraph'ora*, *Paracr'usis*, from παραοπειω, 'I strike falsely.' Delirium. In Hippocrates, it means the slight delirium, which sometimes occurs in febrile diseases.

PARACOUSIA. See Copiosis.

PARACRUSIS, Paracope.

PARACUSIS, Copiosis. Also, perverted audition.

PARACUSIS ACRI'S, *Audit'us ac'rior*, *Parac'usis oxyco'a*, from παρα, 'defective,' and ακουσις, 'the act of hearing.' Hearing painfully acute, and intolerant of the lowest sounds; a symptom in otalgia, epilepsy, cephalitis, and febrile affections.

PARACUSIS DUPLICATA, Double hearing—p. Imaginaria, Tinnitus aurium—p. Imperfecta, Double hearing, P. perversa—p. Obtusa, Barycoia—p. Oxycoia, P. acris.

PARACUSIS PERVER'SA, *P. Willisiana*, *P. imperfecta*, *Perverse hearing*. The ear only sensible to articulate sounds, when excited by other and louder sounds intermixed with them—Good.

PARACUSIS SURDITAS, see Copiosis—p. Willisiana, P. perversa.

PARACYESIS, Pregnancy, morbid, Pregnancy preternatural—p. Abortus, Abortion—p. Tubaria, Salpingo-cyesis.

PARACYNANCHE, (*para*, and *cynanche*.) Inflammation of the external muscles of the larynx. According to others, a slight cynanche. (q. v.)

PARÆSTHESIS, Paresthesis—p. Auditus flacca, Proptoma auricularum.

PARAGEUSIS, Ageusia. Also, perversion of taste.

PARAGLOS'SA, from *παρα*, and *γλωσσα*, 'the tongue.' Swelling of the tongue, *Dysphagia Linguo'sa*. Sauvages, under the term *Paraglossa deglutito'ria*, means a pretended doubling of the tongue into the pharynx, (F.) *Renversement de la langue*.

PARAGOGE, Adduction, Coaptation.

PARAGOMPHO'SIS, *Paragomphosis capitis*; from *παρα*, 'by,' 'near,' and *γομφοσις*, 'a nailing.' Wedging of the head of the child in the pelvis during labour.

PARALAMP'SIS, *παράλαμψις*, from *παρα*-*λαμπω*, (*παρα*, and *λαμπω*, 'I shine,') 'I shine at the side of.' A cicatrix on the transparent part of the eye.—Hippocr.

PARALLAGMA, *Chevauchement*.

PARALLAXIS, *Chevauchement*.

PARALLE'LA. A kind of scurfy, cutaneous eruption, affecting the palms of the hands, in parallel lines, and symptomatic of the venereal disease.—Forestus.

PARALOPH'IA, from *παρα*, 'near,' and *λοφια*, 'the first vertebra of the back.' The lower and lateral part of the neck, near the vertebrae.—Keil.

PARALYSIE, Paralysis.

PARALYSIS, *Par'esis*, *Resolutio membro'rum*, *R. nervo'rum*, *Carus paralysis*, *Catal'ysis*, (F.) *Paralytic*, *Résolution des membres*; *Palsy*, from *παρالىω*, (*παρα*, and *λυω*, 'I loosen,') 'I relax.' Abolition or great diminution of the voluntary motions, and, sometimes, of sensation, in one or more parts of the body.

Palsy is said to be *local*, when it affects only a few muscles. When it extends to half the body, vertically or horizontally, it is called *Hemipleg'ia*, or *Parapleg'ia*, (q. v.) It is commonly symptomatic of disease of the brain or of the nerves themselves, and is a frequent accompaniment, precursor, or successor of apoplexy. The immediate cause is, generally, pressure, either by blood effused, or by serum, or by vascular turgescence. At its onset, therefore, blood-letting may be advisable; but, afterwards, the disease becomes one of nervous debility, and requires stimulants—to the paralyzed parts, or to the mucous membranes:—frictions, sinapisms, blisters, the moxa, baths, electricity, galvanism, purgatives, and the nux vomica, which last has the property of exciting movements where the will has no longer power. The disease generally admits only of palliation, and is extremely apt to recur.

PARALYSIS, *Primula veris*.

PARALYSIS AG'ITANS, *Shaking Palsy*. A variety of tremor, in which the muscles are in a perpetual alternation of contraction and relaxation.

PARALYSIS, BELL'S, *Bell's Palsy*. The paralysis of the face, induced by a lesion of the portio dura, has been so called by some, owing to Sir Charles Bell having been one of the first to enumerate distinctly the symptoms attendant upon it.

PARALYSIS BERIBERIA, *Beriberi*—p. Hemiplegia, Hemiplegia—p. Medullaris, Paraplegia—p. Rachialgia, Colic, metallic—p. Scorbutica, Pellagra—p. Spinalis, Paraplegia.

PARALYTIC STROKE, see *Stroke*, paralytic.

PARAME'NIA, *παράμηνια*, from *παρα*, 'badly,' and *μην*, 'a month.' *Menstruatio anom'ala*, *Menses anom'ale*, *Mis-menstruation*. Difficult menstruation. (q. v.) Disordered menstruation.

PARAMENIA DIFFICILIS, *Dysmenorrhœa*—p. Erroris, Menstruation, vicarious—p. Obstructionis, see *Amenorrhœa*—p. Profusa, Menorrhagia—p. Superflua, Menorrhagia.

PARAME'RIA, *παράμηνια*, from *παρα*, 'about,' and *μηρος*, 'the thigh.' The internal parts of the thigh.

PARAMESOS, Annular finger, see *Digitus*.

PARANCEA, Delirium, Dementia.

PARANYMPHUS, from *παρα*, 'near,' and *νυμφη*, 'a young spouse,' 'a bride.' A name given by the ancients, to him who led the bride to the house of her husband. The term was adopted into the ancient schools of medicine, to designate the usual discourse pronounced at the end of the prescribed period of study for licentiate, in which the qualifications and merits of the candidate were described.

PARAPATHIA, *Pathomania*.

PARAPECHYON, Radius.

PARAPHIA, *Parapsis*.

PARAPHIMO'SIS, *Periphimo'sis*: from *παρα*, 'about,' and *φιμωσ*, 'I bridle.' Strangulation of the glans penis, owing to the opening of the prepuce being too narrow. It frequently happens in persons affected with phimosis, when the prepuce has been pushed violently behind the base of the glans, during copulation, &c. In paraphimosis, the narrow and resisting aperture of the prepuce forms, behind the corona glandis, a kind of ligature, which strangulates the part, causes it to swell and inflame, and even to become gangrenous. Attempts must be made to bring back the prepuce. These excite considerable pain, yet they must be persevered in for some time; and should they not succeed, the rings, formed by the tumefied prepuce, must be cut transversely, and the antiphlogistic treatment be adopted.

PARAPHOBIA, *Hydrophobia*.

PARAPHO'NIA, *Clangor*; from *παρα*, and *φωνη*, 'the voice.' Affection of the voice, when its character or *timbre* is disagreeable.

PARAPHONIA CLANGENS, *Oxyphonia*—p. Gut-turalis, *Asaphia*—p. Nasalis, *Rhinophonia*—p. Rauca, *Raucedo*—p. Ulcerosa, *Oxyphonia*.

PARAPHORA, Delirium, *Paracope*.

PARAPHRENESIS, *Paraphrenitis*—p. Diaphragmatica, *Diaphragmitis*.

PARAPHRENITIS, from *παρα*, 'near,' and *φρενες*, 'the diaphragm.' *Paraphrenesis*. A name given to inflammation of the diaphragm, (see *Diaphragmitis*.) which was supposed always to produce delirium:—as well as to the delirium itself, accompanying that affection.—See *Phrenitis*.

PARAPHROSYNE, Delirium.

PARAPHROTES, Delirium.

PARAPLEG'IA, *Paraplex'ia*, *Rhachiparal'ysis*, *Rhachioparal'ysis*, *Paral'ysis spinu'lis*, *P. medulla'ris*, *Carus paralysis parapleg'ia*, from *παρα*, dim. particle, and *πλησσω*, 'I strike,' Palsy of the lower half of the body, including the bladder and rectum. It is, generally, owing to disease of some part of the cerebro-spinal axis; especially of the spinal portion. The ancients sometimes used the term for incomplete

apoplexy. Some authors have, also, made a distinction between *paraplegia* and *paraplexia*,—using the former for a *partial apoplexy*;—the latter for *general or complete apoplexy*.

PARAPLEURITIS, Pleurodynia.

PARAPLEXIA, Paraplegia.

PARAP'OP'LEXY, *Parapoplexia*, from *παρά*, dim., and *ἀποπληξία*, 'apoplexy.' False apoplexy; a soporose state, resembling apoplexy; and, especially, that which occurs in the paroxysms of pernicious intermittents.

PARAP'SIS, *Paraph'ia*, from *παρά*, 'defectively,' and *ἅπτομαι*, 'I touch.' Sense of touch or general feeling vitiated or lost.—Good.

PARAP'SIS AC'RI'S TEMERITUDO, Soreness—p. Experts, Torpor, Anæsthesia—p. Illusoria, Pseudæsthesia—p. Pruritus, Itching.

PARARMA, Fimbria.

PARARRHYTH'MOS, from *παρά*, 'dim,' and *ῥυθμός*, 'rhythm.' An epithet for the pulse, when it has not the rhythm proper to the age and constitution of the individual.

PARARTHRE'MA, from *παρά*, and *ἄρθρον*, 'a joint.' Incomplete luxation.

PARASCEPAS'TRA, from *παρά*, and *σκεπάω*, 'I cover.' A cup or bandage, which covers the whole head.—Galen.

PARASCEUE, Apparatus.

PARAS'CHIDES, from *παρά*, and *σχιζω*, 'I cleave.' Fragments or splinters of a broken bone

PARASITE, *Parasitus*, from *παρά*, 'near,' and *σιτος*, 'corn,' 'food.' Parasites are plants which attach themselves to other plants; and animals which live in or on the bodies of other animals,—so as to subsist at their expense. The mistletoe is a parasitic plant:—the louse a parasitic animal. The chief parasitic animals are the *Pediculus humanus corporis*, *P. capitis*, *P. pubis*, *Pulex irritans*, *P. pen'trans*, and the *Aëurus Scabiei*.

PARASITICIDE, Antiparasitic.

PARASITISMUS INTESTINALIS, Helminthiasis—p. Superficieci, Malis.

PARASPA'DIA, from *παρά*, and *σπᾶω*, 'I draw.' A preternatural opening of the urethra at the side of the penis. One whose urethra opens in this manner is called *Paraspadia'us* and *Paraspa'dias*.

PARASPHAGIS, from *παρά*, 'near,' and *σφαγή*, 'the throat.' The part of the neck contiguous to the clavicles.

PARASTATA, Epididymis.

PARASTAT'E, from *παρίσταιμι*, (*παρά*, and *ίσταμι*), 'I stand near.' The prostate. In Hippocrates, it means the epididymis. The epididymes were called by Herophilus and Galen *Varico'sæ parastatæ*, to distinguish them from the *glandulo'sæ parastatæ* or *prostate*, (q. v.) Rufus of Ephesus called the Tubæ Fallopiæ *Parastatæ varico'sæ*.

PARASTAT'E GLANDULÆ, Prostate.

PARASTRE'MMA, from *παρastre'ro*, (*παρά*, and *στρέφω*, 'I turn,') 'I distort or pervert.' Convulsive distortion of the face, the soft parts being drawn laterally.

PARASYNCACHE, Cynanche parotidæa.

PARATHENAR, from *παρά*, 'near,' and *θεῖα*, 'the sole of the foot.' Winslow called *grand parathenar*, *parathenar major*, a portion of the abductor of the little toe; and *petit para-*

thenar, *parathenar minor*, the short flexor of that toe.

PARATHENAR MAJOR, Abductor minimi digiti pedis—p. Minor, Flexor brevis minimi digiti pedis.

PARATHROMA, Elongatio.

PARATRIMMA, Chafing.

PARATROPH'E, from *παρά*, 'dim,' and *τροφή*, 'nourishment.' Misnutrition.

PAREGORICUS, Anodyne.

PAREIA, Gena.

PAIREIRA, see P. brava.

PAIREIRA BRAVA, *Cissum'pelos Pareira*, *Pureyra*, *Batua*, *Pariera brava*, *Abu'ta*, *Albu'tua*, *Botou*, *Cau-pebu*, *Overo butua*. Family, Menispermæ. *Sex. Syst. Diœcia Monadelphia*. The root of this plant,—*Paireira* (Ph. U. S.)—a native of South America and the West Indies, has a sweet taste with considerable bitterness and slight roughness. It has been recommended in nephritic and calculous affections; but it is not much used.

PA'RELLE, Rnmx hydrolapathum.

PARENCEPHALIS, Cerebellum.

PARENCEPHALOC'E'LE, from *παρεγκεφαλις*, (*παρά*, and *εγκεφαλος*, 'the brain,') 'the cerebellum,' and *κῆλη*, 'a tumour,' *Hernia of the cerebellum*; a very rare disease. It occurs under the form of a soft, indolent, or slightly painful tumour, without change in the colour of the skin, and is situate in the occipital region. It is constituted of the cerebellum, which escapes through an aperture in the occipital bone. Great attention must be paid not to mistake it for an ordinary tumour, as its extirpation would be attended with fatal consequences.

PAREN'CHYMA, *Curo parenchymat'ica* seu *viscerum* seu *viscera'lis* seu *viscero'sa*, *Substantia parenchymato'sa*, *Procheuma*. The texture of glandular and other organs, composed of agglomerated globules united by cellular tissue, and tearing with more or less facility. Such is the texture of the liver, kidneys, &c. *Παρεχυμα* signifies in Greek, effusion; (*παρά*, *εἰς*, and *χύνω*, 'I pour,') and it was believed, that this tissue consisted of effused blood or other fluid.

PAR'ESIS, from *παρίσταιμι*, 'I relax.' Paralysis, (q. v.) According to some, a slight, incomplete paralysis, affecting motion, not sensation.

PARESTHE'SIS or PARÆSTHE'SIS, *Sensus imperfectus*, from *παρά*, 'defective,' and *αἴσθησις*, 'sensation.' Congenital misconstruction of the external organs of sense. A genus in the nosology of Good. Also, perversion of sensibility.

PARFUM, Suffimentum.

PARIERA BRAVA, Pareira brava.

PARIES, Table.

PARIETAL, *Parieta'lis*, from *paries*, *parietis*, 'a wall.'

PARIETAL BONES, *Ossa parietalia*, *Ossa vertic'alia*, *Ossa ver'ticis*, *Ossa sincip'itis*, *Ossa breg'matis*, *Ossa nerva'lia*, are two fellow-bones, occupying the lateral and upper parts of the cranium, in the formation of which they assist. They have a quadrilateral shape: their external surface is convex, and presents, at its middle part, an eminence called the *Parietal protuberance*, (F.) *Bosse pariétale*. Their inner or cerebral surface, which is concave, has a de-

pression that corresponds with the preceding eminence, and which is called the *Fossa parietalis*. Above and behind, near the superior edge of these bones, is a foramen, which does not always exist, called the *Parietal foramen*, *Foramen parietale*, through which passes a vein that opens into the superior longitudinal sinus of the dura mater. Each parietal bone is articulated *above*, with its fellow; *below*, with the temporal bone; *before*, with the frontal; *behind*, with the occipital, and by the anterior and inferior angle with the great ala of the sphenoid. Each parietal bone is developed from a single point of ossification.

PARIETARIA, *P. officinalis*, *Helx'inē*, *Vitru'ria*. The *Wall pellitory*, (F.) *Paritaire commune*. Family, Urticæ. Sex. Syst. Polygamia Monœcia. This plant grows on old walls, and contains much nitrate of potassa. It is diuretic, but not much used.

PARIETES, Plural of *Paries*, 'a wall,' (F.) *Parois*. A name given to parts which form the enclosures—the limits of different cavities of the body, as the *Parietes of the cranium, chest, &c.*

PARIS, *P. quadrifolia*, *Oneberry*, *Truelove*, (F.) *Parisetle*, *Raisin de Renard*. It possesses narcotic properties, and was formerly considered a powerful love philter. It is emetic, and is sometimes used externally as a resolvent and anodyne.

PARISETTE, *Paris*.

PARISTH'MIA, from *παρά*, and *ισθμός*, 'the throat.' A word employed to designate the tonsils, and, likewise, inflammation of the tonsils. *Cynanche tonsillaris*, (q. v.)

PARISTHMIOT'OMUS, from *παρισθμία*, 'the tonsils,' and *τέμνω*, 'I cut.' An instrument with which the tonsils were formerly scarified.

PARISTHMITIS, *Cynanche*.

PAROCHETEUSIS, Derivation.

PARODONTIDES, from *παρά*, 'near,' and *δούς*, 'a tooth.' Tumours on the gums; parulis, &c.

PARODYNIA, *Dystocia*—p. *Perversa*, Presentation, preternatural.

PAROIS, *Parietes*.

PAROLE, Voice, articulated.

PARONIRIA, from *παρά*, and *ονειρον*, 'a dream.' Depraved, disturbed, or morbid dreaming. *Oνειροδυν'ia act'iva*, *Erethis'mus onειροδυν'ia*. The voluntary organs, connected with the passing train of ideas, overpowered by the force of the imagination during dreaming, and involuntarily excited to their natural or accustomed actions, while the other organs remain asleep.—Good.

PARONIRIA AMBULANS, *Somnambulism*—p. *Salax*, Pollution.

PARONY'CHIA, *Pan'aris*, *Redu'via*, *Panarit'ium*, *Pandalit'ium*, *Passu*, *Dactylit'is*, *Pan'arium*, *Onych'ia*, from *παρά*, 'near,' and *ονυξ*, 'the nail.' The ancients gave this name to an inflammatory tumour, seated near the nail. Some of the moderns have extended it to inflammation of the hand, and even of the forearm. It usually means every phlegmonous tumour of the fingers or toes, and especially of the first phalanx. Four kinds of paronychia are commonly pointed out: 1. That seated between the epidermis and skin, called in France *Tourniole*. 2. That seated in the subcutaneous cellular tissue. 3. That occupying the sheath of a tendon; and 4. That considered to be seated between the periosteum

and bone. These three last are only different degrees of the same disease, constituting *Whitlow*. (F.) *Mal d'aventure*:—the worst kinds, in English, are called *Felon*. The inflammation generally commences in the subcutaneous cellular tissue, and spreads to other parts, occasioning excessive, lancinating pain, owing to the parts being put upon the stretch; hence, the necessity of dividing them freely,—even down to the bone, when there is reason to believe that the affection belongs to the fourth division,—making use of emollient applications, the antiphlogistic treatment, and opiates to relieve pain.

PARONYCHIA, *Asplenium ruta muraria*—p. *Digitum*, *Digitum*.

PAROPIA, *Canthus* (lesser.)

PAROPSIS, *Dysæsthesia visualis*—p. *Amaurosis*, *Amaurosis*—p. *Cataracta*, *Cataract*—p. *Glaucoosis*, *Glaucoma*—p. *Ilusoria*, *Pseudo-blepsia*—p. *Lateralis*, *Dysopia lateralis*—p. *Longinqua*, *Presbytia*—p. *Lucifuga*, *Nyctalopia*—p. *Noctifuga*, *Hemeralopia*—p. *Propinqua*, *Myopia*—p. *Staphyloma*, *Staphyloma*—p. *Staphyloma purulentum*, *Hypopyon*—p. *Staphyloma simplex*, *Hydrophthalmia*—p. *Strabismus*, *Strabismus*—p. *Synezeisis*, *Synezeisis*.

PAROPT'E/SIS, from *παρα*, dim., and *οπταω*, 'I roast.' Forcing a sweat by placing a patient before the fire, or putting him in a dry bath.

PARORA'SIS, from *παρα*, dim., and *οραω*, 'I see.' Perversion of sight, which prevents the person from judging accurately of the colour of objects. Hallucination, (q. v.)—Galen.

PARORCHID'IUM, from *παρά*, dim., 'something wrong,' and *ορχις*, 'testicle.' Any position of one or both testicles, different from that which they ought to occupy in the scrotum;—whether they may not have descended through the abdominal ring, or are drawn up to the groins by the cremaster muscle.

PAROR'CHIDO-ENTEROC'E/LĒ, *Hernia paror'chido-enter'ica*. Intestinal hernia complicated with displacement of the testicle.—Sauvages.

PAROSMIA, *Anosmia*. Also, perversion of smell.

PAROS'TIA, from *παρά*, 'defectively,' and *οστέον*, 'a bone.' Bones untempered in their substance, and incapable of affording proper support.—Good.

PAROSTIA FLEXILIS, *Mollities ossium*—p. *Fragilis*, *Fragilitas ossium*.

PAROTIA, *Cynanche parotidæa*.

PAROT'ID, *Gland'ula parotidea*, *G. ad Aures*, *Parot'is*, *Animel'ix*, *Alimel'ix*, *Lacticin'ia*; from *παρά*, 'about,' and *ορυ*, 'the ear.' The largest of the salivary glands, seated under the ear, and near the angle of the lower jaw. It is composed of many separate lobes, giving rise to excretory ducts, which unite to form one canal, called the *Parotid duct* or *Steno's canal*—the *Ductus superior* or *Superior salivary canal* of some. This duct, after having advanced horizontally into the substance of the cheek, proceeds through an opening in the buccinator muscle, and terminates in the mouth opposite the second upper molaris. About the middle of its course, it sometimes receives the excretory duct of a glandular body, situate in its vicinity, and called the *Accessory Gland of the Parotid*, *Socia Parotidis*. In the substance of the parotid are found—a number of branches of the

facial nerve, of the transverse arteries of the face, and the posterior auricular. It receives, also, some filaments from the inferior maxillary nerve, and from the ascending branches of the superficial cervical plexus. Its lymphatic vessels are somewhat numerous, and pass into ganglions situate at its surface or behind the angle of the jaw. The parotid secretes saliva, and pours it copiously into the mouth.

PAROTID, ACCESSORY GLAND OF THE. See Parotid.

PAROTIDE, Parotis.

PAROTIDON'CUS, from *παρωτις*, 'the parotid,' and *ὄγκος*, 'a tumour.' Swelling of the parotid.

PAROT'IS, (F.) *Parotide*, *Phleg'monē parotide*, *Inflamma'tio parotidum*, *Paroti'tis*, (F.) *Oreillon*, *Ourlé*, is, also, the name of a tumour, seated under the ear; which is reddish, hard, and attended with obtuse pain; the progress to suppuration being slow and difficult. Sometimes it is of a malignant character, sloughing, and long protracted.

PAROTIS CONTAGIOSA, Cynanche parotidæa—p. Epidemica, Cynanche parotidæa—p. Seroso glutine tumens, Cynanche parotidæa—p. Spuria, Cynanche parotidæa.

PAROTITIS, Cynanche parotidæa, Parotis.

PAROXYSM, *Paroxys'mus*, from *παροξύνω*, (*πάρα*, and *ὀξύειν*, 'to render sharp.') 'Irritate.' *Im'petus*, *Insultus*, *Inva'sio*, *Exacerba'tio*, *Acces'sio*, *Acces'sus*, (F.) *Exacerbation* *Redoublement*, *Accès*. The augmentation which supervenes at equal or unequal intervals in the symptoms of acute diseases. Also, a periodical exacerbation or fit of a disease.

PARS INFERIOR PEDIS, Sole—p. Naturalis medicinæ, Physiology—p. Prima asperæ arteriæ, Larynx—p. Vaga, Pneumogastric—p. Virilis, Penis.

PARSLEY, COMMON, *Apium petroselinum*—p. Macedonian, *Bubon Macedonicum*—p. Mountain, black, *Athamanta aureolum*.

PARSNIP, COW, *Heracleum spondylium*—p. Garden, *Pastinaca sativa*.

PART, see Parturition—p. *legitime et illegitime*, see Parturition.

PARTES GENERATIONI INSERVIENTES, Genital organs—p. Genitales, Genital organs.

PARTHENIUM FEBRIFUGA, *Matricaria*—p. Mas, *Tanacetum*.

PARTHENTIUS, (*Morbus*;) from *παρθένος*, 'a virgin.' A disease in a young female. Also, chlorosis.

PARTIES, LES, Genital organs—p. *Génitales*, Genital organs—p. *Honteuses*, Genital organs—p. *Génitoires*, Genital organs—p. *Naturelles*, Genital organs—p. *Nobles*, Genital organs—p. *Sexuelles*, Genital organs.

PARTIO, Parturition.

PARTRIDGE-BERRY, *Gaultheria*.

PARTS, THE, Genital organs.

PARTURA, Parturition.

PARTURIENT, *Parturiens*, from *parturire*, itself from *parere*, 'to bring forth.'

The *Parturient*, *Childbed*, or *Lying-in state*,

requires careful management, and is subject to various diseases.

A *Parturient* is a medicine which induces or promotes labour; as *Ergot*, and, perhaps, *Borate of Soda*.

PARTURIGO, Parturition.

PARTURIT'ION, *Puerp'rium*, *Partus*, *Partio*, *Parturi'tio*, *Parturi'go*, *Partu'ra*, *Tocos*, *To'cetos*, *Lochi'a*, *Apoc'e'sis*, *Labour*, (F.) *Accouchement*, *Couche*, *Travail d'Enfant*. The delivery of the fœtus and its appendages. Labour is the necessary consequence of conception, pregnancy, and the completion of gestation. It does not take place at the full time, until after nine months of utero-gestation,—the causes producing it being the contraction of the uterus and abdominal muscles. By different authors, the stages of labour have been variously divided. We may, perhaps, admit of four. The first stage comprises the precursory signs. One, two, or three days before labour, a mucous discharge, streaked with blood, takes place from the vagina, which is called the *Signum*, *Leucorrhœa Nubo'thi*, *Hæmorrhœ'gia Nubothi*, *Labour-show*, or *Show*; and, along with this, trifling grinding pains, called by the French *Mouches*, are felt in the loins and abdomen. *Second stage*:—Peculiar pains, which extend from the lumbar region towards the uterus; tension and dilatation of the neck and orifice of that organ; protrusion into the vagina of the envelopes of the fœtus, forming the *bag of waters*, (F.) *Poche des eaux*; and rupture or breaking of the waters. *Third stage*:—Contractions of the uterus and abdominal muscles; forcing pains; the head of the fœtus becomes engaged in the pelvis; the occiput being commonly situate above the left acetabulum, passes beneath the arch of the pubis. *Fourth stage*:—the head now presents at the vulva, the perineum being considerably distended; at length it clears the external parts, and the rest of the body is easily disengaged. The child still continues attached to the mother by the umbilical cord, which has to be divided. In the course of fifteen or twenty minutes, trifling pains occur, and the secundines are expelled. This completes delivery. In by far the majority of cases, the head is the presenting part, the occiput directed anteriorly, and the face posteriorly. Of 12,633 children, born at the Hospital *La Maternité* in Paris, from the tenth of December, 1797, to the 31st of July, 1806, the following were the presentations:

The head, with the face posteriorly,	12,120
The head anteriorly,	63
The breech,	198
The feet,	147
The knees,	3
Other positions,	102

12,633

The following table, drawn up from data furnished by Velpeau, gives an approximative view of the comparative number of presentations, according to the experience of the individuals mentioned:

TABLE, EXHIBITING THE RATIO OF REPRESENTATIONS IN 1000 CASES.

Labour has received different names, according to the period of pregnancy at which it occurs, and the mode in which it takes place. It is called *miscarriage* or *abortion*, (q. v.,) prior to the 7th month; *premature labour*, between this and 8 months and a half; and *labour at the full period*,—(F.) *Accouchement à terme*,—when it happens at the end of 9 months. Labours have, likewise, been variously divided by different authors. Perhaps the one, into *Natural*, *Preternatural*, and *Laborious*, is as common as any;—*natural Labour* meaning that which would occur without manual assistance; *pre-*

ternatural, requiring the assistance of art, but by the hand solely: and, *laborious*, requiring instrumental assistance; which M. Capuron calls *Accouchement Mécanique*.

The French use the term *Part*, at times, synonymously with *delivery*; at others, with *fœtus*. *Suppression de part* means concealment of delivery: *Part légitime*, a fœtus which comes into the world with the conditions necessary for its enjoying advantages granted by law; and *Part illégitime*, one that does not fall under those conditions.

TABLE OF THE COURSE AND MANAGEMENT OF DIFFERENT KINDS OF LABOURS.

I. NATURAL LABOURS:	
<i>Or those in which Delivery can be effected without Assistance.</i>	
HEAD PRESENTING. (Four Positions.)	1. <i>Occiput towards the Left Acetabulum.</i>
	2. <i>Occiput towards the Right Acetabulum.</i>
	3. <i>Occiput towards the Right Sacro-iliac Symphysis.</i>
	4. <i>Occiput towards the Left Sacro-iliac Symphysis.</i>
The head with the chin bent upon the chest clears the brim of the pelvis. Motion of rotation produced by the inclined planes of the pelvis; the occipital protuberance is carried behind the symphysis pubis, and the face towards the hollow of the sacrum.	
The head attains the outlet: clears it; the occiput being first disengaged, and the face afterwards, which passes successively along the whole of the hollow of the sacrum. The shoulders enter the brim diagonally; and execute the movement of rotation. The one behind first clears the outlet. The same thing occurs with the nates.	
The same course is here followed: except that after the rotatory movement, the face passes behind the symphysis pubis, and the occiput into the hollow of the sacrum. The occiput is first extruded;—the face next.	
When the chin presents and is turned forwards, the face is first expelled: the head is thrown backwards. This presentation is uncommon. If the chin present and be thrown backwards, natural delivery cannot be effected.	

LOWER EXTRE-
MITY PRESENT-
ING.

(Four Positions
of the Feet,
Knees, and
Breech.)

1. *Heel, Tibia, or Sacrum towards the Left Acetabulum.*

2. *Heel, Tibia, or Sacrum towards the Right Acetabulum.*

3. *Heel, Tibia, or Sacrum towards the Right Sacro-iliac Symphysis.*

4. *Heel, Tibia, or Sacrum towards the Left Sacro-iliac Symphysis.*

The nates enter the brim diagonally: movement of rotation: the one passes behind the symphysis pubis; the other towards the hollow of the sacrum. The one behind is first extruded.

The same thing happens to the shoulders. The chin is bent upon the chest to clear the brim; movement of rotation: the occiput passes behind the symphysis pubis, and the face towards the hollow of the sacrum. The face clears the outlet first; the occiput last.

The same progress, except that after the movement of rotation, the face is towards the pubis, and the occiput towards the sacrum. The face is here again delivered first.

II. PRETERNATURAL LABOURS:

Or those which require Manual Assistance only.

I. PRESENTATION
OF THE HEAD,
UPPER EXTRE-
MITIES, BACK,
ABDOMEN, &c.

1. When the labour is without any serious complication, and the head is not in a good position at the brim of the pelvis; endeavours are to be made to place it in its natural position: the hand to be introduced with the fingers united, and the long diameter of the head to be placed diagonally in the brim, if possible. Or, the lever may be fixed over the occiput, by drawing down which, a closer approximation of the chin and chest may be effected; the position of the head to the pelvis being at the same time attended to.

2. If complicated with syncope, convulsions, hemorrhage, want of uterine action, &c., the feet must be laid hold of, and the child *turned*. For this purpose, empty the rectum and bladder; and turn, if possible, prior to the escape of the liquor amnii. The female may be placed on her back or left side, with the breech over the edge of the bed. Use the right or left hand, according as the feet of the child are to the right or left side of the pelvis; always so introducing the hand, that the child shall be in its palm. and the back of the hand opposed to the inner surface of the uterus. The hand and arm to be introduced during an interval of pain; and they must be flattened and tranquil whilst the uterus is contracting forcibly. If both feet cannot be readily brought down, seize one, and tie a fillet around it.

If the toes point to the vertebral column or to the abdomen of the mother, the head, in its descent, will not enter the pelvis: the chin and occiput will be hitched on the pubis and promontory of the sacrum. In such case, grasp the nates as soon as they have passed the os externum; and, during a pain, endeavour to direct the toes towards either sacro-iliac synchondrosis. When the fingers can be passed along the body of the child and over the shoulders to the bend of the elbows, draw down the arms successively. When the body is expelled, and the head filling up the brim, the termination of labour must be accelerated by passing two fingers over the shoulder of the child; using moderate and steady extracting power, whilst one finger of the other hand, passed into the mouth, depresses the chin on the sternum. In this way, the head may be extracted.

III. INSTRUMENTAL LABOURS:

Or those requiring the Assistance of appropriate Instruments.

GENERAL OBSER-
VATIONS.

If the pains become feeble, or inadequate from any cause;—or if the presenting part be firmly wedged in the pelvis; or the woman be becoming exhausted, instrumental assistance may be required. In all such cases, place the female on the back or left side, empty the bladder and rectum; wait till the os uteri is in a fit state; afford assistance during the pains; introduce the instrument during the intervals between the pains; have the patient on her left side, (generally;) and extract according to the axes of brim and outlet, as the case may be.

Apply these to the sides of the head of the child, so that the ears and parietal protuberances may be within the fenestræ. Introduce the left-hand blade first; the index and middle fingers of the right hand guiding it to the ear. With the right hand pass the other in an opposite line, corresponding with the course of the first blade, guided by the fore and middle fingers of the left hand; the third and little finger being employed to retain the left-hand blade in place; humour the instrument so as to allow the blades to lock. The handles may now be tied gently together. The force used must be from blade to blade, with a gentle, tractile effort.

1. *Short Forceps.*

2. <i>Long Forceps.</i>	Applicable where the head does not enter the brim. 'The long forceps must be applied, in most cases, over the occiput and face of the child, so that the convex edges of the blades may be towards the hollow of the sacrum. When used, the power may be exerted from side to side, with moderate traction.
3. <i>Lever or Vectis.</i>	The lever is applicable to the same cases as the forceps. It must not be used strictly as a lever, but as a hook with which to draw downwards. It may be applied to any part of the head, but is generally hitched on the occiput.
4. <i>Fillet and Blunt Hook.</i>	In certain cases of breech and knee presentation, where the hand is insufficient, it may be necessary to pass over the joint a fillet, or the blunt hook, with which to exert some force of traction. The operation is very simple. Disproportionate size of head, or distorted or deformed pelvis, may require the child to be destroyed, and its bulk lessened; or the Cæsarean section or symphysiotomy, or the induction of premature labour may be called for.
EMBRYULCIA.	The instruments required here, are the <i>Perforator Crotchet</i> , and <i>Craniotomy Forceps</i> . Make steady pressure on the abdomen; pass two fingers of the left hand up to the head: feel for a suture or fontanelle; introduce the perforator and bore through, until the progress of the instrument is arrested by its <i>shoulders</i> . Open the handles, and turn the instrument in different directions, so that the opening may be large enough to admit the perforator, with which the brain must be broken down. If, after this, delivery cannot be accomplished without further aid, pass up the craniotomy forceps; open the handles slightly, and introduce the blade without teeth within the cranium. On closing the forceps, a hold is obtained; and a tractive force can now be exerted during the pains; and the extrusion of the child be effected. Should great difficulty exist at the brim, the bones at the top of the head may have to be removed, until the base alone remains. The chin must then be brought through first. The crotchet is often used instead of the craniotomy forceps, being passed into the opening made by the perforator, and hooked upon some bony projection in the interior of the skull; but it is not a good instrument. In presentations of the face demanding perforation of the cranium, the perforator should be introduced just above the nose, in the sagittal suture. When it is necessary to open the head after the lower extremities have been expelled, the perforation must be made behind the ear.
SYMPHYSIOTOMY AND CÆSAREAN SECTION.	In cases of great narrowness of the pelvis, the operation of <i>Symphysiotomy</i> , (q. v.) has been adopted by French practitioners,—rarely by British or American; and in extreme cases recourse has been had to the <i>Cæsarean Section</i> , (q. v.)
SEPARATION OF THE HEAD OF THE FÆTUS FROM THE BODY.	If the body of the fœtus have been forcibly separated, and the head left in the uterus, it must be laid hold of with one hand; and the forceps be applied, or the head opened and delivered as under Embryulcia. Should the head have been brought away, and the body left behind, the feet must be brought down.
INDUCTION OF PREMATURE LABOUR.	In cases of narrowness of the pelvis, where the fœtus, at the full term, cannot be born alive, delivery may be brought about at an earlier period, or as soon as the child is capable of carrying on its functions independently of the mother. The most advisable plan of accomplishing this object is merely to pass the finger round and round within the os and cervix uteri, so as to detach the decidua;—the membranes being thus left entire, and the life of the child not so much endangered, as where the membranes are punctured and the waters evacuated. Parturition usually follows within 48 hours.

PARTURIUM VANUM, *Fausse couche.*

PARTUS, Parturition—p. Cæsareus, Cæsarean section—p. Difficilis, Dystocia.

PARU'LIS, from *παρά*, 'near,' and *ουλον*, 'the gum.' *Apostéma parulis* vel *paroulis*, *Phlegmonē Parulis*, Gum Boil. Small abscesses are so called which form in the gums, sometimes without any known cause, but which often depend upon carious teeth.

PARU'RIA, from *παρά*, 'defectively,' and *ουρω*, 'I pass urine.' Morbid secretion or discharge of urine.

PARURIA INCONTINENS, Enuresis—p. Incontinens aquosa, see Diabetes—p. Inops, Ischuria, false—p. Mellita, Diabetes—p. Retentionis, Ischuria—p. Retentionis renalis, Ischuria—p.

Retentionis vesicalis, Retention of urine—p. Stullatitia, Strangury—p. Stullatitia mucosa, Cystirrhœa.

PAR'YGRON, from *παρά*, and *υγρός*, 'humid.' A liquid or moist preparation, for allaying topical inflammation.

PAS D'ANE, Tussilago.

PASMA, Catapasma.

PASQUEFLOWER, Anemone pulsatilla.

PASSA, Paronychia.

PASSE CORINTHIACÆ. See Vitis Corinthiaca.

PASAGES, DIGESTIVE, Ways, digestive—p. Second, Ways, second.

PASSE-PIERRE, Crithmum maritimum.

PASSERAGE SAUVAGE, *Cardamine pratensis*.

PASSIFLORA LAURIFOLIA, *Bay-leaved passion flower*. A native of Surinam. The fruit has a delicious smell and flavour, and quenches thirst, abates heat of the stomach, increases the appetite, &c.

PASSIFLORA MALIFORMIS, *Apple-shaped Granadilla*. The fruit of this species is esteemed a delicacy in the West Indies, where it is served up at table in desserts.

PASSIO CÆLIACA, *Cæliac flux*.—*p. Cholericæ*, *Cholera*.—*p. Felliflua*, *Cholera*.—*p. Hæmoptica*, *Hæmoptysis*.—*p. Hypochondriaca*, *Hypochondriasis*.—*p. Hysterica*, *Hysteria*.—*p. Iliaca*, *Ileus*.—*p. Ischiadica*, *Neuralgia femoropoplitea*.—*p. Pleuritica*, *Pleuritis*.—*p. Ventriculosa*, *Cæliac flux*.

PASSION, *Passio*, *An'imi Puthe'mata*, *Affectus*; from *patior*, *passus*, 'to suffer.' A lively affection of the mind; as rage, terror, love, hatred, &c.

PASSION-FLOWER, *BAY-LEAVED*, *Passiflora laurifolia*.

PASSIVE, *Passivus*. Same etymon as *PASSION*. An epithet for diseases, which seem owing to a greater or less diminution of the strength, or which are without apparent reaction. Thus, passive hemorrhages are such as supervene in debilitated individuals, or under conditions in which increased action of the arteries can scarcely be presumed. The term *passive* has, also, been given to aneurisms of the heart with extenuation of the parietes; in opposition to *active* aneurisms, with thickness of the parietes—hypertrophy.

PASSULÆ MAJORES, see *Vitis vinifera*.—*p. Minores*, see *Vitis Corinthiaca*.

PASSULA'TUM, *Uve passe*, 'raisins,' 'dried grapes.' A medicine in which the pulp of raisins is a chief ingredient.

PASSY, *MINERAL WATERS OF*. This village is in the vicinity of Paris. There are several springs, containing sulphates of lime, iron, and magnesia; alum; common salt; carbonate of iron; carbonic acid, &c. They are employed as tonic and astringent.

PASTA DE ALTHÆA, *Paste*, marshmallow—*p. Amygdalina*, *Confection* (almond)—*p. de Dactylis*, *Paste*, *date*.—*p. Emulsiva*, *Confection* (almond)—*p. de Jujubis*, *Paste* of jujubes—*p. Regia*, *Confection* (almond.)

PASTA GLYCYRRHIZÆ GUMMA'TA ET ANISA'TA, seu *Massa de extracto glycyrrhizæ*. A compound of extract of liquorice, gum Senegal, sugar, Florence orris root, and volatile oil of aniseed. Demulcent.

PASTE, *Pasta*, (F.) *Pâte*. A compound medicine like the *pastil*, but less consistent, flexible, less saccharine, and more mucilaginous.

DATE PASTE, *Massa seu pasta de dactylis*. Composed of dates, sugar, gum Arabic, water, and orange flower water. Ph. P. Demulcent.

PASTE OF JU'JUBES, *Pasta de ju'jubis*, *Massa de ziziphorum fructu*: composed of jujubes, gum Senegal, sugar, water, and tincture of lemon peel. Demulcent.

MARSHMALLOW PASTE, *Massa de gummi-Arabico*, *Pasta de althæa*. A compound of gum Arabic, sugar, white of egg, and orange flower water. Ph. P. It is demulcent.

PASTE, *WARD's*, *Confectio piperis nigri*.

PASTÈQUE, *Cucurbita citrullus*

PASTIL, *Pastillus*, *Diocres*, *Aricleula Cip'ria*, *Candela fumantis*, *Phthois*, *Phthois'cus*. A compound of aromatic substances in various shapes: used as a fumigating material, when set fire to. See *Fumigation*.

The French use the term *Pastille*, (L.) *Pastillus*, for a solid, dry, round, oblong, square, or triangular compound, whose base is essential oil, and sugar the excipient. These pastilles are, in fact, small lozenges, and only differ from the *tablette* in their smaller size.

PASTILLES, *FUMIGATING*. See *Fumigation*.

PASTILLI EMETINÆ PECTORALES, *Trochisci emetinæ pectorales*.

PASTIL'LI DE MENTHÆ PIPERIT'Æ, *Peppermint drops*. (*Sacch. alb.*, *aqua menthæ pip. destillat.* aa ζ ij. Boil to the consistence of an electuary. Take of fine white sugar, in powder, ζ iv, volatile oil of peppermint ζ ss. Mix, and add the electuary whilst warm. Drop it then on marble, and dry the drops. Ph. P.)

PASTINACA OPOPANAX. The name of the plant which furnishes the *Opopanax*. The plant, whence the gum-resin is obtained, has, also, been called *Opopanaxum*, *Panax heracleum*, *Panax costi-num*, *P. pastinacea*, *Kyna*, *Her'cules-all-heal*, *Opop'anax wort*. *Opopanax*, *Opopanaxis gummi-resi'na*, *Gezir*, *Pop'anax*, *Gummi panacis*, exudes from the roots, when wounded. Its odour is strong and peculiar; taste, bitter and acrid. It is met with in the shops, in lumps of a reddish-yellow colour, without; white, within. It has been recommended as an antispasmodic and emmenagogue; but is seldom used. Dose, gr. x to \mathfrak{z} j in powder.

PASTINACA SATI'VA, *Elaphoboscum*, *Pastinaca sylvestris*, *Ban'ica*, *Garden parsnep*. The root is sweet and nutritious, and is in esteem as an article of food. It has been used as a diuretic and demulcent in calculous affections, &c.

PASTINACA SYLVESTRIS, *P. sativa*.—*p. Sylvestris tenuifolia officinarum*, *Daucus Carota*.

PÂTE, *Paste*.—*p. Arsénicale*, *Arsenical paste*.

PATELLA, *Rotula*, *Epigon'alis*, *Epigon'tis*, *Epigon'nis*, *Mola*, *Concha*, *Oculus genui*, *Os scutiforme*, *Supergenualis*, *Caucaloides*, *Mylacris*, *Myle*, (F.) *Rotule*. Diminutive of *patina*, 'a dish,' so called from its shape. A sort of sesamoid, flat, short, thick, rounded bone, situated in front of the knee, and enveloped in the substance of the tendon common to the extensor muscles of the leg. The posterior surface of the patella is divided into two *facettes*, united angularly, which are incrustated with cartilage, and each of which is articulated with one of the condyles of the femur. The patella is developed by a single point of ossification. When the patella is fractured, it is difficult to produce bony union. This can only be accomplished by keeping up the fractured extremities closely in apposition.

PATELLA, *Cup*.—*p. Fixa*, *Olecranon*.

PATHEMA, *Affection*, *Disease*.

PATHEMATOLOGY, *Pathology*.

PATHETIC, *Patheticus*, from *παθεiv*, 'to feel.' That which moves the passions. A name given to the superior oblique muscle of the eye (q. v.), and, also, to a nerve.

NERVUS PATHETICUS, *N. trochleat'ris seu trochleatorius seu trochleator*, the 4th pair of

nerves, Oculo-musculaire interne (Ch.), (F.) *Nerf pathétique*, is the smallest encephalic nerve. It arises behind the inferior pair of the tubercula quadrigemina (*the testes*) at the lateral parts of the valvula Vieussenii. Its roots unite into one thin, round cord, which makes a turn upon the peduncles of the brain, and passes into a canal of the dura mater near the posterior clinoid process. It enters the orbit by the broadest part of the sphenoidal fissure, and terminates in the superior oblique muscle of the eye, by dividing into several filaments.

PATHNE, Alveolus.

PATHOG'ENY, *Pathogen'ia*; from *παθος*, 'a disease,' and *γενεσις*, 'generation.' The branch of pathology which relates to the generation, production, and development of disease.

PATHOGNOMONIC, *Pathognomonicus*, *Signum conjunctum*; from *παθος*, 'an affection,' and *γινωσκω*, 'I know.' A characteristic symptom of a disease.

PATHOLOGICAL ANATOMY, see *Anatomy*.

PATHOL'OGY, *Pathematology*, from *παθος*, 'a disease,' and *λογος*, 'a discourse.' The branch of medicine whose object is the knowledge of disease. It has been defined *diseased physiology, and physiology of disease*. It is divided into *general and special*. The first considers diseases in common;—the second the particular history of each. It is subdivided into *internal and external, or medical and surgical*.

PATHOLOGY, *HUMORAL*, *Humorism*.

PATHOMA'NIA, *Parapathia*, *Moral Insanity*, from *παθος*, 'a disease,' and *mania*, *Ma'nia sine Delirio*. A disorder of affection or feeling, as well as of those of the active powers or propensities.

PATHOPATRIDALGIA, *Nostalgia*.

PATHOS, *Affection, Disease*.

PATIENCE, *Rumex patientia*—*p. d'Eau*, *Rumex hydrolapathum*—*p. Garden*, *Rumex patientia*—*p. Rouge*, *Rumex sanguineus*—*p. Savage*, *Rumex acutus*.

PATIENTIA, *Rumex patientia*.

PATIENTIÆ MUSCULUS, *Levator scapulae*.

PATNE, *Alveolus*.

PATOR NA'R'IUM. The cavity or the opening of the nostrils.

PATRATIO, *Ejaculation, (of sperm.)*

PATURSA, *Syphilis*.

PAU, (*CLIMATE OF.*) Pau is the Capital of the Department of the Lower Pyrenees; and is about 150 miles from Bourdeaux, and 50 from Bayonne. The climate corresponds with that of the south-west of France generally; its great quality is the comparative mildness of its spring, and exemption from cold winds. It is regarded as a favourable winter residence for invalids labouring under chronic affections of the mucous membranes. It is too changeable for the consumptive; and to be avoided by the rheumatic.

PAULLINIA. This is an extract from a plant of the same name in Brazil. It is prepared by the Indians, and appears to possess excitant powers. In Brazil, and the neighbouring countries, it is given in the form of Tisane—the powder being mixed with cocoa—in diarrhœa and dysentery. It has been employed also as a tonic. An extract is prepared in Brazil from

the *Paullinia sorbilis*, known there under the name of *Guarana*, which is administered in similar pathological cases.

PAUME DE LA MAIN, *Palm*.

PAUONTA, *Sedatives*.

PAUPIÈRE, *Palpebra*.

PAVANA WOOD, *Croton tiglium*.

PAVIL'ION. The French give the name *pavillon*, to the expanded extremity of a canal or cavity, e. g. of a catheter, sound, &c.

PAVILION OF THE EAR, *Auricula*, *Pinna*, *Ala*, (F.) *Auricule ou Oricule*, *Pavillon de l'oreille*, is seated behind the cheeks, beneath the temple and anterior to the mastoid process. Its size varies in individuals. It is free above, behind, and below. Anteriorly and within, it is continuous with the neighbouring parts. Its outer surface has several prominences, the *Helix*, *Anthelix*, *Tragus*, *Antitragus*, and *Lobe*; and several cavities—the *groove of the Helix*, the *fossa navicularis seu scaphoides*, and the *Concha*. The skin which covers the pavilion is very fine and studded with a number of sebaceous follicles. The auricle is fixed to the head by three fibro-cellular ligaments;—a *superior*, *anterior*, and *posterior*.

PAVILLON DE L'OREILLE, *Pavilion of the ear*—*p. de la Trompe*, see *Tuba Fallopiana*.

PAVINA, *Æsculus hippocastanum*.

PAVOR, *Panophobia*.

PAVOT DES JARDINS, *Papaver*.

PAZAHAR, *Bezoar*.

PEACH BRANDY, *Amygdalus Persica*—*p. Tree*, *Amygdalus Persica*.

PEAGLE, *Primula veris*.

PEAR. See *Pyrus malus*.

PEARL, *Perla*, *Mar'garon*, *Margari'ta*, *Unio*, (F.) *Perle*. A roundish concretion, of a silvery white colour, and brilliant polish, found in several shells, and especially in the *Avicula margaritifera*, which has, hence, been called *Mater perla'rum*, *Mother of pearl*, and is much used in the fabrication of handles for surgical instruments, &c. Pearls were, formerly, given in powder as astringents and antacids. They consist of lime and an animal matter.

PEARL ASH, *Potash of commerce*—*p. Mother of*, see *Pearl*—*p. White*, *Bismuth*, *subnitrate of*.

PEAU, *Cutis*.

PEAUCIER, *Platysma myoides*.

PECCANT, *Peccans*, from *peccare*, 'to sin.' An epithet given, by the Humorists, to humours, when erring in quality or quantity.

PECHEDEON, *Periænum*.

PECHER, *Amygdalus Persica*.

PECHURIM CÔRTEX. A highly aromatic bark, the produce of a species of *laurus*. It is extremely fragrant, like that of cinnamon, which it greatly resembles in its properties. In Portugal, it is used in the cure of dysentery, &c.

PECHYAG'RA, *Pectihag'ra*, from *πηχυν*, 'the elbow,' and *αγχα*, 'a seizure.' Gout affecting the elbow.

PECHYS, *Elbow*.

PECHYTYRBE, *Porphyra nautica*.

PECTEN, *Pubes*.

PECTIHAGRA, *Pechyagra*.

PECTIN, from *πηχτις*, 'a coagulum.' A name given by Braconnet to a principle, which forms the basis of vegetable jelly. It is extensively diffused in the juices of pulpy fruits and roots, especially when they are mature, and oc-

casions these juices to coagulate when they are mixed with alcohol or boiled with sugar.

It is the basis of one of the classes of elementary principles of Dr. Pereira—the *pectinaceous*.

PECTINACEOUS, Pectinuous.

PECTINALIS, from *pecten*, 'the pines,' *Pectina'us*, *Pubio-fémoral*, *Suspubio-fémoral* (Ch.) (F.) *Pectiné*. This muscle is situate at the inner and upper part of the thigh. It is long, flat, and triangular; is attached, above, to the space, which separates the ileo-pectineal eminence from the spine of the os pubis; and, below, by a flat tendon, to the oblique line, which descends from the lesser trochanter to the linea aspera. The pectinalis bends the thigh on the pelvis; and carries it outwards in adduction and rotation. It may, also, bend the pelvis on the thigh.

PECTINA'TI MUSCULI, from *pecten*, 'a comb.' The fascicular texture observed in the right auricle of the heart:—*Musculi Auriculæ Pectina'ti*. Their main use probably is—to prevent the over dilatation of the auricles.

PECTINÉ, Pectinalis.

PECTINOUS, *Pectina'ceus*, *Pectino'sus*, *Pectinaceous*, from *pectin*. Of or belonging to pectin or vegetable jelly,—as a *pectinous* or *pectina'ceous* vegetable principle.

PECTORAL, GRAND, Pectoralis major.

PECTORALIS INTERNUS, *Triangularis sterni*.

PECTORA'LIS MAJOR, from *pectus*, 'the breast.' *Pectoralis*, *Sterno-costo-clavio-huméral*, *Sterno-huméral* (Ch.) (F.) *Grand Pectoral*. A large, flat, triangular muscle, situate at the anterior part of the chest, before the axilla. It is attached, on the one hand, by means of aponeurotic fibres, to the inner half of the anterior edge of the clavicle; to the anterior surface of the sternum, and to the cartilages of the first six true ribs;—on the other, by a strong tendon, which is inserted at the anterior edge of the bicipital groove of the humerus. The use of this muscle is—to move the arm in various directions. If it be hanging by the side of the body, it carries it inwards and a little forwards. When the arm is raised, it depresses it and carries it inwards. It can, also, move it in rotation inwards. If the humerus be raised and fixed, the pectoralis major draws the trunk towards the upper extremity.

PECTORA'LIS MINOR, *Serra'tus anti'cus minor*, *Costo-coracoidien* (Ch.) (F.) *Petit Pectoral*, *Petit dentelé antérieur*. This muscle is situate beneath the preceding, at the anterior and upper part of the chest. It is flat and triangular. It is attached by its base, which appears digitated, to the upper edge and outer surface of the 3d, 4th, and 5th true ribs, and is inserted at the anterior part of the coracoid process. The pectoralis minor draws the scapula forwards and downwards, and makes it execute a rotatory motion, by virtue of which its inferior angle is carried backwards, and the anterior depressed. When the shoulder is fixed, it elevates the ribs to which it is attached, and aids in the dilatation of the chest.

PECTORALS, *Pectora'lia*, *Thorac'ica*. Medicines, considered proper for relieving or removing affections of the chest.

BATEMAN'S PECTORAL DROPS consist, chiefly, of *tincture of castor*, with some *camphor* and

opium, flavoured by *aniseed*. Gray gives the following formula. *Castor* ʒj, *ol. anisi* ʒj, *camph.* ʒv, *coccin.* ʒiss, *opii* ʒvj, *proof spirit*, a gallon.

A form, advised by a committee of the Philadelphia College of Pharmacy, is the following:—*Alcohol. dil. cong.* iv, *Santal. rubr. ras.* ʒi, *Digere per horas xxiv*; cola, et adde *Pulv. opii*, *Pulv. catechu*, *Camphoræ* aa ʒij, *Ol. anisi.* ʒiv. Digest for ten days.

PECTORILOQUE, from *pectus*, 'the chest,' and *loqui*, 'to speak.' Laënnec calls thus one who presents the phenomenon of *Pectorililoquism*. Also a *Stethoscope*. (q. v.)

PECTORILOQUIE CHEVROTANTE, Ego-phony.

PECTORILOQUY, *Pectorililoquism*, *Car'er-nous noise*. Same etymon. *Pectorilo'quia*, (F.) *Pectorililoque*. Speech or voice coming from the chest. Laënnec has designated, by this name, the phenomenon often presented by consumptive individuals, when their chests are examined with the stethoscope. The voice seems to issue *directly* from the chest, and to pass through the central canal of the cylinder,—a phenomenon owing to the voice resounding in those anfractuous cavities, produced in the lungs by the suppurative or breaking down of tubercles, which constitute abscesses or *Ulcers of the Lungs*.

PECTUS, Thorax.

PECULIUM, Penis.

PEDAGRA, Potassæ supertartras impurus.

PEDESIS, Pulsation.

PEDESTHOS, Pulsation.

PEDICLE, VITELLINE. See *Vesicula umbilicalis*.

PEDICULARIA, Delphinium staphisagria.

PEDICULATIO, Phtheiriasis.

PEDIC'ULUS, The Louse, Phtheir, (F.) Pou.

A genus of parasitic insects. The human body is infested with three kinds: the *Body-louse*, (F.) *Pou de corps*; the *Head-louse*, (F.) *Pou de la tête*, which lives in the hair; and the *Crab-louse*, *Mor'pio*, *Plat'ula*, (F.) *Morpio*, which infests the hair of the pubes. Infusion of tobacco, or mercurial ointment, or ointment of white precipitate of mercury, or the white or red precipitate of mercury, readily destroys them.

PEDICULUS PUBIS, Crab-louse.

PEDICURE, Chiropodist.

PEDICUS, Extensor brevis digitorum pedis.

PEDIEUX, (*muscle*,) Extensor brevis digitorum pedis.

PEDIGAMBRA, Ysambra.

PEDILU'VIUM, from *pedes*, 'the feet,' and *lavo*, 'I wash.' *Lavipédium*, (F.) *Bain de pieds*. A bath for the feet. See *Bath*.

PEDION, Sole.

PEDIUM, Tarsus.

PÉDONCULES DU CERVELET, Corpora testiformia.

PEDORA. The sordes of the eyes, ears, and feet.

PED'UNCLE, *Pedun'culus*. This term has been applied to different prolongations or appendices of the encephalon. Thus, the *Peduncles of the brain* are the *Crura cerebri*; the *Peduncles of the cerebellum*, the *Crura cerebelli*.

PEDUNCLES OF THE BRAIN, called also *Crura anteriora medullæ oblongatæ*, are two white cords, about $\frac{1}{4}$ th of an inch in diameter, on the outside of the corpora albicantia. They arise from the medullary substance of the brain, and

gradually approach, till they join the tuber annulare. They are formed, internally, of a mixture of cineritious and medullary matter; the former of which, being of a darker colour at one point than in any other part of the brain, has been called *Locus niger crurum cerebri*.

PEDUNCLES OF THE CEREBELLUM, called also *Crura posteriora*, arise from the medullary part of the cerebellum, and unite at the tuber annulare.

PEDUNCLES OF THE MEDULLÆ OBLONGATÆ, Corpora restiformia.

PEDUNCLES OF THE PINEAL GLAND are two medullary bands or strips, which seem to issue from the pineal gland, and proceed on each side upon the upper and inner region of the optic thalami.

PEDUNCULI MEDULLÆ OBLONGATÆ, Corpora restiformia.

PEGA, Canthus (lesser.)

PEGANELÆ'ON, *Oleum ruta'ceum*, Oil of Rue; from *παρανον*, 'rue.'

PEGANIUM, Ruta.

PEINE, Hunger.

PEIRA, Effort, Experience, Nisus.

PELLA'GIA. A kind of scaly erysipelas of the hands—sometimes of the legs, at others, of the face. Pellagra. (?)

PELLAGRA, Pellagra.

PELL'ICAN, *Pelicanus*. An instrument, curved at the end like the beak of a pelican. Its use is to extract teeth.

PELICIDÆ, *Pelidæ*, *Mel coctum*. Boiled Honey.—Ruland and Johnson.

PELIDNOMA, Ecchymoma.

PELIO'MA, from *πελος*, 'black.' A livid ecchymosis.—Forestus. See Ecchymoma. (q. v.)

PÉ'LIOSE, Purpura hæmorrhagica.

PELIOSIS, Purpura hæmorrhagica.

PELL'AGRA, *Pelagra*, *Ichthyosis Pellagra*, *Elephantiasis Italica*, *Tuber Pellagra*, *Lepra Mediolanensis*, *L. Lombardica*, *Scorbutus alpinus*, *Malaria pellagrica*, *Erythema endemicum seu pellagrum*, *Insolazione de Primavera*, *Mal del Sole*, *Dermatagra*, *Erysipelas periodicum nervosa chronica*, *Mal de misère*, *Paralysis scorbutica*, *Scurvy of the Alps*, *Impetigo Pellagra*, from *πελλα*, (?) 'skin,' and *αγρα*, 'seizure.' A disease, particularly noticed amongst the Milanese, which consists in the skin becoming covered with wrinkles, and assuming a scaly appearance, especially in the parts exposed to the air. The strength diminishes, the intellectual faculties and sensations become obscure, and cramps, convulsions, and other lesions of muscular contractility supervene. It is a singular, endemic affection.

PELLICULA SUMMA, Epidermis—p. Superior, Epidermis.

PELLIS, Cutis—p. Summa, Epidermis.

PELLITORY, BASTARD, Achillea ptarmica—p. of Spain, Anthemis pyrethrum—p. Wall, Parietaria.

PELMA, Sole.

PELOTE DE MER, Pila marina.

PELTIGERA CANINA, Lichen caninus.

PELUDE, Pelicide.

PELVIC, *Pelvicus*, *Pelvinus*. Belonging or relating to the pelvis.

PELVIC APONEUROSIS, (F.) *Aponévrose pelvienne*. M. J. Cloquet gives this name to an aponeurotic expansion, of greater or less thickness,

which is attached to the brim of the pelvis, being continuous with the fascia iliaca and the aponeurotic expansion of the psoas parvus. This aponeurosis forms a kind of resisting partition, which effectually supports the peritoneum, and has several apertures, through which different organs pass.

PELVIC CAVITY, (F.) *Cavité pelvienne*; the cavity of the pelvis.

PELVIC MEMBERS; the lower extremities.

PELVIC SURFACE OF THE ILIUM; that which faces the pelvic cavity.

PELVI-TROCHANTERIAN, *Pelvi-trochanterianus*. That which relates to the pelvis and great trochanter. The *Pelvi-trochanterian region* is formed by the muscles—*pyramidalis*, *two obturators*, *gemini*, and *quadratus femoris*, which pass from the pelvis to the digital cavity of the great trochanter.

PELVIM'ETER, *Pelycom'eter*, *Pelyom'eter*, from *pelvis*, and *μετρον*, 'a measure.' A barbarous hybrid. This name has been given to different instruments, invented for measuring the diameters of the pelvis, and, particularly, the antero-posterior or fore-and-aft diameter of the brim. Two have been chiefly employed, especially by French practitioners;—the *Compas d'épaisseur*, and the *Pelvimeter* of Coutouly.

1. The *Compas d'Epaisseur* or *Calipers* is formed like a pair of compasses—with blunt extremities—the branches of which can be moved at will. One of these is applied to the symphysis pubis, and the other on the sacrum. About three inches must be deducted from this measurement for the thickness of the mons veneris, pubis, and the base of the sacrum. 2. The *Pelvimeter* of Coutouly resembles the instruments used by shoemakers for measuring the length of the foot. The two branches are introduced, in a state of approximation, into the vagina; and then separated, so that one touches the promontory of the sacrum, the other comes behind the os pubis. It is a barbarous contrivance, and its introduction ought never to be attempted on the living subject. It does not, indeed, seem possible to introduce it without mischief.

The finger is, decidedly, the best pelvimeter, and by it we can judge whether the base of the sacrum be unusually prominent.

PELVIS, *Chō'ana*, *Pyelos*, (F.) *Bassin*; so called, because fancied to be shaped like an ancient basin. The part of the trunk which bounds the abdomen below. It is a large, bony, irregular, conoidal cavity,—open above and below,—which supports and contains a part of the intestines, and the urinary and genital organs; and serves, at the same time, as a fixed point for the articulation of the lower limbs, the attachment of their muscles, and the execution of their movements. The pelvis supports, behind, the vertebral column, and is sustained, before, by the ossa femorum. It is situate, in the adult, near the middle part of the body, and is composed of four broad, flat, unequally thick bones, differing much in their shape, size, and arrangement, which touch, are articulated at some part of their surface, and intimately united by means of a number of ligamentous fasciæ. Of these bones, two are behind, on the median line,—the sacrum and coccyx; the two others are before and at the sides,—the ilia. They are fellows, and unite, before, with each other.

The most important parts of the pelvis, in an obstetrical point of view, are the *brim* and the *outlet*. The *BRIM*, *Angustia abdominalis*, *Introitus* or *Upper Opening of the Cavity of the Pelvis*, (F.) *Détroit supérieur*, *D. abdominalis*, is the narrow part, which separates the greater pelvis from the less—the *false* from the *true*. In the well formed woman, it is elliptical, and slightly inclined forwards. Its *antero-posterior* or *sacro-pubic diameter*, in a standard pelvis, measures $4\frac{1}{2}$ inches, but with the soft parts, $3\frac{3}{4}$ inches; its *transverse* or *iliac* or *lateral*, $5\frac{1}{4}$ inches, with the soft parts 4 inches; and its *oblique* with the soft parts, $4\frac{3}{8}$ inches. The *OUTLET*, (F.) *Détroit inférieur*, *D. perineal*, *Exitus*, *Inferior opening*, *Angustia perinealis*, forms the lower aperture of the pelvis. The antero-posterior diameter is here, on account of the mobility of the coccyx, 5 inches; the lateral, 4 inches. The *AXIS OF THE PELVIS* is important to be known in obstetrics. The *Axis of the Brim* is indicated by a straight line drawn from the umbilicus to the apex of the coccyx:—the *Axis of the Outlet* by a line drawn from the first bone of the sacrum to the entrance of the vagina.

PELVIS OF THE KIDNEY, *Pelvis renalis*, *Sinus*, *Venter* seu *Alvus Renum*, (F.) *Bassin*. This is a small, membranous pouch, occupying the posterior part of the fissure of the kidney. It is placed behind the renal artery and vein; is elongated from above to below; flattened from before to behind; irregularly oval in figure; and, below, contracts considerably, to be continuous with the ureter. It receives the orifices of the infundibula, which pour the urine secreted in the kidney into its cavity.

PELVIS AURIUM, *Cochlea*—p. *Cerebri*, *Infundibulum* of the brain—p. *Ocularis*, *Scaphium* *oculare*.

PELYCOMETER, *Pelvimeter*.

PELYCOMETER, *Pelvimeter*.

PEMPHIGUS, *Emphylis* *Pemphigus*, *Pompholyx*, from *πμπιζ*, 'a blister;' *Febris bullosa*, *vesicularis*, *ampullosa* seu *pemphigodes* seu *pemphigoides*, *Exanthema serosum*, *Morta*, *Pemphigus Helveticus*, *Pemphigus major*, *Pemphigus minor*, *Morbus bullosus*, *Pemphix*, *Pemphix*, *Typhus vesicularis*, *Vesicular Fever*, *Bladdery Fever*. A disease, defined to consist of vesicles, scattered over the body; transparent, filbert-sized, with a red, inflamed edge, but without surrounding blush or tumefaction; on breaking, disposed to ulcerate; fluid, pellucid or slightly coloured; fever, typhous. It is doubtful whether any such idiopathic fever has ever existed; the probability is, that the fever and vesications have been an accidental complication. The *Pemphigus Helveticus*, Cullen thinks, must have been malignant sore throat. If, however such a distinct disease did exist, it was probably only as an endemic-epidemic.

PEMPHIGUS VARIOLÔDES. See *Varicella*.

PEMPHIX, *Pemphigus*.

PEMPHIX, *Pemphigus*.

PENÆA SARCOCOLLA, *Sarcocolla*.

PENCIL-LIKE PROCESSES, *Styloid processes*.

PENETRATING, *Penetrans*, from *penetrare*, (*penitus intrare*), 'to go into.' A wound is so called which penetrates one of the great splanchic cavities.—*Vulnus penetrans*.

A medicine is, also, so called, which is supposed to pass through the pores and stimulate.

PENICILLUM, *Compress*.

PENICILLUS, *Penicillum*, 'a painter's brush;' diminutive of *penis*, 'a tail.' A tent or pledget, (q. v.) The secreting, glandiform extremities of the venæ portæ, (*Acini biliosi*;) have also been so termed, as well as the villous textures.

PENICILLUS, *Tent*.

PENICULUM, *Compress*.

PENICULUS, *Tent*.

PENIDES, *Saccharum hordeatum*.

PENID'UM, *Penidium saccharatum*. A kind of clarified sugar, made up into rolls. *Barley sugar*. It is demulcent.

PENIL, *Mons veneris*.

PENIS, 'a tail,' from *pendere*, 'to hang down.' *Caulis*, *Colcs*, *Caules*, *Men'tula*, *Menta*, *Phall'us*, *Posthæ*, *Crithæ*, *Priap'us*, *Virga*, *V. vir'ilis*, *V. genit'ilis*, *Veretrum*, *Sathæ*, *Membrum vir'ilè*, *Membrum*, *Verbus*, *Vir'ilè*, *Pars Vir'ilis*, *Membrum seminale* seu *genitale* *vir'o-rum*, *Siçula*, *Tentum*, *Hasta*, *H. nupti'al's*, *H. vir'il's*, *Vas*, *Vas'culum*, *Pec'ulum*, *Vir'gula*, *Vir*, *Thyr'sus*, *Tensus*, *Clavus*, *Cauda salax*, *Cauda*, *Fas'cinum*, *F. vir'ile*, *Muto*, *Nervus*, *N. fistulo'sus* seu *fistula'ris*, *Scapus*, *Vena*, *Contus*, *Telum*, *Gurgu'lio*, *Sceptrum*, *Arma*, *Gla'dius*, *Lubricum*, *Caput*, *Muti'num*, *Palus*, *Pes'sulus*, *Radix*, *Ramus*, *Ruta'ulum*, *Arma Ventris*, *Columna ad-stans inguinibus*, *Columna*, *Py'ramis*, *Trabs*, *Spina*, *Catapulta vir'il's*, *Verpa*, *Muchæ'ra*, *Taurus*; the *Yard*, *Male organ*, &c., (F.) *Verge*, *Membre viril*. This organ, the use of which is to carry the seminal fluid into the female organs of generation, is cylindroid, long, and erectile, and situate before and beneath the symphysis pubis. In the ordinary state, it is soft and pendent in front of the scrotum. During erection, it becomes elongated, upright, and assumes a triangular shape. Its upper surface is called the *Dorsum Penis*, (F.) *Dos de la verge*; and, at its inferior surface, there is a longitudinal projection formed by the canal of the urethra. The two sides of the penis are round, and its posterior extremity or root is attached to the pelvis. Its anterior extremity is free, and presents the glans, prepuce, and orifice of the urethra. The penis is formed of the corpora cavernosa, the principal seat of erection; the corpus spongiosum of the urethra for the conveyance of the urine and sperm, and of the glans, which terminates the canal.

PENIS CEREBRI, *Pineal gland*—p. *Muliebris*, *Clitoris*.

PEN'NIFORM, *Pennifor'mis*, from *penna*, 'a pen,' and *forma*, 'form.' An epithet for muscles, whose fleshy fibres are inserted on each side of a middle tendon, like the feathers of a pen on their common stalk.

PENNYCRESS, *Thlaspi*.

PENNYROYAL, *Mentha pulegium*, *Hedeoma pulegioides*—p. *Hart's*, *Mentha cervina*.

PENSACOLA, see *Saint Augustine*.

PENSEE, *Viola tricolor*—p. *Sauvage*, *Viola tricolor*.

PENTAMYRON, *Pentuma'ron*, from *πεντε*, 'five,' and *μυρον*, 'ointment.' An ancient ointment, consisting of five ingredients.—*Paulus* and *Ætius*. These are said to have been—storax, mastich, wax, opobalsam, and unguentum nardinum.

PENTAPHARMACON, from πέντε, 'five,' and φάρμακον, 'remedy.' Any medicine consisting of five ingredients.

PENTAPHYLLUM, *Potentilla reptans*.

PENTATEUCH, (SURGICAL,) *Pentateuchus*, from πέντε, 'five,' and τευχος, 'a book,' which signifies the five books of Moses—Genesis, Exodus, Leviticus, Numbers, and Deuteronomy. By analogy, some surgeons have given the name *Surgical Pentateuch* to the division of external diseases into five classes:—wounds, ulcers, tumours, luxations, and fractures.

PENZANCE, CLIMATE OF. This is the chief residence of invalids in Cornwall, England, during the winter. It is situate on Mount's Bay, about ten miles from the Land's End. It is $5\frac{1}{2}^{\circ}$ warmer in winter than London; 2° colder in summer; scarcely 1° warmer in the spring, and only about $2\frac{1}{2}^{\circ}$ warmer in the autumn. It is a very favourable winter residence for the phthisical invalid.

PEPANSIS, Coction, Maturation.

PEPANTICOS, Maturation.

PEPASMOS, Coction, Maturation.

PEPAS'TIC, *Pepas'ticus*, from πεπαίνω, 'I concoct.' A medicine, supposed to have the power of favouring the concoction of diseases. Maturation, (q. v.)

PEPPER, BLACK, *Piper nigrum*—p. Cayenne, *Capsicum annuum*—p. Cubeb, *Piper cubeba*—p. Guinea, *Capsicum annuum*—p. Jamaica, *Myrtus Pimento*—p. Long, *Piper longum*—p. Poor-man's, *Polygonum hydropiper*—p. Tailed, *Piper cubeba*—p. Water, *Polygonum hydropiper*—p. Wall, *Sedum*—p. White, *Piper album*.

PEPPERWORT, *Lepidium*.

PEPSIN, from πεψις, 'coction.' A peculiar matter, which, in combination with the gastric acids, is considered to form the proper digestive solvent. Its chemical constitution is unknown. It would appear that its presence is necessary to induce changes in the elements of the food, which may enable the gastric acids to act upon them so as to form chyme.

PEPSIS, Coction, Digestion.

PEPTIC, *Pep'ticus*, from πεπτω, 'I ripen.' A substance which promotes digestion, or is digestive.

PERCE-CRANE, *Perforator*.

PERCE-FEUILLE, *Bupleurum rotundifolium*.

PERCE-MOUSSE, *Polytrichum*.

PERCE-PIERRE, *Critillum maritimum*.

PERCEPTA, from percipere, 'to conceive,' 'receive.' A word used by some writers on Hygiene to indicate, in a general manner, the effects of the nervous action on the animal economy; in other words, the sensations, the functions of the mind, and their deterioration or privation.

PERCEPTION, *Percept'io*. The sensation which the brain has of an impression made on an organ of sense.

PERCEPTIVITY. Same etymon. The power of perception.

PERCOLATIO, Filtration, (q. v.)

PERCOLATION, from percolare, (per, and colare), 'to strain through.' The term percolation, or displacement, has been recently applied in pharmacy to an operation, which consists in placing any substance, the virtues of which have to be extracted by a menstruum, on a funnel, having a septum perforated with

holes, or its tube stuffed with cotton or tow, and pouring fresh portions of the menstruum upon it until all its virtues are extracted. The operation is used in the formation of certain infusions, extracts, tinctures, &c.

PERCUSSION, AUSCULTATORY, see Acouophonia.

PERCUS'SION, *Epicrou'sis*, *Percus'sio* from percutere, (per, and quater,) 'to strike.' When immediate or direct percussion is made on the chest or abdomen, the more or less perfect resonance is an index of the state of the contained organs; and the physician is thus aided in his diagnosis. For this purpose, the chest may be struck with the fingers, gathered into a bundle, and their tips placed upon a level. It is better, however, to employ *Mediate percussion*, which consists in interposing, between the point of the fingers and the chest, the finger of the other hand, or the *Plexim'eter*, (q. v.) and striking this instead of the naked chest.

PERCUTEUR COURBE A MARTEAU, (F.) An instrument used by Baron Heurteloup in the operation of lithotomy, in which a hammer is employed instead of a screw, to force together the blades of the instrument on the foreign body.

PERDO'NIUM. In Paracelsus, a medicated wine of herbs.

PERFORANS, from perforare, (per, and forare,) 'to bore through.' A name given to different muscles, whose tendons pass through intervals between the fibres or tendons of other muscles; thence called *perforated*. See *Flexor Longus Digitorum*, &c. Under the name *Perforating Arteries*, are included, 1. *In the hand*—arterial branches, given off by the profound palmar arch, which traverse the muscles and interosseous spaces. 2. *In the thigh*—three or four arteries, furnished by the profunda, which pass through the openings of the adductor magnus. 3. *In the foot*—the anterior and superior branches of the plantar arch.

PERFORANS CASSERII. See Cutaneous—p. Manus, *Flexor profundus perforans*—p. Profundus, *Flexor longus digitorum pedis profundus perforans*.

PERFORATIO INTESTINORUM, *Enterobrosis*—p. *Ventriculi*, *Gastrobrosis*.

PERFORATION, *Perforat'io*, *Anatre'sis*, from perforare, 'to pierce.' An accidental opening in the continuity of organs, either from an external or internal cause.

PERFORATION, *Perforation*—p. *de l'Estomac*, *Gastrobrosis*—p. *des Intestins*, *Enterobrosis*—p. *Uteri*, *Uterus*, rupture of the.

PERFORATOR, (F.) *Perce-crane*. An instrument for opening the head of the fœtus in utero, when it is necessary to diminish its size. The operation is called *Cephalotom'ia*.

PERFORATUS. That which is pierced. Anatomists have given this name to muscles, whose fibres or tendons separate, to suffer other parts to pass through them. Such are the *Flexor brevis Digitorum pedis*, (q. v.) *F. sublimis perforatus*, and *Coraco-brachialis*. (q. v.)

PERFORATUS CASSERII, *Coraco-brachialis*.

PERFRIC'TIO, *Cutapsyx'is*, *Peripsyx'is*, from perfrigere, (per, and frigere,) 'to shiver with cold.' Considerable refrigeration. Great sense of cold.—shivering.

PERFRIGERA'TIO. See Rigor.

PERFUSIO, Fomentation.

PERI, *περι*, 'about, on all sides, round about.'

An augmentative prefix. Hence:

PERIAMMA, Amuletum.

PERIAPTON, Amuletum.

PERIBLEMA, Catablema.

PERIBLEP'SIS, from *περι*, 'around,' and *βλεπω*, 'I look.' The wild look that accompanies delirium.—*Foësius*.

PERIB'OLE, from *περιβαλλω*, 'I surround.' The dress of a person. Also, the translation of morbid matters towards the surface of the body.

PERIBRO'SIS, *Pericrasis*, from *περιβρωσων*, (*περι*, and *βρωσων*, 'I eat,') 'I eat around.' Ulceration or erosion at the corners of the eyelids.

PERICARDITIS, from *περικαρδιον*, 'the pericardium,' and *itis*, denoting inflammation.

Inflammatio Pericardii, *Inflammation of the Pericardium*. (F.) *Péricardite*, *Inflammation du Péricarde*. This is, probably, the proper appellation for most of those cases which have received the name of *Carditis*, *Cardipericarditis*.

Along with signs of pyrexia, the local symptoms resemble those of pneumonia. Such as point out that the pericardium is the seat of disease are the following:—pain, referred to the region of the heart, or scrobiculus cordis,—

sometimes pungent, at others, dull and heavy; palpitation, accompanied with spasmodic twitchings in the neighbourhood of the heart, shooting up to the left shoulder; pulsation, and sometimes soreness of the carotids, with tinnitus aurium and vertigo: the breathing is by catches: dyspnœa considerable: pulse jarring, jerking, peculiar: the tongue white, covered with a mucous coat, and the skin often bathed in sweat, as in acute rheumatism. The physical signs during the first period, are as follows. The action of the heart is generally evident to the eye, and may be felt by the hand. There is soreness to the touch, over the intercostal spaces, and over a small surface in the epigastric region, when the pressure is directed upwards, towards the pericardium. Percussion is usually natural, but at times there is dulness. On auscultation, the cardiac movements are found to be frequent, abrupt, jerking, and tumultuous; often irregular and intermittent. The pulse presents corresponding characters. When effusion of lymph has occurred, percussion may be negative, or be but slightly affected. On auscultation, in addition to the preceding signs, there may be one or more of the rubbing or friction *bruits* (q. v.) resembling the rustling of parchment, or of a sawing or rasping character. In some cases, the sound is like the creaking of new leather. This has been supposed to be pathognomonic of effused lymph. The most important point, in the pathology of pericarditis, is its connexion with acute rheumatism: and it forms one of the most dangerous occurrences in the latter disease. It may be *acute* or *chronic*: in either case, it is, of course, formidable. The most active depletion must be used; with large doses of opium, counter-irritants, and all the means required in the most violent internal inflammations.

PERICAR'DIUM, *Pericardion*, *Membrana Cor circumflexa*, *Involucrum seu Ar'culu seu Capsa seu Cap'sula seu Cam'era seu Indumentum seu Pannic'ulus seu Membra'na seu Theca seu Sac'culus Cordis*, *Sac or Capsule of the Heart*. *Arca Cordis*, (F.) *Péricarde*, from *περι*, 'around,'

and *καρδια*, 'the heart.' The pericardium is a membranous sac, which envelops the heart, and the arterial and venous trunks that pass from or into it. It is seated in the separation of the mediastinum, above the central aponeurosis of the diaphragm, to which it strongly adheres. Its shape is triangular, like that of the heart; to which it is fitted. The pericardium is composed of two membranes:—the one—*external*—fibrous; the other—*internal*—serous. The latter, having lined the inner surface of the external layer, is reflected over the heart, and covers it entirely; without, however, having the heart within it; in which arrangement it resembles other serous membranes. The pericardium envelops the heart; retains it in position, and facilitates its movements by means of the serous fluid, *Liquor seu Aqua seu Humor seu Lympha Pericardii*, *Hydrocar'dia*, which it contains in greater or less quantity.

PERICARPIUM, *Epicarpium*.

PERICHON'DRIUM, from *περι*, 'around,' and *χονδρος*, 'a cartilage.' A membrane of a fibrous nature, which covers cartilages that are non-articular, and bears considerable analogy to the periosteum in organization and uses.

PERICHRISIS, *Circumlitio*, *Liniment*.

PERICHRISTON, *Circumlitio*, *Liniment*.

PERIC'LASIS, from *περι*, 'about,' and *κλαω*, 'I break.' A comminuted fracture, with denudation of the bone. Galen, *Foësius*.

PERICLIMENUM, *Lonicera periclymenum*.

PERICNE'MIA, from *περι*, 'about,' and *κνημη*, 'the leg.' The parts surrounding the tibia;—the tibia itself.

PERICRAN'NIUM, *Pericranion*, from *περι*, 'around,' and *κρανιον*, 'the cranium.' The periosteum, which covers the cranium externally.

PERICRASIS, *Peribrosis*.

PERIDES'MIC, *Peridesmicus*; from *περι*, 'around,' and *δεσμος*, 'a ligament.' Some nosologists have given this name to ischuria caused by a ligature round the penis or by stricture of the urethra.

PERIDIASTOLE. See *Diastole*.

PERID'ROMOS, from *περι*, 'about,' and *δρομος*, 'a course.' The extreme circumference of the hairs of the head.—*Gorræus*.

PERI'ERESIS, from *περι*, 'about,' and *αιρω*, 'I take away.' A sort of circular incision, which the ancients made in the neighbourhood of large abscesses. The *periæresis* is now only practised in some cases of tumours.

PERIESTICOS, *Salutary*.

PERIGLOTTIS, *Epiglottic gland*. See *Tongue*.

PERIG'RAPHE, from *περιγραφω*, (*περι*, and *γραφω*, 'I write,') 'I circumscribe.' The aponeurotic intersections of the rectus abdominis are so called.—*Vesalius*.

PERILYMPH, *Cotunnus*, *liquor of*.

PERIMYSIUM, *Fascia*.

PERIN, *περιν*, from *πηρα*, 'a sac or pouch.' With some, this means the scrotum (q. v.); with others, the testicle; with others, the perinæum; and, with others, the anus.

PERINÆOCE'LE, from *περιναριον*, 'the perinæum,' and *κηλη*, 'rupture.' *Hernia in the perinæum*.

PERINÆUM, *Interfemineum*, *Perineum*, *Gressu'ra*, *Plechas*, *Amphiplez*, *Pech'deon*, *Mesos'celon*, *Perineon*, *Perinæos*, *Perin'os*, *Orrhos*, *Tramis*, *Taurus*, *Interforamineum*, *Cochoné*, *Pli-*

chas, Mesomerion, Fœmen, Regio Perinæi, (F.) Périnée. The space at the inferior region of the trunk, between the ischiatic tuberosities, anus, and genital organs. It is smaller in the female than in the male; has a triangular shape; and is divided into two equal parts by a median line, called *Raphe*. It is occasionally ruptured in labour. The part between the pudendum and anus is sometimes called *anterior perinæum*, to distinguish it from the part which extends from the anus to the coccyx, called *posterior perinæum*.

PERINÆUS, Perineal.

PERINÆAL, *Perinæus, Perinæalis*. That which relates or belongs to the perinæum; as *Perinæal artery, Hernia, &c.*

ISCHURIA PERINÆALIS. A name given by Sauvages to retention of urine, caused by a tumour seated in the perinæum.

PERINÉE, Perinæum.

PERINEPHRITIS, from *περι*, 'around,' *νεφρός*, 'kidney,' and *itis*, denoting inflammation. Inflammation of the external cellular and fibrous membranes of the kidney, or of their investing adipose cellular tissue.—Rayer.

PERINEURION, Neurilema.

PERINYCTIDES, from *περι*, and *νύξ*, 'night.' An eruption, appearing at night and disappearing by day.—Eriotian.

PERIOD, *Periodus, Periode'a, Periodeusis, Circul'itus*, from *περι*, 'about,' and *ὁδός*, 'way.' *Circuit.* *Periods* are the different phases or revolutions of a disease. The epochs, which are distinguishable in the course of a disease. 1. *The augmentation, increase, or progress (Incrementum);* 2. *The acme or height, (F.) État (Status);* and, 3. *The decline (Decrementum.)* Some authors reckon only the invasion and termination.

Period is sometimes used, in describing an intermittent, for the time between the commencement of a paroxysm and that of the next, including the fit as well as interval.

PERIODS, MONTHLY, Menses.

PERIODEIA, Period.

PERIODEUSIS, Period.

PERIODEUTES, Charlatan.

PERIODICITY, *Periodic'itas*; same etymon. The aptitude of certain physiological and pathological phenomena, in health or disease, to recur at particular periods, after longer or shorter intervals, during which intervals they cease completely. Diseases, thus recurring, are called *Periodical*.

PERIODONTITIS, (F.) *Periodontite, Inflammation de la Membrane alvéolo-dentaire*, from *περι*, 'about,' and *ὄδον*, 'a tooth.' Inflammation of the membrane that lines the socket of a tooth.

PERIODYN'IA, from *περι*, and *δύνη*, 'pain.' A circumscribed and acute pain.—Hippoc.

PERIONE, Decidua.

PERIORBITA, from *περι*, 'around,' and *orbita*, 'the orbit.' An appellation used, by some, for the periosteum lining the orbit, which is a continuation of the dura mater. The inflammation of this periosteum is termed *Periorbitis* or *Periorbititis*.

PERIOSTEUM, *Perios'teon, Perios'teos, Perios'tium, Circumossal'e, Membr'na ossis, Omen'tum ossium, Circumossal'is Membr'na*, from *περι*, 'around,' and *ὀστέον*, 'a bone.' The

periosteum is a fibrous, white, resisting medium which surrounds the bones every where, except the teeth at their coronæ, and the parts of other bones that are covered with cartilage. The external surface is united, in a more or less intimate manner, to the neighbouring parts by cellular tissue. Its inner surface covers the bone, whose depressions it accurately follows. It is united to the bone by small, fibrous prolongations; and, especially, by a prodigious quantity of vessels, which penetrate their substance. The periosteum unites the bones to the neighbouring parts. It assists in their growth, either by furnishing, at its inner surface, as M. Bécarré demonstrated, an albuminous exudation, which becomes cartilaginous, and at length ossifies;—or by supporting the vessels, which penetrate them to carry the materials of their nutrition. See Medullary membrane.

PERIOSTEUM INTERNUM. Medullary membrane.

PERIOSTOSIS. Tumour of the periosteum. Tumours are so called which are developed on bones, and formed by their outer membrane. These tumours are more rapidly developed, have a less degree of consistence, and sooner disperse than exostoses, which they resemble greatly.

PERIPHERAL VASCULAR SYSTEM, Capillary system.

PERIPHIMOSIS, Paraphimosis.

PERIPLEUMONIA, Peripneumonia.

PERIP'LYSIS, from *περι*, and *πλύσις*, 'the act of washing.' *Proflu'vium*. A copious discharge from any part, especially from the bowels.

PERIPNEUMON'IA, *Peripleumo'nia, True peripneumony*, from *περι*, 'around,' and *πνεύμων*, 'the lung.' Inflammation of the substance of the lungs.—See Pneumonia.

PERIPNEUMONIA BILIO'SA. Inflammation of the lungs, accompanied with bilious fever.

PERIPNEUMONIA CATARRHALIS, P. notha—p. Pituitosa, P. notha.

PERIPNEUMONIA CATARRH'ALIS. Bronchitis or pulmonary catarrh, with pain in some part of the chest.

PERIPNEUMONIA NOTHA, P. spu'ria, P. pituitosa, P. catarrh'al'is, *Blennothor'rax, Obstructio pulmonum pituitosa febrilis, Bronchitis asthenica, False or Bastard Peripneumony*, (F.) *Péripneumonie bâtarde ou fausse*. An inexact name, under which some affections are comprised that resemble pneumonia; and, especially chronic bronchitis with pleurodynia.—See Bronchitis (chronic.)

PERIPNEUMONY, BASTARD, Peripneumonia notha.

LATENT PERIPNEUMONY is that whose symptoms are so obscure as to be recognised with difficulty.

PERIPSYXIS, Catapsyxis, Perfrictio.

PERIPY'EMA, from *περι*, 'about,' and *πύον*, 'pus.' Suppuration around an organ;—a tooth, for example.

PERIRRHŒA, from *περι*, 'about,' and *ῥεω*, 'I flow.' Afflux of fluids from every point of the body towards an organ which has to remove them from the economy. Also, Enuresis, (q.v.)

PERISCCELIS, Jarretière.

PERISCYPHISMUS, Periscythismus.

PERISCYTHISMUS, *Periscythisis, Perys-*

cytis/mus, Periscytisis, Periscyphismus, Scalping, from *περι*, 'around,' and *Σκυθίς*, 'a Scythian,' i. e. 'scalping after the manner of the Scythians.' An operation described by Paulus of Ægina. It consisted of an incision made around the cranium, and was employed in habitual weakness of the eyes, pains of the head, &c.

PERISPHALSIS, *Circumductio*, from *περι*, 'about,' and *σπάλω*, 'I move.' A circular motion impressed on a luxated bone, for the purpose of reducing it.

PERISSODACTYLUS, Polydactylus.

PERISTALTIC ACTION, Peristole.

PERISTAPHYLINUS EXTERNUS, *Circumflexus musculus*—p. Inferior, *Circumflexus musculus*—p. Internus, *Levator palati*.

PERISTERIUM, *Verbena officinalis*.

PERISTER'NA, from *περι*, 'about,' and *στεγνόν*, 'the sternum.' The lateral parts of the chest.

PERISTOLE, *Motus Peristalticus*, *M. compressorius seu vermicularis seu testudineus*, from *περι*, 'around,' and *στέλλω*, 'I contract,' 'I close.' The peristaltic action of the intestines, *Motus peristalticus*. It consists of a kind of undulation or vermicular movement in appearance irregular, but in which the circular fibres of the muscular membrane of the intestine contract, successively, from above downwards, in proportion as the chyme advances in the alimentary canal; so that, being compressed above, it is pushed into the next portion of the intestine, whose fibres are in a state of relaxation. When the fibres contract inversely, they occasion an *antiperistaltic action*. The peristaltic action is involuntary, and is not under the immediate influence of either brain or spinal marrow. It continues for some time after death.

PERISTOMA, Peristoma.

PERISTO'MA, *Peristoma, Muscus villosus, Crusta membranacea, Crusta vermicularis*, from *περι*, 'around,' and *σπρῶννμι*, 'to spread.' The villous or mucous coat of the intestines.—Castelli.

PERISYSTOLE, from *περι*, 'about,' and *συστολή*, 'a contraction.' The interval, that exists between the systole and diastole of the heart, which is only perceptible in the dying.—Bartholine.

PERITERION, *Trépan perforatif*.

PERITESTIS, Albuginea.

PÉRITOINE, Peritonæum.

PERITOME, Circumcision.

PERITONÆRIX'IS, *Peritonæorexis*, from *περιτοναίον*, 'the peritonæum,' and *ἐγγρῶν*, 'I break.' Hernia formed by the rupture of the peritonæum.

PERITONÆ'UM, *Peritonæum, Peritonæ'on, Peritonei'on, Peritonæ'os, Periton'i'on, Peritonæos, Velamen'tum abdomin'al'e, Tu'nica præten'sa seu Operimen'tum prætensum seu Membra'na abdom'inis, Zephach, Ziphac*, (F.) *Péritoine*, from *περι*, 'around,' and *τείνω*, 'I stretch.' A serous membrane, which lines the abdominal cavity; extends over the greater part of the organs contained there; envelops them wholly or in part, and maintains their respective relations by means of different prolongations and ligamentous folds:—the *mesentery, epiploon, mesocolon*, &c. (q. v.) Like all the serous membranes, the peritonæum is a sort of sac without aperture, which covers the abdominal organs, without containing them within it, and the internal sur-

face of which is smooth, and lubricated by a serous fluid. In the male fœtus, the peritonæum furnishes a prolongation, which accompanies the testicle at the time of its descent, and, in the female fœtus, forms the *Canal of Nuck*, (q. v.) Below the neck of the gall-bladder, the peritonæum has a triangular opening, called the *Foramen or Hiatus of Winslow*, (q. v.) through which it proceeds behind the stomach, to form a sort of secondary cavity, called the *posterior cavity of the peritonæum*, (F.) *Arrière cavité péritonéale ou Cavité des Epiploons*.

PERITONITIS, *Empres'na Peritonitis, Peritonæi'tis, Cauma Peritonitis, Inflammat'io Peritonæ'i, Phlegmasia or Inflammation of the Peritonæum*, from *peritonæum*, and *itis*, denoting 'inflammation.' (F.) *Inflammation du Péritoine*. The characteristic signs of acute inflammation of the peritonæum are,—violent pain in the abdomen, increased by the slightest pressure, often by the simple weight of the bed-clothes. It generally occurs in the parturient state; and begins on the second or third day after delivery. At times, a malignant epidemic, and perhaps contagious, variety has made its appearance, and destroyed numbers of females. This has been described under the name *Puerperal Fever*, but it really seems to be a malignant inflammation of the peritonæum and uterus, *Metroperitonitis, Ene'cia Syn'ochus Puerperar'um, Erythemat'ic or Nonplast'ic Peritonitis, Typhohæmic Peritonitis, Adynam'ic or Malignant Puerperal Fever, Low Fever of Childbed*. In any form it requires the most active treatment, early employed. The appearances, on dissection, are such as occur whenever a serous membrane has been inflamed, and such inflammation has produced death:—effusion of fluid with flakes of coagulable lymph in it; appearances of vascularity, &c., in the membrane. The treatment—in *active peritonitis*—must consist of the same course as recommended under Enteritis, (q. v.) In the *chronic kind*, symptoms must be combated as they arise, and it may be advisable to excite a new action in the system by means of mercury. In the epidemic and malignant variety, unless bleeding be freely employed at the very outset, it does harm. If used early, it is of the most decided advantage. Every thing depends upon arresting the morbid process at the outset.

PERITONITIS, ERYTHEMATIC, see Peritonitis—p. Nonplastic, see Peritonitis—p. Typhohæmic, see Peritonitis.

PERITOMA, Excrement.

PERITYPHLITIS, from *περι*, 'around,' and *typhlitis*, inflammation of the cæcum. Inflammation of the cellular substance surrounding the cæcum. See Typhlo-enteritis.

PERIWINKLE, LESSER, *Vinca minor*.

PERIZO'MA, from *περιζώννυμι*, (*περι*, and *ζώννυμι*, 'to gird,') 'to gird around.' A bandage; a girdle. In Fabricius Hildanus, a truss.

PER'KINISM. A therapeutical means, first employed by Dr. Elisha Perkins of Norwich, Connecticut, towards the termination of the last century, and named after him. It consisted in drawing over affected or other parts the pointed extremities of two metallic rods, called *Metallic Tractors*, each made of a different metal. The success obtained was through the influence of the imagination; and, consequently, as a remedial agent, it ranks as high as animal

magnetism (q. v.) but no higher. The operation was, also, called *Tractoration*.

PERLA, Pearl.

PERLE, Pearl.

PERMOTIO, Motion.

PERNICIOSUS, Deleterious.

PERNIO, Chilblain.

PERODACTYLEUS, Flexor longus digitorum pedis profundus perforans.

PERODYNIA, see Cardialgia.

PEROMELIA, from *πηρος*, 'wanting,' and *μελος*, 'a limb.' Congenital misconstruction, or mutilation of the limbs. A genus in the nosology of Good.

PÉRONÉ, Fibula—*p. col du*, Collum fibulæ.

PERONEAL, *Peronæus*, from *περονι*, 'the fibula.' Belonging or relating to the fibula.

PERONEAL ARTERY, or *Fibular A.*, arises from the popliteal, and is situate deeply at the posterior and outer part of the leg. It gives off branches of little importance. Near the outer ankle, it divides into two branches. 1. The *posterior peroneal*, which descends behind the lower joint of the fibula, on the outer surface of the calcaneum. 2. The *anterior peroneal*, which crosses the inferior extremity of the interosseous ligament, to be distributed on the dorsal surface of the foot.

PERONEAL MUSCLES are three in number. 1. *Peronæus Brevis*, *P. secundus*, *P. anticus*, *P. Medius*, *Semi-fibulæus*, *Grand péronéo-sus-métatarsien*, *Court péronéo-latéral*, (F.) *Moyen Péronier*. A muscle, situate beneath the peronæus longus. It is attached, above, to the outer surface of the fibula, and terminates, below, at the posterior extremity of the 5th metatarsal bone, after having been reflected beneath the malleolus externus. It extends the foot upon the leg, at the same time raising a little the outer edge. It may, also, act upon the leg, and extend it upon the foot. 2. *Peronæus Longus*, *Peronæus primus seu posticus*, *P. maximus seu posterior*, *Tibi-péronéo-tarsien*, *Long péronier latéral*, *Péronéo-sus-tarsien* (Ch.) (F.) *Muscle grand péronier*. This muscle is situate at the outer part of the leg. It is long, thick, and triangular above; thin, narrow, and flat below. It is attached, above, to the outer edge of the upper extremity of the fibula, and to the upper third of the outer surface of that bone. Below, it terminates at the outer part of the posterior extremity of the first metatarsal bone. This muscle extends the foot on the leg, turning its point outward, and raising its outer edge. It acts, also, upon the leg, which it extends on the foot. 3. *Peronæus Tertius*,—*Nonus Vesalii*, *Péronier antérieur*, *Petit péronéo-sus-métatarsien* (Ch.) (F.) *Petit Péronier*. A muscle, situate at the anterior, outer, and inferior part of the leg. It is long and flat, and is attached, above, to the inferior third of the anterior margin and inner surface of the fibula; terminating, below, at the posterior extremity of the 5th metatarsal bone. This muscle bends the foot on the leg, by raising its outer edge. It can, also, bend the leg on the foot.

PERONEAL VEIN follows the same course as the artery.

PÉRONÉO-LATÉRAL, COURT, *Peronæus brevis*—*p. Phalangien du gros orteil*, Flexor longus pollicis pedis—*p. Sous-phalangien du pouce*, Flexor longus pollicis pedis—*p. Sous-*

tarsien, *Peronæus longus*—*p. Sus-métatarsien*, *Peronæus tertius*—*p. Sus-métatarsien*, grand, *Peronæus brevis*—*p. Sus-phalangien du pouce*, *Extensor proprius pollicis pedis*—*p. Tibi-sus-phalangien commun*, *Extensor communis digitorum pedis*—*p. Sus-phalangien du pouce*, *Extensor proprius pollicis pedis*.

PÉRONIER, GRAND, *Peronæus longus*—*p. Lateral*, long, *Peronæus longus*—*p. Moyen*, *Peronæus brevis*—*p. Petit*, *Peronæus tertius*.

PEROSO'MUS; from *πηρος*, 'mutilated,' and *σῶμα*, 'body.' A monster, whose whole body is imperfectly developed.—Gurlt.

PEROSPLANCH'NICA, from *πηρος*, 'wanting,' and *σπλῆγχνον*, 'a viscus.' Congenital misconstruction of the viscera. A genus in the Nosology of Good.

PERPERACUTUS. Extremely acute. An epithet applied to very violent and rapid diseases.

PERROSIN. See *Pinus abies*.

PERSIAN FIRE, Anthracion.

PERSICAIRE DOUCE, *Persicaria*.

PERSICARIA, *Polygonum Persicaria*—*p. Urens*, *Polygonum hydropiper*.

PERSIL, *Apium petroselinum*—*p. d'Ane*, *Chærophylloides sylvestre*—*p. de Macédoine*, *Bubon Macedonicum*—*p. de Montagne*, *Athamanta aureoselinum*.

PERSIMMON, *Diospyros Virginiana*.

PERSPIRATION, *Perspiratio*, *Transpiratio*, *Diffusio*, *Diapnoë*, *Diapnœa*, from *per*, 'through,' and *spirare*, 'to breathe, exhale.' The insensible transpiration or exhalation continually going on at the surface of the skin and membranes. Sensible perspiration is called *sweat*. The perspiratory fluid is secreted by an appropriate apparatus, termed by Breschet *diapnogenous*, or *sudoriparous*, and consisting of a secreting parenchyma, situate in the true skin, and of spiral ducts, which open obliquely under the scales of the epidermis. A certain portion of the perspired fluid is thrown off by ordinary physical evaporation.

The *Pulmonary Exhalation* or *Transpiration* is that which takes place in the bronchia, and is sent out with the expired air.

PERSUDATIO, Diapedesis.

PERTE, *Metrorrhagia*—*p. de Sang*, *Hæmorrhagia*—*p. Uterine rouge*, *Metrorrhagia*—*p. Uterine blanche*, *Leucorrhœa*.

PERTES BLANCHES, *Leucorrhœa*.

PERTURBATRIX, (*Medic'na*.) *Perturbating Treatment*. A mode of treatment in which very active means are employed, and such as impress upon diseases a different course from that natural to them. Much evil has resulted from such treatment, especially in febrile diseases.

PERTUS'SIS, from *per*, a prefix denoting excess, and *tussis*, 'cough.' *Tussis fer'na*, *T. convuls'va*, *T. pu'eros strang'ulans*, *T. quinta*, *T. stomacha'lis*, *Pneusis pertus'sis*, *Amphimerina*, *Orthopnœa tussicul'sa*, *clango'sa*, *suffocati'va*, *clamo'sa*, *spasmod'ica*, *Morbus Cucullus*, *Morbus cuculla'ris*, *Bechorthopnœa*, *Bex convuls'va*, *Bex therio'des*, *Hooping-cough*, *Whooping-cough*, *Chin-cough*, *Kin-cough*, *Kind-cough*, (Germ. *Kind*, 'a child,') (F.) *Coqueluche*, *Catarrhe* or *Bronchite convulsive*. A violent convulsive cough, returning by fits, (F.) *Quintes*, at longer or shorter intervals; and consisting of several expirations, followed by a sonorous

inspiration or *whoop*. The fits of coughing generally recur more frequently during the night, morning, and evening, than in the day. It is esteemed contagious, and attacks the young more particularly. It is rare for it to attack an individual for the second time. The duration is various,—six or eight weeks or more. Although the paroxysms are very violent, it is not a dangerous disease. It may, however, give rise to other affections, as convulsions, pneumonia, &c., when the complication is very dangerous, as the cause cannot be removed. Those children suffer the least, who evacuate the contents of the stomach during the fit. In the treatment, all that can be done is to palliate. It must be borne in mind, that the disease will, in time, wear itself out. If there be much tensive pain of the head, or fever, V.S. may be required, but it is seldom necessary. Narcotics occasionally afford relief, but it is temporary. Gentle emetics, given occasionally, when the paroxysms are long and dry, give decisive relief, and aid in the expectoration of the morbid secretions. After the disease has continued for some weeks, and persists in part from habit, change of air is essential, and this, even should the change be to an atmosphere that is less pure.

PERU. See Lima.

PERVENCHE, Vinca minor.

PERVERSION, from *per*, and *vertere*, 'to turn.' *Diastrophē*, *Diastrem'ma*. One of the four modifications of function in disease: the three others being augmentation, diminution, and abolition. The Humorists used this term, also, to designate disorder or morbid change in the fluids.

PERVERSION DE LA TÊTE DES OS ET DES MUSCLES, Loxarthrus.

PERVIGILIUM, Insomnia, Coma vigil.

PES, *Pous*, πους, (F.) *Pied*, 'the foot.' The inferior extremity of the abdominal member, representing a bony arch, an elastic vault, which transmits the weight of the body to the ground. It is divided into three parts;—the *tarsus*, *metatarsus*, and *toes*. (q. v.)

PES ALEXANDRINUS, Anthemis Pyrethum—p. Catii, Antennaria Dioica—p. Equinus, see Kyllosis—p. Leonis, Alechemilla.

PESANTEUR, Weight—p. *Spécifique*, Gravi-ty, specific.

PÈSE-LIQUEUR, Areometer.

PES'SARY, *Pessarium*, from πῆσος, 'a small stone.' *Pessus*, *Pes'sulus*, *Supposito'rium uteri'num*. A solid instrument, composed of cork, ivory, or elastic gum, which is introduced into the vagina to support the uterus, in cases of prolapsus or relaxation of that organ; to keep vaginal herniæ reduced, &c. The ancients made use of medicated pessaries, which they distinguished into emollient, astringent, aperient, &c. The form of pessaries is very variable;—round, oval, &c., according to circumstances.

PESSARY, EGYPTIAN, Ægyptius pessus.

PESSULUS, Pessary, Penis.

PESSUS, Pessary.

PEST, Plague.

PESTE, Plague.

PESTILENT-WORT, Tussilago Petasites.

PESTILENTIA, Plague.

PESTILENTIAL, *Pestilentia'lis*, from *pestis*, 'a pest.' Relating to the plague. *Pestilential discuscs* are those that bear some resemblance

to the plague, in respect to mode of propagation, symptoms, danger, &c.

PESTIS, Plague—p. *Contagiosa*, Plague—p. *Occidentalis*. Fever, yellow—p. *Orientalis*, Plague—p. *Variolosa*, Variola.

PET, Fart.

PETASITES, Tussilago petasites.

PETE'CHIE, *Petichule*, *Punctidule*, *Por'phyra Græcorum*. Small spots, similar in shape and colour to flea-bites, which occur spontaneously upon the skin, in the course of severe fevers, &c. They are, under such circumstances, signs of great prostration.

PETECHIE SINE FEBRE, Purpura simplex.

PETECHIAL SCURVY, Purpura simplex.

PETECHIANOSIS, Purpura hæmorrhagica.

PETICULÆ, Petechiæ.

PETIGO, Impetigo.

PETIT COURIER, Influenza—p. *Lait*, Serum lactis—p. *Lait d'Hoffman*, Serum lactis Hoffmani—p. *Mul*, see Epilepsy—p. *Sus-maxillolabial*, Levator anguli oris.

PETITE POSTE, Influenza.

PETRÆLEUM, Petrolæum.

PETRÆUM, Solidago virgaurea.

PETRAPIMUM, Bubon Macedonicum.

PETREOLE, Petrolæum.

PETRO DEL PORCO, Bezoard of the Indian porcupine.

PETRO-OCIPITAL, *Petro occipita'lis*. Belonging to the petrous portion of the temporal bone and to the occipital bone.

The PETRO-OCIPITAL SUTURE is formed by the junction of the petrous portion of the temporal to the occipital bone. It is a deep groove separating the bones, which have between them a thin layer of cartilage.

PETRO-SALPINGO-PHARYNGE'US. A fleshy fasciculus, which extends from the sphenoid bone, from the petrous portion of the temporal bone, and from the Eustachian tube to the upper part of the pharynx. See Constrictor.

PETRO-SALPINGO-STAPHYLINUS, Circumflexus—p. Salpingo-staphylinus, Levator palati—p. *Staphylin*, Levator palati.

PETRO SPHENOI'DAL, *Petro-sphenoida'lis*. Belonging to the petrous portion of the temporal bone and to the sphenoid bone.

PETRO-SPHENOIDAL SUTURE;—a name given to the small suture which is formed by the anterior edge of the petrous portion of the temporal bone and the posterior edge of the sphenoid.

PETRO'LEUM, *Petrolæum*, *Petræ'leum*, *Petræ'oleum*, *Bitu'men Petroleum*, *Pisschæum Indi-cum*, *Rock Oil*, *Petroleum Barbaden'se*, *Barbadoes Tur*, (F.) *Pétrole* ou *Pétréole*, from πῆρος, 'rock,' and ελαϊον, 'oil.' A bituminous substance of a fetid odour, and bitter, acrid taste. It is semi-liquid, tenacious, semi-transparent; of a reddish-brown colour, insoluble in water and alcohol; combines with fixed and essential oils, and sulphur; and is partially soluble in ether. The petroleum, found at Gabian, near Béziers, in France, has been called *Oleum Gabian'num*, (F.) *Huile de Gabian*, *Petroleum rubrum*.

PETROLEUM BARBADENSE, Petrolæum.

PETROLEUM SULPHURATUM, *Balsamum Sul-phuris Barbaden'se*,—composed of *petrol. barbad.* ʒxvj. *flor. Sulph.* ʒiv,—has been used as a pectoral; and as a detergent to ulcers. It has been accounted antispasmodic and sudorific. Dose,

gtt. x to xxx. Externally, it is used as a stimulant and discutient.

PÉTROLE, *Petrolæum*.

PETROSELINUM, *Apium petroselinum*—p. *Macedonicum*, *Bubon Macedonicum*.

PETROSUM, OS. See *Temporal*.

PETROUS, *Petro'sus*, *Petro'sal*, from *πετρος*, 'a stone.' Resembling stone; having the hardness of stone.

PETROUS or **PETROSAL GANGLION**, or *Ganglion of Andersch*, is formed by the glosso-pharyngeal nerve, shortly after it emerges from the jugular fossa. From this ganglion, M. Jacobson of Copenhagen traced an anastomosing loop through the cavity of the tympanum, which left branches there, and was thence reflected downwards to join the Vidian nerve. See *Otic ganglion*. This has been called the *Nerve of Jacobson*, and the innosculation, *Jacobson's Anastomosis*.

PETROUS or **PETROSAL SINUSES** are two venous sinuses of the dura mater, connected with the petrous portions of the temporal bone, and distinguished, on each side, into:—1. The *superior petrosal sinus*. It arises from the cavernous sinus; follows the upper edge of the petrous portion, which affords it a gutter; passes into the great circumference of the tentorium cerebelli, and opens into the lateral sinus, where the latter experiences a bend, near the base of the pars petrosa. Its form is triangular. 2. The *inferior petrosal sinus* arises from the cavernous sinus at the same point as the last, with which it communicates at the moment of its origin. It descends between the inferior edge of the pars petrosa and the basiliary process; and terminates in the lateral sinus, at the sinus or gulf of the internal jugular vein. It is triangular, and broader at its extremities than middle.

PETUM, *Nicotiana tabacum*.

PEUCE, *Pinus sylvestris*.

PEUCEDANUM OFFICINALE, *Marathrum sylvestre*, *Marathrophyl'ium*, *Pinastellum*, *Feniculum porcinum*, *Bonus Genius*, *Hog's Fennel*, *Sulphurwort*, (F.) *Queue de Pourceau*, *Fenouil de Porc*. Family, Umbelliferae. Sex. Syst. Pentandria Digynia. The root has a strong, fetid smell—somewhat resembling that of sulphureous solutions—and an acrid, unctuous, bitterish taste. It has been recommended as antihysterical and nervine.

PEUCEDANUM SILAUS.—*Saxifraga vulgaris*, *S. Anglica*, *Hippomar'athrum*, *Feniculum erraticum*, English or Meadow Saxifrage, (F.) *Séséli des prés*. The roots, leaves, and seeds have been recommended as aperients, diuretics, and carminatives. Rarely used.

PEUPLIER NOIR, *Populus*.

PEXIS, Concretion.

PEYERI GLANDULÆ, *G. Peyerianæ*, *Peyeri Plexus glandulosi*, *Glandulæ mucosæ coagminatæ* seu *agminatæ* seu *mucip'aræ racem'atim congestæ intestinorum*, *G. intestin'ales* seu *plexiformes* seu *spuriæ*, *Corpuscula glandularum similia* seu *glandulæ in agmen congregatæ intestinorum*, *Enteradenes*, *Peyer's Glands*. Small glands or follicles, situate beneath the villous coat of the intestines. They are clustered together, and are extremely numerous. They occur most numerous in the lower portion of the ileum. Their structure and functions are not well known.

PEZA, *πέζα*. Doric and Arcadian for *πους*,

'a foot.' The foot, according to others, the sole of the foot; and to some, the astragalus, (q. v.)

PEZY'A AURICULA, *Auricula Judæ*, *Fungus sambucusinus*, *Agaricus Auriculæ formæ*, *Jew's Ear*. This fungus is said to be astringent; but has chiefly been used as a gargle in relaxed sore throat.

PFEFFERS or **PFÄFFERS**, MINERAL WATERS OF. *Thermæ Piperinæ*, *Th. subarica*. These springs, which are in the Swiss Alps, are simply thermal: temperature 100° of Fahrenheit.

PHACI, *Ephelides*.

PHACITIS, from *φακος*, 'a lens,' and *itis*, a termination denoting inflammation. *Capsitis*, *Capsulitis*, *Lentitis*. Inflammation of the crystalline lens.

PHACOHYMENTIS, *Phakohymenitis*, *Inflammatio capsulæ lentis*; from *φακος*, 'a lens,' *υμην*, 'a membrane,' and *itis*, denoting inflammation. Inflammation of the capsule of the crystalline.

PHACOS, *Ervum lens*.

PHACOSCOTOMA, *Cataract*.

PHAGENA, *Boulimia*.

PHAGEDÆNA, *Boulimia*—p. *Sloughing of the mouth*, *Cancer aquaticus*—p. *Gangrænosa*, *Hospital Gangrene*.

PHAGEDENIC, *Phagedenicus*, from *φαγω*, 'I eat.'

PHAGEDENIC ULCER, *Nomē*, *Phagedæna*, *Ulcus depascens*, is one which rapidly eats and corrodes the neighbouring parts.

In *Materia Medica*, *Phagedenic* is a substance used for destroying fungous granulations in ulcers, &c.

PHAKOHYMENTIS, *Phacohymenitis*.

PHALACHROMA, *Calvities*.

PHALACROSIS, *Calvities*.

PHALACROTIS, *Alopecia*.

PHALAI'A. A barbarous term, employed by Basil Valentine to designate a universal medicine or panacea.

PHALANGES DES DOIGTS, *Phalanges of the fingers*—p. *des Orteils*, *Phalanges of the toes*.

PHALANGETTIEN. Professor Chaussier uses this term for any thing relating to the third phalanx of the fingers or toes.—*Phalangien*, for what relates to the first,—and *Phalangiinien*, to the second.

PHALANGO'SIS, *Hispiditas*, from *φαλαγγς*, 'a row of soldiers.' An affection of the eyelids, in which the lashes are arranged in two or three rows. See *Trichiasis*. Also, dropping of the upper eyelid, from paralysis of the levator palpebræ superioris muscle.

PHALANX, same etymon. A name given to the small bones, which form the fingers and toes, because placed along side each other like a phalanx. They are distinguished into the *Phalanges of the Fingers*, *Ossa seu Ag'mina seu Ac'ies seu Articuli seu Sentic'ula seu Nudi seu Interno'dia seu Scytal'ides seu Con'dyli Digitorum Manus*, and the *Phalanges of the Toes*, *Ossa seu Articuli seu Interno'dia Digitorum Pedis*.

1. *Phalanges of the Fingers*, (F.) *Phalanges des Doigts*. They are, in each hand, 14,—three to each finger, and two to the thumb; and are situate one above the other. They are distinguished, numerically, reckoning from the base towards the tip of the finger. 1. The first or metacar-

pal, (F.) *Premières phalanges* ou *Phalanges métacarpiennes*. 2. The second or middle *phalanges*, (F.) *Secondes phalanges* ou *Phalanges moyennes*, *Phalangines*, (Ch.) 3. The third *phalanges*, *Metacondyli*, *Phalanges unguis*, (F.) *Troisièmes phalanges* ou *Phalanges unguéales*, *unguifères*, *unguinales*, *Phalanges* (Ch.), which terminate each finger, and support the nail. II. *Phalanges of the Toes*, (F.) *Phalanges des Orteils*. They are the same in number as those of the fingers, but much smaller, and of a very different shape.

The phalanges of a finger or toe are united with each other, and the first with the metacarpal or metatarsal bone. They are developed from two points of ossification; one for the superior extremity, and the other for the body and inferior extremity.

PHALARIS CANARIENSIS, *Cultivated Canary Grass*, (F.) *Alpiste*. Family, Gramineæ. *Sex. Syst.* Triandria Digynia. The seed of this grass, (F.) *Graines d'aspic*, afford a nourishing meal. The ancients recommended them for allaying pains in the kidney and bladder.

PHALLOCARCINOMA, from *φαλλος*, 'the male organ,' and *καρκινωμα*, 'cancer.' Carcinoma or cancer of the penis.

PHALLORRHÆGIA, from *φαλλος*, 'the male organ,' and *ρηγνυμι*, 'I break out.' Hemorrhage from the male urethra. Stomatosis, (q. v.)

PHALLORRHŒA, Gonorrhœa.

PHALLOSOPHIA, from *φαλλος*, 'the male organ,' and *ψοφος*, 'a noise.' Discharge of wind from the male urethra.

PHALLUS, Penis.

PHANTASIA, Imagination.

PHANTASM, *Phantasma*, from *φανταζω*, 'I make appear.' A phantom, false appearance, apparition. Hallucination, (q. v.) Derangement of the sense of sight or of the intellectual faculties, causing objects to be perceived, which are not before the eyes.

PHANTASMA, Pseudoblepsia.

PHANTOM, Fantom.

PHARMACEIA, Poisoning.

PHARMACEUM, Apotheca.

PHARMACEUTIC, *Pharmaceuticus*, from *φαρμακον*, 'a medicine,' An epithet for every thing belonging to Pharmacy. Thus, we say, *Pharmaceutical preparations*, &c.

PHARMACEUTICE, Pharmacy.

PHARMACIEN, Apothecary.

PHARMACOCATAGRAPHOLOGIA, from *φαρμακον*, 'a medicine,' *κατα*, 'beneath,' *γραφη*, 'a writing,' and *λογος*, 'a description.' The art of writing prescriptions.—J. J. Plenck.

PHARMACODYNAMICS, from *φαρμακον*, 'a medicine,' and *δυναμις*, 'power.' A division of pharmacology, which considers the effects and uses of medicines.

PHARMACOGNOSIA, from *φαρμακον*, 'a medicine,' and *γνωσχω*, 'I know.' A division of pharmacology, which treats of simples or unprepared medicines.

PHARMACOLOGIA, *Materia medica*.

PHARMACON, Poison.

PHARMACOPŒIA, *Pharmacopœia*, (F.) *Pharmacopée*, from *φαρμακον*, 'a medicine,' and *ποιω*, 'I make.' A work, containing a collection of formulæ for the preparation, &c., of medicines: generally published by authority.

PHARMACOPŒUS, Apothecary.

PHARMACOPOLA, Apothecary.

PHARMACOPOLE, Apothecary.

PHARMACOPOLIUM, *Apotheca*, *Officina*. The shop of the druggist or apothecary, from *φαρμακον*, 'a medicine,' and *πωλειω*, 'I sell.'

PHARMACOPO'SIA, from *φαρμακον*, 'a medicine,' and *ποισις*, 'a portion.' A liquid medicine, especially one that is cathartic.

PHARMACOSA MEDICAMENTA, from *φαρμακον*, 'a poison.' Medicines that contain poisonous substances.—Fallopian.

PHARMACOTHECA, *φαρμακοθηκη*, from *φαρμακον*, 'a medicine,' and *τιθημι*, 'I place.' A case for certain medicines.

PHARMACUM, Medicament, Poison.—p. Ægyptiacum, Ægyptiacum—p. Amatorium, Philter.

PHARMACUM AD AURES, *Ægyptium Medicamentum ad Aures*. A name given to a medicine, composed of bitter almonds, white pepper-saffron, myrrh, opium, frankincense, castor, verjuice, sulphate of iron, vinegar, pomegranate bark, unguentum nardinum, &c. It was believed to be useful for cleansing fetid ulcers in the ears.

PHARMACY, *Pharmacîa*, *Pharmaceuticæ*, from *φαρμακον*, 'a medicine.' The art which teaches the knowledge, choice, preservation, preparation, and combination of medicines. It was formerly divided into *Galenical* and *Chymical*. The former, called after Galen, embraced the operations undertaken on medicines without analyzing them:—the latter, *Chymical Pharmacy* or *Pharmaceutic Chymistry*, *Pharmacochymia*, comprised the preparation of medicines, founded on the chymical action of their principles.

PHARUS, Pharynx.

PHARYGATHRON, Pharynx.

PHARYNGÆUM, (SAL.) from *pharynx*. A compound of cream of tartar, nitrate of potassa, burnt alum, and distilled vinegar. It was formerly employed, united with honey and plantain water, to make gargles, which were advised in quinsy.

PHARYNGE, Pharyngeal.

PHARYNGEAL, *Pharyngæus*, (F.) *Pharyngé*, *Pharyngien*. That which relates to the pharynx. A name given to the muscles, vessels, and nerves of the pharynx.

PHARYNGEAL ARTERIES. These are two in number. The one—*superior* or *pterygo-palatine*, *Ramus Pharyngæus superior* of Haller—arises from the internal maxillary at the base of the zygomatic fossa, passes through the pterygo-palatine canal, and proceeds to be distributed to the pharynx and the corresponding part of the Eustachian tube. The other—the *inferior*—*Pharyngæa ascendens* of Haller—arises from the external carotid, on a level with the facial. It ascends along the lateral and posterior part of the pharynx, and divides into two branches: the one—the *pharyngeal*, properly so called—is distributed to the pharynx; the other—the *meningeal*—gives its branches particularly to the dura mater.

PHARYNGEAL NERVE:—a branch sent by the pneumogastric to the pharynx. It descends behind the internal carotid; communicates with the glosso-pharyngeal; and divides, opposite the middle constrictor of the pharynx, into a great number of filaments, which anastomose, in a multitude of different directions, with filaments of the glosso-pharyngeal nerve, of the superior laryngeal branch, and of the first cer-

vical ganglion. These different nervous filaments united constitute the *pharyngeal plexus*, the irregular meshes of which send numerous ramifications to the pharynx.

PHARYNGETHRON, Pharynx.

PHARYNGEURYSMA, Pharyngocele.

PHARYNGIEN, Pharyngeal.

PHARYNGITIS, Cynanche parotidæa.

PHARYNGITIS, DIPHTHERITIC, *Ang'na pseudo-membranacea*, *A. membranacea*, *A. pelliculæ* (q. v.), *A. plastica*, *A. diphtheritica*, *Pseudo-membranous Inflammation of the Throat*, (F.) *Angine couenneuse*, *A. gutturale couenneuse*, *A. pseudo-membranæuse*, *A. plastique*, *A. diphthérique*. Diphtheritic Inflammation of the Pharynx.

PHARYNGITIS, FOLLICULAR. Inflammation and enlargement of the follicles of the pharynx, occasionally extending to the larynx. Sometimes termed *Clergyman's Sore-throat*, and *Tubercles of the Larynx and Fauces*.

PHARYNGOCELE, *Pharyngeurys'ma*, *Di-verticulum seu Hernia seu Prolap'sus Œsophagi* vel *pharyng'is*, from φαρυγξ, 'the pharynx,' and κηλη, 'a tumour.' An enlargement at the upper part of the gullet, in which the food sometimes rests in considerable quantity.

PHARYNGO-GLOSSAL, *Glossopharyngeal*, *Pharyngo-glossianus*. That which belongs to the pharynx and tongue.

PHARYNGO-GLOSSAL or GLOSSO-PHARYNGEAL NERVE, *Lingualis lateralis*, (F.) *Nerv Glosso-pharyngien*, *Pharyngo-glossien*—a portion of the eighth pair—arises from the superior and lateral parts of the spinal marrow, between the facial and pneumogastric nerves, by several filaments, which soon unite into a single cord, that passes out of the cranium by the foramen lacerum anterius; goes downwards and forwards, and gains the posterior and inferior part of the tongue. Immediately after its exit from the cranium, it gives a branch to the meatus auditorius externus, and receives a filament from the facial, and another from the pneumogastric nerve. It then furnishes two other filaments, which descend upon the carotid artery, and unite at the bottom of the neck with branches from the cervical ganglions and cardiac nerves, and give two filaments to the stylo-pharyngeus muscle. The glosso-pharyngeus, after sending a twig or two to the tonsil, to the upper part of the pharynx and membrane of the epiglottis, divides into many branches, which run partly to the margin, and partly to the middle of the root of the tongue; supplying, especially, the papillæ majores, and the parts in their neighbourhood.

By some, this nerve is regarded as the controller of the associated motions of the tongue and pharynx. By others, it is esteemed to be the special nerve of gustation.

PHARYNGO-STAPHYLINUS, Palato-pharyngeus.

PHARYNGOGRAPHY, *Pharyngographia*, from φαρυγξ, 'the pharynx,' and γραφή, 'a description.' Anatomical description of the pharynx.

PHARYNGOLOGY, *Pharyngologia*, from φαρυγξ, 'the pharynx,' and λόγος, 'a discourse.' The part of anatomy which treats of the pharynx.

PHARYNGOLYSIS, Pharyngoplegia.

PHARYNGOPLEGIA, from φαρυγξ, 'the

pharynx,' and πλῆσσω, 'I strike.' *Dysphagia paralytica*, *D. torpida*, *D. atonica*, *Ang'na paralytica*, *Asthenia deglutitionis*, *Pharyngolysis*, *Paralysis Œsophagi*, *Gulæ Inbecillitas*. Paralysis of the Pharynx or Œsophagus: commonly a symptom of general paralysis, or of approaching dissolution.

PHARYNGOTOME, *Pharyngotomus*, from φαρυγξ, 'the pharynx,' and τέμνω, 'I cut.' An instrument, invented by J. L. Petit, and used to scarify inflamed tonsils, and to open abscesses, which form in the parietes of the pharynx. It is composed of a long, narrow blade with a lancet point, enclosed in a sheath or canula of silver, slightly curved. This instrument is carried to the part to be cut, and the point of the blade is made to pass out of the sheath, by pressing on a button at the end of the pharyngotome. A spring causes the blade to re-enter as soon as the pressure is removed.

PHARYNGOTOMY, *Pharyngotomia*; same etymon. Some authors have used this word synonymously with œsophagotomy, (q. v.) It means, also, scarification of the tonsils, or an incision, made for opening abscesses there, &c.

PHARYNX, *Pharyx*, *Pharus*, *Gula*, *Læmos*, *Fauces*, *Pharyngethron*, *Pharyngethros*, *Pharyngathron*, *Isthmos*, *Isth'mion*, *Ingu'vies*, *Principium Gulæ*, *Os posterum*, (F.) *Arrière-bouche*, *Gosier*. A species of musculo-membranous, symmetrical canal, on the median line, irregularly funnel-shaped, and situate between the base of the cranium and the œsophagus, in front of the vertebral column. It is very narrow above; but dilates in the middle, and again contracts below, at its junction with the œsophagus. Into the anterior paries of the pharynx open, successively, from above to below,—the posterior orifices of the nasal fossæ; the Eustachian tubes; the posterior aperture of the mouth, and the top of the larynx. The pharynx is formed, externally, of a muscular coat, and, internally, of a mucous membrane, which is continuous above, with the Schneiderian membrane; in the middle, with that of the mouth; below, with that of the œsophagus; and, at the sides, with those of the Eustachian tubes. This membrane has no villi, and presents only a few inequalities, which are owing to the presence of muciparous follicles. The muscular coat of the pharynx is composed of the constrictor muscles, stylopharyngei, and pharyngo-staphylini. The vessels and nerves are called 'pharyngeal.' The pharynx serves as a common origin for the digestive and respiratory passages. It gives passage to the air, during respiration; and to the food at the time of deglutition.

PHARYX, Pharynx.

PHASEOLUS VULGARIS, *Faselus*, *Fasolus*, *Bona*, *Boona*; the *Kidney Bean*; the *French Bean*, (F.) *Haricot*. Family, Leguminosæ. *Sex. Syst.* Diadelphia Decandria. When young and well boiled, this is easy of digestion, and delicately flavoured. It is less flatulent than the pea.

PHASEOLUS CRETICUS, *Cajan*, *Cayan*. A decoction of the leaves, according to Ray, restrains the hemorrhoidal flux, when excessive.

PHASIANUS GALLUS, so called from the river Φασις, in Colchis, near the Black sea, (F.) *Cog*. The parts of generation of the cock, dried and pulverized, were formerly regarded proper

for increasing the quantity of semen. The fat was used as emollient and resolvent; the brain, in diarrhœa; the gall, in freckles and diseases of the eyes. These phantasies are now abandoned.

PHATNION, Alveolus.

PHATNORRHA'GIA, from φατνιον, 'an alveolus,' and γιγνμι, 'I break forth.' Hemorrhage from an alveolus.

PHAUSIN'GES, φαυσιγγες, plural of φαυσιγξ, from φανω, 'I roast.' Spots or blisters on the legs, produced by heat; and, in a more extensive signification, by any other cause. Also, a Pustule.—Fœsius.

PHELLANDRE, Phellandrium aquaticum.

PHELLANDRIUM AQUATICUM, *Phellandrium, Fœniculum aquaticum, Cicuta'ria aquatica, Water Fennel, Fine-leaved Water Hemlock*, (F.) *Phellandre, Fenouil d'eau, Cigue d'eau*. Family, Umbelliferae. *Sez. Syst. Pentandria Digynia*. This plant is stimulant and narcotic. It has been used in intermittents and dyspepsia. It has, also, been given in phthisis pulmonalis, and in cases of scrofulous, atonic ulcers.

PHENIG'MUS, *Phanig'mus*, from φοινιξ, 'red.' *Red Jaundice*. A cutaneous affection, consisting of redness diffused over the skin, without fever. Sauvages makes it a genus of his order *Ictericæ*. Also, the act of irritating a part by a stimulating application.

PHENOMENON, from φαίνομαι, 'I appear.' Any extraordinary and unexpected event. In *Medicine*, it means any change, appreciable by our senses, which supervenes in an organ or function:—as the *phenomena* of the circulation, respiration, &c. It is used in pathology, synonymously with symptom.

PHLEGOPHOBIA, Hydrophobia.

PHEUGYDRON, Hydrophobia.

PHIALA. A *Phial* or *Vial*, (F.) *Firole*. A small bottle, in which apothecaries are in the habit of sending out their mixtures, draughts, &c.: hence called *Medicine Vials*, (F.) *Fioles à Médecine*. They are usually sold in grosses, and assorted into vials of oz. 8; oz. 4; oz. 3; oz. 2; oz. 1½; oz. 1; and oz. ½.

PHILANTHROPUS, Galium aparine.

PHILETRON, Philter.

PHILIA'TROS, φιλατρός, from φιλεω, 'I love,' and ιατρικη, 'medicine.' An amateur of medicine. One who studies medicine.

PHILONIUM LONDINENSE, Confectio Opii.

PHILOPATRIDALGIA, Nostalgia.

PHILOPATRIDOMANIA, Nostalgia.

PHILOSOPHER'S STONE. See Alchymy.

PHILOSOPHIA CORPORIS VIVI, Physiology—p. Hermetica, Alchymy—p. per Ignem, Chymistry.

PHILTER, from φιλεω, 'I love.' *Philtrum*, *Phil'teron*, *Phar'macum* vel *Poc'ulum amato'rium*, *Amato'rium venefic'ium*, (F.) *Philtre*. A medicine or drink, considered capable of causing love.

PHIL'TRUM, in Anatomy, means the fossula or depression on the upper lip, beneath the septum of the nose, which seems to divide the lip into two parts.

PHILYRA, Tilia.

PHIMA, Phyma.

PHIMOS, Capistrum.

PHIMOS'ICUS. Relating to Phimosis.

Sauvages calls *Ischu'ria phimo'sica*, *Ischu'ria urethra'tis a phimo'si*, the retention of urine, which depends upon phimosis.

PHIMOS'IS, *Phymosis*, *Capistra'tio*, from γιμου, 'I bind up.' A disease, which consists in a preternatural narrowness of the opening of the prepuce, so that it cannot be carried behind the corona glandis. This affection is most commonly congenital. Sometimes it is accidental, and dependent upon tumefaction of the glans, or of the prepuce, as occurs in syphilis. To remedy this state, the prepuce may be divided by means of a bistoury and director; or circumcision may be practised.

PHIASMA, Contusio.

PHLEBARTERIODIALYSIS. See Aneurism.

PHLEBECTA'SIA, from φλεψ, 'a vein,' and εκτασις, 'dilatation.' Dilatation of a vein, or of a portion of a vein.—Alibert.

PHLEBECTARCTIE. A mongrel term, from φλεψ, 'a vein,' and αρκτο, 'I contract.' Contraction of a vein.

PHLEBES, (arteries.) See Artery.

PHLEBEURYSMA, Varix.

PHLEB'ION, diminutive of φλεψ, 'a vein.' A vein.—Hippocr. *Venula*, (q. v.)

PHLEBITIS, *Inflammatio vena'rum*, (F.) *Inflammation des veines*, from φλεψ, 'a vein,' and ιτις, the termination for inflammation. Inflammation of the inner membrane of a vein, which sometimes follows blood-letting, and extends from the small wound, made in that operation, to the neighbouring parts of the venous system. The symptoms are, first, inflammation in the punctured part; and, afterwards, a knotty, tense, painful cord, following the direction of the vessel, and accompanied with more or less fever, according to the extent of the inflammation, the nervous symptoms, &c. Phlebitis, also, sometimes supervenes on the ligature or excision of varices; after amputation, gunshot wounds, delivery—*Phlebitis uteri'na*—the ligature of the umbilical cord, &c. It may terminate by resolution, suppuration, ulceration, or gangrene.

PHLEBITIS, CRURAL, Phlegmatia dolens—p. Uterina. See Phlebitis.

PHLEBOGRAPHY, *Phlebogra'phia*, from φλεψ, 'a vein,' and γραφη, 'a description.' Description of the veins.

PHLEB'OLITE, *Phlebol'ithus*, *Vein stone*, from φλεψ, 'a vein,' and λιθος, 'a stone.' A loose concretion, varying in size from a currant to that of a pea, occasionally found in the veins. It would seem to be formed in the blood.

PHLEBOLITHUS, Phlebolite.

PHLEBOL'OGY, *Phleblog'ia*, from φλεψ, 'a vein,' and λογος, 'a discourse.' The part of anatomy which treats of the veins.

PHLEBOPALIA, from φλεψ, 'a vein,' and παλλω, 'I palpitate.' With the ancients, *pulsation*, which they conceived to be produced by the veins. See *Pulses venarum*.

PHLEBOL'HTHALMOTOM'IA, *Ophthalmoplebotomi'ia*, from φλεψ, 'a vein,' οφθαλμος, 'the eye,' and τεμνω, 'I cut.' Blood-letting in the eye.

PHLEBOPLEROSIS ECPHRACTICA, Inflammation.

PHLEBORRHA'GIA, from φλεψ, 'a vein,' and ριγνμι, 'I break out.' Rupture of the

veins; and, in a more extensive sense, venous hemorrhage.

PHLEBORRHEX'IS, from φλεψ, 'a vein,' and ρήξις, 'a rupture of a vein.' Also, hemorrhage from a vein. *Phleborrhagia*.

PHLEBOTOMIST, from φλεψ, 'a vein,' and τέμνω, 'I cut.' A bleeder. One who practises, particularly, the operation of phlebotomy. See Blood-letting.

PHLEBOTOMUS, Fleam.

PHLEBS, Vein.

PHLEDONIA, Delirium.

PHLEGM, *Phlegma*, Πίτιϋτα, *Pituite*. One of the four natural humours of the ancients, which was, according to them, cold and moist, as atrabilis was cold and dry. It predominated, especially, in winter.

Pituita was afterwards applied to every aqueous or excrementitious humour, such as the saliva, nasal and intestinal mucus, serum, &c. The terms *phlegm* and *pituita* are no longer used in Physiology; the different humours having received particular names; but the vulgar still use *phlegm* to designate a stringy mucus, expectorated or rejected by vomiting. The ancient chymists gave the name 'phlegm' to aqueous, insipid, and inodorous products obtained by subjecting moist vegetable matters to the action of heat.

PHLEGMAGOGUE, from φλεγμα, 'phlegm,' and αγω, 'I expel.' A medicine, formerly believed capable of "cutting" or removing phlegm.

PHLEGMASIA, Inflammation, Phlegmon—p. *Alba dolens*, *Puerperarum*, *Ph. dolens*—p. of the Peritoneum, Peritonitis.

PHLEGMA'TIA, from φλεγμα, 'phlegm.' *Oedema*, (q. v.) *Anasarca*, *Hydrops*, (q. v.)

PHLEGMA'TIA DOLENS, *P. lactea*, *P. dolens puerperarum*, *P. alba dolens puerperarum*, *Leucophlegmasia dolens puerperarum*, *Sceloncus*, *Scelalgia puerperarum*, *Anasarca serosa*, *Ecthyma oedematium*, *Spargano'sis puerperarum*, *Echymoma lymphaticum*, *Ischias a spargano'si*, *Oedema puerperarum*, *Oed. lacteum*, *Infurcus luctei extremi-tum*, *Cru'al Phlebitis*, *White leg*, *Swelled leg*, *White swelling of lying-in women*, (F.) *Dépot laiteux sur la cuisse*, *Œdème actif des nouvelles accouchées*, *Enflure ou Engorgement des jambes et des cuisses de la femme accouchée*. It occurs, for the most part, in the second or third week after delivery:—is limited to the lower extremity, and chiefly to one side; exhibiting to the touch a feeling of numerous irregular prominences under the skin. It is hot, white, and unyielding; and is accompanied, sooner or later, with febrile excitement. After a few days the heat, hardness, and sensibility diminish; and the limb remains oedematous, for a longer or shorter period. The disease frequently, if not generally, consists in obstruction of the iliac or other veins. Owing to the pressure of the gravid uterus—the flow of blood being obstructed—the serous part of it is thrown out into the cellular membrane of the limb. Sometimes the vein is found completely obliterated.

The treatment consists in the use of antiphlogistics:—the application of leeches or cupping-glasses near the groin: fomentations to the limb, &c.; and, when the active state has subsided, the use of a roller, applied gently at first, but, afterwards, gradually tightened.

PHLEGMATIA LACTEA, *P. dolens*.

PHLEGMATIÆ MEMBRANOSÆ ET PARENCHYMATOSÆ, *Empresma*.

PHLEGMATOPYRA, Fever, adeno-meningeal.

PHLEGMATORRHA'GIA, *Phlegmatorrhœa*, from φλεγμα, 'phlegm,' and ρεω, 'I flow.' Stahl and his partisans gave this name to a copious secretion, by the nostrils, of a limpid and thin mucus, without inflammation. It is the *Coryza Phlegmatorrhagia* of Sauvages. See *Coryza*.

PHLEGMHYMENITIS, *Phlegmymenitis*.

PHLEGMON, from φλεγω, 'I burn.' *Phlogosis phlegmonē*, *Phlegmonē*, *Phlegmasia*, *Incedium*, *Inflammatio*. Inflammation of the cellular texture, accompanied with redness, circumscribed swelling, increased heat and pain; which is, at first, tensile and lancinating; afterwards, pulsatory and heavy. It terminates, most commonly, in suppuration. It requires the antiphlogistic treatment, until suppuration seems inevitable, when the suppuration must be encouraged, as the next favourable termination to resolution.

PHLEGMONE, Inflammation—p. *Mammæ*, *Mastodynia apostematosa*—p. *Mastodynia*, *Mastodynia apostematosa*—p. *Parotidæa*, *Parotis*—p. *Parulis*, *Parulis*—p. *Ventriculi*, *Gastritis*.

PHLEGMONODES, *Phlegmonous*.

PHLEGMONOUS, *Phlegmonodes*, from φλεγμασι, 'a phlegmon,' and εidos, 'resemblance.' That which relates or belongs to a phlegmon.

PHLEGMONOUS INFLAMMATION, is the active inflammation of the cellular membrane; in contradistinction to erysipelatous inflammation, or that of the skin.

PHLEGMOPYRA, Fever, Adeno-meningeal.

PHLEGMORRHAGIA, *Blennorrhœa*.

PHLEGMORRHŒA, *Blennorrhœa*.

PHLEGMYMENTIS, *Phlegmymenitis*, from φλεγμα, 'phlegm,' μενι, 'a membrane,' and itis, the termination for inflammation. Inflammation of a mucous membrane.

PHLEGMYMENTIS ENTERICA, see *Enteritis*.

PHLEPS, Vein.

PHLOGISTICI, *Empresina*.

PHLOGISTON, Hydrogen.

PHLOGO'DES, from φλογ-, 'flame,' and εidos, 'resemblance.' *Inflamed*, *Inflammatum*. An epithet employed, particularly, to express the red colour of the face.

PHLOGOPYRUS, *Synocha*.

PHLOGO'SIS, *Incendium*, (q. v.) *Inflammation*, (q. v.) Some writers use the word exclusively for external inflammations—phlegmon; others, for those that are superficial or erysipelatous.

PHLOGOSIS, *Phlegmone*, *Phlegmon*.

PHLOGOTICA, *Inflammations*. The second order in the class *Hæmatica* of Good.

PHLOIOS, Cortex.

PHLOOS, Cortex.

PHLORIDZINE, *Phloridzin*, *Phloridzin*, from φλωος, 'inner bark,' and ρίζα, 'root.' The bitter or active principle of the root and trunk of the apple, pear, cherry, and plum tree. It is deposited from the decoction on cooling; crystallizes in silky spicula of a dead white colour, when in masses, or in long slender prisms or tables, when crystallized with care. 1000 parts of water, at a temperature of from 32° to 71°,

only dissolve about one part; but at from 70° to 212°, it is dissolved in all proportions. It is very soluble in pure alcohol, but only slightly so in ether; s. g. 1.429. It has been administered successfully in intermittents,—10 to 20 grains being generally required to arrest the paroxysm. It may be given either in the form of pill or powder.

PHLOUS, Cortex.

PHLYCTÆNA, *Phlycta'cion*, *Ampull'æ*, *Holophlyctides*, *Phlyctides*, *Phlysis*, from *φλυζω*, 'I boil.' Tumours, formed by the accumulation of a serous fluid under the epidermis.

PHLYCTÆNULA. See Hydatid.

PHLYCTENOID, *Phlyctenoides*. Resembling phlyctæna. An epithet for a variety of herpes.

PHLYCTIDES, Phlyctæna.

PHLYCTID'IUM, same etymon. A circular or annular spot of inflammation of the corium, encircled by a red ring or zone, within which suppuration takes place. The genuine small-pox pustule, and that produced by the application of tartar emetic ointment are examples of it.

PHLYSIS, from *φλυζω*, 'I am hot,' 'I boil.' A cutaneous eruption. An ulcerative, subcutaneous tumour: flat, tensile, glabrous; diffused, hot, throbbing; at length fluctuating with an acid ichor.—Good.

PHLYSIS, Phlyctæna—p. Ecthyma, Ecthyma—p. Impetigo, Impetigo—p. Porrigo, Porrigo—p. Scabies, Psora.

PHLYZACIA, Ecthyma.

PHLYZACION, Phlyctæna.

PHOBODIPSON, Hydrophobia.

PHOCOMELES, from *φωκη*, 'a seal,' and *μῆλς*, 'a limb.' A genus of monsters, in which the limbs are shortened; the hands and feet appearing to exist alone, and to be inserted immediately on the trunk, as in the seals and the herbivorous cetacea.—J. G. St. Hilaire.

PHENICISMUS, Rubeola.

PHENIGMUS, Phenigmus—p. Petechialis, Purpura simplex.

PHENIX DACTYLIFERA, Date tree.

PHONA'TION, *Phona'tio*, from *φωνη*, 'voice.' The physiology of the voice.

PHONE, Voice.

PHONICA, *φωνικα*, from *φωνη*, 'voice.' The first order of the class *Pneumatica* in Good's Nosology. Defined:—diseases affecting the vocal avenues:—the passage of the voice impeded, or its power suppressed or depraved.

PHONON'OSI, *Phonon'osi*, from *φωνη*, 'the voice,' and *νσος*, 'a disease.' *Morbi vocis*. Diseases of the voice. *Phonopath'ia*.

PHONOPATHIA, Phononosi.

PHORA, Gestation.

PHORBE, Pabulum.

PHORONOM'IA, from *φορεομαι*, or *φερομαι*, 'I put myself in motion,' and *νομος*, 'law.' The doctrine of muscular motion.

PHOROUS, from *φερω*, 'I carry.' A suffix denoting conveyance. Hence, *Galactophorous*, &c.

PHOS, Light.

PHOSPHAS CALCICUM STIBIATUM, Antimonial powder—p. Calcis stibiatus, Antimonial powder—p. Natricum, Soda, Phosphate of.

PHOSPHAT'IC, *Phosphat'icus*, from *Phosphorus*. Relating to the phosphates; hence

Phosphat'ic Diathesis is the habit of body which favours the deposition of the phosphates from the urine.

PHOSPHORE, Phosphorus.

PHOSPHORENÆSES. M. Baumes unites, under this generic name, the diseases which he attributes to disordered phosphorization; i. e. to excess or deficiency of calcareous phosphate or its decomposition. Amongst these affections he ranks rachitis, osteo-malacia, and gout.

PHOSPHORES'CENCE, *Phosphorescen'tia*. The property possessed by certain bodies of being luminous in obscurity, or under particular circumstances.

PHOSPHORIC ACID, *Ac'idum Phosphor'icum*. A solid, colourless compound; highly sapid; very soluble in water, and vitrifiable by fire. It exists in bones combined with lime. It has been employed in medicine in the form of lemonade, in passive hemorrhage, typhus, phthisis, marasmus, &c., and in injection in cases of cancer of the uterus. It does not seem preferable to other acids.

PHOSPHORURIA, Urine, phosphorescent.

PHOS'PHORUS, *Phos'phorus*, *Autophos'phorus*, from *φως*, 'light,' and *φερω*, 'I carry.' (F.) *Phosphore*. 'A light-carrier.' An elementary or undecomposed substance; not metallic; solid; transparent or semi-transparent; colourless; brilliant; flexible; of a sensible garlic odour; very inflammable, and susceptible of combining with the oxygen of the atmosphere, at even the ordinary temperature. It does not exist pure in nature, but is found frequently united to other bodies.

Phosphorus has been used in medicine, dissolved in ether or suspended in the yolk of egg, as a stimulant; but the greatest precautions are necessary in its administration: hence it is rarely employed.

PHOTODAMPISIS, Refraction.

PHOTOMA'NIA, from *φως*, 'light,' and *mania*. Insane delirium induced by light.

PHOTOPHO'BIA, from *φως*, 'light,' and *φοβος*, 'fear.' Aversion to light:—intolerance of light. Nyctalopia, (q. v.)

PHOTOPHOBOPHTHALMIA, Nyctalopia.

PHOTOPS'IA, from *φως*, 'light,' and *ωψ*, 'the eye.' A false perception of light, as of sparks, flashes of fire, &c. occasioned by certain conditions of the retina and brain. See Metamorphopsia.

PHRAGMOS, *φραγμος*, from *φρασσω*, 'I enclose.' A row of teeth.

PHRASIS, Voice, articulated.

PHRASUM, Marrubium.

PHREN, *φρη*, 'the mind.' Also, the diaphragm.

PHRENES, Diaphragm.

PHRENÉSIE, Phrenitis.

PHRENESIS, Delirium, Phrenitis.

PHRENETIASIS, Delirium, Phrenitis.

PHRENIC, Diaphragmatic.

PHREN'ICA, from *φρη*, 'the mind.' Diseases affecting the intellect; characterized by error, perversion, or debility of one or more of the mental faculties. The first order of the class *Neurotica* of Good.

PHRENICULA HYDROCEPHALICA, Hydrocephalus internus.

PHRENISMUS, Phrenitis.

PHRENITIS, *Phren'esis*, *Phreneti'asis*

Phrenitis, *Cephalitis*, *Cephalalgia inflammatoria*, *Karabitus*, (Arab.,) *Sibare*, *Sphacellismus cerebri*, *Empresma cephalitis*, *Siriasis*, *Seiriasis*, *Sideratio*, *Inflammatio phrenitis*, *Encephalitis*, *Cavuma phrenitis*, *Phrensy*, *Delirium* (q. v.) *Brain Fever*, (F.) *Phrénésie*, *Inflammation du cerveau et du Cerelet*, from φρεν, 'the mind,' and itis, denoting inflammation. A disease, characterized by violent pyrexia; pain in the head; redness of the face and eyes; intolerance of light and sound; watchfulness; and delirium, either furious or muttering. Its causes are the same as those of other inflammations: sometimes, however, it is induced by a *Coup de soleil*; by inebriation; violent mental emotions, &c. Some authors have given the name *Phrenitis* and *Meningitis* to inflammation of the membranes of the brain; and that of *Cephalitis*, *Encephalitis* or *Cerebritis* to inflammation of the substance of the brain: but there are no pathognomonic symptoms, which can lead us to refer the seat of the disease to either of those parts exclusively. *Phrenitis* is, of course, a very dangerous affection, from the importance of the organ concerned. The most active treatment must necessarily be pursued;—repeated bleeding; purging; the application of ice to the shaved head; a position in which the head is raised; and the avoiding of irritation of every kind;—form the remedial means during the violent stage. After this has yielded, counter irritants to the nape of the neck or to other parts of the body will be useful adjuvants. When the brain and meninges were affected only symptomatically, as in inflammation of the diaphragm, the disease was formerly called *Paraphrenitis*, (q. v.)

Hydrocephalus acutus (q. v.) is a variety of *phrenitis*.

PHRENITIS LATRANS, *Hydrophobia*—p. *Vermiosa*, *Vercocquin*.

PHRENOLOGY, *Craniology*.

PHRENSY, *Phrenitis*.

PHRICASMUS, *Horripilation*.

PHRICE, *Horripilation*.

PHRICO'DES (*FEBRIS*.) from φριζν, 'a shivering,' *Horrificus*. A fever, in which the chill is very intense and prolonged.

PHRYAGMA, *Shuddering*.

PHRYCTE, *Colophonias*.

PHRYG'TUS (*LAPIS*.) An earthy matter, found in *Phrygia* and *Cappadocia*, and formerly employed as an astringent.—*Gorræus*.

PHTHARMA CALIGO, *Caligo*—p. *Cataracta*, *Cataract*—p. *Glaucoma*, *Glaucoma*.

PHTHER, *Pediculus*.

PHTHEIRE'MIA, from φθειρω, 'I corrupt,' and αἷμα, 'blood.' A state in which the plastic powers of the blood are deteriorated.

PHTHEIRIASIS, *Phthiriasis*, from φθειρ, 'a louse,' *Morbus pediculosis*, *Pediculatio*, *Malis pediculi*, *Lousiness*, *Lousy disease*, (F.) *Maladie pédiculaire*. A disease which consists in the excessive multiplication of lice on the human body, under conditions in which it does not ordinarily take place, and in spite of cleanliness. It has been asserted, that the affection has often caused death. Simple and medicated baths have been recommended for its removal; lotions of the decoction or infusion of tobacco and stavesacre, mercurial frictions, &c.

PHTHEIRIUM, *Delphinium staphisagria*.

PHTHEIROCTONUM, *Delphinium staphisagria*.

PHTHINODES, *Phthisicus*.

PHTHIRIASIS, *Malis*, *Phtheiriasis*.

PHTHIROPORON, *Autumn*.

PHTHIS'ICUS, *Phthino'des*, *Tab'idus*, *Phthisical*. (F.) *Poirinaire*. Belonging to phthisis. Also, one labouring under phthisis.

PHTHISIE, *Phthisis pulmonalis*—p. *Calculouse*, *Calculi*, *pulmonary*.

PHTHISIOLOGY, *Phthisiolog'ia*, from φθισις, and λογος. A treatise on phthisis.

PHTHISIO'SIS, *Tubercular consumption*.

PHTHISI-PNEUMONIA, *Phthisis pulmonalis*.

PHTHISIS, *Phthoe*, *Tabes*, *Consumption*, *Decline*, from φθιω, 'I dry,' 'I fade.' This word, taken in a general sense, means progressive emaciation of every part of the body. It is usually, however, restricted to phthisis pulmonalis.

PHTHISIS, CANCEROUS, *Med'ullary* or *Encephaloid Tumour of the Lung*, (F.) *Cancer du Poupon*. Cancer of the lung.

PHTHISIS DORSALIS, *Tabes Dorsalis*—p. *Dyspeptic*, see *Phthisis*—p. *Dyspeptic*, see *Phthisis*.

PHTHISIS LARYNGE'A, *Chronic Laryngitis*, (F.) *Phthisie laryngée*, *Ulcère du larynx*, *Laryngite avec sécrétion de Pus*, is a species of consumption analogous to phthisis pulmonalis, and produced by inflammation and ulceration of the interior of the larynx, and sometimes by caries of the cartilages. *Phthisis trachealis* is a similar affection, seated in the trachea.

PHTHISIS MESERICA, *Tabes mesenterica*—p. *Notias*, *Tabes dorsalis*.

PHTHISIS PULMONALIS, *Phthisis pulmonalis vera seu tuberculosa seu scrophulosa seu tuberculocalcarea seu purulenta exulcerata*, *Marasmus phthisis*, *Hectica phthisis*, *Hæmoptysis phthisis*, *P. pulmonaris*, *Phthisis pneumonia*, *Tabes pulmonalis*, *Phthisis scrophulosa*, *Pneumophthoe*, *Pulmonia*, *Phthisis tuberculosa*, *Tuberculosis Pulmonum*, *Tuberculous disease of the Lungs*, *Pulmonary consumption*, *Consumption*, *Decline*, (F.) *Phthisie*, *P. pulmonaire*, *Crachement de pus*. Occasionally, this formidable disease occurs accidentally: but, usually, it is caused by a conformation obtained from progenitors. This, at least, predisposes to it; and but a slight exciting cause may be required to rouse the predisposition into action. It is less a disease of the torrid zone; and, in the temperate regions of the globe, its pathology is often intimately allied with that of scrofula. It usually consists in the formation of tubercles in the lungs, which sooner or later inflame and break down. In such a constitution, ulcerations of the lungs do not readily heal; and hectic fever—the universal attendant upon irritability and debility—is established. This persists, and gradually wears down the patient, till he ultimately expires, exhausted by the irritative fever. The chief symptoms are the following. The patient feels a sense of uneasiness in the chest, with severe fits of coughing, or a short and dry cough, with dyspnoea. This may be considered the incipient stage. The cough then becomes extremely troublesome, especially in the morning; and dyspnoea is increased on the slightest exertion. The expectoration is evidently purulent, with fever in the evening, and circumscribed redness of the cheeks; wasting and

colliquative sweats early in the morning. This must be considered the confirmed stage. In the third or last stage, the hectic is constant, with small pulse, pungent heat, colliquative sweats, and diarrhoea. The weakness becomes extreme, and the patient exhausted. *Physical Signs*.—1. In the first stage, whilst there are yet scattered miliary tubercles,—the only appreciable change at the exterior of the chest, and this is not constant, is a want of freedom in the movements of the chest under one or both clavicles. Percussion will generally discover a slight diminution of sound corresponding to the summit of one lung.

In the same situation, auscultation shows that the inspiratory murmur is either weaker, rougher, or confused. The sound of expiration is more distinct. The voice and cough are rather more resonant, and wheezing or mucous *râle* are occasionally heard in the same region. 2. When the tubercular deposition has become more abundant, the motion of the chest is more markedly diminished under one or both clavicles. The loss of sound on percussion is more distinct, the inspiration, on auscultation, is bronchial, the expiration louder and more superficial, and the resonance of the voice and cough is increased. The rest of the lung is perhaps healthy, or the respiration may be puerile. 3. When the tubercles are undergoing softening,—in addition to the preceding signs, auscultation exhibits subcrepitant *râle* around the apex of the lung, decreasing from above downwards. It is most distinct during or after the cough, and at the close of a deep inspiration. As the disease proceeds, the bubbling becomes successively larger, and ultimately *gargouillement* is heard. The inspiration and expiration are cavernous or tracheal. The voice and cough indicate unusual resonance and pectoriloquy. The intercostal spaces are often depressed locally, and percussion may become gradually clearer and even tympanitic as the cavern increases.

It is only in the incipient state of this formidable disease, that advantage can be expected from any plan of treatment; and of all means that can be devised, that of removing to a climate in which air and exercise can be daily enjoyed during the autumnal, winter, and spring months is the best. See Climate. If this be impracticable, the patient must be kept in a regulated temperature, taking care that the chamber be duly ventilated; and gestation in the open air be used, whenever the atmosphere, although cold, is dry. The other indications will be: 1. To moderate inflammatory action: 2. To support the strength; and, 3. To palliate urgent symptoms. The whole treatment indeed is palliative. Counter-irritants relieve pain: demulcents and mild opiates alleviate the cough: the mineral acids united with opium relieve the colliquative sweats; and chalk and opium the diarrhoea.

Dr. Wilson Philip has pointed out a particular species of phthisis, which is characterized, in the early stage, by a deranged state of the digestive organs; flatulent, irregular bowels; furred tongue; impaired appetite; unnatural fæces; and the epigastric region more or less full and tender on pressure. The affection of the lungs is here secondary. He calls it *Dyspeptic phthisis*.

PHTHISIS PUPILLARIS, Myosis—p. Pupilla, Synechisis—p. Scrophulosa, P. pulmonalis—p. Tuberculosa, P. pulmonalis.

PHTHISIS PULMONALIS PURULENTA EXULCERATA, Ph. pulmonalis—p. Pulmonalis scrophulosa, Ph. pulmonalis—p. Pulmonalis tuberculosa, Ph. pulmonalis—p. Pulmonalis tuberculosa-ulcerata, Ph. pulmonalis—p. Pulmonalis vera, Ph. pulmonalis.

PHTHISURIA, Diabetes, (Mellitus.)

PHTHOE, Phthisis.

PHTHOIS, Pastil, Trochiscus.

PHTHOISCOS, Trochiscos, Pastil.

PHTHORA, Abortion, Corruption.

PHTHORIUS, Abortive.

PHUSCA, Oxycerate.

PHYGETH'OLON, *Panus*, *Phypella*, from *φυγο*, 'I broil.' Inflammation of the superficial lymphatic glands, not ending in suppuration.

PHYLACTERION, Amuletum.

PHYLACTERIUM, from *φυλασσω*, 'I preserve.' A *Phylactery*. An amulet:—a prophylactic.

PHYLAXIS, Conservation.

PHYLLANTHUS URINARIA, *Binkohumba*. A plant employed in Ceylon, in decoction, as a diuretic.

PHYLLITIS, *Asplenium Scolopendrium*.

PHYMA, *Phina*, from *φυωαι*, 'I spring up.' With the ancients, this word was used with great latitude: sometimes, in the sense of phlegmon, for tumours larger than a boil, and perfectly suppurative. In the Nosology of Sauvages, *Phymata* is an order of diseases, to which he refers erysipelas, œdema, phlegmon, emphysema, scirrhus, &c. In that of Dr. Good it is a genus, including hordeolum, furunculus, sycosis, and anthrax.

PHYMA ANTHRAX, Anthrax—p. Anthrax terminthus, Terminthus—p. Sycosis, Sycosis.

PHYMATOSIS, Excrescence—p. Elephantiasis, Elephantiasis—p. Verrucosa, Verruca.

PHYMOSIS, Phimosis.

PHYPELLA, *Phygethlon*.

PHYSA, Crepitation.

PHYSALIS, *P. Alkekengi*, *Sola-num resicdarium*, *Alchachen'ge*, *Alkekengi*, *Halicad'abum*, *Winter Cherry*, (F.) *Alkekenge*, *Coqueret*. Family, Solanæ. *Sez. Syst.* Pentandria Monogynia. The berries are recommended as a diuretic, from 6 to 12 for a dose, in dropsical and calculous cases.

PHYSALIS ALKEKENGIS, *Physalis*.

PHYSICIA ISLANDICA, *Lichen Islandicus*—p. *Nivalis*, *Lichen caninus*.

PHYSCO'NIA, from *φυσκη*, 'a bladder.' *Ventrositas*, *Ephyma physconia*, *Hyposarca*, *Emphradica*, *Visconia*, *Hypersarchidios*. A generic term, under which Sauvages has comprised every large tumour developed in the abdomen, that is neither fluctuating nor sonorous. Linnæus calls them *Hyposarca*.

PHYSICIONA BILIOSA, *Turgescencia vesiculæ felleæ*—p. *Mesenterica*, *Tabes mesenterica*—p. *Splenicum*, *Ague cake*.

PHYSCONIE MÉSÉNTÉRIQUE, *Tabes mesenterica*.

PHYSEMA, *Tympanites*, *Physis*.

PHYSE'NIS, *Physe'na*, from *φυσσω*, 'I inflate.' An emphysematous tumour. *Tympanites*, (q. v.)

PHYSETER MACROCEPHALUS. See *Cetaceum*.

PHYSIATRICE, Vis Medicatrix Natura.

PHYSIC, Medicament, Medicina—p. Indian, Euphorbia corollata, Gillenia trifoliata.

PHYSIC'IAN, *Medicus, Ia'tros, Aces'tor, Altheus*, from *φύσις*, 'nature.' (F.) *Médecin*. One who has received his degree from an incorporated Institution, as Doctor (q. v.) of Medicine. The French, formerly, used the word *physicien* in the same sense. It is now appropriated to the natural philosopher.

PHYSICS, *Iatrophys'ics*. Physics, directly applied to Medicine: either to the explanation of the vital phenomena, the preservation of individuals, or the treatment of disease.

PHYSIO-AUTOCRATIA, Vis medicatrix nature.

PHYSIO'NOMY, *Physiognom'ia, Physiognom'ica, Physiognom'icē, Physionom'ia, Physiognomon'ica, Physiognom'onē, Physiognomos'yē, Physiognom'ia, Anthropol'og'ia, Prosopomanti'a, Semi'ot'icē fa'ciei, Physiognom'on'ia, Physiognom'ony, Metopos'copy, Prosop'osis*, from *φύσις*, 'nature,' and *γινωσκω*, 'I know.' The art of knowing the dispositions of men from their external appearance; especially from the features. Every inference of this kind must necessarily be extremely fallacious, and cannot be reduced to rule, as was attempted by Lavater and others. In infantile diseases, numerous shades of expression are evident, which experience teaches how to appreciate; and which afford useful guides in understanding the pathology of that period of existence.

PHYSIOLOGICAL ANATOMY, see Anatomy—p. Doctrine, Broussaism.

PHYSIOLOGICE, Physiology.

PHYSIOLOGY, *Physiolog'ia, Biol'ogy, Physiolog'icē, Econom'ia animāl'is, Anatom'ia vivā, Anal'omē animāl'ta, Anthropolog'ia, Microcosmograph'ia, Microcosm'ica scient'ia, Cognit'io physiolog'ica, Pars naturāl'is medicīnæ, Philosoph'ia corporis vivi*; from *φύσις*, 'nature,' and *λογος*, 'a description.' Formerly, Physiology meant the same as Physics, in its extensive signification, now does. At the present day, it includes the science which treats of the functions of animals or vegetables; an acquaintance with the phenomena the aggregate of which constitute life. It is the science of life. It is divided into *animal* or *vegetable*, according as it considers the life of animals or of vegetables singly. *Comparative Physiology* comprises both. Physiology is, also, *general* or *special*, according as it treats of life in the abstract or in some particular species. To the latter belongs the *Physiology of Man*.—called, also, *Hygienic Physiology*, to distinguish it from *Pathological Physiology* or *Pathology*.

PHYSIONOMIA, Physiognomy.

PHYSIONOMIE ÉGARÉE. See Wild.

PHYSIS, Sex.

PHYSOC'E'LĒ, *Pneumatoc'e'lē, Hernia ventosa*; *Oscheoc'e'lē flatulen'ta, Emphysema Scroti*, from *φυσάω*, 'I insuflate,' and *κύλη*, 'a tumour.' An emphysematous tumour of the scrotum; probably, a case of intestinal hernia, containing much flatus.

PHYSOCEPH'ALUS, from *φυσάω*, 'I inflate,' and *κεφαλή*, 'the head.' *Physoceph'alus*. Emphysematous tumefaction of the head.

PHYSOCCELIA, Tympanites.

PHYSOME'TRA, *Emphys'e'ma Uteri, Hysterop'h'ysē, Hysteropsoph'ia, Emphys'e'ma uteri-*

num, Infla'tio U'teri, Tym'pany of the Womb, Uterine tympanites, from *φυσάω*, 'I inflate,' and *κύλη*, 'the womb.' A light, tense, circumscribed protuberance in the hypogastrium, obscurely sonorous,—with wind occasionally discharged through the os uteri.

PHYSON, Flatulence.

PHYSONCUS, Emphysema.

PHYSPASMUS, Colica flatulenta.

PHYSOTHORAX, Pneumothorax.

PHYTOLAC'CA DECANDRA, *Poke Weed, American Night Shade, Cancer root, Jucato Culleloe, (?) Jalap, Pigeon Berries, Sold'num racemosum America'num, S. magnum Virginia'num rubrum*, (F.) *Raisin d'Amérique, Phytolaque à dix étamines, Morelle en grappes, Mechoacan du Canada. Family, Chenopodæ. Sex. Syst. Decandria Decagynia*. The leaves, berries, and roots are employed. The young stems, when boiled, are sometimes eaten at table; but when old, they must be cautiously used, as the plant is emetic and cathartic. It is most celebrated as a remedy in chronic rheumatism; and is given in the form of tincture of the ripe berries. It is, also, used in cutaneous eruptions; tinea capitis, itch, cancerous ulcers, &c.

The root is gathered and dried in the fall.

PHYTOLAQUE À DIX ÉTAMINES, *Phytolacca decandra*.

PHYTOLOGIA MEDICA, Botany, Medical.

PHYTOTOMY, see Anatomy, (Vegetable.)

PIA MATER, *Pia seu mollis seu ten'uis Mater, Meninx int'erior, Meninx chor'oides, Inner lam'ina of the Meninge, (Ch.,) Membra'na vascul'o'sa Cer'ebr'i, (F.) Pie mère, Meningette*. The pia mater is a very delicate membrane, which covers the brain immediately, penetrates into its anfractuosities, and envelops, also, the cerebellum and the spinal prolongation, &c. Bichat does not regard it as a membrane, properly so called, but as a net-work of blood-vessels, united by a lax cellular tissue. The *Pia Mater exterior* is the portion of membrane which covers the exterior of the encephalon, and faces the arachnoid externally. The *Pia Mater interior* is that which lines the cerebral fossæ; into which it penetrates by a cleft situate beneath the posterior part of the corpus callosum and the fornx; and by two other fissures, situate between the corpora fimbriata and thalami nervorum opticorum. The pia mater contains a great number of granulations, similar to the *Glandulæ Pacchioni*.

PIA MATER TESTIS, Tunica vasculosa.

PIAN, Framboesia.

PIANS, MOTHER OF, Mama-pian.

PIAR, Pinguedo.

PICA, Malacia.

PICACISMUS, Malacia.

PICATIO, Malacia.

PICEA, Pinus abies.

PICERION, Butter.

PICOTE, Variola.

PICOTEMENT, Pricking.

PICRÆMA EXCELSA, Quassia.

PICRIA, Bitterness.

PICRIUM SPICATUM, Coutoubea alba.

PICROCHOLOS, Bilious.

PICROMEL, *Bilin*; from *πικρος*, 'bitter,' and *μελι*, 'honey.' A name given by Thénard to a colourless, soft, substance, of an acrid, bitter, and saccharine taste, and nauseous smell, and very soluble in water.

It forms part of the bile, and is classed amongst the animal immediate principles.

PICROS, Amarus.

PICROTOX'INE, *Picrotozī'na*, *Picrotoz'in*, from *πικρος*, 'bitter,' and *τοξινον*, 'poison.' A vegetable alkali, discovered by M. Boullay in the *Menispermum Cocculus*. It crystallizes in quadrangular, white, brilliant, semitransparent prisms; which are excessively bitter, soluble in three parts of alcohol, and in fifteen of boiling water.

The *Cocculus Indicus* owes its poisonous properties to this principle.

PIE MERE, *Pia mater*.

PIECE, Hepatitis.

PIED, Pes, — *p. d'Alexandre*, *Anthemis pyrethrum* — *p. d'Abouette des champs*, *Delphinium consolida* — *p. Bot*, see *Kyllosis* — *p. de Chat*, *Antennaria dioica* — *p. de Cheral marin*, *Cornu ammonis* — *p. de Griffon*, *Gryphius pes*, *Helleborus foetidus* — *p. de Lion*, *Alchemilla* — *p. de Lit*, *Origanum* — *p. d'Ours*, *Acanthus mollis* — *p. Plat*, see *Kyllosis* — *p. de Veau*, *Arum maculatum*.

PIEIRON, Pinguedo.

PIERRE, Calculus — *p. d'Aigle*, *Ætites* — *p. d'Azur*, *Lapis lazuli* — *p. Calaminaire*, *Calamine* — *p. à Cautère*, *Potassa cum calce* — *p. Infernale*, *Argenti nitras* — *p. Judaïque*, *Judeus*, (*lapis*) — *p. Médicamenteuse*, *Medicamentosus lapis* — *p. Nephretique*, *Nephreticus lapis* — *p. Ponce*, *Pumex*.

PIERRES CRAVEUSES, Calculi arthritic — *p. au Fiel*, *Calculi biliary* — *p. Stercorales*, *Calculi of the Stomach and Intestines* — *p. Urinaires*, *Calculi urinary*.

PIESTER, Press.

PIESTERION, Press.

PIESTRON, from *πιεζω*, 'I press.' An instrument recommended by Hippocrates for breaking the bones of the foetal head, when too large to be extracted otherwise.

PIGAMON JAUNATRE, Thaliectron.

PIGEON BERRIES, *Phytolacca decandra*.

PIGNOT, *Earthnut*, *Groundnut*. The bulbous root of the *Bunium Bulbocastanum*. Called *pignuts* from the fondness of the pig for them. They have been considered to possess a styptic quality; and are deemed serviceable in atonic affections of the kidney. — Hooper.

PIGNOT, *Bunium bulbocastanum*.

PIGMENTARIUS, Apothecary, Unguentarius.

PIGMENTUM, Paint — *p. Indicum*, *Indigo* — *p. Nigrum*, see *Choroid* — *p. Uracu*, *Terra Orleana*.

PIGNEROLE, *Centaurea calcitrapa*.

PIGNOT DE BARBARIE, *Jatropha curcas* — *p. d'Inde*, *Jatropha curcas*.

PIG'S FLARE, *Adeps suilla*.

PILA, *Sphæra*, *Bull*. A gymnastic exercise, much used by the ancients as well as moderns. — Galen. Also, a mortar and a pestle. — *Acône*.

PILA, Mortar, Pillar — *p. Damarum*, *Ægagrophila* — *p. Rupicaprarum*, *Ægagrophila*.

PILA MARINA, *Sphæra Marina*, *Sphæra Thalassia*, *Halcyonium rotundum*, (F.) *Pelote de Mer*. Certain light, round, depressed, or oblong masses — inodorous and insipid — in which rushes, hairs, and the debris of shells are met with. These are found on the sea-shores, and have been regarded by Spielmann as consisting chiefly of the roots of the *Zostera Marina*. Iodine is

detected in the ashes, which accounts for their success in goitre. They have, also, been given as a vermifuge.

PILARE MALUM, Trichosis.

PILA'TIO, from *pilus*, 'a hair.' Fracture of the cranium, in which the fissure is narrow, and has the appearance of a hair; — a *capillary fissure*, (F) *Fente capillaire*.

PILEOLUM, *Calotte*

PILEOLUS, a Caul, Pileus.

PILEOUS, *Pilo'sus*, (F.) *Pileux*. That which relates to the hair.

The PILEOUS SYSTEM of Bichat is that formed by the hair. It comprises the different species of hair of the human body.

PILES, BLIND, *Cæcæ hæmorrhoides*.

PILEUS, 'a hat, cap or bonnet for the head.' *Pileolus*. A shield. A nipple-like instrument, formed of various materials, and used by females for protecting the nipple during the child's sucking, when the part is painful. Also, a Caul, (q. v.)

PILEUS, Cucupha — *p. Hippocraticus*, *Bonnet d'Hippocrate*.

PILEUX, Pileous.

PILEWORT, *Ranunculus ficaria*.

PILIER, Pillar.

PILIMICTIO. See Trichiasis.

PILL OF ALOES AND CAMBOGE, *Pilulæ aloes et cambogiæ* — *p. of Aloes and cinchona*, *Pilulæ aloes et kinæ kinæ* — *p. of Aloes and colocynth*, *Pilulæ aloes et colocynthidis* — *p. of Aloes and fetid gums*, *Pilulæ de aloes et foetidis* — *p. of Aloes and ginger*, *Pilulæ aloes et zingiberis* — *p. Aloes and myrrh*, *Pilulæ aloes et myrrhæ* — *p. Aloetic*, *Pilulæ aloeticæ* — *p. Aloetic and asafœtida*, *Pilulæ aloes et asafœtidæ* — *p. Aloetic compound*, *Pilulæ aloes compositæ* — *p. of Ammoniu-ret of copper*, *Pilulæ ammoniuretici cupri* — *p. Analeptic*, James's, see *Analeptica* — *p. Anderson's*, see *Pilulæ de aloes et foetidis* — *p. Anodyne*, *Pilulæ opiatæ* — *p. Antibilious*, Barclay's, *Pilulæ antibiliosæ* — *p. Antibilious*, Dixon's, see *Pilulæ antibiliosæ* — *p. Bacher's*, *Pilulæ ex helleboro et myrrhâ* — *p. Barbarossa's*, *Barbarossæ pilulæ*.

PILL, BLAUD'S. These Pills, proposed by M. Blaud as antichlorotic, are formed as follows. Take of *Gum Tragacanth*, in powder, six grains; *water*, one dram. Macerate in a glass or porcelain mortar, until a thick mucilage is formed, and if it be desired to prevent the formation of peroxide of iron, and to make the pills similar to those of Vallet, substitute a dram of powdered sugar for the mucilage. Add afterwards of *sulphate of iron*, in powder, half an ounce. Beat well until the mixture is homogeneous, and add *subcarbonate of potass*, half an ounce. Beat until the mass becomes of a deep green colour, and of a soft consistence. Divide into 48 pills. Dose, one a day; gradually increasing to two, and afterwards three.

PILL, BLUE, *Pilulæ hydrargyri* — *p. Calomel*, *Pilulæ hydrargyri chloridi nitris* — *p. Camboge*, *Pilulæ cambogiæ compos.* — *p. Camboge compound*, *Pilulæ cambogiæ aloeticæ* — *p. of Carbonate of iron*, *Pilulæ Feri Carbonatis* — *p. Cathartic compound*, *Pilulæ Cathartice Compositæ* — *p. Common*, *Pilulæ aloes et myrrhæ*.

PILL, EVERLASTING. A pill once in vogue, and said to be composed of metallic antimony. It was believed to have the property of purging as often as it was swallowed; and was administered over and again!

PILL, FEMALE, *Pilulæ de aloe et sætidis*—p. Ferruginous, of Vallet, see *Ferri Protocarboas*—p. *Fothergill's*, see *Pilulæ aloes et colocynthidis*—p. *Galbanum*, compound, *Pilulæ galbani compositæ*—p. Gum, *Pilulæ galbani compositæ*—p. of Hellebore and myrrh, *Pilulæ ex helleboro et myrrhâ*—p. Hooper's, see *Pilulæ aloes et myrrhæ*—p. Keyser's, see *Hydrargyrus acetatus*—p. Lady Crespigny's, *Pilulæ aloes et kinæ kinæ*.

PILL, LARTIGUES, *Pilulæ Colchici et Digitalis* (*Ext. Coloc. c. 3ss*; *Ext. Sem. Colchic. alcoholic.*, *Extract. Digital. alcohol.*—*ââ gr. iss*; f. *Massa in pilul. x dividend.*) Dose, two, three or more in the 24 hours in gout.

PILL MACHINE, *Pilulier*—p. Mathews's, see *Pilulæ ex helleboro et myrrhâ*—p. Mercurial, *Pilulæ hydrargyri*—p. of mild chloride of Mercury, *Pilulæ Hydrargyri chloridi mitis*—p. Moseley's, *Pilulæ rhej compositæ*—p. Night, common, *Pilulæ opiatæ*—p. Opiate, *Pilulæ opiatæ*—p. Peter's, see *Pilulæ aloes et cambogiæ*—p. Plummer's, *Pilulæ hydrargyri submuriatis compositæ*—p. of Sulphate of Quinia, *Pilulæ quiniæ sulphatis*—p. Red, *Pilulæ hydrargyri submuriatis compositæ*—p. Red, Boerhaave's, see *Hydrargyri sulphuretum rubrum*—p. of Rhubarb, *Pilulæ Rhej*—p. Rhubarb, compound, *Pilulæ rhei compositæ*—p. Rufus's, *Pilulæ aloes et myrrhæ*—p. Scotch, *Pilulæ de aloe et sætidis*—p. of Soap and opium, *Pilulæ saponis cum opio*—p. Speediman's, see *Pilulæ aloes et myrrhæ*—p. Squill, compound, *Pilulæ scillæ compositæ*—p. Starkey's, see *Pilulæ ex helleboro et myrrhâ*—p. Storax, *Pilulæ e styrace*—p. of Strychnia, *Pilulæ strychniæ*—p. of Submuriate of mercury, compound, *Pilulæ hydrargyri submuriatis compositæ*—p. Turpentine, *Pilulæ de terebinthinâ*—p. Vallet's, see *Ferri Protocarboas* and *Pilulæ Ferri Carbonatis*—p. Webster's, *Pilulæ aloes et kinæ kinæ*.

PILLAR, *Pila*, *Colum'na*, *Columella*, (F.) *Pilier*. A name given to several parts; as the *pillars of the velum palati*, *diaphragm*, (q. v.) &c.

PILON, *Pilum*.

PILOSELLA, *Hieracium pilosella*.

PILOSUS, *Pileosus*.

PILULA, Plural, PILULÆ. Diminutive of *pila*, 'a ball.' *Sphærid'ion*, *Catapo'tion*, *Sphæ'ricion*, *Gongyl'ion*, (F.) *Pilule*. A simple or compound medicine, weighing from one to five grains, of a firm consistence and spherical form; intended to be swallowed at once, without chewing. The *Pill* differs from the *Bolus*, in the latter being softer and larger.

Medicines are often given in the form of pill, on account of their disagreeable taste and odour. *Pilula*, also, means a *Pilular mass*.

PILULÆ EX ALOE, P. aloes *Compositæ*—p. de Aloe et cambogiâ, P. aloes et cambogiæ.

PILULÆ ALOETICÆ, *Pilulæ ex Aloë et Sapo'næ*, *Aloetic Pill*. (F.) *Pilules d'aloës ou aloëtiques*. (*Aloës in pulv.*; *saponis*, sing. 3j, syr. q. s. to form 240 pills. Ph. U. S.) Dose, gr. x to xx in habitual costiveness.

PILULÆ ALOES ET ASAFETIDÆ, *Aloetic and Asafetida Pills*. (*Aloës*; 3ss, *asafetidæ*, *saponis*, sing. 3ss, *mucilag. acaciæ*, q. s. to form 180 pills. Ph. U. S.) Purgative and stomachic. Dose, gr. x.

PILULÆ ALOES ET CAMBOGIÆ, P. de Aloë et *Cambogiâ*, P. *Hydragogæ Bontii*, *Pill of Aloes*

and *Camboge*. (*Aloës*, *cambog.*, *gum. ammoniac.*, *ââ p. æ*. Make into a powder. Dissolve in vinegar; pass through a cloth; express the residuum strongly; and afterwards evaporate, in a water bath, to a pilular consistence. Ph. P.) Purgative: used in dropsy. Dose, gr. xij to xxx.

Peter's Pills—a nostrum—are formed of *aloës*, *jalap*, *scammony*, and *camboge*, each equal parts.

PILULÆ ALOES ET CAMBOCYNTHIDIS, P. ex *Colocynthidæ cum aloë*. P. *Aloës cum Colocynthidæ*, P. *coccine*, P. *Cocchiâ*, P. *colocynthidis compositæ*, P. *coccia mino'res*, *Pill of Aloës and Colocynth*. (*Pulp. coloc. 3ss*, *aloës hepat.*, *scammon.*, *ââ 3j*, *sapon.* 3ij *ol. caryoph. 3j*, *syrup. q. s*. Ph. D.) Cathartic. Dose, gr. v. to x or more.

Fothergill's Pills consist of *aloës*, *scammony*, *colocynth*, and *oxide of antimony*.

PILULÆ ALOES COMPOSITÆ, *Pilulæ ex Aloë*, *Compound Aloetic Pills*. (*Aloës spic. extract. cont. 3j*, *ext. gentianæ 3ss*, *olei carui gr. xl*, *syr. q. s*. Ph. L. These are sometimes, also, called *Family pills*, *Antibilious pills*, &c.

PILULÆ DE ALOE ET FÆTIDIS, P. *Benedictæ Fuller*, *Pill of aloës and fetid gums*; *Pilulæ cephrat'icæ*, *Female pills*, *Pilulæ aloës martiales*. (F.) *Pilules bénites de Fuller*. (*Aloës socotr.*, *sennæ*, *asafatidæ*, *galbani*, *ââ 3ij*, *myrrh. 3iv*, *croci. macis*, *ââ 3j*, *ferri sulphat. 3ss*. Reduce to powder separately, and add *ol. succin. gr. viij*, *syr. artemisiæ* (q. s.) Ph. P.) Purgative, and given in hysteria. Dose, gr. xv to xx.

PILULÆ ALOES ET JALAPÆ, commonly called *Anderson's Pills*, *Anderson's Scots' Pills*, *Scotch Pills*. (*Aloës Barbād.* ʒij, *rad. helleb. nigr.*, *rad. jalapæ*, *potassæ subcarb.*, *ââ 3j*, *ol. anisi 3iv*, *syrup. simpl. q. s.*—Gray.) Dose, gr. x. to xxx.

A committee of the Philadelphia College of Pharmacy recommend the following: *Aloës Barbādens.* 3xxiv, *Saponis 3iv*, *Colocynthid. 3j*, *Cambogiæ 3j*, *Ol. anis. f. 3ss*.

PILULÆ ALOES ET KINÆ KINÆ, P. *stomachicæ*, P. *ante cibum*; *Pill of Aloës and Cinchona*. (F.) *Pilules Gourmandes*. (*Aloës socotr. 3vj*, *ext. cinchon. 3ij*, *cinnam. 3j*, *syrup. absinth. q. s*. Ph. P.) Stomachic and laxative. Dose, gr. x. to xx.

Lady Crespigny's Pills, Lady Webster's Pills, and the *Pilulæ Stomachicæ Mesues*, Ph. L. 1635, resemble those.

PILULÆ ALOES MARTIALES, P. de Aloe et *fætidis*.

PILULÆ ALOES ET MYRRHÆ, P. *Aloës cum Myrrhâ*, P. de Aloë et Myrrhâ, *Rufus's Pills*, *Common Pills*. *Pilulæ Rufi*, P. *communes*, *Pills of Aloës and Myrrh*. (*Aloës 3ij*, *croci in pulv. 3ss*, *myrrh. 3j*, *Syr. q. s.* to form 480 pills. Ph. U. S.) Cathartic and emmenagogue. Dose, gr. x to xx.

Hooper's Pills, according to one of Gray's formulæ, are made as follows. *Ferri Sulph.*, *aqzæ*, *ââ 3vij*: dissolve. Add *aloës Barbād.* ʒij and 3vij, *canellæ albæ*, 3vj, *gum myrrh. 3ij*, *opoponacis 3iv*.

The Committee of the Philadelphia College of Pharmacy recommend the following form. *Aloës Barbādens.* 3vij, *Ferri Sulphatis exsicc.* 3ij, 3ss, *vel Ferri Sulph. crystall. 3iv*, *Ext. Helleb. nigr. 3ij*, *myrrh. 3ij*, *Saponis 3ij*, *Canellæ in pulv. tritæ 3j*, *Zingib. in pulv. tritæ 3j*.

Speediman's Pills consist of *aloës*, *myrrh*, *rhubarb*, *extract of chamomile*, and *essential oil of chamomile*.

PILULÆ DE ALOE ET SAPONE, P. *aloeticæ*.

PILULÆ ALOES CUM ZINGIB'ERE, *Pill of aloes and ginger.* (Aloes hepat. $\mathfrak{z}\mathfrak{j}$, rad. zingib. in pulv. $\mathfrak{z}\mathfrak{j}$, sapon. Hispan. $\mathfrak{z}\mathfrak{ss}$, ol. ess. menthæ pip. $\mathfrak{z}\mathfrak{ss}$. Ph. D.) In habitual costiveness. Dose, gr. x to xx.

PILULÆ AMMONIURETI CUPRI, *Pills of Ammonia of Copper, Pilulæ Cupri.* (F.) *Pilules d'ammoniaure de cuivre.* (Ammonia cupri in pulv. tcn. trit. gr. xv, micæ panis $\mathfrak{z}\mathfrak{iv}$, aquæ carbonatis ammoniæ q. s. Beat into a mass, and divide into xxxij pills. Ph. E.) Tonic and antispasmodic, in epilepsy, &c. Dose, one pill twice daily; gradually increasing the dose.

PILULÆ ANTE CIBUM, P. aloes et kinæ kinæ.

PILULÆ ANTIBILIOSE,—*Burclay's Antibilious Pills.* (Extract of colocynth $\mathfrak{z}\mathfrak{ij}$, resin of jalap $\mathfrak{z}\mathfrak{j}$, almond soap $\mathfrak{z}\mathfrak{ss}$, guaiac. $\mathfrak{z}\mathfrak{ij}$, emetic tart. gr. viij, ol. junip. ol. carui, ol. rosmarin. aa gut. iv, syrup of buckthorn q. s., to form 64 pills.) Dose, 2 or 3.

Dixon's Antibilious Pills are formed of aloes, scammony, rhubarb, and tartarized antimony.

PILULÆ ANTI-SCROPHULOSE, P. ex Oxidō Stibii et Hydrargyri sulphureto nigro compositæ. (P. scanthnon., hydrarg. sulphur. nigr., aa $\mathfrak{z}\mathfrak{ij}$. antimonii oxidī albi, milleped., sapon. amygdalin. aa $\mathfrak{z}\mathfrak{ij}$, extract. glycyrrh. $\mathfrak{z}\mathfrak{v}$. Make into a mass. Ph. P.) Dose, gr. iv. to i.

PILULÆ ANTIHERPETICE, Pilulæ hydrargyri submuriatis comp.—p. Antihysterice, P. galbani compositæ—p. Antispas ticæ, P. galbani compositæ—p. Asafetidæ compositæ, P. galbani compositæ.

PILULÆ BALSAMICÆ, P. Docto'ris Morton. (Milleped pulv. resiat. $\mathfrak{z}\mathfrak{xv}\mathfrak{ij}$, gum. ammon. $\mathfrak{z}\mathfrak{xj}$, acid. benzoic. $\mathfrak{z}\mathfrak{ij}$, croci, balsam. Peruc. aa $\mathfrak{z}\mathfrak{j}$, balsam. sulph. anisat. $\mathfrak{z}\mathfrak{vj}$. Mix. Ph. P.) Tonic, expectorant, and balsamic.

PILULÆ BENEDICTÆ FULLERI, P. de Aloe et scetid. s.

PILULÆ CAMBOGIÆ COMPOSITÆ, P. de guttā gamand'arā, P. hydragoge, Gamboge pills, Pilulæ gummi guttæ aloeticæ; Compound camboge pills. (F.) *Pilules de gomme gutte composées.* (Cambogie contritæ, aloes spicat. extract. contriti. pulv. cinnam comp. sing. $\mathfrak{z}\mathfrak{j}$, saponis $\mathfrak{z}\mathfrak{ij}$. Ph. L.) Cathartic. Dose, gr. x to xx.

Morison's Pills are said by Dr. Paris to be nothing more than the above, with the addition of a small portion of cream of tartar.—Paris.

PILULÆ CATHARTICÆ COMPOSITÆ, Compound cathartic pills. (Ext. colocynth. comp. in pulv. $\mathfrak{z}\mathfrak{ss}$; Ext. Jalapæ in pulv., Hydrarg. chlorid. mit. aa $\mathfrak{z}\mathfrak{ij}$; Gambog. in pulv. $\mathfrak{z}\mathfrak{ij}$, M. Form into a mass with water, and make into 180 pills.—Ph. U. S.) Three for a dose.

PILULÆ COCCII, P. aloes et colocynthidis—p. Coccinæ minores, P. aloes et colocynthidis—p. Coccinæ, P. aloes et colocynthidis—p. Colchici et digitalis, P. M. Lartigue—p. Colocynthidis compositæ, P. aloes et colocynthidis—p. ex Colocynthide cum aloë, P. aloes et colocynthidis—p. Communes, P. aloes et myrrhæ—p. Cupri, Pilulæ ammoniureti cupri.

PILULÆ COPAIBÆ, *Pills of Copaiba.* (Copaib. $\mathfrak{z}\mathfrak{ij}$; magnesiz, recentē prepar. $\mathfrak{z}\mathfrak{j}$. Mix, and set aside till it concretes into a pilular mass, to be divided into 200 pills.—Ph. U. S.) Each pill contains nearly five grains of copaiba. Two to six for a dose.

PILULÆ DE CYNOSLOS'SO, P. de extracto opii. (Pulv. rad. cynogloss., semin. hyoscyam. alb., extract. opii vinos. aa $\mathfrak{z}\mathfrak{iv}$. pulv. myrrh. $\mathfrak{z}\mathfrak{vj}$, oli-

bun. $\mathfrak{z}\mathfrak{v}$, croci, castor., aa $\mathfrak{z}\mathfrak{ss}$, syrup. opii q. s. Ph. P.) Anodyne. In cough, &c. Dose, gr. iv. to gr. viij.

PILULÆ DEPURANTES, P. hydrargyri submuriatis compos.—p. Eclipticæ, P. de aloë et scetid. s.

PILULÆ FERRI CARBONATIS, *Pills of Carbonate of iron, Vallet's ferruginous pills.* (Ferri Sulph. $\mathfrak{z}\mathfrak{iv}$; Soda Carbonat. $\mathfrak{z}\mathfrak{v}$; Mel. despinat. $\mathfrak{z}\mathfrak{ij}\mathfrak{ss}$; Syrup., Aquæ bullientis, aa q. s. Dissolve the sulphate of iron and carbonate of soda, each in a pint of the water, and to each solution add a fluidounce of syrup; then mix the two solutions in a bottle just large enough to contain them; close it accurately with a stopper, and set it by, that the carbonate of iron may subside. Pour off the liquid, and having washed the precipitate with warm water, sweetened with syrup in the proportion of f. $\mathfrak{z}\mathfrak{j}$ of the latter to Oj of the former, until the washings no longer have a saline taste, place it upon a flannel cloth, and express as much water as possible, then mix it with the honey. Lastly, heat the mixture in a water-bath, until it attains a pilular consistence.—Ph. U. S.

PILULÆ FERRI COMPOSITÆ, *Compound pills of Iron, Pilulæ Ferri cum myrrhâ.* (F.) *Pilules de Fer composées.* (Myrrh in pulv. $\mathfrak{z}\mathfrak{ij}$ sodæ subcarb., ferri sulph., aa $\mathfrak{z}\mathfrak{j}$. Syrup, q. s. Mix. to form 80 pills.—Ph. U. S.) Tonic. Dose, gr. x to xx.

PILULÆ FERRI CUM MYRRHÂ, P. Ferri compositæ—p. scetid. s. P. galbani compositæ.

PILULÆ GALBANI COMPOSITÆ, P. asafetidæ compositæ, P. fa'tidæ, P. gummo'sæ, P. e gummi, Compound galbanum pill, Pilulæ antispas ticæ, P. antihystericæ, P. myrrhæ compositæ, Gum pill. (Galban. $\mathfrak{z}\mathfrak{j}$, myrrhæ, aa $\mathfrak{z}\mathfrak{ss}$. asafetidæ $\mathfrak{z}\mathfrak{iv}$, syrup. q. s. to form 450 pills.—Ph. U. S.) Antispasmodic and emmenagogue. Dose, gr. x to xx.

PILULÆ GUMMI, P. galbani compositæ—p. Gummi guttæ aloeticæ, P. cambogiæ compositæ—p. Gummosæ, P. galbani compositæ—p. de Guttā gamand'arā, P. cambogiæ compositæ.

PILULÆ EX HELLEBORO ET MYRRHÂ, P. tonica, Bacher's Pills, Tonic Pills of Bacher, Pills of Hellebore and Myrrh. (Ext. helleb. nig., extract. myrrh., aa $\mathfrak{z}\mathfrak{j}$, fol. cardui benedict., in pulv. $\mathfrak{z}\mathfrak{ij}$. Mix. Ph. P.) Tonic and emmenagogue. In dropsical, cutaneous, and verminous affections. Dose, gr. iv. to gr. viij.

Matthews' Pills,—Starkey's Pills, are formed of rad. helleb. nigr., rad. glycyrrh., sapon. Castill., rad. curcumæ, opii purif., syrup. croci, aa $\mathfrak{z}\mathfrak{iv}$. ol. tereb. q. s. ut fiat massa.—Gray.

PILULÆ HYDRAGOGÆ, P. cambogiæ compositæ—p. Hydragogæ Bontii, Pilulæ aloes et cambogiæ.

PILULÆ HYDRARGYRI, P. mercurial'les, Mercurial pill. Blue pill. (F.) *Pilules de Mercure.* (Hydrarg. purif. $\mathfrak{z}\mathfrak{j}$. confect. rosæ $\mathfrak{z}\mathfrak{ss}$. glycyrrh. $\mathfrak{z}\mathfrak{ss}$. Rub the quicksilver with the confection, until the globules disappear; then add the liquorice powder, and beat the whole into a uniform mass, to be divided into 480 pills.—Ph. U. S.) Antisyphilitic. Mercurial:—in large doses, purgative.

PILULÆ HYDRARGYRI CHLORIDI MITIS, *Pills of mild chloride of mercury, Calomel pills.* (Hydrarg. chlorid. mit. $\mathfrak{z}\mathfrak{ss}$. acacie, in pulv. $\mathfrak{z}\mathfrak{j}$; Syrup. q. s. ut fiat pil. 240.—Ph. U. S.) Each pill contains one grain.

PILULÆ DE HYDRARGYRO, SCAMMONIO, ET ALOE, vulgo **MERCURIALES**, (F.) *Pilules Mercurielles* ou de *Mercur*, *Scammonée* et *Aloës*. (*Hydrarg. purif.* ʒj, mellis ʒxj.) Rub until the globules disappear; then add *aloes socot.*, *scammon.* āā ʒij, *macis*, *cinnam.*, āā ʒij. Make into a mass. *Ph. P.*) Uses, same as the last, but they are more purgative. Dose, gr. viij to xxx. These pills are nearly the same as the *Pastilles de Renaudot*.

PILULÆ EX HYDRARGYRO MURIATICO MITI CUM SULPHURE STIBIATO AURIATICO, *Pilulæ hydrargyri submuriatis compositæ*.

PILULÆ HYDRARGYRI SUBMURIATIS COMPOSITÆ, *Pilulæ ex Stibio et Hydrargyro, P. antihyperæica, P. ex hydrargyro muriat'ico miti cum sulphure stibiato auriat'ico, P. resolventes cum mercurio, P. depurantes; Compound Pills of Submuriate of Mercury, P. Hydrargyri Submuriatis, Calomel Pills, Plummer's Pills, the Red Pill.* (*Hydrarg. submur., antimon. sulphur. precipitat.* sing. ʒij, *guaiac. gum resin. contrit.* ʒiv, *spirit. rect.* ʒss. Beat together. *Ph. L.*) Mercurial, and reputed to be diaphoretic and alterative. Dose, gr. v to x.

Leake's Pilula salutar'ia resembles these. It is used in syphilis.

PILULÆ MERCURIALES, *P. hydrargyri, P. de hydrargyro, scammonio et aloë*—*p. Doctoris Morton, P. balsamicæ*—*p. Myrrhæ compositæ, P. Galbani compositæ*.

PILULÆ OPIATÆ, *P. Thebaidæ, Opiate Pills, Common Night Pills, Anodyne Pills, Nephthos opiatum.* (F.) *Pilules Opiacées.* (*Opii*, p. 1; *ext. glycyrrh.* p. 7; *fruct. myrt. piment.* p. 2. *Mix. Ph. E.*) Five grains contain gr. ss of opium.

PILULÆ OPII, *P. saponis cum opio*—*p. de Extracto opii, P. de cynoglossa*—*p. ex Oxido stibii et hydrargyri sulphureto nigro compositæ, Pilulæ anticrophulosæ*—*p. Resolventes cum mercurio, P. hydrargyri submuriatis compos.*—*p. de Rhabarbaro, Pilulæ rhei compositæ*.

PILULÆ RHEI COMPOSITÆ, *P. de Rhabarbaro, Compound Rhubarb Pills.* (*Pulv. rhei* ʒj, *pulv. aloes* ʒvj, *myrrh* in *pulv. ʒiv, ol. mentha pip.* f. ʒss. Beat into a mass, with *syrup of orange peel*, to form 240 pills, *Ph. U. S.*) Laxative and stomachic. Dose, gr. x to xx.

The stomachic nostrum, sold under the name of *Moseley's Pills*, consists merely of *rhubarb and ginger*.

PILULÆ QUINIAE SULPHATIS, *Pills of sulphate of Quinia* (*Quin. Sulph.* ʒj, *acaciæ*, in *pulv.* ʒij, *syrup.* q. s. ut fiant *pilulæ* 480. *Ph. U. S.*) Each pill contains a grain of the sulphate of quinia.

PILULÆ RHEJ, *Pills of Rhubarb, (Rhej, in pulv. ʒvj, saponis. ʒij; M. et fiant pil. 120. Ph. U. S.)* Each pill contains three grains of rhubarb.

PILULÆ RUFÆ, *P. aloes et myrrhæ*—*p. Salutar'ia, Leake's*, see *Pilulæ hydrargyri submuriatis compositæ*—*p. Saponacæ, P. saponis cum opio*—*p. Saponis compositæ, P. saponis cum opio*.

PILULÆ SAPONIS CUM OPIO, *P. saponacæ, Pills of Soap and Opium, P. saponis compositæ, Pilulæ Opii.* (F.) *Pilules de Savon et d'Opium.* (*Opii* ʒss. *Sapon.* ʒij. *M.*—*Ph. U. S.*) Five grains contain one of opium.

PILULÆ E SCILLÂ, *P. scillæ compositæ*.

PILULÆ SCILLÆ COMPOSITÆ, *P. Scillit'icæ, P. Scillæ cum Zingib'eræ, P. e Scillâ, Compound Squill Pill.* (*Scillæ* in *pulv.* ʒj; *zingib.* in *pulv.*; *ammoniac.* in *pulv.* āā ʒij; *saponis, ʒij, syrup.* q. s. ut fiant *pil.* 120—*Ph. U. S.*) Dose two pills. Expectorant and diuretic. Dose, gr. x to xx.

PILULÆ SCILLÆ CUM ZINGIBERE, *P. scillæ compositæ*—*p. Scillit'icæ, P. scillæ compositæ*—*p. ex Stibio et hydrargyro, P. hydrargyri submur. compos.*—*p. Stomachicæ, P. aloes et kinæ kinæ*.

PILULÆ STRYCHNINÆ, *Fills of Strychnia.* (*Very pure strychnine, 2 gr.; conserve of roses, ʒss.* Make into 24 pills.) One or two for a dose.

PILULÆ E STY'RACE, *Storax Pills.* (*Styracis pur.* ʒij, *opii purif., mellis, croci,* sing. ʒj. *Ph. D.*) Six grains contain one of opium.

PILULÆ DE TEREBINTHINÂ, *Turpentine Pills.* Made of turpentine boiled in 3 times its weight of water, until, when thrown into cold water; it forms a soft paste. It has the properties of turpentine, and has been administered in gleet, &c.

PILULÆ THEBAICÆ, *P. opiatæ*—*p. Tonicæ, P. ex Helleboro et myrrhâ*.

PILULES, *Pilulæ*—*p. Agrégatives*, see *Aggrégate*—*p. d'Aloës ou aloétiques, Pilulæ alœticæ*—*p. d'Ammoniaure de cuivre, Pilulæ ammoniuretici cupri*—*p. Bénites de Fuller, Pilulæ de aloë et tœtidis*—*p. de fer composées, Pilulæ ferri compositæ*—*p. Ferrugineuses de Vallet*, see *Ferri-protocarbonas*—*p. Gourmandes, Pilulæ aloes et kinæ kinæ*—*p. de Mercure, Pilulæ hydrargyri*—*p. de Mercure, &c., Pilulæ de hydrargyro, scammonio et aloë*—*p. Mercurielles, Pilulæ de hydrargyro, scammonio et aloë*—*p. Opiacées, Pilulæ opiatæ*—*p. de Savon et d'Opium, Pilulæ saponis cum opio*.

PILULIER, (F.) *Pill machine.* An instrument, invented by the Germans, for rolling and dividing pills. Also, the earthen pot in which pills are preserved.

PILUM, *Pistill'us, Pistillum, Hyp'eros, Cer'cis* (F.) *Pilon.* A pestle. A wooden, iron, bell-metal, marble, agate, porcelain, or glass instrument for beating or dividing substances in a mortar.

PILUS, *Capillus, Caul, Hair.*

PIMELE, *Pinguedo.*

PIMELI'TIS, from *πιμελη*, 'fat,' and *itis*, denoting inflammation. Inflammation of the adipous tissue.

PIMELORRHŒA, from *πιμελη*, 'fat,' and *ρῆσι*, 'I flow.' A morbid discharge or disappearance of fat.

PIMELO'SIS, from *πιμελη*, 'fat.' Conversion into fat, as *Pimelosis hepatica*, 'fatty degeneration of the liver.'

PIMELOSIS HEPATICA, *Adiposis hepatica.*

PIMENT, *Capsicum annuum*—*p. Royal, Myrica gale.*

PIMENTA, see *Myrtus pimenta*.

PIMENTÆ BACCÆ. See *Myrtus pimento*.

PIMENTO. See *Myrtus pimenta*.

PIMIACULA, *Labia pudendi.*

PIMPERNEL, RED, *Anagallis*—*p. Water, Veronica beccabunga.*

PIMPILIM, *Piper longum.*

PIMPINEL, ITALIAN, *Sanguisorba officinalis.*

PIMPINELLA ANISUM. The *Anise plant*. *Anisum*, *Anisum vulgare*, *Sola'men intestino-rum*, *Anesum*, (F.) *Anis*. Family, Umbelliferae. *Sex. Syst.* Pentandria Digynia. A native of Egypt. The seeds, *Anisum*, (Ph. U. S.) *Semina Anisi*, *Aniseed*, have an aromatic odour; and sweetish, warm, grateful taste. They are carminative; and used in dyspepsia and the tormina of infants. Dose, gr. xv to 3j, bruised. The oil—*OLEUM ANISI*, (F.) *Huile d'anis*—is official. Dose, gr. v to xv.

PIMPINELLA, GREATER, P. magna—p. *Hircina*, P. *Saxifraga*.

PIMPINELLA MAGNA, P. nigra; the *Greater Pimpinella*; *Tragoselinum majus*. *Daucus Cyano-opus*, (F.) *Boucage majeur*. The root has been extolled as diuretic and resolvent, as well as in erysipelatous ulcerations, tinea capitis, rheumatism, &c.

PIMPINELLA NIGRA, P. magna.

PIMPINELLA SAXIFRAGA, Burnet saxifrage, *Poterium sanguisorba*, *Sorbastrel'la*, *Tragoselinum*, *Pimpinella hircina*, P. *umbellifera*, (F.) *Boucage mineur*, *Felit B.*, *Pimprenelle*. The root has an unpleasant smell, and hot, pungent, bitterish taste. It has been recommended as a stomachic; and as a stimulating gargle in paralysis of the tongue.

PIMPINELLA UMBELLIFERA, P. Saxifraga.

PIMPLE, Papula.

PIMPRENELLE, Pimpinella saxifraga—p. *Noire*, *Sanguisorba officinalis*.

PIN. Perhaps from *Pennum*, low Latin; or from *Spina*; *Spina ferrea*, *Acus capitata*, (F.) *Epingle*. An iron or brass instrument, generally of small size; pointed at one extremity, and having a head at the other. It is used, in Surgery, to fix rollers and dressings; and, occasionally, in sutures.

PIN A PIGNONS. See *Pinus picea*.

PINASTELLUM, Peucedanum.

PINASTER, Pinus sylvestris.

PINCÉ, Pinched.

PINCÉE, Pugillus.

PINCERS, Forceps.

PINCETTES, Forceps.

PINCHED, Contractus, (F.) *Pincé, Grippé*. An epithet applied to the face, when the features are contracted; as in violent abdominal affections, or during intense pain.

PINKNEYA PUBESCENS, Georgia Bark. This bark has been used in Georgia in the cure of intermittents, and successfully. It is a powerful bitter. Dose, of the powder, 3j.

PINE APPLE, Bromelia ananas—p. *Aphronous*, *Pinus cembra*—p. Ground, stinking, *Camphorosma Mopseliaca*—p. Mountain, see *Pinus mughos*—p. Mugho, see *Pinus mughos*—p. Stone, *Pinus picea*.

PINEA, Pinus picea.

PINE'AL, Pined'lis, from *pinus*, 'a pine.' That which resembles a pine-apple.

PINEAL GLAND, Glan'dula pined'lis, Cerebral epiph'ysis, Con'drium, Cono'id'es corpus, Penis cer'e'br'i, Corpus turbinatum, is a small body, of a conical shape; pale red or grayish colour; and soft consistence; situate between the fornix and the tubercula quadrigemina. It almost always contains sabulous particles. When these are grouped together over the base of the gland, they form the *Acer'culus Cere'br'i* of Sommering. From its anterior part arise two medullary striae, which proceed over the poste-

rior commissure; coast along the optic thalami, and unite at the anterior pillar of the fornix.

The uses of the pineal gland are unknown. Descartes supposed it to be the seat of the soul!

PINEUS PURGANS, Jatropha curcas.

PINGUEDO, Pin'elz, Piar, Pieiron, Lipos, Stear, Adeps, Sebum, Sebum, Corpus adiposum, Arun'gia, Fat, (F.) *Graisse*. A soft, white, animal substance; inodorous; insipid; oily; inflammable, easy to melt; spoiling in the air, and becoming rancid by union with oxygen; almost insoluble in alcohol; insoluble in water; soluble in the fixed oils. Fat is formed of two immediate principles, *stearin* and *clain*, to which are, almost always, joined an odorous and a colouring principle. It is found in a number of animal tissues, and is very abundant in the neighbourhood of the kidneys and in the epiploon. It is generally fluid in the cetacea; soft, and of a strong smell in the carnivora; solid, and inodorous in the ruminating animal; white, and abundant in young animals; and yellowish in old. It generally forms about a 20th part of the weight of the human body. The fat, considered physiologically, has, for its function, to protect the organs; maintain their temperature; and to serve for nutrition in case of need; as is observed in torpid animals.

PINGUEDO RENALIS, Nephridion.

PINGUICULA VULGARIS, Sanic'ula mont'na, S. Eboracen'sis, Viola palus'tris, Decalath'eon Plin'i, Butter-wort, Yorkshire San'icle. Family, Personnæ. *Sex. Syst.* Diandria Monogynia. The unctuousity of this plant has caused it to be applied to chaps, and as a pomatum to the hair. Decoctions of the leaves, in broths, are used by the common people in Wales as a cathartic.

PINGUIN, Bromelia pinguin.

PINHONES INDICI, Jatropha curcas.

PINK, CAROLINA, Spigelia Marilandica.

PINK DYE, Stripped safflower 3j, sulcarb. of potass, gr. xvij, spirit of wine 3vij: digest for two hours; add *distilled water 3ij:* digest for two hours more, and add *distilled vinegar* or *lemon juice* q. s., to reduce it to a fine rose-colour. Used as a cosmetic.

PINK GROUND, Silene Virginica—p. *Indian, Spigelia Marilandica*.

PINNA, Ala, Pavilion of the ear—p. *Marina*, see *Bissus*.

PINNACULUM FORNICIS GUTTURALIS, Uvula.

PINNULA, Aileron.

PINUS ABIES, Abies rubra, A. excel'sa, El'at'e thele'a, Pice'a, Norway Spruce Fir, Yew-leaved Fir. Nat. Ord. Coniferae. *Sex. Syst.* Monœcia Monadelphica. The tops are used in making *Spruce Beer*, (q. v.)

The *ESSENCE OF SPRUCE* is a fluid extract, prepared by decoction from the twigs of this species of fir. From this is made the *Spruce Beer*, (q. v.)

This fir affords the Burgundy pitch and common frankincense. **BURGUNDY PITCH, White pitch, Pix Burgundica, Pix alba, Res'na abietis hu'mida, Res'na alba humida, Pini abietis resina sponte concre'ta, Pix ar'ida, Pix abiet'na, P. abietis** (Ph. U. S.) (F.) *Poix blanche, Poix grasse, P. jaune, P. de Bourgogne*. This prepared concrete juice is of a close consistence, rather soft, of a reddish brown colour, and not unpleasant smell. It is very adhesive to the

skin; and, consequently, forms excellent plasters for remaining upon the part for some time;—as in cases of affections of the chest. 2. *ABIE'TIS RESI'NA*, (Ph. L. since 1809.) Thus, *Common Frankincense*, *Perrosin*, *Thus famini'num*, *T. vulga'rē*, *Olib'anum vulga'rē*, *Resina abietis sicca*, *Resin of the Spruce Fir*. It is solid, dry, brittle; externally, brownish-yellow; internally, whitish. Used in plasters like the last.

PINUS BALSAME'A, *Abies balsamea*. The tree which affords the *Canada Balsam*, *Balsamum Canaden'se*, *Resina strobil'na*, *Terebinth'ina Canaden'sis*, *Pini balsameæ resi'na liq'uida*, *Resina flu'ida Canadensis*, *Terebinth'ina balsamea*. *Canada Balsam* is one of the purest turpentine. It has the common properties of those substances.

PINUS CANADEN'SIS, *Abies Canaden'sis*, *Hemlock spruce*. A tree, which is abundant in Canada, Nova Scotia, and the more northern parts of New England, and found in the elevated and mountainous regions of the Middle States. The pitch—*Pix Canadensis*, *Canada Pitch*, *Hemlock Pitch*—obtained from it is commonly known under the name *Hemlock gum*.

PINUS CEMBRA, *Aphernous'li Pine*. It yields an agreeably scented turpentine:—the *Carpalthian Balsam*, *Bal'samum Carpath'icum*, *B. Lib'ani*, *Carpath'icum*, *Briançon Turpentine*. The nuts, *Cembro nuts*, have an eatable kernel, and yield oil. The shoots yield *Riga Balsam* by distillation.

PINUS LARIX, *Larix*. The *Larch*, (F.) *Mélèze*. From this tree exude *Or'enburg gum*, and *Briançon manna*. It also yields, by boring, *Common Venice Turpentine*, *Resina Laricis*, *Terebinthina Ven'eta*, *Pini Laricis resina liquida*, (F.) *Térébenthine de Venise*, *T. de Mélèze*. It is usually thinner than the other sorts of turpentine.

PINUS MUGHOS. The *Mountain* or *Mugho Pine*, *Pinus Pumilio*. From the extremities of the branches exudes the *Resina strobil'na* of the Germans, or *Hungarian balsam*. It is also obtained, by expression, from the cones. By distillation, the Hungarian balsam affords the *Krumholz Oil*, *Oleum Templinum*.

PINUS PALUSTRIS, see *Pinus sylvestris*.

PINUS PICE'A, *Silver Fir Tree*, (F.) *Sapin commun*, *El'atē*, *Abies*, *A. Gal'lica*. By piercing the tubercles of the bark of this fir, the *Strasbourg Turpentine* is obtained:—the *Resina Abietis* (Ph. L. before 1809,) *Oleum Abietis*, *Terebinth'ina Argentoratensis*.

PINUS PR'NEA, *Stone Pine*, *Pinea*, *Pinus*, *P. uber'ima*. The nuts, *Zirbelnuts*, *Pine nuts*, (F.) *Pin à pignons*, are eaten raw; or preserved like almonds. They are, also, used in emulsions.

PINUS PUMILIO. See *Pinus Mughos*—p. *Uberima*, *Pinus pinea*.

PINUS SYLVESTRIS, *Pinas'ter*, *Peuce*, *Scotch Fir*. This pine, as well as *Pinus palustris* and other species of *Pinus*, affords common turpentine and its oil, resin, tar, and pitch. 1. *Common Turpentine*, *Terebinth'ina*, *T. vulga'ris*, *T. commun'is*, *Resina Pini*, *Bijon*, *Horse Turpentine*, is obtained by wounding the tree in hot weather. It is used, chiefly, as a dressing for wounds, &c. in horses, and for the distillation of the oil, (see *Oleum Terebinthinæ*.) When the oil is distilled with water, yellow resin or *Rosin*, *Resi'na* (Ph. U.S.)—*Resina flava*—is left,

which is only used in the formation of ointments and plasters: if without the addition of water, the residuum is common resin or *Colophony*, (q. v.) 2. When the cold begins to check the exudation of the common turpentine, part of it concretes in the wounds. This is called, in France, *Gallipot*, *Barras*; and *White Rosin*, *Resina alba*, when hardened after long exposure to the air. 3. When the old trees are subjected to distillation, in a coarse manner, Tar is obtained,—*Hygropissos*, *Pissa*, *Pix cedria*, *Resi'na pini empyreumat'icu liq'uida*, *Terebinth'ina empyreumat'ica*, *Alchitram*, *Alchit'ura*, *Cedria*, *Pix liquida*, (F.) *Goudron*, *Brai liquide*. TAR WATER, *Aqua Picea*, *Infusum Picis liq'uicum seu Picis empyreumaticæ liq'uidæ*, *Potio picea*, (F.) *Eau de Goudron*, was, at one time, a fashionable remedy in numerous complaints, and of late its use has been revived, since its virtues have been presumed to be owing to Creasote. It is employed chiefly in pulmonary affections. (Writers. Bishop Berkeley, Lond. 1744, and Prior, Lond. 1746;) and the vapour has been recommended in phthisis and other diseases of the lungs. It is used, externally, as a detergent. 4. *Common Pitch*, *Pix nigra*, *Black Pitch*, *Burnea*, *Burnia*, *Stone Pitch*, *Pix sicca*, *P. atra*, *P. nard'lis*, *Palimp'sis*, *P. ar'ida* (Ph. L. before 1809.) (F.) *Poix navale*, *P. noire*, is obtained by inspissating tar. It is used only as a resolvent, in plasters.

PIONE, *Pæonia*.

PIOULQUES, (F.) A kind of sucking-pump, invented by Louis, for extracting water that had entered internal cavities, in cases of drowning. A useless instrument.

PIPER, see *Piper nigrum*—p. *Aromaticum*, *P. nigrum*—p. *Betel*, *Betel*—p. *Brazilianum*, *Capsicum annuum*—p. *Calecuticum*, *Capsicum annuum*—p. *Caryophyllatum*, see *Myrtus pimenta*—p. *Caudatum*, *P. cubeba*—p. *Chiapæ*, see *Myrtus pimenta*.

PIPER ALBUM, *White Pepper*, is black pepper, freed from its cuticle.

PIPER CUBE'EA, *Cubeba*, *Com'peper*, *Com'peba*, *Cubal sini*, *Piper cauda'tum*, *Cubeb Pepper*, *Tailed Pepper*, *Cuma'mus*, (F.) *Poire-d'angué*, *Quabebe*. A native of Java and Guinea. The odour of these berries is aromatic; taste at first cooling, afterwards pungent. The active principle is an essential oil—*Oleum Cubebæ*, oil of cubebæ—which is official in the Pharm. U. S. The properties of the cubeb are stimulant and purgative. It is used only in gonorrhæa. Dose from ℥j to ʒj, in powder, three or four times a day; of the volatile oil, 10 or 12 drops.

The 'Turkey yellow berries,'—the dried fruit of the *Rhamnus Catharticus*—are often substituted for cubebæ.

PIPER GUINEENSE, *Capsicum annuum*—p. *Indicum*, *Capsicum annuum*—p. *Jamaicense*, see *Myrtus pimenta*.

PIPER LONGUM, *Macropiper*, *Acapat'li*, *Catutrip'ali*, *Pim'pilim*, *Long Pepper*, (F.) *Poitre long*. As we receive the berries, they consist of the unripe fruit, dried in the sun; and are small, round grains, disposed spirally on a cylindrical receptacle. They are stimulant, carminative and tonic, like the other peppers. Dose, gr. v to ʒj.

PIPER LUSITANICUM, *Capsicum annuum*—p. *Murale*, *Sedum*.

PIPER NIGRUM, *Melanopiper*, *Molagoc'odi*,

Lada, Piper aromaticum, Piper (Ph. U. S.) *Black Pepper*, (F.) *Poirre noir*. Black pepper is the unripe fruit, dried in the sun. Virtues, same as those of the other peppers.

PIPER ODORATUM JAMAICENSE, see *Myrtus pimenta*—p. Tabasco, see *Myrtus pimenta*—p. Turcicum, Capsicum annuum.

PIPERINA, *Piperine, Piperin*. A resinoid substance, obtained from the piper nigrum, by M. Erstadt, in which the virtues of the pepper seem to reside. It has been employed, like the quina, in intermittents, and successfully.

PIPPSISEVA, *Pyrola umbellata*.

PIQURE, Puncture, Wound, punctured.

PISA, (CLIMATE OF.) Pisa has long been celebrated as one of the most favourable climates in Italy for the consumptive. The climate is genial, but somewhat oppressive and damp. It is softer than that of Nice, but not so warm; less soft, but less oppressive than that of Rome.

PISCIARELLI, MINERAL WATERS OF. A spring at Monte Secco, in Italy, between Lake Agnano and Solfatara. It is thermal (100° Fahr.) sulphureous and carbonated, and is chiefly used in old ulcers, leucorrhœa, chronic diarrhœa, and in cutaneous affections.

PISCIDIA ERYTHRINA, *Jamaica Dogwood*. A small branching tree, common in most of the West India Islands;—*Diadelphia Decandria* of Linnæus. It is used in the West Indies to poison fish. It appears to be an acro-narcotic.

PISCINA, *Baignoire*.

PISIFORM, *Pisiformis*, from *pisum*, 'a pea,' and *forma*, 'shape.'

Os PISIFORME, *Os lenticulære, Os Orbiculære, Os extra ordinem carpi*, (F.) *Os hors de rang*, is the fourth bone of the first row of the carpus. It is round, and gives attachment to the tendon of the cubitalis anterior, and to the anterior transverse ligament of the carpus. It is articulated, behind, with the os cuneiforme.

PISO, Mortar.

PISSA. See *Pinus sylvestris*.

PISSASPHALTUS, *Pissasphaltum, Mineral pitch*, from *πισσα*, 'pitch,' and *ασφαλτος*, 'bitumen.' (F.) *Pois minérale*. A thicker kind of *Petroleum* or *Rock Oil*; formerly employed as a vulnerary. It is synonymous with *Glutinous bitumen*, *Malta bitumen*, and *Mineral tar*.

PISSELEUM, *Oleum Pici'num*, from *πισσα*, 'pitch,' and *ελαιον*, 'oil.' An oily matter, obtained from boiling pitch, and used for the same purposes as tar.

PISSELEUM INDICUM, *Petroleum*.

PISSEMENT DE SANG, *Hæmaturia*.

PISSENLIT, *Leontodon taraxacum*.

PISSE'ROS, from *πισσα*, 'pitch.' Ancient name of a cerate, prepared of olive oil, oil of roses, and dried pitch. It was, also, called *Cera'tum pica'tum*, and *C. tetraphar'macum*.—Hippocr.

PISSTES, *Vinum pica'tum*. Same etymon. A wine, prepared from tar and the must of the grape. It was regarded to be stomachic.

PISSOSIS, Malacia.

PISTACHIO NUTS. See *Pistacia vera*.

PISTACIA LENTIS'CUS, *Terebinthus lentiscus, Lentiscus vulgaris*; the *Mastic Tree*. Family, *Terebinthaceæ*. The wood of this tree abounds with the resinous principle of mastic; and a tincture, made from it, has been used in the cure of dyspeptic affections, gout, and dy-

sentery. It yields, by incision, the resin *Mastic*, *Res'na Lentisc'na*, *Men'frige*, *Masti'che*, *Mastic*, *Pistacia Lentisc'ci Resina*. This resin has an agreeable smell, when heated: is almost insipid: in globular, irregular, yellowish, semi-transparent masses: soluble in ether; partially so in alcohol. It is stimulant, and has been used in old coughs, and gleet, and is chewed to sweeten the breath. It is sometimes, also, employed to stop the holes in carious teeth.

PISTACIA TEREBIN'THUS, *Turpentine Tree, Hab-el-Kalimbat, Terebinthus vulgaris, Termin'thus*. The tree, which affords the *Cyprus Turpentine*, *Chio Turpentine*, *True Venice Turpentine*, *Res'na Terebin'thi*, *Terebinthina vera*, *T. Chia*, *T. Cypria*. This substance is classed amongst the resins. It is procured by wounding the bark of the trunk. The best Chio turpentine is of about the consistence of honey; very tenacious, clear, and almost transparent; of a white colour, inclining to yellow, and of a fragrant smell; moderately warm to the taste, but free from acrimony and bitterness. It resembles, in virtues, the other turpentine.

PISTACIA VERA. Name of the tree which affords the *Nux Pistacia*. *Pista'chio nuts* have a sweetish, unctuous taste, resembling that of sweet almonds. Like these, they afford an oil, and may be formed into an emulsion.

PISTILLUS, *Pilum*.

PISTOLOCHIA, *Aristolochia pistolochia*.

PISTORIENSIS GLADIUS, *Bistouri*.

PIT OF THE STOMACH, *Fossette du cœur*.

PITAYA BARK. This bark is preferred in Columbia to any other. It contains a new vegetable alkali, to which the name *Pitayine* has been given.

PITAYINE. See *Pitaya Bark*.

PITCAITHLEY, MINERAL WATERS OF. These saline springs at Pitcaithley, about four miles from Perth, Scotland, contain chlorides of sodium and calcium.

PITCH, *Colophonia*—p. Black, see *Pinus sylvestris*—p. Burgundy, see *Pinus abies*—p. Canada, see *Pinus Canadensis*—p. Common, see *Pinus sylvestris*—p. Hemlock, see *Pinus Canadensis*—p. Jew's, *Asphaltum*—p. Mineral, *Pissasphaltum*—p. Stone, see *Pinus sylvestris*—p. White, see *Pinus abies*.

PITHYRIASIS, *Pityriasis*.

PITHYRINUS, *Acerosus, Furfuraceus*.

PITTA'Cium. A pitch plaster, from *πιττα*, 'pitch.'

PITTOSIS, Malacia.

PITTO'TA. Medicines in which pitch is the chief ingredient.

PITTSBURG, MINERAL WATERS OF. A chalybeate mineral spring, situate about four miles S. W. of Pittsburg, in Pennsylvania. It contains chloride of sodium, chloride of magnesium, oxide of iron, sulphate of lime, and carbonic acid.

PITUITA, *Phlegm*—p. *Narium*, Nasal mucus.

PITU'ITARY, *Pituita'ris*, from *pituita*, 'phlegm.' A name given to several parts.

Fossa PITUITARIA. A depression on the cerebral surface of the sphenoid bone, which lodges the pituitary gland. It is called, on account of its shape, *Sella Turcica*, *Eph'p'pium*. Chaussier calls it *Fossa supra-sphenoidalis*, from its situation.

PITU'ITARY GLAND, *Glandula Pituitosa* vel

pituitaria, *Glandula basilaris*, *Lacuna* vel *Appendicula cerebri*, *Hypophysis* seu *Appendix Cerebri*, *Pituitary body*, *Corpus pituitaræ*;—*Appendice sphenoidale du cerveau*, (Ch.) A small, round body; the anterior portion of which is of a cineritious yellow hue, and the posterior, which is smaller, is whitish and pulpy. Its functions are unknown.

PITUITARY MEMBRANE, *Schneiderian Membrane*, *Membra pituitaria*, *M. olfactoria*. The mucous membrane, which lines the nasal fossæ, and extends to the different cavities communicating with the nose. In the nasal fossæ, the membrane appears formed of two layers, intimately united;—the one, in contact with the bones, is fibrous;—the other is free at one surface. The latter is a mucous membrane, on which papillæ are not easily distinguishable, but which contains them, as well as a number of very small mucous follicles, that open into the cavity of the nares. On penetrating the maxillary, frontal, sphenoidal, and ethmoidal sinuses, the membrane becomes very thin, transparent, less vascular, and seems reduced to its mucous layer. The pituitary membrane receives the impression of smells, by means of the expansions of the olfactory nerves upon it. It is the seat of smell.

PITYRIASIS, from *πυρρον*, 'bran;' *Lepido'sis*, *Pityriasis*, *Dandriff*, *Pityrisma*, *Pityriasis*, *Herpes furfuraceus*, *H. farinosus*, *Furfuratio*, (F.) *Dartre furfuracée volante*;—a very superficial affection; characterized by irregular patches of thin scales, which repeatedly exfoliate and recur; but which never form crusts, or are accompanied with excoriations. It is not contagious. It occurs under three or four varieties of form.

PITYRIASIS, *Porrigo*—*p. Nigra*, *Melasma*—*p. Versicolor*, *Chloasma*.

PITYRISMA, *Pityriasis*.

PITYRON, *Furfur*.

PIXOINE, *Pæonia*.

PIX, *Sperm*—*p. Abietina*, see *Pinus abies*—*p. Abietis*, see *Pinus abies*—*p. Alba*, see *Pinus abies*—*p. Andra*, see *Pinus abies*, and *Pinus sylvestris*—*p. Atra*, see *Pinus sylvestris*—*p. Brutia*, *Brutia*—*p. Burgundica*, see *Pinus abies*—*p. Canadensis*, see *Pinus Canadensis*—*p. Cedria*, see *Pinus sylvestris*—*p. Græca*, *Colophonia*—*p. Liquida*, see *Pinus sylvestris*—*p. Navalis*, see *Pinus sylvestris*—*p. Nigra*, see *Pinus sylvestris*—*p. Sicca*, see *Pinus sylvestris*.

PLACEBO, 'I will please.' An epithet given to any medicine, intended rather to satisfy the patient than to cure a disease.

PLACENTA. A Latin word, signifying a *Cake*. *P. uteri* seu *uteri na* seu *uteri carnea*. *Hepar uterinum*, *Jecur uterinum*, *Caro* seu *Affusio orbicularis*. A soft, spongy, vascular body, formed at the surface of the chorion, adherent to the uterus, and connected with the fœtus by the umbilical cord. It is not in existence during the first period of the embryo state, but its formation commences, perhaps, with the arrival of the embryo in the uterus. Its mode of attachment to the uterus is a topic of dispute; but it seems clear that the main circulation through it is of the blood of the fœtus. The placenta is formed of several lobes or cotyledons, which can be readily distinguished from each other on the uterine surface; but, towards the fœtal surface, are confounded into one mass.

It is composed of the umbilical vessels, cellular tissue, and whitish, resisting filaments, which are vascular ramifications obliterated. Lymphatic vessels have also been presumed to exist in it; and nerves have been traced, proceeding from the great sympathetic of the fœtus. The function of the placenta appears to be like that of the lungs in the adult. It admits of the blood of the fœtus being shown to that of the mother, and undergoing the requisite changes.

PLACENTA FEBRILIS, *Ague cake*—*p. Oblata*, *P. prævia*—*p. Obvia*, *P. prævia*.

PLACENTA PRÆVIA, (from *præ*, and *via*.) *P. obvia*, *P. oblata*. Presentation of the placenta; a condition which gives rise to *unavoidable hemorrhage* from the uterus. The safety of the female depends upon speedy delivery.

PLACENTA SANGUINIS, see *Blood*.

PLACENTITIS, *Inflammatio placentæ*, from *placenta*, and *itis*, a suffix denoting inflammation. Inflammation of the placenta.

PLACENTULA, 'a little cake.' A rudimental placenta. The placenta of an abortion.

PLADAROSIS, *Pladarotes*, from *πλαδαρος*, 'soft.' A soft tumour on the eyelid, unaccompanied with redness or pain.

PLAFOND DES VENTRICULES DU CERVEAU, *Corpus callosum*.

PLAGA, *Ictus*, *Wound*.

PLAGUE, from *πληγή*, *plaga*, 'a stroke,' *Pestis*, *P. orientalis*, *P. contagiosa*, *Pestilentialis*, *Loimos*, *Febris adeno-nerveosa*, *Læmos*, *Læmopyra*, *Chaosda*, *Anthraxia Pestis*, *Febris pestilens*, *Syn'ochus pestilentialis*, *Typhus pestis*, *Exanthema pestis*, the *Pest*, (F.) *Peste*, *Typhus d'Orient*. An eminently malignant disease; endemic in the Levant; frequently epidemic, and destroying at least two-thirds of those it attacks. It is a fever of the most aggravated kind, with affection of the lymphatic glands of the groin, or axillæ, and carbuncles. Its miasmata—it has been conceived—adhere to different organic textures, to woollen goods, clothing, and furniture; and may thus be transported to a considerable distance; but this is not certain. The mean duration of the disease is six or seven days; some die in twenty-four hours, others not till ten or twelve days. Pathological anatomy has afforded little light with respect to it. Various means have been used for arresting the disease, but none have seemed to be pre-eminently distinguished. The great point is, to watch the indications as they develop themselves; and to treat the case, in general, like one of typhus gravior. It is universally agreed that the supuration of the buboes should be aided as far as practicable. For preventing the importation and spread of the plague, the *Quarantine Laws* have been instituted; and when the disease has actually appeared, a *cordon sanitaire* has been drawn round the infected district, so as to prevent all communication.

PLAGUE, COLD. A severe form of congestive fever, seen occasionally in the Southern States. Bilious pneumonia, in which there is no reaction, has been, also, so called.

PLAGULA, *Compress*, *Pledget*, *Splint*.

PLAIE, *Wound*—*p. d'Arme à feu*, *Wound*, *gunshot*—*p. d'Arquebuse*, *Wound*, *gunshot*—*p. Contuse*, *Wound*, *contused*—*p. Exerimée*, *Wound*, *poisoned*—*p. par Arrachement*, *Wound*, *lacerated*.

PLANARIA LATIUSCULA, Distoma hepaticum.

PLANCHER DU CERVEAU, Tentorium.

PLANE, Plexus.

PLANE'TES, *πλανήτης*, Errabundus, Erratic. An epithet, given to diseases, whose returns are irregular—especially to intermittent fevers.

PLANIPEDES, Steganopodes.

PLANITIES PEDIS, Sole.

PLANTA PEDIS, Sole—p. Prima pedis, Tarsus.

PLANTAGO, *P. Major*, Centiner'ia, Arroglossum, Septiner'ia, Polyncuron, Plantago latifolia, *P. major*, (F.) Plantain commun. Family, Plantaginæ. Sz. Syst. Tetrandria Monogynia. The leaves have been said to be refrigerant, attenuant, subtyptic, and diuretic.

PLANTAGO CORONOPUS, Coronopodium, Cornucerrinum, Stella terre, Plantago, Buckshorn, Plantain. Properties like the last.

PLANTAGO PSYLLIUM, Psyllium, Pulicaris herba, Crystalion, Cynomoida, Branching Plantain, Fleacort, (F.) Herbe aux puces commune. The seeds have a nauseous, mucilaginous taste, and no remarkable smell. The decoction of the seeds is recommended in hoarseness and roughness of the fauces.

PLANTAIN, BRANCHING, Plantago psyllium—p. Buckshorn, Plantago coronopus—p. Commun, Plantago—p. d'Eau, Alisma plantago—p. Tree, Musa paradisiaca—p. Water, Alisma plantago.

PLANTAIRE, Plantar muscle—p. Grêle, Plantar muscle.

PLANTAR, Plantaris, from *planta*, 'the sole of the foot.' That which relates or belongs to the sole of the foot. This name has been given to several parts.

PLANTAR APONEUROSIS. A thick, dense, resisting aponeurosis; of a triangular shape, and superficially situate, which occupies the middle and sides of the sole of the foot, and furnishes insertions to several of the muscles of the region, either directly or through the medium of septa, which it sends between them.

PLANTAR ARTERIES. These are two in number, and arise from the extremity of the posterior tibial artery. They are distinguished into:—The *internal plantar artery*, situate above the abductor pollicis pedis. It extends from the termination of the posterior tibial to the trunk of one of the collaterals of that toe. The *external plantar artery* is larger than the preceding, and ought to be considered as the termination of the posterior or tibial. Situate above the flexor communis digitorum pedis, it extends from beneath the calcaneum to the posterior extremity of the last metatarsal space. When it has reached this part, it turns from without inwards; advances towards the posterior extremity of the first metatarsal bone, and anastomoses with the perforating branch of the *dorsalis tarsi*. In the first part of its course, it furnishes calcaneal, articular, muscular, and adipous branches. The second portion of the artery is called the *Plantar Arch* or *Cross*. It gives branches in all directions. The inferior and posterior have received no name. The superior—three in number—are the *posterior perforating arteries*. The anterior branches are larger, and there are commonly four. They

furnish the *anterior perforating*, and the *collaterals* of the last four toes.

PLANTAR LIGAMENTS. A name given to the inferior ligaments, which unite the bones of the tarsus and metatarsus, to distinguish them from the superior, called *dorsal*.

PLANTAR MUSCLE, *Plantaris*, *P. gracilis*, *Tibialis gracilis*, *Extensor tarsi minor*, *Plantaire*, *P. grêle*, *Jambier grêle*, *Petit fémoro-calcanien*, (Ch.) A muscle, situate at the posterior part of the leg. It is long, thin, and narrow. Above, it is attached to the posterior part of the external condyle of the femur; below, it terminates by a long tendon, which is attached to the posterior and inner part of the calcaneum. This muscle extends the leg on the foot, and *vice versa*. It can, also, assist in the flexion of the leg on the thigh.

PLANTAR NERVES. These are two in number, and are furnished by the termination of the posterior tibial nerve. They are distinguished into—1. The *internal plantar nerve*, which extends from the inferior part of the tibial nerve to both sides of the first three toes, and the inner side of the fourth. It furnishes, also, branches to the abductor of the great toe; to the short flexor of the toes; to the accessory; to the short flexor of the great toe, the lumbricales, &c. 2. The *external plantar nerve* proceeds from the termination of the posterior tibial to the posterior extremity of the 5th metatarsal bone, and gives branches to the flexor brevis digitorum pedis, the accessory and the abductor of the little toe. This trunk subsequently divides into two branches;—the one—*profunda*—is distributed to the short flexor of the great toe; the interosseus and abductor pollicis pedis; the other—*superficialis*—sends filaments to the short flexor of the little toe, the two sides of that toe, the outer side of the 4th, and the last lumbricales.

PLANTAR REGIONS are different regions of the sole of the foot. Three are generally reckoned:—the *internal*, *middle*, and *external*.

PLANTAR VEINS follow a similar arrangement.

PLANTARIS SUPERFICIES PEDIS, Sole—p. Versus, see Flexor longus digitorum pedis profundus perforans (accessorius)

PLANTE DU PIED, Sole.

PLANTI-SOUS-PHALANGIENS, Lumbricales pedis—p. *Tendino-phalangiens*, Lumbricales pedis.

PLANUM, OS, from *planus*, 'soft, smooth.' The papyraceous or orbital plate of the ethmoid bone was, formerly, so called.

PLANUM PEDIS, Sole.

PLAQUEMINIER D'EUROPE, Diospyros lotus.

PLASMA, Liquor Sanguinis.

PLASTER, Emplastrum—p. Adhesive, Emplastrum resinae, Sparadrapum adhesivum—p. Adhesive, of Pitch and resins, Emplastrum de pice et resinis glutinans—p. Ammoniacum, Emplastrum ammoniaci—p. Ammoniacum with mercury, Emplastrum ammoniaci cum hydrargyro—p. Aromatic, Emplastrum aromaticum—p. Asafœtida, Emplastrum asafœtidæ—p. of Belladonna, Emplastrum Belladonnæ—p. Blistering, Emplastrum Lyttæ—p. of Blistering fly, Emplastrum lyttæ—p. Calefacient, Emplastrum calefaciens—p. of Cantharides, compound, Emplastrum lyttæ compositum—p. Cephalic, Em-

plastrum picis comp.—p. Corn, Sparadrapum viride—p. Corn, Kennedy's, Sparadrapum viride—p. Court, English, see Ichthyocolle, Sparadrapum adhesivum—p. Cummin, Emplastrum Cumini—p. Defensive, Sparadrapum Galteri—p. Diachylon, Emplastrum plumbi—p. Frankincense, Emplastrum thuris—p. Galbanum, Emplastrum galbani—p. Galbanum, compound, Emplastrum galbani compositum—p. Gum, Emplastrum gummosum—p. of Gum-resins, Emplastrum cum gummi-resinis—p. Hemlock, Emplastrum cicute—p. Iron, Emplastrum Ferri—p. Issue, Sparadrapum pro fonticulis—p. Lead, Emplastrum plumbi—p. Machine, Sparadrapier—p. Mercurial, Emplastrum hydrargyri—p. of Mercury, compound, Emplastrum hydrargyri compositum—p. Nuremberg, Emplastrum Norimbergense—p. Opium, Emplastrum opii—p. Pitch, comp., Emplastrum picis compositum—p. Resin, Emplastrum resinæ—p. of Red oxide of iron, Emplastrum oxidi ferri rubri—p. Soap, Emplastrum saponis—p. of Spanish flies, compound, Emplastrum lyttæ compositum—p. Sticking, Emplastrum resinæ—p. Strengthening, Emplastrum Ferri, Emplastrum oxidi ferri rubri—p. Warm, Emplastrum calefaciens—p. Wax, Emplastrum cere.

PLASTIC, *Plasticus*, from πλασσω, 'I form.' That which forms; which serves to form.

PLASTIC ELEMENT is one which bears within it the germs of a higher form.—Gerber.

PLASTIC FORCE is the generative power in organized bodies. It is also called *Nisus formativus*, *Vis plastica*, *Vis reproductiva*, *Force of Nutrition*, *F. of assimilation*, *Plasticism'us*.

PLASTIC SURGERY, *Morioplastice*.

PLASTICISMUS, *Plastic force*.

PLATA, *Scapula*.

PLATANUS, *Musa paradisiaca*.

PLATEA, *Bothriocephalus latus*.

PLATIASMUS, from πλατυς, 'broad.' Excessive development of the lips, causing the articulation to be imperfect.

PLATINA, *Platinum*.

PLATINUM, *Platina*, from (S.) *plata*, 'silver.' The preparations of platinum resemble in their therapeutical properties those of gold. The **BICHLORIDE**, *Plat'ini Bichloridum*, made by dissolving platinum in *aqua regia*, and the **DOUBLE CHLORIDE OF PLATINUM AND SODIUM**, *Sodii chloroplatinas*, *Chloroplatinate of Sodium*, prepared by dissolving bichloride of platinum and pure chloride of sodium in proper proportions in water, evaporating and crystallizing,—are the preparations used. They are not much prescribed.

PLATULA. See *Pediculus*.

PLATYBREGMATE. See *Cranium*.

PLATYCORIA. *Mydriasis*.

PLATYOPHTHALMON, *Antimonium*.

PLATYSMA, from πλατυς, 'broad.' Any thing broadly extended. A spread plaster.

PLATYSMA MYOIDES, *P. myoides*, *Musculus cutaneus*, *M. subcutaneus*, (Winslow,) *Quadratus genæ vel latissimus colli*, *Tetragonus*, *Stomomandibularis*, *Thoraco-maxillo-facial*, *Thoraco-facial*, (Ch.) (F.) *Peaucier*. A muscle, situate superficially on the lateral parts of the neck. It is flat, broad, and quadrilateral. Its fibres, which are all parallel to each other, pass obliquely downwards, and from without inwards. They arise from the cellular tissue, which covers the anterior and superior part of the chest; pass

before the clavicle, and proceed to attach themselves at the interior part of the symphysis menti, at the external oblique line of the jaw, and at the commissure of the lips. The fibres of this last insertion form a distinct fasciculus, called by some anatomists *Musculus Risorius Santorini*. The *platysma myoides* depresses the commissure of the lips, and carries it outwards. It contributes, also, to the depression of the lower jaw. When it contracts, it wrinkles the skin of the neck transversely.

PLATYSTERNOS, from πλατυς, 'broad,' and στερνον, 'the sternum.' One who has a well developed chest.—D. Pechlin.

PLECHAS, *Perinæum*.

PLECTANÆ, *Cornua uteri*.

PLECTANÆ, *Plica*, *Plegma*, *Plexus*, (q. v.)

A fold. a plexus. Also, a cornu of the uterus.

PLECTRUM. The styloid process of the temporal bone. Also, the uvula and the tongue.—Castelli.

PLEDGET, (D.) *Plagghe*, *Plumaceolus*, *Linted'men*. *Plag'ula*, (F.) *Plumaceau*, *Plumasseau*. A small compress or *gâteau* of lint—(the filaments arranged parallel to each other)—flattened between the hands after the extremities have been cut off or folded down. It is applied over wounds, ulcers, &c., to preserve them from the contact of the air, to retain dressings *in situ*, or to absorb the discharges.

PLEGE, Blow, Ictus.

PLEGMA, *Plectane*, *Plexus*.

PLEIN, (F.) 'Full.' The middle part of a roller.

PLENA MULIER, *Pregnant*.

PLENITUDE, *Fulness*.

PLENITUDO, *Plethora*.

PLERO'SIS, from πληρωσις, 'full,' also, *Repletio*, *Refectio*, *Repletion*. Restoration of flesh after sickness.

PLEROTICUS, *Incarcans*.

PLESMONE, *Plenitudo*, *Sati'etas*, *Sati'cty*, (q. v.) Intemperance, (q. v.) Condition opposite to that of hunger.

PLESSER, *Plexor*.

PLESSIMETER, *Pleximeter*.

PLETHORA, from πληθω, 'I fill.' *Polyæmia*, *Polyhyperæmia*, *Polychymia sanguinea*, *Plenitudo*, *Multitudo*, *Redundantia*, *Repletio*, *Enchyma*, *Completio*, *Fulness*, (q. v.) (F.) *Abundance*. The word *plethora*, which means repletion, expresses a superabundance of blood in the system, or in some part of it:—hence the division of *plethora* into *general* and *local*; the latter being called, according to its seat, *cerebral*, *pulmonary*, *uterine*, &c. The principal symptoms of *plethora* exist in the circulatory system; such as redness of the surface, swelling of the veins, increase in the fulness of the pulse, in the strength of the heart's pulsations, &c., with spontaneous hemorrhages occasionally. With these are usually united general heaviness, torpor, lassitude, vertigo, tinnitus aurium, flushes of heat, &c. The tendency to *plethora*, or its actual existence, must be obviated by purgatives, proper diet, exercise, &c.; and, if the danger from it be pressing, by blood-letting. This is, however, a doubtful remedy for general *plethora*, as it increases hæmatosis.

PLETHOS, *Satiety*.

PLEUMON, *Pulmo*.

PLEUMONIA, *Pneumonia*.

PLEURA, πλευρα, 'the side.' *Membrana*

pleuritica seu *costas succin'gens* seu *succin'gens*, *Membrana* seu *Tunica costalis* seu *subcostalis*, *Hypopleuricus*, (F.) *Plèvre* ou *Pleure*. The pleurae are two thin, diaphanous, perspirable membranes, which line each side of the chest, and are reflected thence upon each lung. Like all serous membranes—to which class they belong—each represents a sac without aperture. From the junction of the pleura of each side the mediastina are formed. That portion of the pleura which lines the parietes of the chest is called *Pleura Costalis*; the portion that covers the lungs, *Pleura Pulmonalis*. The arteries of the pleurae are from the intercostals, internal mammaries, phrenic, inferior thyroid, &c. The veins correspond with the arteries. They are, also, supplied with lymphatics, but nerves are not traceable in them.

Pleura is also used for *Cavity of the Pleura*.

PLEURALGIA, *Pleurodyne*.

PLEURE, *Pleura*.

PLEURÉSIE, *Pleurisy*.

PLEURESIS, *Pleuritis*.

PLEURIS, *Pleuritis*.

PLEURISY, *Pleuritis*—p. Bilious, see *Pleuritis*—p. False, *Pleurodynia*.

PLEURISY, HEAD. A ridiculous term, occasionally used by the vulgar, in the southern states especially, for bilious pneumonia before the pneumonic phenomena are developed, and whilst the head is prominently affected.

PLEURISY, HEMORRHAGIC, *Hæmatothorax*—p. Rheumatic, *Pleurodynia*—p. Root, *Asclepias tuberosa*—p. Typhoid, see *Pleuritis*

PLEURITIS, from *πλευρά*, 'the pleura;' *Morbus lateralis*, *Empres'ma Pleuritis*, *Pleuris*, *Pleur'esis*, *Pleuropneumonitis*, *Pneumopleur'esis*, *Pleuritica Febris*, *Causa Pleurit'is*, *Passio pleuritica*, *Inflammatio Pleuræ*, *Pleurisy*, *Inflammation of the Pleura*, (F.) *Pleurésie*, *Fièvre pleurétique*, *Inflammation de la Plèvre*, may be acute or chronic. Perhaps the most violent of all internal inflammations is the active form; known by acute, lancinating pain in one side of the chest, increased by inspiration, by coughing, and often by pressure; dyspnoea, the inspirations short and frequent; cough dry, or with little expectoration; and difficulty of lying on the affected side. Symptoms, attending the phlegmasie in general, strongly marked.

Physical Signs. There is seldom any perceptible alteration in the exterior of the chest. When effusion has taken place to a great extent, the signs will be similar to those of chronic pleurisy. The motion of the affected side is diminished, and the vibrations of the voice cannot be detected by the hand. There is more or less dulness of sound on percussion, the dulness diminishing or disappearing by change of position. On auscultation, the inspiration is feeble, distant, or inaudible; but change of position modifies it. Egophony is usually present, when the effusion is in moderate quantity, and is best heard over a portion of the thoracic parietes, represented by a band of three inches, running from below the inferior margins of the scapula in the direction of the ribs to the sternum. Simple pleurisy rarely attacks both sides at once: when such is the case, the presence of tubercles may be suspected.

Formerly, a *true pleurisy* meant one seated in the pleura; a *mediastinal pleurisy*, one situate in the anterior mediastinum; and *false pleurisy*

or *rheumatismal pleurisy*, that which occupied the intercostal muscles. This last has received the name *Pleurodynia*; that of *pleurisy* being exclusively appropriated to inflammation of the pleura. Pleurisy has, also, been distinguished into *dry* and *humid*, according as it is accompanied or not by expectoration. *Humid* or *moist pleurisy* is, now, properly regarded as a complication of pleurisy with pulmonary catarrh. It is the *catarrhal pleurisy* of some. The majority of the species of pleurisy, admitted by Sauvages, consist of complications.

The causes of pleurisy are like those of other internal inflammation. It may terminate by resolution, effusion, or suppuration.

CHRONIC PLEURISY, which has been particularly described by Bayle, Broussais, and Laennec, most commonly terminates by a serous or purulent effusion, which sometimes simulates hydrothorax; at others, phthisis pulmonalis. It may form slowly, without evident symptoms; or it may succeed acute pleurisy. In the former case, vague pains are felt in the chest, with small, dry cough, oppression at intervals, shivering, irregular febrile symptoms, and hardness of pulse.

Physical Signs. The affected side is smoother, more rounded and motionless; the intercostal spaces are dilated and filled up, or may even protrude slightly. In very chronic cases, however, the affected side may be smaller. The triangular space above the clavicle and the depression immediately above the sternum are often drawn downwards on the diseased side. No vibration is experienced by the hand when the patient speaks. The parietes of the thorax are sometimes œdematous, and fluctuation may be occasionally felt between the ribs. On percussion the sound is dull, or if clear, only so in the upper portions of the chest. On auscultation, there is an absence of the usual sounds over the affected parts, excepting occasionally transmitted sounds. There are no physical signs that can enable us to know whether pus or serum is effused into the chest. The introduction of a grooved needle through the intercostal space, as recommended by Dr. Thomas Davies, would of course settle the question.

On dissection of those who have died of pleurisy, the pleura is found thickened, red, inflamed, and covered with membranous exudations or false membranes. Sometimes, it seems cartilaginous or ossified. Its cavity, frequently, contains serous or sero-purulent effusions. The acute form of the disease requires the most active treatment. General blood-letting, to such an extent as to make a very decisive impression on the system, and repeated if necessary. This is the most important agent. After the violence of the disease has been got over, counter-irritants will be found highly beneficial; as well as when it has passed into the chronic state. The cough may be relieved by demulcents.

BILIOUS PLEURISY, *Pleuritis biliosa*, *P. typhoides* seu *typhodes*, is pleurisy accompanied with bilious symptoms;—the effect of duodenitis or duodeno-hepatitis.

Sauvages has given the name *PLEURITIS VENTOSA*, and Pringle that of *PLEURODYNIA VENTOSA*, to a pain behind the false ribs, attributed to the presence of air in the intestines.

PLEURITIS BRONCHIALIS, *Bronchitis*—p. Hu-

mida, Bronchitis—p. Spuria simulata, Pleurodynia—p. Typhoides, see Pleuritis (biliosa.)

PLEUROCELE, from *πλευρα*, 'the pleura,' and *κηλη*, 'a tumour.' *Hernia of the pleura*. This name, employed by Sagar, is inaccurate, as the pleura never protrudes alone. It only forms a hernia, when it serves as an envelope to the lung, to tumours, or to purulent collections, which have protruded from the thoracic parietes.

PLEUROCOLLE'SIS, from *πλευρα*, 'the pleura,' and *κολλω*, 'I glue.' An adhesion between the pleura costalis and pleura pulmonalis.

PLEURODYNIA, *Pleural'gia*, *Pseudo-pleuritis*, *Pseudo-pleurisy*, *Pleurodynē*, *Auralgia dolorosa*, *A stitch*, *Pain in the side*, *Stitch in the side*, *Parapleuritis*; *False Pleurisy*, *Rheumatic or rheumatis'mal pleurisy*, *Pleuritis spuria simulata*, *Pneumonia externa*, *Lagonoponos*, *Thoracod'ynē*, *Dolor Pectoris externus*, (F.) *Point de côté*, *Douleur de côté*; from *πλευρα*, 'the side or pleura,' and *δυνη*, 'pain.' A spasmodic or rheumatic affection, generally seated in the muscles of the chest, and, ordinarily, in the intercostals. It is usually augmented by outward pressure, inspiration, coughing, exertion, moving the thorax, and sometimes, even the corresponding arm. It is unaccompanied by fever, cough, or dyspnoea, except when under the form of a *stitch*, when dyspnoea exists. It is, generally, by no means obstinate, and yields promptly to warm applications and to cupping or leeches. If it still resist, a blister will, almost always, remove it.

PLEURODYNIA VENTOSA, *Pleuritis ventosa*.

PLEUROPATHIA, from *πλευρα*, 'the pleura,' and *παθος*, 'disease.' A disease of the pleura.

PLEUROPERIPNEUMONY, *Pleuroperipneumonia*, *Pleuropneumonia*. Inflammation occupying the pleura and the lung at the same time. Pleurisy and peripneumony existing simultaneously. *Physical Signs*. A dull sound is yielded by percussion for a variable extent over the more dependent portions of the affected side. The loss of sound is partially modified by change of position. The respiratory murmur on auscultation is very feeble or absent inferiorly; higher up the crepitation or bronchial respiration of pneumonia may be detected: round the root of the lung, and near the inferior angle of the scapula egophony is generally present. There is seldom much enlargement of the affected side, or displacement of the adjacent organs, as in the case of simple chronic pleurisy.

PLEUROPNEUMONIA, *Pleuro-peripneumony*.

PLEUROPNEUMONITIS, *Pleuritis*.

PLEURORRHŒA CHYLOSA, *Chylorhœa*, *Chylorhœa*—p. *Purulenta*, *Empyema*—p. *Sanguinea*, *Hæmatothorax*.

PLEURORTHOPNŒA, from *πλευρα*, 'the side,' *ορθος*, 'straight,' and *πνεω*, 'I respire.' Pain of the side, which does not permit the patient to breathe, except when in the vertical position.

PLEUROTHOTONOS, *Pleurotonos*, *Tetanus lateralis*, from *πλευροθω*, 'laterally,' and *τονος*, 'tension.' Variety of tetanus, in which the body is curved laterally, by the stronger contraction of the muscles of one side of the body.

PLEUROTONOS, *Pleurothotonos*.

PLÈVRE, *Pleura*.

PLEXIMETER, *Plessimeter*, from *πλησσω*, 'I strike,' and *μετρον*, 'measure,' 'a measurer of percussion.' An ivory plate, of a circular or ovoid shape, from an inch and a half to two inches in diameter, and about one-sixth of an inch in thickness. It has either a raised rim or edge, or projecting handles on its upper side, to permit its being held between the finger and thumb of the left hand, whilst it is struck with the right. It is used in percussion of the chest. A piece of metal, a coin, or the finger of the left hand may be used with equal advantage.—See Percussion, Mediate.

PLEXOR, from *πλησσω*, 'I strike.' *Plessor*. Any instrument employed in percussion. The ends of the fingers of the right hand brought together are the best *plexor*; as the finger of the left is, perhaps, the best *plexiometer*.

PLEXUS, *Plegma*, *Plectanē*, (q. v.) *Planē*, *Retē*, from *plecto*, 'I interlace,' 'I entwine,' (F.) *Lacis*. A network of blood-vessels or of nerves. The nervous plexuses belong,—some to the system of encephalic nerves—others to that of the great sympathetic; whilst some, as the pharyngeal, seem to be formed of the two sets. The plexuses represent complex networks, with more or less loose meshes, formed by the numerous and diversified anastomoses of the nervous filaments; from which proceed other branches, that are distributed to organs or to other plexuses.

PLEXUS CHOROIDES, see Choroid—p. *Cæliaque*, *Cæliac plexus*—p. *Coronarij ventriculi*, *Gastric plexus*—p. *Gangliiformis semilunaris*, *Cæliac plexus*—p. *Ganglioformes*, *Ganglions*, *nervous*—p. *Glandiformes*, *Ganglions*, *nervous*—p. *Glandulosi Peyer*, *Peyer*, *glandulæ*—p. *Hederaceus*, *Corpus pampiniforme*—p. *Hepaticus*, *Hepatic plexus*—p. *Infrathyroideæ*, see *Thyroideæ*, *veins*—p. *Lombo-abdominal*, *Lumbar plexus*—p. *Median*, *Cæliac plexus*—p. *Mesenterij proprius et maximus*, *Cæliac plexus*—p. *Opistogastrique*, *Cæliac plexus*—p. *Rectiformis*, *Corpus cavernosum vaginæ*—p. *Solar*, *Cæliac plexus*—p. *Sous-mesentérique*, *Hypogastric plexus*—p. *Testiculaire*, *Spermatic plexus*—p. *Trachélosous-cutané*, *Cervical plexus*.

PLICA, from *plicari*, 'to be knit together,' *Trichosis plica*, *Trichoma*, *Plica Polonica*, *Matted hair*, *Plaited hair*, *Lues Sarmatica*, *Helot'is*, *Cir'ragra*, *Cir'rhagra*, *Morbus Cirrhorum*, *Trichæ Incuborum*, *Plica caput Medusæ*, *Plica longicau' da lateralis*, *Coma cæsa' rea*, *Kolto*, *Rhopalosis*, *Plica'tio*, *Plicatu'ra*, (F.) *Plique*. A disease, endemic in Poland, Lithuania, and other parts of Northern Europe; so called on account of its being characterized by interlacing, twisting, and agglutination or matting of the hair. By some, it has been regarded as a disease; by others, as the result of a want of attention to cleanliness. However this may be, it generally appears upon the hair of the head, but, sometimes, in that of other parts, as the beard, the hair on the axilla, pubes, &c. Alibert admits three species of plica. 1. The *Plica multiformis* or *Plica caput Medusæ*, in which the hairs are mixed and agglutinated in greater or less masses; and this has been again subdivided into two varieties, according as the meshes are almost straight (*P. C. M. luciniata*, (F.) *Plique en lanières*) or much twisted (*P. C. M.*

lacinia (F.) *P. en vrilles*.) 2. *Plica longicauda* (F.) *Plique solitaire ou à queue*; when the hair is united into a single long mass, and 3. *Plica cespitosa*, (F.) *Plique en masse*, in which the hairs are matted into one large, shapeless mass. Pinel places this disease amongst the *Cutaneous phlegmasiæ*; but it is far from being demonstrated, that it is the result of inflammation of the skin. Certain it is, however, that the tangling of the hair is symptomatic of an affection of the dermoid system, *sui generis*. The idea, that it is entirely owing to want of cleanliness, as has been conceived by some, is not tenable.

PLICA, Plectane—p. *Caput Medusæ*, *Plica*—p. *Longicauda lateralis*, *Plica*—p. *Semilunaris*, *Valvula semilunaris*.

PLICATIO, *Plica*.

PLICATURA, *Plica*.

PLICHIOS, *Perineum*.

PLINTHIUM, *πλινθιον*. A machine, invented by one Nileus, which was formerly employed in the reduction of fractures and luxations. Scultetus describes it in his *Armamentarium Chirurgicum*.

PLIQUE, *Plica*.

PLOMB, Plumbum—p. *Blanc*, *Plumbi subcarbonas*—p. *Blanc de*, *Plumbi subcarbonas*—p. *Oxide de, fondu*, *Plumbi oxydum semivitreum*—p. *Oxide de, rouge*, *Plumbi oxydum rubrum*—p. *Oxide de, semivitreux*, *Plumbi oxydum semivitreum*.

PLOMBAGINE, *Graphites*.

PLOMBIÈRES, MINERAL WATERS OF. *Fontes medicati Plumbarii, Thermæ Plumbariæ*. Plombières is a town in the department of the Vosges, 17 leagues from Nancy, and 2 from Remiremont. Here are several sources of Thermal water. That, which is called *Saponaceous*, (*Saronneuse*) is formed of the subcarbonate, sulphate of soda, chloride of sodium, silica, carbonate of lime, and much vegeto-animal matter. This last component, when held in solution by means of the subcarbonate of soda, gives to the water an unctuous appearance. This is the origin of its name. The waters of Plombières are employed as solvents in engorgements of the abdominal viscera, and as alteratives in chronic diseases of the skin.

PLUGGING, (Sw.) *Plugg*, (F.) *Tamponnement*. The act of stopping a hole. The introduction of plugs of lint or rag into a wound or natural cavity—as the uterus or vagina—to arrest hemorrhage; or of some substance into a carious tooth to prevent toothache.

PLUM, *Prunum*, *Prunus domestica*—p. *Assyrian*, *Sebestina*.

PLUMACEAU, *Pledget*.

PLUMACEOLUS, *Pad*, *Pledget*.

PLUMASSEAU, *Pledget*.

PLUMBAGO, *Graphites*, *Persicaria*.

PLUMBA GO EUROPEA, *Dentaria*, *Crepanella*, *Squama ria*, *Dentelaria*. (F.) *Dentelaire*. Family, *Plumbaginæ*. Sex. Syst. *Pentandria Monogynia*. The root was formerly much esteemed as a cure for the toothache; like the *Pellitory of Spain*, which is also called *Dentaria*.

PLUMBI ACETAS, *Pl. superacetis*—p. *Acetas dilutum alcoholicum*, *Liquor plumbi subacetatis dilutus*—p. *Acidulus siccus*, *Plumbi superacetis*—p. *Carbonas*, *Pl. subcarbonas*—p. *Deutoxydum rubrum*, *Pl. oxydum rubrum*—p.

Iodidum, see *Iodine*—p. *Ioduretum*, see *Iodine*—p. *Oxydum album*, *Plumbi subcarbonas*—p. *Oxydum carbonatum per acidum acetosum*, *Plumbi subcarbonas*—p. *Oxydum fusum*, *Pl. oxydum semivitreum*.

PLUMBI OXYDUM RUBRUM, *Minium*, *Deutoxydum plumbi rubrum*, *Superoxydum plumbosum*, *Plumbum oxydatum rubrum*, *Red lead* (F.) *Oxide de plomb rouge*. It is, sometimes, used to kill vermin.

PLUMBI OXYDUM SEMIVITREUM, *Lithargyrum*, *Lithargyrum*, *Lithargyrum*, *Oxydum plumbi fusum*, *Spuma argenti*, *Semivitrified oxyd of lead or litharge*, *Calciteosa*, *Cathmia*, (F.) *Oxide de plomb fondu*, *Oxide de plomb semivitreux*, (a yellow protoxyd of lead, prepared by heat and combined with carbonic acid.) It occurs in scales of a whitish-red colour, and semi vitrified. It is employed for pharmaceutical purposes, as in the *Liquor plumbi acetatis*, *Emplastrum plumbi*, &c. Formerly, the *Litharge of gold* (*Chrysitis*), and *Litharge of silver*, *Almuriab*, were distinguished in commerce. These were merely ordinary litharge, resembling gold or silver in colour.

PLUMBI SUBCARBONAS, *Carbonas plumbi*, *Plumbi Carbonas*, (Ph. U. S.) *Oxydum plumbi carbonatum per acidum acetosum*, *Cerusus alba Norica* seu *Hollandica*, *Oxydum plumbi album*, *Cerussa*, *Psimmythion*, *Psimmythion*, *Simitium*, *Flake white*, *Blanca*, *Gersa*, *Ifides*, *Subcarbonate of lead*, *Cerusse*, *White lead*, (F.) *Blanc de plomb*, *Plomb blanc*, (prepared by exposing spiral rolls of lead to the fumes of vinegar, in vessels placed in dung.) It is inodorous; has a sweet taste; is brittle; friable; snow white, and of a minute, scaly texture. It is astringent and sedative, and is sprinkled on parts affected with local inflammation, or to prevent chafing in children. It is, also, used in the formation of ointments and plasters.

PLUMBI SUPERACETAS, *Cerusus acetata*, *Plumbi acidulus siccus*, *Plumbi acetis*, (Ph. U. S.) *Sul vel saccharum Saturni*, *Superacetate of lead*, *Dulce de Saturni*, *Acetas plumbicum crystallisatum*, *Sul plumbi*, *Sugar of lead*, *Protacetate of lead*, (F.) *Sel ou sucre de Saturne*. (*Plumb. carb. lbj. Acid acetic. cong. 1½*. Boil the lead with the acid till it is saturated; then strain through paper, and evaporate to a pellicle, that crystals may be formed. Wash the crystals and dry on blotting paper. *Ph. L.*) The acetate of lead has a sweet, styptic taste; a very white colour and silky lustre. It is astringent; and, in weak solutions, cooling and sedative; in strong, stimulant. It is given, internally, in visceral and other hemorrhages, combined with opium, and is used, externally, in solution, in inflammation, burns, bruises, gonorrhæa, &c. Dose gr. ss to iss.

PLUMBI TANNAS, see *Tannin*.

PLUMBIUM ACETAS CRYSTALLISATUM, *Plumbi superacetis*.

PLUMBOSUM SUPEROXYDUM, *Plumbi oxydum rubrum*.

PLUMBUM, *Molybdos*, *Saturnus*, *Capricornus*. (F.) *Plomb*. Lead. A solid metal of a bluish white colour; more malleable than ductile; soft enough to be scratched by the nail; very fusible and oxidizable, when heated in the air, and existing, in nature, under a number of different shapes; the principal of which are those of sulphuret and oxyd. s. g. 11.352.

Its use is to form oxyds and salts. In its metallic state, it has no action upon the body; but, when oxydized or united with an acid, it acts, in large doses, as a powerfully astringent poison.

PLUMBUM ALBUM, Tin—p. Candidum, Tin,—p. Cinereum, Bismuth, subnitrate of,—p. Oxydatum rubrum, Plumbi oxydum rubrum.

PLUNKETT'S OINTMENT. This empirical cancer remedy consists of *Arsenious acid*, *Sulphur*, and the powdered flowers of the *Ranunculus flammula*, and *Cotula fetida*;—levigated and made into a paste with the white of egg, and applied, on a piece of pig's bladder, to the surface of the cancer.

PLUTEA. Avicenna gives this name to duplicatures of the dura mater, such as the *Falz cerebri*.

PNEUMATHORAX, Pneumothorax.

PNEUMATIC PHYSICIANS. Name given to a sect of physicians, at the head of whom was Athenæus, who made health and disease to consist in the different proportions of an element—which they called *Pneuma*, πνευμα—to those of the other elementary principles. This πνευμα was a fancied spiritual principle, which the Stoics regarded as an element, different from water, air, earth and fire;—the sole elementary principles previously admitted.

PNEUMATICA, from πνευμα, 'air.' Appertaining to the breathing. Diseases of the respiratory function;—the second class in Good's system of nosology.

PNEUMATOCELE, Physocèle.

PNEUMATO'DES, from πνευμα, 'wind,' and εδος, 'resemblance.' One, distended with air, or who breathes with difficulty, owing to an accumulation of flatus in the digestive tube; or, according to others, owing to emphysema.

PNEUMATOMPHALUS, from πνευμα, 'flatus,' and ομφαλος, 'the umbilicus.' Umbilical intestinal hernia, containing a considerable quantity of flatus.

PNEUMATO'SIS, from πνευμα, 'air,' Flatus. (F.) *Maladies ventueuses*. Flatulent distention of the stomach. Sauvages uses the word synonymously with emphysema. Frank comprises under it all flatulent diseases.

PNEUMATOSIS, Emphysema—p. Abdominis, Tympanites.

PNEUMATOTHORAX, Pneumothorax.

PNEUMOËCTASIE, Emphysema of the Lungs.

PNEUMOGASTRIC, *Pneumogast'ricus*; from πνευμων, 'the lung,' and γαστηρ, 'the stomach.' Chaussier gives this name to the *Eighth pair of nerves*, *Par vagum*, *Pars vaga*, *Nervus vagus seu ambulato'rius*, *Middle sympathetic*; because it is distributed especially to the organs contained in the chest and abdomen. This nerve arises from behind the eminentiæ olivariæ and near the corpora restiformia by one or two rows of filaments, regularly arranged. These filaments unite to form a flat cord, which issues from the cranium by the foramen lacerum posterius, behind the glosso-pharyngeal nerve. At its exit from the cranium, the pneumogastric nerve has the appearance of a very compact plexus. It then descends along the neck, deeply seated on the outside of the carotid artery and the internal jugular vein. When it has attained the lower part of the neck it enters the chest, gliding behind the subclavian

vein, and passing on the right side, in front of the subclavian artery, and, on the left, before the arch of the aorta. It proceeds, at first, backwards, increasing in size. Afterwards, it passes from behind the bronchia to the œsophagus, which it accompanies through the diaphragm, and terminates on the stomach. In the neck, the pneumogastric nerve anastomoses with the spinal, glosso-pharyngeal, great hypoglossal, and great sympathetic nerves; and furnishes, 1. a *pharyngeal branch*, 2. a *superior laryngeal*, 3. *cardiac branches*. In the chest, it gives off, 1. The *inferior laryngeal*, or *recurrent*, 2. The *pulmonary plexus*, and, 3. The *œsophageal branches*. On entering the abdomen, the œsophageal branches, which terminate the pneumogastric, are distributed upon the stomach, and give numerous filaments to that viscus, to the hepatic, celiac, gastro-epiploic, and solar plexuses. Some go, also, to the pancreas, liver, gall-bladder, duodenum, &c.

PNEUMOGRAPHY, *Pneumogr'phia*; from πνευμων, 'the lung,' and γραφη, 'a description.' The part of anatomy that describes the lungs.

PNEUMOLOG'Y, *Pneumolog'ia*; from πνευμων, 'the lung,' and λογος, 'a discourse.' An anatomical treatise of the lungs. Anatomical doctrine of the lungs.

PNEUMON, Pulmo.

PNEUMONIA, *Empres'ma Pneumoni'tis*, *Pleumo'nia*, *Peripneumo'nia*, *Pneumo'nia peripneumo'nia*, *1 pneumoni'tis*, *Pulmo'nia*, *Pulmonal'ria*, *Inflammat'io pneumoni'ca*, *1. pec'toris acu'ta*, *1. pulmo'nium*, *Inflammation of the lungs*, (F.) *Fiebre péripneumonique*. *Fluxion de Poitrine*, (q. v.) *Inflammation du Parenchyme pulmonaire*. The chief symptoms of pneumonia are:—pyrexia, accompanied by pain,—sometimes obtuse, at others pungent,—in some part of the thorax; pulse more or less quick and hard, according to the violence and extent of the local disorder; pain aggravated by the cough, which with dyspnœa exists throughout the disease. At first, the expectoration is difficult and painful; but in the course of a few days it becomes free, and the oppression of breathing is mitigated. When the inflammation, instead of going off by resolution, passes on to suppuration, rigors are experienced; the respiration becomes more oppressed, but less painful, and a sense of weight is felt in one of the pleuræ. Pneumonia may, also, terminate by gangrene (but this rarely happens;) by induration and by hepatization.

Physical Signs. First stage. Diminution of the sound is generally observed over the affected part on percussion; auscultation exhibits an equal, dry, crepitating râle, which is best heard at the close of a deep inspiration, and on coughing. The respiratory murmur is intermingled with the crepitant râle, or it may be absent. In the neighbourhood of the affected parts it is natural or puerile. The voice and cough are rather more resonant than usual. 2. When *Hepatization* has occurred, the motion of the affected side is impeded, and immediately above the sternum and in the corresponding triangular space on either side, there is often an evident depression. Percussion is dull over the affected part in every position of the patient. On auscultation, the crepitation is found to be replaced by bronchial respiration. The respiratory murmur is louder in the other portions of the lung, the voice and cough are more reso-

nant, and the heart's action is more distinct. 3. When *Suppuration* supervenes, the same signs persist; but usually the voice and cough are less resonant, and a coarse mucous *râle* is heard. When gangrenous or suppurative cavities are formed, they present the ordinary signs.

The prognosis must be guarded. It is not a disease which we can always subdue. Great extent of inflammation; very considerable oppression; orthopnoea, and difficult expectoration are unfavourable symptoms. The most active treatment is of course necessary. General bleeding forms the sheet anchor,—employed so as to make a decided impression on the system, and repeated, if necessary; local blood-letting; nauseating doses of antimonials; purgatives; and, when the violence of the inflammation has been got under,—counter-irritants, &c. Chronic pneumonia sometimes succeeds the acute, and, at others, occurs accidentally. It must be managed on general principles. Small bleedings, especially locally; and counter-irritants of all kinds are indicated.

PNEUMONIA, BILIOUS, *Pneumonia typhoides* *see typhoides*, *Putrid, typhoid or erysipelatous pneumonia*. Inflammation of the lungs, accompanied by gastric fever, and not uncommonly with typhoid symptoms.

PNEUMONIA, Erysipelatous, P. bilious—p. Putrid, P. bilious—p. Typhoides, P. bilious—p. Typhoid, P. bilious.

PNEUMONICA. Diseases affecting the lungs, their membranes or motive power; characterized by irregular, impeded, or painful respiration. The second order of the class *Pneumonica* of Good.

PNEUMONICULA. Diminutive of pneumonia. A slight inflammation of the lung.

PNEUMONICUS, Pulmonic.

PNEUMONIE DES AGONISANTS, *Pneumonie hypostatique*. The hyperæmic engorgement, which often takes place in the lungs during the last moments of life, has been so termed.—*Laënnec, Piorry*. It would seem to be hyperæmia rather than inflammation.

PNEUMONITIC, *Pneumoniticus*. Of, or belonging to pneumonitis, or inflammation of the lungs.

PNEUMONITIS, Pneumonia.

PNEUMONOSSES. Diseases of the lungs.

PNEUMOPERICARDIUM, *Pneumopericarditis*, from *πνευμα*, 'air,' and *περικαρδιον*, 'pericardium.' *Laënnec* designates, under this name, the effusion of air into the cavity of the pericardium.

PNEUMOPLEURESIS, Pleuritis.

PNEUMOPHTHOE, Phthisis pulmonalis.

PNEUMORRHAGIA, Hæmoptysis—p. Interna, Hæmatothorax.

PNEUMOSIS, from *πνευμων*, 'the lung.' A term under which *Alibert* comprises every affection of the lungs.

PNEUMOTHORAX, *Pneumothorax, Pneumothorax, Emphysema pectoris, Asthma ætium, A. emphysematicum, Dyspnœa pneumatica, D. physiothoracica, Physiothorax,* from *πνευμων*, 'the lung,' and *θωραξ*, 'the thorax.' An accumulation of air in the cavity of the pleura. A complaint generally sudden in its invasion and fatal in its character. In many instances, along with the air a liquor is effused. The disease may be spontaneous and simple, but in a large

proportion of cases it is complicated with pleurisy and pulmonary tubercles. The signs vary according as there is, or is not, a communication between the pleura and the bronchia. The affected side gives a hollow tympanitic sound, even where the thickness of the parietes of the thorax is great. When the effusion is considerable, the affected side is dilated, but there is no *râle* of any kind. When a gaseous and a liquid effusion are present at the same time, the sound on percussion is found to be clear at the superior part of the thorax, but dull inferiorly; hence, by varying the position of the patient, and by consequence that of the contained fluids, the seats of the clear and the dull sound can be varied. When the gaseous effusion is owing to a fistulous communication between the pleura and bronchia, the metallic respiration and resonance are heard; and if there be both gaseous and liquid effusion with a fistulous communication, in addition to these signs there is the *Tintement métallique*. The presence of liquid can always be ascertained by succussion. *See Emphysema of the Lungs.*

PNEUMOTOMY, *Pneumotomia*, from *πνευμων*, 'the lung,' and *τεμνω*, 'I cut.' Dissection of the lungs.

PNEUSIS, Respiration—p. Pertussis, Pertussis—p. Tussis, Tussis.

PNIGALION, Incubus.

PNIGMOS, Orthopnoea, Strangulation.

PNIGMOPHOBIA, Suffocation.

PNIX, Orthopnoea, Strangulation.

PNOE, Aura.

POCHE DES EAUX. See Parturition.

POCK, KINE, Vaccina.

POCULUM ABSINTHIA'TUM. This was regarded in remote ages as a wholesome beverage;—the *absinthium*, or 'wormwood,' being supposed to act as an antidote to drunkenness.

POCULUM AMATORIUM, Philter—p. Emeticum, Goblet, emetic.

PODAGRA, *Podorrhœma*, from *πους*, 'the foot,' and *αγρα*, 'seizure.' Pain which attacks the feet. Gout, (q. v.) situate in the articulations of the foot. It has, also, been used, in a more extensive signification, synonymously with *gout*.

PODAGRA ABERRANS, Gout, (wandering)—p. Arthritis, Gout—p. Retrograda, Gout, (retrograde.)

PODALGIA, Gout.

PODALYRIA TINCTORIA, Sophora tinctoria.

PODARTHROC'ACÉ, from *πους*, 'the foot,' *αρθρον*, 'an articulation,' and *κακος*, 'bad.' Caries of the articulation of the foot.

PODENCEPH'ALUS, from *πους*, 'the foot,' and *κεφαλη*, 'the head.' A monster whose brain is placed outside the skull, and seems to be supported on a pedicle, which traverses the summit of the skull.—*G. St. Hilaire*.

PODEX, Anus.

PODOL'OGY, *Podolog'ia*, from *πους*, 'the foot,' and *λογος*, 'a discourse,' a description of the foot; a treatise on the foot.

PODOPHYLLUM PELTA'TUM, *Podophyllum, Mayapple, Mandrake.* Family, *Podophyllæ*. *Sex. Syst.* Polyandria Monogynia. A common plant throughout North America. The fruit is eatable, and esteemed by many. The leaves are said to be poisonous. The root or rhizoma, *Podophyllum*, (Ph. U. S.) is purgative,

in the dose of 20 grains. It has, also, been used as an anthelmintic.

PODORRHEUMA, Podagra.

PODOTHE'CA, from *πους*, 'a foot,' and *ὄρη*, 'a receptacle,' 'a sheath.' The cuticle of the foot; an anatomical preparation. *Chirothe'ca*, has been used for the cuticle of the hand.

POÉLETTE, Cup.

POGON, Beard.

POGONIASIS, *Pogo'nia*, from *πωγων*, 'the beard.' A female beard. Also, great strength or quantity of beard.

POHON ANTIAR, Upas.

POIDS ET MESURES, Weights and measures.

POIGNÉE, Manipulus.

POIGNET, Carpus.

POIL, Hair.

POILETTE, Cup.

POINT, BLISTERING. A name given, by Dr. Rush, to a particular period in the course of a continued fever, intermediate between its stage of high excitement and collapse, in which blisters will usually produce unequivocally good effects.

POINT DE COTÉ, Pleurodynia.

POINTS LACRYMAUX, Lachrymalia puncta.

POIRE. See *Pyrus communis*.

POIREAU, *Allium porrum*.

POIRIER, *Pyrus communis*.

POIS À CAUTÈRE, see *Fonticulus*—*p. Chiche*, *Cicer arietinum*—*p. à Gratter*, *Dolichos pruriens*—*p. Patate*, *Dolichos tuberosus*.

POISON, *Phar'macon*, *Phar'macum*, *Tox'icum*, *Vene'num*, *Virus*, *Delete'rium*. A generic name for all substances, which, when introduced into the animal economy, either by cutaneous absorption, respiration, or the digestive canal, act in a noxious manner on the

vital properties or the texture of an organ.—Poisons exist in the three kingdoms of nature, but those which proceed from animals are often called *venoms*, as the venom of the viper, scorpion, tarantula, &c., whilst those, that are the products of disease have the name *virus*. In common parlance, therefore, *poison* is restricted to deleterious articles, furnished by the mineral and vegetable kingdoms. Orfila has divided poisons into four classes. 1. ACRID, IR'ITATING, CORRO'SIVE, or ESCHAROT'IC, such as the concentrated acids and alkalies; mercurial, arsenical, cupreous, and antimonial compounds, cantharides, &c. 2. NARCOT'IC; those that act particularly upon the brain; as opium, hyoscyamus, &c., but without inflaming the organ with which they come in contact. 3. NARCOT'ICO-ACRID or ACRONARCOT'IC;—those that act on the brain, but, at the same time, inflame the parts to which they are applied; as aconite, belladonna, &c. 4. SEPTIC or PUTRES'CENT;—those furnished by the animal kingdom. See *Venom* and *Virus*. Various classifications, of a similar character, have been recommended by different Toxicologists; but they are liable to the objection, that they throw substances together, whose physiological action on the system is very different. It is, indeed, difficult to avoid unnatural compression of matters into places not properly belonging to them, in all such arrangements.

The following Table, which exhibits a *coup d'œil* of the chief poisons, with every circumstance of importance connected with them, is not free from these objections:—The division of Mineral Poisons was revised—rewritten, indeed—by the late Professor W. R. Fisher, recently, of the College of Pharmacy of Philadelphia, formerly of the University of Maryland.

TABLE EXHIBITING THE SYMPTOMS, TREATMENT, AND MODE OF DETECTING THE VARIOUS POISONS, MINERAL, VEGETABLE AND ANIMAL.

N. B. In all cases the Stomach-Pump should be used as soon as possible.

I. INORGANIC POISONS.

POISONS.	SYMPTOMS.	TREATMENT.	TESTS.
ACIDS.			
<i>Acetic Acid.</i>	The acids, generally, are strong corrosive poisons. Sour, acid taste, burning in the throat, which is increased by pressure, swallowing or coughing; eructation, and excruciating pain in the stomach; more or less corrugation of the lining membranes of the month and primæ viæ: excretion about the month or such other parts of the skin as the acid may have touched. The matter, vomited effervesces with carbonate of lime. The countenance becomes glazed, extremities cold and clammy; convulsions and death. Nitric acid occasions yellow stains, and sulphuric acid, black.	The carbonate of soda, potassa, lime and magnesia, are all antidotes to the acids; calcined magnesia also. They are to be used with the following restrictions; for the acetic, citric, muriatic, sulphuric, and tartaric acids, they may be used indiscriminately. For the nitric and oxalic, carbonates of magnesia and lime can alone be employed with safety. In the case of sulphuric acid, water should not be drunk on account of the great heat, which is produced by their mixture. Subsequent inflammation to be treated by ordinary means.	<i>Sulphuric acid</i> is known by a white precipitate with any salt of baryta, insoluble in nitric acid. <i>Muriatic acid</i> is known by a white precipitate with nitrate of silver, insoluble in nitric acid, which turns black by the action of light. <i>Nitric acid</i> gives rise to orange-coloured fumes, when copper is placed in it, and an ability to dissolve gold when mixed with muriatic acid. <i>Acetic acid</i> exhales the odour of vinegar. <i>Citric acid</i> blackens when heated.
<i>Citric Acid.</i>			
<i>Muriatic Acid.</i>			
<i>Nitric Acid.</i>			
<i>Sulphuric Acid.</i>			
<i>Tartaric Acid.</i>	Is a sedative poison; nausea, giddiness, debility, hurried pulse, weight and pain in the head; eructations having the flavour of the acid; spasms, tetanus, contractile pupil; convulsions, death.	The carbonates of the alkalies and of magnesia and lime have the inconvenience, that a large quantity of gas is extricated in the stomach. Ammonia is an antidote: but it should not be employed in a very concentrated form. Liquid chlorine has also been found efficacious. The cold <i>douche</i> to the head has been recommended.	<i>Tartaric acid</i> precipitates crystals, with a solution of potassa; and a white precipitate is thrown down by lime-water. <i>Oxalic acid</i> gives a white precipitate with lime water, which, when heated, is converted into carbonate of lime. <i>Prussic acid</i> exhales the odour of peach kernels; forms a white precipitate with nitrate of silver; neutralized with an alkali, gives a blue precipitate with the per-salts of iron.
<i>Oxalic Ac. d.</i>			
<i>Prussic Acid.</i>			
<i>Oil of Bitter Almonds.</i>			
<i>Laurel Water.</i>			
ALKALIES and their SALTS.			
<i>AMMONIA, Strong Liqueur or Water of.</i>	Violent caustic, acid taste; great heat in the throat, with destruction of its lining membrane; difficult and painful deglutition; vomiting of bloody matter, which turns the yellow of turmeric brown; acute pain in the stomach; cold sweats, weakness, hicough; violent colic pains, with purging of bloody stools and membranous flakes; death.	The vegetable acids, such as vinegar, lemon juice, citric and tartaric acid in solution are antidotes to the alkalies and their carbonates. The fixed oils, such as castor, linseed, almond and olive, form soaps with the free alkalies, and therefore destroy their caustic effects.	The alkalies are known by their action on turmeric paper; restoring the colour of litmus, which has been reddened by an acid. Carbonates are known by their effervescence with an acid; some of them affect the turmeric paper. Sal ammoniac gives out the pungent odour of ammonia, when mixed with quicklime.
<i>Muriate of Ammonia or Sal Ammoniac.</i>			
<i>POTASSA.</i>			
<i>Caustic Potash, and Liqueur Potassa.</i>			
<i>Carbonate of, or Pearl Ash, and Salt of tartar.</i>			
<i>Nitrate of Potassa, or Saltpetre.</i>	The nitrate of potassa will not manifest the effect with turmeric paper. The carbonates, when vomited, will effervesce with acids; and the liver of sulphur will give rise to eructations of sulphuretted hydrogen.	Poisoning by nitrate of potassa to be treated on general antiphlogistic principles, mucilaginous drinks. Liver of sulphur, is said to be decomposed and neutralized by common salt. The liquid chloride of soda will also decompose it.	Nitrate of potassa decrepitates and deflagrates when thrown on hot coals. Liver of sulphur emits the odour of sulphuretted hydrogen when dissolved, or when treated with an acid.
<i>Sulphuret of, or Liver of Sulphur.</i>			
<i>SODA.</i>			
EARTHS and COMPOUNDS.			
<i>BARYTA.</i>	Analogous with those of the corrosive metals. Violent burning in the stomach, vomiting, gripes, diarrhœa; excessive muscular debility, headache, convulsions, death. Lime differs from baryta in being a pure irritant.	The sulphates of soda and magnesia are prompt and effective antidotes to all the poisonous salts of baryta. Phosphate of soda will also counteract their effects. Lime may be neutralized by dilute acids. Carbonic acid, in soda water, effervescing draught or yeast, it is supposed, would answer a good purpose. The fixed oils may be employed either for baryta or lime, when not in a compound state.	Baryta and its salts invariably give a white precipitate insoluble in acid, with a soluble sulphate. Lime, when dissolved, gives a white precipitate with oxalic acid. Also with carbonic acid, or a soluble carbonate. The same of baryta.
<i>Carbonate of Baryta.</i>			
<i>Muriate of Baryta.</i>			
<i>Nitrate of Baryta.</i>			
<i>LIME.</i>			

POISONS.	SYMPTOMS.	TREATMENT.	TESTS.
ALCOHOL. <i>Brandy, Wines, and all Spirituous Liquors.</i>	Intoxication, and when taken very freely, complete insensibility, with apoplexy or paralysis of one side; the countenance swollen and of a dark-red colour; the breathing difficult, and often stertorous, with a peculiar puffing out of the lips; the breath smells of liquor, which will distinguish the symptoms from those of spontaneous apoplexy.	A powerful emetic of white vitriol, or tartar emetic, should be got into the stomach as soon as possible; and if the person has lost the power of swallowing, a flexible catheter or tube should be the means of conveying it thither. The vomiting should be encouraged as much as possible with warm water, and large and acrive gylsters of salt and water should be thrown up. The patient should be placed erect, and if the countenance and other appearances be not improved after these means have been used, the jugular vein may be opened, and cold wet cloths applied to the head, particularly if the body be hotter than natural. If the extremities become cold, warmth and friction should be perseveringly used.	
EMPYREUMATIC OILS. <i>Creasote.</i> <i>Dippel's Animal Oil.</i> <i>Oil of Tar.</i> <i>Oil of Tobacco.</i> <i>Oil of Turpentine.</i>	General action that of irritant poisons. Burning pain, vomiting, pungent taste, purging, &c. The oils of turpentine and tobacco affect the nervous system; the peculiar odour of each oil will be manifested in the matter vomited.	Creasote is immediately coagulated by albumen. Dippel's animal oil may be counteracted with dilute acids and the fixed oils. The other oils have no particular antidotes, and their effects must, therefore, be counteracted upon general principles.	No better mode of recognising these substances exists, than that derived from their peculiar odour. Dippel's oil has the pungent odour of ammonia; creasote and oil of tar, a peculiar smell of smoke; the odour of tobacco and turpentine are well known.
GASES. <i>Carbonic Acid or Fixed Air.</i> <i>Carbonic Oxide.</i> <i>Fumes of Burning Charcoal.</i> <i>Chlorine.</i> <i>Sulphuretted Hydrogen.</i>	Chlorine produces, when inhaled, violent irritation of the organs of respiration; cough, bloody expectoration, inflammation of the lungs, and permanent pulmonary disease. The other gases, although producing some effect on the respiratory organs, act as poisons in consequence of their sedative agency. The symptoms, therefore, are those of apoplexy or narcotic poisoning.	The antidotes to chlorine, are the cautious inhalation of ammonia, or sulphuretted hydrogen. The inflammatory symptoms from chlorine to be treated on general principles. For the other gases, cold affusions to the head, blood-letting, artificial respiration.	Chlorine is recognised by its peculiar odour and bleaching properties. Sulphuretted hydrogen by its fetid smell, and the rapid blackening of lead. Carbonic acid by its occasioning turbidness in lime-water placed in its atmosphere. Carbonic oxide, by the blue colour of its flame.
IODINE. <i>Iodide of Potassium.</i>	Irritant symptoms: burning pain in the throat, lacerating pain in the stomach, and fruitless efforts to vomit; suffusion of the eyes; excessive pain and tenderness of the epigastrium.	Iodine combines with starch and forms an insoluble compound. The prompt administration of starch, wheat flour, or other vegetable matter containing fecula, beat up in water, is recommended. Iodide of potassium has no antidote. Vomiting should be promoted by draughts of warm water, and inflammation be subdued by general treatment.	Iodine is known by its odour, and the formation of a blue precipitate when brought in contact with a cold solution of starch. Iodide of potassium gives a crystalline precipitate, with tartaric acid in excess. The supernatant fluid will give the blue colour to starch.
METALS. ANTIMONY. <i>Tartar Emetic.</i> <i>Muriate, or Butter of Antimony.</i> <i>Oxide of Antimony.</i>	Vomiting. If vomiting do not occur promptly, violent irritant effects are produced. Burning pain in the pit of the stomach; Purging; colicky pains, sense of tightness in the throat, violent cramps; repeated recurrence of vomiting.	If vomiting have not been produced, it should be brought about, by tickling the fauces, and administering copious draughts of warm water. Astringent infusions, such as of galls, oak bark, Peruvian bark, act as antidotes, and should be given promptly: powdered yellow bark may be used, until the infusion is prepared.	Antimony in solution is best distinguished by the peculiar orange-red precipitate, which it forms with sulphuretted hydrogen or solutions of the hydrosulphates. Free alkalies produce white precipitates. The muriate is known by a white precipitate, when it is poured into water. In its solid forms, it may be known by the formation of white fumes, when heated, which reddens litmus. It may also be converted into muriate, and then precipitated by adding water.

POISONS.	SYMPTOMS.	TREATMENT.	TESTS.
ARSENIC. <i>Arsenious Acid, or White Arsenic.</i> <i>Orpiment, or Yellow Sulphuret of Arsenic.</i> <i>King's Yellow.</i> <i>Realgar, or Red Sulphuret of Arsenic.</i> <i>Fly Powder.</i> <i>Fowler's Solution.</i> <i>Arsenical Paste.</i> <i>Arsenical Soap.</i> <i>Arsenite of Copper.</i> <i>Scheele's Green.</i>	<p>Violent burning pain in the region of the stomach and bowels; tenderness on pressure; retching; vomiting; sense of dryness and tightness in the throat; thirst; hoarseness and difficulty of speech; the matter vomited greenish or yellowish, sometimes streaked with blood; diarrhoea; tenesmus; sometimes excoriation of the anus; urinary organs occasionally affected with violent burning pains and suppression; convulsions and cramps; clammy sweats; lividity of the extremities; countenance collapsed; eyes red and sparkling; delirium; death.</p>	<p>The hydrated peroxide of iron diffused through water; or the precipitated carbonate; or the rubigo ferri, in very fine powder, to be administered every five or ten minutes, until relief is obtained. This is particularly efficacious when the <i>white arsenic</i> has been swallowed. If the arsenic have been taken in the form of Fowler's Solution, lime-water in copious draughts, may be given. For either of the other forms, emetics of sulphate of zinc; diluents; demulcents, such as flaxseed tea, infusion of slippery elm, &c. Counter-irritants may be used to relieve the spasm, and violent pain in the stomach. Bleeding, as promoting absorption, should not be employed until the stomach is completely evacuated.</p>	<p>If the suspected substance can be obtained free from organic matter, the presence of arsenic may readily be shown by boiling it in distilled water, filtering, and testing with, 1st. Ammonio-sulphate of copper. 2d. Ammonio-nitrate of silver. (<i>Hume's Test</i>) 3d. Sulphuretted hydrogen gas. The first will produce a green precipitate, second, a pale yellow precipitate; third, a bright yellow precipitate, if arsenic be present. A portion of the powder, or one of these precipitates carefully and thoroughly dried, is then to be mixed with charcoal and exsiccated carbonate of soda, to be placed in a small glass tube closed at one end, and then to be heated to a red heat in the flame of a lamp. The arsenic will be reduced, and sublime in the upper part of the tube—forming a dark crust, having considerable lustre on its exterior surface, resembling polished steel. By gently heating this crust in a very small flame, crystals of white arsenic will be formed, having a high adamantine lustre.</p> <p>If organic matter be present, it must be entirely destroyed by heating the substance with nitro-muriatic acid. After this has been done, and a clear transparent solution in distilled water has been obtained, the subsequent process is as above indicated. If arsenious acid be submitted to the action of nascent hydrogen, it is deoxidized, and the metallic arsenic, thereby obtained, combining with hydrogen, forms arsenuretted hydrogen gas. (<i>Marsh's Test</i>.)</p> <p>Bismuth is known by the formation of a white precipitate when its solution in nitric acid is poured into water; and by the formation of a black precipitate with sulphuretted hydrogen gas, and hydrosulphates in solution.</p>
BISMUTH. <i>Nitrate of Bismuth.</i> <i>Pearl Powder.</i> <i>Oxide of Bismuth.</i>	<p>Similar to those produced from other irritant poisons. General inflammation of the whole alimentary canal; suppression of urine; hic-cough, disagreeable metallic taste; vomiting; cramps; delirium; death.</p>	<p>Milk and sweet mucilaginous drinks are recommended. Leeches, general bleeding, glysters: fomentations to be employed on the general principles of treatment for inflammatory symptoms.</p>	<p>The presence of copper is readily shown in solutions. By ammonia a beautiful bluish precipitate is thrown down, which dissolves in an excess of the precipitant, and the solution has a rich blue colour. A bright iron bar, introduced into solutions of copper, occasions the separation of the copper, in a metallic form, which deposits itself upon the iron.</p>
COPPER. <i>Sulphate of Copper.</i> <i>Blue Vitriol.</i> <i>Acetate of Copper.</i> <i>Vrdigris.</i> <i>Carbonate of Copper.</i> <i>Blue Verditer.</i> <i>Arsenite of Copper.</i> <i>Scheele's Green.</i> <i>Food cooked in dirty copper vessels, or pickles made green by copper.</i>	<p>Very similar to those produced by arsenic. Coppery eructations and taste. Fatal cases are generally terminated by convulsions, palsy, insensibility.</p>	<p>Albumen to be administered in either of its forms, which can be most readily obtained, as milk or whites of eggs. Vinegar should not be given. The inflammatory symptoms are to be treated on general principles, and so of the nervous.</p>	<p>Muriate of gold is very readily decomposed and the gold separated in a metallic state. Protosulphate of iron, nitrate of silver and protomuriate of tin, all answer this purpose. The precipitated powder will be found insoluble except in nitro-muriatic acid.</p>
GOLD. <i>Muriate of Gold.</i> <i>Fulminating Gold.</i>	<p>Very analogous to those of other irritant poisons. This substance communicates a pink stain to the flesh, and patches of that colour may be found about the lips, and inside the mouth.</p>	<p>The salts of gold are decomposed by sulphate of iron; and this has, therefore, been recommended as an antidote. Inflammatory symptoms to be treated on general principles.</p>	<p>Iron is recognised by a bluish black precipitate, with tincture of galls; rich blue, with prussiate of potassa; and a greenish or reddish precipitate, with the free alkalis or their carbonates.</p>
IRON. <i>Sulphate of Iron.</i> <i>Copperas.</i> <i>Green Vitriol.</i> <i>Muriate of Iron.</i>	<p>Symptoms of irritant poisoning; colic pains, constant vomiting and purging. Violent pain in the throat, tension of the epigastrium, coldness of the skin and feebleness of the pulse.</p>	<p>Carbonate of soda would be a most excellent antidote to either of these substances. Mucilaginous drinks might also be employed; and particular symptoms relieved by general treatment.</p>	

POISONS.	SYMPTOMS.	TREATMENT.	TESTS.
LEAD. <i>Acetate of Lead.</i> <i>Sugar of Lead.</i> <hr/> <i>Carbonate of Lead.</i> <i>White Lead.</i> <hr/> <i>Red Oxide, or Red Lead.</i> <hr/> <i>Litharge.</i> <hr/> <i>Wines sweetened by Lead.</i> <hr/> <i>Water which has been kept in Leadens vessels.</i> <hr/> <i>Acid food, cooked, or left standing in vessels glazed with Lead.</i>	<p>Irritation of the alimentary canal; spasms; nervous symptoms; paralysis either partial or complete. When taken for some time in small quantity, violent and obstinate colic; rigidity of abdominal muscles, cramps; remission of pain; obstinate constipation, urine diminished, saliva increased; countenance anxious and gloomy. If relief be not promptly obtained, giddiness, debility, torpor, coma, convulsions and death. The paralysis affects generally the upper extremities.</p>	<p>Sulphate of magnesia and phosphate of soda, are both good antidotes for the soluble salts of lead. For the solid forms, dilute sulphuric acid may be drunk. These are applicable to the irritant forms of poisoning by lead. In the chronic form or colica pictorum, purgatives and anodynes are resorted to; venesection; and external applications to relieve the cramps. The use of strychnia is recommended for the paralysis.</p>	<p>Soluble salts of lead yield a white precipitate with sulphates and carbonates in solution. Salts of chromic acid and hydriodate of potassa occasion a yellow precipitate. Sulphuretted hydrogen, a black precipitate. If solid, the lead may be converted into a state of solution by nitric acid, and the dilute solution be tested as above.</p>
MERCURY. <i>Corrosive Sublimat.</i> <hr/> <i>Cyanuret of Mercury.</i> <hr/> <i>Nitrate of Mercury.</i> <hr/> <i>White Precipitate.</i> <hr/> <i>Red Oxide, or Red Precipitate.</i> <hr/> <i>Sulphate, or Turbith Mineral.</i> <hr/> <i>Vermilion or Red Sulphuret.</i>	<p>Violent symptoms of irritant poisoning: harsh metallic astringent taste; burning pain in the stomach; vomiting and purging frequently of bloody matter; often irritation of the urinary organs and sometimes suppression; tightness and burning in the throat, occasionally so great as to prevent speech; countenance not always pale, but sometimes flushed; tendency to doze, stupor, convulsions and death.</p>	<p>Albumen in some form must be promptly administered; either white of eggs beaten up with water, milk, or wheat flour beaten up. The inflammatory symptoms to be counteracted by the usual means. Gold finely mixed in dust, with fine iron filings?</p>	<p>The free alkalies differ in their precipitates from solutions of mercury. Potassa gives, with corrosive sublimate, a yellowish one; ammonia, a white; lime-water, an orange; and sulphuretted hydrogen, a black. A drop of the solution placed on a piece of gold, and touched with a knife or key, reduces the mercury which amalgamates with the gold, producing a white spot. The nitrate of mercury gives a black precipitate with the free alkalies. All the solid forms of mercury are volatile, and may be reduced by heating them in a glass tube with charcoal and carbonate of soda—when the metallic mercury will sublime, and may be collected in a globe.</p>
SILVER. <i>Nitrate of Silver, or Lunar Caustic.</i>	<p>Those of other irritant poisons.</p>	<p>Muriate of soda or common salt immediately decomposes this substance and destroys its activity. Antiphlogistic treatment is to be employed for the inflammatory symptoms.</p>	<p>Nitrate of silver is distinguished by the formation of a white precipitate insoluble in nitric acid, with muriate of soda; a gray precipitate with ammonia, which is redissolved in an excess of ammonia; yellow precipitate with phosphate of soda. The precipitate of chloride of silver, obtained by adding muriate of soda to the nitrate of silver, is readily reduced, and the metallic silver obtained, by mixing it with dilute sulphuric acid and granulated zinc.</p>
TIN. <i>Muriate of Tin.</i> <hr/> <i>Solution of Tin, used by Dyers.</i> <hr/> <i>Oxide of Tin, or Putty Powder.</i>	<p>The same as those from other irritant poisons, and a peculiar tanned appearance of the villous coat of the stomach.</p>	<p>Milk to be given copiously, and the subsequent treatment to be regulated by the symptoms.</p>	<p>The muriate precipitates vegetable colouring matter; also albumen and gelatin. The white oxide is precipitated from its solution by free alkalies; with sulphuretted hydrogen gas, a brown precipitate.</p>
ZINC. <i>Oxide of Zinc.</i> <hr/> <i>Sulphate of Zinc.</i> <hr/> <i>White Vitriol.</i> <hr/> <i>Acetate of Zinc.</i>	<p>Violent vomiting; astringent taste, burning pain in the stomach; pale countenance; cold extremities; dull eyes; fluttering pulse. Death seldom ensues, in consequence of the emetic effects.</p>	<p>The vomiting may be relieved by copious draughts of warm water. Carbonate of soda, administered in solution, will decompose the sulphate of zinc. Milk and albumen also act as antidotes. General principles to be observed in the subsequent treatment.</p>	<p>A white precipitate is thrown down by the free alkalies from the soluble salts of zinc, which becomes yellow when strongly heated—recovering its white colour on cooling. Sulphuretted hydrogen occasions a white precipitate.</p>
PHOSPHORUS.	<p>Symptoms of irritant poisoning; pain in the stomach and bowels; vomiting, diarrhoea, tenderness and tension in the abdomen.</p>	<p>An emetic to be promptly administered; copious draughts containing magnesia in suspension; mucilaginous drinks; general treatment for inflammatory symptoms</p>	<p>Phosphorus is known by its ready inflammability, luminousness at ordinary temperatures, and alliaceous odour.</p>
GLASS or ENAMEL.	<p>If taken in very coarse powder, it produces irritation and inflammation of the bowels.</p>	<p>Large quantities of crumb of bread should be eaten to envelop the particles. (?) An emetic of sulphate of zinc should then be given, and vomiting be promoted by demulcent drinks.</p>	

II. ORGANIC POISONS.

1. VEGETABLE POISONS.

IRRITANT POISONS.

Anemone pulsatilla. Wind Flower.
Arnica maculatum. Wake Robin.
Bryonia dioica. Bryony.
Caladium sequini-m.. Dumbcane
Calla palustris. Water Arum.
Caltha palustris. Marsh Marigold.
Chelidonium majus. Celandine.
Clematis vitalba. Virgin Bower.
Convolvulus jalapa. Jalap.
Convolvulus scammonia. Scammony.
Croton tiglium. Purgino Croton.
Cucumis colocynthis. Colocynth.
Cyclamen Europeum. Sow Bread.
Daphne gnidium. Spurge Flax.
Daphne mezereum. Mezereum.
Delphinium staphysagria. Stavesacre.
Doica, palustris. Swamp leather wood.
Equisetum hyemale. Scourgrass.
Euphorbia officinarum. Euphorbium.
Spurge.
Gratiola officinalis. Hedge Hyssop.
Hippomane mancinella. Manchineel.
Hura crepitans. Sand Box.
Hydrocotyle vulgaris. Marsh Pennywort.
Jatropha curcas. Indian Nut.
Jatropha manihot. Cassada.
Juniperus sabina. Savin (oil of.)
Juniperus virginiana. Red Cedar (oil of.)
Momordica elaterium. Squirting Cucumber.
Narcissus pseudo-narcissus. Daffodil.
Pastinax sativa. Common Parsnip.
Pedicularis palustris. Marsh Lousewort.
Phytolacca decandra. Poke.
Piper cubeba. Cubebs.
Plumbago Europæa. Toothwort.
Ranunculus acris, and other species.
Crowfoot.
Rhododendron chrysanthemum. Oleander.
Ricinus communis. Castor Oil Plant.
Sambucus cibus. Elder.
Sedum arre. Stone Crop.
Stalagmitis cambogioides. Gamboge.
Tanacetum vulgare. Tansy (oil of.)

ACRO-NARCOTIC.

Æthusa cynapium. Common Fool's Parsley.
Aconitum napellus. Monkshood.
Agaricus, 5 species. Mushrooms (poisonous.)
Amanita muscaria. Truffles (poisonous.)
Anagallis arvensis. Meadow Pimpernell.
Anda Gomesii.
Apocynum androsaemifolium. Dogsbane.
Aristolochia clematis. Birthwort.
Arnica montana. Leopard's bane.
Asclepias Syriaca. Swallowwort.
Atropa belladonna. Deadly Night Shade.
Æsculus Oh-ensis. Buckeye.
Brucea antidysenterica. False Angustura Bark.
Cerbera, 3 species. Cerbera.
Chærophyllum sylvestre. Bastard Hemlock.
Chaillolia tozicana. Rathane.
Chenopodium murale. Wormseed.
Cicuta maculata. American Hemlock.
Cicuta virosa. Water Hemlock.
Cissus. Cissus.
Cocculus Indicus. Fish berries.
Colchicum autumnale. Meadow saffron.
Conium maculatum. Hemlock.
Coriaria myrtifolia. Myrtle-leaved Sumach.
Curare. Indian War Poison.
Cynanchum erectum. Cynanchum.
Cytisus laburnum. Laburnum.
Datura stramonium. Thorn Apple.
Digitalis purpurea. Foxglove.
Ergot. See *Secale*.
Eruum cretita. Bitter Vetch.
Gaultheria procumbens. Wintergreen (oil of.)
Hemanthus toxicarius.
Helleborus Niger. Black Hellebore.

SYMPTOMS.

The general effects of this class of vegetable poisons are;—an acrid pungent taste, with more or less of bitterness, excessive heat, great dryness of the mouth and throat, with sense of tightness there; violent vomiting, the efforts being continued even after the stomach is emptied; purging, with great pain in the stomach and bowels; pulse strong, frequent, and regular; breathing often quick and difficult; appearances of intoxication; the pupil of the eye frequently dilated, insensibility resembling death, the pulse becomes slow and loses its force, and death closes the scene.

If applied externally, many of them produce violent inflammations of the skin, with vesications or eruptions of pustules.

TREATMENT.

If vomiting have been occasioned by the poison, and the efforts are still continued, they may be rendered easier by large draughts of warm water, or thin gruel; but if symptoms of insensibility have come on without vomiting, it ought to be immediately excited by the sulphate of zinc, or some other active emetic substance, and after its operation a sharp purgative should be given. After as much as possible of the poison is not rid of, a very strong infusion of coffee, or vinegar diluted with water, may be given with advantage. Camphor mixture with ether may be taken frequently, and if insensibility be considerable, warmth, frictions, and blisters may be employed. If inflammation or other dangerous consequences have been induced, they are to be treated upon general principles.

The fruit of the *Feuillea Cordifolia* has been lately recommended as a powerful antidote against vegetable poisons; it is to be used in as recent a state as possible. (?)

N. B. Bromine, chlorine, and iodine are said to be antidotes to the alkaloids generally.

The narcotic vegetable poisons, if taken into the stomach or applied to a wound, occasion the following effects:—stupor; numb-

The stomach to be effectually evacuated, by giving four or five grains of tartar emetic, or from ten to twenty of the sulphate of zinc, repeated every quarter of an hour, till the full effect is

The pulse is variable, but at first generally strong and full; the breathing is quick, and there is great anxiety and dejection, which, if not speedily relieved, soon ends in death.</p>	<p>produced. These means may be assisted by tickling the throat with a feather or the finger. Large and strong glysters of soap dissolved in water, or of salt and gruel, should be speedily administered, to clear the bowels, and assist in getting rid of the poison, and active purgatives may be given after the vomiting has ceased. When as much as possible of the poison has been expelled, the patient may drink, alternately, a tea-cupful of strong hot infusion of coffee, and vinegar diluted with water. If the drowsiness, which is sometimes extreme, and the insensibility bordering on apoplexy, be not remedied by these means, blood may be taken from the jugular vein, blisters may be applied to the neck and legs, and the attention be roused by every means possible. If the heat declines, warmth and frictions must be perseveringly used. Vegetable acids are on no account to be given before the poison is expelled, and it is desirable that but little fluid of any kind should be administered.</p>

2. ANIMAL POISONS.

	SYMPTOMS.	TREATMENT.
POISONOUS FISH. <i>Balistes monaceros.</i> Old Wife. <i>Cancer astacus.</i> Crawfish. <i>Cancer ruficollis.</i> Land Crab. <i>Clupea thyssa.</i> Yellow-billed Sprat. <i>Coracinus fuscus major.</i> Gray Snapper. <i>Coracinus minor.</i> Hyne. <i>Coryphæna splendens.</i> Dolphin. <i>Mormyra.</i> Blue Parrot Fish. <i>Mirana major.</i> Conger Eel. <i>Mytilus edulis.</i> Mussel. <i>Ostracion globellum.</i> Smooth Bottle Fish. <i>Perca major.</i> Barracuda. <i>Perca venenosa.</i> Grooper. <i>Perca venenata.</i> Rock Fish. <i>Physalia.</i> Portuguese Man of War. <i>Scomber caruleus.</i> Spanish Mackerel. <i>Scomber maximus.</i> King Fish. <i>Scomber thynnus.</i> Bonetta. <i>Sparus chrysops.</i> Porgée. <i>Tetrodon sceleratus.</i> Tunny. <i>Tetrodon ocellatus.</i> Blower.	<p>In an hour or two, or often in a much shorter time, after stale fish has been eaten, a weight at the stomach comes on, with slight vertigo and headache, sense of heat about the head and eyes, considerable thirst, and often an eruption of the skin (urticaria,) and in many cases death.</p> <p>A sharp pain in the wounded part, which soon extends over the limb or body; great swelling, at first hard and pale, then reddish, livid, and gangrenous in appearance: faintings, vomitings, convulsions, and sometimes jaundice; pulse small, frequent, and irregular; breathing difficult, cold sweats, the sight fails, and the intellectual faculties are deranged. Inflammation, and often extensive suppuration and gangrene, followed by death.</p>	<p>An emetic should be speedily administered, or, in the absence of it, vomiting may be excited, by tickling the throat with the finger, and taking large draughts of warm water. After full vomiting, an active purgative should be given, to remove any of the noxious matter that may have found its way into the intestines. Vinegar and water may be drunk after the above remedies have operated, and the body may be sponged with the same. Water, made very sweet with sugar, to which ether may be added, may be drunk freely as a corrective, and a very weak solution of alkali has been recommended to obviate the effects of the poison. If spasm ensue; after evacuations, laudanum, in considerable doses, is necessary. If inflammation should occur, the usual means of removing it must be employed.</p> <p>A cupping glass to be applied over the wound, or a moderately tight ligature above the bites, and the wound left to bleed after being well washed with warm water; the actual cautery, lunar caustic, or butter of antimony, to be then applied freely to it, and afterwards covered with lint, dipped in equal parts of olive oil and spirit of hartshorn. The ligature to be removed if the inflammation be considerable. Warm, diluting drinks, and small doses of ammonia or hartshorn to cause perspiration; the patient to be well covered in bed, and a little warm wine given occasionally. If gangrene be threatened, wine may be given more freely, and the bark should be had recourse to. Arsenic, the principal ingredient in the Tanjore Pill, has been strongly recommended.</p>
POISONOUS SERPENTS. <i>Boa crotaloides.</i> Copperhead. <i>Cenchus mockeson.</i> Mockeson. <i>Coluber berus.</i> Viper. <i>Coluber prester.</i> Black Viper. <i>Crotalus.</i> (5 species.) Rattle Snake. <i>Seytale piscivorus.</i> Water Viper.	<p>Nauseous odour of the breath; acrid taste; burning heat in the throat, stomach, and abdomen; frequent vomitings, often bloody with copious bloody stools; excruciating pain in the stomach; painful and obstinate priapism, with heat in the bladder, and strangury or retention of urine; frightful convulsions, delirium and death.</p>	<p>Vomiting to be excited by drinking sweet oil, sugar and water, milk, or linseed tea, very freely. Emollient glysters should be administered, and if symptoms of inflammation of the stomach, kidney, or bladder supervene, they must be subdued by appropriate treatment.</p> <p>Camphor dissolved in oil may be rubbed over the belly and on the thighs.</p>
CANTHARIS VESICATORIA. Spanish, or Blistering Fly. <i>Lytta vittata.</i> Potato Fly.	<p>In general, the sting of these insects occasions only a slight degree of pain and swelling; but occasionally the symptoms are more violent, and sickness and fever are produced by the intensity of the pain.</p>	<p>Hartshorn and oil may be rubbed on the affected part, and a piece of rag moistened in the same, or in salt and water, may be kept upon it till the pain is removed. A few drops of hartshorn may be given frequently in a little water, and a glass or two of wine may be taken. The sting may, in general, be removed by making strong pressure around it with the barrel of a small watch-key.</p>
VENOMOUS INSECTS. <i>Tarantula.</i> Scorpion. Scorpion. <i>Vespa crabro.</i> Hornet. <i>Vespa vulgaris.</i> Wasp. <i>Apis mellifica.</i> Bee. <i>Culex pipiens.</i> Gnat. <i>Cætrus bovis.</i> Gad-fly.	<p>At an uncertain interval after the bite, generally, however, between the twentieth day and three or four months, pain or uneasiness occurs in the bitten part, though the wound may have been long healed. Anxiety, uneasiness, languor, spasms, horror, disturbed sleep, difficult respiration succeed, and are soon very much increased; violent convulsions affect the whole body, hideously distorting the muscles of the face; the eyes are red and protruded, the tongue swells and often hangs out, and viscid saliva flows from the mouth; there is pain in the stomach, with bilious vomitings, a horror of fluids, and impossibility of drinking them. All these symptoms are aggravated till the sufferer is relieved by death.</p>	<p>Hydrophobia is more easily prevented than cured; indeed it is doubted whether it ever has been cured. Mercury, arsenic, opium, musk, camphor, acids, wine, vegetable and mineral alkali, oil, various herbs, and many other remedies whose effects are quite opposite, have been employed, but none can be relied on. Large blood-lettings, the warm and cold bath, and almost every other remedial agent, have been tried without success.</p> <p>The bitten part should be completely cut out, even after it has healed, if the symptoms have not yet come on; the part should then be immersed in warm water, or washed with it as long as it will bleed, and after the most persevering ablution, caustic should be applied to every part of the surface, and then the wound covered with a poultice, and suffered to heal by granulations.</p> <p>No milder discipline can ensure safety.</p>
SALIVA OF THE RABID DOG.		

The most energetic poisons are used therapeutically; and, often with considerable advantage. They have, of course, to be administered in extremely small doses; to avoid producing poisoning.

POISONING, *Venefic'ium, Toxicatio, Intoxicatio, Pharmacia*, (F.) *Empoisonnement*. The art of applying a poisonous substance to any of the textures, in a dose capable of occasioning more or less serious symptoms. Rigorously speaking, therefore, if a physician, in treating any case, employ a deleterious medicine in a small dose, which, owing to particular circumstances, produces unpleasant symptoms, he may be said to have poisoned. The term is, however, generally restricted to poisoning by design.

Poisoning has also been used, by a few, to denote the series of symptoms resembling those produced by certain poisons, which occasionally follows the use of substances that are generally innoxious. Overloading the stomach with indigestible food has, for example, given occasion to symptoms resembling those produced by a narcotic poison, and the effect has been termed *poisoning*.

Secret poisoning was, at one time, practised as an art. It consisted in administering medicines, which should act as *slow poisons*, and gradually undermine the strength and life. Its agency was far from being so extensive as was imagined.

POISONOUS, *Toxical, Noxius*; having the qualities of a poison.

POISON-BERRY TREE, *Melia azedarach*—p. Italian, *Liquor arsenicalis*—p. Morbid, *Virus*—p. Oak, *Rhus toxicodendron*—p. Vegetable, *Upas*—p. Vine, *Rhus radicans*.

POISONS, **ACRO-NARCOTIC**, P. narcotico-acrid—p. Corrosive, P. acrid—p. Escharotic, P. acrid—p. Irritating, P. acrid—p. Putrescent, P. septic.

POITRINAIRE, *Phthisicus*.

POITRINE, *Thorax*.

POIVRE D'EAU, *Polygonum hydropiper*—p. de Guinée, *Capsicum annuum*—p. d'Inde, *Capsicum annuum*—p. de Jamaïque, see *Myrtus pimenta*—p. Long, *Piper longum*—p. Noir, *Piper nigrum*—p. Petit, *Vitex*—p. à Queue, *Piper cubeba*—p. Sauvage, *Vitex*.

POIX BLANCHE, see *Pinus abies*—p. de Bourgogne, see *Pinus abies*—p. Grasse, see *Pinus abies*—p. Jaune, see *Pinus abies*—p. Minérale, *Pissasphaltum*—p. Navale, see *Pinus sylvestris*—p. Noire, see *Pinus sylvestris*.

POLIATER, from *πολις*, 'the town,' and *ιατρος*, 'a physician.' A physician, exercising his profession in a town, by the appointment of the government.—Castelli.

POKE, INDIAN, *Veratrum viride*—p. Weed, *Phytolacca decandra*, *Veratrum viride*.

POLENTA, *Alphiton*.

POLEY MOUNTAIN, OF CANDY, *Teucrium Creticum*—p. Mountain of Montpellier, *Teucrium capitatum*.

POLICE, MEDICAL, *Medic'na polit'ica, Polit'ical medicine*. Rules established, or which ought to be established by the medical practitioner, for the prevention of disease, to assist its cure and to contribute to the progress of Medicine. The salubrity of districts, especially during the existence of spreading disease, is greatly ensured by an efficient medical police,

POLIO'SIS, *Tricho'sis polio'sis, Spilo'sis polio'sis, Canities*. Hair, prematurely gray or hoary.

POLIUM CRETICUM, *Teucrium Creticum*—p. Montanum, *Teucrium capitatum*.

POLLEX, *Anticheir, Prom'anus*, from *pollerē*, 'to have much strength,' (F.) *Pouce*. The first of the fingers in size and strength. It is asserted, that the term *pollroon* is derived from *Pol'licē truncato*;—the Romans, who were desirous of being exempted from military service, being accustomed to cut off the thumb, and thus render themselves unfit to handle arms.

POLLEX. See *Digitus*.

Pollex pedis is the great toe.

POLLINCTOR. (L.) In antiquity, an anointer, dresser, or embalmer of the dead.

POLLINCTURA, *Embalming*.

POLLUTION, *Pollutio*, from *polluo*, 'I profane.' The excretion of the seminal liquor or sperm, at other times than during coition. When occasioned by a voluntary act, it is called simply, *Pollution* or *Masturbation*, (q. v.:) when excited during sleep, by lascivious dreams, it takes the name *Nocturnal pollution*, *Exoneiro'sis*, *Oneirot'ismos*, *Oneirot'onos*, *Gonorrhœa dormientium*, *G. oneirot'onos*, *G. Vera*, *G. libidinosus*, *Profluvium Sem'inis*, *Spermatorrhœa*, *Paronir'ia salax*, *Night pollution*. (F.) *Pollution involontaire*.

POLLUTION INVOLONTAIRE, *Pollution*—p. Nocturnal, *Pollution*—p. Self, *Masturbation*—p. Voluntary, *Masturbation*.

POLY, *Polys, πολυς*, 'many, full.' Hence:

POLYÆMIA, *Plethora*.

POLYANHÆMIA, *Anæmia*.

POLY'CERAS, from *πολυς*, 'many,' and *κερας*, 'horn.' A monstrous animal having many horns.—Gurlt.

POLYCHO'LIA, from *πολυς*, 'much,' and *χολη*, 'bile.' Superabundance of bile; such as is supposed to exist in bilious fevers.

POLYCHRES'TUS, from *πολυς*, 'much,' and *χρηστος*, 'useful.' Having many virtues. An ancient name for certain medicines, considered to be useful in many diseases.

POLYCHRONIUS, *Chronic*.

POLYCHYMIA SANGUINEA, *Plethora*.

POLYCORIA; from *πολυς*; and *κορη*, 'the pupil.' The state in which there is more than one pupil.—Von Ammon.

POLYDACTYLUS, *Perissodactylus*, from *πολυς*, 'many,' and *δακτυλος*, 'a finger.' One who has a supernumerary finger or fingers, or toes.

POLYDIP'SIA, from *πολυς*, 'much,' and *διψη*, 'thirst;' *Sitis morbo'sa*, *Polydip'sia*, *Excessive thirst*,—*Dipsos'is avens*. (F.) *Soif excessive*. A constant desire for drinking, with a sense of dryness in the mouth and throat. It is mostly symptomatic of fever, inflammation, dropsy, excessive discharges, &c.

POLYG'ALA, from *πολυς*, 'much,' and *γαλα*, 'milk;' *P. vulgaris*, *Common Milkwort*. *Familily*, *Rhinanthoidæ*. *Sex. Syst.* *Diadelphia Octandria*. The leaves are bitter, and are used in the same cases as the *polygala amara*.

POLYGALA AMARA, *Bitter Milkwort*. A powerful bitter; and, consequently, tonic. Its reputed virtues are balsamic, demulcent, and corroborant. The *Polygala rubella* or *Bitter Polygala* of the United States has the same virtues.

POLYGALA BITTER, see *P. amara*.

POLYG'ALA SENE'GA, *Sen'eka*, *Rattlesnake*

Milkwort, *Senega* or *Rattlesnake root*, *Polygala Virginiana*, (F.) *Polygala de Virginie* ou de *Seneka*. The bark is the active part of the root. Its taste is at first acrid, and afterwards very hot and pungent. It was once esteemed to be specific against the poison of the rattlesnake and in pleurisy, pneumonia, &c., after the inflammatory action had been got under. It has been given also in humoral asthma, chronic rheumatism, dropsy, croup, amenorrhœa, &c. According to Pêschier, it contains three particular principles, *Pol'ygaline* or *Sen'egine*, *Isol'usine*, and *Polygalic Acid*. Dose, gr. 30 to 40 of the powder.

POLYGALA VIRGINIANA, *P. senega*.

POLYGALINE See *Polygala senega*.

POLYGONATUM, *Convallaria polygonatum*.

POLYG'ONUM AVICULARE, from *πολυς*, 'much,' and *γωνη*, 'seed.' *Centino'dia*, *Centum-no'dia*, *Knot-grass*, *Sanguinal'is Corrig'iola*, (F.) *Renouée*, *Trainasse*, *Centinode*. Family, *Polygonææ*. *Scz. Syst. Octandria Trigynia*. This grass is said to be a feeble astringent.

POLYGONUM BISTORTA, *Bistorta*, *Offic'inal Bistort*, *Great Bistort* or *Snakeweed*. The root is a powerful astringent and tonic; and, as such, has been used in internal hemorrhage, atonic diarrhœa, ague, &c. Dose, gr. xv to ʒj.

POLYGONUM DIVARICATUM;—the *Eastern Buckcheat plant*. The roots, reduced to a coarse meal, are said to be much used as an article of diet by the Siberians.

POLYGONUM FAGOP'YRUM,—*Fagopyrum*, *Buckcheat*, *Trit'icum Fagi'num*, (F.) *Sarrasin*, *Blé noir*. The grain of this plant constitutes a principal article of food with the inhabitants of Russia, Germany, and Switzerland. It is much used in the United States.

POLYGONUM HYDROPIPER, *Hydropiper*, *Persic'aria urens*, *Mercurius terre'stris*; the *Poor Man's Pepper*, *Biting Arse-smart*, *Lake-weed*, *Water-pepper*, (F.) *Poivre d'eau*. The leaves of this plant have an acrid, burning taste; and resemble those of the arum. They have been recommended as possessing antiseptic, aperient, and diuretic virtues. The fresh leaves have been applied externally, as a stimulating cataplasm.

POLYGONUM PERSICA'RIA, *Persicaria*, *Persicaria mitis*, *Plumba'go*, *Arse-smart*, (F.) *Persic'aire douce*. This plant is said to possess vulnerary and antiseptic qualities. It has been given in wine to arrest gangrene.

POLYGROMA, *Staphyloma*.

POLYHYPERHÆMIA, *Plethora*.

POLYLYMPHIA, *Anasarca*.

POLYMASTHUS, from *πολυς*, 'many,' and *μασθος*, 'breast.' A monster having several breasts.—Gurlt.

POLYMERIA PROMISCUA TRANSLATIVA, Transposition of the viscera.

POLYMERIS'MUS, from *πολυς*, 'much,' and *μερος*, 'a part.' A monstrosity, which consists in the existence of supernumerary organs; as a sixth finger of the hand.

POLYNEURON, *Plantago*.

POLYOP'SIA, from *πολυς*, 'much,' and *οφης*, 'sight.' Vision is so called, when multiple.

POLYPERIA, from *πολυς*, 'much,' and *πηρος*, 'mutilated.' Congenital misconstruction of various parts or organs.—Good.

POLYPHA'GIA, *Mulicorant'ia*, from *πολυς*, 'much,' and *φαγεω*, 'I eat.' Voracity. Faculty of digesting many kinds of food.

POLYPHARMACIA, *Polypharm'acy*; from *πολυς*, 'much,' and *φάρμακον*, 'a medicine.' A prescription, consisting of a number of medicines; hence the name *Polyphar'macus* given to one who is in the habit of prescribing a number of medicines, and whose prescriptions are loaded with ingredients. The term is taken in bad part.

POLYPHYSIA, Flatulence.

POLYPLAS'TIC, *Polyplas'ticus*, from *πολυς*, 'much,' and *πλασσω*, 'I form.' That which has many shapes.

A **POLYPLASTIC ELEMENT**, in histology, is one which does not retain its primary shape; but undergoes transformation into others.—Gerber.

POLYPODITES. Wine, impregnated with polypody.

POLYPODIUM CALAGUALA, *Calaguala radix*.

POLYPODIUM FILIX MAS, *Aspid'ium Filiz Mas*, *Pteris*, *Athyrium Filiz Mas*, *Blechnon*, *Polyrrhizon*, *Blancnon Oribusii*, *Lonch'itis*, *Filic'ula*, *Male Polypody* or *Fern*, *Filiz mas*, *Nephro'dium crenatum*, *N. Filiz mas*, (F.) *Fougère mâle*. *Nat. Ord. Filices*. *Scz. Syst. Cryptogamia Filices*. The rhizoma of this plant has been much extolled as an anthelmintic, and in cases of tenia. It was the basis of a once celebrated remedy—*Madame Nouffer's*—but, perhaps, more of the efficacy was to be attributed to the active purgatives by which it was followed than to the fern. Dose, ʒij to ʒiij of the powdered solid part of the root; followed, in the morning, by a strong cathartic of camboge or jalap. An ethereal extract has been proposed by Dr. Pêschier, of Geneva.

POLYPODY, **MALE**, *Polypodium filix mas*.

POLYPOID, *Polypoi'des*; from *Polypus*, (q. v.) and *ειδος*, 'form.' Having the shape of, or resembling a polypus.

POLYPORUS OFFICINALIS, *Boletus laticis*.

POLYPO'SIA, *πολυποσια*, from *πολυς*, 'much,' and *ποσις*, 'drink.' Great thirst—great desire for drink.

POLYPOSIA, *Polydipsia*.

POLYPUS, *Pseudometamorpho'sis polypo'sa*, from *πολυς*, 'many,' and *πους*, 'a foot.' A name given to tumours, which occur in mucous membranes especially; and which have been compared to certain zoophytes. Polypi may form on every mucous membrane. They are most commonly observed in the nasal fossæ, pharynx, and uterus; more rarely in the stomach, intestines, bronchial tubes, bladder, and meatus auditorius externus. They vary much in size, number, mode of adhesion, and intimate nature. Accordingly, they have received various appellations; *mucous*, *soft*, *vesic'ular*, when their substance has been soft, spongy, vesicular, and, as it were, gorged with fluid. Others have been called *hard*; and these have been distinguished into *fibrous* or *fleshy*, and into *scirrhous* or *cancerous*. *Fibrous* polypi are of a dense, compact texture, and whitish colour. They contain few vessels, and do not degenerate into cancer. The *scirrhous* or *carcinomatous* are true cancerous tumours, painful and bleeding. They present all the pathological

changes which belong to cancerous affections, and the prognosis is of course unfavourable.

The mode of treating polypi must differ according to their character. The means used to destroy them have been, 1. To subject them to the action of certain astringent powders or solutions, to obtain their resolution. 2. *Cauterization* or the application of the actual cautery or caustics. 3. *Excision* or ablation with a cutting instrument. 4. *Extirpation* with the fingers or with the polypus forceps. 5. A *ligature*, put round them so as to prevent their nutrition. A seton has, also, been sometimes used to gradually destroy the pedicle.

The term *POLYPI*, *Pseudopolypi*, has likewise been applied to collections of blood—fibrinous concretions—found in the heart or great vessels after dissolution. These were once, erroneously, regarded as morbid. The presence of these concretions may be suspected, when in the course of an acute or chronic affection of the heart, or at the close of chronic diseases in general—especially those of the lungs—the heart's action becomes suddenly tumultuous, obscure, and accompanied with a soft bellows' murmur, whilst the general symptoms indicate the effects of obstructed circulation. The right cavities are most frequently affected.

POLYYPUS BRONCHIALIS, *Bronchlemmitis*, *Bronchitis membranacea*, *B. plastic*. A membraniform secretion in the bronchial tubes of a diphtheritic character, having the shape, when expectorated, of the bronchia. It is the result of inflammation of the lining membrane of those tubes.

POLYRRHIZON, *Polypodium filix mas*.

POLYRRHŒA, *Profluvium*.

POLYSAR'CIA, from *πολυς*, 'much,' and *σαρξ*, 'flesh.' *Carnositas*, *Polysomatia*, *Adelipria*, *Obesitas*, *Corpulentia*, (q. v.) *Steatites*. Excessive corpulency. Authors have distinguished two varieties of this:—*Polysarcia carnosa*, *Corpulency*, (q. v.) and *P. adiposa* or *Obesity*, *Hyperpimelia*, *Liparia*, *Adiposis*, *Polysarcia faginos*. A severe regimen and exercise are the best preventives.

POLYSOMATIA, *Polysarcia*.

POLYSPAS'TON, from *πολυς*, 'much,' and *σπασω*, 'I draw.' A powerful instrument for reducing luxations.—*Gorræus*.

POLYSTOMA PINGUICOLA, see *Worms*—*p. Venarum*, see *Worms*.

POLYTRIC, *Asplenium trichomanoides*.

POLYTRICHUM, from *πολυς*, 'much,' and *τριχίς*, 'hair.' *Polytricon*, *Polytrichum vulgare*, *Adiantum aureum*, *Golden Maiden-hair*, (F.) *Perce-mousse*. It is possessed of astringent properties, and was formerly given in diseases of the lungs, and in calculous affections.

POLYTRICUM COMMUNE, *Asplenium trichomanoides*.

POLYTROPHIA, from *πολυς*, 'much,' and *τροφω*, 'I nourish.' Abundant or excessive nutrition.

POLYURIA, *Diabetes*.

POLYURICUS, from *πολυς*, 'much,' and *ουρω*, 'urine.' Sauvages calls—*Ischuria polyurica*—a kind of ischuria, caused by accumulation of urine in the bladder.

POMA CHINENSIS, see *Citrus aurantium*.

POMACEUM, *Cider*.

POMA'TUM, *Pommatum*, (F.) *Pommade*, (F.) *Liparolê*. A pharmaceutical preparation,

employed only externally; which differs but little from an ointment, except in having, generally, less consistence. It is, generally, made aromatic, and coloured to render it more agreeable.

COMMON *POMATUM* is made of *lard*, 12 lbs; *suet*, 4 lbs; *essence*, $\frac{3}{4}$ viij.

POMATUM AD LABIA DEMULCENDA, *Cerate* for the lips—*p. Epispasticum flavum*, *Unguentum lyttæ medicatum aliud*—*p. Epispasticum viride &c.*, *Unguentum lyttæ medicatum*—*p. for the Lips*, *Cerate* for the lips—*p. Nitricum vel oxygenatum*, *Unguentum acidi nitrosi*—*p. Saturni*, *Unguentum plumbi superacetatis*.

POMEGRANATE, *Punica granatum*.

POMILIUS, see *Nanus*.

POMMADE, *Pomatum*—*p. d'Alyon*, *Unguentum acidi nitrosi*—*p. Antipsorique de Jasser*, *Unguentum sulphuris compositum*—*p. d'Autenrieth*, *Unguentum antimonii tartarizati*—*p. de Cyrilli*, *Unguentum muriatis hydrargyri oxygenato medicatum*—*p. Epispastique jaune*, *Unguentum lyttæ medicatum aliud*—*p. Epispastique verte*, *Unguentum lyttæ medicatum*—*p. de Garou*, *Unguentum epispasticum de daphne gnidio*—*p. pour les Lèvres*, *Cerate* for the lips—*p. Ophthalmique* (Regent's.) *Unguentum ophthalmicum*—*p. Oxygénée*, *Unguentum acidi nitrosi*—*p. Stibiée*, *Unguentum antimonii tartarizati*.

POMME, see *Pyrus malus*—*p. d'Amour*, *Solanum lycopersicum*—*p. Épineuse*, *Datura stramonium*—*p. de Merveille*, *Momordica balsamica*—*p. Mousseuse*, *Bedegar*—*p. de Terre*, *Solanum tuberosum*.

POMMES HÉMORRHOIDALES. See *Viscum album*.

POMMETTE. See *Malæ os*.

POMMIER, *Pyrus malus*.

POMPH'OLYX, from *πομφος*, 'a bladder.' A small vesicle on the skin. An eruption of *bullæ* or *blebs*, appearing without any inflammation around them, and without fever. It is the *Ecphlysis Pompholyx* of Good. See *Pemphigus*.

POMPHOLYX, *Tutia*, *Zinci oxydum*.

POMPION, *Cucurbita pepo*.

POMUM ADA'MI. *Adam's Apple*. The projection, formed by the thyroid cartilage in the neck,—of males particularly. It is so called from a notion that it was caused by the apple sticking in the throat of our first parent.

POMUM HIEROSOLYMITANUM, *Momordica balsamina*—*p. Melongenæ*, see *Solanum melongena*.

PONCTION, *Puncturing*.

PONDERA ET MENSURÆ, *Weights and measures*.

PONGITIF, *Pungent*.

PONS HEPATIS. See *Lobulus anonymus*—*p. Tarini*, *Tarini pons*.

PONS VAROLII, *Corpus annulæ ræ*, *Processus annularis*, *Eminentia annularis*, *Varolii's bridge*, *Nodus encephali vel Cerebri*, *Cerebral protuberance*, *Mesencephalum*, *Protuberantia annularis Willisii*, *Annular protuberance*. An eminence at the upper part of the medulla oblongata, first described by Varolius. It is formed by the union of the *crura cerebri* and *crura cerebelli*.

POPULAR, *AMERICAN*, *Liriodendron*—*p. Black*, *Populus*—*p. Tree*, *Liriodendron*—*p. Tulip-bearing*, *Liriodendron*.

POPLES, *Garretum*, *Garretum*, *Ignys*, *Ignys*,

the *Ham*, the *Hough*, (F.) *Jarret*. The posterior part of the knee joint. The ham forms, what is called, the popliteal region.

POPLITE, *Popliteus*, muscle.

POPLITEAL, *Popliteus*, from *Poples*, 'the ham.' That which relates to the ham. A name given to various parts.

POPLITEAL ARTERY—*Popliteal portion of the crural*, (Ch.)—is really a continuation of the femoral, which changes its name on passing through the adductor magnus muscle. It descends a little obliquely outwards into the hollow of the ham, and extends from the commencement of the lower third of the thigh to the end of the upper quarter of the leg, where it terminates by dividing into the *posterior tibial* and *peroneal* arteries. In the ham, it gives off the three *superior articular arteries*; and, at the top of the leg, the arteries of the *geminus* muscles or *geminus branches*, (F.) *branches jumelles*, the *two inferior articular arteries*, and the *tibialis antica*.

POPLITEUS MUSCLE, *Muscle Jarretier*, *Fémoropopliteo-tibial*, (Ch.) *Subpopliteus*, (F.) *Muscle poplitè*, is seated in the popliteal region. It is triangular, long, flat; and is inserted, on the one hand, by means of a strong tendon, into the tuberosity at the outer condyle of the femur, terminating below at the upper part of the posterior surface of the tibia. This muscle bends the leg on the thigh, and, reciprocally, the thigh on the leg. When the leg is bent, it causes it to turn, in rotation, inwards.

POPLITEAL NERVES. They result from the bifurcation of the sciatic, and are two in number, viz. 1. The *external popliteal*, *Branche péronière*, (Ch.) It is smaller than the internal; turns to the outside of the fibula at the upper part of the leg, and divides into the *musculo-cutaneous branch*,—*nerf pré-tibio-digital*, (Ch.) and into the *anterior tibial*,—*nerf pré-tibio-sus-phalangéaire*, (Ch.) 2. The *internal popliteal nerve*, *Branche tibiale*, (Ch.) which is larger than the other, and seems to be the real continuation of the sciatic nerve. It descends vertically into the hollow of the ham; and passes beneath the aponeurotic arch of the solaris muscle, beyond which it takes the name of *tibial nerve*. It furnishes the *external saphena nerve*, and a number of branches, that are distributed to the posterior muscles of the leg. It then passes to the sole of the foot to be divided into two branches, called *Plantar nerves*.

POPLITEAL VEIN has the same arrangement as the artery, behind which it is situated.

POPONAX. See *Pastinaca opoponax*.

POPPY, CORN, RED, *Papaver rhœas*—p. Heads, see *Papaver*—p. Juice, *Meconium*—p. Spotting, *Cucurbalus Behen*—p. Thorn, *Argemone Mexicana*—p. White, *Papaver*—p. White, capsule, see *Papaver*.

POPULUS, *Populus nigra*, *Ægeï'ros*, *Ache-roïs*, *Black poplar*, (F.) *Peuplier noir*. The young buds, *oculi*, or rudiments of the leaves, which appear in the beginning of spring, were formerly used in an official ointment—the *unguentum populæum*. It was, also, recommended in chronic affections of the lungs.

PORCELAIN, *Essera*.

PORCELLIO, *Oniscus*.

PORCUPINE DISEASE, *Ichthyosis*.

PORCUPINE MEN. Persons have been so called in whom the cuticle is produced in the form of

pointed prolongations, as if it had been moulded on the papillæ, like the shorter and blunter quills of the porcupine.

PORCUS, *Vulva*.

PORDE, *Crepitation*.

PORE, *Porus*, *Interstice*, *πορος*, 'a passage.' Anatomists have given this name to the openings at the extremities of vessels at the surface of different membranes. **EXHALANT PORES** are those which terminate the extremities of arteries, and transmit the fluids exhaled.—**ABSORBENT PORES** are the absorbent mouths (?) of vessels, employed in taking up parts that have to enter the circulation. Pores exist in the cuticle; yet Humboldt, with a powerful magnifying-glass, was unable to observe them. The pores of the skin have also been called *spiracula*.

PORI BILIARIA are ducts, which receive the bile from the penicilli of the liver, and convey it to the hepatic duct.

POROCELE, from *πορος*, 'a callus,' and *κηλη*, 'a tumour.' A hard tumour of the testicle or its envelopes.

POROMPHALON, from *πορος*, 'hard,' and *ομφαλος*, 'the navel.' Umbilical hernia with hard and thickened parietes.

POROS, *Canal*.

POROSIS, *Chalaza*.

POROTIC, *Poroticus*, from *πορος*, 'callus.' A remedy believed to be capable of assisting the formation of callus.

PORPHURURIA, *Urine, purpuric*.

PORPHYRA, *Purpura*—p. *Græcorum*, *Pettechiæ*—p. *Hæmorrhagica*, *Purpura hæmorrhagica*.

PORPHYRIZATION, *Levigation*.

PORPHYRY, *Porphyrites*, from *πορφυρα*, 'purple.' A species of very hard, compound rock, susceptible of considerable polish, and used in the fabrication of mortars and slabs for the apothecary.

PORPHYRY, BLACK, *Ophites*.

PORRACEOUS, *Porraceus*, *Prasinus*, from *porrum*, 'a leek.' Having the green colour of the leek. An epithet given to certain excreted matters,—the sputa and fæces particularly.

PORREAU, *Allium porrum*.

PORRECTUM, *Lever*.

PORRET, *Allium porrum*.

PORRIGINE, *Porrigio favosa*.

PORRIGO, (L.) 'scurf' or scall in the head,' *Tinea*, *Favus*, *Purfuratio*, *Furfures*, *Pityriasis*, *Ecpye'sis porrigio*, *Phlysis porrigio*, from *porrigere*, 'to spread.' (F.) *Teigne*, *Ruche*. Some of the varieties are contagious. It is principally characterized by an eruption of the pustules, called *favi* and *achores*, unaccompanied by fever.

PORRIGO DECAUVANS, *Trichosis area*, *Area*, *Alope'cia ureata*, consists of patches of baldness, without decay or change of colour in the surrounding hair, the exposed parts of the scalp being glabrous, white, and shining. The morbid condition sometimes spreads, so that the patches coalesce, rendering the baldness extensive. The treatment consists in keeping the scalp cleared by constant shaving, and in the steady application of some stimulating liniment or ointment.

PORRIGO FAVOSA, *Cerion*, *Favus*, *Ecpye'sis porrigio favosa*, *Tinea favosa*, *Scabies capitis favosa*, *Honey-comb Scall* or *Tetter*. (F.) *Teigne*

favuse, Porrigine. This consists in an eruption of pustules common to the head, trunk, and extremities, pea-sized, flattened at the top, in clusters, often uniting, discharge, fetid, scabs, honey-combed; the cells filled with fluid. It occurs both in early and adult life. The treatment, in this variety, must consist in the exhibition of laxatives and the mildest stimulating ointments, such as the *Ung. zinci, Ung. hydrargyri præcipitat. alb., &c.*

PORRIGO FURFURANS, Ecpyesis porrigi furfuracea, Tinea furfuracea, Tinea porrigino'sa, Teigne furfuracée. (Alibert) commences with an eruption of small aches, the fluid of which soon concretes and separates in innumerable, thin, laminated scabs, or scale-like exfoliations. It is attended with a good deal of itching and some soreness of the scalp, to which the disease is confined. It occurs chiefly in adults. In the treatment, the scalp must be kept shaved. The part must be washed repeatedly with soap and water, and an oiled silk cap worn. The nature of the ointments used must vary according to the period of disease and the irritability of the part affected. *Zinc ointment*;—one made with the *Coccus indicus*;—the *Sulphur ointment*;—*Citrine ointment* and *Ung. hydrargyri nitrico-oxydi*; *Tar ointment* and *Nitric acid ointment* have all been found useful. Should inflammation or discharge arise, these applications must of course be intermitted.

PORRIGO LARVALIS, P. lupinosa.

PORRIGO LARVALIS, Crusta lactea, Ecpyesis Porrigi crustacea, Achor, Tinea lactea, T. faciei, Milky scall or Tetter, Lactamen, (F.) Croûte de lait, Croûte lacteuse, Fêux volages. This is, almost exclusively, a disease of infancy. It commonly appears first on the forehead and cheeks, in an eruption of numerous, minute, whitish aches on a red surface. These break and discharge a viscid fluid, which becomes incrustated in thin, yellowish, or greenish scabs. The patches spread, until the whole face becomes, as it were, enveloped in a mask, (hence the epithet *larvalis*.) The disease is rather a variety of Eczema. Sometimes the eruption appears on the neck and breast; and, occasionally, on the extremities. In general, the health of the child does not suffer, but the eruption is always attended with much itching and irritation. The treatment consists in mild, tepid ablution, and the application of gently stimulating ointments, as of the oxydum zinci. The bowels must be kept in a soluble state by small doses of calomel, or by rhubarb and magnesia.

PORRIGO LUPINO'SA, Tinea lupi'na, Scabies capitis, Ecpyesis porrigi lupino'sa, Porrigi larvalis, Impetigo figurata, Tinea granulata, T. mucosa, Crusta lactea (of some) *Ment'agra infantum, (F.) Teigne, Dartre crustacée flavescens*, consists of minute pustules in small patches, mostly commencing on the scalp; the patches terminating in dry, delving scabs, resembling lupine seeds; the interstices often covered with a thin, whitish, and exfoliating incrustation. It occurs chiefly in early life, and requires the same treatment as the last.

PORRIGO SCUTULATA, Tinea granulata, Ecpyesis porrigi galeata, Tinea fico'sa, Achor's seu Scabies capitis, Ringworm of the scalp, Scalled head; (F.) Teigne annulaire. It commences with clusters of small, light, yellow pustules,

which soon scab off; and, if neglected, become hard by accumulation. If the scabs be removed, the surface is left red and shining, but studded with slightly elevated points. If not attended to, it involves the whole head. It occurs in children 3 or 4 years of age, and is very unmanageable. The rules laid down under the *Porrigi furfurans* must be, here, still more perseveringly enforced. The whole tribe of stimulating ointments may be used in succession. No one will always succeed, and hence the necessity of change, provided advantage should not seem to follow any particular application. The *Unguentum ad Scabiem*, of Banyer sometimes cures, when others fail.

PORRUM, Allium porrum.

PORRUS, Sarcoma.

PORTA, πύλη, Pylæ, 'a gate.' The part of the liver, where its vessels enter as by a gate. Also, the Vulva, (q. v.)

PORTA JECORIS, Porta vena.

VENA PORTA, Vena portæ, V. portarum, Ramalis vena, Janitrix, Vena magna seu quæ ad portas est seu stelechiæa seu lactea seu ostiaria, Porta Jecoris, Porta, Vena arterio'sa seu arterid'lis, Manus Jecoris seu hepatis, Vena ad portas. The *System of the vena porta* or the *Abdominal venous system, (F.) Veine porte*, is a vascular apparatus of black blood, situate in the abdomen, and resulting from two distinct orders of vessels, united into one common trunk. 1. One of these trunks, much more extensive than the other, has received the name *Vena porta abdominalis*, because it arises from all the organs enclosed in the cavity of the abdomen, except the kidneys and bladder; and in the female, the uterus. The *Abdominal vena porta* has two principal roots,—the *splenic vein* and the *superior mesenteric*, which have their ramifications in all the digestive organs. 2. The other trunk, destined solely to the liver, has been called the *Hepatic vena porta*. It appears to be a continuation of the abdominal vena porta, and proceeds towards the inferior surface of the liver. Opposite to the transverse fissure of that organ, it divides, like an artery, into two branches, which, by their union, seem to form a canal or duct, called by some the *Sinus of the vena porta*. These branches are distributed in the substance of the liver, whither they are accompanied by a prolongation of the fibrous capsule of that organ,—the capsule of Glisson. The different branches of the vena porta are devoid of valves.

PORTE-AIGUILLE, Acutenaculum; Needle carrier, Needle bearer; from (F.) *porter*, 'to carry,' and *aiguille*, 'a needle.' An instrument for accurately laying hold of a needle, and giving it greater length, when it is so fine and small, that it cannot be held by the fingers. It is of steel or silver, about two inches long, and throughout the whole, almost, of its length, divided into two branches, so as to form a kind of forceps, capable of being closed by means of a sliding ring. A modification of this instrument has been devised by Dr. Physick, for taking up deep-seated arteries, beyond the reach of a tenaculum or common needle. It consists of a forceps, so constructed as to hold in its extremity a needle armed with a ligature. The handles of the forceps are fastened together, temporarily, by a spring or catch; and, when the needle is fairly deposited beneath the vessel, it is disengaged from the forceps and drawn out,

leaving the ligature behind, which can be tied without difficulty.

PORTE-BOUGIE, (F.) A silver canula similar to that of a trocar, except that it is longer. It is used for conducting bougies into the urethra.

PORTE-FEUILLE, Subscapularis.

PORTE-MÈCHE, (F.) from *porter*, 'to carry,' and *mèche*, 'a tent.' An instrument for carrying tents or *mèches* deeply into fistulous openings, or sinuses, to the bottom of ulcers, &c. It is a wire of silver or steel, four or five inches long, having a notch at one extremity, and a button at the other.

PORTE-MOXA. A small instrument for keeping the moxa applied to the part to be cauterized. It consists of a metallic ring—separated from the skin by three small supports of ebony—to which a long handle is adapted.

PORTE-PIERRE, Caustic bearer. An instrument similar to a *porte-crayon*, for carrying the lunar caustic.

PORTE-SONDE. An instrument, resembling a *porte-crayon*, employed for holding the style or *sonde*, and inserting it more readily into the nasal duct, during the operation for fistula lachrymalis.

PORTER, Cerevisia.

PORTIO DURA, Facial nerve.

PORTIO MEDIA INTER PORTIO'NEM DURAM ET PORTIO'NEM MOLLEM. A small nerve, which arises from the brain, between the origin of the portio dura and trunk of the portio mollis.—Wrisberg.

PORTION COSTO-TRACHÉLIENNE DU SACRO-SPINAL, Longissimus dorsi—*p. Ecailleux* ou *squamæ* du *temporal*, Squamous portion of the temporal.

PORTION LOMBAIRE DU PLEXUS CRURAL, Lumbar plexus.

PORTION GODRONNÉE DE LA CORNE D'AMMON. A name given by Vicq d'Azyr to a small denticulated cord of a compact tissue and granular appearance, which unites the cornu ammonis to the paries of the lateral ventricle.

PORTONARIUM, Pylorus, Duodenum.

PORTULA'CA, Androckne, Allium Gallicum, Portula'ca oleracea, Purslane, (F.) Pourpier cultivé. This plant abounds with a watery and somewhat acid juice; and is often put into soups or pickled with spices. It is regarded as antiseptic and aperient.

POSCA, Oxyerate.

POSE, Coryza.

POSIMOS, Potable.

POSITION, FALSE, False position.

POSOL'OGY, Posolog'ia; from *ποσος*, 'quantity,' and *λογος*, 'a discourse.' Indication of the doses in which the different articles of the materia medica ought to be exhibited.

POSSET, Possé'tuin; from (L.) *Posca*, 'sour wine and water.' Milk curdled with wine or any acid or treacle. A preparation of beer and milk. *Zythogála.*

POSTBRACHIALE, Metacarpus.

POSTERIOR ANNULARIS. An external, interosseous muscle, which arises from the corresponding sides of the metacarpal bones of the ring, and little finger, and is inserted into the inside of the tendon on the back of the ring finger. Its *use* is to draw the ring finger inwards.

POSTERIOR AURIS, Retrahens auris.

POSTERIOR INDICIS MANUS. An internal, in-

terosseous muscle, which arises from the inner or ulnar side of the metacarpal bone of the fore finger, and is inserted into the inside of the tendon on the back of the fore finger. Its *use* is to draw the fore finger inwards.

POSTERIOR INDICIS PEDIS, Abduc'tor Indicis Pedis. An external, interosseous muscle, which arises from the contiguous sides of the metatarsal bones of the fore toe, and second of the small toes, and is inserted into the outside of the root of the first bone of the fore toe. Its *use* is to pull the fore toe outwards.

POSTERIOR MEDII DIGITI MANUS. An external, interosseous muscle, which arises from the corresponding sides of the metacarpal bones of the middle and ring fingers; and is inserted into the inside of the tendon on the back of the middle finger. Its *use* is to draw the middle finger inwards.

POSTERIOR MEDII DIGITI PEDIS, Adductor medii digiti pedis. An external, interosseous muscle, which originates from the contiguous sides of the metatarsal bones of the second and third of the small toes, and is inserted into the outside of the root of the first bone of the second of the small toes. Its *use* is to pull the toe outwards.

POSTERIOR TERTII DIGITI, Adductor tertii digiti. An external, interosseous muscle, which arises from the contiguous sides of the metatarsal bones of the 3d and 4th of the small toes, and is inserted into the outside of the root of the first bone of the third of the small toes. Its *use* is to pull the toe outwards.

POSTHE, Penis, Prepuce.

POSTHIOPLASTIC, Posthioplasticus, from *ποσθιον*, 'the prepuce,' and *πλασσω*, 'I form.' An epithet applied to the operation for restoring the prepuce.

POSTHITIS, from *ποσθιον*, 'the prepuce,' and *itis*:—the termination for inflammation. Inflammation of the prepuce.

POSTHON'CUS, from *ποσθιον*, 'the prepuce,' and *ογκος*, 'a tumour.' Swelling of the prepuce.

POSTPOSITIO. Delay in the return of a paroxysm. It is opposed to *anticipatio*, which means the return of a paroxysm earlier than its accustomed hour.

In this sense we speak of an *anticipating* and *postponing* intermittent.

POTABLE, Potab'ilis, from *potare*, 'to drink,' *Potimos, Potos, Posimos*, 'drinkable.' Water is said to be potable, when it contains atmospheric air; is not brackish; and has no mineral impregnation of consequence.

POTASH. So called from the pots or vessels in which it was made;—*Potas'sa, Kali, Vegetable alkali, Gastrinum.*

POTASH OF COMMERCE, Potassa impu'ra, Impure potass, Alu'men cal'tinum, Cin'eres Rus'sici, Subcarb'onas potas'sæ impu'rus, Potas'sæ carb'onas impurus,—the *Pearlash* of commerce is prepared from the ashes of land plants by calcination, solution in water, filtration, and evaporation. It usually consists of subcarbonate of potass, sulphate of potass, chloride of potassium, silice, oxide of iron, &c.

From the ashes of lees of wine, and from vine twigs a much purer alkali is obtained. It is called *Cinis infecto'rius, C. facium, Cin'eres clavellati, Alu'men facium, Cendres gratèlées, Cendres de sarment, Cineres clavellati.*

Another variety of the alkali is afforded by burning argol in a crucible; afterwards powdering and calcining it, till it is nearly white; then dissolving in water, filtering and evaporating. It is called *Salt of tartar*, *Sal Tartari*, *Kali præparatum e tartaro*, *Kali e tartaro*, *Subcarbonas potassæ purissimus*, *Potassæ Subcarbonas e tartaro*. Lastly, when wormwood is burnt to ashes, dissolved in water, filtered and evaporated to dryness, it affords another variety of vegetable alkali,—the *Sal absinthii* or *Salt of wormwood*.

Impure potass is used for preparing the subcarbonate for medical use.

POTASS, ACETATE OF, *Potassæ acetat*—p. Bisulphate of, *Potassæ supersulphas*—p. Bitartrate of, *Potassæ supertartas*—p. Carbonate of, *Potassæ carbonas*—p. Euchlorate of, *Potassæ murias hyperoxygenatus*—p. Fused, *Potassa fusa*—p. Hydriodate of, *Potassæ hydriodas*—p. and Iron, tartrate of, *Ferrum tartarizatum*—p. with Lime, *Potassa cum calce*—p. Mephite of, *Potassæ subcarbonas*—p. Muriate of, *Potassæ murias*—p. Nitrate of, *Potassæ nitras*—p. Oxymuriate of, *Potassæ murias hyperoxygenatus*—p. Subcarbonate of, *Potassæ subcarbonas*—p. Sulphate of, *Potassæ sulphas*—p. Sulphate of, acid, *Potassæ supersulphas*—p. Sulphuret of, *Potassæ sulphuretum*—p. Supercarbonate of, *Potassæ carbonas*—p. Supersulphate of, *Potassæ supersulphas*—p. Supertartrate of, *Potassæ supertartas*—p. Tartrate of, *Potassæ tartras*.

POTASS AND SODA, TARTRATE OF, *Soda, tartrate of*.

POTASSA, Potash, *P. fusa*—p. Acidulus, *Potass, oxalate of*—p. Basicus, *Potass, oxalate of*—p. Bicarbonas, *P. carbonas*—p. Carbonas, *P. subcarbonas*—p. Carbonas impurus, Potash of commerce—p. Chloras, *P. murias hyperoxygenatus*—p. Chloruretum oxydatum, *P. murias hyperoxygenatus*.

POTASSA CUM CALCĒ, *Potass with lime, Calx cum kali puro, Causiticum communē fortius, Lapis infernalis sive septicus, Kali causiticum cum calcē, Potassu opē calcis purata et ignē fusa, Lapis causiticus*, (F.) *Potasse préparée avec la chaux, P. à la chaux, Pierre caustique*. (*Liquor. potassæ* liij, *calcis recent.* lbj. Boil the solution of potass to lbj; then add the lime, slaked with water, and mix. *Ph. L.*) Used for the same purposes as the next, but more manageable; being less deliquescent.

POTASSA, FERROCYANATE OF, *Potassii Ferrocyuretum*—p. Ferroprussiate of, *Potassii ferrocyuretum*.

POTASSA FUSA, *Potassa, Kali causiticum, Fused potass, Causiticum communē acerimum, Kali purum, Alkali vegetabile fixum causiticum, Causiticum alkalinum, C. communē, C. potentillæ, C. salinum, Hydras kalicum, Hydras potassæ puræ fuse, Lapis causiticus, Lapis causticus chirurgorum, Lapis infernalis alcalinus, L. septicus, Ruptorium communē*, (F.) *Potasse caustique*. (Prepared by evaporating the solution of potass to dryness in an iron vessel.) This preparation is generally run into cylindrical moulds, covered with paper, and kept in well corked vessels. It is powerfully escharotic, and is used for forming issues, curing strictures, &c.

POTASSA, HYDROBROMATE OF, see Bromine—p. Hydrocyanate of, *Potassii cyanuretum*—p. Hyperoxalas, *Potass, oxalate of*—p. Hypertar-

tras, *P. supertartas*—p. Impura, Potash of commerce—p. Liquida, *Liquor potassæ*—p. Ope calcis parata et igne fusa, *Potassa cum calce*—p. Prussiate of, *Potassii ferrocyuretum*.

POTASSÆ ACETAS, *Acetas kali, Oxytartarus, Acetas lixivix seu kalicum, Alkali tartari acetosaturatum, Alkali vegetabile cum aceto, Magisterium tartari purgans, Terra foliata Tartari, Kali acetatum, Sal diureticus, Sal Sennerii, Acetate of potass, Arcnum tartari*. (*Acid. acetic.* Oj, *Potassæ carbon. q. s.* Mix and add, by degrees, enough acetic acid to saturate the alkali. Then filter and evaporate till a pellicle is formed, which is to be dried upon bibulous paper; evaporate again in a water bath, and, removing the pellicles, dry them.—*Ph. U. S.*)

It is cathartic and diuretic. Dose, ʒj to ʒij or more.

POTASSÆ BICARBONAS, *Potassæ carbonas*—p. Bitartas, *P. supertartas*.

POTASSÆ CARBONAS, *Kali aëratum, Bicarbons potassæ, Potassæ bicarbonas*, (Ph. U. S.) *Deutocarbonas potassii, Carbonate of potass, Supercarbonate of potass*. This is not caustic, like the subcarbonate of potass, and hence, has been preferred to relieve acidity. (*Potass. carbon. liiv, Aquæ destillat.* Ox. Pass carbonic acid through the solution until it is saturated, and filter. Evaporate at a heat, not exceeding 160°, and dry the crystals on bibulous paper. Carbonic acid is obtained from marble by the addition of dilute sulphuric acid.—*Ph. U. S.*) Dose, gr. x to ʒss. It is used in forming the soda powders, as well as for its antacid properties.

POTASSÆ CARBONAS, (Ph. U. S.) *P. Subcarbonas*—p. Carbonas impurus, *P. Subcarbonas*—p. Carbonas purus, see *P. Subcarbonas*—p. et Ferri tartas, *Ferrum tartarizatum*.

POTASSÆ HYDRIODAS, *Potassii Protohydriodas, Potassii protoxidi hydriodas, Hydriodate of potass*. If a solution of potass be poured on iodine in its metallic state, an iodate and hydriodate are formed. These may be separated by means of alcohol, which only dissolves the latter of these salts. The hydriodate or rather the Iodide of Potassium, *Kalium Iodatum, Kali Hydriodinicum, K. Hydriodicum, Hydriodas Kalicus, Potassii Ioduretum*, may be obtained by evaporation. When the Iodide of Potassium is dissolved in water, it becomes the *Hydriodate of Potassa*. The following is the formula in the Pharm. U. S. *Iodin. ʒvj; Ferri rament. ʒiij, Potass. carbon. ʒiv*, vel q. s. *Aquæ destillat.* Oiv. Mix the Iodine with three pints of the distilled water, and add the iron filings, stirring frequently with a spatula for half an hour. Apply a gentle heat, and when the liquor assumes a greenish colour, add gradually the carbonate of potass, previously dissolved in half a pint of the water, until it ceases to cause a precipitate. Continue the heat for half an hour, and filter. Wash the residuum with half a pint of the distilled water, boiling hot, and filter. Mix the filtered liquors, and evaporate, that crystals may form. Pour off the liquid, and dry the crystals on bibulous paper. The hydriodate of soda is made in the same way. Virtues,—those of iodine, (q. v.)

POTASSÆ MURIAS, *Sal Digestivus vel Sal febrifugus Sylvii, Muriate of Potass, Spiritus salis marini coagulatus*. Bitter and refrigerant.

POTASSÆ MURIAS HYPEROXYGENATUS, *Po-*

tassæ Chloras, P. oxymurias, Oxymuriate of potass, Euchlorate of potass, Alcali vegetabile sal'to-dephlogistica'tum, Chloruretum potassæ oxydatum, Haloidum oxygenatum, Ozoge'no-chlorure'tum potas'sii, Protochlorate of potassium, Kali chloricum, Chloras Kalicus depuratus. It has been regarded as antineuropathic, and as an alterative purifier of the blood and humours. It is of doubtful efficacy. Dose 3 to 6 grains or more.

POTASSÆ NITRAS, *Nitrate of Potass, Nitrum, Sal nitrum, Nitre, Saltpetre, Sal petrae, Salse'do mucrum, Sanguinea, Berenic'ium, Halinitrum, Protonitrate of Potas'sium, Nitrate of protoxide of Potas'sium, Kali nitricum, Nitras kalicum, Nitras liziv'ia.* Obtained from the putrefaction of animal matters, in contact with calcareous or alkaline earths, by elixivation; adding, if necessary, wood ashes to supply the alkaline basis. It is formed, in an impure state, by nature, in warm climates.

It is diuretic and refrigerant, and, in large doses, purgative; externally, cooling and detergent. Dose, gr. x to ʒss. In large doses, it is an acrid poison.

POTASSÆ NITRAS FUSUS SULPHA'TIS PAUCILLO MIXTUS; *Sal prunellæ, Crystal'lus minera'lis, Nitras potassæ cum sulphure fusus, Nitrum tabula'tum, Lapis prunellæ, Sore-throat salt, Mineral crystal, Anodynum minera'le.* Nitrate of potass, mixed with a little sulphate of potass and run into moulds. Its properties are those of nitre.

POTASSÆ OX'ALAS, *Superoxalate of Protoxide of Potas'sium, Ox'alas Acidulum Potas'sæ seu Potas'sæ acidulus seu bas'icus, Superox'alas kal'icum, S. Potassæ, Hyperox'alas Potassæ, Sal Acetosellæ, Oxa'dium, Kali oxal'icum acidulum, Ox'alas subpotas'sicus, Oxalate of Potass, Salt of sorrel.* Prepared from the juice of wood sorrel. It is refrigerant and is used to make lemonade, &c.

POTASSÆ OXALAS ACIDULUM, Potass, oxalate of—p. Oxymurias, P. murias hyperoxygenatus—p. Puræ fusæ hydras, Potassa fusa—p. et Sodæ tartras, Soda, tartrate of.

POTASSÆ SUBCAR'BNAS, P. Carbonas (Ph. U. S.), *Subcarbonas Kali, Carbonas Potassæ, Kali præparatum, Sal Herbarum, Calcareous Tartar, Sal Plantarum, Subcarbonate of Potass, Sal Tartari, Sal Absinthii, Mephite of potass, &c.* (See Potash.) A filtered solution of the impure subcarbonate, *Potas'sæ carbonas impurus* (Ph. U. S.) Pearl-ash (See Potash,) evaporated to dryness. This deliquescent salt is given in the same cases as the potassæ carbonas, than which it is more caustic and disagreeable.

The Parisian codex has a *Subcarbonas Potassæ ex tartaro combusto, vulgo Sal Tartari* or *Salt of Tartar*;—a *Subcarbonas Potassæ ex deflagrantibus simul tartrate acidulo et Nitrate Potassæ paratus, vulgo Nitrum ex tartaro fixum*, which is the *Potassæ carbonas purus* or *Salt of Tartar* of the Pharmacopœia of the United States,—and a *Subcarbonas Potassæ ex deflagrante cum Carbonibus Nitrate Potassæ paratus, vulgo Nitrum fixum*. They are all used like the preceding.

POTASSÆ SUBCARBONAS IMPURUS, Potash of commerce.

POTASSÆ SULPHAS, *Kali vitriola'tum, Sulphas Kali, Kali sulphuricum, Lixiv'ia vitriola'ta, Ni-*

trum vitriolatum Schroederi, Sal Sapien'tiæ, Sal Tartari Sulphuratum, Specificum Paracelsi, Spiritus vitrioli coagulatus Mynsichti, Protosulphate of Potas'sium, Al'kali vegetabile vitriolatum, Sal de duobus, Arcanum duplicatum Nitrum vitriola'tum, Tartarum vitriolatum, Puncæ'a Ducis Holsu'tiæ, Panacæ'a duplicata, Sal Polychrestus, Sulphate of Potass. (The salt that remains after the distillation of nitric acid, dissolved; the excess of acid saturated with subcarbonate of potass and crystallized.) Purgative and diuretic. Dose ʒss to ʒj as a laxative; ʒss to ʒvj, as a purge.

POTASSÆ SULPHAS CUM SULPHURÆ; *Sal Polychrestus Glaseri, Lixiv'ia Vitriola'ta Sulphurea.* (Formed by deflagrating nitrate of potass with sublimed sulphur.) Same virtues as the last. Dose, gr. xv to xxx.

POTASSÆ SULPHURE'TUM, *Potas'sii Sulphure'tum, Kali sulphure'tum, Hepar Sulphuris salinum, H. sulphuris vulgare, Sulphure'tum liziv'ia, S. kal'icum, Hepar Sulphuris, Liver of Sulphur, Sulphuret of Potass, (F.) Foie de Soufre.* (Sulphur. lot. ʒj, Potassæ carb. ʒij. Rub them together and place the mixture in a covered crucible upon the fire until they unite.) It has been employed, in affections of the chest, as an expectorant, in the dose of from ʒss to ʒj, largely diluted; but it is chiefly used as a bath or wash in cases of itch, tinea capitis, and other cutaneous affections.

POTASSÆ SUPEROXALAS, Potass, oxalate of—p. Tartras acidulus purus, P. supertartras—p. Tartras stibialis seu stibiosus, Antimonium tartarizatum.

POTASSÆ SUPERSULPHAS, *Supersulphate of Potass, Sal febrifugus of Lemery, Acid Sulphate of Potass, Bisulphate of Potass, Super-protosulphate of Potas'sium.* (The salt remaining after the distillation of nitric acid, dissolved, strained, and crystallized.) It is refrigerant and purgative. Dose ʒss to ʒij.

POTASSÆ SUPERTARTRAS IMPURUS, *Tartarus crudus, Tartarum, Lapis vini magnet'us, Pedagra, (F.) Tartre cru, T. brut.* It is called, also, *Tartarum rubrum* and *Red Argol*, when obtained from red wines; *Tartarum album* or *White Argol*, when from white wines. Tartar is the saline deposit from wines as they become aged; which attaches itself to the sides of the casks and bottles, in which they are kept. It consists of a considerable quantity of acidulous tartrate of potass, tartrate of lime, silica, alumina, oxyd of iron, manganese, and a red colouring matter, if the wine be red. It is chiefly used for the preparation of cream of tartar.

POTASSÆ SUPERTARTRAS, *Crystalli Tartari, Tartras Acidulus Potassæ purus, Supertartrate of Protoxide of Potas'sium, Potas'sæ Bitartras, (Ph. U. S.) Bitartrate of Potass, Hypertartras Potassæ, Tartras superpotas'sicus, T. subpotas'sicus, Crystals of Tartar, Cremor Tartari, Cream of Tartar* (when in powder,) *Supertartrate of Potass. (F.) Crème de Tartre.* (The tartar of wine purified.) It requires 120 parts of water at 60° to dissolve it. It is mildly purgative, refrigerant, and diuretic. Dissolved in water, with a small quantity of white wine, some sugar and lemon peel, it forms an agreeable beverage in febrile diseases, under the name of *imperial*. Dose, as a diuretic, ʒj to ʒij; as a purgative ʒss to ʒj.

POTASSÆ TARTRAS, *Kali tartarizatum, Al'kali*

fixum tartarisatum, Tartarum solu'bile, Tartarus tartarizatus, Lixiv'ia Tartarisa'ta, Sal Panchres'tum, Tartras Kalinus, T. lixiv'ia, Sal vegetab'ilis, Alkali vegetab'ile tartarizatum, Turtrate of Potass, Soluble Tartar, (Potassæ carbon. Z_{xvj} ; Potassæ Bitartrat. in pulv. subtiliss. lbij , vel q. s., aquæ bullientis, cong. Dissolve the carbonate of potassa in the water, add the bitartrate to saturation and boil; filter, evaporate till a pellicle forms and set aside to crystallize. Pour off the liquid; dry the crystals on bibulous paper, and keep in closely stopped bottles —Ph. U. S.) A saline cathartic in the dose of ʒij to ʒj .

POTASSE CAUSTIQUE, Potassa fusa—p. à la Chaux, Potassa cum calce—p. Liquide, Liquor potassæ—p. Préparée avec la chaux, Potassa cum calce.

POTASSII CYANURETUM, *P. Cyan'idum, Cyanuret of Potassium, Hydrocyanate of Potassa, (Potassii Ferrocyanur., in pulv. Z_{vii} ; Aquæ destillat. f. Z_{vj} . Expose the Ferrocyanuret to a moderate heat until it becomes nearly white, and is deprived of its water of crystallization. Put the residue in an earthen retort, with the beak loosely stopped, and expose it to a red heat for two hours, or till gas ceases to be disengaged. Take the retort from the fire, close the orifice with lute, and let the whole remain till cold. Break the retort, reduce the black mass to coarse powder, put it into a twelve ounce bottle, and add the distilled water. Agitate occasionally for half an hour; throw it on a filter, evaporate the filtered solution to dryness, and keep the dry mass in a closely stopped bottle—Ph. U. S.) Used in the same cases as the hydrocyanic acid. Dose, a quarter of a grain.*

POTASSII CYANIDUM, *P. Cyanuretum—p. Deuto-carbonas, Potassæ carbonas.*

POTASSII FERROCYNANURETUM, *P. Ferrocyan'idum, Ferrocyan'uret of Potassium, Ferrocyanate of Potassa, Ferropur'ssiate of Potassa, Prussiate of Potassa, (F.) Protocyanure jaune de fer et de potassium. The yellow double cyanuret of potassium and iron, the salt from which the cyanuret of potassium is obtained by calcination. It is not much used in medicine. It has been advised as an astringent in the collicative sweats of phthisis, in leucorrhœa, &c.; but it does not seem to be possessed of much activity. Dose, 10 or 15 grains every four or five hours.*

POTASSII HYDRARGYRO-IODIDUM, see Iodine—p. Ioduretum, see Potassæ hydriodas—p. Oxygenochloruretum, Potassæ murias hyperoxygenatus—p. Protohydriodas, Potassæ hydriodas—p. Protoxidi hydriodas, Potassæ hydriodas—p. Sulphuretum, Potassæ sulphuretum.

POTASSIUM, CYANURET OF, Potassii cyanuretum—p. Ferrocyanuret of, Potassii ferrocyanuretum—p. Iodide of, see Iodine and Potassii Iodidum—p. Iodide of, see Potassæ hydriodas—p. Iodo-hydrargyrate of, see Iodine—p. Proto-arsenite of, Arsenite of protoxide of potassium—p. Protochlorate of, Potassæ murias hyperoxygenatus—p. Protonitrate of, Potassæ nitras—p. Protoxide of, nitrate of, Potassæ nitras—p. Protoxide of, superoxalate of, Potassæ oxalate of—p. Protoxide of, supertartrate of, Potassæ supertartras—p. Protosulphate of, Potassæ sulphas—p. Sulphuret of, Potassæ sulphuretum—p. Superprotosulphate of, Potassæ supersulphas.

POTATO, Solanum tuberosum—p. Fly, Lytta vittata—p. Spanish, Convolvulus batatas—p. Sweet, Convolvulus batatas—p. Vine, wild, Convolvulus panduratus—p. Wild, Convolvulus panduratus.

POTELÉE, Hyoscyamus.

POTENTIA, Force.

POTENT'IAL, *Potentia'lis*, from *potens*, 'able.' An epithet for remedies, which, although energetic, do not act till some time after their application. The caustic alkalies, for instance, are called *Potential cauteries* in contradistinction to the hot iron, which is termed *actual*.

POTENTILLA ANSERINA, *Argentine, Chenobos'con, Argenta'ria, Anser'na, Silver Weed, Wild Tansey. (F.) Argentine, Potentille.* The leaves are mildly astringent and tonic.

POTENTILLA REPTANS; *Pentaphyllum, Quinquifolium, Common cinquefoil. (F.) Quinfeuille.* The roots are possessed of astringent properties.

POTENTILLA TORMENTILLA, Tormentilla.

POTERIUM SANGUISORBA, Pimpinella saxifraga.

POTEX, Anus.

POTHOS FETIDA, Dracontium fœtidum.

POTIMOS, Potable.

POTIO CALCIS CARBONATIS, *Mistura cretæ*—p. Effervescens anti-emetica, *Potion of Riverius*—p. Leniens, Looch ex ovo—p. Oleosa, Looch ex ovo—p. Picea, see Pinus sylvestris.

POTION, *Potio*; from *poto*, 'I drink.' A liquid medicine, from 4 to 8 ounces or more in quantity, the composition of which varies, and which is administered in divided doses. It corresponds to the English *mixture*. (q. v.)

POTION PECTORALE, Looch ex ovo.

POTION OF RIVERIUS. A mixture of *Lemon Juice* and *Subcarbonate of Potass*,—generally given in a state of effervescence. It is the *Potio effervescens anti-emetica dicta Riverii*, of the Parisian codex. The name, in the codex, indicates its use.

POTIRON, Cucurbita pepo.

POTOS, Potable.

POTUS, Drink—p. Hippocraticus, Claret.

POU, Pediculus.

POUCE, Pollex, see Digitus.

POUDRE, Powder, Pulvis—p. *Absorbante et anti-acide*, p. Pulvis de magnesia compositus—p. *d'Alun composée*, Pulvis sulphatis aluminæ compositus—p. *Antiarthritique amère*, Pulvis de amaris compositus—p. *Antiasthmatique*, Pulvis de sulphure et scillâ—p. *Antimoniale composée* ou de James, Antimonial powder—p. *Aromaticque*, Pulvis cinnamomi compositus—p. *d'Asarum composée dite sternutatoire*, Pulvis asari compositus—p. *Balsamique*, Pulvis myrrhæ compositus—p. de Birekmann, Pulvis de aro compositus—p. de Cannelle composée, Pulvis cinnamomi compositus—p. *Cathartique*, Pulvis scammonæ compositus—p. de Chypre, see Cladonia rangiferina—p. du Comte de Palme, Magnesie carbonas—p. Styptique*, Pulvis sulphatis aluminæ compositus.

POUDRE SUBLIL DE DELCROIX. A fashionable depilatory "for removing superfluous hair in less than ten minutes." It is said to consist of *Quicklime* and *Sulphuret of Arsenic*, with some vegetable powder.—Paris.

POUDRE TEMPERANTE DE STAHL. Pulvis de sulphate potassæ compositus—*p. de Valentinii*, Magnesite carbonas—*p. Vermifuge mercurielle*, Pulvis e sulphureto hydrargyri nigro et scammonio—*p. Vermifuge sans mercure*, Pulvis ex helminthocorto compositus.

POUGRES, MINERAL WATERS OF. These alkaline waters are in the department of Nièvre, France. They contain carbonic acid, carbonates of soda, lime and magnesia; chloride of sodium; alumina and silica, with protoxide of iron.

POULAIN, Bubo.

POULET (VIN DE,) (F.) *Pullet Wine.* A disgusting preparation, made by infusing the excrement of the pullet in white wine. According to Nysten, it is employed by the vulgar in France in a number of diseases, and especially in falls, contusions, &c.

POULIOT, *Mentha pulegium.*

POULS, Pulse—*p. Abdominal*, Pulsus inferior—*p. des Adultes*, Pulse, natural—*p. Agité*, Pulsus fortis—*p. Bas*, Pulse, low—*p. Capital*, Pulse, nasal—*p. Combiné*, Pulse, complex—*p. Earl of Warwick's*, Pulvis cornachini—*p. of Ethiopia*, Powder of Ethiopia.

POWDER OF FAYNARD. A celebrated powder for arresting hemorrhage, said to be nothing more than the charcoal of beech wood finely pulverized.

POWDER, FEVER, SCHWANBERG'S, Antimonial powder—*p. Ginger-beer*, see *Anomum zingiber*—*p. Gout*, Duke of Portland's—*p. Pulvis Duci Portlandiæ*—*p. of Burnt hartshorn with opium*, Pulvis cornu cervi cum opio—*p. Ipecacuanha* compound, Pulvis ipecacuanhæ compositus—*p. of Jalap*, compound, Pulvis jalapæ compositus—*p. James's*, factitious, Antimonial powder—*p. Jesuits'*, Cinchona—*p. of Kino*, compound, Pulvis kino compositus—*p. Lemonade*, see *Lemonade*—*p. of Magnesia*, compound, Pulvis de magnesiâ compositus—*p. of the Marquis*, Marchionis pulvis—*p. Mead's*, against the bite of a Mad dog, Pulvis antilyssus—*p. Myrrh*, compound, Pulvis myrrhæ compositus—*p. Scammony and aloes*, Pulvis scammonii cum aloë—*p. Scammony*, compound, Pulvis scammonia compositus—*p. of Senna*, compound, Pulvis sennæ compositus—*p. Sneezing*, see *Veratrum album*—*p. Spruce beer*, see *Spruce beer*—*p. Tennant's*, Calcis chloridum—*p. Tooth*, Dentifricium—*p. Tragacanth*, compound, Pulvis tragacanthæ compositus.

POWDERS, CASTILLON, so called from the name of the physician who first proposed them. They are formed of *sugo*, in powder; *sulep*, in powder; *tragacanth*, in powder, of each, four parts; *prepared oysters shells*, one part, *cochineal*,

half a part, divided into powders of one dram each; one of which is given three or four times a day as a demulcent in diarrhœa and dysentery.

POWDERS, SODA. *Sodæ carb.* ʒss, in each *blue* paper; *tartaric acid*, gr. xxv, in each *white* paper; for half a pint of water. A pleasant, cooling drink; taken during the effervescence.

POWER, Faculty—p. Inherent, Irritability—p. Tonic, Irritability.

POX, Syphilis, Variola—p. Chicken, Variella—p. French, Syphilis—p. Noddy, Syphilomania—p. Small, Variola—p. Swine, see Variella—p. Water, see Varicella.

POZZUOLI, MINERAL WATERS OF.

Pozzuoli is in the neighbourhood of Naples. The springs are, 1. *Acqua della pietra*, Temp. 91° Fah. 2. *Acqua di Calcalanti*, Temp. 100°, *A. di subteni homini*, Temp. 102°, *A. del cantarello*, Temp. 86 to 89; and that of the Temple of Serapis in Pozzuoli, Temp. 102 to 107. The last contains carbonic acid, carbonates of lime, magnesia, alumina, and iron, carbonate of soda, chloride of sodium, sulphate of lime, and silica.

PRACTICE OF PHYSIC, Therapeutics.

PRACTITIONER, GENERAL, Surgeon apothecary.

PRÆBIUM, Dose.

PRÆCIPITANS MAGNUM, Sepia.

PRÆCIPITATUM ALBUM, Hydrargyrum præcipitatum.

PRÆCIPITATUS RUBER, Hydrargyri nitrico-oxydum.

PRÆCISIO, Circumcision.

PRÆCOCIA, Prunus Armeniaca.

PRÆCOCITY, Præotia.

PRÆCOGNITIO, Prognosis.

PRÆCORDIA, from præ, 'before,' and cor, 'the heart.' The diaphragm: (q. v.) also, the abdominal viscera, and the epigastrium.

PRÆCORDIAL REGION is the epigastric region. Also, and more properly, the region of the heart.

PRÆCORDIUM, Fosse du cœur.

PRÆCOX MATURITAS, Præotia.

PRÆDICTIO, Prognosis.

PRÆFOCATIO, Orthopnœa, Suffocation—

p. Faucium, Angone—p. Matricis, Hysteria.

PRÆFECATION, Strangulatio uterina.

PRÆGNANS, Pregnant.

PRÆGNATIO, Pregnancy.

PRÆGUSTATIO, Acent-gout.

PRÆHENSIO, Prehension.

PRÆLINGUA, The anterior part or tip of the tongue.

PRÆLUM, Press.

PRÆLUMBARIS, Prelumbar.

PRÆPARATIO, Preparation.

PRÆPARATUM, Preparation.

PRÆPOTIO, Propotismos.

PRÆPUTIUM, Prepuce.

PRÆSCRIPTIO, Prescription.

PRÆSEMIOLUM, Alveolus.

PRÆSEPIUM, Alveolus.

PRÆSERVATORIA INDICATIO, A preservative indication: one proper for preventing the development of disease.

PRÆSPINALIS, Prespinal.

PRÆTIBIALIS, Pretibial.

PRASINUM VIRIDE, Cupri subacetis.

PRASINUS, Porraceous.

PRASITES, from præ-sium, 'horehound.' Wine, in which the leaves of horehound have been infused.

PRASIUM, Marrubium.

PRASUM, Allium Prasum.

PRAXIS, Action.

PRECIPITATE, RED, Hydrargyri nitrico-oxydum—p. white, Hydrargyrum præcipitatum.

PRECIPITATION, Præcipitatio, (F.) Précipité, from præcipitare, (præ, 'before,' and caput, 'the head,') 'to throw headlong.' The action by which a body abandons a liquid in which it is dissolved; and becomes deposited at the bottom of the vessel. The matter so thrown down, or precipitated, is called a *precipitate*.

PRÉCIPITATION DE LA MATRICE, Procidencia uteri.

PRÉCIPITÉ BLANC, Hydrargyrum præcipitatum.

PRECURSORY, Præcurso'rius; from præ, 'before,' and curro, cursum, 'I run.' That which precedes.

PRECURSORY or PREMON'ITORY SIGNS or SYMPTOMS, (F.) Signes précurseurs, S. avant-coureurs, are those which indicate an approaching disease.

PREDISPOSIT'ION, Prædispositio, from præ, 'before,' and disponere, 'to dispose.' That constitution or condition of the body, which disposes it to the action of disease under the application of an exciting cause. Thus, in hereditary diseases, the conformation is such, that but a slight exciting cause may be required to produce them. When the disease arises, solely, from the predisposition, or under the additional influence of an extremely slight, exciting cause, it is, by some, termed a *disposition*.

PREDOR'SAL, Prædorsalis, from præ, 'before,' and dorsum, 'the back.'

PREDORSAL REGION of the vertebral column is the anterior surface of the dorsal region.

PRÉ-DORSO ATLOIDIEN, Longus colli.

PREDORSO CERVICAL, Longus colli.

PREGNANCY, Utero-gestatio, Prægnatio, Imprægnatio, from præ, 'before,' and genere, 'to beget.' *Graviditas, En'cyon, Cye'sis, Encye'sis, Encymo'sia, Cyophoria, Gestatio, Fœtation.* (F.) *Grossesse.* The state of a female who has, within her ovary or womb, a fecundated germ, which gradually becomes developed in the latter receptacle. When placed in the cavity of the uterus,—by virtue of the vital principle which animates it, it becomes attached to the inner surface of that viscus, and obtains from it indirectly the nutriment, necessary for its gradual development, during the space of ten lunar months or 280 days,—the ordinary term of gestation, although the period may be protracted perhaps to 300 days,—at the expiration of which parturition occurs. Pregnancy is commonly limited to a single fœtus; at times, the uterus contains two or three.—See Reproduction. Occasionally, one or two moles—the degenerated products of conception—alone occupy the uterus—at other times, a fœtus likewise exists. In certain cases, and owing to accidental circumstances, the fecundated ovum remains in the ovarium, or is arrested in the Fallopian tube. Pregnancy has, accordingly, been distinguished into, 1. *Natural or uterine*, when the fœtus is carried in the cavity of the womb; and, 2. *Preternatural or extra-uterine.* *Exfœtation, Conceptio vitiosa.* (F.) *Grossesse contre nature.* *Paracy'sis seu Ecyc'sis, Dys-to'cia, Dyscye'sis extra-uteri'na*,—when it occurs in the ovarium, tube, or cavity of the abdomen.

During pregnancy, the female experiences remarkable changes in the condition of her organs and functions. The genital apparatus is, of course, most affected. The uterus changes its shape, situation, size, and texture. The usual signs of pregnancy are,—suppression of the catamenia; the abdomen gradually enlarging and forming a hard tumour; the umbilicus prominent in the latter months; the breasts increasing in size; the areola round the nipple becoming darker and the follicles more developed; a bluish tint of the vagina after the 4th week; about the 5th month, the evidence by *ballotement*, (q. v.) and the placental *souffle* and sound of the fetal heart heard on auscultation; the motion of the fœtus perceptible, and the neck of the uterus diminishing in length at the advanced periods.

PREGNANCY ABDOMINAL, *Eccyësis abdominalis*. (F.) *Grossesse abdominale*. That in which the ovum has escaped into the cavity of the abdomen.

PREGNANCY, AFÆTAL, *Pregnancy without a fœtus*, (F.) *Grossesse afatule*, *G. sans fœtus*. Pregnancy produced by a false or degenerate conception, or any other affection, which has given place to unusual development of the uterus. Madame Boivin includes in this class, *sarco-hysteria*, *hydro-hysteria*, *gazo-hysteria*, and *hemato-hysteria* pregnancies, (q. v.)

PREGNANCY, BIGEMINAL, (F.) *Grossesse bigéminal*, *Double pregnancy*. Pregnancy, in which there are twins in utero.—Madame Boivin.

PREGNANCY, COMPLEX, (F.) *Grossesse complexe*, *G. inter-extra-utérine*, is when the womb, besides a fœtus, contains much water, hydatids, a mole, &c.

PREGNANCY, COMPOUND, (F.) *Grossesse composée*, is when there are two or three fœtuses in the cavity of the uterus.

PREGNANCY, DOUBLE, *Pregnancy*, bigeminal—p. Extra uterine, see *Pregnancy*.

PREGNANCY, FALSE, *Graviditas spuria*, (F.) *Grossesse fausse ou apparente*, *Pseudocycyësis*. Authors have called thus different affections of a more or less serious character, which resemble pregnancy; so as, at times, to impose upon the best informed practitioners. These diseases may be seated in the uterus or its dependencies, in the intestines or some other part of the abdomen. They may be;—a mole, hydatids, water, blood, or polypus distending the parietes of the uterus:—chronic enlargement of the uterus; development of tumours, &c., in its substance:—scirrhus; dropsy of the ovaria; ascites; tympanites, &c.

PREGNANCY, FÆTAL, (F.) *Grossesse fatale*. Pregnancy, in which there is a fœtus, or more than one, in the uterus or out of it. Madame Boivin puts in this class—the *solitary*, *bigeminal*, *trigeminal*, and *sarco-fatal* pregnancies, which form the first order; and the *tubal*, *ovarial*, and *abdominal*, which constitute the second.

PREGNANCY, GAZO-HYSTERIC, (F.) *Grossesse Gazo-hystérique*. Afætal pregnancy, caused by development of air or gas in the cavity of the womb.—Madame Boivin.

PREGNANCY, HÆMATO-HYSTERIC, (F.) *Grossesse hémato-hystérique*. Afætal pregnancy, caused by accumulation of blood in the uterus.—Mad Boivin.

PREGNANCY, HYDRO-HYSTERIC, (F.) *Grossesse*

hydro-hystérique. Afætal pregnancy, occasioned by the secretion and accumulation of serous fluid in the uterus.

PREGNANCY, INTERSTITIAL, *Graviditas interstitialis*. The development of the embryo in the proper substance of the uterus. The case generally terminates fatally at an early period of gestation; the thin external paries of the uterus being ruptured, and the ovum passing into the abdominal cavity.

PREGNANCY, MORBID, *Paracyësis*, *Dystocia*, *Dyscyësis*. The progress of pregnancy disturbed or endangered by the supervention of general or local disorder.—Good.

PREGNANCY, OVARIAL, (F.) *Grossesse ovarienne* ou de l'ovaire, *Eccyësis ovaria*. Pregnancy in which the fœtus is developed in the interior of the ovary.

PREGNANCY, PRETENDED. The criminal act of a female, who, not having been delivered, presents an infant as having been born of her. (F.) *Supposition de part*. [This term, in French, likewise includes the case of a female, who, having been delivered of a dead child, substitutes for it a living child which is not hers.]

PREGNANCY, SARCO-FÆTAL, (F.) *Grossesse sarco-fœtale*. Pregnancy, in which there are one or more fœtuses, and one or more moles.—Mad. Boivin.

PREGNANCY, SARCO-HYSTERIC, (F.) *Grossesse Sarco-hystérique*. Afætal pregnancy formed by moles, hydatids, or a false conception.—Mad. Boivin.

PREGNANCY, SOLITARY, (F.) *Grossesse solitaire* ou simple. Pregnancy in which there is a single fœtus.—Mad. Boivin.

PREGNANCY, TRIGEMINAL, (F.) *Grossesse trigéminal* ou triple. Pregnancy in which there are three fœtuses in the cavity of the uterus.—Mad. Boivin.

PREGNANCY, TUBAL, (F.) *Grossesse tubaire*, *Eccyësis tubalis*. Pregnancy where the fœtus remains and is developed in the Fallopian tube.

PREGNANCY, UTERO-ABDOMINAL, (F.) *Grossesse utéro-abdominale*. Pregnancy consisting of two fœtuses; one in the uterus—the other in the abdominal cavity.—Mad. Boivin.

PREGNANCY, UTERO-OVARIAL, (F.) *Grossesse utéro-ovarienne*. Pregnancy with two fœtuses, one in the womb—the other in the ovary.

PREGNANCY, UTERO-TUBAL, (F.) *Grossesse utéro-tubaire*. Pregnancy in which there is, at the same time, a fœtus in the womb and another in the Fallopian tube.

PREGNANT, *Pregnans*, *Encarpos*, *Gravida*, *Plena mulier*, (F.) *Enceinte*. One in a state of pregnancy;—one with child.

PREHENSIO, Catalepsy, Epilepsy.

PREHENSION, *Præhensio*, from *prehendere*, 'to lay hold of.'

PREHENSION OF FOOD is the act of carrying it to the mouth, and introducing it into that cavity. It is, also, called *Assumptio*, *Proslep'sis*, *Prost-phora*.

PRÆLE, *Hippuris vulgaris*.

PRÆLOMBAIRE, Prelumbar.

PRÆLOMBO-PUBIEN, *Psoas paivus*—p. *Trochantin*. *Psoas magnus*.

PRELUM, Press.

PRELUMBAR, *Prælumb'ris*, (F.) *Prælombaire*, from *præ*, 'before,' and *lumbi*, 'the loins.' That which is placed before the loins. The

prelumbur surface of the spinal column is the anterior surface of the lumbar portion.

PREMONITORY. See Precursory.

PREPARATION, *Præparatio*, from *præ*, 'before,' and *parare*, *paratum*, 'to get ready.' The act of making ready any substance whatever that has to be employed for any purpose.

Also, the product of any pharmaceutical operation;—*Præparatum*.

Any part of the human body, preserved for the uses of the anatomist, is so called.

PREPUCE: *Præputium*, perhaps from *πρεος*, and *ποσθη*, 'the foreskin,' *Epagotgium*, *Posthæ*, *Foreskin*. The prolongation of the integuments of the penis, which covers the glans. The prepuce is composed of two membranous layers: one external or cutaneous; the other internal or mucous, separated by cellular membrane. The mucous membrane lines the inner surface of the cutaneous layer till beyond the glans, when it is reflected over the latter: forming, behind the corona, a small *cul-de-sac* above the corpora cavernosa, which is interrupted by a triangular duplicature of the mucous membrane, called the *frænum*, fixed in the furrow at the inferior part of the glans, and terminating at a little distance from the orifice of the urethra. The clitoris is covered by a semilunar fold formed by a continuation of the skin of the labia. It is called, *Præputium clitoridis*.

PRESBYOPIA, Presbytia.

PRESBYTIA, *Presbyopia*, *Amblyopia proximum*, *Visus senilis*, (F.) *Vue longue*, from *πρεσβυς*, 'an old person.' A condition of vision, common in old persons, which consists in the circumstance of near objects being confusedly seen, whilst those at a greater distance are clearly distinguished. It is supposed to depend generally on diminution of the convexity of the cornea; whence results an alteration in the convergency of the rays, so that they form a focus behind the retina. This defect is remedied by the use of convex glasses, which augment the convergence of the luminous rays. It is, also, called *Long-sightedness*, *Paropsis longinqua*, *Dysopia proximum*.

PRESCRIPTION, *Præscriptio*, *Anagraphæ*, from *præ*, 'before,' and *scribere*, 'to write.' *Formula*, (F.) *Formule*, *Ordonnance*. The formula which the physician writes for the composition of medicine, adapted to any case of disease. A prescription should be as simple as possible, and should bear upon its face the evidence of the objects to be fulfilled by it. No article should form part of it, unless adapted for serving some useful purpose. A prescription has been divided into four parts:—the *basis* or principal ingredient of the prescription; the *adjuvans*, or that which is designed to promote the action of the former; the *corrigens*, or that intended to correct its operation or obviate any unpleasant symptom, which it may be apt to produce; and the *constituens*, *excipient*, or substance which gives to the other ingredients consistency or form. All these are seen in the following formula for cathartic pills:—

℞ Aloes,	ʒj.	<i>Basis.</i>
Hyd. Chlorid. mit.	gr. x.	<i>Adjuvans.</i>
Olei Carui,	gtt. v.	<i>Corrigens.</i>
Syrupi,	q. s.	<i>Constituens.</i>

fiant Pilulæ xx.

It is obvious, however, that most prescriptions are more simple than this. The basis, for ex-

ample, may require neither adjuvant, corrigent, nor constituent.

Dr. Paris has given the following synopsis of the principles of medicinal combination, which may serve as an instructive guide to the prescriber:—

OBJECT I.

TO PROMOTE THE ACTION OF THE BASIS.

A. By combining the several different forms or preparations of the *same substance*. *B.* By combining the basis with substances which are of the same nature; i. e. which are individually capable of producing the same effects, but with less energy than when in combination with each other. *C.* By combining the basis with substances of a *different nature*, and which do not exert any chymical influence upon it, but are found by experience, or inferred by analogy, to be capable of rendering the stomach or system more susceptible of its action.

OBJECT II.

TO CORRECT THE OPERATION OF THE BASIS BY OBVIATING ANY UNPLEASANT EFFECTS IT MIGHT BE LIKELY TO OCCASION, AND WHICH WOULD PERVERT ITS INTENDED ACTION, AND DEFEAT THE OBJECT OF ITS EXHIBITION.

A. By *chymically* neutralizing or *mechanically* separating the offending ingredient. *B.* By adding some substance calculated to guard the stomach or system against its deleterious effects.

OBJECT III.

TO OBTAIN THE JOINT OPERATION OF TWO OR MORE MEDICINES.

A. By uniting those medicines, which are calculated to produce the *same ultimate* results, but by modes of operation totally different. *B.* By combining medicines, which have entirely different powers; and which are required to obviate different symptoms, or to answer different indications.

OBJECT IV.

TO OBTAIN A NEW AND ACTIVE REMEDY, NOT AFFORDED BY ANY SINGLE SUBSTANCE.

A. By combining medicines, which excite different actions in the stomach and system, in consequence of which *new* or *modified results* are produced. *B.* By combining substances, which have the property of acting *chymically* upon each other: the results of which are:—*a.* The formation of new compounds; *b.* The decomposition of the original ingredients, and the development of the more active elements. *C.* By combining substances, between which no other change is induced than a diminution or increase in the *solubility* of the principles in which their medicinal virtues reside. *a.* By the intervention of substances that act *chymically*. *b.* By the addition of ingredients, whose operation is entirely *mechanical*.

OBJECT V.

TO AFFORD AN ELIGIBLE FORM.

a. By which the *efficacy* of the remedy is enhanced. *b.* By which its *aspect* or *flavour* is rendered more agreeable, or its mode of administration more convenient. *c.* By which it is *preserved* from the spontaneous decomposition to which it is liable.

[The vocabulary in the Author's "Medical Student," p. 117, Philad. 1837, will aid the student, not only in translating, but in writing his prescriptions *more solito*]

PRESENTATION, from (Lat.) *præsens*, (*præ*,

'before,' and *ens*, 'being.') The part of a foetus which is felt *presenting*, on an examination *per vaginam*. When the head presents, and especially the vertex, or the feet, knees, or breech, the presentation is said to be *natural*: when any other part, *preternatural*: and the labour is styled *perverse*, or *preternatural*, *Parodynia per-versa*, *Dystocia perver-sa*, *Cross-birth*, (F.) *Accouchement contre nature*. When any part, besides the head, feet, knees, or breech presents, the operation of *turning* (q. v.) becomes necessary. See Parturition.

PRESIS, Swelling.

PRESLE, *Hippuris vulgaris*.

PRESPI'NAL, *Præspinalis*, from *præ*, 'before,' and *spina*, 'the spine.' That which is situate before the spine. The prespinal surface of the vertebral column is the anterior surface.

PRESS, *Prælum*, *Prelum*, *Pressorium*, *Piest-ter*, *Piestériou*, (F.) *Pressoir*, *Presse*. An instrument for subjecting matters to considerable pressure, for the purpose of separating their juices or oils.

Press of Herophilus, Torcular Herophilii.

PRESSE-ARTÈRE. An instrument invented by Deschamps for the immediate compression of arteries. It is composed of a plate, 6 or 7 lines long, and 3 broad, and of a rod or stem, 2 inches long, placed perpendicularly above the plate and riveted. At each extremity of the plate is a hole, through which each of the ends of the ligature, to be placed upon the artery, is passed. The ligature is then to be tightened by drawing the ends, and fixing them to the perpendicular rod. This *presse-artère* or *serre-artère*, surrounded with charpie, remains in the wound, until there is no longer danger of hemorrhage. The ligature is then cut, and the instrument withdrawn. It is an unnecessary instrument.

PRESSE-URÈTHRE, *Jugum Penis*. A kind of forceps of elastic iron, the branches of which, padded, may be approximated or separated by means of a screw. The penis is introduced between the branches, one of them being applied to the urethra, and the screw is tightened so as to exercise a degree of pressure, sufficient to bring the parietes of the canal in contact. This instrument is sometimes used in incontinence of urine, to prevent the constant discharge of that fluid.

PRESSIO, Pressure.

PRESSIO'N ABDOMINALE, Pressure abdominal.

PRESSOIR, Press—p. d'*Hérophile*, Torcular Herophilii.

PRESSORIUM, Press.

PRESSURE, *Pressio*, from *premo*, *pressum*, 'I press.' The action of pressing.

ABDOMINAL PRESSURE, (F.) *Pression abdominale*. A mode of examination, by means of which the sensibility, size, suppleness, or hardness of any morbid abdominal viscus may be compared, in these respects, with its healthy condition. Bichat proposed, with the view of exploring the state of the thoracic organs, to exert a pressure from below upwards on the abdominal organs, so as to crowd them upon the diaphragm, and thus to diminish the dimensions of the cavity of the chest, noticing to what extent respiration was affected by this action. No great information can, of course, be derived from it.

PRETIBIAL, *Prætibiālis*, from *præ*, 'before,' and *tibia*, 'the tibia.' That which is situate before the tibia; as the *ilio-pretibial* and *ischio-pretibial* muscles.

PREVENTIVE, **ROYAL**; from *prævenire*, (*præ*, and *venire*,) 'to come before.' An empi-ric preparation used as a prophylactic against the venereal virus. It is a solution of acetate of lead—the *Liquor Plumbi Subacetatis dilutus*, (q. v.)

PRIAPEIA, *Nicotiana rustica*.

PRIAPIS'COS. Same etymon as the next. Name of a piece of wood, which forms part of the *scannum Hippocraticum*. Paulus of Ægina calls thus a tent of linen shaped like the penis.

PRIAPIS'MUS, *Tenti'go*, *T. Penis*, *Pri'apism*, *Horn-colic* (vulg.), *Euta'sia Priapis'mus*, *Rhoyalis'mus*, *Satyri'asis*, (q. v.) from *ἵππας*, *Priapus*, 'the male organ.' Constant and distressing erection, without any voluptuous idea or desire for venery. It is often symptomatic; and sometimes the immediate result of morbid causes,—of the action of cantharides, for example. The application of cold liquids to the penis, and the internal use of opium and camphor are the means usually had recourse to for its removal.

PRIAPUS, **Penis**—p. Cervi, see Cervus—p. Ceti, Leviathan penis.

PRICKING. Sax *præccian*, (D) *pricken*, (F.) *Picotement*. A variety of pain, compared to that which pointed bodies would occasion.

PRIDE OF CHINA, *Melia azedarach*—p. of India, *Melia azedarach*.

PRIME VÆ. The first passages. The stomach and intestinal canal:—the lacteals being the *secundæ viæ*, or second passages.

PRIME VÆ, Ways, digestive.

PRIME-VERE, *Primula veris*.

PRIMIP'ARA, from *primus*, 'first,' and *parere*, 'to bring forth.' A name given to females, who bring forth for the first time.

PRIMI-STERNAL, *Primi-sterna'lis*, from *primus*, 'the first,' and *sternum*, 'the sternum.' M. Bèclard has called os *primi-sternal*, or *clavisternal*, the first bony portion of the sternum.

PRIMIT'VÆ. The first waters, or the waters discharged before the extrusion of the foetus.

PRIMROSE, **EVENING**, *Oenothera biennis*.

PRIM'ULA VERIS, from *prim'ulus*, 'the beginning;' so called, because it flowers in the beginning of the spring; *Verbas'culum*, *Paral'ysis*; the *Coveslip*, *Paigil*, or *Peagle*, (F.) *Prime-vère*. Family, *Primulaceæ*. Sex. Syst. Pentandria Monogynia. The flowers have been considered to be mildly tonic, antispasmodic, and anodyne.

PRIMULA VULGARIS. The leaves and roots of this plant have been used as sternutatories.

PRINCEPS, Rectum.

PRINCIPE CRYSTALLIZABLE DE DE-ROSNE, Narcotine.

PRINCIPES IMMÉDIATS, Principles immediate.

PRINCIPIUM, Arche, Element—p. Acidificans, Oxygen—p. Adstringens, Tannin—p. Hydrogeneticum, Hydrogen—p. Hydroticum, Hydrogen—p. Oxygenans, Oxygen—p. Scytophæicum, Tannin.

PRINCIPLE, **COLORING**, **OF THE BLOOD**. A name, given to the immediate principle in animals, to which the blood owes its red colour. It is solid, inodorous, and in-

spid. When recently separated from blood, it has a purple-red colour. When distilled, it furnishes, amongst other products, a purple oil. It is insoluble in water; but, if diluted with that liquid, acquires a vinous red hue. It communicates a red colour to the albumen of the blood, and affords, on analysis, iron, to which the colour is perhaps owing.—See *Hæmatine*.

PRINCIPLES, IMMEDIATE, (F.) *Principes immédiats, Matériaux immédiats*. A name given to a considerable number of substances, composed at least of three elements, and which are obtained from animals and vegetables, without alteration, by simple processes, and, in some measure, immediately.

IMMEDIATE PRINCIPLES OF ANIMALS, Proximate principles, Organic Elements, Compounds of Organization. These are divided into acid principles, fatty principles, and principles which are neither fat nor acid. The first include the *uric, rosacic, purpuric, allantoinic, caseic, butyric, &c.* The fatty principles are:—*stearin, elain, cholesterin, &c.*; and the last division includes the most important compounds of organization:—*fibrin, gelatin, albumen, urea, picromel, osmazome, &c.*

PRINCIPLES, PROXIMATE, P. immediate.

PRINOS, P. verticillatus, Black Alder, Virginia Winter Berry, (F.) *Apulachine à feuilles de Premier. Nat. Ord. Rhamn. Sex. Syst. Hexandria Monogynia*. The bark of this common shrub of the United States is astringent, bitter and pungent. The berries are, likewise, bitter. The bark has been used as a substitute for the cinchona, in intermittents, and as a tonic.

PRION, Saw.

PRIONODES, from *πριων*, 'a saw,' and *ειδος*, 'shape.' *Serrated*. Applied to the sutures of the head.

PRIOR ANNULARIS, Interosseus quartus of Winslow. An internal interosseous muscle, which arises from the outside of the metacarpal bone of the ring finger, and is inserted into the outside of the tendon on the back of the ring finger. Its use is to draw the ring finger outwards.

PRIOR INDICIS, Extensor tertii interno-dii indicis; Sous-métacarpo-latéri phalangien. It arises from the outer or radial side of the metacarpal bone of the fore finger, and is inserted into the outside of the tendon on the back of the fore finger. *Action*:—to draw the finger outwards, towards the thumb.

PRIOR VEL ABDUCTOR INDICIS PEDIS. An external, interosseous muscle of the foot, which arises from the contiguous sides of the metatarsal bones of the great and fore toes, and is inserted into the inside of the root of the first bone of the fore toe. *Action*:—to pull the fore toe inwards.

PRIOR MEDII, Pr. Medii digiti.

PRIOR MEDII DIGITII, Prior Medii, Second interosseus of Douglas. An external, interosseous muscle of the hand, which arises from the corresponding sides of the metacarpal bones of the fore and middle fingers, and is inserted into the outside of the tendon on the back of the middle finger. *Action*:—to draw the middle finger outwards.

PRIOR VEL ABDUCTOR MEDII DIGITI PEDIS. An internal, interosseous muscle of the foot, which arises from the inside of the metatarsal

bone of the middle toe, and is inserted into the inside of the root of the first bone of the middle toe. *Use*:—to pull the middle toe inwards, or towards the inner side of the foot.

PRIOR VEL ABDUCTOR MINIMI DIGITI. An internal, interosseous muscle of the foot, which originates from the inside of the metatarsal bone of the little toe; and is inserted into the inside of the root of the first bone of the little toe. *Action*:—to pull the little toe inwards.

PRIOR VEL ABDUCTOR TERTII DIGITI PEDIS. An internal interosseous muscle of the foot, which arises from the inner and under part of the metatarsal bone of the third of the small toes, and is inserted into the inside of the root of the first bone of the third of the small toes. *Action*:—to pull the third of the small toes inwards.

PRISIS, Stridor dentium.

PRISMA, Scabs.

PRISMOS, Stridor dentium.

PRIVATE PARTS, Genital organs.

PRIVITIES, Genital organs.

PRIVY MEMBERS, Genital organs—p. Parts, Genital organs.

PRO, προ, 'before.' A common prefix to words; as in *Procatartec, Prostate, &c.*

PROBANG, Detrusorium ex bale'na. A long, slender rod of whalebone, with a piece of sponge at its extremity, intended to push down extraneous bodies, arrested in the œsophagus, into the stomach. A similar instrument is called by J. L. Petit, *Repoussoir d'arêtes*.

PROCARDIUM, Scrobiculus cordis.

PROCERUS NASI, Pyramidalis nasi.

PROCES CILIARES, Ciliary processes.

PROCESS, Apophysis—p. Cuneiform, Basiliary process—p. Vertical superior longitudinal, Falx cerebri.

PROCES/SUS. A process; from *procedo*, (*pro*, and *cedere*,) 'I go before.' *Projectura*. An apophysis or eminence of a bone, (see *Apophysis*.) Also, any part, which seems prolonged beyond other organs with which it is in connexion; as the *Ciliary processes*.

PROCESSUS ANCRONEUS, Olecranon—p. Annularis, Pons varolii—p. Caudatus, Lobulus caudatus—p. cerebri lateralis, Cornu ammonis—p. Ciliares, Ciliary processes—p. Cochleariformis, see Tympanum—p. Cuneiformis ossis occipitis, Basiliary process—p. Enteroides cerebri, Convolutions (cerebral)—p. Falciformis cerebelli, Falx cerebelli—p. Falciformis duræ matris, Falx cerebri—p. Laterales uteri, Tubæ Fallopianæ—p. Mamillares, Papillæ of the kidney, Olfactory nerves—p. Orbicularis cerebri, Infundibulum of the brain—p. Papillares, Olfactory nerves—p. Rachidianus, Medulla spinalis—p. ad Testes, see Valvula Vieusseni—p. Transversus duræ matris, Tentorium—p. Uvifer, Uvula—p. Ventriculi, Duodenum.

PROCHELLA, Antelabia.

PROCHEILIDION, Procheilon.

PROCHEILON, Procheilidion, Prolabium. The extreme projecting part of the lips.

PROCHEUMA, Parenchyma.

PROCIDENCE DE L'ŒIL, Exophthalmia.

PROCIDENTIA, Prolapsus—p. Ani, Proctocœle—p. Intestini recti, Proctocœle—p. Iridis, Staphyloma of the Iris—p. Sedis, Proctocœle—p. Uteri, Prolapsus uteri.

PROCNEME, Tibia.

PROCONDYLOS, προκονδύλος, from προ,

'before,' and *κονδυλος*, 'a knot.' The first joint of the fingers; the second being called *κονδυλος*; and the third *μετακονδυλος*.

PROCTALGIA, *Proctica simplex*, *Proctalgia*, from *πρωκτος*, 'the anus,' and *αλγος*, 'pain.' Pain in the anus. Generally symptomatic of disease, as of hemorrhoids, scirrhus, &c.

PROCTALGIA, Clunesia—p. *Hæmorrhoidalis*, *Hæmorrhoids*.

PROCTATRE'SIA, from *πρωκτος*, 'the anus,' and *ατρεσια*, 'imperforation.' Imperforate state of the anus.

PROCTICA. Pain or derangement about the anus, without primary inflammation. A genus in the class *Caliaca*, order *Enterica*, of Good.

PROCTICA EXANIA, *Proctoceles*—p. *Marisca*, *Hæmorrhoids*—p. *Simplex*, *Proctalgia*—p. *Tenesmus*, *Tenesmus*.

PROCTITIS, *Clype'sia*, *Cyso'tis*, from *πρωκτος*, 'the anus,' Inflammation of the anus.

PROCTOCELE, from *πρωκτος*, 'the anus,' and *κηλη*, 'hernia.' *Prolapsus Ani*, *Procto'tosis*, *Procto'sis*, *Archopto'ma*, *Archopto'sis*, *Exania*, *Hæmorrhoids procdens*, *Hæmorrhoids ab exania*, *Procid'ntia Ani*, *P. intest'ni recti*, *P. sedis*, *Ecto'pia Ani*, *Sedes procid'ua*, *Falling down of the Fundament*, *Coming down of the Body*, (F.) *Chute du rectum*, *C. du fondement*, *Renversement du rectum*. Inversion and prolapse of the mucous coat of the rectum, from relaxation of the sphincter, with more or less swelling. In the treatment, the application of cold water and astringent lotions must be recommended: and, if other means fail, one of the radii of skin, which converge at the anus, may be snipped off. On cicatrizing, the verge of the anus will be contracted, and the cure probably complete. In the way of palliation, the parts may be retained by an appropriate bandage.

PROCTOCYSTOTOMIA. See *Lithotomy*.

PROCTOPTOSIS, *Proctoceles*.

PROCTORRHAGIA, *Hæmorrhoidal flux*.

PROCTORRHEA, from *πρωκτος*, 'the anus,' and *ρην*, 'I flow.' A discharge of blood or slime from the anus.

PROCTOS, *Anns*.

PROCTOSIS, *Proctoceles*.

PRODROMUS, from *προ*, 'before,' and *δρομος*, 'course.' The period immediately preceding an attack of disease; and in which the *precursory signs* occur.

PRODUCT, from *produ'co*, 'I produce,' (F.) *Produit*. The result sought to be attained by any pharmaceutical operation.

PRODUCTIO, *Prolapsus*—p. *Uvula pituita*, *Staphylodema*.

PRODUCTION, *Productio*; same etymon. This word is used, especially by the French, synonymously with *prolongation*. The mesentery is, in this sense, a production of the peritoneum.

PRODUIT, *Product*.

PROEMINENT, *Proëminens*, from *pro*, 'forwards,' and *eminere*, 'to project.' Some anatomists call the 7th cervical vertebra the *proeminent vertebra*, on account of the length of its spinous process, which passes the level of those of the neighbouring vertebrae.

PREO'TIA, *Pro'otes*, *πρωοτις*, or *πρωοτις*, from *πρη*, 'early.' 'Precocity,' *Præcox maturitas*, *Precocious maturity*. Premature de-

velopment of sexual organization or power.—Good.

PROFLUVIUM, *D'scharge* (q. v.) *Fluxus*, *Polyrrhea*, *Flux* (q. v.) from *profluo*, 'I run down.' A term, under which some Nosologists have comprised all morbid discharges or fluxes:—others, increased excretions, attended by fever.

PROFLUVIUM GENITALE MULIERE, *Menses*—p. *Mucosum urethræ*, *Gonorrhœa*—p. *Mulieb're*, *Leucorrhœa*, *Menses*—p. *Seminis*, *Pollution*—p. *Ventris*, *Diarrhœa*.

PROFUNDUS, (*pro*, and *fundus*, 'base,') *Altus*, 'having a deep base.' A name given to different parts, which are seated profoundly as regards others.

ARTERIA PROFUNDA FEMORIS, *A. vasta post'erior seu muscul'ris femoris*, *Artère-grande musculaire de la cuisse*, (Ch.) This large branch arises commonly from the posterior part of the crural, between the pubis and lesser trochanter. It descends deeply, situate before the adductors; passes through the third adductor above the opening in it for the trunk of the femoral; and terminates in the short portion of the biceps. The *muscularis profunda* gives off, 1. The *external circumflex*; 2. The *internal circumflex*; and, 3. The *three perforantes*.

ARTERIA PROFUNDA HUMERI, *P. superior*, *Artéria spiralis*, (F.) *Artère humérale profonde*, *A. collatérale externe*, *Grand musculaire du bras*, (Ch.) Its origin is variable. When it arises from the brachial artery, it is given off opposite the groove of the humerus destined for the radial nerve, and descends backwards between the three portions of the triceps, accompanied by the nerve; giving branches to that muscle and to the humerus. When it reaches the posterior part of the bone, it divides into two branches, which are distributed to the triceps, supinator longus, &c.

ARTERIA PROFUNDA INFERIOR vel MINOR is often a branch of the last; but, commonly, is given off from the brachial, near the middle of the arm. It gives off branches to the muscles, &c. about the inner side of the os humeri. It is also, called *large communicating ulnar* or *profundo-ulnar*.

ARTERIA PROFUNDA PENIS. Chaussier has given this name to the *ca'ernous artery*, which arises from the artery of the penis, furnished by the internal pudic.

ARTERIA PROFUNDA SUPERIOR, *Profunda humeri*.

Certain muscles are distinguished by the names *profound* or *deep-seated* and *superficial*. Thus, we speak of the *superficial* and *deep-seated* muscles of the neck, &c.; the *Flexor profundus perforans*, &c.

PROFUSIO SANGUINIS, *Hæmorrhagia*—p. *Subcutanea*, *Purpura simplex*.

PROGLOS'SIS, from *προ*, 'before,' and *γλωσσα*, 'the tongue.' The extremity or tip of the tongue.

PROGNO'SIS, *Porrhe'sis*, *Præcognitio*, *Prædictio*, (F.) *Prognostic*, *Pronostic*, from *προ*, 'before,' and *γινωσκειν*, 'I know.' The judgment formed by the physician regarding the future progress and termination of any disease.

A **GENERAL PROGNOSIS** is the opinion formed of a disease in the abstract. Thus, we say, the *General prognosis* of *Cynanche tonsillaris* is

favourable;—of *Phthisis pulmonalis*, unfavourable, &c.

A PARTICULAR PROGNO'SIS is the opinion formed of any particular case of disease. The particular prognosis of one case of typhus, for example, may be favourable, whilst that of another may be unfavourable.

PROGNOSIS EX LINGUÂ, Glossomantia.

PROGNOSTIC, Prognosis.

PROIOTES, Præotia.

PROJECTURA, Process.

PROLABIUM, Procheilon.

PROLAPSUS, from *prolabor*, *prolapsus*, (*pro*, and *labor*, *lapsus*, 'to slide,') 'I slip down.' *Procidencia*, *Delapsio*, *Proptoma*, *Proptosis*, *Productio*, *Propedentia*, *Prominentia*, *Ptosis*, *Cusus* (F.) *Chute*; a protrusion; a falling down. A genus of diseases in the class *Locales* and order *Éctopie* of Cullen, distinguished by the falling down of a part through the orifice with which it is naturally connected.

PROLAPSUS ANI, Proctocœle—p. *Corneæ*, Staphyloma of the Corneæ—p. *Iridis*, Ptosis iridis—p. *Œsophagi*, Pharyngocele—p. *Palpebræ*, Blepharoptosis—p. *Pharyngis*, Pharyngocele.

PROLAPSUS UTERI, *Exomêtra*, *Metrop'tosis*, *Falling down of the womb*, *Édopto'sis uteri*, *Hysteropto'sis*, *Hysteroecclê nuda*, *Procidencia uteri*, (F.) *Abaissement de la matrice*, *Chute de la matrice*, *Descente de la matrice*, *Précipitation de la matrice*. Some use the term 'Procidencia Uteri' for a minor degree; some for a greater degree of the affection than prolapsus;—*Relaxatio uteri* expressing the slightest stage of all. A falling down of the uterus, owing to relaxation of the parts about the utero-vaginal region. In the treatment, the horizontal posture must be insisted upon; the injection of astringent substances *per vaginam* be advised; and if the affection be not remedied by these means, a pessary must be employed as a palliative; or, the operation of *Episioraphy* (q. v.) may be performed.

PROLAPSUS UVULÆ, Staphylædema.

PROLAPSUS VAGINÆ, *Hysteropto'sis Vaginæ*, *Prolapsus*, *Édoptosis Vaginæ*, *Coleoptosis*, *Colpoptosis*, *Elythropto'sis*—Protrusion of the upper part of the vagina into the lower. This, like the descent of the uterus, may be *relaxation*, *procidencia*, *prolapsus*, or complete *inversion*.

PROLAPSUS VESICÆ, Excystis.

PROLECTA'TIO; from *pro*, and *legere*, *lectum*, 'to gather' Action of separating the finer parts of a body from the grosser.

PROLEPTICUS, Anticipating.

PROLICIDE, *Prolid'ium*; from *proles*, 'offspring,' and *cædere*, 'to kill.' Destruction of offspring. A term, which includes fœticide as well as infanticide.

PROLIFIC, *Prolificus*; from *proles*, 'offspring,' and *facio*, 'I make.' That which has the faculty of engendering: applied to man, and animals, and to their sperm or seed; as well as to remedies, which, by strengthening the genital organs, increase the secretion of sperm.

PROLIG'EROUS, *Pro'liger*, *Prolig'erus*, from *proles*, 'offspring,' and *gero*, 'I carry.' That which is connected with carrying the offspring.

PROLIGEROUS DISC OR LAYER, *Discus prolig'erus*, *Discus vitell'us*, *Stratum prolig'erum*. A granular layer, situate generally towards the most prominent part of the ovarian vesicle, on

the centre of which the true ovum or ovule exists.—Von Baer.

PROLONGEMENT RACHIDIEN, *Medulla spinalis*—p. *Sous-occipital*, Basilar process.

PROMALACTERIUM, from *pro*, 'before,' and *μαλασσω*, 'I soften.' The room, in the ancient gymnasium in which the body was softened and anointed. One of the operations in bathing.

PROMANOS. See *Digitus*.

PROMANUS, Pollex.

PROMETOPIDIA, Frontal bandages.

PROMETOPIS, *Prometopid'ion*, from *pro*, 'before,' and *μετωπον*, 'the forehead.' The skin of the forehead.

PROMINENTIA, Prolapsus, Protuberance.

PROMONTORIUM FACIÆ, Nasus.

PROMONTORY, *Promontorium*, *pro*, and *mons*, *montis*, 'a mountain,' seu *Tuber* seu *Tuberositas Tympani*. A small projection at the inner paries of the cavity of the tympanum, which corresponds to the external scala of the cochlea, and especially to the outer side of the vestibule.

PRONATEUR CARRÉ, *Pronator radii quadratus*—p. *Grand ou rond*, *Pronator radii teres*—p. *Petit*, *Pronator radii quadratus*.

PRONA'TION, *Prona'tio*, from *pronus*, 'inclined forwards.' Anatomists understand, by pronation, the motion by which the inferior extremity of the radius passes before the ulna, and thus causes the hand to execute a kind of rotation from without inwards.

PRONA'TOR. That which produces the motion of pronation. This name has been given to two of the muscles of the forearm.

PRONATOR OBLIQUUS, P. radii teres—p. *Quadratus*, P. radii quadratus.

PRONATOR RADII QUADRATUS, P. *quadratus*, *Quadratus radii*, P. *quadratus* seu *transversus* (Winslow,) *Pronator radii brevis* seu *quadratus* (Cowper,) *Cubito-radial*, (Ch.) (F.) *Petit* ou *carré pronateur*. This muscle is situate at the anterior, inferior, and profound part of the forearm. It is flat and square, and is attached, within, to the inferior quarter of the anterior surface of the ulna; and, without, to the inferior quarter of the anterior surface of the radius. It produces the motion of pronation.

PRONATOR RADII TERES, P. *teres* sive *obliquus* (Winslow,) *Epitrochlo-radial* (Ch.) (F.) *Grand ou rond pronateur*. A muscle seated at the upper and anterior part of the forearm. It is long, flat, and larger above than below. It is attached, above, to the inner tuberosity of the humerus and to the coronoid process of the ulna. From thence it passes obliquely downwards and outwards, and terminates at the middle of the outer surface of the radius. It causes the radius to turn on the ulna, to produce the motion of pronation. It can, also, bend the forearm on the arm, and *vice versâ*.

PRONATOR TERES, P. radii teres.

PRONERVATUS, Aponeurosis, Tendon.

PRONOSTIC, Prognosis.

PROPESENTIA, Prolapsus.

PROPERTIES, PHYSICAL, OF THE TISSUES. These are flexibility, extensibility and elasticity, *racornissement* and imbibition.

PROPERTIES, VITAL. Those which depend upon organization, such as *sensibility* and *contractility*.

PROPHYLACTIC, *Prophylact'icus*, *Diaphy-*

lactē, Dioscoric, Syntereticus, from *πρῶ*, and *φυλάσσει*, 'I defend.' A preservative.

PROPHYLAXIS, *Prophylacē, Prophylac-ticē*. Same etymon. *Præservatio*. Preservative or preventive treatment.

PROP'OLIS, from *πρῶ*, 'before,' and *πολις*, 'city'; literally, 'that which is before the city.' *Ceranthēmus, Commis-sis, Bee-bread*. A red, resinous matter, with which bees cover the bottom of the hive. Its fume has been esteemed antiasthmatic.

PROP'OMA, from *πρῶ*, 'before,' *πομα*, 'a drink.' Ancient name of a medicine, composed of seven parts of *honey* and four of *wine*. It was drunk before a meal.—Paulus of Ægina.

PROPOSITUM, Intention.

PROPOTIS'MOS. Same etymon. *Præpotitio*. An ancient name for medicines which were given to patients before purging them, and, in some sort, to prepare them.

PROPRIUS AURIS EXTERNÆ, Retra-hens auris.

PROPTOMA, Prolapsus.

PROPTOMA AURICULÆ, *Paræsthesis audi-tis flacca, Flap Ear*. Lobe of the ear broad, loose, and pendent, from birth.—Good.

PROPTOSIS, Prolapsus—p. *Palpebræ*, Ble-pharoptosis.

PRORA, Occiput.

PRORRHESIS, Prognosis.

PROS, *προς*. In composition, this prefix generally signifies 'in addition to,' 'over and above,' 'besides.'

PROSARTHROSIS, Diarthrosis.

PROSBOLÆ, Impression.

PROSCHYSIS, Affusion.

PROSCOLLISIS, Adherence, Agglutina-tion.

PROSECTEUR, Dissector.

PROSLEPSIS, Prehension.

PROSODOS, Auditus.

PROSOFALGIA, Neuralgia, facial.

PROSOPOMANTIA, Physiognomy.

PROSOPON, Face.

PROSOPOSIS, Physiognomy.

PROSPHORA, Prehension.

PROSPHYSIS, 'adhesion, adherence, con-nexion,' (q. v.) from *προς*, and *φύω*, 'I grow.' In a more limited sense, this word means morbid adhesion of the eyelids, either between themselves, or with the globe of the eye. *Ankyloblepharon*, (q. v.)

PROSTASIS, *πρῶστασις*, (*πρῶ*, and *στασις*, 'station,') 'superiority, preponderance;' same etymon as *Prostate*. A predominance or abundance of excrementitious humour.—Hippocr.

PROSTATAL'GIA, from *πρῶστατα*, 'the prostate,' and *αἰγος*, 'pain.' Pain in the prostate.

PROSTATE, *πρῶστατα*, from *πρῶ*, 'before,' and *σταται*, 'I stand.'—*Prostata gland'ula, Prostata, P. glandulo'sa, Paras'tata, P. gland'ula, Prostata adeno'id'es, Testes mino' res, Corpus glandulo'sum, C. adeniformē, C. glandiformē, C. glando'sum, C. adeno'id'es*; the *Prostate gland, Assisten'tes glandule, Ad'stites glandulosi*. A glandular, cordiform body, of the size of a chestnut, situate before the neck of the bladder, behind the symphysis pubis, and surrounding the first portion of the urethra. Its excretory outlets, to the number of 10 or 12, open into the part of the urethra that traverses it, and pour into it a whitish, viscid humour, intended to

lubricate the interior of the urethra, and to serve as a vehicle for the sperm in its ejaculation.

PROSTATES INFÉRIEURES, Cowper's glands—p. *Petites*, Cowper's glands.

PROSTAT'IC, *Prostat'icus*. That which relates to the prostate. Winslow has named—*Superior Prostatic Muscles*—ligaments which pass from the pubis to the lateral parts of the prostate. He, also, calls—*Inferior Prostatic Muscles*—the fleshy fibres, which, from the lateral parts of the urethra, near its membranous portion, pass to be inserted into the pubis.

The **PROSTATIC PORTION OF THE URETHRA** is the part of the canal of the urethra included by the prostate. It is about 15 lines long.

The **PROSTATIC BISECTOR** is an instrument employed by Dr. Stevens, of New York, in the bilateral operation of lithotomy. In form it resembles a large olive, with a beak at the extremity, with cutting edges at the sides, parallel to its longest axis, and with a straight handle.

PROSTATICUS SUPERIOR, Compressor prostate.

PROSTATITIS, *Inflammat'io prost'atæ*, from *πρῶστατα*, 'the prostate,' and *itis*, denoting inflammation. Inflammation of the prostate.

PROSTATON'CUS, from *πρῶστατα*, 'the prostate,' and *ογκος*, 'a tumour.' Swelling of the prostate.

PROSTHESIS, Prothesis.

PROSTHETA, Subdita.

PROSTRATION, *Prostra'tio v'rium*, (F.) *Prostration des forces*. Great depression of strength. Almost total loss of power over the muscles of locomotion.

PROTEIN, *Proteine, Prote'ina*: from *πρω-τευνω*, 'I take the first rank.' A product of the decomposition of albumen, &c., by potassa. When animal albumen, fibrin or casein is dissolved in a moderately strong solution of caustic potassa, and the solution is exposed for some time to a high temperature, these substances are decomposed. The addition of acetic acid causes, in all three, the separation of a gelatinous translucent precipitate, which has exactly the same characters and composition. This is Protein.—Mulder.

Protein is the basis of animal and vegetable fibrin, albumen, and casein, and of gluten, which have been, consequently, classed under the "proteinaceous alimentary principle," by Dr. Pereira.

PROTEINACEOUS, Proteinous.

PROTEINOUS, *Protein'o'ceous, Protein'o'sus*. Of, or belonging to protein;—as "a proteinous alimentary principle."

PROTHESIS, *Prost'hesis, Adjunc'tio, Ad-jec'tio, Apposi'tio*, 'addition, application;' from *προς*, 'in addition to,' and *τιθημι*, 'I put.' That part of surgery whose object is to add to the human body some artificial part, in place of one that may be wanting, as a wooden leg, an artificial eye, &c.

PROTMESIS, Umbilicus, Kidney.

PROTOGALA, Colostrum.

PROTOIATROS, Archiater.

PROTOMEDICUS, Archiater.

PROTOMUS, Dissector.

PROTOPATHIA, Idiopathia.

PROTOSPOROS, Os uteri.

PROTRUSION, Prolapsus.

PROTUBERANCE, *Protuberan'tia, Extu-*

bera'tio, Prominen'tia, Excrescen'tia, Extuberan'tia, from *pro*, 'before,' and *tuber*, 'a projection.' (F.) *Bosse*. A name given to rough, unequal protuberances, seen at the surface of certain organs; the *parietal protuberances, occipital protuberances, annular protuberances, &c.*

PROTUBERANCE, CEREBRAL, *Medulla oblongata, Pons varolii*—p. *Cornu ammonis*.

PROTUBERANTIA, Eminence—p. *Annularis Willisii, Pons varolii*—p. *Cylindrica, Cornu ammonis*.

PROULIMATE'SIS. A word employed by Forestus, for hernia of the stomach.

PROUNE. *Prunus domestica*.

PROVERBS, MEDICAL. A proverbial expression frequently contains sound sense in its directions. In medicine, the greatest collection is in the *Regimen of Health of the school of Salerno*, composed in the 11th century, by John of Milan. Yet, although good sense is often inculcated, we often meet with the reverse.

Most of the proverbs are hygienic. The following are a few.

1. *Qu'après la soupe un coupe d'excellent vin
Tire un écu de la poche du médecin.*
2. *Surge quintâ, grande nonâ, cæna quintâ, dormi nonâ, nec est mortî vita prona.*
3. *Nunquam rectè corpus exerceri sine animo, neque animum sine corpore posse.*
4. *Viande bien machée est à demi digérée.*
5. *Optimum condimentum fames.*
Appetite is the best sauce.
6. *Plures occidit gula quam gladius.*
7. Early to bed and early to rise,
Makes a man healthy, wealthy, and wise.
8. One man's meat's another man's poison.
9. An ounce of prevention is better than a pound of cure.

PROVINS, MINERAL WATERS OF. Chalybeate springs in the department of Seine et Marne, France, which contain carbonic acid and iron.

PROVOCATORIUS, Intercalary.

PRUNA, Anthrax.

PRUNE, *Prunum*.

PRUNES, see *Prunum*—p. *Pulp of, Pruni Pulpa*.

PRUNI PULPA, *Pulp of Prunes*. Take of *prunes* a sufficient quantity, soften them in the vapour of boiling water, and having separated the stones, beat the remainder in a marble mortar, and press it through a hair-sieve.—Ph. U. S.

PRUNELLA, *Cynanche, Pupil*.

PRUNEL'LA, *P. vulgaris, Consolida minor, Symplithum minus, Self-heal, Bugle, Brunel'la*, (F.) *Brunelle*. Family, Labiatæ. Sex. Syst. *Didynamia Gymnospermia*. This plant has been recommended, as an astringent, in hemorrhages and fluxes; and, also, in gargles against aphthæ, and in inflammation of the fauces.

PRUNELLIER, *Prunus spinosa*.

PRUNELLOE, *Prunum Brignolense*.

PRUNIER, *Prunus domestica*—p. *Sauvage, Prunus spinosa*.

PRUNUM. A *Plum*, a *Prune*. Three sorts of plums have usually been ranked amongst the articles of the *materia medica*. 1. The *Prunum Brignolensæ*; the *Brignole plum* or *Prunel'loe*; from *Brignole* in Provence. It is of a reddish-yellow colour; and has a very grateful, sweet, subacid taste. 2. The *Prunum*

Gallicum, Prunum, (Ph. U. S.), the *French Prune*; and 3. The *Prunum Damascenum* or *Damson, Brab'ylon*. All these possess the same general qualities as the other summer fruits. They are emollient and laxative.

PRUNUM STELLATUM, *Averrhoa carambola*.

PRUNUS ARMENIACA. The *Apricot, Apricock, Bericocœ, βερίκοκκον, Præcocia*, (F.) *Abrirot*. Family, Rosacæ. Sex. Syst. *Icosandria Monogynia*. The *Apricot*, when ripe, is easily digested, and considered as a great delicacy.

PRUNUS A'VIUM—The *Black Cherry Tree, Cer'asus Avium*. (F.) *Merisier*. The fruit is eaten; and a gum exudes from the tree; the properties of which are similar to those of gum Arabic.

PRUNUS CER'ASUS. The *Red Cherry Tree; (F.) Cérasier*. The fruit *Cerasum, Cerasion*, has a pleasant, acidulous, sweet flavour. It is wholesome.

PRUNUS DOMES'TICA. The *Plum or Damson tree, Coccym'lea, Proune*, (F.) *Prunier ordinaire*. The *damson*, when perfectly ripe, affords a wholesome fruit for pies, tarts, &c. It is gently laxative. See *Prunum*.

PRUNUS INV'RIA. The *Bullace Plum Tree*. The fruit of this tree is used like the *damson*.

PRUNUS LAURO-CER'ASUS, *Poison Laurel, Cherry Laurel, Common Laurel, Lauro-cerasus, Cer'asus Lauro-cer'asus*, (F.) *Laurier-cérise, L. amandier*. The leaves have a bitter, styptic taste, with the flavour of bitter almonds. The flowers have a similar flavour. The powdered leaves, applied to the nostrils, excite sneezing. The flavour of the leaves has given occasion to their being employed in tarts, custards, &c.; but in large quantities they are poisonous. The poisonous principle is the Prussic acid. The distilled water, called *Laurel-water*, is poisonous. (See *Poisons, Table of*.)

PRUNUS PADUS, *Padus, Cer'asus Padus, Cer'asus racemo'sus sylves'tris, Wild cluster, or Bird Cherry Tree*, (F.) *Cérasier à grappes, Bois puant*. The bark of the tree has a fragrant smell, and a bitter, subastringent taste, somewhat similar to that of bitter almonds. It has been recommended in intermittents, &c. in the form of decoction. The berries have been used in dysentery.

PRUNUS SEBESTINA, *Sebestina*—p. *Sylvestris, P. spinosa*.

PRUNUS SPINO'SA. The *Sloe Tree, P. sylves'tris, Agriococcim'lea, Agru'na, Agrunel'a*, (F.) *Prunellier, Prunier sauvage*. The fruit—the *sloe*—is sometimes employed in gargles, and was formerly much used in hemorrhage, owing to its astringent properties. The *Acacia nostras, A. Germanica, Succus acaciæ nostratis, S. Germanicæ inspissatus*, is obtained from this.

PRUNUS VIRGINIA'NA, *Cer'asus serotina, C. Virginia'na, Wild Cherry Tree*, (F.) *Cérasier de Virginie*. The bark of this tree has been found useful in intermittents. The leaves are poisonous to certain animals, and the berries intoxicate different kinds of birds. The Indians use the bark in the cure of syphilis. It is bitter and astringent, and possesses some aromatic warmth, and, likewise, a narcotic quality. It is stimulant and tonic. The leaves contain Prussic acid. The distilled oil of the bark is very nearly identical with that of the bitter almonds. A strong decoction of the bark is anthelmintic.

PRURIGO, *Pruritus*, from *prurio*, 'I itch.' This word is often used synonymously with *itching*, (q. v.) Willan and Bateman use the term for a genus of cutaneous diseases, the characteristic symptoms of which are a severe itching, accompanied by an eruption of papule of nearly the same colour as the adjoining cuticle. *Cnesmos*, *Scabies papuliformis*, *Eczema prurigo*. It affects the whole surface of the skin, under three varieties of form;—the *P. mitis*, *P. formicans*, *P. senilis*, &c. as well as some parts of the body, as the *P. podicis*, *P. pudendi muliebris*.

PRURIT, Itching.

PRURITUS, Gargale, Itching, Prurigo.

PRUSSIAN BLUE, *Ferrum Zooticum*, *F. Borussicum*, *F. Cyanogenatum*, *F. oxydulatum hydrocyanicum*, *Ferri Ferrocyanas*, *Borussias Ferri*, *Ceruleum Borussicum*, *C. Berolinense*, *Prussias Ferri*, *Hydrocyanas Ferri*, *Cyanuretum Ferri*, *Trito-hydroferrocyanate of iron*. In the Pharmacopœia of the United States, (1842) the pure salt is directed to be made as follows: *Ferri sulph.* ℥iv, *acid. sulph.* f. ℥iiss, *acid. nitric.* f. ℥vj or q. s., *potassii ferrocyanuret.* ℥ivss, *aquæ.* Oij. Dissolve the sulphate in a pint of water, and having added the sulphuric acid, boil the solution. Pour into it the nitric acid, in small portions, boiling the liquid for a minute or two after each addition, until it no longer produces a dark colour; then allow the liquid to cool. Dissolve the ferrocyanuret of potassium in the remainder of the water, and add this solution gradually to the first liquid, agitating the mixture after each addition; then pour it upon a filter. Wash the precipitate with boiling water until the washings pass tasteless. Lastly, dry and rub into powder. This salt is chiefly used for the preparation of the hydrocyanic acid and the cyanuret of mercury. It has been advised in the treatment of intermittents, and in epilepsy and scrophulosis. Externally, it has been applied to ill-conditioned ulcers. (℥j to ℥j of Cerate.) Dose, four to six grains.

PSALIS, Fornix, Scissors.

PSALTERIUM, Lyra.

PSAMMIS'MOS, from *ψαμμος*, 'sand.' The application of sand to any part of the body for the cure of disease.—Paulus.

PSAMMODES, Sabulous.

PSELLIS'MUS, *ψελλισμος*, from *ψελλισ*, 'I stutter.' Imperfect or depraved state of the articulation. A genus in the class *Pneumatica*; order, *Phonica*, of Good.

PSELLOTES, Balbuties.

PSEUDAC'OE, *Pseudacōia*, from *ψευδης*, 'false,' and *ακοη*, 'audition.' *Pseudacusis*. False hearing.

PSEUDACORUS, *Iris pseudacorus*.

PSEUDÆSTHESIA, from *ψευδης*, 'false,' and *αισθαισμαι*, 'I feel.' *Parapsis illusoria*. Depraved feeling. Imaginary sense of touch or general feeling in organs that have no existence. Common to those who have suffered amputation; and in hypochondriacs and the insane.

PSEUDARTHROSIS, *Pseudarticulatio*, *Pseudarticulus*; from *ψευδης*, 'false,' and *αρθρον*, 'a joint.' A false joint or articulation. (q. v.)

PSEUDARTICULATIO, *Pseudarthrosis*.

PSEUDENCEPH'ALUS, *Paracephalus*, from *ψευδης*, 'false,' and *εγκεφαλον*, 'the encephalon.' A monster, whose cranium is open

in its whole extent from before to behind, its base supporting a vascular tumour. *G. St. Hilaire*.

PSEUDO, False—p. Asthma, Dyspnœa.

PSEUDOBLEPSIA, from *ψευδης*, 'false,' and *βλεψις*, 'sight.' *Pseudopsia*, *Paropsis illusoria*, *Suffusio*, *Phantasma*, *Pseudoblepsia*, *False sight*. A generic name, used by Cullen for perversion of vision. See *Metamorphopsia*.

PSEUDO-CROUP, Asthma Thymicum.

PSEUDO-CYESIS, Pregnancy, false—p. Cyesis molaris, Mole.

PSEUDO LIEN, *Pseudosplen*. Glands situated in the neighbourhood of the spleen; probably, lymphatic glands.

PSEUDO-MEDICUS, Charlatan—p. Meninx, Membrane, false—p. Metamorphosis polyposa, Polypus.

PSEUDOPHLOGOSIS VENTRICULI RESOLUTIVA et **COLLIQUATIVA**, Gastromalacia.

PSEUDOPHTHISIS. False phthisis. Emaciation, occasioned by other cause than organic lesion of the lungs.

PSEUDO-PLEURITIS, Pleurodynia—p. Polypi, see Polypi—p. Pyrethrum, Achillea ptarmica—p. Spleen, Pseudolien.

PSEUDOPSIA, Pseudoblepsia.

PSEUDOREXIA, *Pseudorexia*, from *ψευδης*, 'false,' and *ορεξια*, 'appetite.' False appetite. **PSEUDO-SYPHILIS**, Syphilis pseudo-syphilis.

PSEUDO-VARIOLÆ, Varicella.

PSEUDYMEN, Membrane, false.

PSIDIUM POMIFERUM. The *Apple Guava*. This plant and the *P. pyrififerum* bear fruits; those of the former like apples; of the latter like pears. The apple kind has an acid flavour, the other is sweet. Of the inner pulp of either, the natives of the Indies make jellies; and, of the outer rind, tarts, marinalades, &c. They are somewhat astringent; this quality, indeed, exists in every part of the tree, and abundantly in the leaf buds, which are occasionally boiled with barley and liquorice as an excellent drink in diarrhœa. A simple decoction of the leaves is said to be useful in the itch and most cutaneous eruptions.

PSILOSIS, Depilation.

PSILOTHRUM, *Bryonia alba*—p. Depilatory.

PSIMMYTHON, Plumbi subcarbonas.

PSOÆ, *ψοαι*, *Lumbi*, (q. v.) 'the loins.' *Alopeces*, *Nephrometræ*, *Neurometres*. The psœ muscles.

PSOAS MAGNUS, *P. seu lumbalis internus*, *Præ-lombo-trochanter*, *Præ-lombo-trochantinien* (Ch.) *Pecur moventium sextus*. A muscle, seated on the lateral parts of the lumbar portion of the vertebral column; and passing down to the superior and anterior part of the thigh. It is long; fusiform; and attached, above, to the body and transverse processes of the first four lumbar vertebrae, and last dorsal. Below, it terminates, by a very thick tendon, common to it and the iliacus muscle,—which is inserted into the top of the lesser trochanter. This muscle bends the thigh upon the pelvis, and carries it in rotation outwards. It may, also, bend the pelvis on the thigh, and the loins on the pelvis. It acts considerably in station and progression.

PSOAS PARVUS, *Præ-lombo-pubien*, (Ch.) A

muscle, situate anterior to the last. It is long, thin, flat, and narrow; and is attached, above, to the body of the last dorsal vertebra, and below, to the linea ileo-pectinea, by means of a slender tendon, which furnishes two expansions—one to the *Iliac-aponeurosis*, and the other to the *pelvic*. This muscle bends the vertebral column on the pelvis; and, reciprocally, the pelvis on the vertebral column.

PSODYMUS, *Gastrodidymus*.

PSOITIS, from *ψοαί*, 'the loins,' and *itis*, denoting inflammation. Inflammation of the psoas muscles and of the parts situate before the lumbar vertebrae; accompanied, from its commencement, by considerable fever, violent pains in the part affected and in the thigh of the same side, which remains commonly half bent. Psoitis may terminate by suppuration, and form Lumbar Abscess, (q. v.)

PSOLIS, *ψολή*, 'the male organ,' also, the glans.

PSOLONCUS, from *ψολή*, and *ογκος*, 'a tumour.' Swelling of the glans, or of the penis generally.

PSOPHOS, *ψοφος*, 'noise.' A loud noise; a hollow sound.

PSORA, from *ψωω*, 'I touch, I feel,' *Scabies*, *Phlysis Scabies*, *Itch*, (F.) *Gale*, *Mal Saint-Main*, *Rogne*. A contagious eruption of very minute pimples—pustular, vesicular, papular, intermixed and alternating, itching intolerably and terminating in scabs. It seems to be connected with an insect, of the genus *Acarus*;—the *Ac'arus* or *Sarcop'tes* or *Sarcop'tus Scabiei*, *Ac'arus Ciro*, (F.) *Ciron*. The itch occupies, particularly, the spaces between the fingers, the backs of the hands, wrists, elbows, axillæ, groins, hams, &c. and rarely affects the face. The best applications, for its cure, are,—the *Unguentum Sulphuris* or *Ung. Sulph. comp.* night and morning; but the unpleasant smell of the sulphur has given occasion to the use of other means;—as the *White Hellebore*, *Potass in deliquescence*, *Muriate of Ammonia*, *Sulphuric Acid*, &c. The repugnance to the smell of sulphur ought not, however, to be regarded; especially as, in the course of four or five days, it will, in almost all cases, produce a perfect cure.

PSORA LEPROSA, Psoriasis—p. Squamosa, Psoriasis.

PSORA'LEA GLANDULO'SA, *Alcaquill'a*. Family, Leguminosæ. Sex. Syst. Diadelphia Decandria. A shrub, used in Chili as a vulnerary.

PSORA'LEA PENTAPHYL'LA, *Contrayer'va nova*, *Mex'ican Contrayer'va*. The root is little, if at all, inferior to the *Contrayer'va* in its medicinal properties: which, by the by, are unimportant.

PSORENTER'IA, Cholera.

PSORI'ASIS, formerly, the state of being affected with *ψωα*, *Lepido'sis psori'asis*, *Serp'e-do*, *Serpi'go*, *Impeti'go*, (of some) *Scab'ies sic'ca*, *S. feri'na*, *Psora lepro'sa*, *P. squamo'sa*, *Scaly Tetter*, *Dry Scale*, *Dry Scall*, (F.) *Dartre squameuse lichenoïde*, *D. écaïlleuse*, *Gratelle*, *Gale miliaire*, *G canine* ou *sèche*. A cutaneous affection, consisting of patches of rough, amorphous scales; continuous or of indeterminate outline: skin often chappy. Psoriasis occurs under a considerable variety of forms. The surface, under the scales, is more tender and irritable than in lepra, which psoriasis, in some

respects, resembles. Dr. Willan has given names to eleven varieties of psoriasis: the chief of which are the *Psoriasis gutta'ta*, *P. diffu'sa* (one form of which is the *Baker's Itch*, and *Grocer's Itch*), the *P. gyna'ta*, and *P. invetera'ta*. The treatment of psoriasis must be antiphlogistic, with the internal use of the fixed alkalies, sulphur, &c. The irritable kinds do better without any local application. The more local and less inflammatory are ameliorated by emollient and soothing applications: or by slightly stimulating means, sea-bathing, the *Ung. hydrag. nitrico-oxyd.*, *Ung. oxyd. zinci*, &c.

PSORICUS. That which has the nature of itch. A medicine for curing the itch.

PSOROPHTHALMIA, Ophthalmia tarsi.

PSYCHAGO'GICA, from *ψυχή*, 'life,' 'soul,' and *αγω*, 'I lead.' Medicines which resuscitate, when life seems extinct; as in syncope and apoplexy.

PSYCHE, Anima.

PSYCHICAL; from *ψυχή*, 'mind.' That which relates to the mind or mental endowments.

PSYCHOLOGY, *Psycholog'ia*, from *ψυχή*, 'mind,' and *λογος*, 'discourse.' A treatise on the intellectual and moral faculties. Also, intellectual and moral faculties.

PSYCHOS, Cold.

PSYCHOTRIA EMETICA, *Ipecacuanha*.

PSYCHOTROPHUM, *Betonica officinalis*.

PSYCHROLU'SIA, *Psychrolu'tron*, from *ψυχρος*, 'cold,' and *λουω*, 'I wash.' A cold bath.

PSYCHTICA, Refrigerants.

PSYDRA'CIA, *quasi*, *ψυδρα* 'υδρακία', 'cold drops.' The ancients used this term, sometimes, for *pimples*; at others, for *vesicles*. Willan and Bateman define *Psydracium* to be, a small pustule, often irregularly circumscribed, producing but a slight elevation of the cuticle, and terminating in a laminated scab. Many of the *psydracia* usually appear together, and become confluent; and, after the discharge of pus, they pour out a thin, watery humour; which frequently forms an irregular incrustation. Frank limits the term to a psoriform eruption, which differs from itch in not originating from an insect, and which is not contagious,—perhaps the lichen. Authors have differed regarding its acceptance.

PSYDRACIA ACNE, Acne.

PSYLLIUM, *Plantago psyllium*.

PTARMICA, *Achillea ptarmica*—p. Montana, *Arnica montana*.

PTARMICUM, Errhine, Sternutatory.

PTARMOS, Sneezing.

PTELEA, Ulmus.

PTERIGO-STAPHYLINUS INTERNUS, Levator palati—p. *Syndesmo-staphili-pharyngien*, Constrictor pharyngis.

PTERIS, *Polypodium filix mas*.

PTERIS AQUIL'INA, 'Eagles' Wings,' *Pteria*, *Thelypteris*, *Filix Nympha'ea*, so called from its leaves. Common Brake or Female Fern; *Filix fœminæ'a*. (F.) *Fougère femelle*, *La grande Fougère*. Nat. Ord. Filices. The root is considered to be anthelmintic; and as efficacious as that of the male fern in cases of tape-worm.

PTERNA, Calcaenum.

PTERNOBATES, Calcigradus.

PTEROCARPUS ERINACEA, see Kino.

PTEROCARPUS SANTAL'INUS, *Santalum Rubrum*, Red Sanders or Saunders Tree. Family,

Leguminosæ. *Sex. Syst.* Diadelphia Decandria. Red Saunders wood, *Santalum* (Ph. U. S.), is used only as a colouring matter; giving to rectified spirit a fine deep red. The juice of this tree, like that of the *P. Draco*, affords a species of *Dragon's blood*.

PTERYGION, *Pterygium*, from πτερυξ, 'a wing.' A small wing. *Onyx, Pyo'sis, Unguis*, (F.) *Drapeau, Onglet*. A varicose excrescence of the conjunctiva, of a triangular shape; and commonly occurring at the inner angle of the eye; whence it extends over the cornea. Sometimes two or three pterygia occur on the same eye, and cover the whole cornea with a thick veil, which totally prevents vision. "According to Scarpa, the ancients gave the name *Panniculus* to this last complication. If the pterygion cannot be dispelled by means of discutient collyria, it must be removed by the scissors.

PTERYGO-ANGULI-MAXILLARE, *Pterygoideus internus*—*p. colli-maxillaire*, *Pterygoideus externus*—*p. Maxillaire, grand*, *Pterygoideus internus*—*p. Maxillaire, petit*, *Pterygoideus externus*—*p. Palatine canal*, *Pterygoid canal*—*p. Pharyngeus, Constrictor pharyngis*—*p. Staphylinus, Circumflexus*.

PTERYGO-PALATINE, *Pterygo palatinus*. That which belongs to the pterygoid process and palate.

PTERYGO-PALATINE ARTERY, or *Superior pharyngeal*, is a very small artery, and is given off by the internal maxillary, at the bottom of the zygomatic fossa: after having passed through the pterygo-palatine canal, it is distributed to the superior part of the pharynx, the sphenoid bone, and the Eustachian tube.

PTERYGO-PALATINE CANAL. A small canal, formed by the internal ala of the pterygoid process, and the palate bone. It gives passage to the vessels of the same name.

PTERYGOIDES, *Alatus*.

PTERYGOID, *Pterygoïdes, Pterygoïdeus, Aliformis*, from πτερυξ, 'a wing,' and εἶδος, 'form.' A name given to two processes at the inferior surface of the sphenoid bone; the two laminae, which form them, having been compared to wings. These *alæ* or *wings* or *processes*,—*Processus aliformes*,—have been distinguished, according to their position, into *internal* and *external*.

PTERYGOID ARTERY, *Vidian Artery, Ramulus Ductus Pterygoidei, Arteria pharyngea superior, maxillaris*, arises from the internal maxillary artery, at the bottom of the zygomatic fossa, and enters the pterygoid canal with the nerve of the same name, to proceed to be distributed on the Eustachian tube and velum palati. The name, *pterygoid arteries*, is likewise given to the branches, which the internal maxillary and some of its divisions, as the meningeal media, and posterior temporalis profunda, furnish to the pterygoid muscles, behind the neck of the lower jaw.

PTERYGOID BONE, *Sphenoid*.

PTERYGOID OF VIDIAN CANAL, *Ductus pterygoideus, Canalis Vidianus*, (F.) *Conduit pterygoidien ou Vidian, Pterygo-palatine canal*, is a narrow channel, which traverses, in a direction from before to behind, the base of the pterygoid process, and gives passage to the pterygoid nerve. The *foramina* of the sphenoid, which terminate the canals, are similarly called.

Fossa Pterygoidea, (F.) *Fosse pterygoidi-*

enne ou *ptérygoïde*, is the depression, which separates the two laminae or *alæ* of the pterygoid process.

PTERYGOID MUSCLES, *Alares musculi, Aliformes musculi*, are two in number. 1. The *Pterygoideus externus*, *P. minor, Pterygo-colli-maxillaire, Petit Pterygo-maxillaire* (Ch.) (F.) *Petit pterygoidien, Pterygoidien externe*, is a thick, short muscle, which arises, by short aponeuroses, from the outer surface of the external ala of the pterygoid process, and from the outer surface of the great ala of the sphenoid bone; and is inserted in the anterior part of the neck of the lower jaw-bone, and the corresponding part of the inter-articular fibro-cartilage. This muscle draws the condyle of the lower jaw and the inter-articular ligament forwards. It carries the chin forwards, and to the opposite side. If the two external pterygoids act together, the jaw is carried directly forwards. 2. The *Pterygoideus internus*, *P. major, Pterygo-colli-maxillaire, Masse'ter internus, Latens in Ore, Grand Pterygo-maxillaire*, (F.) *Grand Pterygoidien ou Pterygoidien interne*. A thick, quadrilateral muscle, which is attached by short and very strong aponeuroses; above, to the pterygoid fossa, whence it proceeds downwards, backwards, and outwards, to be inserted into the inner surface of the ramus of the lower jaw, near its angle. This muscle raises the lower jaw, and carries it a little forwards. It also performs the grinding motion.

PTERYGOID NERVES. These are two in number. 1. The *Pterygoid* or *Vidian Nerve*. It arises from the posterior part of the sphenopalatine ganglion; traverses the Vidian canal of the sphenoid; and, beyond, divides into two filaments. 1. A *superior* or *cranial, Nervus superficialis sive petrosus*, which ascends into the cranium, and enters the hiatus of Fallopius to unite with the facial nerve. 2. An *inferior* or *carotid, Nervus profundus sive major*, which traverses the carotid canal, and unites with the ascending branches of the superior cervical ganglion of the trisplanchnic. 2. The *Pterygoid Nerve*, properly so called, *Nervus musculi pterygoidei*, is given off by the inferior maxillary branch of the 5th pair.

PTERYGOIDIEN, GRAND ou **INTERNE**, *Pterygoideus internus*—*p. Externe, Pterygoideus externus*—*p. Petit, Pterygoideus externus*.

PTERYGOMA. Same etymon. A wing; a projecting or pendulous body. A swelling of the vulva, which prevents coition.—*M. A. Severinus*.

PTERYX, *Ala*.

PTILOSI, *Deplumatio, Madarosis*.

PTISANA, *Tisane*—*p. Communis, Decoctum hordei compositum*—*p. Hippocratica, Decoctum hordei*.

PTISSANA, *Tisane*.

PTOCHOCOMIUM, from πτωχος, 'a poor person,' and κομω, 'I take care of.' *Ptochodochium*. An almshouse.

PTOCHODOCHIUM, *Ptochocomium*.

PTOMA, *Cadaver*.

PTOSIS, *Prolapsus*—*p. Bulbi oculi, Exophthalmia*.

PTOSIS IRIDIS, *Prolapsus Iridis*, from πτωσις, 'a falling.' A prolapsus of the iris through a wound of the cornea. It is known by a blackish tubercle, which projects a little from the cornea in various forms.

PTOSIS PALPEBRÆ, Blepharoptosis.

PTYALISM, Salivation.

PTYALISMUS ACUTUS MELLITUS, see Salivation—p. Acutus sympatheticus, see Salivation—p. Iners, Slavering.

PTYALOGOGUE, Sialogogue.

PTYALON, Saliva.

PTYASMAGOGUE, Sialogogue.

PTYELON, Saliva, Sputum.

PTYSIS, Exspuition.

PTYSMA, Exspuition.

PUANTEUR, Dysodia.

PUBERTAS, Ephebia.

PUBERTY, *Puber'tas*, *Hebē*, *Pubes*, *Aphrodisia*, *Ephebi'a*, *Ephebotēs*, *Ephebo'synē*; from *pubescere*, 'to begin to have hair on the chin and sexual organs.' The period of life at which young people, of both sexes, become nubile. According to the civil law, puberty occurs at 12 years in females, and 14 in boys. The period, however, varies somewhat in different climates, and in different individuals of the same climate.

PUBES, *Epis'chion*, *Cteis*, *Pecten*; the *Pubic region*. Same etymon. The middle part of the hypogastric region; so called, because it is covered with hair, in both sexes, at the period of puberty. The hair is also called *Pubes*, *Lanugo Pudend'rum*, and, of old, *pubertas* signified the same.

PUBES, Puberty.

PUBLÆUS, Pubic.

PUBIC, *Pubian*, *Pub'icus*, *Pubiæus*, (F.) *Pubien*. That which belongs to or concerns the pubis.

PUBIC ARCH or *Arch of the Pubis*, (F.) *Arcade pubienne*. The arch at the anterior part of the inferior circumference of the pelvis. It is more expanded in the female than in the male; to correspond with the additional functions, which she has to execute.

PUBIC ARTICULA'TION, or *Sym'physis Pubis*, results from the junction of the ossa pubis. The medium of union is cartilage.

PUBIC LIG'AMENTS are two very solid, fibrous fasciæ, situate before and beneath the symphysis pubis, which they strengthen. The one is called the *anterior pubic ligament*, the other, the *inferior or subpubic*.

PUBIEN, Pubic.

PUBIO-COC CYGIEN-ANNULAIRE, *Pubio-coccyge'us annula'ris*. Dumas gave this name to the levator ani and ischio-coccygeus, which he considered a single muscle.

PUBIO-COC CYGIEN-ANNULAIRE, *Levator Ani*—p. *Fémoral*, *Pectinalis*—p. *Femoralis*, *Adductor longus femoris*—p. *Ombilical*, *Pyramidalis abdominis*—p. *Prostaticus*, *Compressor prostate*—p. *Sous ombilical*, *Pyramidalis abdominis*—p. *Sternal*, *Rectus abdominis*.

PUBIS, OS, *Epis'e'on*, *Epis'i'on*, *Share Bone*, *Os Pec'tinis*. The anterior part of the os innominatum; so called because it corresponds to the genital organs and pubic region. The *angle of the pubis* is formed by the union of the body and rami of each side.

PUBLICÆ PARTES. Those organs are so called, the object of whose functions is the nutrition of all the others. Such are the digestive and respiratory organs.

PUCCOON, *Sanguinaria Canadensis*.

PUDDING-GRASS, *Mentha pulegium*.

PUDENDA, Genital organs.

PUDEND'AGRA. A hybrid word; from *pudenda*, (*pudere*, 'to be ashamed,') 'the genital organs,' and the Greek *αγρα*, 'a seizure.' According to some, this term means pain in the genital parts: according to others, it is synonymous with syphilis, (q. v.)

PUDEN'DAL HERNIA. Hernia, which descends between the vagina and ramus ischii, and forms an oblong tumour in the labium; traceable in the pelvis, as far as the os uteri.

PUDENDUM, FEMALE, Vulva—p. Muliere, Vulva.

PUDENDUS, Pudic.

PUDIC, *Pudi'cus*, *Puden'dus*, (F.) *Honteux*. Same etymon. That which causes shame. A name given to the genital organs (q. v.) as well as to different other parts.

PUDIC ARTERIES are distributed to the organs of generation. They are,—1. The *internal Pudic*, *Sous-pubienne* (Ch.) *Arteria Pudi'ca*, *A. puden'da commun'is*, (F.) *Artère honteuse interne*, *Gen'ital Artery*. It is furnished by the hypogastric, and divides into two branches; the one—the *inferior or perineal*—which gives off the inferior hemorrhoidal and the artery of the septum; and the other—the *superior*, (F.) *Ischio-pénienne*—which furnishes the transverse perineal artery, and divides into two branches; the *artery of the corpus cavernosum*, and the *dorsalis penis*. This latter, in the female, has the name *Dorsalis Clitoridis*. 2. The *external Pudic Arteries*, *A. scrotales ou vulvaires* (Ch.), *A. honteuses externes*, which are two in number. The one is *superficial or subcutaneous* and the other *deep-seated or subaponeurotic*. They are given off from the femoral artery or some one of its branches; and are distributed to the external parts of generation.

PUDIC NERVE, (F.) *Nerf honteux*, *Nerf Ischio-pénien ou Ischio-clitorien* (Ch.), is a branch furnished by the sacral plexus, which is distributed to the genital organs; and, especially, to the penis in man, and the clitoris in the female.

PU'ERILE, *Puer'ilis*, from *puer*, 'a child.' A term applied to the respiration when it becomes very sonorous by the stethoscope, as in healthy children.

PUER'PERA, from *puer*, 'a child,' and *parere*, 'to bring forth.' *Tokas*, *Lochos*; a *lying-in woman*, (F.) *Femme en Couche*, *Accouchée*. A female in child-bed. One recently delivered.

PUERPERAL CONVULSIONS, *Eclampsia gravidarum et parturientium*.

PUER'PERAL FEVER. Any fever occurring during the puerperal state—*Febris Puerpera'rum*, *Child-bed fever*. Most commonly restricted to a malignant variety of Peritonitis, (q. v.)

PUERPERIUM, Parturition.

PUFF-BALL, *Lycopodon*.

PUFF'INESS, from (D.) *poffen*, 'to blow;' *Infla'tio*, *Tumefac'tio mollis*, (F.) *Bouffissure*, *Boursofflure*. A soft intumescence, without redness, which may be partial or general, and be produced by an accumulation of serous fluid, extravasation of blood, effusion of air into the subcutaneous cellular tissue, &c. Puffiness is most frequently seen in the face and legs; and, sometimes, appears around a wound.

PUGILLUS, *Drax*, *Drachion*, from *pugnis*, 'the fist;' *Dragmis*, (F.) *Pincée*. The quantity of any substance, which may be taken with the

end of two or three fingers. The eighth part of a handful.

PULEGIIUM, *Mentha pulegium*—p. Cervinum. *Mentha cervina*.

PULEX PENETRANS, *Chique*.

PULICARIS, *Pulicula'ris*, from *pulex*, 'a gnat.' An epithet given to cutaneous eruptions resembling gnat-bites;—and, also, to the diseases in which such eruptions occur.

PULICARIS HERBA, *Plantago psyllium*.

PUELLINA, MINERAL WATERS OF.

These Bohemian springs contain sulphates of soda and magnesia, and chloride of magnesium.

PULMO, *Pulmo'nes*, by transposition of the letter / from *Pleumom*, πλεωμογ, *Pneumon*, *Pleumom*, *Spiramentum animæ*, *Ergasterion spiritus*, *Flabellum et ventidibrum cordis*, the *Lung*. The essential organ of respiration, which is double, and occupies the two sides of the chest. The lungs, which are of a spongy, soft, flexible, compressible, and dilatable structure, fill exactly the two cavities of the thorax, and are separated from each other by the mediastinum and the heart. The right lung, which is shorter and broader than the left, is divided, by two oblique fissures, into three unequal lobes. The left has only two lobes, and consequently only one fissure. At the internal surface of those organs, which is slightly concave, there is, about the middle, a pedicle, formed by the bronchia and pulmonary vessels, and called, by anatomists, the *root of the lungs*, (F.) *Racine des Poumons*. Essentially, the lungs are composed of prolongations and ramifications of the bronchia, and of the pulmonary arteries and veins,—the divisions of which are supported by a fine, cellular tissue.

When the surface of the lungs is examined in a clear light, we may see, even through the pleura, that their parenchyma is formed by the aggregation of a multitude of small vesicles, of an irregularly spheroid or ovoid shape, full of air, and separated by white and opaque septa. These vesicles are called *air-cells*. Along the partitions or septa is deposited, in greater or less quantity, the *black pulmonary matter*, (F.) *Matière pulmonaire noire*, as it has been called, which seems to be natural. Sometimes it is seen in points; at others, in spots. The colour of the lungs varies according to age and other circumstances. In youth, it is more red; and, afterwards, grayish or bluish; often, as if marbled. The pleura pulmonalis is their investing membrane. The air is carried to the lungs by means of the trachea and bronchia. The black venous blood, which requires oxygenation, is conveyed to them from the heart, by the pulmonary artery; and, when it has undergone this change, it is returned to the heart by the pulmonary veins. The blood-vessels, inservient to the nutrition of the lungs, are the *bronchial arteries and veins*. The pulmonary lymphatics are very numerous. Some are superficial; others, deep-seated. They pass, for the most part, into the *bronchial ganglions or glands*. The nerves are furnished by the pulmonary plexus.

PULMONAIRE DES FRANCAIS, *Hieracium murorum*.

PULMONA'RIA, *P. officinalis*, *P. Maculata*, *P. Maculosa*, *Lungwort*, *Spotted Lungwort*, *Jerusalem Consolida*, *Jerusalem Sage*, *Spotted Corey*, (F.) *Sauge de Jerusalem*. Family, Bora-

ginea. *Sex. Syst.* Pentandria Monogynia. The leaves of this plant have been used as demulcents and pectorals; partly from their resemblance to lungs; and, partly, because they manifest a slightly mucilaginous taste. The plant is not worthy of notice.

PULMONARIA, *Pneumonia*—p. *Arborea*, *Lichen pulmonarius*—p. *Gallica*, *Hieracium murorum*.

PULMONARY, *Pulmona'ris*, *Pulmona'lis*. That which relates or belongs to the lungs. A name given to various parts.

PULMONARY ARTERY, *Artéria pulmona'ris*, arises from the upper and left part of the right ventricle of the heart; whence it passes obliquely upwards and to the left side; dividing into two trunks, opposite the second dorsal vertebra—one passing to each lung. At its origin, it is furnished with three sigmoid or semilunar valves. It carries the blood to the lungs for aeration.

PULMONARY MATTER, BLACK. See *Pulmo*.

PULMONARY PLEXUS, *Plexus pulmonaris*. A considerable nervous network, situate behind the bronchia; and which is formed by the filaments of the pneumogastric nerve or par vagum, and by other filaments from the inferior cervical ganglion and the first thoracic ganglia. This plexus forms a kind of areolar web, with numerous meshes of different sizes, in which vessels are lodged, surrounded by much cellular tissue. This plexus sends filaments to the bronchia, which they accompany to their extremities.

PULMONARY VEINS, *Venæ pulmona'res*, *Artéria venosæ*. These arise in the lungs from the final terminations of the arteries of the same name; collect in ramusculi and rami of greater and greater size, and ultimately unite in four trunks; two of which issue from each lung to open into the left auricle of the heart. The pulmonary veins have the same structure as the other veins of the body; from which they differ, in containing arterial blood, as the pulmonary artery differs from the others in conveying venous blood. They carry the blood back to the heart after aeration.

PULMONIA, *Phthisis pulmonalis*, *Pneumonia*.

PULMONIC, *Pulmon'icus*, *Pneumon'icus*, *Pulmona'rius*. One attacked with pneumonia—one labouring under disease of the lungs. Any thing relating or belonging to the lungs. A medicine for the lungs.

PULP, *Pulpa*, *Pulpa'men*, *Sarx*. The soft and parenchymatous parts of vegetables, reduced to a paste by the operation of pulping.

PULPA CASSIE. See *Cassia fistula*—p. *Prunorum sylvestrium condita*, *Conserva pruni sylvestris*.

PULPAMEN, *Pulp*.

PULPE DENTAIRE, *Dental pulp*.

PULPEZIA, *Apoplexy*.

PULPING, *Pulpation*, *Pulpatio*. An operation—the object of which is to reduce certain vegetable substances to a pulp. For this purpose, they are bruised in a mortar, and then passed through a hair sieve, by the aid of a wooden spatula, called a *Pulper*, (F.) *Pulpoire*.

PULPOIRE. See *Pulping*.

PULSATILLA NIGRICANS, *Anemone pratensis*—p. *Vulgaris*, *Anemone pulsatilla*.

PULSATILLE NOIRE, *Anemone pratensis*, —*p. des Prés*, *Anemone pratensis*.

PULSA'TION, *Pulsa'tio*, *Sphygmōs*, *Sphysis*, *Pedē'sis*, *Pedeth'mos*, (F.) *Battement*. The beating of the heart and arteries. Also, the beating felt in an inflamed part.

PULSATIVUS, Throbbing.

PULSE, from *pulso*, 'I beat'; *Pulsus*, *Pulsa'tio*, *Pulsus cordis et arteria'rum*, *Ictus cordis et arteria'rum*, *Incursum arteria'rum*, *Sphygmōs*, *Diasphysis*, (F.) *Pouls*. Beating of the arteries, produced by the afflux of the blood pro-

pelled by the heart in its contractions. For the sake of convenience, we choose the radial artery at the wrist to detect the precise character of the pulse. These characters relate to the number of pulsations in a given time; to their degrees of quickness; hardness, and strength; to the equality or inequality, either of the pulsations themselves or of their intervals; to the development or fulness of the artery, and to the different impressions it may produce on the finger.

The following estimates have been made of the pulse at various ages:

Ages.	Number of beats per minute, according to		
	HEBERDEN.	SÖMMERING.	MÜLLER.
In the embryo,	—	—	150
At the birth,	130 to 140	Do.	Do.
One month,	120	—	—
One year,	120 to 108	120	115 to 130
Two years,	108 to 90	110	100 to 115
Three years,	90 to 80	90	90 to 100
Seven years,	72	—	85 to 90
Twelve years,	70	—	—
Puberty,	—	80	80 to 85
Adult,	—	70	70 to 75
Old age,	—	60	50 to 65

It does not appear, from recent researches, that the pulse of the aged is less frequent, but the contrary. In general, the pulse is more frequent in females and in irritable persons, than in males and those of an opposite temperament. In the healthy state, the pulse, besides having the proper number of pulsations, is neither hard nor unusually soft; it is moderately developed; of a medium strength; and perfectly equal, both as regards the pulsations and their intervals. In diseases it wanders, more or less, from these physiological conditions. The different characters of the pulse, that have been enumerated, are remarkably great. In a Dictionary, it is necessary to detail them, although many of them are not now regarded; and some are ridiculous. At times, when an impediment exists to the flow of blood along the pulmonary arteries, either owing to mechanical obstruction or to diminished force of the ventricle, a reflux takes place, along the veins, giving rise to the '*venous pulse*.'

PULSE, ARDENT, *Pulsus ardens*, (F.) *Pouls ardent*, *Pouls élevé*. One which seems to raise itself to a point in order to strike the finger.

PULSE, CAPRIZANT, *Pulsus Caprizans*, (F.) *Pouls caprisant*. One, which seems to leap, as it were.

PULSE, COMPLEX, (F.) *Pouls combiné ou composé*, *P. compliqué*. A pulse, which has the character of several critical pulses united.

PULSE, CONTRACTED, (F.) *Pouls serré*, *P. concentré*. One, whose pulsations are narrow, deep, and slightly hard.

PULSE, CONVULSIVE, *Pulsus convulsivus*, (F.) *Pouls convulsif*. That which is unequally frequent or unequally hard; in short, which resembles the irregular pulsations of a muscular fibre in a state of convulsion.

PULSE, CRITICAL, *Pulsus criticus*. A pulse which, after having possessed the characters of irritation, becomes free, open, soft, &c.

PULSE, DEEP, (F.) *Pouls profond*. One which cannot be felt without difficulty, and without strong pressure by the finger.

PULSE, DEFICIENT, *Pulsus Deficiens*, (F.) *Pouls défaillant*, *P. insensible*. One which seems, every instant, about to cease.

PULSE, DEPRESSED, *Pulsus depressus*, (F.) *Pouls déprimé*. That which is deep and weak.

PULSE, DEVELOPED, (F.) *Pouls développé*. That which is broad, full, strong, and frequent.

PULSE, DICTOTIC, *Pulsus Dicrotus*, *P. bifuriens*, (F.) *P. dicrote*, *P. rebondissant*, *P. redoublé*. That in which the finger is struck twice at each pulsation: once lightly, the other time more strongly.

PULSE, EQUAL, *Pulsus æqualis*. That in which the pulsations resemble each other, and return at equal intervals.

PULSE, FEBRILE, *Pulsus febrilis*. One very frequent.

PULSE, FEEBLE, WEAK. *Pulsus debilis*, (F.) *Pouls faible*. One which strikes the finger feebly.

PULSE, FILIFORM, *P. thready*. One which resembles a thread slightly vibrating.

PULSE, FORMICANT, *Pulsus Formicans*, (F.) *Pouls formicant*. One which resembles, by being small and scarcely perceptible, the motion of an ant.

PULSE, FREQUENT, (F.) *P. agité*, *P. précipité*. One which strikes more frequently than usual in a given time.

PULSE, FULL, *Pulsus plenus*, (F.) *Pouls plein*. One which gives the notion of great repletion in the vessel.

PULSE, GUTTURAL, *Pulsus gutturalis*, (F.) *Pouls guttural*. A pulse which has been supposed to indicate the termination of affections of the throat.

PULSE, HARD, *Pulsus durus*, (F.) *Pouls dur*. That in which the pulp of the finger seems to yield to the pulsation.

PULSE, HEMORRHOIDAL, (F.) *Pouls des hémorroides*. A critical pulse, announcing the appearance of the hemorrhoidal flux. It is described as unequal;—the pulsations not being alike in force, and still less the intervals.

PULSE, HEPATIC, (F.) *Pouls du Foie*. A pulse imagined to indicate affections of the liver. It is not worthy of description.

PULSE INFERIOR, (F.) *Pouls inférieur, P. abdominal, P. ventral*. One supposed to announce evacuations below the diaphragm.

PULSE, INTERCURRENT. One in which a superfluous pulsation seems to occur from time to time.

PULSE, INTERNITENT, (F.) *Pouls intercadent*. One in which the pulsations fail from time to time.

PULSE, INTESTINAL, (F.) *Pouls des Intestins, P. de la diarrhée*. A critical pulse, presumed to announce an evacuation by the intestines.

PULSE, INTRICATE, Pulsus intricatus, (F.) *Pouls embarrassé*. That which is but little developed, and unequally slow.

PULSE, IRREGULAR, Pulsus anormalis. One whose pulsations are unequal, and return at unequal intervals.

PULSE OF IRRITATION, Pulsus ab irritatio[n]e seu acriticus. It is frequent, hard, and contracted.

PULSE, JARRING, P. vibrating—p. Jerking, Pulse, sharp.

PULSE, LANGUID, (F.) *Pouls languissant*. A slow and feeble pulse.

PULSE, LARGE, Pulsus crassus, P. magnus, (F.) *Pouls grand, P. large*. That which is large and full.

PULSE, LONG. One which strikes the finger to a great extent in length.

PULSE, LOW, Pulsus humilis, (F.) *Pouls bas*. One in which the pulsations are scarcely perceptible.

PULSE, NASAL, (F.) *Pouls nasal, P. capital, P. du Nez*. One supposed to announce the end of an irritation in the nasal fosse.

PULSE, NATURAL, (F.) *Pouls naturel des adultes, P. parfait, P. des adultes, P. modéré*. One that is equal and regular in strength and frequency; compressible, and devoid of hardness.

PULSE, ORGANIC, (F.) *Pouls organique*. One which indicates the affected organ, or the organ by which any evacuation will take place.

PULSE, PECTORAL, (F.) *Pouls de l'expectoration*. A critical pulse, announcing the termination of some pulmonary irritation.

PULSE, QUICK. One which strikes sharply, but not forcibly, against the finger.

PULSE, REGULAR, Pulsus normalis aut regularis. One whose pulsations are equal, and succeed each other at equal intervals.

PULSE, RESISTING, (F.) *Pouls résistant*. One a little tense, a little hard.

PULSE, SHARP, (F.) *Pouls prompt, P. vite, P. vif*. One which strikes the finger sharply, rapidly. When to a greater extent, it is called a *jerking pulse*.

PULSE, SLOW, Pulsus tardus, (F.) *Pouls lent, P. tardif, P. rare*. One which strikes the finger slowly.

PULSE, SMALL, Pulsus parvus, (F.) *Pouls petit*. One whose pulsations are slender and weak.

PULSE, SOFT, Pulsus mollis, (F.) *Pouls mou*. One which yields under the finger.

PULSE, SIMPLE, Pulsus simplex. A critical pulse, indicating an evacuation by one organ only.

PULSE, STOMACHAL, (F.) *Pouls stomacal, P. de l'estomac*. One supposed to announce an evacuation by the stomach.

PULSE, STRONG, Pulsus fortis, (F.) *Pouls fort, P. véhément*. One which strikes the finger strongly.

PULSE, SUPERIOR, Pulsus Superior, (F.) *Pouls supérieur*. A critical pulse, supervening on irritation of organs situate above the diaphragm.

PULSE, SUPPLE, Pulsus elasticus, (F.) *Pouls souple*. One in which the pulsations have strength without hardness.

PULSE OF SWEAT, Pulsus Sudorialis, (F.) *Pouls Sudoral, P. de la sueur*. A critical pulse, indicating an approaching perspiration.

PULSE, TENSE, CORDY, Pulsus tensus, (F.) *Pouls tendu, P. roide*. One in which the artery resembles a cord fixed at its two extremities. When resembling a wire, it is called *wiry*.

PULSE, THREADY, P. filiform.

PULSE, TREMULOUS, Pulsus tremulus, (F.) *Pouls tremblant, P. palpitant*. One in which each pulsation oscillates.

PULSE, UNDULATING, (F.) *Pouls ondulant, P. ondoyant*. One which resembles, in its movements, those of the waves.

PULSE, UNEQUAL, Pulsus inæqualis, (F.) *Pouls inégal*. One whose pulsations are not alike, or return at unequal intervals.

PULSE, URINAL, Pulsus Urinalis, (F.) *Pouls de l'urine*. A critical pulse, fancied to denote an approaching evacuation of urine.

PULSE, UTERINE, Pulsus Uterinus, (F.) *Pouls Utérin, P. de la Matrice, P. des Règles*. One which indicates the flow of the menses, or the occurrence of metrorrhagia.

PULSE VENOUS, Pulsus venarum.

PULSE, VERMICULAR. That which imitates the movement of a worm.

PULSE, VIBRATING; a Jarring Pulse. One in which the artery seems to vibrate like a musical string.

PULSUS, see *Pulse*—*p. Acriticus*, *Pulse of irritation*—*p. Aequalis*, *Pulse, equal*—*p. Anormalis*, *Pulse, irregular*—*p. Biferiens*, *P. dicrotus*—*p. Caprizans*, *Pulse, caprizant*—*p. Crassus*, *Pulse, large*—*p. Debilis*, *Pulse, feeble*—*p. Deficiens*, *Pulse deficient*—*p. Dicrotus*, *Pulse dicrotic*—*p. Durus*, *Pulse, hard*—*p. Elasticus*, *Pulse, supple*—*p. Formicans*, *Pulse, formicant*—*p. Fortis*, *Pulse, strong*—*p. Humilis*, *Pulse, low*—*p. Intricatus*, *Pulse intricate*—*p. Magnus*, *Pulse, large*—*p. Mollis*, *Pulse, soft*.

PULSUS MYRUS, (F.) *Pouls myure*. One which goes on diminishing. See *Myurus*.

PULSUS NERVINUS, *Pulse of irritation*—*p. Normalis*, *Pulse, regular*—*p. Parvus*, *Pulse, small*—*p. Plenus*, *Pulse, full*.

PULSUS SERRINUS, (F.) *Pouls serrin, P. serratile*. One which strikes, sometimes strongly, at others feebly, and recalls the idea of a saw.

PULSUS STRICTUS, (F.) *Pouls étroit*. One that strikes the finger to a small extent in breadth.

PULSUS SUDORALIS, *Pulse of sweat*—*p. Tardus*, *Pulse, slow*—*p. Urinalis*, *Pulse, urinal*—*p. Uterinus*, *Pulse, uterine*.

PULSUS VACUUS, (F.) *Pouls vide*. One which gives the idea of emptiness of the artery.

PULSUS VENARUM, Venous Pulse, Phlebop'lia. A pulsation occasionally noticed in the jugular veins. It is owing to some of the blood of the right ventricle reflowing into the right auricle, and communicating an impulse to the venous blood arriving in the auricle through the descending cava. It is often a sign of impediment to the flow of blood along the pulmonary artery.

PULSILEGIUM, Pulsilo'gium, Pulsim'eter, from *pulsus*, 'the pulse,' and *lego*, 'I tell.' *Sphygmom'eter*. Any instrument for measuring the quickness or force of the pulse.

PULSIMANTIA; from *pulsus*, and *μαντεια*, 'divination.' The art of predicting or prognosticating by the pulse.

PULSIMETER, Pulsilegium.

PULTICE, Cataplasm.

PULTICULA, Bouillie.

PULVERIZATION, Pulveriza'tio, Pulvera'tio, from *pulvis*, 'dust,' *Coniosto'sis*. The operation of dividing substances, so as to reduce them to powder.

PULVILLUS, Pad, Bourdonnet.

PULVINAR HUMULI, see *Humulus lupulus*—p. *Parvum, Pad*.

PULVIS, Conis, (F.) Poudre. A substance, reduced into small particles by pulverization. *Simple powders* are those of a single substance; *compound*, those which result from a mixture of several different powders. An *impalpable powder* is one which is so fine, that it can scarcely be felt under the finger. A compound powder was, formerly, called *Species, (F.) Espece*.

PULVIS ABSORBENS, P. de magnesiâ compos.—p. *Alexiterius, P. contrayervæ comp*—p. *Alexiterius, P. ipecacuanhæ compositus*—p. *Algarothii, Algaroth*.

PULVIS ALOES COMPOSITUS, Compound Powder of Aloes, Pulvis Aloës cum Guaiaco, P. aloët'icus cum Guaiaco. (*Aloës spicat. ext. ʒiiss, guaiac. gum. res. ʒj, pulv. cinnam. comp. ʒss.* Rub the aloes and guaiacum separately, then mix the whole. *Ph. L.*) Cathartic, stomachic, and sudorific. Dose, gr. x to ʒj.

PULVIS ALOES CUM CANELLA, Pulvis aloës et canella, Powder of Aloes with Canella, Species Hi'eræ picræ, Hiera picra, Pulvis Aloët'icus. (*Aloës lbj, canellæ ʒiiij.* Rub separately into a powder, and mix. *Ph. U. S.*) A warm cathartic. Dose, gr. x to ʒj.

PULVIS ALOES CUM GUAIACO, P. a. compositus—p. *Aloeticus, P. aloes cum canellâ*—p. *Aloeticus, Hiera picra*—p. *Aluminosus, P. sulphatis aluminæ compositus*—p. *Aluminis compositus, P. sulphatis aluminæ compositus*—p. *Aluminis kinosatus, P. sulphatis aluminæ compositus*.

PULVIS DE AMA'RIS COMPOSITUS, Pulvis antiarthriticus amar'us, (F.) Poudre antiarthritique amère. (*Rad. gentian, aristoloch. rotund., aa p. 3, flor. centaur. min. p. 4, fol. chamaedr. chamæpith. manipul. f. pulvis, Ph. P.*) In gouty affections, dyspepsia, &c. Dose, gr. xx.

PULVIS ANGELICUS, Algaroth—p. *Anodynus, P. ipecacuanhæ comp.*—p. *Antacidus, P. cretæ compositus*—p. *Antiacidus, P. de magnesiâ compos.*—p. *Antiarthriticus amarus, P. de amaris compositus*—p. *Antiarthriticus purgans, P. de sennâ, scammonæ et lignis*—p. *Antiasmaticus, P. de sulphure et scillâ*.

PULVIS ANTILYS'SUS, Mead's Powder against the bite of a mad dog. It consisted of ash-

coloured liverwort in powder, with an equal quantity of black pepper; a drachm and a half of the two forming a dose for an adult.

PULVIS ANTIMONIALIS, Antimonial powder.

PULVIS DE ARO COMPOSITUS, Compound Powder of Arum, (F.) Poudre of Birkmann. (*Rad. ari, acori veri, pimpinell. saxifrag. aa 40 p, ocul. cerncor. ppt. 12, cinnam. 7 p, potassæ sulph. 6 p, ammoniæ muriat. 2 p, f. pulv. Ph. P.*) Sternutatory.

PULVIS AROMATICUS, P. cinnamomi compositus.

PULVIS ASARI COMPOSITUS, P. sternutatorius, P. errih'nus, P. capit'lis Sancti An'geli, P. cephal'icus, Cephalic snuff, Compound Powder of Asarabac'a, (F.) Poudre d'asarum composée dite sternutatoire, P. de Saint-Ange. (Folior. asar. Europ. p. tres., fol. origan. majoranæ, flor. lavand. spic., sing. p. 1. Rub into powder. *Ph. L.*) Sternutatory.

PULVIS AURI, see Gold—p. e. *Bolo compositus cum opio, P. cretæ compositus cum opio*—p. e. *Bolo compositus sine opio*, see *P. cretæ compositus*—p. *Cambogiæ compositus, P. e gummi guttâ*—p. *Capitalis Sancti Angeli, Pulvis asari compositus*—p. *Carbonatis calcis compositus, P. cretæ compositus*—p. *Cardiacus, P. contrayervæ comp.*—p. *Carthusianorum, Antimonii sulphuretum rubrum*—p. *Catharticus, P. scammonæ comp.*—p. *Cephalicus, P. asari, compositus*.

PULVIS CINNAMOMI COMPOSITUS, Compound Powder of Cin'namon, Pulvis seu Species Imperato'ris, P. vitæ Imperato'ris, P. Diarom'aton, Species diacinnamo'mi, S. lætificant'es Rhazis, Tra'gea aromati'ca, Species Diam'bræ sine odord'is, Species aromati'cæ, Pulvis aromaticus, (Ph. U. S.) (F.) Poudre de canelle composée ou aromatique. (*Cinnam. zingib. aa ʒij, cardam. myrist. aa ʒi.* Rub to a fine powder. *Ph. U. S.*) Stimulant and carminative. Dose, gr. x to ʒj.

PULVIS COBBI seu TUNQUINEN'SIS. The famous Tonquin powder, introduced into England by a Mr. Cobb. It was composed of 16 grains of musk, and 48 grains of cin'abar mixed in a gill of arrack. It was formerly regarded as a specific in hydrophobia.

PULVIS COMITIS WARWICENSIS, P. Cornachini—p. *Comitissæ, Cinchona*.

PULVIS CONTRAYERVÆ COMPOSITUS, Lapis contrayeræ, Contrayeræ balls, Compound Powder of Contrayer'va, Pulvis cardiacus, P. alexite'rius, P. Muntua'nus. (*Contrayero. rad. contrit. ʒv, test. præp. lbiss. Mix. Ph. L.*) Stimulant and sudorific. Dose, gr. xv to ʒss.

PULVIS CORNACHI'NI, Diacellates'son Paracelsi, Earl of Warwick's Powder, Pulvis Oz'ydii Stibii compositus, Pulvis Com'itis Warwicensis, Pulvis de Tribus, Cerberus Triceps, Pulvis Scammo'nii antimonid'is. (F.) Poudre Cornachine. (Scammon. Alep., potass. supertart., antim. diaph. aa p. æ. f. pulvis *Ph. P.*) Cathartic. Used chiefly in cutaneous diseases. Dose, ʒss to ʒj.

PULVIS CORNU USTI CUM O'PIO, Pulvis opid'us, Powder of Burnt Hartshorn with opium, (F.) Poudre de corne brûlée avec l'opium. (*Opii duri cont. ʒj, corn. ust. et præp. ʒj, coccor. cont. ʒj. Mix. Ph. L.*) Ten grains contain one of opium. Anodyne.

PULVIS CRETACEUS, P. cretæ compositus.

PULVIS CRETÆ COMPOSITUS, P. Carbonat'is Calcis compositus, Compound Powder of chalk,

P. cretæceus, *Species Scordio sine opio*, *Di-ascordium*, *Pulvis antac'idus*, *P. terrestris*, *Species Diacret*, with Bole Armeniac in place of chalk—the *Pulvis e Bolo compositus sine opio*, (F.) *Poudre de craie composée*. (*Cretæ ppt. bss. cinnam. cort. ʒiv, tormentill. rad., acaciæ gum., sing. ʒijj, pip. long. fruct. ʒiv*. Reduce separately to a fine powder, and mix. *Ph. L.*) Antacid, stomachic, absorbent. Dose, gr. xx to ʒij.

PULVIS CRETÆ COMPOSITUS CUM OPIO, *Compound Powder of Chalk with opium*, *Pulvis e Cretâ compositus cum opio* (with Bole Armeniac instead of chalk—*Pulvis e Bolo compositus cum opio*), *Species e Scordio cum opio*, (F.) *Poudre de craie composée avec l'opium*. (*Pulv. cret. c. ʒvjss, opii duri cont. ʒiv. Mix. Ph. L.*) Contains one grain of opium in 40. Anodyne and absorbent. Dose, ʒj to ʒij.

PULVIS DIAPHORETICUS, *P. ipecacuanhæ comp.*—*p. Diapnoicus*, *P. ipecacuanhæ comp.*—*p. Diaromat*, *P. cinnamomi compositus*—*p. Diasenæ*, *P. sennæ compos.*—*p. Diaturpethi compositus*, *P. jalapæ compositus*.

PULVIS DUCIS PORTLANDIÆ, *Duke of Portland's Gout Powder*. (*Rad. aristoloch., gentianæ summit, chamædr., centaur. min. aa p. æ.*) Dose, ʒss to ʒj.

PULVIS EMMENAGOGUS, *P. myrrhæ compositus*—*p. Epilepticus Marchionum*, *P. de magnesiâ compositus*—*p. Errhinus*, *P. asari compositus*—*p. Galactopæus*, *P. de magnesiâ compos.*

PULVIS E GUMMI GUTTÂ, *P. Cambog'ie compositus*, *P. hydragog'us*, *Camboge Powder*, (F.) *Poudre hydragogue ou de gomme gutte*, *P. de Quercetanus*, (*Rad. jalap. 24 p., rad. mechoacan, 12 p., cinnam. et rhei. aa 8 p., gum. cambog. 3 p., fol. soldanellæ sicc. 6 p., semin. anisi 12 p., fiat pulvis. Ph. P.*) A drastic cathartic. In anasarca and in worms. Dose, gr. xv to xxx.

PULVIS GUMMOSI ALCALINUS, *Sapo vegetabilis*, (F.) *Poudre de savon végétal*. (*Guaiac. pulv. 32 p., potass. carb. 4 p.* Make into a powder. *Ph. P.*) Antacid.

PULVIS EX HELMINTHOCOR'IO COMPOSITUS, *P. vermif'ngus absque mercurio*, (F.) *Poudre vermifuge sans mercure*. (*Fuc. helminthocort., sem. contra., summitat. absinth., tanacetii, fol. scordii, sennæ, rhæi. aa p. æ, fiat pulvis. Ph. P.*) Dose, ʒj to ʒij.

PULVIS HYDRAGOGUS, *P. e gummi guttâ*—*p. Hydragryi cinereus*, see *Hydragryi oxydum cinereum*—*p. Hypnoticus*, *Hydragryi sulphuretum nigrum*—*p. Imperatoris*, *P. cinnamomi compositus*—*p. Incisivus*, *P. de sulphure et scillâ*—*p. Pro infantibus*, *P. de magnesiâ compos.*—*p. Infantum*, *P. de magnesiâ compos.*—*p. Infantum antacidus*, *P. de magnesiâ compositus*.

PULVIS IPECACUANHÆ COMPOSITUS, *P. alexit'rius*, *P. anod'ynus*, *P. diaphoreticus*, *P. diapnoicus*, *P. sudorificus Doveri*, *Compound powder of Ipecacuanha*, *P. Ipecacuanhæ et Opii*, (*Ph. U. S.*) *Dover's Powder*, (F.) *Poudre de Dover ou d'ipeacuanha et d'opium*, *P. de Dover*. (*Ipecacuanh. pulv., opii pulv., sing. ʒj, potassæ sulphat. ʒj. Mix.*) Diaphoretic. Dose, gr. v to gr. xij.

PULVIS IPECACUANHÆ ET OPII, *P. ipecacuanhæ compos.*

PULVIS JALAPÆ COMPOSITUS, *P. Diaturpethi compositus*, *Compound Powder of Jalap*, *Pulvis laxans*, *P. purgans*, *P. laxativus vegetabilis*, *P. laxans cum salē*, *P. jalapæ salinus*, *P. j. tartar-*

icus, *Species Diapalapæ*, (F.) *Poudre de jalap composée*. (*Pulv. jalap. ʒj. potass. bitart. ʒij. Mix.*) Cathartic. Dose, ʒj to ʒij.

PULVIS JALAPÆ SALINUS, *P. jalapæ compositus*—*p. Jalapæ tartaricus*, *P. jalapæ compositus*—*p. de Jalapâ et scammonio compositus*, *P. scammonæ comp.*—*p. Jamesii*, *Antimonial powder*—*p. Jesuiticus*, *Cinchona*—*p. Joannis de Vigo*, *Hydragryi nitrico-oxydum*.

PULVIS KINO COMPOSITUS, *Compound Powder of Kino*, (F.) *Poudre de kino composée*, (*Kino ʒxv, cort. cinnam. ʒiv, opii duri ʒj. Rub each to powder, and mix. Ph. L.*) Astringent. Dose, gr. v to xx.

PULVIS LAXANS, *P. jalapæ compositus*—*p. Laxans cum salē*, *P. jalapæ compositus*—*p. Laxativus vegetabilis*, *P. jalapæ compositus*.

PULVIS DE MAGNESIA COMPOSITUS, *P. Galactopæus*, *P. Nutricum*, *P. Infantum*, *P. Infantum antac'idus*, *P. pro Infantibus*, *P. antac'idus*, *P. absorbens*, *P. epilepticus Marchionum*, *Compound Powder of Magnesiâ*, (F.) *Poudre absorbante et anti-acide*. (*Magnesiæ, succhar. aa p. æ. Mix. Ph. P.*)

PULVIS MANTUANUS, *P. contrayervæ comp.*—*p. Marchionis*, *M. pulvis*—*p. Mercurialis cinereus*, *Hydragryi oxydum cinereum*—*p. ad Mucum pulmonalem liberius ciendum*, *P. de sulphure et scillâ*.

PULVIS MYRRHÆ COMPOSITUS, *P. e Myrrhâ compositus*, *Compound Myrrh Powder*, *Pulvis ad ul'cera tendinum*, *P. Emmenagog'us*, (F.) *Poudre Balsamique*. (*Myrrhæ, sabine, rutæ, castor. Russ. aa ʒj.*) A stimulant, antispasmodic, and emmenagogue. Dose, gr. xv to xl.

PULVIS NUTRICUM, *P. de magnesiâ compositus*—*p. Opiatus*, *P. cornu usui cum opio*—*p. Oxydi stibii compositus*, *P. cornachini*—*p. Parturiens*, *Ergot*—*p. de Phosphate calcis et stibii compositus*, *Antimonial powder*—*p. Principis*, *Hydragryi nitrico-oxydum*—*p. Purgans*, *P. jalapæ compositus*—*p. Quercetanus*, *Hydragryi submurias*.

PULVIS QUERCUS MARINÆ, *Powder of Yellow Bladder-Wrack*. (The wrack in fruit, dried, cleaned, exposed to a red heat in a crucible with a perforated lid, and then reduced to powder. *Ph. D.*) Virtues dependent on the iodine: used, consequently, in bronchocoe, &c. Dose, gr. x to xl.

PULVIS QUERCUS MARINÆ, see *Fucus vesiculosus*.

PULVIS SCAMMONIÆ COMPOSITUS, *Compound Powder of Scammony*, *Pulvis e Scammonio compositus*, *Pulvis Scammonii*, *Pulvis de Jalapâ et Scammonio compositus*, *dictus Catharticus*, (F.) *Poudre cathartique ou Poudre de Scammonée composée*. (*Scammon. ext. jalap. dur., sing., ʒij, zingib. rad. ʒss. Rub separately to a powder and mix. Ph. L.*) Cathartic. Dose, gr. viij to gr. xv.

PULVIS SCAMMONII CUM ALOË, *P. e Scammonio cum Aloë*, *Scammony and Aloes Powder*. (*Scammon. ʒvj ext. jalap. dur., aloës Socotr. aa ʒiss, zing. ʒss. Cathartic. Dose, gr. x to xv.*)

PULVIS SCAMMONII ANTIMONIALIS, *P. cornachini*.

PULVIS SENNÆ COMPOSITUS, *Compound powder of Senna*, *Pulvis e Sennâ compositus*, *P. e Sennâ compositus*, *Pulvis Diasenæ*, (F.) *Poudre de senné composée*. (*Sennæ folior., potass. supertart.*, sing. ʒij, scammon. ʒss, rad. zingib.

ʒij, Ph. L.) Cathartic, hydragogue. Dose, ʒj to ʒj.

PULVIS DE SENNA, SCAMMONIO ET LIGNIS COMPOSITUS, dictus ANTIARTHRITICUS PURGANS, (F.) Poudre de Pêrard. (Gum. Arab., potass. supertart., fol. sennæ, chinæ, aa, 4 p., scammon., rad. sarsapar., chinæ, guaiac. lign. aa 2 p., fiat pulvis. Ph. P.) Purgative. Used to obviate gout. Dose, ʒj.

PULVIS STANNI, see Tin.—p. Sternutatorius, P. asari compositus—p. Stibiatum, Antimonial powder—p. Stypticus, P. sulphatis aluminæ compositus—p. Sudorificus, P. ipecacuanhæ comp.—p. Sudorificus Doveri, P. ipecacuanhæ compositus.

PULVIS SULPHATIS ALUMINÆ COMPOSITUS, P. aluminosus, P. aluminis kinosatus, Pulvis stypticus, Pulvis aluminis compositus, Alumen kinosatum, Compound Alum Powder, (F.) Poudre styptique ou d'alun composée. (Sulphatis aluminæ, p. iv. kino, p. i. Ph. E.) Astringent. In intestinal hemorrhage and diarrhœa. Dose, gr. x to xv.

PULVIS DE SULPHURE ET SCILLA, P. Antiasthmaticus, P. incisivus, P. ad mucum pulmonalem liberius cindum, (F.) Poudre incisive ou anti-asthmaticque. (Sacchar. alb. p. 3. sulphur. lot. p. 2. scillæ. siccat. p. j. Ph. P.) Dose, gr. v. to ʒss.

PULVIS DE SULPHATE POTASSÆ COMPOSITUS, P. temperans Stahlîi, (F.) Poudre tempérante de Stahl. (Potass. sulph. et nitrat. aa 9 p., hydrarg. sulph. rubr. 2 p. Mix. Ph. P.) As an antiphlogistic and in acidity of the first passages. Dose, ʒj to ʒij.

PULVIS E SULPHURE TO HYDRARGYRI NIGRO ET SCAMMONIO, dictus VERMIFUGUS MERCURIALIS, (F.) Poudre vermifuge mercurielle. (Pulv. cornachin., hydrarg. sulphuret. nigr. recent. præp., aa p. æ. Mix. Ph. P.) Dose, ʒj to ʒss.

PULVIS SYMPATHETICUS, Sympathetic powder—p. Temperans Stahlîi, P. de sulphate potassæ compositus—p. Terrestres, P. cretæ compositus.

PULVIS TRAGACANTHÆ COMPOSITUS, Species Diatragacanthæ frigidae, Pulvis e Tragacanthâ compositus, Compound Powder of Tragacanth, (F.) Poudre de gomme adragant composée. (Tragacanth. contus., acacia gummi cont., amyli. sing. ʒiiss. sacch. purif. ʒiij. Ph. L.) Demulcent. In coughs, &c. Dose, ʒss to ʒij.

PULVIS DE TRIBUS, P. cornachini—p. Tunquinensis, P. Cobbii—p. ad Ulcera tendinum, P. myrrhæ compositus—p. Vermifugus absque mercurio, Pulvis ex helminthocorto comp.—p. Vermifugus mercurialis, P. e sulphureto hydrargyri nigro et scammonio—p. Vitæ Imperatoris, P. cinnamomi compositus.

PUMEX, Pumice, (F.) Pierre Ponce. This was formerly employed as a desiccative and dentifrice.

PUMICE, Pumex.

PUMILIO, Nanus.

PUMILUS, see Nanus.

PUNA, Veta, Sorocco. A sickness common in the elevated districts of South America, which attacks those unaccustomed to breathe the rarefied atmosphere. It strongly resembles sea-sickness, with a most acute and depressing throbbing in the head. It does not often affect the respiration considerably.

PUNAISE, Cimex.

PUNCH, Rhizagra, from *pungere*, 'to prick.' *Repulsorium*, (F.) *Repoussoir*. A surgical instrument, used for extracting the stumps of teeth.

PUNCTA OSSIFICATIONIS, Ossification, points of.

PUNCTÆ MUCOSÆ. See Acne.

PUNCTICULÆ, Petechiæ.

PUNCTIO, Paracentesis.

PUNCTUM AUREUM, *Punctura aurea*. Formerly, when an intestinal hernia was reduced—by an incision made through the integuments down to the upper part of the spermatic vessels, a golden wire was fixed and twisted, so as to prevent the descent of any thing down the tunica vaginalis.

PUNCTUM SA'LIENTS. The first point, which makes its appearance, after the fecundation of the germ. It is generally applied to the heart of the embryo.

PUNCTURA, Paracentesis—p. Aurea, Punctum aureum.

PUNCTURE, *Punctura*; from *pungere*, 'to prick'; *Tresis Punctura*, (F.) *Figure*. A wound made by pointed instruments, such as swords, bayonets, needles, thorns, &c. A puncture is generally, of trifling consequence; but, sometimes, it becomes important from the part concerned, or injury done to some nerve.

PUNCTURING. Same etymon. *Com-punctio*, *Paracentesis*, (F.) *Ponction*. The operation of opening, by means of a trocar, lancet, &c., any natural or accidental cavity; with the view of evacuating any fluid, effused or accumulated there. *Paracentesis* is a sort of puncturing.

PUNGENT, (F.) *Pongitif*. Pain is said to be pungent, when it seems as if a pointed instrument were forced into the suffering part.

PUNICA GRANATUM. The *Pomegranate*, *Rhoa*, *roa*, *Rhaa*, *roia*, *Grandum*, *Malogranatum*, (F.) *Grenadier*, *Family*, *Myrtoideæ*. *Ser. Syst. Icosandria Monogynia*. The rind of the fruit, called *Malicoorium*, *Malacorium*, or *Malicorium*; and the flowers—called *Balaustine flowers*—are used in medicine. They have been employed both internally and externally as astringents. The seeds are called *Cocco'nes*, *ροζωρες*. The portion, however, of the plant, that has attained most celebrity, is the bark of the root *Grandi Radicis Cortex*, which appears to be very efficacious in tænia. It is given in decoction, (*Granat. rad. cort. ʒij; Aquæ Oij.*) boiled to Oiss. Dose, f. ʒij. every half hour. Three or four doses are usually sufficient to expel the worm.

The bark contains a peculiar matter called *Grenadin*.

PUNK, Boletus ignarius.

PUOGENIA, Pyogenia.

PUPIL, *Pupilla*, *Pupula*, *Pupilla*, *Visio*, *Coræ*, *Coræ*, *Rhoæ*, *Fenestra* seu *Nigrum* seu *Foramen Oculi*, *Frunella*, *Lumen*, (F.) *Pupille*, *Prunelle*, *Sight of the eye*. The aperture of the iris, through which the rays of light pass, that have to impress the image of an object on the retina. This aperture can be dilated or contracted so as to allow a greater or smaller quantity of luminous rays to penetrate. The pupil, in man, is round, and by it the anterior and posterior chambers of the eye communicate with each other. In the fœtus, during the first

six months of gestation, it is closed by the pupillary membrane.

PUPIL, CLOSURE OF THE, Synechisis.

PUPILLÆ VELUM, Pupillary membrane.

PUPILLARIS HERBA, Lapsana.

PUPILLARY, *Pupillaris*. That which belongs to the pupil.

PUPILLARY MEMBRANE, *Membrana Pupillaris*, *Pupillæ velum*, *Membrana Wachendorfiana*. The central aperture of the iris is closed, in the fœtus, during a certain period of gestation, by a very thin membrane. It disappears in the seventh month.

PUPULA, Pupil.

PUPULÆ. The pulps or extremities of the fingers.

PURBLINDNESS, Myopia.

PURGAMENTA, Excrement—p. Alba, Leucorrhœa—p. Infantis, Meconium—p. Puerperii, Lochia.

PURGATIO, Catharsis—p. Muliebris alba, Leucorrhœa.

PURGATIONES, Menses—p. Menstruæ, Menses.

PURGATIONS, Menses.

PURGATIVE, *Purgativus*, *Purgans*, *Mochlicus*, *Catoreticus*, *Calotericus*, *Cathartic*, (q. v.) (F.) *Purgatif*, from *purgare*, 'to cleanse.' A medicine which operates more powerfully on the bowels than a laxative, stimulating the muscular coat, and exciting increased secretion from the mucous coat.

PURIFORM, *Puriformis*; from *pus*, and *forma*. That which has the appearance of pus.

PURO-HEPATITIS, see Hepatitis.

PURPLES, *Purpura hæmorrhagica*.

PURPURA, *Porphyra*, 'a purple colour.' This word has been employed in many senses. It generally means, livid spots on the skin from extravasated blood, with languor and loss of muscular strength, pains in the limbs.—(F.) *Pourpre*.

In *Purpura Simplex*, *Porphyra simplex*, *Petechiæ sine febrè*, *Phanigmus Petechialis*; *Profusio subcutanea*, *Petechialis Scurvy*, the spots are numerous, but small and flea-bite-shaped; chiefly on the breast, arms, and legs; with paleness of countenance.

In *Purpura Hæmorrhagica*, *Porphyra hæmorrhagica*, *Stomacacæ universalis*, *Hæmorrhagia universalis*, *Petechian'osis*, *Morbus maculosus hæmorrhagicus Werthofii*, *Peliosis*, *Hæmorrhagica petechialis* or *Land Scurvy*, *Purples*, (F.) *Scorbut*, *Hæmucelinose*, *Peliose*—the spots are circular, and of different sizes; often in stripes or patches, irregularly scattered over the thighs, arms, and trunk; with occasional hæmorrhage from the mouth, nostrils, or viscera, and great debility and depression of spirits.

In *Purpura Nautica*, *Porphyra nautica*, *Scorbutus*, *Pechytr'be*, *Gingibradium*, *Gingipedium*, *Scelotyr'be*, *Stomacacæ*, *Scorbutus nauticus* or *Sea scurvy*, (F.) *Scorbut*, there are spots, of different hues, intermixed with the livid, principally at the roots of the hair; the teeth are loose; the gums are spongy and bleeding; the breath is fetid, and the debility universal and extreme. This occurs chiefly at sea, after exposure to a moist, cold, foul atmosphere; with long use of animal food and stagnant water.

All these varieties of purpura resemble each other considerably. In the first two, however, there seems, at times, to be some excitement, which has led to the employment of purgatives,

and even of bleeding, with advantage. They are dependent upon a peculiar diathesis, which has been termed *Scorbutic Cachexia*, *Lues Scorbutica*, and *Cacochymia Scorbutica*. Generally speaking, the use of the mineral acids will be indicated; and, in sea scurvy, vegetable acids must be regarded as the best antiscorbutics. Nitre is, also, a good antiscorbutic, and in cases of great prostration it may be mixed with Peruvian bark or the sulphate of quinia. Tamarinds and cream of tartar, made into drink, are also serviceable. But the great remedy is change from low to cheerful spirits; from filth to cleanliness; and from a cold and damp, to a temperate and dry, climate, with change of food.

The general principles of management are the same in sea, as in land scurvy.

PURPURA, Scarlatina—p. Alba benigna et maligna, Miliary fever—p. Miliaris, Miliary fever—p. Puerperarum, Miliary fever—p. Urticata, Urticaria.

PURPURISUM, Hydrargyri sulphuretum rubrum.

PURSE, Scrotum.

PURSELAINE, Potulaca.

PURSINESS, *Dyspnoea pinguedinosa* (F.) *Pousse*. Short-windedness, generally accompanied by oppressive fatness.

PURULENT, *Purulentus*, *Em'pyos*, *Pyo'des*. That which has the character of pus or consists of pus; as *purulent matter*, a *purulent collection*, &c.

PURULENTIA, Suppuration.

PUS, *Matter*, *Humor purulentus*, *Pyon*. A secretion from inflamed textures, and especially from the cellular membrane. It is, almost always, of the same nature, whatever may be the part it proceeds from. Pus of a good quality,—*laudable pus*,—(F.) *Pus louable*, is of a yellowish-white colour, opaque, inodorous, and of a creamy appearance. Heat, acids, and alcohol coagulate it. When analyzed by Schwilgué, it afforded albumen and water, a particular extractive substance, and a small quantity of soda, phosphate of lime, and other salts.

PUS CORROSIUM, Sanies—p. Malignum, Ichor—p. Malignum, Sanies.

PUSILLATUM, *Pusillatum*, from *pusillus*, 'small.' A coarse powder.

PUSTULA ARDENS, Eczema—p. Oris, Aphthæ.

PUSTULÆ SICCÆ, Lichen.

PUSTULE MALIGNÆ. See Anthrax.

PUSTULE, *Pustula*, from *pus*, *Ecpy'sis*, *Ecthyma*, *Benath*, *Bubë*, *Epanas'tasis*. An elevation of the cuticle, with an inflamed base containing pus. Willan and Bateman reckon four varieties of pustules; the *Phlyzacium*, *Psyracium*, *Achor* and *Favus*. The variolous pustule is often called, by the French, *Grain*; by us, *Pock*.

PUSULATUM, Pusillatum.

PUTREDO, Hospital gangrene, Putrefaction.

PUTREFACTION, *Putrefactio*, *Putrescentia*, *Putrid'ity*, *Putre'do*, *Putrid'itas*, *Sepsis*, *Putrid fermentatio*, *Putrefactive fermentatio*, from *putris*, *putre*, 'rotten,' and *facere*, 'to make.' A decomposition, experienced by animal substances, when deprived of life and placed under particular substances. The presence of water is indispensable; of air, not; for putre-

faction may occur in water, that has been boiled, or in the earth. The temperature most favourable to it, is from 60° to 90° of Fahrenheit. The most common products of putrefaction are water, carbonic acid, acetic acid, ammonia, carburetted hydrogen, and a semi-putrid substance, which is volatilized and has an infected odour. It has been supposed that something like putrefaction may occur in the living body; as in case of putrid fever. To this condition, Piorry has given the name *Typhohæmia*, conceiving it to be owing to alteration of the blood by putrid animal matters.

PUTRESCENTIA, Putrefaction—p. Uteri gravidi, Hystero-malacia.

PUTRID, *Putridus*, from *putrere*, 'to rot,' *Sapros*. An epithet for some affections, in which the matters excreted and the transpiration itself exhale a smell of putridity. It is particularly applied to typhus.

PUTRIDITAS, Putrefaction.

PUTRIDITY, Putrefaction.

PUTRILAGO, (F.) *Putrilage*. Same etymon. The pultaceous matter or slough, which forms in certain gangrenous and other ulcers, and is thrown off.

PUTZOCHILL. See *Myroxylon Peruvianum*.

PYCNOTICA, *Incrassantia*.

PYELITIS, from *πυελος*, 'pelvis,' and *itis*, denoting inflammation. Inflammation of the pelvis and calices of the kidney.

PYELONEPHRITIS, from *πυελος*, 'pelvis,' *νεφρος*, 'kidney,' and *itis*, denoting inflammation. Inflammation of the kidney and of the pelvis and calices.

PYELOS, Pelvis.

PYESIS, Suppuration.

PYGODIDYMUS, *Didyms symphyoperinæus*, *Pygopages*; from *πυγη*, 'the nates,' and *διδυμος*, 'a twin.' A monstrosity, in which twins are united by the sacrum and coccyx.

PYGOPAGES, *Pygodidymus*.

PYLE, Porta.

PYLEMPHRAXIS, from *πύλη*, 'porta,' 'a gate,' and *εμπράξις*, 'obstruction.' Obstruction of the vena portæ.

PYLORIC, *Pyloricus*. Same etymon as *Pylorus*. That which relates to the pylorus. An epithet given to different parts.

PYLORIC ARTERY or *Arteria Coronaria dextra*, (F.) *Petite artère gastrique droite*, arises from the hepatic, and is distributed to the pylorus and to the lesser curvature of the stomach; anastomosing, particularly, with the A. coronaria ventriculi and A. gastro-epiploica dextra.

PYLORIC VEIN follows the same distribution as the artery.

PYLORUS, *Janitor*, *Portonarium*; from *πύλη*, 'a gate,' and *οὐρος*, 'a guardian,' *Ostium ventriculi duodenale* seu *pyloricum* seu *dextrum* seu *inferius*, *Orificium dextrum* seu *inferius* seu *Egreesus* seu *Os inferius* seu *Annullus* seu *Sphincter ventriculi*, *Ostiarium*, *Hostiarium*, (F.) *Pyloræ*. The lower or right orifice of the stomach;—*Orifice intestinal*, (Ch.) Called *Pylorus*, because it closes the entrance into the intestinal canal, and is furnished with a circular, flattened, fibro-mucous ring, which occasions the total closure of the stomach during digestion in that organ. This ring has been called the *Valve of the Pylorus*, *Sphincter Pylori*, (F.) *Valcule de pyloræ*. It is a fold of the mucous

and muscular membranes of the stomach; and is the *Pyloric muscle* of some authors.

PYODES, *Purulent*.

PYOGENIA, *Puogenia*; from *πυον*, 'pus,' and *γενεσις*, 'generation.' Generation of pus. The theory or mechanism of the formation of pus. Some have believed, that pus is formed in the arterial system, and is deposited, by way of excretion, in the inflamed part; others, that it is formed by the destruction of solid parts. These opinions are, however, inadmissible; and pus is now regarded as the product of a particular secretion in the diseased part.

PYOGENIC, *Puogenicus*; same etymon. Having relation to the formation of pus.

PYOHÆMIA, from *πυον*, 'pus,' and *αἷμα*, 'blood.' Alteration of the blood by pus.

PYON, Pus.

PYONEPHRITE, see *Nephritis*.

PYOPHTHALMUS, *Hypopyon*.

PYOPLEURITE, *Empyema*.

PYOPTYSIS, from *πυον*, 'pus,' and *πτύω*, 'I spit.' Spitting of pus.

PYORRHEA, from *πυον*, 'pus,' and *ρεω*, 'I flow.' A discharge of pus.

PYORRHEA URINALIS, *Pyuria*.

PYOSIS, *Hypopyon*, *Pterygion*, *Suppuration*—p. *Pectoris*, *Empyema*.

PYOTHORAX VERUS, *Empyema*.

PYOTORRHEE, *Otorrhœa*.

PYOTURIA, *Pyuria*.

PYR, Fever.

PYRA CRUSTUMINA, *Crustuminatum*—p. *Crustumerina*, *Crustuminatum*.

PYRAMID, *Pyrâmis*, *Eminen'tia pyramidalis tympani*, from *πύρ*, 'flame,' which has a conical appearance. (?) A small, bony projection in the cavity of the tympanum, which is excavated, to lodge the muscle of the stapes. Also, the *Centre-pin* of the trephine.

PYRAMIDAL DE L'ABDOMEN, *Pyramidalis abdominis*—p. *de la cuisse*, *Pyramidalis*—p. *du Nez*, *Pyramidalis nasi*—p. *Stapedien*, *Stapedius*.

PYRAMIDALE, (OS.) *Cuneiform*, (bone.)

PYRAMIDALIS ABDOMINIS, *Musculus Fallopii vel succenturiatus vel auxiliarius*, *Pubio-ombilical*, *Pubio-sous-ombilical*, (Ch.) (F.) *Pyramidal de l'abdomen*. A small, fleshy pyramidal fasciculus, whose existence is not constant; and which is inserted, by its base, into the upper part of the pubis, and terminates, by its summit, at the inferior part of the linea alba. When it contracts it stretches the linea alba.

PYRAMIDALIS, *P. Femoris*, *Sacro-trochanterien*, (Ch.) *Iliacus externus*, *Pyriiformis*, *Piriformis*, *Primus et superior quadrigeninus*, (F.) *Pyramidal de la cuisse*. A flat, triangular muscle, situate at the posterior part of the pelvis. By its base, it is attached to the anterior surface of the sacrum; to the corresponding surface of the great sacro-sciatic ligament and to the posterior part of the ilium. It terminates by a tendon, which is attached to the inner surface of the great trochanter. This muscle is a rotator of the thigh outwards, or of the pelvis in an opposite direction.

PYRAMIDALIS FEMORIS, *Pyramidalis*.

PYRAMIDALIS NASI, *Proc'erus nasi*, *Nasum dilatans*, *Fronto-nasal*, (Ch.) (F.) *Pyramidal du nez*. It is thin, triangular, and has its summit upwards. Above, it is continuous with the occipito-frontalis. It descends vertically before

the root of the nose, on which it terminates; becoming confounded with the transversalis. This muscle wrinkles the skin of the root of the nose transversely, and stretches that which covers the tip.

PYRAMIDES ANTERIEURES, Corpora pyramidalia—p. Malpighianæ, Papillæ of the kidney—p. *Postérieures du cercelet*, Corpora restiformia.

PYRAMIDS OF WISTAR, Sphenoidal cornua.

PYRAMIS, Penis—p. Trigona, see Temporal bone.

PYRCÆA, Incendium.

PYREC'TICA, febrile; from πυρετος, 'fever.' Fevers: the first order in the class *Ikemata*, of Good.

PYRENOIDES, Odontoid.

PYRETHRE, Anthemis pyrethrum.

PYRETOL'OGY, *Pyretolog'ia*; from πυρετος, 'fever,' and λογος, 'a discourse.' *Pyrol'ogy*. A treatise on fevers. A title, sometimes given to a monograph on fever.

PYRETHRUM, Anthemis pyrethrum—p. Sylvestre, Achillea palmifera.

PYRETICUS, Febrifuge.

PYRETOS, Fever.

PYREX'IAE, from πυρ, 'fire.' *Febrile diseases*. The first class of Cullen's Nosology.

PYRI MARTIALES, Ferrum tartarizatum.

PYRIA, Fomentation.

PYRIFORMIS, Pyramidalis.

PYRIPH'LEGES, πυριπλεγες, from πυρ, 'fire,' and φλεγω, 'I burn.' One, who has a burning fever.

PYRMONT, MINERAL WATERS OF. A celebrated mineral spring, on the Weser, in Westphalia, four leagues from Hamlet. The waters are tonic, and contain chlorides of sodium and magnesium, sulphates of soda and magnesia, and carbonates of iron, lime, and magnesia dissolved in carbonic acid, with some resinous principles. It is a highly carbonated chalybeate.

ARTIFIC'IAL PYRMONT WATER may be formed of Epsom salt, gr. xv, Common salt, gr. v, Magnes. alb. gr. x, Iron filings, gr. v, Water, Oij. Impregnated with the gas from Marble powder and Sulphuric acid, aa ζ viij.

PYROLA, *P. rotundifolia*, Round-leaved wintergreen. Order, Pyrolacææ. This plant was once used as a gentle astringent and tonic.

PYROLA UMBELLATA, *Chimaphila* vel *Chimaphila umbellata*. C. *Corymbosa*, Ground-holly, *Pipsis'eca*, Wintergreen. This common American plant is allied to the uva ursi, in botanical as well as medical qualities. It is tonic and diuretic. The bruised leaves irritate the skin.

PYROLEUM OSSIUM RECTIFICATUM, Oleum animale Dippelii.

PYROLIG'NEOUS ACID, *Ac'idum Pyroaceticum*, *A. Ligni pyro-oleosum*, *A. Aceticum empyreumaticum*, *A. Lig'neum*, *Pyrolig'nic Acid*, (F.) *Acide Pyroligneux*, *Vinaigre de bois*. An acid, obtained by distillation, from wood, coal, &c., which was once believed to be of a peculiar character. It is now known to be formed of acetic acid and an empyreumatic oil, from which it may be freed; and, in this state, is sold in commerce for the *Acetum destillatum*. It is used for similar purposes as distilled vinegar, and for preserving animal substances. It has

also been used as an antiseptic in gangrene and sphacelus, and to foul ulcers; wherever indeed *Creasote* is indicated.—The dose of the impure pyroligneous acid internally is from 5 to 30 drops, three or four times a day.

PYROMANIA; from πυρ, 'fire,' and mania. Insanity, with an irresistible desire to destroy by fire.

PYROPHAGUS, *Igniv'orus*, from πυρ, 'fire,' and φάγω, 'I eat.' One who eats fire. A juggler, who eats bodies in a state of ignition.

PYROS, Triticum.

PYROSIS, from πυρ, 'fire,' 'the act of burning,' *Limos'is cardiac'ia sputato'ria*, *Ardor ston'achi*, *A. Ventriculi*, *Cardialgia sputatoria*, *Pyrosis Suec'ica*, *Apoc'nosis vom'itus pyrosis*, *Dyspep'sia pyrosis*, *Waterbrash*, *Water quahn*, *Blackwater*, (F.) *Fer chaud* *Cremason*, *Soda*. This affection consists of a hot sensation in the stomach, with eructations of an acid, burning liquid, that causes a distressing sensation in the parts over which it passes. Attention to diet, and the use of bitter absorbents, will usually relieve, when the disease is functional. Occasionally, it occurs, symptomatic of organic disease of the stomach.

Pyrosis also signified, of old, inflammation, and a burn.

PYROSIS SUECICA, Pyrosis.

PYROSOPHIA, Chymistry.

PYROTECHNIA, Chymistry.

PYROTECH'NY, *Pyrotechnē*, from πυρ, 'fire,' and τεχνη, 'art.' Art of making fireworks, &c. Also, chymistry. M. Percy has used the term *Pyrotechnie Chirurgicale* for the art of applying fire or the actual cautery in Surgery.

PYROTICUS, Caustic.

PYRUS CYDO'NIA. The *Quince Tree*, (F.) *Coignassier*. Family, Rosacææ. *Sex. Syst.* Icosandria Pentagynia. The fruit is termed *Cydonium Malum*, *Malum Canum*, *Malum coto'neum*, *Quince*, (F.) *Coign*. Quince seeds are, sometimes, used in decoction (q. v.) as a demulcent. The fruit makes a pleasant preserve.

PYRUS MALUS, *Melen*. The *Apple Tree*, (F.) *Pommier*. Apples are an agreeable fruit, when ripe. When unripe, they disagree, especially with those of weak digestive powers. The same may be said of the pear: the fruit of the *Pyrus commun'is*, *Apios*, *P. Sorbus*, *P. Sativa*, (F.) *Poirier*.—Apple, (F.) *Pomme*.—Pear, (F.) *Poire*.

APPLE BRANDY is a spirituous liquor obtained from the juice of the apple, and much used in the United States.

PYTISMA, Sputum, Sperrn.

PYUL'CON, from πυρ, 'pus,' and ἐλκω, 'I extract,' (F.) *Tire-pus*. A surgical instrument for extracting pus from any cavity. Many pyulca have been employed, all of which act as exhausting syringes.

PYURIA, *Pyolu'ria*, *Pyorrhæa urina'lis*, from πυρ, 'pus,' and ουρ, 'urine.' Discharge of purulent urine: a symptom, which occurs in many diseases; particularly in cases of renal calculi, and in organic affections of the bladder.

PYURIA CHYLOSA, *Chyluria*—p. *Lactea*, *Chyluria*—p. *Mucosa*, *Cystirrhæa*—p. *Serosa*, *Cystirrhæa*—p. *Viscida*, *Cystirrhæa*.

PYXIS, πύξις. A box; a pill-box. Also, an emollient ointment.—Aëtius and Paulus.

PYXIS, *Boûte*, see *Cotyloid*.

Q.

Q. See Abbreviation.

QUABEBE, Piper cubeba.

QUACK, Charlatan.

QUADRANS, *Quarta pars libræ*. A quarter of a pound. Three ounces (Troy.)

QUADRANTAL, Amphora.

QUADRATUS, Depressor labii inferioris—q. Dorsi, Q. lumborum.

QUADRATUS FEMORIS, *Quadratus*, from *quadra*, 'a square;' *Tuber-Ischio-trochantérien*, *Ischio-sous-trochantérien* (Ch.) *Quartus quadrigem'inus quadratus*, (F.) *Carré de la Cuisse*. A muscle, situate at the posterior and upper part of the thigh. It is thin, flat, and quadrilateral, and is attached to the outer part of the tuberosity of the ischium; whence it proceeds transversely to the inferior part of the posterior margin of the great trochanter. It rotates the limb, turning the toe outwards.

QUADRATUS GENÆ, *Platysma myoides*—q. Radii, Pronator radii quadratus.

QUADRATUS LUMBORUM, *Quadratus seu Lumbæ'ris externus*; *Ilio-lumbi-costal*, *Flectens par lumborum*, *Quadratus dorsi*, *Ilio-costal* (Ch.) (F.) *Carré des lombes*. A flat, somewhat thick, irregularly quadrilateral muscle, situate in the loins, at the sides of the vertebral column. It is attached, below, to the crista ilii and ilio-lumbar ligament; and, above, to the inferior margin of the last rib; and, besides, to the base of the transverse processes of the last four lumbar vertebræ. This muscle inclines the loins to its side; depresses the last rib, and is thus a muscle of expiration. It can also, raise the hip.

QUADRIGEM'INA TUBERCULA, *Eminentia Quadrigem'inæ*, *Optic Lobes*, *Corpora quadrigem'ina*, *Nates et Testes*, *Eminences bigeminæ* (Ch.) *Corpora bigem'ina*, (F.) *Tubercules quadrijumeaux*. Four medullary tubercles, situate at the posterior surface of the tuber annulare. They are white, externally; gray, internally; oblong; rounded; connected by pairs, and separated by two grooves, which divide them crucially. Of these tubercles—the superior, called *nates*, *Tubercula antio'ra*, *Glutia*, are larger and more prominent than the lower, called *testes*,—*Tubercula postio'ra*. The pineal gland corresponds exactly to the point of intersection of the two furrows that separate them.

QUADRIGEMINUS, PRIMUS ET SUPERIOR, *Pyramidalis*—q. *Quadratus quartus*, *Quadratus femoris*—q. *Secundus et tertius*, *Ischio-trochanterianus*.

QUAHUIL, Cacao.

QUAIL, *Tetrao coturnix*.

QUANDROS. Ancient name for a precious stone, believed to exist in the brain of the vulture; and to which was attributed the property of augmenting the secretion of milk, and preserving from deadly accidents. No such stone exists.

QUARANTINE, from (I.) *Quaranti'na*; itself from *quaranta*, 'forty,' (F.) *Quarantaine*. The time during which travellers, returning from a country where the plague or any other pestilential disease exists, are compelled to remain on board ship or in a lazaretto. They, as well as the ship, are said 'to perform quarantine.' Quarantine is, sometimes, extended beyond

forty days, whilst its duration is frequently much less. It is sometimes enforced by land; for example, when contagious diseases require the establishment of *cordons sanitaires*, and when persons are desirous of leaving infected districts. During quarantine, no communication is allowed between the travellers and the inhabitants of the country. Quarantine is a great impediment to commerce; and is, doubtless, very frequently enforced where there is but little danger of contagion. The evils, however, that might arise from the introduction of a widely-spreading contagious disease, are so disastrous, as to induce legislators to maintain these laws in perhaps an unnecessary degree of strictness.

QUARTAN, 'of or belonging to the fourth.' *Quarta'na Febris*, *An'tetus Quarta'nus Tetartæus*, *Quartan Ague*, (F.) *Quarte*. An intermittent, the paroxysms of which recur every 4th day, leaving between them two days' interval. We speak, also, of the *Quartan Type*. A *Double Quartan* is one in which one paroxysm occurs on the third and another on the second day, so that there is only one day of apyrexia and two of paroxysms in succession;—the paroxysms of every 4th day resembling each other. A *Triple Quartan* is one, in which there is a paroxysm every day; and on every three days the paroxysms correspond. A *redoub'ling or repeating quartan*, (F.) *Fièvre quarte doublée*, is one, in which there are two paroxysms every 4th day. See Intermittent.

QUARTANUS REMITTENS, Tetartophia.

QUARTARIUS. An ancient measure, equal to one-fourth of the sextarius. See Weights and Measures.

QUARTE, Quartan.

QUARTI-STERNAL, *Quadristernd'lis*. The fourth osseous portion of the sternum, corresponding to the fourth intercostal space.—Béclard.

QUAS'SIA, *Quassia amara*, *Quassy*, *Quassia excel'sa*, *Picra'na*, *excel'sa*, *Lofty Bitterwood Tree*, *Bitter-ash*, (F.) *Quassie*. A West India tree, from which is obtained the *Signum Quassie*, *Quassia* (Ph. U.S.) It is an intensely durable bitter, without astringency; and has been employed as a tonic and stomachic. It is, generally, given in the form of infusion. The bitter principle is called *Quassin*.

QUASSIA SIMAROU'RA, *Simarouba*, *Simaruba*, *S. officind'lis*, *Euon'ymus*, *Bitter Simaruba*, *Mountain Damson*. The bark of the *Simarouba* is bitter, and not unpleasant. Both water and alcohol extract its virtues. It is not astringent. It is exhibited, whenever a simple tonic is required.

QUASSIN. See Quassia.

QUATRE ÉPICES. See Myrtus pimenta.

QUATRIO, *Astragalus*.

QUEEN OF THE MEADOWS, *Spiræa ulmaria*.

QUEEN'S ROOT, *Stillingia*.

QUERCULA MINOR, *Teucrium chamædrys*.

QUERCUS ALBA, the *White Oak*; *Quercus Robur*, the *Common Oak*; *Q. Tincto'ria*, the *Black Oak*; *Q. rubra Monta'na*, the *Red Oak* or *Spanish Oak*, *Family*, *Amentaceæ*. *Sex. Syst.*

Monœcia Polyandria. (F.) *Chêne*. The bark of all these varieties is, probably, alike in medicinal properties. It is powerfully astringent and tonic, and has been used in intermittents and likewise in decoction, as an astringent wash, where such is indicated.

ACORNS, Ceces, Nuces Quercus. (F.) *Glunds*, were, at one time, much used as food; and a decoction of them was once recommended in dysentery and diarrhœa, in glandular obstructions, &c. A pessary, made of them, has been advised in immoderate flow of the menses. They are not now used.

QUERCUS ISECTO'RIA. A tree of Asia Minor, which affords the *Turkey Galls*, *Nut Galls*, *Gallæ Turcicæ*, *G. Quercinæ*, *G. Tracto'riæ*, *Nuz Galla*, *Galla maxillaria orbiculata*, *Cicis*, *Cussetoles*, *Gallæ*, *Galle*, *Gall-nut*, (F.) *Noix de Galle*. The *nut-gall*—*Galla* (Ph. U. S.) is a morbid protuberance, or tubercle, produced by the puncture of the *Diplolepis Galle Tincto'ria*, or *Cynips Quercus folii*. It is powerfully astringent and tonic, and has been employed in diarrhœa, intestinal hemorrhage, and intermittents: but it is chiefly used, externally, in gargles and injections. The powder, made into an ointment with lard, is used in piles.

QUERCUS COCCIFERA, see *Kermes*—*q. Marina*, *Fucus vesiculosus*—*q. Suber*, see *Suber*.

QUEUE DE CHEVAL, *Cauda equina*, see *Medulla spinalis*—*q. de la Moëlle épinière*, *Cauda equina*—*q. de Pourceau*, *Peucedanum*.

QUICKEN TREE, *Sorbus acuparia*.

QUICK'ENING, from Sax. *epicean*, 'to make alive.' The period of gestation when the motion of the fœtus first becomes perceptible. This usually occurs about the 18th week, and was at one time erroneously believed to mark the time at which the fœtus becomes alive. It need scarcely be said, that it possesses the principle of life from the moment of the union of the materials furnished by the sexes at a fecundating copulation. When the motion is felt, the female is said to be 'quick with child.'

QUICKLIME, *Calx viva*.

QUICKSILVER, *Hydrargyrum*.

QUIES, *Acinesia*.

QUINA QUINA, *Cinchona*.

QUINCE, see *Pyrus cydonia*—*q. Tree*, *Pyrus cydonia*.

QUINIA, *Quinina*—*q. Impure sulphate of*, *Extract of Quinia*.

QUIN'NA, *Qu'nia*, *Quina*, *Kini'num*, *Chini'num*, *Quinine*. An alkaline, uncrystallizable substance; under the form of a porous, whitish mass; almost insoluble in water, soluble in alcohol and ether. It forms, with acids, salts that are in general soluble. It is obtained from different cinchonas, but chiefly from the yellow, and is the active principle of those valuable drugs.

SULPHATE OF QUINIA—the salt usually employed in medicine—occurs in needles of a pearly and satiny appearance. It is employed, with great success, in the treatment of intermittents; and is available in many cases, where the bark in substance could not be retained, or would be injurious. Dose, from 3 to 10 grains in the 24 hours. It is obtained, by treating the yellow bark with sulphuric acid. The following form is adopted in the Pharmacopœia of the United States, (1842)—*Cinchon. flav.* in pulv. crass. liiv; *Acid. muriat.* f. ʒij; *Calcis*, in

pulv. ʒv; *Aquæ*, cong. v; *Acid. Sulphur.*, *Alcohol*; *Carbon. animal*, aa q. s. Boil the bark in one-third of the water mixed with one-third of the muriatic acid, and strain through linen. Boil the residue twice successively with the same quantity of water and acid as before, and strain. Mix the decoctions, and, while the liquor is hot, gradually add the lime, previously mixed with two pints of water, stirring constantly, until the quinia is completely precipitated. Wash the precipitate with distilled water, and having pressed and dried it, digest it in boiling alcohol. Pour off the liquor and repeat the digestion several times, until the alcohol is no longer rendered bitter. Mix the liquors, and distil off the alcohol, until a brown viscid mass remains. Upon this substance, removed from the vessel, pour about half a gallon of distilled water, and having heated the mixture to the boiling point, add as much sulphuric acid as may be necessary to dissolve the impure alkali. Then add an ounce and a half of animal charcoal; boil for two minutes, filter the liquor while hot, and set it aside to crystallize. Should the liquor, before filtration, be entirely neutral, acidulate it very slightly with sulphuric acid. Should it, on the contrary, change the colour of litmus paper to a bright red, add more animal charcoal. Separate the crystals from the liquor, dissolve them in boiling water slightly acidulated with sulphuric acid, add a little animal charcoal, filter, and set aside to crystallize. Wrap the crystals in bibulous paper, and dry with a gentle heat. The mother waters may be made to yield an additional quantity of sulphate of quinia by precipitating the quinia with solution of ammonia, and treating the precipitated alkali with water, sulphuric acid, and animal charcoal, as before.

The **ACETATE OF QUINIA** (*Quiniæ Acetas*, *Chinium Aceticum*, *Acetas chinii*, *A. chinini*, *A. chinicus*, *A. Quiniæ*, *A. Quinæ*, *A. Quini'ni*, *A. Kini'ni*; the **CITRATE** (*Quiniæ citras*, *Citras chinicus*) the **FERRUCYANATE** (*Quiniæ Ferrocyanus*, *Chinium Ferrocyanogenitum*, &c.) the **MURIATE** (*Quiniæ murias*, *Chinium murialicum*, *Ch. salitum* seu *hydrochloricum*, &c.) the **NITRATE** (*Chinium nitricum*, &c., the **PHOSPHATE**, (*Quiniæ Phosphas*, *Chinium phosphoricum*, &c.) and the **Tartrate of Quinia** and *Cinchonia* have been administered in the same cases as the sulphate.

QUINIA. IODIDE OF. See *Iodine*.

QUINQUEFOLIUM, *Potentilla reptans*.

QUINQUINA, *Cinchona*—*q. Aromatique*, *Croton cascavilla*—*q. Bicolor*, *Cinchonæ Caribææ cortex*—*q. Faux de Virginie*, *Cusparia febrifuga*—*q. Gris de Loxa*, *Cinchonæ lancifoliæ cortex*—*q. Juave*, *Cinchonæ cordifoliæ cortex*—*q. Orange*, *Cinchonæ lancifoliæ cortex*—*q. Piton*, *Cinchonæ Caribææ cortex*—*q. Rouge*, *Cinchonæ oblongifoliæ cortex*.

QUINSEY, *Cynanche tonsillarlis*—*q. Nervous*, *Angene*—*q. Wolf*, *Lycæance*.

QUINTAN, *Febri quintana*, *F. pemptæa*, *F. quinta*; from *quintus*, 'a fifth.' A fever whose paroxysms return only every five days inclusively; and between which there are, consequently, three days of apyrexia.

QUINTE (F) This word is used synonymously with *paroxysm* or *fit*, when speaking of cough,—as *une Quinte de Toux*,—a fit of coughing. Also, the *Intercrura*, (*q. v.*)

QUINTEFEUILLE, *Potentilla reptans*.

QUINTES. See *Pertussis*.

QUINTESSENCE, *Quinta Essen'tia*. A name formerly given to alcohol, impregnated with the principles of some drug. It was, consequently, often synonymous with *Alcoholic tincture*. The most volatile principles of bodies were, also, called *Quintessences*.

QUINTISTERNAL. The fifth osseous portion of the sternum. It corresponds to the 5th and 6th intercostal spaces.

QUOTID'IAN, *Quotidia'nus*, *Eph'e'merus*,—itself from *quotid'i'e*, 'daily.' That which takes place every day.

QUOTID'IAN FEVER, *Q. ague*, *An'etus quotidia'nus*, *Cathe'merus*, *Methemer'inos*, *Amphemer'inos*, *Amphimer'inos*, *Quotidia'nus*, (F.) *Fièvre quotidienne*, is an intermittent, the paroxysms of which recur every day.

A simple, double, or triple quotidian, is a quotidian, which has one, two, or three paroxysms in the 24 hours.

R.

R. is placed at the commencement of a prescription, as a contraction of *Rec'ip'e*. (See *Abbreviation*.) Originally, it was the sign (\mathcal{R}) of Jupiter, and was placed at the top of a formula, to propitiate the king of the gods, that the compound might act favourably.

RABID, *Rab'idus*, (F.) *Rabique*, *Rabétique*, from *rabies*, 'canine madness.' That which belongs to hydrophobia; as *rabid virus*, &c.

RABIÉIQUE, *Rabid*.

RABIES CANINA, *Hydrophobia*.

RABIQUE, *Rabid*.

RACE, from *rad'icē*, abl. of *radix*, 'root.' The union or aggregate of individuals, whose conformation or particular condition differs perceptibly from those of neighbouring varieties. In the human species, several races are designated. See *Homo*.

RACHAMEL'CA, from Hebr. רחם (*rechem*), 'the womb,' and מלך (*Molech*), 'a king;' *Rechamal'ca*. A peculiar formative principle, supposed, by *Dolaus*, to exist in the uterus.

RACHE, *Porrigio*.

RACHIAËL, *Rhachiaëi*.

RACHIALGIA, *Colic*, metallic, *Vertebral disease*—*r. Mesenterica*, *Tabes mesenterica*—*r. Pictoniensium*, *Colic*, metallic—*r. Pictonum*, *Colic*, metallic.

RACHIALGIE MÉSÉNTÉRIQUE, *Tabes mesenterica*.

RACHIALGITIS, *Rhachialgitis*.

RACHIDIAN ARTERIES, *Spinal arteries*—*r. Bulb*, see *Medulla oblongata*—*r. Canal*, *Vertebral canal*.

RACHIOPHYMA, *Rachiphyma*.

RACHIPHYMA, or *Rhachiphyma*, *Rachiphyma*, *Tumor Dorsi*, from *ῥαχίς*, 'the spine,' and *φύμα*, 'a tumour.' A tumour on the spine or on the back.

RACHIS, *Vertebral column*.

RACHISAGRA, *Rhachisagra*, from *ῥαχίς*, 'the spine,' and *αγρα*, 'a seizure.' A gouty or rheumatic affection of the spine.

RACHITÆ, *Rhachitæ*.

RACHITIS, *Rhach'itis*, from *ῥαχίς*, 'the spine,' and *i's*, a suffix denoting inflammation. Inflammation of the spine. Also, *Cyrt'o'sis Rachia*, *Cyrt'on'osus*, *Morbus Ang'licus*, *Osteomal'cia Infantum*, *Tabes pectoræ*; the English disease, *Rickets*; from *ῥαχίς*, 'the spine.' (F.) *Rachitisme*, *Nouveau*. A disease, characterized by crookedness of the long bones; swelling of their extremities; crooked spine; prominent abdomen; large head; and often precocity of intellect. It is accompanied by leanness, general

debility, indigestion; and, frequently, induces atrophy and hectic. Rickets occurs, particularly, during the first years of existence, in weakly children, born of rickety or scrofulous parents; brought up in damp or confined situations; who are badly nourished, and do not take sufficient exercise. The progress and termination of the disease are very variable. Some children gradually recover their health: others become more and more deformed, and ultimately die of consumption, dropsy, or other organic disease. The treatment is almost wholly hygienic. Pure air; a healthy situation; nourishing diet; exercise; sea or common cold bathing, and tonics, afford the best prospect of success.

RACHITISME, *Rachitis*.

RACHO'SIS, *Rhach'o'sis*, *Rako'sis*, from *ῥαχῶν*, or *ῥαχῶν*, 'I wrinkle.' A relaxation of the scrotum. An excoriation of the relaxed scrotum.—*Dictionaries*.

RACINE À BECQUET, *Geranium moschatum*—*r. de Bengal*, *Cassumuniar*—*r. de Charcis*, *Dorstenia contrayerva*—*r. de Dracke*, *Dorstenia contrayerva*—*r. des Philippines*, *Dorstenia contrayerva*—*r. de Safran*, *Curcuma longa*—*r. de Saint Esprit*, *Angelica*—*r. Salivaire*, *Anthemis pyrethrum*—*r. de Turbeth*, *Convolvulus turpethum*.

RACINES DU CERVELET, *Corpora restiformia*.

RACORNISSEMENT (F.) from *se racornir*, 'to shrivel in the fire as leather does.' A physical property, possessed by animal substances, which consists in a kind of contractility, accompanied with sudden corrugation and curling. It is produced by heat, and by chemical agents, especially by the strong mineral acids.

RADESZYGE, *Radzyge*.

RADEZYGE, *Radzyge*.

RA'DIAL, *Radia'lis*, from *radius*, a bone of the forearm. That which relates to the radius.

RADIAL ARTERY, *A. extern'a Cu'biti*. It arises from the brachial, at the upper and anterior part of the forearm; descends on the outer side as far as the lower part of the radius, and proceeds downwards and backwards towards the superior extremity of the space, which separates the first two metacarpal bones. It then buries itself in the palm of the hand, where it forms the profound or radial palmar arch. The radial artery gives off the recurrent radial, several radio-muscular branches, the transverse palmar radio-carpal artery, the external superficial artery of the palm of the hand, the external dor-

sal of the thumb, the dorsalis carpi, dorsal interosseous artery of the index, &c.

RADIAL NERVE, Radio-digital, (Ch.) *Spiral Nerve, Spiral-muscular*, arises from the four inferior branches of the brachial plexus. It is, at first, situate behind the other nerves of the plexus. It then becomes engaged between the three portions of the triceps brachialis, passes behind the humerus, and descends between the supinator longus and brachialis internus, until opposite the upper extremity of the radius. In its course it gives numerous filaments to the triceps, supinator longus, extensor carpi radialis longior, and to the integuments. Opposite the upper extremity of the radius it divides into two branches;—the one *posterior*, which turns backwards into the substance of the supinator brevis, and, when it has reached the space between the two layers of muscles on the posterior surface of the forearm, divides into a great number of filaments, which are distributed to those muscles, and to the integuments of the hand. The other branch is *anterior*: it descends before the supinator brevis and the radius; until, near the inferior third of that bone, it engages itself between the tendons of the supinator longus and extensor carpi radialis longior; and, becoming afterwards subcutaneous, divides into two branches, whose filaments are distributed to the integuments of the thumb, index, middle finger, to the outer side of the ring finger, and to the first interosseous muscles of the back of the hand.

RADIAL VEINS, DEEP-SEATED, follow the same course as the radial artery.

EXTENSOR CARPI RADIALIS BREVIOR, Radialis externus brevis, Radialis secundus, (F.) *Second radial externe, Petit radial, Épicondylus-métacarpien, (Ch.)* An extensor muscle of the wrist, situate beneath the extensor carpi radialis longior. It is attached, above, to the external tuberosity of the humerus, and terminates, below, by a long tendon, inserted into the posterior part of the upper extremity of the third bone of the metacarpus. It has the same uses as the next muscle.

EXTENSOR CARPI RADIALIS LONGIOR, Radialis externus longior, Radialis externus primus, (F.) *Premier radial externe, Grand radial, Humérus-métacarpien, (Ch.)* It is seated at the outer part of the forearm; is thin, but thicker on the outside than on the inside. It is attached, above, to the inferior part of the outer edge, and to the corresponding tuberosity of the humerus; and terminates, below, by a long tendon, which is attached to the superior extremity of the second bone of the metacarpus. It extends the hand on the forearm.

RADIAL ANTÉRIEUR, Palmaris magnus—r. Externe premier, see Radialis—r. Externe, second, see Radialis—r. Grand, see Radialis—r. Petit, see Radialis.

RADIALIS EXTERNUS BREVIOR, see Radialis—r. Externus primus, see Radialis—r. Extensor longior, see Radialis—r. Internus, Palmaris magnus—r. Secundus, see Radialis.

RADIATED, Radia'tus, from radius, 'a ray; (F.) *Rayonné*. That which is arranged in rays; in lines, diverging from a common centre. An epithet given to several ligaments, &c., as to those which unite the ribs to the sternum; those which unite the tibia and fibula at their inferior extremity, &c.

RAD'ICAL, Radica'lis, from radix, 'a root.' A radical cure is one in which the disease is destroyed, as it were, from the root. It is used in opposition to *palliative cure*.

RADICAL MOISTURE, Humidum radicale.

RADICIS'ECA, from radix, radiceis, 'a root,' and secare, 'to cut.' One employed in collecting and preparing plants was formerly so called.

RADICULA, Raphanus hortensis.

RADII CILIARES, Ciliary processes.

RADIO-CARPAL, Radio-carpia'nus. That which relates to the radius and carpus.

RADIO-CARPAL ARTICULATION, is the wrist joint, or articulation of the os scaphoides, os semilunare, and os cuneiforme of the carpus with the inferior surface of the radius, and the fibro-cartilage, situate below the ulna. It is strengthened by lateral, anterior, and posterior ligaments.

RADIO-CARPAL TRANSVERSE PALMAR ARTERY, (F.) *Artère Radio-carpienne-transversale-pal-maire.* A transverse branch, given off by the radial artery, opposite the lower edge of the pronator quadratus, which sends several branches to the anterior or palmar surface of the carpus.

RADIO-CUTANÉ (NERF,) see Cutaneous—r. Phalangétien du pouce, Flexor longus pollicis manus.

RADIO-MUSCULAR, Radio-muscularis. A name given to the branches sent off from the radial artery to the muscles of the forearm, in the first part of its course; as well as to the nervous filaments, which the radial nerve sends to the same muscles.

RADIS, Raphanus hortensis.

RADISH, Raphanus hortensis.

RADIUS, 'a spoke:'—so called from its shape. Cercis, Foc'ilè minus seu superius, Canna minor, Os adcubita'le, Additamentum ulnæ, Manubrium manûs, Parap'chyon, Arund' do brachii minor, (F.) *Os du Rayon.* A long, prismatic bone, the upper and lesser extremity of which is called the *head*. This is supported by a *cervix* or *neck*. At the part where the neck is confounded with the *body* of the bone is the *tubercle or bicipital tuberosity* or eminence for the insertion of the biceps. The radius is articulated, above, with the os humeri and with the lesser sigmoid cavity of the ulna: below, with the scaphoides, semilunare, and the head of the ulna. Its inferior extremity, which is larger than the superior, is flattened before and behind: is irregularly quadrilateral; and has, below, a double facette to be articulated with the first two bones of the carpus. On the outer side is the styloid process; and, on the inner, a concave facette, which joins the ulna. Behind, are grooves for the passage of the extensor tendons. The radius is developed from three points of ossification; one for the body, and one for each extremity.

RADIUS, COL DU, Collum radii.

RA'DIX, Rhiza. A root: also, the male organ.

The *Root* or *fung* of a tooth is the part contained in the alveolus. The *radix* or *root* of the nail is the portion hidden under the skin, &c. Surgeons give the name to the prolongations, sent by scirrhus, cancerous, or other tumours into the neighbouring parts.

FIVE APERIENT ROOTS, Quinque rad'ices ape-

rien'tes, were, of old,—asparagus, butchers' broom, fennel, parsley, and smallage.

FIVE LESSER AFERIENT ROOTS, *Quinque radices aperientes minores*,—were caper, dandelion, eryngo, madder, and rest-harrow.

RADIX BRAZILIENSIS, Ipecacuanha—*r. Indica* Lopeziana, Lopez radix—*r. Lopeziana*, Lopez radix—*r. Ninsi*, Sium ninsi—*r. Rubra*, Rubia—*r. Serpentum*, see Ophiorrhiza mungos—*r. Ventris*, Umbilicus.

RADULA, Raspatorium.

RADZYGE, *Radzygin*, *Radesyge*, *Radezyge*, *Thæ'ria*, properly *Théria*, from *θηρίον*, (*ēllos*), 'a malignant ulcer,' *Norwegian Leprosy*. A name given, in Norway, to a disease, bearing considerable analogy to the yaws. Some have esteemed it a species of lepra or elephantiasis.

RAGE, *Ira*, *Paror brevis*, *Orgē*, *Thymos*, (F.) *Colère*. Violent passion, characterized by contraction of the muscles of the face, violence in every movement, extreme irritation of the nervous system, acceleration of the blood's motion, and by redness and swelling of the face.

RAGE, Rhage.

RAGE, Hydrophobia.

RAGWORT, Senecio Jacobæa.

RAIFORT, Raphanus hortensis—*r. Sauvage*, Cochlearia armoracia.

RAINBOW-WORM, Herpes iris.

RAINURE, Groove—*r. Digastrique*, Mastoid groove.

RAISIN, see Vitis vinifera—*r. d'Amérique*, Phytolacca decandra—*r. de Bois*, Vaccinium myrtillus—*r. d'Ours*, Arbutus uva ursi—*r. de Renard*, Paris.

RAISINS, Uvæ passæ, see Vitis vinifera—*r. de Corinthæ*, see Vitis Corinthiaca.

RAISON, Reason.

RAKASIRA. An American balsam; of a brownish or brownish-red colour; semi-transparent; brittle; softening and becoming tenacious by heat; inodorous when cold, but exhaling a very agreeable smell when heated; and possessing a balsamic and slightly bitter taste. The precise vegetable that furnishes it is not known. It has been used chiefly as a balsam in gonorrhœa and urinary affections.

RAKIA. See Spirit.

RAKOSIS, Rachosis.

RALE, Rattle, (q. v.)—*r. Caverneux*, Gurgling—*r. Crépitant*, see Crepitation.

RAMENTUM, Fragment, Scobs.

RAMEX, Hernia—*r. Varicosus*, Varicocele.

RAMIFICATION, *Ramifica'tio*. A division of arteries, veins, or nerves into branches. Also, the branches themselves.

RAMILLE, Ramusculus.

RAMOLLISSEMENT, Mollities—*r. du Cerveau*, Mollities cerebri—*r. du Cœur*, Cardiomalacia—*r. de l'Estomac*, Gastromalacia—*r. du Foie*, Hepatomalacia—*r. de l'Intestin*, Enteromalacia—*r. des Os*, Mollities ossium.

RAMPANT, (F.) *ramper*, 'to climb,' *Repens*, *Reptans*. That which creeps or drags on the earth. The French Bandage rampant has the folds arranged spirally around the part, leaving intervals between them. It is a retentive bandage, but is easily displaced, and, therefore, not employed.

RAMPES DU LIMAÇON, Scalæ of the cochlea.

RAMPHOS, Rostrum.

RAMULUS, Ramusculus.

RAMUNCULUS, Ramusculus.

RAMUS, *Clados*, a branch, (F.) *Rameau*. A division of an artery, vein, or nerve. Also, the male organ.

RAMUS DURIOR SEPTIMÆ CONJUGATIONIS, Facial nerve.

RAMUS/CULUS, *Ram'ulus*, *Ramun'culus*, *Cladis'cos*, diminutive of *ramus*, (q. v.) A division of a ramus. (F.) *Ramuscule*, *Ramille*.

RANA ESCULEN'TA, (F.) *Grenouille*. This frog and the bull frog, *Rana Tauri'na*—are eaten as a delicacy. They are nutritious and easily digested.

RANA, Ranula.

RANCE, Rancid.

RANCID, *Ran'cidus*, *Sapros*, (F.) *Rance*, from *rancere*, 'to be stale.' An epithet given to fatty bodies, which have become acrid from age or the contact of air. Mild ointments may, thus, become very irritating, and unfit for the purposes for which they were originally intended.

RANINE, *Rani'na*; from *Rana*, 'a frog.' The termination of the lingual artery is so called; that is, the portion of the artery, which advances horizontally between the genio-glossus and lingualis muscles as far as the point of the tongue. The ranine vein follows the same course as the artery, and opens into the internal jugular or into the superior thyroid.

RAN'ULA, from *Rana*, 'a frog,' so called from its resemblance; *Dysphag'ia Ranula*, *Emp'hrag'ma saliv'arē*, *Frog Tongue*, *Batrachos*, *Batrachium*, *Hydroglos'sa*, *Hypoglossis*, *Hypoglossum*, *Rana*, (F.) *Grenouillette*. A small, soft, fluctuating and semi-transparent tumour, which forms under the tongue, owing to the accumulation of saliva in Wharton's duct. In order to give exit to the accumulated fluid, and to establish a permanent opening for the discharge of the saliva, the cyst may be punctured, and the opening maintained by a minute cylinder, with a button at each extremity, as has been recommended by Dupuytren; or a portion of the cyst may be removed by the scissors, and the mouth be frequently washed by any astringent lotion. Sometimes, the salivary duct is found plugged by a small calculus.

RANUN'CULUS, (F.) *Renoncule*. Family, Ranunculaceæ. *Sex. Syst.* Polyandria Polygynia. A genus of plants, most of the species of which, when taken internally, act as acrid poisons. See Poison. They are, also, acrid and vesicant, when applied to the skin, and have, accordingly, been often used as counter-irritants. The following species answer to this description.

RANUNCULUS ABORTIVUS.

RANUNCULUS ACRIS, *R. pratensis*, *Meudoro Crowfoot*, *Butter Cups*, (F.) *Bouton d'or*.

RANUNCULUS BULBO'SUS, *R. pratensis*, *Ranunculus*, (Pl. U. S.) *Bulbous-rooted Crow-foot*, (F.) *Renoncule bulbeuse*, *Bassinet*.

RANUNCULUS FLAMMULA, *Surrecta alba*, *Smaller Water Crowfoot*, *Spearwort*, (F.) *Petite dore*.

RANUNCULUS ILLYRICUS.

RANUNCULUS LINGUA.

RANUNCULUS SCELERA'TUS, *R. Palustris*, *Marsh Crowfoot*.

RANUNCULUS FICARIA, *Pilewort*, *Chelido-*

nium minus, Scrophularia minor, Ficaria vernalis, Chelidonium rotundifolium minor, Curcuma hemorrhoidalis herba, Ranunculus vernus, Lesser celandine. (F.) *Petite chélidoine, Petite éclaire, Ficaire.* The leaves and root have been used medicinally:—the leaves as an antiscorbutic; the root as a cataplasm in piles.

RANUNCULUS ALBUS, Anemone nemorosa—r. *Palustris, R. sceleratus*—r. *Pratensis, R. bulbosus*—r. *Vernus, R. ficaria*—r. *Virginianus, Lobelia syphilitica.*

RAPA NAPUS, Brassica rapa—r. *Rotunda, Brassica rapa.*

RAPE, Brassica napus, Stuprum.

RAPHANE'DON, from *ραψανος*, 'a radish,' 'like a radish.' *Rhaphanodon.* A transverse fracture of a long bone, leaving no splinters. What has been called, in France, *Fracture en raze.*

RAPHA'NIA, Convulsio Raphania, Rhaphania, Morbus spasmodicus malignus seu popularis, M. Silsiacus, Eclampsia typhoides, Synclonus Raphania. Linnæus gave this name to a convulsive disease, not uncommon in Germany and Sweden, and which has been attributed to the seeds of the *Raphanus Raphanistrum* being mixed with the corn. The convulsions are seated in the limbs, and are attended with acute pain. See *Convulsio cerealis*, and *Ergotism.*

RAPHANUS HORTENSIS, Raphanus, R. sativus, R. niger, Radic'ula. The *Radish*, (F.) *Raisfort, Radis.* Family, Cruciferae. Sex. Syst. Tetradynamia Siliquosa. The root of this plant is a common esculent. It has, also, been given as a diuretic in calculous affections. The juice, made into a syrup, is exhibited to relieve hoarseness. Radishes have long been celebrated as anti-scorbutics.

RAPHANUS MARINUS, Cochlearia armoracia—r. *Raphanistrum*, see *Raphania*—r. *Rusticanus, Cochlearia armoracia*—r. *Sylvestris, Cochlearia armoracia.*

RAPHĒ, or RHAPHĒ, ραφη, 'a suture.' A name given to prominent lines resembling a raised stitch. Such is the *Raphe* or *Tramis* that divides the scrotum into two parts, and which extends from the anterior part of the anus to the extremity of the penis. The name *Raphe*, or *Linea mediana*, is, also, given to two prominent lines which are longitudinal and parallel, and are seen at the upper surface of the corpus callosum, extending from the anterior to the posterior extremity of that commissure.

RAPHEX, Chenopodium vulvaria.

RAPHIANKIS'TRON, from *ραψανος*, 'a needle,' and *αγκιστρον*, 'a hook.' An instrument employed in the formation of artificial pupil.

RAPHION, Needle.

RAPHIS, Needle.

RAPPORT, (F.) Relat'io, Renuncia'tio. A deposition made by a physician or surgeon to prove the condition of a person, the nature of a disease, the existence or non-existence of pregnancy, a sudden or violent death, &c. Formerly, there were the *Rapports dénonciatifs*, made at the desire of the injured or their friends, and intended to point out to the judges the details of the crime or misdemeanour,—the *Rapports provisoires*, the object of which was to obtain provisions for the injured individual, both as regarded food and medicine, and to defray the expenses of prosecution;—and *Rapports mixtes*, or those which were both *dénonciatifs* and *pro-*

visoires. At present, reports or depositions are generally divided into *judiciary*, or those which serve to throw light on the subject matter of any civil or criminal cause; and *administrative*, which afford information on subjects relating to any branch of the public administration, as on the nuisance or otherwise of certain establishments, the character of any epidemic, &c.

RAPPORT, Erection.

RAPTUS POST-TERGANEUS, Opisthotonos.

RAPUM MAJUS, Brassica rapa.

RAPURE, Rasura.

RAQUETTE, Cactus opuntia.

RAREFA'CIENS, Aræot'icus, (F.) Rarefiant, from *rarus*, 'rare,' and *facere*, 'to make.' Medicines were so termed, which were supposed to be possessed of the power of giving more bulk or extension to the blood or other humours.

RAREFIANT, Rarefaciens.

RASCATIO, Excretion.

RASCETA, Carpus, Malleolus.

RASH FEVER, Scarlatina, nettle, Urticaria—r. *Rose, Feveola*—r. *Summer, Lichen tropicus*—r. *Tooth, Strophulus.*

RASORIUM, Raspatorium.

RASPATORIUM, Raso'rium, Rat'ula, Scalprum raso'rium, Xyste'ra, Rad'ula, Runci'ula, Scalprum, (F.) Rugine, Grattoir. An instrument used for rasping bones, to detach the periosteum,—either in certain surgical operations, or for anatomical purposes.

RASPBERRY, Rubus idæus.

RASSETA PEDIS, Tarsus.

RASTETA, Carpus, Malleolus.

RASURA, Xysma, Xysmos, (F.) Rapure, from *radere, rasum*, 'to scrape.' A *rasure*, or scratch, or erosion. Also, the rasping or shaving of any substance; as *Rasuræ Cornu Cervi, Hartshorn shavings.*

RASURA, Scobs.

RATAFIA. A liquor prepared by imparting to ardent spirits the flavour of various kinds of fruits, adding sugar.

RATANHY, Krameria ratanhia—r. of the Antilles, *Krameria ixina.*

RATE, Spleen.

RATÉLEUX, Spleneticus.

RATÉLIER. See Dentier.

RATIO, from reor, ratus, 'to think.' A reason, cause, an explanation; as *Ratio symptomatum*, an explanation of the symptoms.

RATIO, Reason.

RATIONAL, Rationa'lis. That which is conformable to reason. This epithet is often opposed to *empirical*; as *rational treatment.* The French also, say *Signes rationales*, in opposition to *Signes sensibles.*

RATSBANE, Arsenious acid.

RATTLE, Rhonchus, Rhenchus, Rhenxis, from (D.) *Ratel; Rhonchus, Cerchnus, Rhognos.* (F.) *Râle.* Noise produced by the air in passing through mucus, of which the lungs are unable to free themselves. This condition is chiefly observed at the approach of death; and is commonly called "*the rattles.*"

The name *Râle* has been given to different sounds during respiration, caused by the air passing through fluid contained in the bronchi, or areolæ of the pulmonary tissue; and which are perceived by the stethoscope.

RÂLE CRÉPITANT, *Rhonchus crep'itans*. See Crepitation.

RÂLE MUQUEUX, *Rhonchus mucosus*, 'Mucous Rattle.' The sound produced by the passage of air through mucus accumulated in the bronchi or trachea, or through softened tubercular matter. This râle occurs in catarrh, and in softened tubercle. When carried to a very high degree, it constitutes a *gurgling*, (F.) *Gargouillement*.

RÂLE SIBILANT, *Rhonchus sibilans*, *Sibilant Rattle*. A slight, though prolonged whistling sound, occurring either at the commencement of inspiration, or of expiration, owing to the presence of mucus, thin and viscid, but not abundant, which obstructs, more or less completely, the smaller bronchial ramifications. It is seated in the small tubes, and occurs in the first stage of bronchitis.

RÂLE SONORE, *Rhonchus sonorus*, *Sonorous Rattle*. A sound resembling at times the snoring of a person asleep, at others the sound of the bass string of an instrument when rubbed with the finger, and not unfrequently the cooing (F.) (*Rucoulement*) of a dove. It seems to be caused by a contraction of the bronchial tubes, and is characteristic of chronic catarrh.

RATTLESNAKE, *Crotalus horridus*—r. Root, *Polygala senega*.

RATULA, *Raspatorium*.

RAUCEDO, *Raucitas*, *Paraphonia rauca*, *Asperitas Arteriarum*, *Vox rauca*, *Branchus*, *Hoarseness*, (F.) *Enrouement*, *Raucité*. A change in the voice, which loses its smoothness and becomes low and obscure. It is a common symptom in diseases of the larynx and trachea.

RAUCITAS, *Raucedo*.

RAUCITÉ, *Raucedo*.

RAVE, *Brassica rapa*.

RAYONNÉ, *Radiated*.

RAYONS SOUS-IRIENS, *Ciliary processes*.

REACTION, *Reactio*, from *re*, 'again,' and *agere*, *actum*, 'to act.' An action of resistance to a power applied. A species of vital movement or excitement, tending to prevent or destroy the effects of any noxious power applied to the animal economy, and which, by some, has been attributed to the *vis medicatrix nature*. It is certainly dependent on the organic instinctive actions of the frame.

REALGAR, *Realgal*, *Arlada*, *Arladar*, *Auripigmentum rubrum*, *Arsenicum rubrum factitium*, *Alessi*, *Sandardcha Græcorum*, *Red Sulphuret of Mercury*. A violent poison. See Poison.

REASON, *Ratio*, *Logos*, (F.) *Raison*. Same etymon as *RATIO* (q. v.) The faculty or property of the mind, by means of which man perceives the distinction between right and wrong, in physics as well as morals. *Reason* is a just conclusion resulting from the comparison of two ideas, by virtue of which we form a judgment.

REBOLEA, *Mummy*.

REBONA, *Mummy*.

REBOUTEUR, *Renoucur*.

RECEPTACULA DURÆ MATRIS, *Sinuses of the dura mater*.

RECEPTACULUM CHYLI, 'receptacle of the chyle,' *R. Pecqueti* seu *Pecquetianum*, *Dierendorum Chyli*, *Sacculus chyli* seu *rorifer*, *Saccus lacteus*, *Albeus ampullæ* seu *ampullæ*-

cens, *Utriculus lacteus*, *Vesicula chyli*, *Ampulla chyli* seu *chyli*, *Cister'na lumbæ* seu *ris*, *C. Chyli*, *Chylocystis*, *Latices lactei*. (F.) *Reservoir du chyle*, *R. de Pecquet*, *Citerne lombaire*. A considerable dilatation of the thoracic duct, in front of the lumbar region of the vertebral column.

RECEPTACULUM COTUNII is a triangular space, formed by a separation of the two laminae of the dura mater in the internal ear, near the middle of the posterior surface of the pars petrosa of the temporal bone, where the aquæductus vestibuli terminates. It is always filled with the *Fluid of Cotugno*.

RECEPTACULUM PECQUETI, *R. chyli*.

RECEPTIVITY, (F.) *Réceptivité*, from *recipere*, *receptum*, 'to receive.' A word, used by Tissot to express the susceptibility of certain organs to receive morbid impressions.

RECESSIO, *Paroxysm*.

RECESSUS, *Abscess*.

RECHAMELCO, *Rachamelca*.

RECHUTE. See *Relapse*.

RÉCIDIVE. See *Relapse*.

REC' IPE, (L.) (*re*, and *capere*, 'to take.') A Latin word, which signifies 'take,' (F.) *Prenez*, and with which prescriptions are commenced. It is, often, represented by *R*, *℞*, and, was formerly by *℥*. See *Abbreviation*.

RECLINATION, *Reclinatio*; from *reclinare*, (*re* and *clinare*, 'to bend,') 'to bend back.' A mode of operating for the cataract, which consists in applying the needle, in a certain manner, to the anterior surface of the cataract and depressing it into the vitreous humour, in such a way, that the front surface of the cataract is the upper one and its back surface the lower one.

RECOMPOSITION, *Metasynchrisis*.

RECORPORATIVUS, *Metasynchrisis*.

RECREMENT, *Recrementum*, from *re*, and *cernere*, *cretum*, 'to sift.' A humour, which, after having been separated from the blood, is again returned to it; such as the saliva, the secretion of serous membranes, &c. Such fluid is said to be *recremental*.

RECRUDESCENTIA, *Palincotésis*, *Recrudescence*, from *re*, 'again,' and *crudus*, 'raw.' An increase of a disease after a temporary remission.

RECTIFICATION, *Rectificatio*, from *rectum* *fucere*, 'to make right.' An operation, by which certain liquids are purified by distilling them either singly, or after admixture with other substances.

RECTO-VAG'INAL, *Recto-vaginalis*. That which relates or belongs to the rectum or vagina.

RECTO-VAGINAL FISTULA is owing to a preternatural communication between the rectum and vagina, through the above septum.

RECTO-VAGINAL SEPTUM, (F.) *Cloison recto-vaginale* is formed by the junction—back to back—(or by what the French term *adossement*) of the rectum and vagina. It separates these two canals from each other.

RECTUM; so called from a notion that it is straight. It is not so. *Intestinum Rectum*, *Apeuthysmenos*, *Euthyenteron*, *Longæon*, *Longas*, *Longanon*, *Archos*, *Cys'suros*, *Princeps*, *M-noc'lon* (?). The third and last portion of the great intestine. It forms the continuation of the sigmoid flexure of the colon, occupies

the posterior part of the pelvis, and extends from the left side of the sacro-vertebral articulation to the coccyx, before which it opens outwards by the orifice called the *anus*. It is cylindrical, but *sacculated*, as it were, at its inferior portion, where it is consequently larger, and is attached to the sacrum by the mesorectum. Like the other portions of the canal it is formed of three membranes. Towards the lower extremity, some parallel and longitudinal wrinkles are observable on its inner surface: these are the *Columns of the Rectum* or of *Morgagni*, (F.) *Colonnes du rectum* ou de *Morgagni*. They are merely folds of the mucous membrane, between which is a number of *Lacunæ*. The arteries of the rectum are numerous. They proceed from the inferior mesenteric, hypogastric, and internal pudic, and are called *hemorrhoidal* (q. v.) The veins open, partly into the hypogastric vein, partly into the inferior mesenteric. The nerves proceed from the sciatic and hypogastric plexuses. The rectum receives the fecal matters, as they pass from the colon, which serves as a reservoir.

RECTUS ABDOMINIS, *Pubio-sternal*, *Sterno-pubien* (Ch.) (F.) *Droit de l'abdomen*. A long, flat muscle, situate at the anterior part of the abdomen, and separated from that of the opposite side by the *linea alba*. It is attached, above, to the cartilages of the last three true ribs; and, below, to the pubis by a very strong tendon, the outer edge of which is continuous with the *fascia transversalis*. This muscle is enclosed in an aponeurotic sheath; and, in its course, has three or four transverse, aponeurotic intersections. It bends the chest on the pelvis, and conversely.

RECTUS ANTERIOR BREVIS, *Rectus capitis internus minor*—r. *Anterior longus*, R. *capitis internus major*—r. *Capitis anticus longus*, R. c. *internus major*.

RECTUS CAPITIS INTERNUS MAJOR, R. *internus major*, R. *anterior longus*, *Trachélo-basilaire*, *Rectus capitis anticus longus*, (F.) *Grand droit antérieur de la tête*. This muscle is long in proportion to its breadth; flat, and broader above than below. It is situate at the anterior and lateral part of the neck, and arises from the transverse processes of the 3d, 4th, 5th, and 6th cervical vertebra. It is inserted into the basilar process of the occipital bone.

RECTUS CAPITIS INTERNUS MINOR, R. *internus minor*, *Renuens*, *Anuens*, R. *anterior brevis*, *Petit trachélo-basilaire*, (F.) *Petit droit antérieur de la tête*. This is situate deeper than the last. It is thin, flattened, irregularly quadrilateral, and passes from the anterior surface of the body of the first vertebra, near the origin of the transverse process, to be inserted into the basilar process.

RECTUS CAPITIS LATERALIS, R. *lateralis Falpui*, *Transversalis anticus primus*, *Rectus lateralis*, *Trachélo-atloïdo-basilaire*, *Atloïdo-sous-occipital* (Ch.) (F.) *Droit latéral de la tête*. There is a muscle of this name on each side of the head. It is flat, quadrilateral, and passes from the transverse process of the atlas to the occiput, behind the jugular fossa. It inclines the head to one side.

RECTUS CAPITIS POSTICUS MAJOR, R. *Major*, R. *Capitis posticus minor* (*Albinus*), *Spinio-atloïdo-occipitalis*, *Atloïdo-occipitale* (Ch.) (F.) *Grand droit postérieur de la tête*. A flat, triangular

muscle situate at the posterior and superior part of the neck. It extends from the spinous process of the second cervical vertebra to the external surface of the lower semicircular ridge of the occipital bone. This muscle extends the head; inclines it to one side; and causes it to experience a rotary motion, which directs the face to its side.

RECTUS CAPITIS POSTICUS MINOR, R. *Minor*, *Taber-atloïdo-occipital*, *Atloïdo-occipital* (Ch.) (F.) *Petit droit postérieur de la tête*. A flat, triangular muscle, situate beneath the last, and which passes from the posterior arch of the atlas to the occipital bone. It extends the head.

RECTUS CAPITIS POSTICUS MINOR, R. c. p. *major*—r. *Cruris*, R. *femoris*—r. *Interior femoris*, *Gracilis*—r. *Internus major*, R. *capitis internus major*—r. *Internus minor*, R. *capitis internus minor*—r. *Lateralis*, R. *capitis lateralis*—r. *Lateralis Fallopii*, R. c. *lateralis*—r. *Major*, R. *capitis posticus major*—r. *Minor*, R. *capitis posticus minor*.

RECTUS EXTERNUS OCULI, *Abductor oculi*, *Indignabundus*, *Indignatorius*, *Inacundus*, *Oculum movens secundus*, *Orbito-extrus-scleroticien*. All the recti muscles of the eye, four in number, arise from the bottom of the orbit, and are inserted into the sclerotic coat of the eye. The *Rectus externus*, (F.) *Droit externe*, *Inscissile*, ou *Abducteur* is divided, at its posterior extremity, into two portions, one of which is attached to the outer part of the foramen opticum, and the other to the sphenoid bone.

RECTUS INFERIOR OCULI, *Depressor oculi*, *Timidus*, *Deprimens*, *Humilis*, *Oculum movens quartus*, *Sous-optico sphéno-scleroticien*, (F.) *Droit inférieur ou abaisseur de l'œil*, arises below the optic foramen, from the sphenoid bone. It depresses the eye.

RECTUS INTERNUS OCULI, *Adducens oculi*, *Bibitorius*, *Oculi adductor*, *Oculum movens primus*, *Orbito-intus-scleroticien*, (F.) *Droit interne de l'œil* ou *adducteur* ou *buteur*. It arises from the sphenoid at the inferior part of the foramen opticum. It turns the eye towards the nose.

RECTUS SUPERIOR OCULI, *Attollens oculi*, *Levator oculi*, *Superbus*, *Elevator oculi*, *Oculum movens tertius*, *Sus-optico-sphéno-scleroticien*, (F.) *Droit supérieur*, ou *élévateur de l'œil*, *Dédaigneux*, is attached to the circumference of the foramen opticum.

(All the recti muscles are concerned in the voluntary motions of the eye. The oblique muscles have been supposed by Sir C. Bell to execute the involuntary. [?])

RECTUS FEMORIS, *Rectus* sive *gracilis anterior*, *Rectus cruris*, *Ilio rotulien*, (F.) *Droit antérieur de la cuisse*. A straight muscle seated at the anterior part of the thigh. It extends from the anterior and inferior spine of the ilium and the cotyloid cavity of the patella. This muscle extends the leg upon the thigh, and conversely. It can, also, bend the thigh upon the pelvis or carry the pelvis forward.

RECUBITORIUM, *Anaclinterium*.

RECURRENT, *Recurrens*; from *recurere*, (*re*, and *currere*), 'to run back.' A name given to several arterial and nervous branches, which seem to re-ascend towards the origin of the trunk whence they emanated.

RECURRENT ARTERIES. This name has been given to several arteries of the forearm, and to

one of the leg. In the forearm, there are, 1. The *Radial recurrent*, *Artère recurrencte de l'épicondyle*, (Ch.) which arises from the superior part of the radial, and ascends between the supinator longus, s. brevis, and the brachialis internus. 2. The *anterior cubital recurrent*, *A. recurrencte de l'épitrochlée*, (Ch.) which arises from the upper and inner part of the cubital, and ascends between the pronator teres and brachialis internus. 3. The *posterior cubital recurrent*, which arises from the preceding artery, or from the cubital itself, and ascends between the olecranon and internal tuberosity of the humerus. 4. The *posterior radial recurrent*, *A. recurrencte olécranienne*, (Ch.) It arises from the posterior interosseous, and ascends between the posterior cubital and anconeus muscles. In the leg,—the *Arteria recurrens tibia'lis*, *A. recurrencte du genou*, (Ch.) is furnished by the anterior tibial, and ascends to the tibialis anticus muscle.

RECURRENT BANDAGES are formed by convolutions of the bandages, which make a kind of cap for the part—as the head—to which they are applied.

RECURVATIO. See Hump.

REDIMICULUM, Diadema.

REDINGOTES ANGLAISES, Condom.

REDoubleMENT, Exacerbation, Paroxysm.

REDS, Menses.

REDUCTIO, Taxis.

REDUCTION, *Reduc'tio*, *Reposi'tio*, *Restitutio*, from *re*, and *ducere*, *ductum*, 'to lead.' A surgical operation, the object of which is to restore displaced parts to their original situation. Thus, we say the reduction of a luxation, when the displaced parts are again brought to their proper relative situation. The reduction of a hernia is the restoration of the protruded parts to the cavity of the abdomen. This is, also, called *Taxis*.

REDUNDANTIA, Plethora.

REDUVIA, Paronychia.

REFECTIO, Restauratio.

REFLECTION, Duplicature.

REFLEX SYSTEM OF NERVES. See Nerves.

REFRACTION, *Photocamp'sis*, from *re*, and *frango*, 'I break.' The change of direction which rays of light experience when they pass obliquely from one medium into another of different density. If the light passes from a rarer to a denser medium it approaches the perpendicular raised at the point of immersion. The contrary occurs, when it goes from a denser to a rarer medium. The theory of lenses, telescopes, and of the eye, rests entirely on this property of light.

REFRAICHISSANTS, Refrigerants.

REFRIG'ERANTS, *Refrigeran'tia*, *Psychtica*, (F.) *Refruchissans*, *Réfrigeratifs*, from *re*, and *fr gere*, 'to cool.' Medicines, which depress the morbid temperature of the body. The chief reputed refrigerants are the Potassæ Nitras, (?) the Sodæ Boras, (?) but chiefly the abstraction of caloric by ice and iced drinks, cold water, cold lemonades, soda water, and effervescing draughts internally; and externally cool air, ice, cold water, evaporating lotions and frigorific mixtures.

REFRIGERATIFS, Refrigerants.

REGENERATIO, Reproduction.

REGENERATION, *Regenera'tio*, *Palingenesia*, from *re*, and *generare*, 'to beget.' Reproduction of a part of the body, which has been destroyed.

REG'IMEN, from *regere*, 'to govern.' The rational and methodical use of food, and of every thing essential to life; both in a state of health and disease. It is often restricted, in its meaning, to *Diet*. It is sometimes used synonymously with *Hygiène*.

REGINA PRATI, Spiræa ulmaria.

REGIO CARDIACA, Epigastric region—r. Hypochondriaca, Hypochondre—r. Stomachalis, Epigastric region—r. Stomachica, Epigastric region.

REGION, *Regio*. Same etymon. Anatomists have called *regions*, determinate spaces on the surface of the body or of different organs. Thus, the abdomen has been divided into several; to which different names have been given. See Abdomen, Epigastrium, Hypochondrium, Hypogastrium, &c.

REGION OMBILICALE, Umbilical R.

REGIONAL ANATOMY, see Anatomy.

RÈGLES, Menses.

RÉGLISSE, Glycyrrhiza.

REGLUTINATIO, Decollement.

RÈGNE ANIMAL. See Animal.

REGULUS ANTIMONII, Antimonium.

REGURGITA'TION, *Regurgita'tio*. The act by which a canal or reservoir frees itself, without effort, from substances accumulated in it. Usually, it is applied to the puking of infants; and to the rising of solids or fluids into the mouth in the adult,—from *re*, and *gorge*, 'the throat.'

The substances brought into the mouth by regurgitation, the French call *Renvois*.

REIN, Kidney.

REINE DES PRÈS, Spiræa ulmaria.

REINFORCEMENT, FASCICULUS OF, *F. Cuned'tus*. A band of fibres from the corpus innominatum or lateral part of the antero-lateral column of the medulla, which is continued up behind and around the corpus olivare, is lined on its inner or central surface with cineritious substance, enlarges as it ascends, passes over the upper surface of the pons Varolii, and is expanded into the optic thalamus. It thus forms, in its course, the anterior paries of the 4th ventricle, and is brought into view by brushing away the *tuberculum cinereum* or gray matter of the ventricle. The band has received these names owing to its constantly increasing as it ascends, and being mixed up with gray matter on its inner face, from which it seems to derive new fibres.

REJECT'IO, *Anago'gê*, from *re*, and *jacere*, 'to cast.' Every excretion by the mouth; spitting, expectoration, regurgitation or vomiting.

REJECTIO SANGUINIS E PULMONIBUS, Hæmoptysis.

RELACHEMENT, Relaxation.

RELAPSE, *Hypot'ropê*, *Hypotropiasmus*, from *re*, 'again,' and *labor*, 'I fall down.' The return of a disease, during, or shortly after, convalescence. The French use *Rechute* in this sense; and *Récidive*, (*Morbus recidi'vus*,) for the return of a complaint, at a greater or less period after the complete restoration of health.

RELATIO, Rapport.

RELAXANT, *Laxans*, *Malact'icum*, (F.) *Relachant*; from *re*, and *laxare*, 'to loose.' A me-

dine which diminishes the tension of organs. Mucilaginous and fatty substances are relaxants.

RELAXANTIA, Emollients.

RELAXATION. Same etymon. *Chalasis*, *Chalusmos*, (F.) *Relachement*. In *Physiology*, relaxation is opposed to contraction. In *Pathology*, it means great looseness of a part.

RELEVEUR DE L'ANUS, Levator ani—*r. de la Lèvre inférieure*, Levator labii inferioris—*r. du Menton*, Levator labii inferioris—*r. de l'Omoplate*, Levator scapulae—*r. de la Prostata*, Levator prostatae—*r. de l'Urèthre*, Levator urethrae.

RELIQUAT, (F.) The remnant or remains of a disease.

REMÈDE, Clyster—*r. du Capuchin*, Liquor hydrargyri nitrici—*r. du Duc d'Antin*, Liquor hydrargyri nitrici.

REMEDIUM, Juvans, Medicament.

REMEDY, Medicament—*r. English*, Cinchona.

REMISSIO, Decline.

REMIS'SION, *An'esis*, *Submis'sio*, *Aph'esis*, *En'dosis*, *Remis'sio*, from *remittere*, (*re*, and *mittere*, 'to send,') 'to relax.' In a more extensive signification, a temporary diminution of the symptoms of a disease, either acute or chronic. Diminution in the febrile symptoms, such as occurs in a remittent fever, between the exacerbations.

REMITTENS ICTERODES, Fever, yellow.

REMITTENT, *Remittens*. Same etymon. Any disease, which presents remissions, (q. v.)

REMITTENT FEVER, *Febris remittens*, *Epan'ctus*, (F.) *Fièvre remittente*, is one which strikingly exacerbates and remits, but without intermission. The ordinary bilious fever of the United States is a simple remittent—*Epanectus mitis*, (F.) *Fièvre remittente simple*.

REMORA, from *remora'ri*, (*re*, and *mora*, 'delay,') 'to arrest.' The name of two surgical instruments, intended to retain parts *in situ*. The one was used, formerly, in castration, to prevent the intestines from protruding at the inguinal ring; the other, called *Remora Hildani*, (F.) *Arrêt d'Hildan*, *Echene'is*, *εχηνίς*, was employed to maintain fractures and luxations reduced. It is not now used.

REMORA ARATRI, *Ononis spinosa*.

REN, Kidney.

RENAL, *Ren'al*, from *Ren*, 'the kidney.' That which relates to the kidney.

RENAL or EMULGENT ARTERIES are very large and short, and commonly two in number, —one to each kidney. They arise from the sides of the abdominal aorta, forming with it a right angle. The left is commonly a little more anterior and elevated than the right. After a short course, they arrive at the fissure of the kidney, where they divide, before entering it, into three or four very considerable branches.

RENAL or EMULGENT PLEXUSES. These are two:—one on each side. They proceed from fasciculi of the solar and celiac plexuses; from the outer part of the semilunar ganglion and the final expansion of the small splanchnic nerves. These plexuses begin by three or four ganglions, situate at the commencement of the renal artery; and they give off from their circumference many fine, straight filaments, which do not anastomose, and which enter the kidney with the divisions of the renal artery. These divisions they accompany.

RENAL or EMULGENT VEINS. These are very large. Their roots follow the same course as the arteries in the substance of the kidney. In the fissure or pelvic portion of the kidney, they unite into a single trunk, which passes transversely inwards, and opens at the side of the vena cava descendens.

RENCHUS, Snoring, Stertor.

RENES SUCCENTURIATI, Capsules, renal.

RENNES, MINERAL WATERS OF. Thermal salines in the department of Aube, France, containing carbonic acid and chloride of magnesium. Temperature 103° to 121°, Fahr.

RENNET, *Runnet*, from *gerinnen*, 'to coagulate' (?) When the fourth stomach or *Abomasus*, (q. v.) of the calf is salted and dried, it possesses the property of coagulating milk, when a portion of it is soaked in water, and the infusion is added to the milk.

RENONCULE, *Ranunculus*—*r. Bulbacea*, *Ranunculus bulbosus*.

RENOUÉE, *Polygonum aviculare*.

RENOUEUR, (F.) *Rebouteur*, *Rhabilleur*. A bone-doctor:—a bone-setter. One who makes a trade of reducing fractures and dislocations.

RENUENS, *Rectus capitis internus minor*.

RENUNCIATIO, *Rapport*.

RENVERSEMENT DE LA LANGUE, *Paraglossa*—*r. de la Matrice*, Uterus, inversion of the—*r. des Paupières*, Ectropion—*r. du Rectum*, Proctocoele—*r. de la Vessie*, Exocyste, Exstrophia of the bladder.

REPANDATIO, Lordosis.

REPELLENTS, *Repellentia*, *Repercution'ia*, *Apocrus'tica*, (F.) *Répercussifs*, from *re*, and *pellere*, 'to drive.' Medicines which, when applied to a tunefied part, cause the fluids, that render it tumid, to recede, as it were, from it. Astringents, cold water, ice, &c are repellents.

RÉPERCUSSIONS, Repellents.

REPERCUSSIO, *Contra-fissura*.

REPERCUSSION, *Anac'lasis*, from *re*, *per*, and *quater*, 'to shake, or batter.' Disappearance of a tumour or cutaneous eruption, in consequence of the application of a repellent. The action of a repellent remedy. The French writers use the term *Délitescence* for the sudden disappearance of a tumour, inflammation, eruptive disease, or purulent collection, without the disease occurring in any other part of the body: in this respect *delitescence* differs from *metastasis*: *Delitescence* of an inflammation or 'sudden disappearance,' is distinguished by certain French pathologists from *Resolution*, (q. v.) *Repercussion* also means *Ballotement*, (q. v.)

REPERCUTIENTIA, Repellents.

REPLETIO, Fulness, Plethora.

REPLI LONGITUDINAL DE LA MÉNINÉE, *Falx cerebri*.

REPOSITIO, Reduction, Taxis.

REPOUSSOIR, Punch—*r. d'Arêtes*, Probang.

REPRODUCTION, *Regenera'tio*, from *re*, and *producere*, (*pro*, and *ducere*.) The function, by which living bodies produce bodies similar to themselves. See Generation. As a general remark, it will be found true, that the larger animals are uniparous; and the smaller, which are more exposed to destruction, multiparous. The mammalia being of the same natural class as man, it may be useful to compare them in this respect.

COMPARATIVE TABLE OF REPRODUCTION IN THE CLASS MAMMALIA.

Species.	Age capable of en- gendering.	Duration of gesta- tion.	Number of young at each birth.	Period of cessation of the functions.
<i>Primates.</i>				
Man,.....	14 years	9 months	1 to 3	At a somewhat ad- vanced age.
Monkeys (large,).....	3 years	7 months	Do.	
Do. (long-tailed,) ..	2 years	6 months	Do.	
<i>Carnivora.</i>				
Bear,.....	2 years	112 days	1 to 4	25 to 30 years.
Badger,.....	3 to 4	20 to 25 years.
Hedgehog,.....	1 year	1 month and 10 days	3 to 5	Produces during life.
Ferret,.....	11 months	Do.	5 to 9 twice a year	
Otter,.....	3 months	3 to 4	
Pole-cat,....	before 1 year	56 days	3 to 6	8 to 10 years.
Marten,				
Weasel, and				
Ermine,				
Didelphus, ...				
Opossum, and	4 to 6	10 years. (?)
Philander,....				
Lion,.....	2 years	3 to 4 months	3 to 4	20 to 25 years.
Tiger, ...	Do.	3 months	4 to 5	Do.
Leopard, . }				
Lynx,.....	before 1 year	9 weeks	3 to 4	9 years.
Wild Cat,.....				
Wolf,.....	2 years	73 days	5 to 9	15 to 20 years.
Dog in the most natural	10 months	63 days	3 to 6	15 years.
state, }				
Fox,.....	1 year	2 months	Do.	10 or 12 years.
Jackall,.....	Do.	5 to 8	
Isatis,.....	63 days	6 to 7	
Phoca,.....	3 months (?)	2 to 3	
<i>Rodentia.</i>				
Squirrel,.....	1 year	45 days	3 to 4 twice a year	Produces during life.
Flying Squirrel,.....	3 to 4	Do.
Ondatra,.....	3 to 5	Lives 6 years.
Beaver,.....	4 months	2 to 3	Lives 8 years.
Hare,.....	1 year	30 days	{ 2 to 4 several }	
Rabbit,.....	6 months	Do.	4 to 8 do.	Lives 8 or 9 years.
Rat,.....				
Mouse,.....	Do.	5 or 6 weeks	5 to 6 do.	Produces during life.
Marmot,.....	1 month	Do.	Do.
Guinea Pig,.....	5 to 6 weeks	6 weeks	2 to 4	Do.
Dormouse,.....	1 year	3 weeks	5 to 8 times a year	Do.
			3 to 5	
<i>Edentata.</i>				
Armadilla,.....	4 times a year	7 to 8 years. (?)
<i>Ruminantia.</i>				
Camel,.....	4 years	11 months or 1 year	1	40 to 50 years.
Dromedary,.....	Do.	Do.	1	Do.
Buffalo,.....	3 years	9 months	1	15 to 18 years.
Beef,.....	2 years	Do.	1 to 2	9 years.
Lama,.....	3 years	Do.	12 years.
Reindeer,.....	2 years	8 months	1	Lives 16 years.
Buck and Doe,.....	1½ year	Do.	1 to 2	Lives 25 or 30 years.
Roebuck,.....	Do.	5 months	Do.	Lives 12 or 15 years.
Saiga (Antelope),.....	1 year	Do.	Do.	Lives 15 or 20 years.
Chamois and Wild Goat,	Do.	Do.	1, 2, and 3	Lives 18 or 20 years.
Goat,.....	Do.	Do.	Do.	7 years.
Musimon,.....	1½ year	Do.	1 to 2	8 or 10 years.
Sheep,.....	1 year	Do.	Do.	8 years.
<i>Solipedes.</i>				
Horse,.....	2½ years	290 days	1 or 2	25 or 30 years.
Ass,.....	Do.	Do.	Do.	Do.
Zebra,.....	Do.	Do.	Do.	Do.

REPULSORIUM, Punch.

REPURGA'TIO, *Anacathar'sis*, from *re*, and *purgare*, 'to cleanse.' According to Castelli—purgation by transpiration or by expectoration. Medicines producing this effect are called *Repurgantia*.

RESCONTRANATU'RAM. 'Things against nature.' (F.) *Choses contre nature*, are those

things which tend to destroy man;—as disease, and every thing connected with it.

RES CULINARIA, Culinary art—r. Medica, Medica.

RES NATURA'LES, (F.) *Choses naturelles*. Those things, which, by their union, were conceived to constitute the nature of man; such as the elements, temperaments, humours, spirits, &c.

RES NON NATURALES, (F.) *Choses non-naturelles*. Those things which, anciently, formed the matter of hygiene. See Non-Naturals.

RES VENEREA, Coition—r. Vestitaria, Vestitus.

RÉSEAU, Rete—r. *Admirabile*, Rete mirabile—r. *Mercueilleux*, Rete mirabile.

RESECTION, *Resectio*, from *resicare*, (re, and *secare*), 'to cut off.' A name, given, especially by the French surgeons, to operations, in which the carious extremities of long bones, or the unconsolidated extremities of fractured bones, forming irregular joints, are removed with the saw.

RESECTION. See Amputation.

RESERVOIR DE LA BILE, Gall-bladder—r. du *Chyle*, Receptaculum chyli—r. des *Larmes*, Lachrymal sac—r. of Pecquet, Cistern, lumbar—r. de Pecquet, Receptaculum chyli.

RESIMUS, Camus.

RESIN, *Resina*, *Rhetinē*. A vegetable product, commonly dry and concrete, more or less brittle, inodorous or slightly odorous, insipid, or of an acid, warm taste; of a smooth, glassy fracture, heavier than water, inflammable, insoluble in water, soluble in alcohol, ether, and yolk of an egg, and negatively electrifiable by friction. Many resins are used in medicine; the greater part are purgative and irritating. Some act like acrid poisons.

RESIN, CAYENNE, Caoutchouc—r. of the Spruce fir, see Pinus abies.

RESINA ABIETIS, see Pinus abies—r. Abietis, see Pinus picea—r. Abietis humida, see Pinus abies—r. Abietis sicca, see Pinus abies—r. Alba, see Pinus sylvestris—r. Alba humida, see Pinus abies—r. Copal, Copal—r. Elastica, Caoutchouc—r. Flava, see Pinus sylvestris—r. Fluida Canadensis, see Pinus balsamea—r. Juniperi, Sandarac—r. Laricis, see Pinus larix—r. Lentiscina, see Pistacia lentiscus—r. Liquida pini balsamea, see Pinus balsamea—r. Liquida pini laricis, see Pinus larix—r. Nigra, Colophonia—r. Pini, see Pinus sylvestris—r. Pini empyreumatica liquida, see Pinus sylvestris—r. Pini abietis sponte concreta, see Pinus abies—r. Strobilina, see Pinus balsamea, and Pinus mughos—r. Terebinthi, see Pistacia terebinthus.

RESINATUM, *Rhetinotōn*, *ρητινωτόν*. An epithet for wine impregnated with resin, and used by the ancients as a stomachic.

RESINE DE GOMART, see Bursera gummi-fera—r. de Lierre, see Hedera helix.

RESINOCE' RUM, *Rhetinoce'ron*, from *ρητιν*, 'resin;' and *κερος*, 'wax.' A mixture of resin and wax.—Galen.

RESOLUTIO MEMBRORUM, Paralysis—r. Nervorum, Paralysis.

RESOLUTION, *Resolutio*, *Discussio*, from *resolvere*, (re, and *solvere*), 'to loosen.' One of the terminations of inflammation, in which the inflamed part returns gradually, and without suppuration, to the healthy condition.

RESOLUTION DES MEMBRES, Paralysis.

RESOLVENTIA, Discussants.

RESONANCE, from re, 'again,' and sono, 'I sound.' 'A return of sound.' A thrilling of the voice more loud than natural; or its existence in a part where it is not heard in health; as detected by auscultation. A thickened and hardened state of the lung, caused either by a mass of crude tubercles, or by inflammation, is generally considered to produce this phenomenon, by rendering the lung a better conduc-

tor of the murmur of the voice in the bronchi. Hence the origin of the term *Bronchophony*, from *βρονχος*, 'bronchus,' and *φωνη*, 'the voice.' (F.) *Voix bronchique*.

RESONITUS, Contra-fissura.

RESORPTIO, Absorption.

RESORPTION, *Resorptio*, from *resorbere*, (re, and *sorbere*), 'to absorb again.' Absorption of a fluid, which has been previously deposited in a part by the exhalants:—as of pus, blood, serum, &c.

RESPIRABLE, *Respirabilis*. Same etymon as RESPIRATION (q. v.) Any gas which can be breathed without positive danger is so called.

RESPIRAMEN, Respiration.

RESPIRAMENTUM, Respiration.

RESPIRATION, *Anapnoē*, from *respiro*, (re, and *spiro*), 'I take breath.' *Anapneusis*, *Pneusis*, *Spiratio*, *Respiratio*, *Respiramentum*, *Respiratus*, *Respiritus*, *Spiritus*. A function, proper to animals, the object of which is, to place the materials of the blood—the mixture of the venous blood with lymph and chyle—in contact with atmospheric air, in order that it may acquire the vivifying qualities that belong to arterial blood. The organs for executing this function, are,—in the mammalia, birds, and reptiles,—the *lungs*. In man, the respiration consists of mechanical and chymical phenomena. The mechanical are *Inspiration* (q. v.) and *Expiration*, (q. v.) The evident chymical phenomena consist in the formation of a certain quantity of carbonic acid, in the absorption of a part of the oxygen of the air, and in the disengagement of a quantity of water in the state of vapour. In the healthy condition, the respiration is easy, gentle, regular, and without noise. In man, the respirations are, generally, about 35 per minute in the first year of life; 25 during the second; 20 at puberty; and 18 in the adult age.

RESPIRATION OF THE CELLS, Murmur, Respiratory—r. Metallic, *Tintement métallique*—r. Proof, *Docimasia pulmonum*—r. *Soufflante*, Murmur respiratory.

RESPIRATOR, same etymon. Various instruments have been devised for the purpose of tempering the air before it reaches the lungs in winter. One of the best is that of Jeffrey, which is made of several layers of a fine wire tissue.

RESPIRATORY, same etymon. Appertaining to respiration. An epithet applied to the murmur heard by auscultation in a healthy adult, during inspiration and expiration. It marks the entrance of the air into the cells, and its passage out of them. See Murmur.

RESPIRATORY TRACT, *Tractus respiratorius*. The middle column of the spinal marrow, described by Sir Charles Bell as that whence the respiratory nerves originate. See Nerves.

RESPIRATUS, Respiration.

RESPIRITUS, Respiration.

RESTA BOVIS, *Ononis spinosa*.

RESTAURATIO, *Refectio*, *Analepsis*, *Anatrepsis*, *Anucomidē*, *Anallēsis*, *Anacēsis*, *Apocatasus*. Restoration of strength after disease or great fatigue.

REST-HARROW, *Ononis spinosa*.

RESTIFORMIS PROCESSUS, Coracoid.

RESTITUTIO, Reduction—r. Organica, Morio-plastice—r. Partium deperditarum, Morio-plastice.

RESURRECTION-MAN, Resurrectionist.

RESURRECTIONIST, *Resurrection-man*, *Body snatcher*; from *re*, and *surgere*, 'to arise.' An individual who violates the sanctuary of the grave to obtain subjects for dissection.

RESUSCITATION, *Resuscitatio*, from *resuscita're*, (*re*, and *suscitare*, *sursum citare* seu *ciere*), 'to move up,' 'to stir up anew.' *Revivification*. The restoration of persons, apparently dead, to life. See *Asphyxia* and *Suffocation*.

RETCHING, *Vomiturition*.

RETE, *Plexus*—*r*. *Malpighii*, *Corpus mucosum*.

RETĒ, *Reticulum*; 'a net;' *Dict'yon*, (F.) *Réseau*. A name given to the interlacing and decussation of blood-vessels, lymphatics, fibres, and nerves, when they form a kind of network.

RETE has, also, been applied to the *epiploon*.—*Castelli*.

RETĒ MIRAF'ILĒ, (F.) *Reseau admirable*, *R. merveilleux*. A name given to the ramifications and anastomoses of the internal carotid and vertebral arteries, at the base of the brain.

RETE MIRABILE vel **RETE VASCULO'SUM MALP'IGHII**, is the plexus formed on the cells of the lungs by the minute ramifications of the pulmonary artery.

RETE MUCOSUM, *Corpus mucosum*.

RETE VASCULOSUM TESTIS. An irregular plexus or network, formed by the communication of the *Vasa recta* at the upper and back part of the testicle. These *Vasa recta* are sent out at the back part of the testicle, from the convoluted seminal tubes. The *RetĒ Vasculosum testis* sends out from twelve to eighteen straight tubes, called *Vasa efferentia*, which convey the semen from the testes to the epididymis.

RETENTION, *Retentio*, from *retine're*, (*re*, and *tenerē*), 'to hold back.' Accumulation of a solid or liquid substance, in canals intended for its excretion, or in a reservoir, intended to contain it only for a short period.

RETENTION OF URINE; *Paru'ria Retentio'nis vesical'is*, *Ischuria vesical'is*, *Retentio Uri'nae* (F.) *Rétention d'urine*. A disease in which the urine, accumulated in the bladder, cannot be evacuated; or, at least, cannot be passed without extreme difficulty. In the former case, the retention is said to be *complete*; in the latter, *incomplete*. Many writers have distinguished three degrees of this affection, to which they have given the names *Dysury*, (q. v.), *Strangury*, (q. v.), and *Ischury*, (q. v.) Retention of urine may depend upon loss of contractility, paralysis of the bladder, &c., or on some obstacle to the passing of the urine, as in cases of pressure, of the womb on the bladder, of tumours in its vicinity, foreign bodies in its cavity, inflammation of the urethra, swelling of the prostate, stricture, &c. The pain is extremely violent, and the bladder may be found distended above the pubis. The treatment consists in introducing the catheter, or puncturing the bladder, and in combating the cause, which has produced the retention, by particular means adapted to each case.

RETICULAR, *Ret'iform*, *Reticula'ris*, *Amphiblestroï'des*, *Dystoi'des*, *Retifor'mis*, from *rete*, 'a net.' That which resembles a net. An epithet applied to many structures in the body.

RETICULAR SUBSTANCE, *Cellular tissue*.

RETIC'ULUM: diminutive of *rete*, 'a net.' The *Bonnet* or *Honeycomb-bag*—the second

stomach of the ruminant animal. See, also, *Epiploon* and *Rete*.

RETIFORM, *Reticular*.

RET'INA, from *rete*, 'a net:' *Tu'nica ret'ina seu reticula'ris seu retifor'mis seu in'tima oc'uli*, *Incolucrum reti comparatum*, *Verricula'ris membr'ana*, *Amphiblestroï'des*. A soft, pulpy, grayish, semi-transparent, very thin membrane; extending from the optic nerve to the crystalline, embracing the vitreous humour, and lining the choroid; without, however, adhering to either of those parts. It is constituted, according to most anatomists, by the expansion of the optic nerve. The retina appears formed of two laminae; so joined together, that it is almost impossible to separate them. The one—the innermost—is medullary, and pulpy; the other—the outer—is stronger, and fibro-vascular. The retina is the essential organ of vision; on it the images of objects are impressed. Both it and the optic nerve are devoid of general sensibility. They may be punctured or lacerated without pain being experienced. The nerve of general sensibility, distributed to the eye, is the fifth pair.

RETINACULA MORGAGNII. See *Fræna* of the valve of Baulin.

RETINACULUM, from *retinere*, (*re*, and *tenerē*), 'to hold back.' A surgical instrument, formerly used in the operation of castration; and in that of hernia, to prevent the intestines from falling into the scrotum.—*Scullet*. Retinacula are also band-like extensions of a cellulomembranous structure, which seem to suspend the ovum in its place.

RETINACULUM, *Bride*.

RETINITIS, *Inflammat'io Ret'inae*, *Amphiblestrodi'tis*, *Dicty'itis*, from *retina* and *itis*, a suffix denoting inflammation,—a term of hybrid formation. Inflammation of the retina; an uncommon affection, except as an accompaniment of other forms of ophthalmia.

RETORT, *Retor'ta*, *Batia*, *Cornu*, *Cornu'ta*, *Cornes'ta*, *Cornum'u'sa*. (F.) *Cornue*, from *retor'queo*, (*re*, and *torqueo*, *tortum*), 'I bend back.' A vessel, commonly of glass or earthenware, employed in distillation. It may be *plain*, or have a *tubulure* for admitting substances, whilst the distillation is going on. In the latter case, it is said to be "tubulated."

RETRACTION, *Retract'io*, from *retrahere*, (*re*, and *trahere*), 'to draw back.' State of a part, when drawn towards the centre of the body or backwards;—as retraction of the testicles.—Sometimes it is used synonymously with *shortening* or *drawing up*; as in *retraction of the thigh*.

RETRACTIÖN DE LA MATRICE, *Retroversio uteri*.

RETRACTOR ANGULI ORIS, *Buccinator*.

RETRAHENS AURIS, *Posterior Auris*, *Tricauda'lis*, *Triceps Auris*, *Retrahens Auric'ulae*, *R. Auriculam*, *Secundus proprium Auric'ulae*, *Bicauda'lis*, *Dep'rimens Auriculæ*, *Proprius Auris externa*, *Mastoido-conchinien*, *Mastoido-orilcnaire*, (Ch.) (F.) *Auriculaire postérieur*. It consists of one or more small fasciculi of fleshy, thin, somewhat irregular fibres, situate behind the ear. These are attached to the mastoid process, and pass horizontally forwards, to terminate at the convexity formed by the concha of the ear. If this muscle had any use, it would carry the ear backwards.

RÊTRÉCISSEMENT, *Stricture*.

RETROCESSION, *Retrocessio*, from *retro-*

cedere, (*retro*, 'backwards,' and *cedere*, 'to give place,') The act of going back. A disappearance or metastasis of a tumour, eruption, &c., from the outer part of the body to the inner.

RETROFLEXIO UTERI, *Retroversio uteri*.
RÉTROPULSION DE LA MATRICE, *Retroversio uteri*

RETROVERSIO UTERI, *Retroversio of the Uterus*, *Ædoptosis Uteri retroversa*, *Retruxio Uteri*, (F.) *Rétroversion*, *Rétraction*, *Obliquité ou Rétropulsion de la Matrice*. A change in the position of the uterus, so that the fundus of the organ is turned towards the concavity of the sacrum, whilst the neck is directed towards the symphysis pubis. This displacement is commonly attended with constipation, tenesmus, and retention of urine. Its usual period of occurrence is between the third and fourth months of pregnancy; before the uterus has escaped above the superior aperture of the pelvis. In the treatment, the catheter must be regularly used, twice a day, until the uterus, by its growth, rises above the pelvis. The catheter should be small, flat, and curved considerably more than common, in consequence of the distorted course of the urethra. The bowels must be kept open; and absolute rest, in a recumbent posture, be enjoined. Should it be impracticable to draw off the urine, attempts must be made to replace the uterus. The woman being on her hands and knees, the fore and middle fingers of the accoucheur's left hand are to be passed up the rectum to the fundus uteri; which they must elevate, whilst the cervix uteri is carefully depressed by two fingers of the right hand in the vagina. Should the fingers, employed to elevate the fundus, not be long enough to effect this object, a piece of whalebone may be substituted, having a small piece of sponge attached to one extremity as a pad.

RÉTROVERSION DE LA MATRICE, *Retroversio uteri*.

REUNIO, *Synthesis*.

REVASSERIES. See *Somnium*.

REVE, *Somnium*.

REVEIL. See Sleep—*r. en Sursaut*, see Sleep.

REVELLENT, *Derivative*.

REVERY, *Aphexia*.

REVIVIFICATION, *Resuscitation*.

REVULSION, *Revulsio*, from *re*, and *vellere*, 'to pluck;' *Antispasms*. The act of turning the principle of a disease from the organ in which it seems to have taken its seat. Rubefacients, vesicatories, bleeding in the foot, &c., are often used for this purpose.

REVULSION, *Derivation*.

REVULSIVE, *Derivative*.

REYNOLDS'S SPECIFIC. See *Vinum colchici*.

RHA, *Rheum*.

RHABBARBARUM, *Rheum*—*r. Album*, *Convolvulus mechoacan*—*r. Antiquorum*, *Rheum Rhaponticum*—*r. Dioscorides*, *Rheum Rhaponticum*—*r. Monachorum*, *Rumex patientia*—*r. Nigrum*, *Convolvulus jalapa*—*r. Pauperum*, *Thalictrum*—*r. Sibericum*, *Rheum*—*r. Tartaricum*, *Rheum*—*r. Turcicum*, *Rheum*.

RHABARBE, *Rheum*—*r. Blanche*, *Convolvulus mechoacan*—*r. des Moines*, *Rumex Alpinus*.

RHABILLEUR, *Renoveur*.

RHACHILEI, *Rhachitæ*.

RHACHIALGITIS, *Spinal irritation*, *Myelitis*.

RHACHIPARALYSIS, *Paraplegia*.

RHACHIPHYMA, *Rachiphyma*.

RHACHIRRHEUMA, *Lumbago*.

RHACHIS, *Vertebral column*.

RHACHISAGRA, *Rachisagra*.

RHACHITÆ, *Rhachitæ*, *Rachitæ* or *Rachitæ*. The muscles of the spine.

RHACHITIS, *Rachitis*.

RHACHOSIS, *Rachosis*.

RHAGADES, *guyade*, *Rhagadia*, from *gryvui*, 'to break or rend,' *Scissuræ*, *Fissuræ*, *Fimæ*. Ruptures, chaps, or narrow and long ulcers, which form near the origin of mucous membranes, especially around the anus, and which are generally owing to the syphilitic virus.

RHAGADES. See *Fissure*.

RHAGE or RAGÉ, *gayn*, same etymon. A suffix denoting violent rupture or discharge, as in *Hemorrhage*, *Menorrhagia*, &c.

RHAGE, *Fissure*.

RHAGOIDES, *Uvea*.

RHAMNUS, *Rhamnus catharticus*, *Spina cervina*, *Rhamnus solutivus*, *Spina insectoria*, *Cercispina*, *Buckthorn*, *Purging buckthorn*, (F.) *Nerprun purgatif*. Family, *Rhamnoideæ*. *Sex. Syst.* Pentandria Monogynia. The berries—*Rhamni Baccæ*—have a faint and disagreeable odour; and bitterish, nauseous taste. They are cathartic, and are apt to excite griping, which must be obviated by the use of diluents.

RHAMNUS ALATER'NUS, *Common alaternus*, (F.) *Alatere*. The leaves have been used as detergents and astringents, in the form of gargle especially.

RHAMNUS FRAN'GULA. The *Black Alder*, *Frangula Alnus*, *Alnus Nigra*, (F.) *Aune noir*, *Bourdane*, *Bourgène*. All the parts of this tree, as well as of the common alder, are astringent and bitter. The bark is most so. The inner, yellow bark of the trunk or root acts as a cathartic. It has also been employed as an antelmintic.

RHAMNUS ZIZIPHUS. See *Jujube*.

RHANTER, *Canthus*, (greater.)

RHAPHANEDON, *Raphanodon*.

RHAPHANIA, *Raphania*.

RHAPHE, *Raphe*, *Suture*.

RHAPONTICUM, *Rheum Rhaponticum*—*r. Vulgare*, *Centauria centaurium*.

RHAPONTIQUE, *Rheum rhaponticum*.

RHATANIA, *Krameria ratanhia*.

RHEGMA, *Laceration*—*r. Ligamentare*, *Apospasma*.

RHENCHUS, *Rattle*.

RHENXIS, *Rattle*.

RHEON, *Rheum*.

RHETINE, *Resin*.

RHETINOCERON, *Resinatum*.

RHETINOTON, *Resinatum*.

RHEUM, *R. palmatum*, *R. compactum*, *R. undulatum*, *Rhabar'barum*, *Rheon*, *Rha*, *Rhæum*, *Lophanthum orientale*, *L. Chinen'se*, *Rhabar'barum œcum*, *R. Tartaricum*, *R. Sibericum*, *R. Turcicum*, *Rhubarb*, (F.) *Rhabarbe*. Family, *Polygonææ*. *Sex. Syst.* Enneandria Trigynia. The root is the part used in medicine. Its odour is aromatic. peculiar, and rather nauseous; taste, somewhat aromatic, subacid, bitterish, and astringent. It colours the saliva and urine yel-

low. It is easily pulverized, and forms a powder of a bright buff yellow colour. Both water and spirit extract its virtues. The Chinese and Tartary rhubarbs are those generally used. Rhubarb root is purgative, stomachic and astringent. (?) It is chiefly used for the properties first mentioned: externally, the powder is sometimes sprinkled over ulcers, to assist their granulation. Dose, ʒj to ʒss of the powder. In a smaller dose, it is stomachic.

RHEUM COMPACTUM, Rheum—r. Palmatum, Rheum—r. Undulatum, Rheum.

RHEUM RHAPON'TICUM, *Rhapon'tic Rhubarb*; *Rhapon'ticum*, *Rhabarbarum Dioscoridis*, *R. Antiquorum*, (F.) *Rhapon'tique*, *Rhapon'tic*. The root of this seems to have been the rhubarb of the ancients. It is more astringent than that of the rheum palmatum, and less purgative; for the latter purpose, two or three drachms being required for a dose.

RHEUMA, Catarrh, Rheumatism—r. Catarrh, Bronchitis, (chronic)—r. Epidemicum, Bronchitis, chronic, Catarrh, epidemic—r. Pectoris, Catarrh—r. Uteri, Leucorrhœa.

RHEUMATALGIA, Rheumatism, chronic—r. Arthritica, see Rheumatism, acute.

RHEUMATISM, from *ρευμα*, 'a defluxion, catarrh.' *Dolor Rheumaticus et arthriticus*, (Hoffman,) *Rheumatosis*, *Myositis*, *Rheuma*, *Myodyn'ia*, (F.) *Rhumatisme*. A kind of shifting phlegmasia, sometimes seated in the muscles, sometimes in the parts surrounding the joints; and at others, within them. Hence the name *Muscular*, *Articular*, and *Synovial*, which have been applied to it. The disease may be acute, or chronic.

ACUTE RHEUMATISM, *Arthro'sia acuta*, *Rheumatismus*, *Rh. inflammatorius seu hypersthenicus*, *Rheumatic Fever*, *Rheumatopyra*, *Febris rheumatica inflammatoria*, *Syn'ocha rheumatica*, *Myositis*, *Myitis*, *Cauma rheumatism'us*, *Arthritidis rheumatismus*, *Arthro-rheumatismus*, *Synovitis rheumatism'us*, *Hæmo-arthritis*, (F.) *Rhumatisme aiguë*, *Fièvre rhumatismale*, usually comes on with the ordinary symptoms of fever; soon after which, or simultaneously, or even before the appearance of febrile signs, excruciating pains are felt in different parts of the body, particularly in the larger joints, which are more or less red and swollen; the pain shifting from one to the other, at times with great rapidity. The disease rarely terminates in less than six weeks, during the greater part of which period the febrile symptoms remain severe; and what is peculiar to the disease, the skin may be covered daily with a profuse perspiration, although it feels extremely hot, and the pulse appears in no way modified by it. It is one of the essential symptoms of the affection, and consequently affords no relief. The only danger to be apprehended from acute rheumatism, notwithstanding the apparent severity of the symptoms, is the translation or extension of the disease to some internal part, especially to the heart. This tendency must always be borne in mind. *Acute rheumatism* seldom terminates in the *chronic*; they who are liable to the former are rarely so to the latter, and conversely. The disease will generally run its course, in spite of treatment. The usual antiphlogistic plan had better be pursued, during the first days of the disease. Blood-letting may be employed, if the vigour of the patient and of the disease seem to re-

quire it; but, although the blood is generally buffy, bleeding does not usually seem to afford much relief. The bowels must be kept open; effervescent draughts be administered, and opium be given in full doses to allay pain. This is, generally, all that is necessary during the first week; after which, advantage will usually be obtained from the exhibition of the sulphate of quinia with sulphuric acid. It does not augment the excitement; and will be found proper in almost all cases. Rheumatic inflammation is very different from other varieties, and this may account for the anomaly. After a few weeks, the disease usually goes off, but leaves the patient very liable to a recurrence on slight exposures or errors of diet: at times, acute rheumatism of the joints puts on the appearance of gout, and seems to be a complication of the two affections. It is then called *Gouty* or *Arthritic rheumatism* or *Rheumatic gout*, *Rheumat'gia arthrit'ica*.

RHEUMATISM, ARTHRITIC, see *Rh. acute*—r. Gouty, see *Rh. acute*, of the Skin, see *Dermalgia*.

RHEUMATISM, CAPSULAR, *Rheumatismus capsularis*. Rheumatism seated in the lining membrane of the joints and bursæ of the tendons. The parts most liable to its attacks are the feet and hands, where it is generally easily recognised by the enlargement of the joints; but the peculiar characters of the disease are, perhaps, most strikingly seen when it attacks the knee.

RHEUMATISM, CHRONIC, *Arthrosia chronica*, *Rheumatismus chronicus* *R. vulgaris* seu *inven'tus*, seu *habitualis* seu *frig'idus*, *Rheumat'gia*, *Arthrodyn'ia*, *Arthritis arthrodynia*, (F.) *Rheumatisme chronique*, is attended with pains in the hips, shoulders, knees, and other large joints. These are, sometimes, confined to one joint; at others, shift from one to another, without occasioning inflammation, or fever. In this manner, the complaint often continues for a great length of time, and then goes off. There is no danger attendant upon it; but the patient may become lame, and is always liable to painful recurrences. Neither variety generally terminates in suppuration; but effusion of coagulable lymph is apt to occur, so as to occasion permanent thickening of the parts. The great preventive of chronic rheumatism, and one of the most valuable curative agents, is flannel, worn next the skin. The whole class of rubefacients may, also, be used with advantage. The warm bath, especially the natural warm bath, the temperature of which does not vary, is perhaps the most successful remedy of all.

RHEUMATISMUS CANCROSUS, *Neuralgia faciei*—r. *Dorsalis*, *Lumbago*—r. *Febrilis*, *Dengue*—r. *Inflammatorius* seu *hypersthenicus* *Rheumatismus acutus*—r. *Intestinatorum cum ulcere*, *Dysentery*—r. *Larvatus*, *Neuralgia faciei*—r. *Spurius nervosus*, *Neuralgia*—r. *Vulgaris* seu *inven'tus* seu *habitualis* seu *frig'idus*, *Rheumatism*, chronic.

RHEUMATOPYRA, *Rheumatism*, acute.

RHEUMATOSES, *Rheumatism*.

RHEX'IS, *ρῥῆξις*, *Rupture*. Rupture of a vessel. Spontaneous opening of an abscess.

RHICNO'SIS, from *ρῑχνος*, 'to become wrinkled.' *Cutis corrugatio*. Wrinkling of the skin from extenuation of the body; opposed to *extrinsic*, or distention from repletion.

RHIGOS, *Rigor*.

RHIN, Nasus.
RHINALGIA, from *ρῑν*, 'the nose,' and *ἀλγος*, 'pain.' Pain in the nose.
RHINANCHONE, Snuffles.
RHINANGIA, Snuffles.
RHINENCEPHALIA, Cyclopia.
RHINEN'CHYSIS, *Rhynenchysia*, from *ρῑν*, 'the nose,' *εν*, 'in,' and *χυνω*, 'I pour.' An infusion or injection, made into the nostrils, with a syringe called *Rhinen'chyles*.
RHINES, Nares.
RHINOCNES'MUS, from *ρῑν*, 'the nose,' and *κνησος*, 'itching.' Itching of the nose.
RHINOPHON'IA, from *ρῑν*, 'the nose,' and *φωνη*, 'the voice.' A nasal voice, called, also, *Dyspho'nia immodula'ta nas'al'is*, *Parapho'nia nasal'is*, *Paraphonia res'onans*, *Na'sitas*. Speaking through the nose.
RHINOPLAS'TIC, from *ρῑν*, 'the nose,' and *πλασσω*, 'I form.' An epithet applied to the operation for forming a new nose. The *Talia-cotian operation*, so called, because described by Tagliacozzi. It consists in bringing down a portion of flesh from the forehead, and causing it to adhere to the anterior part of the remains of the nose.
RHINOP'TIA, from *ρῑν*, 'the nose,' and *οπτουαι*, 'I see.' The act of seeing over the nose. Squinting over the nose.
RHINORRHAGIA, Epistaxis.
RHINORRHAPHY, **RHINORRHA'PHIA**; from *ρῑν*, 'nose,' and *ραφῑη*, 'a suture.' An operation for the removal of epicanthus, which consists in pinching up a longitudinal fold of the skin, including this fold in two elliptical incisions, removing it, and bringing together the edges of the wound by harelip suture.
RHIPTASMOS, Jactation.
RHIS, Nasus.
RHIZA, Radix.
RHIZAGRA, Punch.
RHIZO'MA, *Rhizome*; from *ριζα*, 'a root.' The part of the root of a plant, which consists of wood or flesh, as in the carrot.
RHIZOPH'AGUS, from *ριζα*, 'a root,' and *φαγω*, 'I eat.' One who lives on roots.
RHIZOTOMIST. See Simples.
RHIZOTOMUS, Apothecary.
RHOA, *Punica granatum*.
RHODEL'E'ON. Oil of roses, or oil impregnated with roses.
RHO'DIA, *Rhodiola ro'sea*, *Rosea*, *Rosewort*, (F.) *Rhodiola*. *Sex. Syst.* Diœcia Octandria. The root, *Roseroot*, when dry, has a very pleasant smell, and is slightly astringent. It is not used.
RHODIOLA ROSEA, *Rhodia*.
RHODIOLE, *Rhodia*.
RHODI'TES VINUM. Wine in which roses have been macerated.
RHODIUM LIGNUM, *Rhodium* or *Rosewood*. The wood or root of a tree, supposed to be the *Genista Canarien'sis* of Linnæus. (F.) *Bois de rose*, *Bois de Chypre*. Family, Leguminosæ. *Sex. Syst.* Diadelphia Decandria.—The essential oil is a perfume, and possesses cordial and tonic virtues. Its smell is attractive to fish, rats, &c.
RHODODAPHNIS, *Nerium oleander*.
RHODODEN'DRON CHRYSANTHEMUM, *R. Chrysanthem.* The *Oleander*, *Rose Bay*, *Yellow rhododendron*, (F.) *Rosage*, *R. Chrysanthem.* Nat. Ord. Ericæ. *Sex. Syst.* Decandria Mo-

nogynia. This plant has been recommended in rheumatism, gout, and syphilis. In an overdose, it produces acro narcotic symptoms.

RHODOME'LA PALMA'TA, *Dulse*, *Saccharine Fucus*. One of the Algæ eaten in large quantities throughout the maritime countries of the north of Europe, and in the Grecian Archipelago.

RHODOMELI, *Mel rosæ*.

RHODON, *Rosa centifolia*.

RHODOSACCHARUM, *Confectio rosæ gallicæ*.

RHODOSTACTON, *Mel rosæ*.

RHEA, *Punica granatum*.

RHEAS, *Papaver rhœas*.

RHÆUM, *Rheum*.

RHOGMOS, Rattle.

RHOI'TES, *ροιτης*; a wine impregnated with the pomegranate; from *ροες*, *Pomegranates*,—*Dioscorides*. A confection, made by boiling the juice of the pomegranate in honey.—*Paulus of Ægina*.

RHOMBOIDEUS, from *ρhomβος*, 'a rhombus,' whose sides are equal, with two obtuse and two acute angles. *Rhomboideus major* and *minor*, *Rhomboïdes*, *Cervici-dorso-scapulaire*. A muscle, situate at the posterior inferior part of the neck, and at the posterior part of the back. It has a rhomboidal shape, and is attached, by its inner edge, to the posterior cervical ligament, and to the spinous processes of the last cervical vertebra, and of the first four or five dorsal. By its outer edge, it is attached to the spinal or posterior edge of the scapula. It is divided into two fasciculi, constituting the *Rhomboideus major* and *minor*, the latter being situate higher than the other. This muscle draws the scapula backwards and upwards, and impresses upon it a rotary motion, which brings its inferior angle nearer to the spine; and, consequently, depresses the anterior angle and the shoulder.

RHOMBOS, *ρhomβος*. A bandage, mentioned by Galen, so called on account of its rhomboidal shape.

RHONCHUS, Rattle, Snoring, Stertor—*r. Crepitans*, *Râle crépissant*—*r. Mucous*, *Râle crépissant*—*r. Sibilans*, *Râle crépissant*—*r. Sonorus*, *Râle sonore*.

RHOPALISMUS, Priapismus.

RHOPALOSIS, Plica, Pupil, Uvea.

RHUBARB, *Rheum*—*r. Monk's*, *Rumex Alpinus*, *Rumex patientia*—*r. Poor man's*, *Thalictron*—*r. Rhapontic*, *Rhenm Rhaponticum*—*r. Wild*, *Convolvulus panduratus*.

RHUBARBE FAUSSE, *Thalictron*—*r. des Pauvres*, *Thalictron*.

RHUE, *Ruta*.

RHUMATISME, *Rheumatism*—*r. Aigu*, *Rheumatism*, acute—*r. Chronique*, *Rheumatism*, chronic.

RHUME DE CERVEAU, *Coryza*—*r. de Poitrine*, *Catarrh*.

RHUS CORIA'RIA, *Sumach*, *Rhus Glabrum*, *Adn'ron*, *Elm-leaved Sumach*. (F.) *Sumac des Corroyeurs*. Family, Terebinthaceæ. *Sex. Syst.* Pentandria Monogynia. This is the only species of the genus *rhus* that is innocent. Both the leaves and berries have been used as astringents and tonics.

RHUS GLABRUM, *Rh. coriaria*.

RHUS RADICANS, *Rhus vernix*. *Poison vine*, (*America*.) This plant is poisonous, (see Poisons, Table of,) and is extremely acrid, when

applied to the skin, producing erysipelas and vesications, and has been used, like the next variety, in paralysis and other nervous affections.

RHUS SYLVESTRIS, Myrica gale.

RHUS TOXICODENDRON, *Toxicodendron*. *Poisson oak*, (America.) (F.) *Sumac vénéneux*. This plant has been used in paralytic affections and cutaneous eruptions. It is poisonous, like the last. Dose, gr. ss to gr. iv.

RHUS VERNIX, *Rh. radicans*.

RHYPOS, Sordes.

RHYPTICA, Detergents.

RHYPTICUS, Abstergent.

RHYSIS, Flux.

RHYTHM, *ῥυθμός*, 'measured movement.'

The order, or proportion, which reigns between the different parts of a whole. Applied, in medicine, to the pulsations of the heart—to the pulse—to express the due proportion between one pulsation and those following it.

RHYTHMICAL CONTRACTIONS OF MUSCLES, are those that succeed one another after regular intervals.

RHYTIDOSIS, Rutidosis.

RIB, Costa.

RIBES NIGRUM, *Cassis*. The *Black currant*. (F.) *Groseillier noir*. *Scz. Syst.* Pentandria Monogynia. The berries have been recommended in sore throat, as diuretics. The leaves have been advised for the same purpose. They are chiefly used as preserves.

RIBES RUBRUM, *Grossularia non spinosa*. the *red currant*. (F.) *Groseillier rouge*; of which the *white* is only a variety. It is cultivated, and affords an agreeable fruit. It possesses the qualities of the subacid fruits in general, and makes an excellent preserve.

RIBS, NECK OF THE, *Collum costarum*.

RICE, *Oryza*—r. Disease, Cholera—r. Wild, *Zizania aquatica*.

RICHARDSONIA. See *Ipecacuanha*.

RICHWEED, *Actæa racemosa*.

RICIN, *Ricinus communis*.

RICINOIDES, *Jatropha curcas*.

RICINUS COMMUNIS. The *Castor-oil plant*, *Cataputia major*, *Ricinus vulgaris*, *Palma Christi*, *Faba purgatrix*, *Cerua* or *Kerua*, *Cici*. (F.) *Ricin*, *Fève purgatif*. Family, Euphorbiaceæ. *Scz. Syst.* Monœcia Monadelphia. Castor-oil seeds, whence the oil is obtained, are inodorous; taste acrid and slightly sweetish. One or two seeds will act as a cathartic; but the oil, *Oleum ricini*, (F.) *Huile de Ricin*, is, alone, used. It is obtained by bruising the castor seeds, previously decorticated, and then expressing the oil without the application of heat. Recently drawn castor oil, *Oleum de kervâ*, *O. kervinum*, *Alker'ca*, *Oleum Ric'ini*, *O. Cicinum*, *O. Palmæ liq'idum*, is inodorous and nearly insipid. It is cathartic, operating speedily, and may be used in all cases, where powerfully stimulating purgatives would be injurious. Dose, f. ʒi to f. ʒiiss. Hufeland recommends that a drop of the croton oil, (q. v.) shall be added to an ounce of the Oil of Poppy, and that the mixture shall be called *Oleum Ricini officinale*.

A variety of *Ricinus* at Cape Verd is employed by the inhabitants to increase the secretion of milk. It is applied in the form of poultice, made with the green leaves, to the mammae, or of a strong decoction, with which the mammae and the external parts of generation are washed.

RICINUS MAJOR, *Jatropha curcas*—r. Minor, *Jatropha manihot*.

RICKETS, Rachitis.

RIDE, Wrinkle.

RIDING, (of Bones.) *Ossium superpositio*. (F.) *Cherachement*. Displacement of the fragments of a bone, chiefly produced by the contraction of muscles, which occasions shortening of the limb; the fractured extremities riding over each other, instead of being end to end.

RIGIDITY, *Rigiditas*, from *rigere*, 'to stiffen.' Great stiffness of fibre, or want of suppleness. The stiffness of the dead body, (F.) *Roideur cadavérique*, is one of the most certain signs of the cessation of life.

RIGOR, *Rhigos*, *Algor*, Coldness, *Cheim'ia*. (F.) *Frisson*. Same etymon. Sensation of cold, with involuntary shivering of the whole body:—a symptom of fever. A slighter degree, and at times full rigor, is occasionally termed a *chill*, *frigus ten'ue*, *perfrigeratio*.

RIGOR MORTIS. 'Stiffness of death.' The rigidity of limbs that occurs on dissolution.

RIGOR NERVOSUS, Tetanus.

RIMA. A fissure, a cleft; as *Rima* or *Rimula Glottidis*, 'the opening of the glottis,' (q. v.) *Rima vulvæ*, 'the opening of the vulva,' (q. v.)

RIMÆ, Rhagades.

RINÆUS, Compressor naris.

RINCHOS, Rostrum.

RING, Sax. *hping*, *ping*, Germ. *Ring*, *Cricos*. (F.) *Anneau*. A name given to natural, circular, or roundish apertures, with muscular or aponeurotic parietes, which serve for the passage of some vessel or canal;—as the *umbilical ring*, *inguinal ring*, &c.

RINGWORM, *Herpes circinatus*—r. of the Scalp, *Porrigo scutulata*—r. Ulcerative, *Herpes exedens*.

RIRE ou RIS, Risus—r. *Canin*, Canine laugh—r. *Moqueur*, Canine laugh—r. *Sardonien*, Risus Sardonicus—r. *Sardonique*, Canine laugh.

RISAGON, Cassumuniar.

RISIGALLUM, Orpiment.

RISING OF THE LIGHTS, *Cynanche trachealis*.

RISEING OF ELEVATION OF THE PULSE. *Pulsus elevatio*. The pulse is said to rise, when it becomes more full and frequent, as occurs in the exacerbation of acute diseases.

RISORIOUS NOVUS. Santorini gives this name to a portion of the platysma myoides, which passes from the cheek towards the commissure of the lips.

RISUS, from *ridere*, *risum*, 'to laugh.' *Gelos*, *Laughing*. (F.) *Rire* ou *Ris*. An involuntary movement of the muscles of the face, and of the lips in particular, accompanied with a sonorous and interrupted respiration, commonly indicating mirth and satisfaction.

RISUS CANINUS. Canine laugh.

RISUS SARDONICUS, *R. de Sardon'niâ*, *R. spas'ticus*, *Sardon'asis*, *Sard'asis*, *Tortu'ra Oris*, *Distorsio Oris*, *Gelasmus*, *Canine laugh*. (F.) *Ris Sardonien*, *R. Sardonique*. A convulsive affection of the lips and cheeks, which precedes and often accompanies general tetanus. It is said to have been so called from similar symptoms having been induced by a kind of ranunculus that grows in Sardinia.

RISUS SPASTICUS, *R. Sardonicus*.

RIVER WEED, *Conferva rivalis*.

RIZ, *Oryza*.

ROAN TREE, *Sorbus acuparia*.

ROB, *Roob*, *Robub*, *Rohob*, (F.) *Extrait des fruits*. This word, of Arabic extraction, means the juice of any fruit thickened to the consistence of honey by evaporation, before it has fermented. The juice of the grape, boiled to this consistence, was called *Sapa*; and, when not quite so thick, *Defrutum*.

ROB CYNOSBATUS, *Confectio rosæ caninæ*—*r. ex Moris*, *Diamorion*—*r. Nucum*, *Diacaryon*.

ROBINIA AMARA, *Family*, *Leguminosæ*. *Sex. Syst.* *Diadelphia Decandria*. The roots of the *Robinia amara* of Cochin China are bitter, and have been recommended, especially in that country, in diarrhœa and dyspepsia.

ROBINIA PSEUDO-ACACIA, *Locust Tree*; native of America. The flowers are said to possess antispasmodic properties.

ROBORANS, *Corroborant*.

ROBORANTIA, *Tonics*.

ROBUB, *Rob*.

ROCCELLA, *Lichen roccella*.

ROCHE'S EMBROCATION FOR THE HOOPING-COUGH. An empirical preparation, composed of *ol. oliv.* $\frac{3}{4}$ xvj, *ol. succin.* $\frac{3}{4}$ viij, *ol. caryoph.* q. s. to scent it strongly.

ROCHER. See *Temporal bone*.

ROCHETTA ALEXANDRINA, *Soda*.

ROCKET, GARDEN, *Brassica eruca*—*r. Roman*, *Brassica eruca*.

ROCOU, *Terra Orleana*.

ROGNE, *Psora*.

ROHENA, *BARK*, *Swietenia*.

ROHOB, *Rob*.

ROISDORFF, MINERAL WATERS OF. Alkaline waters in Germany, which contain carbonic acid and carbonate of soda.

ROLLER, *Bandage*, *Fascia*.

ROMARIN, *Rosmarinus*—*r. Sauvage*, *Ledum sylvestre*.

ROME, (CLIMATE OF.) The climate of Rome, as regards its physical qualities, is considered to be one of the best in Italy. It is peculiarly still; and, hence, has been esteemed valuable as a winter climate in pulmonary diseases, and for invalids generally, as it admits of their taking exercise in the open air at a lower temperature than they otherwise could do. In the early stages of consumption, Sir James Clark generally found the climate favourable.

ROMPEURE, *Hernia*.

ROYCE, *Rubus idæus*—*r. Bleue*, *Rubus cæsius*—*r. de Montagne*, *Rubus chamæmorus*—*r. Noire*, *Rubus fruticosus*.

RONCHUS, *Snoring*, *Stertor*.

ROUND, *Round*—*r. Grand*, *Teres major*—*r. Petit*, *Teres minor*.

RONFLEMENT, *Snoring*—*r. de Diable*, *Bruit de Diable*.

ROOB, *Rob*.

ROOF OF THE MOUTH, *Palate*.

ROOT, *Radix*—*r. of Scarcity*, *Beta hybrida*—*r. Yellow*, *Xanthoriza apiifolia*.

ROQUETTE, *Brassica eruca*, *Soda*.

RORELLA, *Drosera rotundifolia*.

RORIFERUS, *Lymphatic*.

ROS, *Sperin*—*r. Calabrinus*, *Fraxinus ornus*—*r. Solis*, *Drosera rotundifolia*.

ROSA, *R. centifolia*.

ROSA ALBA. The *White Rose*, (F.) *Rosier*

blanc. *Family*, *Rosacæ*. *Sex. Syst.* *Icosandria Polygynia*. The flowers of this species possess similar but inferior qualities to the damask.

ROSA CANINA; *R. Sylvestris*, *Cynorhodon*, *Canirubus*, *Caninus Sentis*, *Cynocytisus*, *Cynospastum*, *Cynosbatus*, the *Dog Rose*, *Wild Brier*, *Hip Tree*, (F.) *Rose du chien*, *Eglantier de chien*. *E. saurage*. The fruit of this variety, called *Heps* or *Hips*, (q. v.) has a sourish taste, and is formed into a conserve. See *Confectio Cynosbati*. It is seldom employed, except to give form to more active remedies; as in pills, boluses, linctuses, &c.

ROSA CENTIFOLIA; the *Damask Rose*, *Rosa Damascena*, *R. Pallida*, (F.) *Rosier à cent feuilles*, *Rhodon*, *Rosa*. The petals of this rose have an extremely fragrant odour, and subacidulous taste. They are laxative; but are scarcely used for any purposes except for the distillation of rose-water, *Oil of Roses*, *Oleum Rosæ*, and the formation of a syrup.

ROSA DAMASCENA, *R. centifolia*.

ROSA GALICA; the *Red Rose*, *Rosa rubra*, (F.) *Rosier de Provins*. The petals of this variety are astringent; and are used in infusion, conserve, &c.

ROSA PALLIDA, *R. centifolia*—*r. Rubra*, *R. Gallica*—*r. Saltans*, *Essera*—*r. Sylvestris*, *R. canina*.

ROSAGE, *Rhododendron chrysanthemum*.

ROSAGO, *Nerium oleander*.

ROSALIA, *Scarlatina*.

ROSE, *Erysipelas*—*r. Christmas*, *Helleborus niger*—*r. Damask*, *Rosa centifolia*—*r. Dog*, *Rosa canina*—*r. Dog*, conserve or confection of, *Confectio rosæ caninæ*—*r. du chien*, *Rosa canina*—*r. Rash*, *Roseola*—*r. Red*, *Rosa Gallica*—*r. White*, *Rosa alba*.

ROSES, MILK OF. A cosmetic wash, formed, according to one method, of *subcarbonate of potass*, gr. vj; *oil of almonds*, $\frac{3}{4}$ j; *essence of bergamot*, $\frac{3}{4}$ j; *aque rosæ*, $\frac{3}{4}$ iij; *orange flower water*, $\frac{3}{4}$ ij. Mix.

ROSEA, *Rhodia*.

ROSE DROP, *Gutta rosea*.

ROSEMARY, *Rosmarinus*—*r. Marsh*, *Statice limonium*.

ROSENHEIM, MINERAL WATERS OF.

Rosenheim is 34 miles S. E. from Munich in Bavaria. The waters contain sulphuretted hydrogen, carbonic acid, carbonate of lime, chlorides of calcium and magnesium, carbonate of soda, and oxide of iron. They are used as tonics.

ROSEOLA, *Exanthesis*, *Roseola*, *Rose Rash*.

An efflorescence in blushing patches, gradually deepening to a rose-colour, mostly circular or oval; often alternately fading and reviving: sometimes, with a colourless nucleus; and chiefly on the cheeks, neck, or arms. It is frequently found, as a symptom, in dentition, dyspepsia, &c., and is of no consequence. See *Rubeola* and *Scarlatina*.

ROSEOLÆ, *Rubeola*. This name is also given by some to an acute exanthem, mid-way between measles and scarlatina, and which belongs to neither one nor the other, as it affords no protection against either. It is, also, termed *Rubeola* by some; by others, *Morbilli variolosi*, *Scarlatina pustulosa*, *S. miliaris*.

ROSEWOOD, *Rhodium lignum*.

ROSEWORT, *Rhodia*.

ROSIER BLANC, *Rosa alba*—*r. à Cent feuilles*, *R. centifolia*—*r. de Provins*, *Rosa Gallica*.

ROSIN, BLACK, Colophonia—*r.* Brown, Colophonia—*r.* White, see *Pinus sylvestris*—*r.* Yellow, see *Pinus sylvestris*.

RSIO STOMACHI, Cardialgia.

ROSMARINUS, *R. officinalis*, *Alchachil*, *R. horten'sis*, *Libano'tis coronaria*, *Dendrob'anus*. Rosemary, (F.) *Romarin*. Family, Labiatæ. *Sex. Syst.* Diandria Monogynia. The tops of this plant, *Rosmarinus*, (Ph. U. S.) have a fragrant, grateful smell; and an aromatic, warm, bitterish taste, which is dependent upon an essential oil, combined with camphor. Rosemary has been recommended in nervous headaches, in the form of infusion. It is now rarely used, except for its odour. The flower is called *Anthos*, *ar Soc.* Its oil—*Oleum Rosmarini*—is officinal. From two to six or ten drops are given in nervous complaints rubbed up with sugar.

ROSMARINUS SYLVESTRIS, *Ledum sylvestre*.

ROSSALIA, Scarlatina.

ROSSOLIO. See Spirit.

ROSTRUM, *Rinchos*, *Ramphos*, 'a beak,' (F.) *Brc.* (q. v.) A name given to several old forceps, on account of their resemblance to the beaks of different birds. The principal were the *Rostrum corv'num*, *anat'num*, *psittaci'num*, *vultur'num*, *cygneum* vel *olor'num*, *gru'num*, *lucerti'num*, &c.

ROSTRUM PORCINUM, Acromion.

ROT, Eructation.

ROT'ACISM, *Rotacism'us*, (F.) *Grasseyement*. A vicious pronunciation of the Greek *ρ*, *Rau*, common in the northern parts of England; especially near Newcastle.

ROTACISMUS, *Grasseyement*.

ROTA'TOR, from *rota*, 'a wheel.' A name given to several muscles, which turn the parts to which they are attached upon their axis;—such as, the oblique muscles of the eye, the pronators and supinators, &c.

ROTATOR, Trochanter.

ROTULA, Patella, Trochiscos.

ROTULE, Patella.

ROTUNDUS, Round.

ROUCOU, Terra Orleans.

ROUEN, MINERAL WATERS OF. This water, known under the name, *Eau des fontaines de la Maréguerie*, is cold, and contains carbonate of iron, carbonic acid, carbonate of lime, chloride of calcium, &c. It is tonic.

ROUGE, Colcothar—*r.* *D'Angleterre*, Colcothar.

ROUGÉOLE, Rubeola.

ROILLÉ, Rubiginous.

ROUND, *Teres*, *Rotun'dus*, (F.) *Rond*. Anatomists have given this name to many organs, whose fibres are collected in round fasciculi. See *Teres*.

FORAMEN ROTUN'DUM. A foramen of the sphenoid bone, a little behind the *foramen lacerum superius*, which gives passage to the second branch of the 5th pair of nerves, called *superior maxillary*.

ROUND LIGAMENTS OF THE UTERUS, *Ligamenta rotund'a Uteri*, *Cordons sus-pubiens* (Ch.) *Cordons vasculaires*. (F.) *Ligaments ronds de l'utérus*. Two cords, which arise from the lateral and superior parts of the uterus, whence they proceed towards the abdominal rings, which they pass through, and terminate by vanishing in the cellular tissue of the groins,

mons veneris, and *labia majora*. These cords are whitish, flattened, and narrower in the middle than at the extremities. Their fibres, which are longitudinal, are apparently albugineous.

RUBBER, INDIAN, Caoutchouc.

RUBE'DO. A redness; from *rubere*, 'to be red.' A diffused, but not spotted, redness on any part of the skin; like that which arises from blushing.

RUBEFA'CIENT, *Erethism'a*, *Rube'faciens*, from *rubens*, 'red,' and *fa'cio*, 'I make.' (F.) *Rubéfiant*. That which produces redness. A medicine, which causes redness of the skin. The action is called *Rubefaction*.

RUBEFI'ANT, Rubefacient.

RUBE'OLA, *Rubeola vulga'ris*, from *rubere*, 'to be red.' *Roseola*, *Ezanthé'sis Rubeola*, *Vetera'na*, *Blac'cia*, *Bovil'la*, *Morbil'li*; *M. variol'o'si*, *Scarlatina pustulo'sa*, *S. Mili'a'ris*, Measles; *Febris morbillo'sa*, *Typhus Morbillo'sus*, *Phœnicis'mus*, (F.) *Rougeole*, *Fièvre morbillieuse*. One of the major exanthemata; affecting individuals but once, and produced by specific contagion. The rash usually appears on the 4th, but sometimes on the 3d, 5th, or 6th day, of a febrile disorder; and, after a continuance of four days, gradually declines with the fever. The disease generally commences from 10 to 14 days after the contagion has been received. The eruption first shows itself in distinct, red, and nearly circular spots; somewhat less than the ordinary areolæ of flea bites. As these increase in number, they coalesce; forming small patches of an irregular figure, but approaching nearest to that of semicircles or crescents. These patches are intermixed with single, circular dots, and with interstices of the natural colour of the skin. On the face they are slightly raised, so as to give the sensation of inequality of surface to the finger passing over the cuticle. The disappearance of the eruption is followed by desquamation of the cuticle. Measles is not dangerous of itself; but it is apt to induce pneumonia in winter, and dysentery in summer, which are at times, very fatal. These are apt to come on at the time of, or soon after the disappearance of the eruption. When they supervene, they must be treated as idiopathic affections. It demands a general antiphlogistic treatment. Willan has pointed out a kind of RUBEOLA SPURIA, which he calls RUBEOLA sine CATARRHO. In this, the rash runs its regular course, with little fever or catarrhal affection; affording no certain security against the common or regular disease. He also gives the name, RUBEOLA NIGRA or BLACK MEASLES, to an unusual appearance of the measles about the 7th or 8th day, when the rash becomes suddenly livid, with a mixture of yellow. It is devoid of inconvenience or danger; and is removed in a week or ten days by the mineral acids.

RU'BIA, *R. Tincto'rum*, *Erythrod'anum*, *Rubia major*, *Radix rubra*, *Dyer's Madder*, *Madder*, (F.) *Garance*. Family, Rubiaceæ. *Sex. Syst.* Tetrandria Monogynia. The roots of this plant have a bitterish, somewhat austere, taste; and a slight, not agreeable, smell. They were formerly considered deobstruent, detergent, and diuretic.

RUBIG'INOUS, *Rubigin'o'sus*, from *rubigo*, 'rust.' (F.) *Rouillé*. Having the colour of

rust. An epithet given to the sputa in certain cases of Pneumonia.

RUBINUS VERUS, Anthrax.

RUBRICA FABRILIS. A red, heavy, earthy matter, formerly employed for making drying plasters. *Hard Ruddle, Red Chalk.*

RUBRICA SINOPICA. A heavy, compact, reddish earth: formerly used in diarrhoea.

RUBRIN, Hæmatin.

RUBUS ARCTICUS. The *Shrubby Strawberry*, *Bacca Norlandiæ*. Family, Rosaceæ. *Sez. Syst. Icosandria Polygynia*. The fruit is recommended by Linnæus, as possessing antiseptic, refrigerant, and antiscorbutic qualities.

RUBUS CÆSIUS; the *Deewberry plant*, (F.) *Ronce bleue*. The fruit resembles the blackberry in appearance and properties. The bark of the root of the *R. Trivialis*, or *American Deewberry*, is astringent.

RUBUS CHAMÆORUS; the *Cloudberry Tree*, *Chamæorus*, *Cloudberries*, *Knotberries*, (F.) *Ronce de Montagne*. The ripe fruit is sometimes prepared like a jam, and used in fevers, &c., to allay thirst. It has been much extolled as an antiscorbutic.

RUBUS FRUTICOSUS; the *Common Bramble*, which affords *Blackberries*, (F.) *Ronce noire*. The berries are eaten as a summer fruit, of which they form a poor variety. The bark of the root of the *Rubus villosus*, or *American Blackberry*, is astringent, and has been used in the last stages of dysentery, and in cholera infantum.

RUBUS IDÆUS; *Batos*, *ῥατος*; the *Raspberry*, (F.) *Framboise*, *Ronce*. The fruit of the best varieties is extremely agreeable; and is much used. It was, formerly, called *Batouon maron*.

RUBUS TRIVIALIS, see *Rubus cæsius*—*r. Villosus*, see *Rubus fruticosus*.

RUCTATIO, Eructation.

RUCTUS, Eructation—*r. Acidus*, *Oxyregmia*.

RUDDLE, HARD, *Rubrica fabrilis*.

RUE, Ruta—*r. Common*, Ruta—*r. de Chèvre*, *Galega officinalis*—*r. Goat's*, *Galega officinalis*—*r. Goat's*, *Virginia*, *Galega Virginiana*—*r. des Murailles*, *Asplenium ruta muraria*—*r. des Prés*, *Thalictrum*—*r. Sauvage*, Ruta.

RUFT, Eructation.

RUGA, Wrinkle.

RUGINE, Raspatorium.

RUGISSEMENT, Rugitus.

RUGITUS, *Brychethmus*, from *rugire*, *rugitum*, 'to roar.' (F.) *Rugissement*. A Latin word, which ordinarily expresses the roaring of the lion: and which is used, by some medical writers, to designate a particular species of borborygmus compared to it.

RUM, *Tafia*, *Molasses Spirit*. A spirit, distilled from sugar, or molasses. See Spirit.

RUMA, Mauma.

RUMEN, Hypogastrium.

RUMEX ACETO'SA. The *Common Sorrel*, *Oxalis Acetosa*, *Acetosa vulgaris*, *A. pratensis*, *Anax yris*, *A. arvensis*, *Sorrel*, *Sour duck*, *Acetosa nostras*, (F.) *Oseille*. Family Polygonæ. *Sez. Syst. Hexandria Trigynia*. The leaves are sour, and are used in cookery, and also as a refrigerant.

RUMEX ACUTUS; *Sharp pointed Wild duck*, *Oxybaphum*, *Lapathum*, *Rumex*, *Lapathos*, (F.) *Patience sauvage*. The decoction of the root has been long used in cutaneous affections.

It is, sometimes, employed for the cure of the itch.

RUMEX ALPINUS. The systematic name of the plant that affords the *Monk's Rhubarb*, (F.) *Rhubarbe des Moines*. See *Rumex Patientia*.

RUMEX AQUATICUS, *R. hydrolapathum*.

RUMEX BRITANNICA, *R. Hydrolapathum*.

RUMEX HYDROLAPATHUM, *Water-Dock*, *Hydrolapathum*, *Rumex aquatilis*, *Herba Britannica*, *Rumex Britannica*, *Lapathum aquaticum*, (F.) *Pavelle*, *Patience d'eau*. The leaves of this plant are subacid, and said to be laxative. The root has been used as a tonic, astringent, and antiscorbutic. It has also been employed externally, in some cutaneous affections.

RUMEX OBUSIFORMIS, *Blunt-leaved Dock*. The root of this has similar virtues to that of the other species.

RUMEX PATIENTIA;—*Garden Patience*, *Rhubarbarum monachorum*, *Hypalapathum*, *Patientia*, *Monk's Rhubarb*, (F.) *Patience*. This root, which is supposed to possess the virtues of rhubarb, but in an inferior degree;—according to Linnæus, is obtained from the *Rumex patientia*; according to Murray, from the *Rumex Alpinus*.

RUMEX SANGUINEUS. The root of the *bloody dock* has an austere and astringent taste; and has been employed in dysentery. It is called, also, *Lapathum sanguineum*, (F.) *Oseille ou Patience rouge*, *Sangdragon*.

RUMEX SCUTARIUS, *French Sorrel*, *Acetosa rotundifolia*, *A. Romanica*, *A. Rotundifolia hortensis*, *Roman* or *Garden Sorrel*, *Green Sauce*, (F.) *Oseille boucher*, *Oseille ronde*, *Petite O.* Virtues the same as those of the common sorrel.

RUMINATION, *Ruminatio*, from *ruma* or *rumen*, 'the gullet.' *Merycismus*. A function peculiar to ruminating animals, by which they chew the food they have swallowed a second time. An analogous phenomenon is sometimes seen in man.

RUMP, *Cronpiou*—*r. Bone*, *Coccyx*.

RUNNET, Rennet.

RUNNING, *Cursus*, (F.) *Course*. A succession of leaps, executed with rapidity, to transport the body quickly from one place to another.

RUNUNCULA, Raspatorium.

RUPIA, *Ulcus atonicum*, *Ephlysis Rhypha*. An eruption of large flattish blebs, which contain a fluid at first serous, afterwards puriform, and often bloody, which rapidly concretes into crusts, at the base of which are ulcers of variable depths.

It requires the use of tonics internally, and of stimulating ointments externally.

RUPTORIUM, *Cauterium*—*r. Commune*, *Potassa fusa*.

RUPTURA, *Ecrexis*, *Hernia*, *Laceration*—*r. Uteri*, *Uterus*, *rupture of the*.

RUPTURE, *Hernia*—*r. du Cœur*, *Cardiorrhæxis*—*r. of the Groin*, *Bubonocèle*—*r. de la Matrice*, *Uterus*, *rupture of the*—*r. Wort*, *Hernia glabra*.

RUSCUS, *R. aculeatus*, *Bruscus*, *Oxymyrrhine*, *Oxymyrrine*, *Myrtacanthu*, *Catalpa gela*, *Myracanthu*, *Sopa regia*, *Wild Myrtle*, *Centromyrrine*, *Batcher's Braun*, (F.) *Prêt haux*, *Fragon Family*, *Smilacæ* *Sez. Syst. Diœcia Monadelphii*. The root has been recommended as an aperient and diuretic.

RUSCUS ACULEATUS, *Ruscus*.

RUSCUS HYPOGLOS'SUM; *Uoult'ria*, *Hypoglos-*

sum, Bislin'gua, Bonifa'cia, Laurus Alexandri'na angustifolia, (F.) *Laurier Alexandrin*. Formerly used against relaxed uvula.

RUSH, SWEET, *Juncus odoratus*.

RUSMA. See Orpiment.

RUSPIN'S TINCTURE FOR THE TEETH. An empirical preparation, composed of *Florentine orris* ζ viij, cloves ζ j, rectified spirit Oij, ambergris \mathfrak{D} j.

RUTA, *Ruta gran'colens, R. horten'sis, Common Rue, Peg'anium, Besu'sa*, (F.) *Rue, Rhue, Rue sauvage*. Family, Rutaceæ. *Sez. Syst. Decandria Monogynia*. The plant has a strong, ungrateful odour, and bitter and pungent taste. It is acrid, so as to blister the skin. Its properties are reputed to be tonic, stimulant, antispasmodic, and emmenagogue. Dose, gr. xv to \mathfrak{D} j.

Oleum Ruta, or distilled Oil of Rue, is antispasmodic; and, externally, rubefacient. Dose, gr. ij to vj.

RUTA CAPRARIA, *Galega officinalis*—r. *Muraria, Asplenium ruta muraria*.

RUTABULUM, *Penis*.

RUTA'CEUM, from *Ruta*, 'rue.' Vinegar of rue.

RUTIDOMA, see Rutidosis.

RUTIDO'SIS, *Rytido'sis, Rhytido'sis*, from *ρυτιδω*, 'I wrinkle.' The act of wrinkling; as *Rutidoma* means a shrivelled or wrinkled body. A destruction or atrophy of the eye. Corrugation and subsidence of the cornea.

RUYSCHIANA TU'NICA, (F.) *Lame on Membrane Ruyschienne*. According to Ruysch and the greater part of his disciples, the choroid coat of the eye is formed of two laminæ. His son gave to the inner the name *Tunica Ruyschiana* or *Membr'na Ruyschii'na seu Ruyschii*.

TUNICA CELLULO'SA RUYSCHIANA is the cellular substance under the peritoneal covering of the stomach. It is not numbered among the coats of that organ.

RYE, *Secale*—r. Horned, Ergot—r. Spurred, Ergot.

RYTIDOSIS, *Rutidosis*.

RYTIS, *Wrinkle*.

S.

S. S. A. &c. See Abbreviations.

SABADILLA, *Veratrum sabadilla*.

SABADILLIN. See Veratrina.

SABBATIA, *Chironia angularis*—s. *Angularis, Chironia angularis*.

SABINA, *Juniperus sabina*.

SABINE, *Juniperus sabina*.

SABULOUS, *Sabulo'sus, Aren'o'sus. Psamm'o'tes*. The sandy deposit often seen in urine.

SABUR'RA, *Sordes*. This word signifies, by derivation, coarse sand, or ballast. In its common acceptation, it means *foulness of the stomach*, as it is sometimes called; or vitiated matters supposed to be retained and accumulated in the stomach—the result of imperfect digestion—and which have been sometimes considered as a morbid product of the mucous secretion of that organ or of the biliary secretion; at others, as a residuum from alimentary substances, badly digested. The *Sabur'ral state. Collu'ries gastrica, Cruditate ventriculi*, (F.) *Embar'ras gastrique*, is an accumulation of saburra in the stomach, which the Humourists considered to be the cause of a number of diseases.

SABURRA VERMINOSA, *Helminthiasis*.

SABURRATIO, *Arenatio*.

SAC, *Saccus, Scluso'rium*. Sax. *rac*.

HERNIAL SAC, *Saccus herni'o'sus*, (F.) *Sac herniaire*. An envelope or pouch, formed by the serous membrane of the cavity, whence a viscus has escaped. We distinguish, in a hernial sac, its *orifice* or the opening by which it communicates with the great cavity lined by the serous membrane: its *cer'vix* or *neck*, (F.) *Collet*, the narrow portion on the outside of the orifice, where strangulation sometimes occurs: the *body*, (F.) *Corps*, which is the round prominent part; and the *fundus* or *bottom*,—the part opposite to the orifice.

SAC HERNIAIRE, *Hernial sac*.

SACCHARUM. From the Arabic, or rather

Sanscrit, *Sa-kar*, 'white earth': *Suchar, Succhar, Su ter, Zuchar, Zu'caro, As'sukur, Tigala, Zuc'charum, Zozar, Zu'charum, Zuchra, Sugar*, (F.) *Sucre*. The produce of the juice of the *Sac'charum officina'rum* vel *officina'te* of Linnaeus, (*Calomus Indicus, Cul'annus Saccharinus, Sugar Cane*, (F.) *Canne à Sucre, Cannamelle*; the *Arund'o saccharifera* of Sloane. Family, Gramineæ. *Sez. Syst. Triandria Digynia*) and also of the beet, maple, &c.

True sugars are those with which alcoholic fermentation may be effected, by the addition of yeast and water. They are:—

Species.	Varieties.
1. . . .	{ Hard sugar of the cane, maple, beet, chestnut, &c.
2. . . .	{ Liquid sugar, sugar of malt, of the sweet potato, molasses, honey, &c.
3. . . .	{ Hard sugar of the grape, ripe fruits, starch, diabetes, &c.
4. . . .	Hard sugar of the mushroom.

Imperfect sugars are those in which alcoholic fermentation cannot be effected by means of yeast and water.

Species.	Varieties.
1.	Manna.
2.	Sugar of milk.
3.	Sugar of jelly or glue (<i>gelatin</i> .)
4.	Liquorice.
5.	Picromel.

Sugar is prepared from the expressed juice of the sugar cane, boiled with the addition of quicklime or common vegetable alkali. It is used, in pharmacy, for the preparation of syrups, conserves, lozenges, &c. It is very nutritious, and is employed as an aliment, and as a demulcent and antiseptic. Dissolved in small quantities in water, as in tea, it is apt to disagree with dyspeptics; an evil which does not always occur when the same substance is taken more largely.

Muscovado, raw or brown or moist sugar, is the *Saccharum non purificatum*, *S. rubrum*, *Mel cannae*, or coarse sugar.

Saccharum acerum, *S. Canadense*, Maple Sugar, is often used as a demulcent.

Saccharum album, *S. purificatum*, *Saccharum*, (*Ph. U. S.*) White Sugar, Refined Sugar, *Sal Indus*, is the Loaf Sugar. Double-refined Sugar has been called *Tubaret*.

Saccharum Candidum, Sugar Candy, (*F. Sucre Candi*.) *Al'phenic*, *Nabot*, is the crystallized juice of the cane.

Barley Sugar, *Penides*, *Saccharum hordeatum*, is a variety of sugar candy.

SACCHARUM OFFICINARUM, see *Saccharum*—*s. Saturni*, *Plumbi superacetas*.

SACCULUS, diminutive of *saccus*, 'a little sac.' This name has been given to two sacs formed by the membranous vestibule, which open into each other, and contain the *otolithes*, and *otoconies*; one of these is termed the *sacculus vestibuli*, the other *sacculus*. See *Semicircular canals*.

SACCULI ADIPOSI, Fatty vesicles—*s. Laryngæi*, Ventracles of the larynx.

SACCULI MEDICINALIS. Bags containing medicinal substances.

SACCULUS, Marsupium—*s. Cephalicus*, *Cucupha*—*s. Chylifer seu rorifer*, *Receptaculum chyli*—*s. Cordis*, *Pericardium*—*s. Ellipticus*, see *Semicircular canals*—*s. Sphericus*, see *Semicircular canals*—*s. Vestibuli*, see *Semicircular canals*.

SACCUS, Sac—*s. Coli*, *Cæcum*—*s. Herniosus*, *Hernial sac*—*s. Lachrymalis*, *Lachrymal sac*—*s. Lacrumalis*, *Lachrymal sac*—*s. Lactæum*, *Receptaculum chyli*—*s. Venarum cavarum*, *Sinus dexter cordis*—*s. Venarum pulmonalis*, *Sinus pulmonalis*.

SACER, Sacral—*s. Ignis*, *Herpes zoster*—*s. Musculus*, *Transversalis dorsi*.

SACK. A wine used by our ancestors. *Vin sec*. Probably *Sherry*.

SACRA FISTULA, Vertebral column.

SACRAL, *Sacer*, (*F.*) *Sacré*. That which belongs or relates to the sacrum. A name given to several parts.

SACRAL ARTERIES are distinguished into, 1. The anterior or middle sacral. Median Artery of the Sacrum of *Chaussier*, which arises from the posterior part of the abdominal aorta, in front of the 4th lumbar vertebra. It descends, in a serpentine manner, upon the sacro-vertebral articulation, and on the anterior surface of the sacrum. It furnishes many lateral branches, which unite with the lateral sacral arteries, and enter the anterior sacral foramina, to be distributed to the membranes of the marrow, &c. 2. The lateral sacral arteries, which are two in number; one on each side. They arise from the hypogastric, from the ilio-lumbar, or from the gluteal; and descend before the anterior sacral foramina, anastomosing in an arched manner, towards the coccyx, with the middle sacral. They give off external and posterior branches, which enter the sacral foramina; and internal branches, which are distributed to the pyramidalis, sacrum, &c.

SACRAL GROOVES, (*F.*) *Gouttières sacrées*. Two longitudinal excavations, but slightly marked, at the posterior surface of the sacrum; which appear to terminate the vertebral grooves or gutters.

SACRAL NERVES, (*F.*) *Nerfs sacrés*, are generally six in number. They arise from the termination of the spinal marrow. The first, united with the great cord which descends from the lumbar plexus, concurs with the three others in the formation of the sacral or sciatic plexus. The 3d and 4th, with branches of the great sympathetic, form the hypogastric plexus. The 5th and 6th are distributed to the ischio-coccygeus muscle, and to the sphincter and levator ani.

SACRAL OR SCIATIC PLEXUS,—the sacral portion of the crural plexus of *Chaussier*, constituted as just mentioned, is situate in front of the pyramidalis. It gives off, backwards, two branches, called the *pudic*, (*F.*) *honteux*, and the *lesser sciatic*. It terminates in the great sciatic nerve.

SACRÉ, Sacral.

SACRO-COCYGEUS. Relating to the sacrum and coccyx.

SACRO-COCYGEAL ARTICULATION is that of the lower extremity of the sacrum with the superior facette of the coccyx. It is closed by two ligaments;—an anterior, and a posterior sacro-coccygeal.

SACRO-COSTALIS, *Sacro-lumbalis*—*s. Fémoral*, *Gluteus major*.

SACRO-COXAL'GIA, from *sacrum*, 'the os sacrum,' *coxa*, 'the hip,' and *algos*, 'pain,' a hybrid term. Some authors have called thus, a rheumatic affection of the sacro-iliac symphysis.

SACRO-ILIAC, *Sacro-Iliacus*. That which relates to the sacrum and ilium.

SACRO-ILIAC OR ILIO-SACRAL ARTICULATION, *SYMPHYSIS* or *SYNCHONDROSIS*, is the union of two surfaces;—two inclined planes, broader above than below; one, formed by the sacrum;—the other, by the ilium. Both surfaces are incrustated by an articular cartilage. The bands, which strengthen them, are the two *sacro-sciatic ligaments*, the *sacro-spinal*, a *sacro-iliac* ligament, and some irregular fibres. The *sacro-iliac* ligament is a very thick assemblage of short, dense, irregular fibres, occupying the space which the sacrum and ilium leave between them, behind their articular surface. Some authors have termed some irregular fibres, situate in front of the sacro-iliac articulation, *anterior sacro iliuc ligaments*, in opposition to the preceding fasciæ, which they call *posterior sacro-iliac*.

SACRO-ISCHIATICUS, *Sacro-sciatic*—*s. Lombaire*, *Sacro-lumbalis*.

SACRO-LUMBAR. *Sacro lumbalis*, *Sacro-lombaire*. That which belongs to the sacrum and loins.

SACRO-LUMBA'LIS, or *Sacro-lumbæ'ris Muscle*, *Lombo-costo-trachélien*, *Sacro costalis*, *Dorso-trachélien* portion of the *Sacro-spinal* of *Chaussier*, (*F.*) *Sacro-lombaire*, is seated at the posterior part of the trunk; is thick and triangular below; flat and thin in the remainder, and terminates in a point at its upper extremity. It is attached to the posterior surface of the sacrum; to the corresponding portion of the crista ili; to the extremities of the transverse processes of the lumbar vertebra; to the angles of the 11 inferior ribs; to the tuberosity of the first, and the posterior tubercle of the transverse processes of the last five cervical verte-

bræ. The sacro-lumbalis straightens the vertebral column when bent forwards, and maintains it straight. By means of its insertion into the ribs, it can elevate or depress these bones, according as it contracts from above to below, or from below to above. It acts, consequently, sometimes as an inspiratory, at others, as an expiratory muscle.

From six or eight of the lower ribs arises an equal number of fleshy portions, which terminate at the inner side of this muscle, and are called *Musculi Accessorii vel Additamentum ad Sacro-lumbalem*, (F.) *Accessoires du Sacro-lombaire*.

From the upper part of the sacro-lumbalis, a fleshy slip, called *Cervicalis descendens*, *Cervicalis descendens Diemerbroeckii*, *Transversalis collateralis colli*, *Accessorius ad Sacro-lumbalem*, *Transversaire grêle*, runs up, to be fixed to the transverse processes of the 4th, 5th, and 6th cervical vertebræ, by three distinct tendons. These last parts, though separated by some anatomists, belong to the sacro-lumbalis.

SACRO-SCIATIC, *Sacro-ischiaticus*. That which belongs to the sacrum and ischium.

SACRO-SCIATIC LIGAMENTS are two ligaments, which assist in securing the sacro-iliac articulation. The *great* or *posterior sacro-sciatic ligament* extends from the crista illi and the sides of the sacrum and coccyx to the tuberosity of the ischium. The *less* or *anterior sacro-sciatic ligament* arises from the same point, and terminates in the spine of the ischium.

SACRO-SPINAL, *Dorso-trachelian* portion of the sacro-lumbalis.

SACRO SPINALIS. That which relates to the sacrum and spine. Under this name, Chaussier describes the sacro-lumbalis, longissimus dorsi, transversalis, transverso-spinalis, and inter-transversalis. It divides it into three portions.

SACRO TROCHANTÉRIEN, *Pyramidalis*.

SACRO-VERTEBRAL, *Sacro-vertebralis*. That which relates to the sacrum and the vertebræ.

SACRO-VERTEBRAL ARTICULATION is the junction of the last vertebra of the loins with the sacrum. The angle which these two bones form at the anterior part has been called the *Promontory of the Sacrum*, or the *Sacro-vertebral Angle*.

SACRO VERTEBRAL LIGAMENT is a strong ligament, which passes from the anterior part of each of the transverse processes of the last lumbar vertebra to be attached to the base of the sacrum. Its use is to maintain the articulation of those two bones *in situ*.

SACRUM, *Os sacrum*, *Os basilare*, *Os Alagas*, *Albagiuzi*, *Hieron osteon*; from *sacer*, 'sacred;' because it contributes to protect the genital organs, which were considered sacred, or because it was offered in sacrifice. The bone, which forms the posterior part of the pelvis, and is a continuation of the vertebral column. The sacrum is symmetrical and triangular; situate at the posterior part of the pelvis, and concave anteriorly. It has,—1. A *pelvic* or *anterior surface*, which corresponds to the pelvic cavity, and has four transverse furrows, that point out the parts where the primitive portions of the bone were separated from each other. On each side there are four foramina, called *anterior sacral*; these are oblique, and decrease

in size, from above downwards. Through these pass the anterior branches of the sacral nerves. 2. A *spinal* or *posterior surface*, which is convex, rough, and covered by muscles. Upon the median line are four horizontal, tubercular eminences, forming a continuation of the spinous processes of the vertebræ; and, below, a triangular notch, where the *sacral canal* terminates. On each side of this surface are four foramina, called *posterior sacral*, which are smaller than the anterior, and give passage to the posterior branches of the sacral nerves. 3. The *vertebral surface* or *base*. Its greatest extent is transversely. It is articulated with the last lumbar vertebra. On it we see the orifice of the *sacral canal*, of a triangular shape, which decreases in width from above downwards; terminates the vertebral canal; is lined by a prolongation of the cerebral membranes; contains the fasciculi of the sacral nerves; communicates, externally, by the sacral foramina; and terminates at the triangular notch on the posterior surface of the bone. At the sides of the upper orifice of the sacral canal are two articular processes, which receive the articular processes of the last lumbar vertebra. The projection, formed by the union of the base of the sacrum with the last lumbar vertebra, is called the *Promontory* or *greater Angle of the Sacrum*, or *Sacro-vertebral Angle*. 4. A *coccygeal face* or *apex*, (F.) *Face coccygienne* ou *Sommet*, which is very narrow, and is articulated with the coccyx. 5. *Two lateral margins*, which have, above, a broad oblique surface, articulated with the ilium.

The sacrum is developed by 30 to 36 points of ossification.

SADDLE, *TURKISH*, *Sella Turcica*.

SAFFLOWER, *Carthamus tinctorius*.

SAFFRON, *Crocus*—s. *Bastard*, *Carthamus tinctorius*—s. *Flower*, *Carthamus tinctorius*—s. *Dyers'*, *Carthamus tinctorius*—s. *Meadow*, *Colchicum autumnale*.

SAFRAN BÂTARD, *Carthamus tinctorius*, *Colchicum autumnale*—s. *des Indes*, *Curcuma longa*—s. *de Mars apéritif*, *Ferri subcarbonas*—s. *de Mars astringent*, *Colcothar*—s. *des Prés*, *Colchicum autumnale*—s. *Racine de*, *Curcuma longa*.

SAFRANUM, *Carthamus tinctorius*.

SAFRE, *Small*.

SAGA, *Sago*.

SAGAPENUM, *Sag'apin*, *Serapi'non*, (F.) *Gomme sérapihique*. A gum-resin, supposed to be obtained from the *Ferula Persica*. *Family*, *Umbelliferae*. *Sex. Syst.* *Pentandria Digynia*. Its odour is fetid and alliaceous; taste pungent, bitterish, nauseous. It is in small, agglutinated masses of a yellow colour; tenacious; breaking with a horny fracture. It is a reputed antispasmodic and emmenagogue. Dose, gr. x to ʒss.

SAGAPIN, *Sagapenum*.

SAGE, *Salvia*—s. *Indian*, *Eupatorium perfoliatum*—s. *Jerusalem*, *Pulmonaria*.

SAGE-FEMME, *Midwife*.

SAGESSE DES CHIRURGIENS, *Sisymbrium Sophia*.

SAGIMEN VITRI, *Soda*, subcarbonate of.

SAGITTAL, *Sagittalis*, from *sagitta*, 'an arrow.'

SAGITTAL FURROW or **GROOVE**, (F.) *Gouttière sagittale*, is a channel on the median line of the inner surface of the skull-cap. It is ex-

cavated in the os frontis, in the two parietal and occipital bones, and extends from the crista galli to the internal occipital protuberance. It lodges the longitudinal sinus, which has been called the *sagittal sinus*.

SAGITTAL SUTURE, *Obela's sutu'ra*, *O Raphē*, *S Virga'ta*, *Sutura juga'lis*, *S. Rhabdoid'es*. The suture which unites the two parietal bones, and which extends, from before to behind, on the median line, from the coronal suture to the lambdoidal. It is so called, from *sagitta*, 'an arrow,' because it seems to meet the coronal suture as an arrow meets the string of a bow.

SAGITTARIUM ALEXIPHARMACUM, *Maluc'æ Radix*, *Canna In'dica*, *Arundo Indica*. A root, cultivated in the West Indies, and supposed to be a remedy for wounds by poisoned arrows.

SAGO, *Sagus*, *Saga*. A fecula, obtained from the pith of the *Sagus Rumphii*, growing in the Moluccas, Philippine Isles, &c., and which is brought to us in small grains. The same substance is, also, obtained from the West Indies, but it is inferior to that from the East. By boiling in water or milk, sago becomes soft and transparent, and forms an agreeable and nutritious food in febrile, calculous, and other disorders. It is made palatable by sugar, lemon-juice, or wine, where the last is not contraindicated.

SAGO, FRENCH, see *Solanum tuberosum*—s. French, Arrowroot, common—s. Portland Island, see *Arum maculatum*.

SIGUE PETIT. See *Solanum tuberosum*.

SAGUS, *Sago*—s. *Rumphii*, see *Sago*.

SAHARA, *Insomnia*.

SAIGNÉE, Blood-letting—s. *Spoliative*, *Spoliativa phlebotomia*.

SIGNEMENT DU NEZ, Epistaxis.

SAILORS, DISEASES, &c. OF. Sailors, by nature of their occupation, are liable to many diseases. Several of these may, however, be ward off by proper attention to cleanliness and ventilation.

SAIN BOIS, *Daphne gnidium*—s. *Doux*, *Adeps præparata*.

SAINT AMAND, MINERAL WATERS OF. Sulphuretted waters, in the department of Nord, France. They contain carbonic and sulphohydric acids. The *Boue* or deposit contains sulphohydric acid, and salts of iron and magnesia. Temperature, 64° to 82°, Fahr.

SAINT AUGUSTINE, CLIMATE OF. This sea-port in Florida is a frequent retreat during the winter season for the valetudinarian from the more northern parts of the United States. The climate is certainly comparatively mild and equable; but it is liable to frequent north-east storms. There are but a few days, however, in the winter, in which the invalid cannot take exercise. Tampa Bay, and Pensacola, in Florida; and Mobile, in Alabama, which are sometimes visited by the consumptive, are less liable to the storms in question.

ST. CHARLES'S ROOT, *Carlo sancto* (Radix.)

SAINT CROIX, Santa Cruz.

SAINT JAMES'S WORT, *Senecio Jacobææ*.

ST. JOHN'S WORT, *Hypericum perforatum*.

SAINT KITTS, see West Indies.

SAINT LEONARD'S, CLIMATE OF. This place, which is situate about a mile to the

westward of Hastings, in Sussex, England, is less sheltered, and is, therefore, a less favourable retreat, during the winter months, for the phthisical valetudinarian.

SAINT MYON, MINERAL WATERS OF. Some cold, acidulous waters at Saint Myon, near Riom, in the department of Puy-de-Dôme. They contain free carbonic acid, subcarbonate of soda, chloride of sodium, and carbonate and sulphate of lime.

SAINT NECTAIRE, MINERAL WATERS OF. Springs in the department of Puy-de-Dôme, France. They contain carbonic acid, bicarbonate of soda, and chloride of sodium. Temperature, 75° to 103°, Fahr.

SAINT PARDAUX, MINERAL WATERS OF. Chalybeate springs in the department of Allier, France. They contain carbonic acid and iron.

SAINT SAUVEUR, MINERAL WATERS OF. Sulphurous waters in the department of Hautes-Pyrénées, France. Temperature, 76° to 93°, Fahr.

SAINT VINCENTS, see West Indies.

SAINT VITUS'S DANCE, Chorea—s. Vitus's Dance of the Voice, Balbuties.

SAIRE, Essera.

SALAAM, CONVULSION, see Convulsion, Salaam.

SALACITAS, Satyriasis—s. Vulvæ, Nymphomania.

SALAD, CORN, Valeriana dentata.

SALCOMBE, (CLIMATE OF.) A small place—the Montpelier of Huxham—which is one of the warmest spots on the S. W. coast of England, and, therefore, in this respect adapted for the phthisical invalid as a winter retreat.

SALER'NUM, SCHOOL OF. An ancient school of Medicine at Salerno in Italy. It was established by Charlemagne, in 802; and was the first Christian university at which Medicine was taught. It was much celebrated, especially in the 12th century. The work on Hygiène, "*De Conservandâ Valetudine*," which bears its name, has passed through several editions in various languages. It is supposed to have been written by John of Milan, in 1100, and is in Leonine verses.

SALICARIA, Lythrum salicaria.

SALICINE. See Salix.

SALICORNIA ARABIA, &c. See Soda.

SALINE, *Salinus*, *Salina'cius*, *Salinacidus*; from *sal*. That which contains a salt, or has the properties of a salt.

SALINE DRAUGHT, or *Mixture*. This may be made as follows:—*Potass. carbon.* ℞j. *acid. citric. vel tartar. gr.* xv, *vel succ. limon. recent.* ℥ss, *aque f. 3viij*, *syrup. cujusvis* ℥j. M. Given in divided doses as a febrifuge.

SALINE EFFERVESCING DRAUGHT or MIXTURE is made by adding a due proportion of either of the acids above mentioned, or of lemon juice, to the proper proportion of the carbonate of soda or potassa: about 25 grains of the acid saturate 30 grains of the carbonate. See *Powders*, Soda.

SALIS AMMONIACI FLORES, Ammonie carbonas.

SALIUNCA, Valeriana Celtica.

SALI'VA. *S'alon*, *S'elon*, *Pty'alon*, *Pty'elon*, *Spittle*. An inodorous, insipid, transparent, slightly viscid fluid; secreted by the parotid, submaxillary, and sublingual glands, and poured into the mouth by the ducts of Steno, Wharton, and Rivinus; the use of which is to mix with the alimentary bolus, and to serve in the process of digestion. It is composed, according to Ber-

zelius, of 992.2 parts of water, 2.9 of a particular animal matter, soluble in water, and insoluble in alcohol, of 1.4 of mucus, of 1.7 of chlorides of potassium and sodium, 0.9 of lactate of soda and animal matter, and 0.2 of soda.

SALIVÆ FLUXUS CIBO VISO. See Salivation.

SALIV'ARE, Salivary.

SALIVANS, Sialogogue.

SALIVARY, *Saliva'rius*, from *saliva*. That which belongs to the saliva.

SALIVARY FISTULÆ, *Sialosyrin'ges*, are such as depend upon an accidental opening into the excretory ducts of the salivary glands. Such fistulæ are, most commonly, met with in the duct of Steno.

SALIVARY GLANDS, or *secreting organs of the saliva*, or *salival glands*, are situate symmetrically, to the number of three, on each side of the face; and behind and under the lower jaw. Their form is very irregular, and their extent varies according to individuals. Their excretory ducts—*Ductus saliva'rii*, (F.) *Canaux ou Conduits salivaires*, carry the saliva directly into the mouth, without pouring it into any intermediate reservoir, as happens in the case of some of the other glands. The salivary glands have been distinguished into,—1. The parotid; 2. The submaxillary; 3. The sublingual.

SALIVA'TION, *Saliva'tio*, *Saliva'tio cal'ida*, *Epiph'ora ptyalis'mus*, *Sialisma*, *Sialis'mus*, *Sial'achus*, *Sielismos*, *Sialorrh'e'a*, *Pty'alism*, *Fluxus salivæ*. (F.) *Flux de bouche*, *Flux salivaire*. A superabundant secretion of saliva; occasioned either locally by the use of irritating mastics, or under the influence of some cause which acts on the whole economy, and especially by mercurial preparations. In this last case, it is accompanied by a coppery taste in the mouth, by swelling of the gums, and, sometimes, by looseness of the teeth. Salivation may usually be diminished by the use of astringents, laxatives, &c.

Ptyolismus acutus sympathet'icus, *Salivæ fluxus cibo viso*, or *Mouth watering*, the increased flow of saliva produced by the sight, smell, or thought of agreeable food, is a species of ptyalism, as well as the *Ptyolismus acutus mellitus*, *Apocensis ptyalis'mus mellitus*, or *Sweet spittle*. In this, the saliva has a sweet or mucilaginous taste.

SALIX. The Willow, *Itea*, (F.) *Saule*. A genus of plants in the Linnæan system.

SALIX FRAG'ILIS, or Crack willow; Ph. D.

SALIX ALBA, or White willow; Ph. D. and Ph. U. S.

SALIX LATIFOLIA, or Broad-leaved willow.

SALIX CAPREA, or Great round-leaved willow; Ph. L.

SALIX PENTANDRIA, SALIX VITULINA. SALIX ERYOCERPHALA. The bark of each of these has a slightly aromatic odour, and a bitter and astringent taste, which is nearly the same in all the species. It is tonic and astringent, and has been used in intermittents, and in cases of dyspepsia, worms, &c. The active principle has been separated, and called

Salicine. It is like the quinia in medicinal efficacy. Dose, ℞j to ℥j of the powder. Dose of *Salicine* from 4 to 6 grains.

SALIX ÆGYPTIACA, Calaf.

SALMIAC, Ammonie murias.

SALPINGEMPHRAXIS, from *σαπιγξ*, 'the Eustachian tube,' and *εμψαξις*, 'obstruction.'

Obstruction of the Eustachian tube;—a cause of deafness.

SALPINGO-CYESIS, *Paracy'sis tubaria*, *Graviditas tubaria*, from σαλπιγξ, 'a tube or trumpet,' and κύσις, 'pregnancy.' Tubal pregnancy.—See Pregnancy.

SALPINGO-MALLÉEN, Tensor tympani—s. Staphylinus internus, Levator palati.

SALPINGO-PHARYNGÆUS, from σαλπιγξ, 'a trumpet,' and φαρυγξ, 'the pharynx.' Valsalva and Douglas have given this name to a bundle of fibres, which passes from the Eustachian tube to the pharynx.

SALPINX, Tuba.

SALSALI, Tragopogon.

SALSAMENTUM CRUDUM, Omotarichos. **SALSAPARILLA GERMANICA**, Sarsaparilla Germanica.

SALSEDO MUCRUM, Potassæ nitras.

SALSEPAREILLE, Smilax sarsaparilla—s. d'Allemagne, Sarsaparilla Germanica.

SALSILAGO, Muria.

SALSOLA KALI, Prickly Saltwort, *Kali spinosum cochlearium*, *Tragus* sive *Tragum Matthioli*. This plant, as well as the *Salsola sativa*, and the *Salsola soda*, produces the alkaline salt, commonly called *Barilla*, *Soda*, or *Kelp*.

SALSOLA SATIVA, &c. See Soda.

SALSUGINOSUS, Halmyrodes.

SALT, *Sal*, *Hal*, *Hals*, 'salt,' (F.) *Sel*. A name formerly given to a considerable number of substances of very different nature. At present, chymists apply the term, *Salts*, exclusively to the combinations of an acid with one or more bases. *Neutral salts* are those in which the acid and base reciprocally saturate each other. *Acid salts* or *supersalts*, (F.) *Sur-sels*, are those, in which the acid predominates over the base. *Alkaline salts* or *subsals*, (F.) *Sous-sels*, those in which the base is, on the contrary, predominant. The different denominations of the salts are compounded, 1. Of the name of the acid; the termination of which is changed into *ite*, when the name of the acid is in *ous*;—*ate*, when it is in *ic*. Thus the salts formed by the sulphurous acid are *sulphites*: those by the sulphuric, *sulphates*. 2. This name is followed up by that of the oxyd, that enters into the composition of the salt. Thus, the *sulphate of protoxyd of iron* is a combination of sulphuric acid with the protoxyd of that metal. Frequently, to shorten the name, the word *oxyd* is suppressed; and *proto*, *deuto*, *trito*, &c. put before the acid:—as *protosulphate of iron*. *Simple salts* are those resulting from the combination of an acid with a single base: *double salts*, with two different bases: *triple*, with three, &c.

When salt is used in an abstract sense, it means the chloride of sodium.

SALT, **APERIENT**, of FREDERICK, Soda, sulphate of—s. Baker's, Ammonia carbonas—s. of Barilla, Soda, subcarbonate of—s. Bay, Soda, muriate of—s. Bitter purging, Magnesiæ sulphas—s. Common, Soda, muriate of—s. Epsom, Magnesiæ sulphas—s. Glauber's, Soda, sulphate of—s. Glauber's, Lympington, see Soda, sulphate of—s. Rochelle, Soda, tartrate of—s. Rock, Soda, muriate of—s. Sea, Soda, muriate of—s. Seignette's, Soda, tartrate of—s. Smelling, Ammonia carbonas—s. of Soda, Soda, subcarbonate of—s. Sorethroat, Potassæ nitras fusus sulphatis paucillo mixtus—s. of Tartar, see Potassæ subcarbonas and Potash—s. Tasteless purging,

Soda, phosphate of—s. of Urine, Ammonia carbonas—s. White, Soda, muriate of—s. of Wood-soot, Ammonia carbonas—s. of Wormwood, see Potash—s. Secondary, Neutral salt.

SALTANS ROSA, Urticaria.

SALTATIO, Dancing—s. Sancti Viti, Chorea.

SALTERTON. A village, about four miles to the eastward of Exmouth, England, frequented as a winter abode by invalids. It is in a small, open valley on the sea-shore, and is well protected from winds, particularly the northerly.

SALTPETRE, Potassæ nitras.

SALTUS, Vulva.

SALTWORT, PRICKLY, *Salsola kali*.

SALUBRIS, Salutary.

SALUBRITY, *Salu'britas*, from *salus*, 'health.' Any thing which contributes to the health of individuals or of communities. Situations differ materially from each other in this respect; and the cause of the difference is often an interesting topic of inquiry.

SALUTARY, *Peries'ticos*, *Salutaris*, *Salubris*, *Hygie'nos*. Same etymon. That which is favourable to health. Some diseases have been considered salutary, but this is doubtful.

SALVATEL'LA. Same etymon. (?) *Vena Salvatella* is situated on the back of the hand, near its inner margin. It begins on the posterior surface of the fingers and dorsal surface of the hand, by a plexus, formed of a number of radicles, frequently anastomosing with each other; it then ascends to the inner part of the forearm, where it takes the name—*posterior cubital*. The ancients recommended this vein to be opened in certain diseases, as in melancholic and hypochondriacal affections; and they attributed to such abstraction of blood considerable efficacy in the cure of disease: hence its name.

SALVE, **BLISTERING**, Unguentum Lyttæ —s. Eye, Unguentum oxidi zinci impuri—s. Eye, Singleton's, Unguentum hydragryi nitrico-oxydi—s. Healing, Cerate of calamine.

SAL'VIA, *S. officinalis*, *S. hortensis*, *Elelis'phacos*, (F.) *Sauge*, *Thé de France*. *Family*, Labiata. *Sex. Syst.* Diandria Monogynia. Sage has a peculiar, aromatic odour, and a warm, aromatic, bitterish taste. Its virtues depend upon an essential oil. It is tonic, stimulant, and carminative. In the form of a weak infusion, it is occasionally used as a diluent, and as a wash for sore mouth. Dose, gr. xv to xxx or more.

SALVIA HORMI'NUM, or *Horminum*, (F.) *Sauge hormin*, of the Pharmacopœias, is used in similar cases.

SALVIA HORTENSIS, *Salvia*—s. *Officinalis*, *Salvia*.

SALVIA SCLA'REA, *Sclarea*, *Gallit'richum*, *Ethiopsis*, *Biser'mas*, *Colus Jovis*, *Common Clarry*, (F.) *Orvale ou Toute-bonne*. The leaves have been recommended as corroborants and antispasmodics.

SALVIA VITÆ, *Asplenium ruta muraria*.

SAMBU'CUS, *Sambucus nigra*, *S. vulgaris*, *S. arborea*, *Acte*, *Infelix lignum*; the *Elder*, (F.) *Sureau commun*. *Family*, Caprifoliaceæ. *Sex. Syst.* Pentandria Digynia. (The flower and bark were formerly called *Cano'pum*.) The flowers, berries, and bark of the elder have been used in medicine. The flowers have been reputed diaphoretic and discutient: the berries, aperient and sudorific: the bark, purgative, and, in small

doses, deobstruent. The flowers are sometimes used in fomentations, and to form a cooling ointment.

SAMBUCUS ARBOREA, *Sambucus*—*s. Chamæacte*, *S. ebulus*.

SAMBUCUS EBULUS, *Ebulus*, *Chamæactë*, *Odiosos*, *Sambucus Chamæactë* seu *Helion*, *Sambucus humilis*, *S. herba-cea*, Dwarf-elder, *Dane-wort*, (F.) *Hièble*. The root, interior bark, leaves, flowers, berries, (*Baccæ* seu *Grana-Actes*), and seeds have all been given in moderate doses as resolvents and deobstruents; and in large doses, as hydragogues. The berries of *Sambucus Canadensis*, the *Common Elder* of America, are made official in the American Pharmacopœia.

SAMBUCUS HELION, *Sambucus ebulus*—*s. Herbacea*, *S. ebulus*—*s. Humilis*, *S. ebulus*—*s. Nigra*, *Sambucus*—*s. Vulgaris*, *Sambucus*.

SAMI TERRA, *Samian Earth*. An argillaceous earth, found in the island of Samos, to which were ascribed virtues similar to those of the *Terra Lemnii*.—Galen, Dioscorides.

SAMIUS LAPIS. A stone found in the Isle of Samos, which the ancients believed to be astringent and refrigerant.

SAMPHIRE, *Crithum maritimum*.

SAMPUCHUS, *Thymus mastichina*.

SAMPSUCUS, *Origanum majorana*.

SAMPSYCHINON, *Sampsuchinum*. An ointment composed of the *αμψυχον*; which was perhaps the marjoram.—Dioscorid.

SANABILIS, Curable.

SANAMUNDA, *Geum urbanum*.

SANATIO, Curation, Cure.

SANATIVE, Curative.

SAN GIULIANO, MINERAL WATERS OF. At the foot of the mountain San Giuliano, a league and a half from Pisa, are several mineral springs; temperature from 84° to 107° Fahr.

The spring *Pozzetto* contains carbonic acid, sulphate of soda, lime, and magnesia; chlorides of sodium and magnesium; carbonates of lime and magnesia; argil and silica.—Santi.

SANDARAC, *Sandaracha*, *Gum Juniper*, *Gum Sandarach*, *Pounce*, *Gummi Juniperi*, *Sandaracha*, *Vernix sicca*, *Resina Juniperi*. A name given, by the Arabs, to an odorous resin, that flows from the *Thuja aphylla*. Family, Coniferae. *Sex. Syst.* Monœcia Monadelphia. It is stimulant, like all the resins. It is very little used.

SANDARACHA GRÆCORUM, Realgar.

SANDERS, RED, *Pterocarpus santalinus*.

SANDIVER. See *Vitrum*.

SANG, Blood—*s. Arteriel*, Arterial blood—*s. Dragon*, *Rumex sanguineus*—*s. Dragon*, see *Calamus rotang*—*s. Globules du*, Globules of the blood—*s. Perte de*, Hæmorrhagia.

SANGLOT, Sob.

SANGSUE, Hirudo.

SANGUIDUCTUS DURÆ MATRIS, Sinuses of the dura mater.

SANGUIFICATIO, Hæmatisis.

SANGUIFLUXUS, Hæmorrhagia—*s. Uterinus*, Metrorrhagia.

SANGUINALIS CORRIGIOLE, Polygomonum aviculare.

SANGUINARIA, *S. Canadensis*, Blood-root, *Puccoon*, *Indian Paint*, *Turmeric*. *Nat. Ord.* Papaveraceæ. *Sex. Syst.* Polyandria Monogynia. A North American plant, the rhizoma and

seeds of which are used in medicine. They are emetic. Dose, of the powder, 8 to 20 grains. They are said to reduce the velocity of the pulse, like the digitalis.

SANGUINEA, Potassæ nitras.

SANGUINIS MISSIO, Blood-letting—*s. Profluvium copiosum*, Hæmorrhagia.

SANGUINOLENT, *Sanguinolentus*, from *sanguis*, 'blood.' That which is tinged with blood. An epithet applied, particularly, to the sputa when so tinged.

SANGUIPURGIUM, from *sanguis*, 'blood,' and *purgare*, 'to cleanse.' Purgation of the blood. A name given by some authors to mild fevers; from an idea that they purged the blood of noxious matters.

SANGUIS, Blood, Sperm—*s. Draconis*, see *Calamus rotang*—*s. Hirci siccatus*, see *Blood*.

SANGUISORBA OFFICINALIS. The *Italian Pimpinell*, *Pimpinella Italica*. (F.) *Pimpinelle noire*. It was, formerly, used as an astringent and tonic, in hæmorrhages, dysentery, &c.

SANGUISUGA, Hirudo.

SANGUISUGUM. A barbarous term, to denote too great an accumulation of blood in the heart.—Bonetus.

SANICLE, *Sanicula*—*s. American*, *Heuchera Cortusa*—*s. Yorkshire*, *Pinguicula vulgaris*.

SANICULA, *S. Europæa*, *Cuculla'ta*, *Dodecathcon*, *Symphytum petraeum*, *Sanicula mas*, *Diapensia cortusa*, *Sanicle*. (F.) *Toute-saine*. Family, Umbelliferae. *Sex. Syst.* Pentandria Digynia. This herb was, formerly, used as a mild astringent. It is bitterish, and somewhat austere.

SANICULA, *Saxifraga granula*—*s. Eboracensis*, *Pinguicula vulgaris*—*s. Europæa*, *Sanicula*—*s. Montana*, *Pinguicula vulgaris*.

SANIDO'DES, *Sanio'des*, 'resembling a board,' from *σανίς*, gen. *σανίδος*, 'a board,' and *ειδος*, 'resemblance.' One whose thorax is narrow, and, as it were, contracted.

SANIE, Sanies.

SANIES, *Ichor*, (q. v.) *Tubum*, *Virus*, *Pus malignum*, *P. corrosivum*. (F.) *Sanie*. A thin, serous fluid, presenting some of the qualities of pus and blood, and commonly exhaled at the surface of ulcers.

SANIODES, *Sanidodes*.

SANITAIRE (F.) That which relates to the health—as *établissement sanitaire*; *police sanitaire*.

SANITARIUM, *Sanato'rium*; from *sanitas*, 'health.' A retreat selected for valetudinarians, in consequence of its salubrity. Also, an establishment for the treatment of the sick.

SANITAS, *Hygie'ia*, *Valetu'do*, *Hyge'ia*, Health. (F.) *Santé*, from *sanus*, 'sound.' Health has been defined,—a state, in which all the functions are exerted with regularity and harmony. A person may, however, be in health, although certain functions are not performed. A blind man, for example, has health when all his functions, except sight, proceed with regularity.

SANITAS, Cure.

SANKIRA, *Smilax China*.

SANTA CRUZ, (CLIMATE OF.) This West India Island is frequently selected as a winter retreat for the phthisical valetudinarian from the United States; but it does not seem entitled to any preference, in such cases, over

the other islands of the West Indies, (q. v.) whilst its general salubrity is said to be less than that of many.

SANTAL, *Santalum album*.

SANTALUM ALBUM, *S. citrinum*, *S. pal-lidum*, *Yellow Saunders*, *Sitium myrtifolium*, (F.) *Santal*. *Sex. Syst.* Tetrandria Monogynia. The virtues of the wood of the white saunders reside in a volatile oil and resinous principle. The odour is fragrant, and resembles a mixture of ambergris and roses. It has been used as a stimulant and sudorific, but is not now employed. The Saunders woods are called (in F.) collectively, *Santaux*.

SANTALUM RUBRUM, *Pterocarpus santalinus*.

SANTÉ, *Sanitas*.

SANTONICUM, *Artemisia santonicum*.

SANTORINI. FISSURES OF, (F.) *Incisures* ou *Scissures de Santorini*. Some clefts at the upper and back part of the fibro-cartilaginous portion of the external ear.

SANTORINI, TUBERCLES OF. Small, cartilaginous projections at the top of the arytenoid cartilages, which support the ligaments of the glottis.

SANVE, *Sinapis*.

SAPA. See *Rob*.

SAPHA'DA. Paracelsus has given this name to reddish scales adherent to the hair in some eruptions of the hairy scalp.

SAPHENA, from *σαφης*, 'manifest,' 'evident.' A name given to two subcutaneous veins of the lower limb. These are: 1. The **GREAT SAPHENA VEIN**, or *Saphena interna*, *Tibio-malleolar*, (Ch.) Its radicles occupy the inner part of the great toe, and form a transverse arch on the back of the foot, which unites with the saphena externa, and receives at its convex part, which is turned forwards, a number of branches coming from the toes. These radicles, when united, ascend before the inner ankle, and form a trunk, the size of which is farther increased by several branches that proceed from the region of the tarsus and that of the metatarsus. This trunk ascends vertically at the inner part of the leg; passes behind the inner condyle of the femur; proceeds along the inner part of the thigh; receives other subcutaneous veins, such as the abdominal subcutaneous, the external pudic, &c., and passes through the inferior opening of the crural canal to empty itself into the femoral vein. 2. The **LESSER VENA SAPHENA**, or *Saphena externa*; the *Pero-neo-malleolar Vein* of Chaussier commences by several roots, which are spread over the dorsum and outer side of the foot, and embrace the outer ankle. Behind this, they unite into a single trunk, which ascends obliquely, approaching the tendo Achillis, and proceeds vertically towards the ham to open into the popliteal vein.

SAPID'ITY, *Sapor*, from *sapere*, 'to taste.' The quality of bodies that gives them taste.

SAPIN COMMUN, *Pinus picea*.

SAPINDUS SAPONARIA. (F.) *Saponnier commun*. The name of the plant that affords the *Soap nuts*, *Saponariae Nucule*, *Bacæ Ber-mudenses*, *Soap-berries*. A spherical fruit about the size of a cherry, the cortical part of which is yellow, glossy, and so transparent as to show the spherical, black nut that rattles within, and includes a white kernel. The cortical part of this fruit, which has similar effects with soap

in washing, has been recommended in chlorosis, and as a stomachic and deobstruent.

SAPON, *Soap*, *Sax. rare*, *Smegma*. (F.) *Saxon*. A product obtained by treating fatty bodies with caustic alkalies dissolved in water. In the Pharmacopœia of the United States, it means Soap made with soda and olive oil.

SAPON AMMONIACALIS, *Linimentum ammoniæ fortius*—*s. Ammoniacæ oleaceus*, *Linimentum ammoniæ fortius*—*s. Calcarius*, *Linimentum aquæ calcis*—*s. Kalicus*, *S. mollis*—*s. Niger*, *S. mollis*—*s. Vegetabilis*, *Pulvis gummosus alkalinus*—*s. Viridis*, *S. mollis*.

ACID SOAP is a combination of a fixed oil with an acid.

BLACK SOAP, *Melanosmegma*, is a composition of train-oil and an alkali: and **GREEN SOAP**, of hemp, linseed, or rape oil with an alkali.

SOAP OF THE COCOA NUT OIL, *Sapo coco-nus*, *S. cactu-nus*. (F.) *Saxon de cacao*. It has been much used in Germany in herpetic affections.

COMMON OR SOFT SOAP, *Sapo mollis*, *S. viridis*, *S. niger*, *S. kallicus*, (F.) *Saxon mou*, *Saxon noir*, is made of potash and oil or tallow. The *Sapo vulgaris* or 'common soap' of the Pharm. U.S. is made with soda and animal oil.

LIQUID SOAP, *Lotio saponacea*, is a cosmetic which is composed of olive oil $\mathfrak{z}\text{iv}$, ol. tartari per deliquium $\mathfrak{z}\text{ss}$. Rub together, and add aque rosarum $\mathfrak{z}\text{xij}$.

MEDIC'INAL SOAP, *Sapo amygdalinus*, (F.) *Saxon medicinal*. is made with oil of sweet almonds and half its weight of caustic alkali.

SPANISH OR CASTILE SOAP, *Sapo durus*, (F.) *Saxon dur*, of olive oil and soda.

YELLOW SOAP is formed of turpentine, oil, and alkali. The Castile Soap, being made of fine olive oil, is generally used internally. The yellow and soft soaps are the most stimulating; and are, consequently, best adapted for particular cutaneous eruptions.

Internally, soap is purgative and diuretic; externally, it is detergent and stimulant. Soapy water is used with the greatest success, in cases of poisoning by acids. It is mostly applied externally to bruises and sprains. In Pharmacy, it is used to favour the solution of resins.

SAPONAIRE, *Saponaria*.

SAPONARIA. *Soap-wort*, *Bruise-wort*, *Struthium*, *Lana'ria*, *Lychnis sylvestris*, *Ibix-uma*. (F.) *Saponaire*. *Family*, Caryophyllæ. *Sex. Syst.* Decandria Digynia. A decoction of the leaves of this plant has been recommended in scrofula, cancer, old syphilis, cutaneous eruptions, jaundice, visceral obstructions, &c. It is hardly ever used.

SAPONARIÆ NUCULÆ, *Sapindus saponaria*.

SAPONÆA. A pectoral medicine, prepared with sweetened syrup of violets, and oil of sweet almonds.

SAPONULES, *Sapon'ula*, (F.) *Saponules*. Combinations of volatile or essential oils with different bases.

ACID SAPONULES, are combinations of such oils with different acids.

SAPOR, *Sapidity*, *Savour*.

SAPOTA, *Acras Sapota*, *Oval-fruited Sapota*, (F.) *Sapotier*, *Sapotillier*. *Sex. Syst.* Hexandria Digynia. A tree which grows in the Antilles, and particularly at Saint Domingo. Its fruit is much esteemed. It resembles the marmalade of quinces; and hence has been called *natural marmalade*. The seeds make an emulsion,

which has been given in nephritic affections. The bark has been recommended as a febrifuge.

SAPOTIER, Sapota.

SAPOTILLIER, Sapota.

SAPROPYRA, Typhus gravior.

SAPROS, Putrid, Rancid.

SAPROS'TOMUS, from *σαπρος*, 'foul,' of a bad odour, and *στομα*, 'mouth.' One who has an offensive breath.

SARAPUS, *Sarapous*. One who has a large foot; whose toes are largely separated, or whose feet are much asunder in walking; from *σαιρω*, 'I grin,' and *πους*, 'the foot.' See Kyllosis.

SARATO'GA, MINERAL WATERS OF. The Saratoga springs in New York are ten miles north-east from Ballston. They contain the same ingredients as those of the latter place; and are much frequented by visitors from every part of the United States. The following analysis has been given of the *Con- gress spring*: In a wine gallon—*gaseous con- tents*: carbonic acid, 311 cubic inches; atmo- spheric air, 7. *Solid contents*. Chloride of so- dium, gr. 385; hydriodate of soda, gr. 35; bicarbonate of soda, gr. 8982; bicarbonate of magnesia, 95788; carbonate of lime, 98,098; carbonate of iron, 5,075; silica, 1.5; hydriobromate of potassa, a trace. Total gr. 597,943. —Steel.

The Walton or Iodine Spring contains chlo- ride of sodium, carbonate of magnesia, and i- odide of sodium.

SARCION, Caruncle.

SARCITES, Anasarca—s. Flatuosus, Em- physema.

SARCOCE'LE, *Hernia carno'sa*, *Scirrhus Testiculi*, from *σαρξ*, 'flesh,' and *κηλη*, 'a tu- mour,' *Sarco'ma scroti*, (F.) *Hernie charnue*. Scirrhus or cancer of the testicle. This dis- ease affects adults particularly; and appears, most commonly, after an inflammatory swell- ing of the testicle. Sometimes it is dependent upon a blow; at others, it makes its appearance without any appreciable cause. It is well known by a hard, heavy, ovoid or spherical swelling of the testicle, which is, at first, slightly, or not at all painful, and merely causes an unpleasant traction on the spermatic cord. There is no heat or change of colour of the skin: the sper- matic cord is swollen, and participates in the affection: very painful shootings occur: the lymphatic glands of the abdomen become swol- len, and form a tumour, which may, at times, be felt through the abdomen; and the patient, at length, dies with every sign of the cancerous diathesis. The prognosis is very unfavourable. The only means, indeed, that can save life is the extirpation of the testicle.

SARCOCOL'LA, (F.) *Colle-chair*, from *σαρξ*, 'flesh,' and *κόλλα*, 'glue.' A resinous matter, obtained from the *Penx'a Sarcocol'la*, an African shrub, which has been so called, from a belief that it facilitates the consolidation of flesh. It is in the form of small, oblong, semitransparent globules; of a yellowish or reddish blue, and smells like aniseed. It was once employed as an astringent and detergent.

SARCO-EPIPOCE'LE, from *σαρξ*, 'flesh,' *επιπλοον*, 'the epiploon,' and *κηλη*, 'a tumour.' Epiplocele, complicated with sarcoma or sarco- cele.

SARCO-EPIPLOM'PHALUS; from *σαρξ*, 'flesh,' *επιπλοον*, 'the epiploon,' and *ουφαλος*,

'the navel.' Umbilical hernia, formed by scir- rhous epiploon or complicated with sarcoma.

SARCO-HYDROCELE, Hydro-sarcocele.

SARCODES, Carneous.

SARCOLEM'MA, *Sarcolema*, from *σαρξ*, 'flesh,' and *λαμνα*, 'a coat.' The sheath, which surrounds the fibrils of muscle, that form a fibre. It is quite distinct from the cellular membrane that binds the fibres into fasciculi.—Bowman.

SARCOLOGIA, Myology.

SARCOLOGY, *Sarcolog'ia*, from *σαρξ*, 'flesh,' and *λογος*, 'a discourse.' The part of anatomy which treats of the soft parts. It comprises myology, angiology, neurology, and splachno- logy.

SARCO'MA, *Emphy'ma Sarcoma*, *Sarcom'a- tous tumour*, *Sarco'sis*, *Porrus*, *Sarcophyia*, *Ec- sarco'ma*, *Exsarco'ma*, *Tumour car'neus*, *Excres- cent'ia carno'sa*, from *σαρξ*, 'flesh.' Any spe- cies of excrescence having a fleshy consistence.

COMMON VASCULAR or ORGANIZED SARCOMA of Abernethy, *Emphy'ma Sarcoma Vasculo'sum*, is vascular throughout: texture simple: when bulky, mapped on the surface with arborescent veins. Found over the body and limbs gene- rally.

SARCOMA CERCOSIS, see Cercosis—s. Epulis, Epulis—s. Mastoid, Mammary sarcoma—s. Medullare, see Encephaloid—s. Medullary, Hæma- todes fungus—s. Pulpy, Hæmatodes fungus—s. Scroti, Sarcocele.

SARCOMPHALUS, from *σαρξ*, 'flesh,' and *ουφαλος*, 'the navel.' A scirrhus or fleshy tu- mour, developed at the navel.

SARCOPHAGUS, Carnivorus, Cathartic.

SARCOPHYIA, Excrescence, Sarcoma.

SARCOPE, Acarus.

SARCOMPTES SCABIEL. See Psora.

SARCOPYO'DES, from *σαρξ*, 'flesh,' *πυος*, 'pus,' and *ειδος*, 'resemblance.' Having the appearance of pus mixed with flesh. An epi- thet given to certain excreted matters, and par- ticularly to the sputa of those labouring under consumption.

SARCO'SIS, from *σαρξ*, 'flesh.' The forma- tion of flesh. Also, Sarcoma. (q. v.)

SARCOSTOSIS, Osteo-sarcoma.

SARCOTICUS, Incarnans.

SARCOUS, from *σαρξ*, 'flesh.' Of, or be- longing to, flesh or muscles—as "Sarcous tis- sue." Todd and Bowman.

SARDIASIS, Canine laugh, Risus sardon- icus.

SARDONIASIS, Canine laugh, Risus sardo- nicus.

SARE, Essera.

SARRASIN, Polygonum fagopyrum.

SARRIETE, *Satureia Hortensis*—s. de Crète, *Satureia capitata*.

SARSA, Smilax sarsaparilla.

SARSAPARILLA, Smilax S.—s. False, Ara- lia nudicaulis.

SARSAPARIL'LA GERMAN'ICA, *Græmen major*, *G. rubrum*, *Salsaparil'la Germanica*, *Carex Are- na'ria*, (F.) *Laiche*, *L. des Sables*, *Salsepareille d'Allemagne*. Family, Cyperoidæ. *Sex. Syst.* Mon- næcia Triandria. A plant, which grows plen- tifully on the sea-coasts of Europe. It has been recommended in some mucous affections of the trachea, in rheumatism, gout, &c.

SARTO'RIOUS, from *Sartor*, 'a tailor,' be- cause used in crossing the legs. *Suto'rius*, *Lon- gis'simus Fem'oris*, *Il'io-cresti'tibial*, *Fascia'tis*,

Mio-prétibial, (Ch.) A muscle, situate at the anterior part of the thigh. It is long, small, and flattened, and extends, obliquely, from the anterior and superior spine of the ilium to the superior and inner part of the tibia. This muscle can, also, bend the pelvis on the thigh, and conversely.

SARX, Flesh, Pulp.

SARZA, *Smilax sarsaparilla*.

SASSAFRAS, *Laurus sassafras*—s. *Medullæ*, see *Laurus Sassafras*—s. *Radiciæ Cortex*, see *Laurus Sassafras*—s. Swamp, *Magnolia glauca*.

SATELLITE, *Satelles*. That which guards:—that which is placed near

SATELLITE VEINS are those that accompany the arteries.

SATHE, Penis.

SATIETAS, Plesmone.

SATIETY, *Sati'etas*, *Satu'ritas*, *Plethos*, *Plesmonê*, from *satiare*, itself from *satis*, 'enough,' 'to give enough.' Disgust for food; commonly produced by repletion.

SATIN, *Lunaria rediviva*.

SATIRIASIS FURENS, *Satyriasis*.

SATURA'TION, *Satura'tio*, from *satis*, 'enough.' That state of a compound in which its elements are combined in such proportions that a fresh quantity of either cannot be added without producing excess.

SATUREIA HORTENSIS, *Satureia*, *S. sativa*, *Cunila sativa* *Plin'ii*, *Thymbra*, *Summer Sat'ory*, (F.) *Sarricete*. Family, Labiate, *Sex. Syst.* *Didynamia Gymnospermia*. An aromatic plant, cultivated for culinary purposes. It has been used, as an excitant, in anorexia, anaphrodisia, &c.

SATUREIA CAPITATA, *Ciliated Sa'vory*, *Thymus*, *Thymus sylvestris*, *Thymus Crelicus*, *Cunila*, (F.) *Sarricete de Crête*. Possesses similar properties to thyme.

SATUREIA SATIVA, *S. hortensis*.

SATURITAS, *Satiety*.

SATURNI DULCEDO, *Plumbi superacetes*.

SATURNUS, *Plumbum*.

SATYRIASIS, from *Satyrus*, 'a Satyr;' because the Satyrs are said to have been greatly addicted to venery. *Satyriasmus*, *Priapismus*, *Salac'itas*, *Brach'una*, *Ara'scon*, *Satiri'asis furens*, *Lagne'sis Salac'itas*, *Lagnesis furor masculinus*, *Tenti'go vere'tri*. An irresistible desire, in man, to have frequent connexion with females, accompanied with the power of doing so without exhaustion. The causes are commonly obscure. Sometimes, the abuse of aphrodisiacs has occasioned it. The principal symptoms are:—almost constant erection; irresistible and almost insatiable desire for venery; frequent nocturnal pollutions. Cold lotions; the cold bath; a mild diet; active exercise, &c., are the only means that can be adopted for its removal.

SATYRION, *Orchis mascula*.

SAUCE-ALONE, *Alliaria*.

SAUCE, GREEN, *Rumex scutatus*.

SAUER KRAUT, (G.) 'Sour Cabbage,' (F.) *Chou-croûte*. A culinary preparation, made with chopped cabbage, left to attain an incipient state of acetous fermentation. It is reputed by the Germans to be salubrious, easy of digestion, and eminently antiscorbutic.

SAUGE, *Salvia*—s. *des Bois*, *Teucrium scor-dium*—s. *Hornin*, *Salvia horminum*—s. *de Jerusalem*, *Pulmonaria*.

SAULE, *Salix*.

SAUMURE, *Muria*.

SAUNDERS TREE, *Pterocarpus santalinus*—s. Yellow, *Santalum album*.

SAURA, Lizard.

SAUVE-VIE, *Asplenium ruta muraria*.

SAVEUR, Savour.

SAVINE, *Juniperus sabina*.

SATINER, *Juniperus sabina*.

SAVON, Sapo—s. *Ammoniacal*, *Linimentum ammoniæ fortius*—s. *Cacao*, *Sapo coconeus*—s. *Culentre*, *Linimentum aquæ calcis*—s. *Dur*, *Sapo durus*—s. *Médicinal*, *Sapo medicinalis*—s. *Mou*, *Sapo mollis*—s. *Noir*, *Sapo mollis*.

SAVONNIER COMMUN, *Sapindus saponaria*.

SAVONULUS, *Saponulus*.

SAVORY, CILIATED, *Satureia capitata*—s. Summer, *Satureia hortensis*.

SAVOUR, *Sapor*, *Taste*, (F.) *Saveur*. Quality of bodies, by which they act upon the sense of taste. The taste is not the same in all sapid bodies. It may be sweet, bitter, metallic, &c. Chymists, at times, avail themselves of this quality of bodies to analyze an unknown substance.

SAVOUREUX, Savoury.

SAVOURY, *Sap'idus*, (F.) *Savoureux*. An epithet given to bodies that have taste; and particularly to those that excite a very agreeable impression on the organ of taste.

SAW, *Prion*, *Serra*, (Dan.) *Saue*, (Sax.) *paga*, (F.) *Scie*. A surgical instrument, made like a common saw; and used for sawing the bones in amputations, or for removing exostoses, &c. Saws, of different sizes and shapes, are used in surgery. The crown of the trepan is nothing more than a species of circular saw.

SAW, HEY'S. An instrument used by Mr. Hey, of Leeds, in fractures of the cranium. It consists of a long handle, to which a small saw with a convex, or straight edge is attached: and by which a piece of bone of any shape may be removed, whilst with the trephine it must always be circular.

SAXIFRAGA ANGLICA, *Peucedanum silaus*.

SAXIFRAGA CRASSIFOLIA, Family, *Saxifragæ*. *Sex. Syst.* *Dicandria Digynia*. The root of this species of Saxifrage has been extolled by Pallas, as pre-eminently antiseptic.

SAXIFRAGA GRANULATA, *S. alba*, *Sanic'ula*, *Sedum*, *White Saxifrage*, (F.) *Saxifrage granulée*. Recommended as diuretic and lithontriptic; but not used.

SAXIFRAGA RUBRA, *Spiræa filipendula*—s. *Vulgaris*, *Peucedanum silaus*.

SAXIFRAGE, BURNET, *Pimpinella saxifraga*—s. *Granulée*, *Saxifraga granulata*—s. *Meadow*, *Peucedanum silaus*—s. *White*, *Saxifraga granulata*.

SAXIFRAGUS, *Lithontriptic*.

SAXONICUS PULVIS. A powder, prepared with the roots of the wild and cultivated angelica; the *Asclepias vincetoxicum*, &c. It was considered, formerly, as an antidote.—*Pharm. Aug.*

SCAB, from *Scab'ies*, and *scabere*, 'to dig.' An incrustation, which forms upon a sore, owing to the concretion of the fluid discharged from it. An eschar, (q. v.)

SCABBY OR SCABBED; covered or diseased with scabs.

SCABIES, *Psora*—s. *Capitis*, *Porrigio lupi*.

nosa, Porrigo scutulata—s. Capitis favosa, Porrigo favosa—s. Fera, Ecthyma—s. Ferina, Psoriasis—s. Papuliformis, Prurigo—s. Sicca, Lichen—s. Sicca, Psoriasis—s. Venerea contagiosa, Scherlievo.

SCABIEUSE ORDINAIRE, Scabiosa.

SCABIO'SA, *S. Arven'sis*, *Field Scabious*, (F.) *Scabieuse ordinaire*. Family, Dipsacæ. *Sex. Syst.* Tetrandria Monogynia. The plant is bitter and substringent: and was formerly used in the cure of leprous affections and diseased lungs.

SCABIOSA ARVENSIS, Scabiosa—s. Carduifolia, Echinops.

SCABIOSA SUCCI'SA, *Succisa*, *Morsus Diaboli*, (F.) *Mors du Diable*, has similar properties.

SCABIOUS, Erigeron Philadelphicum—s. Field, Scabiosa.

SCABISH, *Oenothera biennis*.

SCABRITIES, Lichen.

SCALA, 'a ladder.' A machine, formerly used for reducing dislocations of the humerus.

SCALE OF THE COCHLEA, (F.) *Rampes ou Echelles du Limaçon*—called, also, *Canals* and *Gyri*—are the cavities in the cochlea, separated from each other by the spiral septum. The one—*Scala externa*, *S. Tympani*—would communicate with the cavity tympani by the fenestra rotunda, were it not for the membrane that closes it. The other—*Scala interna*, *S. vestibuli*—opens into the cavity of the vestibule. The scale communicate with each other by an opening at the top of the partition.

SCALA TYMPANI, see Cochlea—s. Vestibuli, see Cochlea.

SCALE, *Squama*, *Lepis*, (F.) *Écaille*. An opaque and thickened lamina of cuticle; commonly produced by some degree of inflammation of the true skin, over which it is formed.

SCALY DISEASES OF SQUAMÆ, *Lepidoses*, form the second order in Willan and Bateman's system of cutaneous diseases.

SCALE, Dry, Psoriasis.

SCALÈNE ANTÉRIEUR, *Scalenus anticus*—s. *Postérieur*, *Scalenus posticus*.

SCALE'NUS; 'irregular or unequal.' Geometers employ this word to designate a triangle whose three sides are unequal. Anatomists have given the name to two muscles. 1. *SCALÈNUS ANTICUS*, *Portion of the Costo-tracheal*, (Ch.) (F.) *Scalène antérieur*, is situate at the lateral and inferior parts of the neck. It is long and triangular; and is inserted, below, at the upper surface of the first rib; and, above, at the anterior tubercle of the transverse processes of the 3d, 4th, 5th, and 6th cervical vertebrae. This muscle bends the neck, and draws it to its side. It can, also, raise the first rib. 2. *SCALÈNUS POSTICUS*, *Portion of the Costo-tracheal*, (Ch.) is situate behind the last. (F.) *Scalène postérieur*. It is, also, long and triangular; but more bulky than the *S. anticus*. It is attached, below, to the outer surface of the first two ribs; and terminates, above, at the summit of the transverse processes of the last six vertebrae of the neck. This muscle bends the neck laterally, and can elevate the first two ribs. Some anatomists, as Albinus and Sömmerring, have described five scaleni muscles on each side, and have called them, *Scalenus prior*, *S. minimus*, *S. lateralis*, *S. medius*, *S. posticus*. Riolan and Chaussier only describe one scalenus muscle on each side. Cowper and Doug-

las, and the generality of English anatomists, admit three, *S. anticus*, *medius*, and *posticus*; or *Primus*, *secundus*, and *tertius*;—Winslow, Boyer, and many of the French anatomists,—two, as above described.

SCALL, Impetigo—s. Dry, Psoriasis—s. Milky, Porrigo larvalis—s. Honeycomb, Porrigo favosa—s. Running, Impetigo—s. Running Eczema.

SCALLED HEAD, Porrigo scutulata.

SCALP. Teut. *Schelppe*, 'a shell.' The integuments covering the head. The hairy scalp is called, also, *Capillitium*, *Trichotum*.

SCALPEL, *Scalpel'tum*, *Culter*, *Incisorium*, *Smileon*; from *scalpo*, 'I rasp, I cut.' A cutting instrument, formed of a blade of well-tempered steel, very sharp, of variable shape and size, and fixed solidly in a handle. Its use is to divide the soft parts in operations, dissection, &c.

SCALPELLUS, *Bistouri*.

SCALPRUM, *Raspatorium*—s. *Rasorium*, *Raspatorium*.

SCAMMA, Fossa.

SCAMMONÉE D'ALEP, *Convolvulus scammonia*.

SCAMMONIUM, see *Convolvulus scammonia*—s. *Syriacum*, *Convolvulus scammonia*.

SCAMMONY, *Convolvulus scammonia*—s. of Montpellier, *Cynanchum Monseliacum*.

SCAMNON HIPPOCRATIS, *Bathron*.

SCAMNUM HIPPOCRATIS, *Bathron Hippocrati'um* of Galen, (F.) *Banc d'Hippocrate*. A machine invented by Hippocrates for reducing fractures. It was a sort of bed, six feet long; on which the patient was fixed. Straps were attached above and below the fracture or luxation, and the extension and counter-extension were effected by a winch. It is described in Galen, Oribasius, Scultetus, &c.

SCANDIX CEREFOLIUM, *CerEOFOLIUM*, *Daucus Seprinius*, *Chærophyl'tum*, *Chæresfolium*, *Chervil*. (F.) *Cerfeuil*. Family, Umbelliferae. *Sex. Syst.* Pentandria Digynia. A culinary herb, which is slightly aromatic and grateful. It is said to be gently aperient and diuretic.

SCANDIX ODORATA; the *Sweet Cicely*. Properties the same as the other. Also, *Chærophyl'um odoratum*.

SCAPHA, *σκαφη*, 'a skiff or cock-boat;' from *σκαπτω*, 'I make hollow.' The excavation or cavity of the external ear, between the helix and anthelix. Also, the name of a bandage for the head, mentioned by Galen, and called, likewise, *Tholus Diocleus*.

SCAPHIA, Nates.

SCAPHION, Cranium, Papaver (capsule.)

SCAPHIUM OCULARE, *Pelvis Ocularis*, *Eye-glass*. (F.) *Bassin oculaire*, *Gondole oculaire*. A small porcelain, glass, or metallic vessel, used for applying lotions to the eye.

SCAPHO-CARPO-SUPER-PHALANGÆUS POLLICIS, *Abductor pollicis brevis*.

SCAPHOID, *Scaphoïdes*, from *σκαφη*, 'a skiff,' and *ειδος*, 'form.' A name given to several parts.

SCAPHOID FOSSA, *Fossa Scaphoides*, (F.) *Enfoncement Scaphoïde*. A small cavity at the upper part of the internal ala of the pterygoid process, in which the peristaphylinus internus is attached.

SCAPHOID BONE OF THE HAND, *Os Scaphoïdes Manus*, *Os naviculare*, *Boat-like bone*. (F.)

Scaphoïde de la main. The first bone of the first row of the carpus. The upper surface is convex, and articulated with the radius. The under and outer surfaces are also convex,—to be articulated with the trapezium and trapezoids. Between the upper and under cartilaginous surfaces, there is a *rough fossa* for the insertion of the capsular ligament. The anterior and inner surface has an *oval cavity*, where it is articulated with the os magnum, which gives name to the bone. There is a *process*, on the outer end of the bone, for the attachment of part of the anterior transverse ligament of the wrist.

SCAPHOID BONE OF THE FOOT, Os Scaphoides Pedis, Os naviculârê, Boat-like bone. (F.) *Scaphoïde du Pied.* This bone is situate at the forepart of the astragalus and inner part of the foot. The *posterior surface* forms a cavity, somewhat like that of a boat, for receiving the head of the astragalus. There is a prominence at the inner side of the bone, for the insertion of tendons, muscles, and strong ligaments. The forepart of the bone is convex, and divided into three articular surfaces for articulation with the ossa cuneiformia. Between the os naviculare and astragalus, the foot has its principal lateral and rotary motions; although each of the other joints of the tarsus contributes a little. Part of the tibialis posticus is inserted into it.

SCAPHOIDE DE LA MAIN, Os scaphoides manus—s. du Pied, Os scaphoides pedis.

SCAPHOÏDO-ASTRAGALAN, Scaphoïdo-astragalûnus. That which relates to the scaphoid bone and astragalus. The articulation of these bones is so called; and the ligament, which strengthens it is termed the *Scaphoïdo-astragalan ligament*.

SCAPHOÏDO-CUBOID, Scaphoïdo-cuboidæ-us. That which relates to the scaphoid and cuboid bones. The articulation of those bones is so called.

SCAPHULA, Navicularis fossa.

SCAPULA, Scap'ulum, Plata, Omopla'ta, Homopla'ta, Scop'tula, Epino'tion; the Blade-bone, the Shoulder-blade, (F.) Omoplate. An irregular, broad flat bone, of a triangular shape, situate at the posterior part of the shoulder. It has, 1. A *posterior or dorsal surface, or Dorsum*; divided transversely into two parts, by a triangular process, called *Spine of the Scapula*; which terminates by a considerable eminence, called *Acromion*. Above the spine, is the *Fossa supra-spinata*; below it, the *F. infra-spinata*. 2. An *anterior or costal surface, or venter*, forming the *Fossa subscapularis*. 3. A *superior or cervical edge*, which is thin, and terminates, anteriorly, by a strong, curved apophysis, called the *coracoid process*. 4. A *posterior or vertebral edge*, called, also, the *base*. 5. An *outer or axillary or inferior edge*, having a thick, truncated angle, in which is the *glenoid cavity*. With this is articulated the head of the humerus. The glenoid cavity is separated from the body of the bone by a narrower part, called the *cervix or neck*. The edges or margins are, also, called *Costæ*. The scapula has three angles—an *inferior, superior, and anterior*.

SCAPULA, Humerus.

SCAPULAR Scapula'ris, from scapula, 'the shoulder-blade.' That which relates or belongs to the scapula: *Scap'ulary*.

SCAPULAR APONEURO'SIS. A broad, thin, aponeurosis, with decussating fibres; which is attached, *above*, to the spine of the scapula; *below*, to a crest between the teres major and infra-spinatus; *within*, to the spinal edge of the scapula; and which, at its middle, unites with the thin aponeurosis, that covers a part of the external surface of the deltoid.

SCAPULAR ARTERIES. These are several. a. The *Superior scapular, Superficial scapular* of Sömmering, *Dorsa'lis scapulæ superior, Transversa'lis scapulæ, T. Hu'meri*. This arises from the subclavian; and often from the inferior thyroid, or from a trunk common to it and the *posterior scapular or transverse scapular or cervical*. It passes behind the clavicle, above the superior edge of the scapula, and buries itself between the dorsal surface of that bone and the muscles inserted into it. b. The *inferior scapular or common scapular, or internal scapular or subscapular artery, A. Thorac'ica axilla'ris vel ala'ris*, is of considerable size. It arises from the inferior part of the axillary artery, behind the brachial plexus—gives off several branches to the armpit, and divides into two branches:—the one, *Scapula'ris interna*, and the smaller of the two, is distributed, almost entirely, to the serratus major anticus, and latissimus dorsi; the other, the larger of the two, the *Dorsa'lis Scapulæ inf'erior vel Circumflexa Scapula'ris*, which distributes its branches to the subscapular and supra-spinal, and infra-spinal regions.

SCAPULAR VEINS follow the same course as the arteries,—which they accompany.

SCAP'ULARY, from scapula. A broad, linen bandage, divided into two tails for three quarters of its length, the undivided extremity of which is attached to the posterior and middle part of a bandage carried round the body; each of the tails passing over a shoulder; and being attached to the anterior part of the body bandage, to prevent it from slipping down.

SCAPULO-HU'MERAL. An epithet given to the *shoulder-joint*. It is an orbicular articulation, resulting from the reception of the head of the humerus into the glenoid cavity of the scapula. To keep the bones in connexion, there are: 1. A very strong, conoidal capsular ligament; passing from the circumference of the glenoid cavity around the neck of the humerus. 2. A *fibro-cartilaginous ring*, called the *glenoid ligament*, and a synovial capsule.

SCAPULO-HUMÉRAL, Teres major—s. Hu'méro-olecrani, Triceps extensor cubiti—s. Hyoidien, Omohyoideus—s. Radial, Biceps flexor cubiti—s. Trochitérien, grand, Infra-spinatus.

SCAPUS, Penis.

SCARABÆOLUS HÆMISPHERICUS, Coccus cacti.

SCAR'BOROUGH, MINERAL WATERS OF. *Scarborough Spa.* A celebrated English chalybeate, at Scarborough, in Yorkshire. One of the springs is a simple, carbonated chalybeate, like that of Tunbridge: the other has an admixture of purging salt. Scarborough, having the additional advantage of sea-bathing, is much frequented by invalids.

SCARIFICATION, Scarifica'tio, Am'ycheê, (Galen), Amyg'mos, Amyx'is, Schasis, Catachus'mos, Catuchas'mus, Enclarach'is, from ἀσκαίωμαι, 'to make a slight scratch.' A small

incision made into the skin with a lancet, bistoury, or scarificator, for different therapeutical purposes,—as to draw blood, or to discharge some effused fluid. When the scarifications are very superficial, and do not go farther than the skin, they are termed, by the French, *Mouchetures*.

SCARIFICA'TOR, *Scarificato'rium*. An instrument for making scarifications. It consists of a small brass box, of a cubical shape, in which 10 or 12 lancet points turn upon a common pivot. By means of a spring, all these blades can be made to issue at once, and make as many scarifications.

SCARIOLA, *Cichorium endivia*, *Lactuca scariola*.

SCARIOLE, *Cichorium endivia*.

SCARLATINA, from *scarlatto*, (1.) 'a deep red.' *Enanthē'sis Rosa'lia*, *Rosa'lia*, *Rossa'lia*, *Rubeolæ*, of some, *Morbilli ignei*, *Morbus scarlatino'sus*, *Febris scarlatino'sa*, *Gutturis morbus epidem'cus Foresti*, *Pur'pura*, *Typhus scarlati'nus*, *Febris rubra*, *Rash-fever*, (F.) *Fièvre rouge*. The characteristic symptoms of scarlatina are:—a scarlet flush, appearing about the second day of fever, on the face, neck, and fauces; and progressively spreading over the body; terminating about the 7th day. Two great varieties may be reckoned;—the *S. simplex*, *S. febris*, *S. benigna*, *S. sine anginâ*, in which the fever is moderate and terminates with the efflorescence; prostration of strength being trifling, and the contagious property slight;—and the *S. Angino'sa*, *S. Paristhmica*, *S. Cynanchica*, *S. mitior*, in which the fever is severe; the throat ulcerated; the eruption later in its appearance and less extensive; often changing to a livid hue; the fever being highly contagious. *Scarlatina maligna*, *S. gravior*, has been reckoned a variety of this, in its worst degree. It agrees with the *Cynanche maligna* of Cullen.

Scarlatina belongs to the *Major exanthemata*, (q. v.) and is a disease, chiefly, of children. The eruption differs from measles, in being an efflorescence, not raised above the cuticle. Measles, too, is attended with catarrhal symptoms, whilst the complication, in scarlatina, is cynanche. The treatment of simple scarlatina need not be much. It must be antiphlogistic. If the throat be very much ulcerated, acid gargles and counter-irritants must be employed; and if the affection become manifestly typhoid, and the sore throat of a malignant character, the case must be treated like typhus gravior; along with antiseptic gargles of bark, acid, &c. Anasarca, sometimes, supervenes on scarlatina, and requires attention. Purgatives are here demanded as well as the use of sorbefacients, such as mercury and squill, &c.

SCARLATINA ANGINOSA, see *Scarlatina*—*s. Benigna*, see *Scarlatina*—*s. Cynanchica*, see *Scarlatina*—*s. Febris*, see *Scarlatina*—*s. Gravior*, see *Scarlatina*—*s. Mitior*, see *Scarlatina*—*s. Miliaris*, *Rubeola*, *Roseolæ*—*s. Paristhmica*, see *Scarlatina*—*s. Pustulosa*, *Roseolæ*—*s. Pustulosa*, *Rubeola*—*s. Rheumatica*, *Dengue*—*s. sine Anginâ*, see *Scarlatina*—*s. Urticata*, *Urticaria*.

SCATACRASIA, *Scoracrasia*.

SCELALGIA PUERPERARUM, *Phlegmatia dolens*.

SCELETOLOGIA, *Skeletology*.

SCELETON, *Skeleton*.

SCELETUM, *Skeleton*.

SCELONCUS, *Phlegmatia dolens*.

SCÉLOS, *Leg.*

SCÉLOTYRBE, *Chorea*, *Porphyra nautica*—*s. Febrilis*, see *Subsultus tendinum*—*s. Tarantismus*, *Chorea*.

SCEPARNOS, *Ascia*.

SCEPTRUM, *Penis*.

SCHASIS, *Scarification*.

SCHASTERION, *Fleam*, *Lancet*.

SCHEBA ARABUM, *Artemisia santonica*.

SCHERBET', *Sherbet'*, *Serbet'*. A drink prepared by the Turks, Persians, &c. with sugar and the juice of acid fruits.

SCHERLIEVO, *Mal di Scherlievo*, *Mal di Breno*, *Mal di Fiume*, *Margaretizza*, *Morbus Croatus*, *M. fluminiensis*, *Falcadina*, *Malo di Scarlievo*, *Scabies venerea contagio'sa*. A name given to a particular form of syphilis, observed in Illyria. It is said to be capable of being communicated without immediate contact; and, that its principal symptoms are:—pains in the bones, ulceration of the fauces, pustules, and fungi in different parts of the body.

SCHERO'MA. A dryness of the eye from the want of lachrymal secretion.—Dictionaries.

SCHIAS, *Neuralgia femoro-poplitea*.

SCHIDAKE'DON, from *σχίζω*, 'I cleave.' A longitudinal fracture of a bone.—Galen.

SCHINDALESIS, *Schindylesis*.

SCHINDALMOS, *Schindylesis*.

SCHINDYL'SIS, *Schindal'sis*, *Schindal'mos*. An articulation of bones—by furrowing, as it were; as in that of the bones of the septum narium with each other. Also, the act of splitting into small pieces *Hippocr.*; from *σχινδύλω*, 'I split into small pieces.'

SCHINELÆ'ON, from *σχινος*, 'the mastic tree,' and *ελαϊον*, 'oil.' *O'leum lentis'cinum*. Oil of mastic.—Dioscorides.

SCHINOS, *Scilla*.

SCHISTOCEPH'ALUS, from *σχιστος*, 'cleft, separated,' and *κεφαλή*, 'head.' A monster having some part of the head cleft or fissured.—Gurli.

SCHISTOCORMUS, from *σχιστος*, 'cleft, separated,' and *κορμος*, 'trunk.' A monster having some part of the trunk cleft or fissured.—Gurli.

SCHISTOMELUS, from *σχιστος*, 'cleft, separated,' and *μελος*, 'a limb.' A monster, whose limbs are fissured.

SCHIZATRICH'IA, *Trichoschisis*, *Schizotrich'ia*, from *σχίζω*, 'a cleft,' 'a split,' and *τριχίς*, 'a hair.' The splitting of the hairs at their extremities.—J. P. Frank.

SCHLANGENBAD, **MINERAL WATERS OF**. *Schlängenbad* is a much frequented watering place in Germany. The waters contain a little carbonic acid, and carbonate of soda. Temperature 86° Fahrenheit.

SCHNEIDERIAN MEMBRANE, *Pituitary membrane*.

SCHENANTHUS, *Juncus odoratus*.

SCHOLA, *School*.

SCHOOL, *Schola*. A place of education (F.) *École*. In Europe, the large Medical Schools are usually attached to the universities. In England, however, there has been no medical school of celebrity at either of the universities of Oxford or Cambridge: owing greatly to their provincial situation. Of late, two schools have existed in London, attached to the London university—University college and King's college

Excellent private schools have, however, long existed in that metropolis. The medical schools of Europe which have been most celebrated are those of Edinburgh, Leyden, Berlin, Halle, Tübingen, Paris, Montpellier, Bologna, Padua, Pavia, and Pisa. In the United States, the medical schools are numerous; at this time, not fewer than 30 or 40. Those most numerous attended are the medical department of the University of Pennsylvania, Jefferson Medical College of Philadelphia, the medical department of Transylvania University, at Lexington, Kentucky, and the Louisville Medical Institute.

SCHOOLEY'S MOUNTAIN, MINERAL WATERS OF. The waters of this New Jersey Spring are chalybeate. According to Dr. McNeven, they contain extractive, chloride of sodium, chloride of calcium, chloride of magnesium, carbonate of lime, sulphate of lime, carbonate of magnesia, silex, and carbonate, and oxide of iron.

SCHOUSBÆA COCCINEA, Cacoucia coccinea.

SCHWALBACH, MINERAL WATERS OF. Schwalbach is a town of Germany, seated on the Aa, 32 miles west of Frankfort. The waters contain chloride of sodium, carbonates of lime and magnesia, iron, sulphate of lime, carbonic acid, and oxygen, &c. Employed as a tonic.

SCHWENDECK, MINERAL WATERS OF. These waters are about 5 leagues from Munich in Bavaria. They contain carbonic acid; carbonate and sulphate of lime, chloride of calcium; chloride of magnesium; carbonate of soda, and oxide of iron, and are much used for cutaneous affections.

SCIATIC, Ischiat'ic, Ischiat'icus, Sciaticus, from *ισχίον*, 'the haunch.' A word formed by contraction from *ischiatric*, which latter is still used. See Ischiatic.

GREAT SCIATIC NERVE, Great fem'oro poplite'al (Ch.), (F.) Grand nerf sciatique, ought to be esteemed a continuation of the sacral plexus. It issues from the pelvis between the pyramidalis and superior gemellus; descends along the posterior part of the thigh; and, after having given branches to the gemini, quadratus, obturator externus, glutæus maximus, semi-membranosus, semi-tendinosus, biceps and third adductor muscles, it divides, about the inferior third of the thigh, into two branches; the one, named the *external popliteal*; the other, the *internal*.

LESSER SCIATIC NERVE, Inferior glutæal branch of the sacral plexus, lesser fem'oro-poplite'al nerve, (Ch.) (F.) Nerf petit sciatique, which seems especially formed by the 2d and 3d sacral, is given off from the lower part of the plexus, and escapes from the pelvis beneath the pyramidalis muscle. It gives branches to the glutæus maximus,—a *sciatic branch* or *infra-pelvic cutaneous*, which passes under the tuberosity of the ischium, and furnishes filaments to the glutæus maximus, and to the muscles of the perinæum, urethra, penis, scrotum, &c.—and a *posterior femoral cutaneous branch*, the filaments of which traverse the femoral aponeurosis to be distributed on the skin of the posterior part of the thigh. The principal branch of the lesser sciatic nerve divides, near the ham, into two or three filaments, which descend

under the integuments almost as far as the inferior part of the leg.

GREAT SCIATIC NOTCH, or FORAMEN, (F.) Grande échancrure sciatique, ou grand trou sciatique, is a large notch, at the posterior edge of each os innominatum, below the posterior and inferior iliac spine, which is converted into a foramen by the sacrum and sacro-sciatic ligaments.

SCIATIC SPINE or Spine of the Ischium, or Spinous Proc'ess of the Ischium, is a short, flat, pyramidal eminence on the os innominatum, above the preceding foramen; which gives insertion to the lesser sacro-sciatic ligament.

SCIATICA, Neuralgia femoro-poplitæa.

SCIE, Saw.

SCIENTIA HERMETICA, Alchymy.

SCILLA, Scilla marit'ima, Aschil, Schinas, Oculus Typh'o'nis, Ornithog'alum marit'inum, Squillæ—the squill or sea onion.—The Eye of Typhon, (F.) Oignon marin. Family, Liliacæ. Sex. Syst. Hexandria Monogynia. Native of Spain, Austria, &c. The bulb or root of the squill has a bitter, nauseous taste, and is extremely acrid; inflaming the skin when rubbed on it. Its acrimony, on which its virtues depend, is destroyed by heat, drying, and keeping. It is extracted by vinegar, spirit, and water. In large doses, squill is emetic and purgative; in small doses, diuretic and expectorant. Its active principle has been called *scillitine*. Dose, gr. j to v of the dried root, united or not with mercury.

SCINCUS, σκινκος or σκινκος. A species of *Saurus* or *Lacer'ta*, common in Egypt, and much extolled, by the ancients, as alexipharmic and aphrodisiac.

SCINTILLA VEN'ERIS, 'a relic of Venus.'

A name given, by Paracelsus, to the impotence and loss of power in the limbs produced by syphilis.

SCIRRHE, Scirrhus.

SCIRRHOBLEPHARONCUS, Scleriasis.

SCIRRHOCELE, Scirrhus.

SCIRRHOMA, Scirrhus.

SCIRRHOSIS, Scirrhus.

SCIRRHUS SARCO'MA OF ABERNETHY. Emphy'ma sarcoma scirrho'sum. Hard, rigid, vascular infarction of glandular follicles; indolent, insentient, glabrous; sometimes shrinking and becoming more indurated. Found in glandulous structures.

SCIRRHUS TESTICULI, Sarcocèle.

SCIRRHUS, Squirrhus, Scirrho'ma, Scirrhosis, Induratio maligna, Scirrhocel'e, Scirrhus, Sclerus; from *σκινκος*, 'hard,' 'indurated,' (F.) *Squirre, Scirrhe, Skirre.* A disease, so called from the hardness that characterizes it. It is a state of induration, of a peculiar kind, affecting glandular structures generally, but capable of occurring in other textures. It usually precedes carcinoma, of which it may, indeed, be considered as the first stage. Scirrhus must not be confounded with the induration which succeeds inflammation, although the two states are often complicated, and may stand, occasionally, in the relation of cause and effect to each other. Scirrhus is ordinarily accompanied by violent, shooting pains. It is, also, irregular on its surface; and, when cut into, has a bluish or grayish white-colour. When the surgeon is satisfied of the existence of scirrhus, he had better remove it at once. No other treatment

seems to possess much advantage. Galen uses the term *Scirrhus* for a livid excrescence, caused by inflammation.

SCIRRUS INTESTINORUM, Enteropathia cancerosa.

SCISSARS, *Forfex*, *Forpex*, *Psalis*, *Tomis*. (F.) *Ciseaux*. A well known instrument in common use, and often employed in surgery. Scissors are composed of two cutting blades, crossing each other and moving upon an axis. They are *straight* or *curved*. Sometimes the curve is on the flat side, when they are called in France *Ciseaux à cuiller*; at others, on their edges. The scissors, bent so that the blades make an obtuse angle with the handles, are also much used. They are called in France *Ciseaux coudés*. Scissors are used for dividing soft, loose, isolated parts, which it would be difficult to reach and to cut with the bistoury. They are employed, likewise, in the operation for harelip, and for removing warts, fungous excrescences, &c.

SCISSURÆ, Rhagades.

SCISSURE DE GLASER, Fissure glenoid—s. de *Santerini*, *Santorini*, fissure of.

SCLAREA, *Salvia sclarea*.

SCLEREMIA, Induration of the cellular tissue.

SCLEREMUS, Induration of the cellular tissue.

SCLERIA, Scleriasis.

SCLERYASIS, *Sclero'ma*, *Sclero'sis*, *Scl'eria*, *Sclerys'mus*, from *σκληρός*, 'hard.' Any kind of hardness or induration. Sometimes hardness of the eyelids, *Callositas palpebrarum*, *Scirrhophepharon'cus*; at others, hardness of the genital organs of the female;—probably synonymous with *scirrhus*—Galen. Paulus.

SCLERODES, Sclerotic.

SCLEROMA, Scleriasis.

SCLERONYXIS, Scleriticonyxis.

SCLEROPHTHALMIA, Hordeolum.

SCLEROS, Hard.

SCLEROSARCO'MA, from *σκληρός*, 'hard,' and *σάρκωμα*, 'a fleshy tumour.' A hard, fleshy tumour, seated on the gums, and resembling a cock's comb.

SCLEROSIS, Scleriasis.

SCLEROTIC, *Sclerotic'a*; from *σκληρός*, 'I harden.' *Cornea opa'ca*, *Sclero'des*, *Tunica dura seu albugin'ea seu du'rrior et crass'ior seu ex'tima seu alba seu can'dida seu innomina'ta oc'uli*, *Sclero'tis*. (F.) *Sclérotique*, *Blanc de l'œil*. A hard, resisting, opaque membrane; of a pearly white colour and fibrous nature, which covers nearly the posterior four-fifths of the globe of the eye, and has the form of a sphere, truncated before. It is strengthened by the expansion of the muscles of the eye; to which expansion many anatomists have given the name *Tunica albuginea*. The sclerotic is penetrated, posteriorly, by a round opening, for the passage of the optic nerve, and, anteriorly, it has a much larger opening, into which the transparent cornea is received. There are, besides, many small oblong apertures in it for the passage of nerves and vessels, proceeding to the interior of the eye. In the fetus, the sclerotic may be separated into two very distinct laminæ.

SCLEROTICA CERATOIDES, Cornea.

SCLEROTICONYX'IS, *Scleronyx'is*, *Sclerotonyx'is*, from *σκληρός*, 'hard,' and *νύξ*, 'punc-

turing.' Perforation of the sclerotic in the operation for cataract by depression.

SCLEROTICUS, Indurans.

SCLÉROTIQUE, Sclerotic.

SCLEROTIS, Sclerotic.

SCLEROTITIS, *Inflamma'tio Sclerot'icæ*, *Sclero'titis atmospher'ica*, *Rheumat'ic Sclero'titis*, *Rheumat'ic ophthalm'ia*, *Ophthalmia arthrit'ica*, from *sclerotic'a*, and *itis*, denoting inflammation. Inflammation of the sclerotic coat of the eye.

SCLEROTITIS ATMOSPHERICA, Sclerotitis—s. Rheumatic, Sclerotitis.

SCLEROTIUM CLAVUS. See Ergot.

SCLERUS, Scirrhus.

SCLERYS'MA, from *σκληρός*, 'hard.' Induration; also, induration of the liver.

SCLERYSMUS, Scleriasis.

SCLIRUS, Scirrhus.

SCLOPETOPLAGÆ, Wounds, gunshot.

SCOBs, *Prisma*, *Xysma*, *Ramen'tum*, *Rasul'ra*. A shaving, also, an alkali; and the scoria of any metal.

SCODINEMA, Pandiculation.

SCOLECIASIS, Helminthiasis.

SCOLIO'SIS, from *σκολιός*, 'crooked.' A distortion of the spine. See Hump.

SCOLOPENDRIA, *Asplenium ceterach*.

SCOLOPENDRIUM OFFICINARUM, *Asplenium scolopendrium*.

SCOLOPOMACHÆ'RION, from *σκολοπαξ*, 'the woodcock,' and *μαχαίρα*, 'a knife,' so called because it is bent a little at the extremity, like a woodcock's bill. A sort of blunt-pointed bistoury.—Sculletus.

SCOLYMUS SATIVUS, *Cynara scolymus*.

SCOOP. Tent. *Schoepe*. *Cochled'rè*. (F.) *Curette*. A surgical instrument of the shape of a spoon, which is used for the extraction of certain foreign bodies. The scoop is often employed to extract balls, impacted in the soft parts; to remove calculi from the urinary bladder in lithotomy, &c. A small scoop is, sometimes, used to extract foreign bodies from the meatus auditorius externus, nasal fossæ, &c.

SCOPA REGIA, Ruscus.

SCOPARIUS, see *Spartium Scoparium*.

SCOPE, *σκοπη*, *Scopia*, *σκοπία*, *Scopos*, *σκοπος*, from *σκοπεω*, 'I look around.' A common suffix to words meaning 'view and inspection,' as *cranioscopia*, *stethoscopy*, &c.

SCOPTULA, Scopula.

SCOPULA, Brush.

SCOR, Excrement.

SCORACRA'SIA, *Scoracrat'ia*, *Scatacradsia*, *Scatacrat'ia*, *Copracrat'ia*; from *σκωρ*, 'the excrement,' and *ακρασιη*, 'debility.' Want of power to retain the feces. Involuntary evacuation of the feces.

SCORBUS, *Porphyra nautica*, *Purpura hæmorrhagica*.

SCORBU'TIC, *Scorbu'ticus*. That which belongs to scurvy. One affected with scurvy.

SCORBUTUS, *Porphyra nautica*—s. *Alpinus*, *Pellagra*—s. *Nauticus*, *Porphyra nautica*.

SCORDINEMA, *Carebaria*, *Pandiculation*.

SCORDINISMOS, *Pandiculation*.

SCORDIUM, *Teucrium scordium*.

SCORITH, Sulphur.

SCORODON, Allium.

SCORPION, *Scorpio*, from *σκορπιον*, 'I puncture.' A genus of insects, having a sting at the extremity of the tail, with which they make dangerous wounds. An Oil of Scorpion

was once made from them, which is not now used.

SCORTUM, Scrotum.

SCORZONE'RA, *S. hu'milis*, *Escorzone'ra*, *Viperaria*, *Serpentaria Hispanica*, *Offic'inal*, *Viper's grass*, *Viper's grass*, *Goat's grass*. Family, Cichoraceæ. *Sex Syst.* Syngenesia Polygamia. The roots have been used as alexipharmics, and in hypochondriacal disorders and obstructions of the viscera. The root of the *Scorzonera Hispanica* is esculent, but inefficacious as a drug.

SCOTASMA, Scotodynia.

SCOTODYN'IA, *Scotodin'ia*, *Scoto'mia*, *Dinus* *Scoto'ma*, *Scotoma*, *Scotod'ia*, *Tenebrico'sa verti'go*, *Scotos*, *Scotas'ma*, *Scoto'sis*, from *σκότος*, 'darkness,' and *διεω*, 'I turn round.' Giddiness, with impaired sight, often succeeded by headache. See Vertigo.

SCOTOMIA, Scotodynia.

SCOTOS, Scotodynia.

SCOTOSIS, Scotodynia.

SCOTT'S ACID BATH, *Nitro-muriatic acid bath*. A bath of dilute aqua regia, employed by Dr. Scott, of India, as a remedy in hepatic diseases. Three pints by measure of muriatic acid, and two of nitric acid, are mixed to form the aqua regia. In preparing this for use, a pint of it is mixed with an equal quantity of water. The acid bath consists of three ounces of this dilute acid to every gallon of water.

SCROBIC'ULUS, *Fossette*. A little ditch or furrow; diminutive of *Scrobs*, 'a ditch.'

SCROBIC'ULUS CORDIS, *Anticar'dium*, *Procar'dium*, (F.) *Fossette du cœur*, (q. v.) *Avant-cœur*, *Anticœur*. The pit of the stomach. The depression at the anterior part of the abdomen, below the xiphoid cartilage.

SCROF'ULA, *Scroph'ula*, *Scrophula*; from *scrofa*, 'a sow;' because swine were presumed to be subject to a similar complaint. *Scrophulo'sis*, *Morbus scrophulo'sus*, *Vitium scrophulo'sum*, *Cachex'ia seu Dyscrasia scrophulo'sa*, *Pædatorph'ia glandulo'sa*, *Struma*, *Chærus*, *Coiras*, *Tabes Glandularis*, *Chærus*, *King's evil*—*The Evil*. (F.) *Scrophules*, *Ecrouelles*, *Humeurs froides*, *Tubercules des glandes lymphatiques*. A state of the system, characterized by indolent, glandular tumours, chiefly in the neck; suppurating slowly and imperfectly, and healing with difficulty; the disease ordinarily occurring in those of a sanguine temperament, with thick upper lip, &c. The tumours, after suppuration, degenerate into ulcers; which, in process of time, cicatrize, leaving scars. The internal organs are apt to be attacked in those disposed to scrofula; hence they are often the subjects of phthisis and mesenteric affections. Scrofula is hereditary; and is, frequently, excited by insufficient or improper regimen, and by a close, confined air during the first years of existence. The best treatment is—to strengthen the system by animal diet; pure air, and exercise, cold bathing, or sea-water bathing, &c.

SCROFULAIRE, *Scrophularia nodosa*—*s. Aquatique*, *Scrophularia aquatica*.

SCROPHULES, *Scrofula*—*s. Mesentériques*, *Tabes Mesenterica*.

SCROPHULA, *Scrofula*—*s. Mesenterica*, *Tabes mesenterica*.

SCROPHULARIA AQUATICA, *Beton'ica aquatica*, *Fica'ria*, *Ferra'ria*, *Castran'gula*,

Greater Water Figwort, *Water Bet'ony* (F.) *Scrofulaire aquatique*. The leaves are celebrated as correctors of the bad flavour of senna. They were, at one time, regarded as eminently antiscrofulous, stomachic, and carminative.

SCROPHULARIA FETIDA, *Scrophularia nodosa*.

SCROPHULARIA MINOR, *Ranunculus ficaria*.

SCROPHULARIA NODOSA, *Figwort*, *Kennelwort*, *Scrophul'ria fa'tida*, *Scrophularia vulgaris*, *Millenoria*, *Scrophul'ria*, (F.) *Scrofulaire*, *Herbe aux écrouelles*. The root and leaves of this plant have been celebrated, both as an internal and external remedy, against inflammations, piles, scrofulous tumours, ulcers, &c.

SCROPHULARIA VULGARIS, *S. nodosa*.

SCROPHULOSIS, *Scrofula*.

SCROTOCE'LE. A hybrid term; from (L.) *Scrotum*, and *κύλη*, 'a tumour.' *Hernia Scrotalis*, *Scrotal hernia*. Inguinal hernia, descending into the scrotum—*Oscleocele*, (q. v.)

SCROTUM, from *scortus*, *scortum*, made of leather. (?) *O'scheon*, *Och'eus*, *Perin*, *Scortum*, *Marsup'ium*, *Bur'sula*, *Bursa test'ium seu vir'ilis*, *Cap'ulus*. (?) *O'scheus*, *Or'chea*, the *Purse*, *O'scus*, the *Cod*. (F.) *Les bourses*. The integuments which cover the testes. These are nothing more than a prolongation of the skin of the inner part of the thighs, perinæum, and penis. The skin is remarkable for its brown colour, for the numerous rugæ, especially when the scrotum is contracted; for the great number of sebaceous follicles it contains; and for the long and few hairs, which issue from it in the adult. The scrotum is divided into two equal parts by a raphe, which extends from the anus to the root of the penis. Its organization is similar to that of the skin of other parts of the body, except that the chorion is thinner.

SCRUPLE, *Diob'olon*, *Scr'ipulus*, *Scr'ipulum*. A weight of twenty grains, Troy; twenty-four grains, Poids de marc.

SCUDAMORE'S MIXTURE, see Mixture, Scudamore's.

SCURF, Sax. *scurf*, Teut. *Schorft*. *Furfura*. Small exfoliations of the cuticle are so called.

SCURFY, *Furfuraceous*.

SCURVY OF THE ALPS, Pellagra—*s. Land*, *Purpura hæmorrhagica*—*s. Petechial*, *Purpura simplex*—*s. Sea*, *Porphyra nautica*—*s. Grass*, common, *Cochlearia officinalis*—*s. Grass*, lemon, *Cochlearia officinalis*—*s. Grass*, wild, *Cochlearia coronopus*.

SCUTELLA, Cup.

SCUTELLARIA GALERICULA'TA, *Tertiana'ria*, *Skull-cap*, (F.) *Cusside bleue*. Family, Personæ. *Sex. Syst.* Didynamia Angiospermia. This plant has a bitter taste and a garlic smell. It has been esteemed especially serviceable in tertian ague.

SCUTICULA DIGITORUM MANUS, Phalanges of the fingers.

SCUTUM CORDIS, Sternum.

SCY'ALA, plural of *σκυζαλον*, 'dung.' *Enterolithus Scy'alum*, *Excrementa Alei sicci'ora*. Hard fecal matters, discharged in round lumps.

SCYPHOPHORUS PYXIDATUS, Lichen pyxidatus.

SCYPHIUS AUDITORIUS, Infundibulum of the Cochlea—*s. Cerebri*, Infundibulum of the

brain—s. *Viousseni*, Infundibulum of the Cochlea.

SCYROS, Callosity.

SCYTATIDES DIGITORUM MANUS, Phalanges of the fingers.

SCYTHICA, (RADIX,) Glycyrrhiza.

SCYTITIS, Cytitis.

SEA-AIR. The air, in the neighbourhood of the sea contains saline particles commingled with it, which render it a valuable change for scrofulous and debilitated individuals. The sea and sea-coast are usually, also, more equable in their temperature than places inland.

SEA-SICKNESS, *Nausea marina*—s. Water, see Water, Sea.

SEAL, SOLOMON'S, *Convallaria polygona*.

SEARCHING, *Sounding*; from (F.) *Chercher*. The operation of ascertaining whether a patient have a stone in the bladder, by the introduction of a metallic instrument.

SEASONING, Acclimation.

SEAT BONE, Ischion.

SEBA'CEOUS, *Seba'ceus*; from *sebum*, 'suet.' That which has the nature of suet.

SEBACEOUS GLANDS, FOLLICLES OR CRYPTS, *Miliary glands*, are small hollow organs of a rounded or pyriform shape, seated in the substance of the skin, and opening on its surface by a small, excretory duct; furnishing a yellow, unctuous humour, having some analogy with suet, which is destined to lubricate the surface of the body. Follicles of a similar nature exist around the corona glandis of the male, and under the skin of the labia majora and nymphæ of females. They secrete a sebaceous matter, which emits a peculiar odour; and, hence have been called *Glandulæ odoriferæ*.

SEBACEOUS FLUX, *Stearrhœa*.

SEBESTIER MYXA, *Sebestina*.

SEBESTINA, *Cordia myxa*, *Sebesten*, *Sebesten*, *Myxa*, *Cornus sanguinea*, *Prunus sebestena*, *Smooth-leaved Cordia* or *Assyrian plum*. (F.) *Sebestier myxa*. The dark, black fruit of the *Sebestina* possesses glutinous and aperient qualities, and is exhibited, in decoction, in various diseases of the chest.

SEBSTEN, *Sebestina*.

SEBUM, *Pinguedo*, *Sevum*.

SECA'LE. *S. cerealè*. The Rye Plant. (F.) *Seigle*. Rye is chiefly used as an article of diet, particularly in the northern parts of Europe, where a spirit is also extracted from it. The grain is disposed to acescency; and hence its internal use, at first, generally produces a laxative effect.

SECALE CORNUTUM, Ergot—s. *Luxurians*, Ergot.

SECALIS MATER, Ergot.

SECESSIO FÆCUM, Defecation.

SÈCHE, *Sepia*.

SECLUSORIUM, Sac.

SEC'ONDARY, from *secundus*, 'the second.' Something that acts subordinately to another; as the *secondary symptoms* of a disease; i. e. those which supervene on the *primary*.

SÈCONDINES, *Secundines*.

SECRE'TION. *Secrétio*, *Apoc'risis*, from *secer'nere*, 'to separate.' An organic function, which is chiefly executed in the glands, and consists in an elaboration or separation of the materials of the blood, at the very extremities of the arterial system, or rather of the vascular

secretory system; and which differs, in each organ, according to its particular structure; hence the formation of different fluids;—bile, saliva, urine, milk, &c. The secretions are of three kinds:—*exhalant*, *follicular*, and *glandular* (q. v.)

SECT, METHODOICAL, Methodists.

SECTIO ALTA, see Lithotomy—s. *Cadaveris*, *Autopsia cadaverica*—s. *Franconiana*, see Lithotomy—s. *Hypogastrica*, see Lithotomy—s. *Lateralis*, see Lithotomy—s. *Mariana*, see Lithotomy—s. *Nympharum*, *Nymphotomy*—s. *Renalis*, *Nephrotomy*—s. *Vesicalis*, *Lithotomy*.

SECTION, SIGAULTIAN, *Symphysotomy*.

SECUNDÆ, *Secundines*.

SECUNDINÆ, *Secundines*.

SECUNDINES. *Hystera*, *Deu'tera*, *Deu'teria*, *After-birth*, *Secundæ*, *Secundinæ*. (F.) *Arrière-faix*, *Sécondines*, *Délière*. All that remains in the uterus, after the birth of the child,—viz. the placenta, a portion of the umbilical cord, and the membranes of the ovum. These are, commonly, not expelled till some time after the birth of the fœtus; hence their name. See *Deliverance*.

SECUNDUS PROPRIORUM AURICULÆ, *Retrahens auris*.

SEDANTIA, *Sedatives*.

SED'ATIVES. *Pauonta*, *Sedan'tia*, *Adec'ta*, (F.) *Calman's*, *Temperants*, from *sedo*, 'I settle or assuage.' Medicines which directly depress the vital forces, and which are consequently employed whenever it is necessary to diminish preternaturally increased action. The chief reputed sedatives are: *Acidum Hydrocyanicum*, *Acidum Hydro-sulphuricum*, *Tabacum*, *Missio Sanguinis*, and certain gases by inhalation, as azote, carbonic acid, (?) carburetted and sulphuretted hydrogen.

SEDEM ATTOLLENS, *Levator ani*.

SEDES, Anus, Excrement—s. *Procidua*, *Proctocele*.

SED'IMENT, *Sedimen'tum*. Same etymon. (F.) *Dépôt*. A deposit, formed by the precipitation of some one or more of the substances held in solution or suspension by a liquid. That which is formed in urine, at the time of cooling, has been called *Hypostasis*, *Hypostéma*, *Residentia*, *Subsidentia*. This sediment or deposit varies in different states of the system. In calculous affections, it is one of the most important objects of attention.

SEDLITZ, MINERAL WATERS OF. *Seidlitz*, *Seidschütz* or *Seydschütz water*. Springs in Bohemia, near Prague, which are simple salines. They contain a large quantity of sulphate of magnesia, a little sulphate of soda and sulphate of lime, carbonic acid, carbonates of lime and magnesia, and a resinous matter. (?) They are employed, as purgatives, in a multitude of diseases.

SEDLITZ POWDERS may be formed of *Soda tartarizata* ʒij, *Sodæ carbon.* ʒij, in one paper *Acid tartaric.* gr. xxxv, in another. For half a pint of water.

SÉDON BRÛLANT, *Sedum*—s. *Reprise*, *Sedum telephium*.

SEDUM. *Sedum acre*, *Illece'bra*, *Vermicul'aris*, *Piper mur'dè*, *Sedum minus*, *Semperi'vum acre*, *Wall pepper*, *Stone crop*, *Ai'chryson*, *Æonion*. (F.) *Joubarbe acre*, *Orpin brûlant*, *Vermiculaire brûlante*, *Sédon brûlant*. Family,

Crassulaceæ. *Scz. Syst.* Decandria Pentagynia. In its recent state, it is very acrid, and proves both emetic and cathartic. Externally, in the form of cataplasm, it produces vesications and erosions. It has been recommended in cancerous and malignant ulcers.

SEDUM. *Saxifraga granulata*—s. *Majus*, *Sempervivum tectorum*—s. *Minus*, *Sedum*.

SEDUM TELEPHIUM. *Faba crassa*, *Cras'sula*, *C. Major*, *Illece'bra major*, *Tele'phium*, *Faba'ria cras'sula*, *Anacamp'seros*, *Orpine*. (F.) *Sédon reprise*, *Grand orpin*, *Fère épaisse*, *Joubarbe des vignes*, &c. Formerly used as a cataplasm in cuts, hemorrhoids, corns, whitlows, &c.

SEED. *Sperm.*

SEGRAY, MINERAL WATERS OF. Near Pithiviers, in Gâtinais, in the French department of Loiret, there is a chalybeate spring, which has some reputation.

SEIDLITZ. *Sedlitz*.

SEIDSCHÜTZ. *Sedlitz*.

SEIGLE. *Secale*—s. *Ergotée*, *Ergot*.

SEIN. *Uterus*, see *Mamma*.

SEIRIASIS. *Coup de soleil*.

SEKISKAYAVODKA. See *Spirit*.

SEL. *Salt*—s. *Admirable de Lemery*, *Magnesiæ sulphas*—s. *Admirable perlé*, *Soda*, phosphate of—s. *de Cuisine*, *Soda*, muriate of—s. *de Derosne*, *Narcotine*—s. *d'Egra*, *Magnesiæ sulphas*—s. *d'Opium*, *Narcotine*—s. *de Saturne*, *Plumbi superacetas*—s. *de Verre*, see *Vitrum*—s. *Volatil d'Angleterre*, *Ammoniac carbonas*.

SELAGO. *Camphorosma Monspeliaca*.

SELENE. *Moon*.

SELENIASIS. *Somnambulism*.

SELENIASMUS. *Somnambulism*.

SELENOGAMIA. *Somnambulism*.

SELERY. *Apium graveolens*.

SELF-HEAL. *Prunella*.

SEL'BRA. *Sembella*, half a pound. Six ounces, *Troy*; eight, *Avoirdupois*.

SELIN'TES. *σέλιντος*. Wine impregnated with the seeds of the *σέλινον* or *small-age*.—*Dioscorides*.

SELLA. *S. turcica*—s. *Equina*, *S. turcica*—s. *Sphenoidalis*, *S. turcica*.

SELLA TUR'CICA. *Ephipp'ium*, *Fossa Pituita'ria*, *Turkish Saddle*, *Cella Tur'cica*, *Sella*, *S. equi'na* seu *sphenoida'lis*. (F.) *Selle Turcique ou du Turc*. A depression at the upper surface of the sphenoid bone, which is bounded, anteriorly and posteriorly, by the clinoid processes; and lodges the pituitary gland. It is so called from its resemblance to a *Turkish saddle*.

SELLA TURCICA. *Pituitaria fossa*.

SELLE TURCIQUE. *Sella turcica*—s. *du Turc*. *Sella turcica*.

SELS NEUTRES. *Neutral salts*.

SELTZ or SELTZER, MINERAL WATERS OF. Cold, acidulous springs, the source of which is at Seltz, nine leagues from Strasbourg, and in the Department of the Bas-Rhin. They contain carbonates of lime, magnesia, and soda, chloride of sodium, and much carbonic acid. They are refrigerant, tonic, diuretic, and aperient.

ARTIFICIAL SELTZER WATER may be made from *muriat. acid. gr. xxxv*, *water Oj*, *white marble, gr. iij*. Stop up till dissolved. Add *carbonate of Magnesia, gr. v*, and, after some time, *subcarbonate of soda, gr. xxxij*. Close it till used.

SEMBELIA. *Selibra*.

SEMECARPUS ANACARDIUM, *Avicennia tomentosa*.

SEMEIOLOGY, *Semeiol'icé*; *Semeiology*, or *Semioticé*, from *σημειον*, 'a symptom,' and *λογος*, 'a discourse.' (F.) *Sémeiotique*. The branch of pathology whose object is an acquaintance with the signs of disease.

SEMEION BOETHEMATICUM, *Indication*.

SEMEIOSIS, *Semeiology*.

SEMEIOTIQUE, *Semeiology*.

SEMEN, *Sperm*—s. *Badian*, *Illicium anisatum*—s. *Cinæ*, *Artemisia santonica*—s. *Contra*, *Artemisia santonica*—s. *Contra vermes*, *Artemisia santonica*—s. *Masculinum seu virile*, seu *genitale*, *Sperm*—s. *Sanctum*, *Artemisia santonica*—s. *Zedoairiæ*, *Artemisia santonica*.

SEMENTINA, *Artemisia santonica*.

SEMI, from *ἡμιον*, 'half.' *Semi* or *demi*, in composition, universally signifies 'half'; both in French and English.

SEMICIRCULI OSSEI, *Semicircular canals*.

SEMICIRCULAR, *Semicircul'ris*. That which represents the half of a circle.

SEMICIRCULAR CANALS, *Canal'es semicirculares* seu *tubiformes* seu *circul'ares*, *Semicirc'culi ossei*, *Funes* seu *Canalic'uli semi-annul'ares*, (F.) *Canaux demi-circulaires*, are seated in the pars petrosa of the temporal bone, and open into the vestibule, behind which they are situated. They are three in number, of which one is *superior* or *vertical*; another *posterior* or *oblique*; and the third *exterior* or *horizontal*. Their parietes are formed of a bony, compact, hard plate. Their uses in audition are not known: at their termination they have the elliptical arrangements, called *ampul'læ*; and by both extremities they open into the vestibule, in the sac at its superior part—the *Sac'culus Ellip'ticus*, *Al'reus commun'is*. *Utriculus*, *Sinus* or *Al'reus utriculo'sus*, *Sacculus vestibuli* or *Median sinus*. In front of the S. ellipticus, nearer the cochlea, and opposite the foramen ovale, is the *Sac'culus spher'icus* or *sacculus*.

SEMICONGIUS. Half a gallon, or four pints.

SEMICUPPIUM, *Inses'sio*, *Inces'sio*, *Encathis'ma*, *Excathis'ma*, (F.) *Demi-bain*. A half-bath, or such as receives only the hips or extremities.

SEMICUPIUM, *Bath*, half—*Semi-fibulæus*, *Peronæus brevis*—*Semi-interosseus indicis*, *Abductor indicis*—*Semi-interosseus pollicis*, *Opponens pollicis*.

SEMILUNAR, *Semiluna'ris*, (F.) *Demi-lunaire* ou *Sémi-lunaire*, from *semi*, 'half,' and *luna*, 'the moon.' Having the shape of a half-moon.

SEMILUNAR CARTILAGES, or *Semilunar fibro-cartilages*, are two fibro-cartilages, which exist between the condyles of the os femoris and the articular surfaces of the tibia. The innermost, which is longer from before to behind than transversely, is nearly semicircular. The outermost forms almost an entire circle; an arrangement, in both cases, corresponding to the different surfaces of the tibia. They are thicker at their outer circumference, which is convex, than at the inner, which is concave and very thin. Both are inserted, before and behind, into the spine of the tibia, by means of fibrous fasciæ.

SEMI-LUNAR GANGLION,—*Ganglion abdominalē seu splanchnicum seu transversum seu solarē, G. suprēnal*, (Ch.) belongs to the great sympathetic. These ganglia present considerable variety, and are deeply situate in the abdomen, above and behind the supra-renal capsules. They correspond, posteriorly, to the pillars of the diaphragm and the aorta. They have the shape of a crescent reversed, often surrounded by other ganglia of a smaller size. —From their periphery the numerous filaments proceed, which go to the formation of the solar plexus.

SEMI-LUNAR VALVES, Sigmoid valves—*s. Masculus*, Eunuch.

SEMI-MEMBRANOSUS, *Ischio-popliti-femorāl, Ischio-popliti-tibial*, (Ch.) (F.) *Demi-membraneux*. A muscle situate at the posterior part of the thigh. It is flat, thin, narrow, and aponeurotic in its upper third; broader and fleshy in the middle, and tendinous below. It is attached above to the tuberosity of the ischium; and below—by a tendon, which has three divisions—to the outer condyle of the femur, and to the posterior and inner part of the internal tuberosity of the tibia. This muscle is a rotator inwards, and a flexor of the leg. It can also bend the thigh upon the leg. In standing, it maintains the pelvis in position, and can even draw it downwards.

SEMINERVOSUS, *Semi-tendinosus*—*Semi-orbicularis, Orbicularis oris*—*Semi-pestis*, Typhus.

SEMISEXIMUM, Hemiecton.

SEMI-SICILICUS. A weight of one drachm or three scruples.—*Rhodus*.

SEMI-SPECULUM. An instrument used for dilating the incision made into the neck of the bladder in the operation of lithotomy.—*Fabriceus Hildanus*.

SEMI-SPINALIS COLLI, *Transversus spinalis Colli, Spinalis cervicis, Spinalis Colli, Transversus Colli, Transverso-spinal*, (F.) *Demi-épineux ou transversaire-épineux du cou*. This muscle arises from the transverse processes of the six uppermost dorsal vertebræ, by an equal number of distinct tendons, which run obliquely under the complexus, and is inserted into the spinous processes of all the cervical vertebræ, except the first and last. Its action is, to extend the neck obliquely backwards and to one side.

SEMI-SPINALIS DORSI, *Semi-spinalis externus, Transversus spinalis dorsi, Semi-spinalis*, (Riolan,) *Transverso-spinal*, (F.) *Demi-épineux du dos, Transversaire-épineux du dos*. This muscle arises from the transverse processes of the seventh, eighth, ninth, and tenth dorsal vertebræ, by as many distinct tendons, which soon grow fleshy; and then, again, become tendinous, and are inserted into the spinous processes of the sixth or seventh uppermost dorsal, and two lowest cervical vertebræ, by as many tendons. Its action is, to extend the spine obliquely backwards.

SEMI-SPINALIS EXTERNUS, *Semi-spinalis dorsi*. **SEMI-SPINALIS INTERNUS**, *Transversalis dorsi*—*s. Spinatus, Longissimus dorsi, Semi-spinalis dorsi*.

SEMITENDINOSUS, *Semi-nervosus, Ischio-crēti-tibial, Ischio-prētibial*, (Ch.) (F.) *Demi-tendineux*. This muscle is situate at the posterior part of the thigh. It extends obliquely

downwards and inwards, from the tuberosity of the ischium—to which it is attached by a flat tendon, common to it and the biceps—as far as the posterior and inner part of the tibia, to which it is attached by means of another round tendon. Its fibres are commonly interrupted by an aponeurosis. Its uses are the same as those of the semi-membranosus.

SEMITERTIANA, *Hemitritæa*—*s. tierce, Hemitritæa*—*s. vir, Eunuch*.

SEMIL'LA DEL GUACHARO. Various kinds of hard and dry fruits, found in the stomachs of the young Guacharoës, a sort of nocturnal bird;—a celebrated South American remedy in ague.

SEMINA FRIGIDA MAJOR'A. The greater cold seeds. The ancients gave this name to the emulsive seeds of the cucumber, melon, gourd, and water-melon.

SEMINA FRIGIDA MINORA. The lesser cold seeds. The ancients gave this name to the seeds of the lettuce, purslane, endive, and chicory.

SEMINAL GRANULES, see Granule.

SEMINALIS, Spermatic.

SEMINIFEROUS, from *semen*, 'sperm,' and *fero*, 'I carry,' *Seminifer*. An epithet given to the vessels which secrete and convey the seminal fluid.

SEMIOLIOGY, Semeiology.

SEMIOTICE FACIEI, Physiognomy, Semeiology.

SEMPERVIVUM ACRE, Sedum.

SEMOLINA, *Manna croup*. This may be made by grinding wheat in an apparatus, separating the flour from the middlings: dressing the latter four different times in a bolting mill, and sifting through parchment sieves, until the product is perfectly freed from bran. In Poland it is called *Cracow groats*.

Semolina is generally imported into England from the Baltic, and in Russia is said to be manufactured from buckwheat. It has a granular form like some kinds of oatmeal, a dingy white colour, a farinaceous, somewhat insipid, taste, and is well adapted for the diet of children affected with derangement of the bowels.

SEMPERVIVUM TECTORUM, *House-Leek, Sedum majus, Aizoön, Beihalden, Bupthalmus, Barba Joris, Sengreen, Agriocin'ara, Andrachahara, Chrysospermum*, (F.) *Joubarbe des toits*. The leaves have a mild, subacid austerly, and are often applied to bruises and old ulcers.

SEMUNCIA, Hemiungion.

SENA, Cassia senna.

SENÉ, Cassia senna—*s. Faux, Colutea arborescens*.

SENECIO, *S. vulg'ris, Erig'erum, Cor'talon, Erigeron, Groundsel*, (F.) *Senecion commun. Family, Corymbifera. Sex. Syst. Syngenesia Polygamia Superflua*. A common plant in Europe; frequently applied, bruised, to inflammations and ulcers, as refrigerant and antiscorbutic.

SENECIO JACOBÆA, *Jacobæa, St. James' Wort, Ragwort*, (F.) *Jacobée*. The leaves have a roughish, bitter, subacid, and extremely nauseous taste. A decoction has been used in dysentery. A poultice of the leaves has been recommended in rheumatic affections; and a decoction of the root has been often employed in cases of wounds and bruises.

SENECON COMMUN, Senecio.

SENECTA AN'GIUM. The cast-skin of a serpent. A decoction of it is said to cure deafness!

SENECTUS, from *senere*, 'to be old.' *Gerus*, *Ætus mala*, *Old age*, (F.) *Vielleſſe*. The last period of life, commencing, according to some, at 60 years of age, but varying according to numerous circumstances. It is characterized by the progressive diminution of the physical and moral faculties.

SENECTUS ULTIMA, Decrepitude.

SENEGA, *Polygala senega*.

SENEGAL, GUM. The exudation from the *Mimosa Senegal* Family, Leguminosæ. *Sex. Syst.* Polygama Monœcia, which grows in the country of Africa, through which the river Senegal runs. It is in loose or single drops, much larger than Gum Arabic, or the gum which exudes from the cherry tree; and is much more difficult of solution than the former.

SENEGINE. See *Polygala senega*.

SENEKA, *Polygala senega*.

SÉNÉVÉ, *Sinapis*.

SENGREEN, *Seinpervivum tectorum*.

SENNA, *Cassia senna*—s. *Alexandrina*, *Cassia senna*—s. *American*, *Cassia Marilandica*—s. *Bladder*, *Colutea arborescens*—s. *Essence of*, prepared, *Selway's*, see *Infusum sennæ compositum*—s. *Italica*, *Cassia senna*.

SENS, *Sense*.

SENSATION, *Sensatio*, from *sentire*, *sensum*, 'to feel,' *Æsthéma*. An impression, caused by external bodies, on the organs of the senses, and transmitted to the brain, which appreciates it. It is not necessarily, however, confined to bodies external to us; for we can receive an impression by touching any part of our own body. The body which communicates the impressions, needs but to be external to the part impressed. Sensations are divided into *external*, *internal* and *morbid*. The *external* are communicated by the five organs of the senses. The *internal* are such as occur within the body, and arise from some alteration in the function of the part, for the time being. Hunger and thirst are internal sensations, as well as all the natural wants. *Morbid* sensations may be either internal or external.

SENSE, *Sensus*, *Æsthēsis*, (F.) *Sens*. Same etymon. A faculty, possessed by animals, of receiving impressions from external objects. (F.) *Sentiment*. The senses are five in number: sight, hearing, smell, taste, and touch. Of these, the first two and the last administer more to the intellect; and, hence, have been called, by some, the *intellectual senses*: the other two seem more destined for the nutrition of the body; and, hence, have been termed *corporeal* or *nutritive senses*. Other senses have been suggested—as the intense sensation experienced during the venereal act; a sense of heat and cold: a muscular sense, a common sense or *Cœnæsthesis* (q. v.) &c.

SENSES, NERVOUS SYSTEM OF THE, *Medulla oblongata*.

SENSIBILITAS ANOMALA, see *Irritable*—s. *Aucta*, see *Irritable*—s. *Morbosa*, see *Irritable*.

SENSIBILITY, *Sensibilitas*. Same etymon. *Æsthéma*. The faculty of receiving impressions, and having the consciousness of them. Bichat defines it as the property, possessed by living bodies, of receiving impressions, whether the individual be conscious of them or not. In the former case, where conscious, he calls the sensibility, *animal*; in the latter, where not, he

terms it *organic*. This last is common to vegetables and animals, and presides over nutrition, absorption, exhalation, secretion, &c. The other does not exist in vegetables: it is the origin of the sensations—olfaction, vision, gustation, audition, thirst, hunger, pain, &c. There are few parts of the animal body, but what are sensible,—if not in health—in disease. The free extremities of the hair, and nails, and the epidermis are not so. See *Insensibility*.

SENSORIUM, *Sensorium*.

SENSORIUM, *Sensorium commune*, *Organon sensorium internum*, *Sensorium*, *Emporium spirituum*, *Æstheterion*. The common centre of sensations.

SENSORY, *Sentient*.

SENSORY NERVES, are so called in contradistinction to *Motor nerves*.

SENTIENT, *Sentiens*, *Sensory*. *Feeling*.

SENTIENT EXTREMITIES OF NERVES, are their minute terminations in the organs.

SENTIMENT. See *Sense*.

SEPARATORIUM, from *separo*, 'I separate.'

A surgical instrument, for separating the pericranium from the skull.

A *Separatory*—*Vitrum Hypoclepticum*,—is, also, a pharmaceutical vessel for separating fluids of different densities from each other.

SEPEDOGENESIS, *Sepodogenesis*.

SEPEDONOGENESIS, *Sepedogenesis*, from *σπεῖδω*, 'putrescency,' and *γενεσις*, 'generation.' A septic disposition or tendency; such as is met with in typhus gravior.

SEPIA, *S. officinalis*, *Sepium*, *Præcipitans magnum*, *Cuttle-fish*, (F.) *Sèche*. The shell of the cuttle-fish has been used as an absorbent; and is often added to tooth powders.

SEPLASIA'RIOUS. A name formerly given to those who sold perfumes, ointments, &c. It is derived from *Sephisia*, the name of a public place at Capua, where these kinds of preparations were frequently sold.

SEPSIS, *Putrefaction*.

SEPTENARY, from *septem*, 'seven.' Consisting of seven. The septenary years, of the old believers in critical periods, were times at which, it was supposed, important changes might be expected to take place. The grand climacteric (q. v.) was fixed at 63, and it was considered, that if a person passed that age, he had well-founded expectations that his life might be protracted to 90.

SEPTENNIAD, *Climacteric*, (years.)

SEPTFOIL, *UPRIGHT*, *Tormentilla*.

SEPTIC, *Sep'ticus*, from *σπταιν*, 'to rot.' That which produces putrefaction. A substance which corrodes and disorganizes the soft parts without causing much pain.

SEPTINERVA, *Plantago*.

SEPTOPYRA, *Typhus gravior*.

SEPTUM, (F.) *Cloison*. A part intended to separate two cavities from each other, or to divide a principal cavity into several secondary cavities.

These septa are numerous in the human body. The chief are the following:—

SEPTUM CEREBELLI, *Falx cerebelli*—s. *Cerebri*, *Falx cerebri*—s. *Cochlea auditoriæ*, *Lamina spiralis*.

SEPTUM CORDIS, *Septum medium cordis*. The partition which separates the two ventricles of the heart.

SEPTUM ENCEPHALI, *Tentorium*.

SEPTUM LUCIDUM seu *pellucidum* seu *ten'uz* et *pellucidum* seu *medium* seu *Speculum lucidum* seu *Lapis specul'ris* seu *Mediast'num* seu *Diaphragma ventriculorum later'alium cer'e'br'i*, *Speculum*, *Septum median*, (Ch.) (F.) *Cloison transparente*. The soft portion or medullary substance, which separates the two lateral ventricles of the brain from each other. This septum is composed of two laminae; between which a small cavity exists, filled by a serous fluid, and called the *Fossa of Sylvius*, 5th ventricle of *Cuvier*, *Sinus of the median septum*, (Ch.) The brothers Wenzel are of opinion, that this cavity is lined by a peculiar membrane.

SEPTUM MEDIUM, S. lucidum—s. *Médian du cer'v'et*, *Falx cerebelli*—s. *Medium cerebri*, S. lucidum.

SEPTUM NARIUM, *Interseptum* seu *Dissepimentum*, seu *Interf'num*, seu *Discr'i'men*, seu *Imbrex*, seu *Diaphragma narium*, (F.) *Cloison des Fosses nasales*. The partition between the nares. It is formed by the vomer, the perpendicular plate of the ethmoid bone, and a cartilage of a triangular shape. These parts are lined by the pituitary membrane, which receives a considerable number of nerves and vessels.

SEPTUM PARVUM OCCIPITALE, *Falx cerebelli*—s. *Pellucidum*, S. lucidum—s. *Scala*, *Lamina spiralis*—s. *Staphylin*, *Velum pendulum palati*—s. *Tenue* et *pellucidum*, S. lucidum—s. *Thoracis*, *Mediastinum*—s. *Transverse*, *Tentorium*—s. *Transversum*, *Diaphragm*—s. *Vestibuli nervoso-membranaceum*, see *Labyrinth*.

SEQUESTRUM, from *seques'tro*, 'I separate.' The portion of bone, in necrosis, which is dead, and separated from the living bone; acting, whilst retained, as an extraneous body. When the sequester is superficial and small, it is called *Exfoliation*, (q. v.)

SERAPINON, *Sagapenum*.

SERAPIUM, Syrup.

SERBET, Scherbet.

SERICUM, *Silk*, from *Seres*,—the Thibetans probably—from whom it was first obtained. (F.) *Soie*. The thread spun by the *Bombyx Mori* or *Silkworm*. Silk is used by surgeons for ligatures, &c.

SERICUM ANGLICUM. See *Sparadrapum adhaesivum*.

SÉRIEUX, Serious.

SERIOUS, (F.) *Sérieux*, *Grave*. A term applied to diseases and symptoms that are attended with danger.

SERIS, *Cichorium intybus*.

SERMOUNTAIN, *Laserpitium album*.

SERO-COLITIS, see *Colitis*.

SERO-HEPATITIS, see *Hepatitis*.

SEROSITY, Serum.

SEROUS MEMBRANES, *Membranes*, serous.

SERPEDO, Psoriasis.

SERPENT, *Serpens*, *Anguis*, *Ophis*; from *serpo*, 'I creep.' A snake.

SNAKE BROTH was, at one time, recommended as a restorative.

Many serpents are venomous: and the bites of some fatal. See *Poisons*, (Table of.)

SERPENTARIA, *Aristolochia serpentaria*—s. *Minor*, *Arum maculatum*—s. *Gallorum*, *Arum dracunculatum*—s. *Hispanica*, *Scorzonera*.

SERPENTARÆ BRAZILIENSIS RADIX, *Caince radix*.

SERPENTINE, *Ophites*.

SERPENTINUS, *Ophites*.

SERPIG'INOUS, from *serpere*, 'to creep.' An epithet given to certain superficial ulcerations, which, as they cicatrize in one part, extend to another.

SERPIGO, *Herpes circinatus*, *Lichen Psoriasis*.

SERPOLET, *Thymus serpyllum*.

SERPYLLUM, *Thymus serpyllum*—s. *Citratum*, see *Thymus serpyllum*.

SERRA, Saw.

SERRAT'ULA AMA'RA, *Family*, *Cynaroccephalæ*. *Sex. Syst.* Syngenesia Polygamia æqualis. A species of *Sawwort*, recommended in ague.

SERRATUS ANTICUS MINOR, *Pectoralis minor*—s. *Major*, *Serratus magnus*.

SERRAT'US MAGNUS. So called from its serrated appearance; from *serra*, 'a saw.' *Serratus major ant'icus*, *Serratus major*, *Costo-basiscapulaire*, *Costo-scapulaire*, (Ch.) (F.) *Grand dentelé*. A very broad (especially anteriorly), thin, flat, irregularly quadrilateral muscle, situate at the sides of the thorax. It is attached, before, to the external surface of the first 8 or 9 ribs, by as many distinct digitations; and, behind, to the spinal edge of the scapula. The superior fibres are almost horizontal; the lower become gradually more and more oblique upwards and backwards. This muscle carries the scapula forwards, and causes it to execute a movement of rotation, which directs its inferior angle forwards, and the anterior upwards. When the shoulder is fixed, it raises the ribs.

SERRATUS POST'ICUS INFERIOR, *Dorso-lombocostal*, *Lombo-costal*, (Ch.) (F.) *Petit dentelé postérieur et inférieure*. A broader and thinner muscle than the following, but nearly of the same shape. It is situate obliquely, at the lower part of the back; and extends from the spinous processes of the last two or three dorsal vertebrae, and the first two or three lumbar, to the inferior margin of the last four false ribs. This muscle depresses the ribs, and thus concurs in expiration. It is an antagonist to the next.

SERRATUS POST'ICUS SUPERIOR, *Cervi'ciodorso-costal*, *Dorso-costal*, (Ch.) (F.) *Petit dentelé supérieur*. A flat, thin, quadrilateral muscle; situate obliquely at the posterior inferior part of the neck, and the superior part of the back. It passes from the posterior cervical ligament, the spinous process of the last cervical vertebra; from the spinous processes of the first two or three dorsal, to the second, third, fourth, and fifth ribs; into which it is inserted by as many digitations. It raises the ribs, and is, consequently, an inspiratory muscle.

SERTULA CAMPANA, *Trifolium melilotus*.

SERUM, *Sperm*.

SERUM, 'whey.' *Orrhos*, *Seros'ity*. The most watery portion of animal fluids, exhaled by serous membranes. It is a constituent part of blood, milk, &c.

SERUM OF THE BLOOD, (F.) *Sérum du Sang*, is the liquid, which separates from the blood, when coagulated at rest. It is of a greenish-yellow colour; viscid; slightly coagulable by heat, acids, and alcohol. It is composed of water; chloride of sodium; certain phosphates; gelatin; and albumen, constantly united to soda, almost in a saponaceous combination.

SÉRUM DU SANG, S. of the blood.

SERUM LACTIS; the *Serum of Milk, Whey*, (F.) *Sérum du lait*, (q. v.) *Petit lait*. That part of milk, from which the butter and caseous matter have been separated. It is a transparent, citrine-coloured liquid, containing sugar of milk, mucilage, acetic acid, phosphate of lime, and some other saline substances. It is used as a slightly nutritious diluent and refrigerant.

SERUM LACTIS HOFFMAN'NI, (F.) *Petit-lait d'Hoffmann*, is a name given to the liquid, resulting from treating with boiling water, milk which has been evaporated to an almost solid consistence. It is not much used.

RENNET WHEY is made thus: milk 2 pints; rennet $\frac{3}{4}$ ss, infused in a little hot water: mix and keep in a gentle heat for some hours, then strain.—Gray.

SERUM OF SEROUS MEMBRANES, *Serum membranarum serosarum*, *Water of Dropsy*, (F.) *Sérum des membranes séreuses*, *Eau des Hydro-piques*. It resembles the serum of the blood, especially in cases of hydrocele. The water of hydrothorax and ascites contains much less albumen—sometimes, enough to coagulate on the application of heat; at others, not.

SERVICE, MOUNTAIN, *Sorbus acuparia*—s. Tree, *Sorbus domestica*.

SERVETTE EN CARRÉ, *Couvrechef*.

SESAMOID, *Sesamoïdes*, *Sesamoïdes*, *Sesamoïdeus*, from *σάμωρ*, 'a grain of sesamum,' and *εἶδος*, 'resemblance.'

SESAMOID BONES are small bones, situate in the substance of tendons, near certain joints. Their number is various. They are commonly more in the male than female. Two are constantly met with beneath the metatarso-phalangeal articulations of the great toe. Sometimes, the articulations of other bones of the metatarsus with the phalanges of the toes have them likewise. In the hand, there are two before the metacarpo-phalangeal joint of the thumb. At times, they are met with in the other metacarpo-phalangeal articulations. Occasionally, two exist, behind the condyles of the femur, in the tendons of the gastrocnemii muscles. A considerable os sesamoideum is also met with in the tendon of the peronæus longus. These bones are commonly round, and flattened only on one surface, which is incrustated with cartilage. Their size is very variable, according to the joints in which they exist. Traces of sesamoid bones are not observed in infants: in them, they are replaced by small, cartilaginous concretions. They are developed by a single point of ossification; and are, like the patella (which is a true sesamoid bone,) composed of much cellular substance, covered by a thin layer of compact tissue. The use of these bones is,—to allow the tendon to be inserted into the lever at a greater angle; and, thus, enable the power to act more advantageously.

Riolan has given the name *Ossa sesamoidea* to two bony points sometimes met with;—the one at the outer side of the carotid canal of the temporal bone; and the other at the edge of the cavernous sinus, at the side of the internal carotid artery.

SESAMUM, see *Sesamum orientale*.

SESAMUM ORIENTALE, *Benne*, *Oily Grain*. The seeds of this African plant are cultivated in Georgia and South Carolina, where the negroes use them with Indian Corn as an article

of food. They yield a larger proportion of oil than any other vegetable; one hundred weight producing ninety pounds of oil, which is, at least, equal to Florence oil.

The *Benne Oil*, *Oleum Sesami*, is used in the southern States as a laxative. The leaves—*Sesamum* (Ph. U. S.)—afford, by infusion, an excellent mucilage.

SESCUNCIA, *Sesquincia*, *Hemolion*. An ounce and a half. See *Sesqui*.

SESELI, *Laserpitium siler*—s. *Ægopodium*, *Ligusticum podagraria*—s. *Creticum*, *Tordylum officinale*—s. *des Près*, *Peucedanum silaus*.

SESELI TORTUOSUM, *Seseli Massilien'se*, *Hartwort of Marseilles*. The seeds have a warm taste; and a greater degree of pungency than those of the *Laserpitium Siler*, which is the *Seseli* of the *Pharmacopœias*.

SESQUI. This word, joined with any number, weight, measure, &c., signifies one and a half; as *sesquigranum*, 'a grain and a half.'

SESQUINCIA, *Sesuncia*.

SETA EQUINA, 'a horse's hair.' *Hairworm*, *Helminthus Gordii*. A kind of worm, found in stagnant water, from 4 to 6 inches long, and twisted into various knots and contortions. Colour pale brown, with dark extremities. It is common in the intestines of the Laplanders; causing the *Colica Lapponica*, in which the gripings are, at times, exceedingly severe.

SETACEUM, *Seto*, *Seton*, from *seta*, 'a bristle.' A long strip of fine linen or cotton twist, passed through the skin and cellular membrane, to keep up an issue; or through suppurating cavities, between the fragments of fractured bones, &c., to fulfil certain indications. The term is, also, applied to the issue so established. The operation is simple. It consists in laying hold of a fold of skin, and passing a seton needle through it, with the thread attached. Every day a fresh portion of the thread is drawn through the sore. Setons are established in many diseases;—in obstinate ophthalmiæ, cephalalgia; epilepsy, thoracic and abdominal affections. &c.; but they are not as much used as formerly.

SETO, *Setaceum*.

SETON, *Setaceum*.

SEVADILLA, *Veratrum sabadilla*.

SEVATIO, *Steatoma*.

SEVRAGE, Weaning.

SEVUM, *Pinguedo*.

SEVUM, *Sebum*, *Stear*, *Adeps ovilli*. Suet, mut-ton suet. *Pinguedo*, (q. v.)

SEVUM PRÆPARATUM, *Sevum*, (Ph. U. S.)—*Ovilli Sevum Præparatum* or *prepared Suet*, (F.) *Graisse de Mouton, Suif*, is formed by cutting the suet in pieces: melting over a slow fire, and straining through linen. It is emollient, and is sometimes boiled in milk, ($\frac{3}{4}$ ij to Oj.) and used in diarrhœa and dysentery. Its principal employment is in the formation of plasters.

SEX, *Sexus*, *Genos*, *Physis*. The physical difference between male and female in animals and vegetables;—as the male sex, *Sexus potior*, *S. virilis*; the female sex, *Sexus sequior*, *S. muliebris*, *Alter Sexus*. In France, "the sex" means the female sex.

SEXTANS, *Sexta pars libræ*. The sixth part of a pound.—Galen.

SEXTARIUS. An ancient measure for li-

quid and solid substances. See Weights and Measures.

SEXTULA. The sixth part of an ounce.

SEX'UAL, from *sexus*, 'a sex.' That which relates to the sex; which characterizes the sex.

SEXUAL INTERCOURSE, Coition—s. Organs, Genital organs.

SEXUAL ORGANS are the genital organs; and SEXUAL FUNCTIONS, the genital functions.

SEYDSCHÜTZ WATER, Sedlitz water.

SHALLOT, Echalotte.

SHAMPOO'ING, *Massing*, (F.) *Massage*. A Hindoo process, which consists in pressing the body of the bather in a peculiar manner; cracking the various joints, and employing blows and friction.

'Kneading' consists in pressing alternately upon a part of the body to arouse the muscles to more energetic action. It is employed at times in dyspepsia.

SHEATH, Vagina.

SHELL LIQUID. See Calcis murias.

SHERBET, Scherbet—s. Orange, see Syrupus aurantii.

SHERRY, Sack, see Wine.

SHIN, *Ochrea*. The spine or anterior part of the tibia or leg. It is, also, called *Anticnemion*, and *Crea*.

SHINGLES, Herpes zoster.

SHORT, Sax. *recept*, from *reipnan*, 'to cut, to shear,' shored, *shor'd*, short, (F.) *Court*. A word used, by anatomists, in opposition to long; and to distinguish parts from each other that have otherwise the same name.

SHORT BONES, for example, are those in which the three dimensions—length, breadth, and thickness—are nearly alike; such are the vertebrae, bones of the carpus, tarsus, &c.

SHOULDER-BLADE, Scapula.

SHOW. See Parturition.

SHOW-CHOO. See Spirit.

SHOWERBATH. See Bath.

SHRUB. Perhaps from Arabic, *sharab*, 'syrup.' A compound of spirits, lemon juice, and sugar.

SHUD'DERING. *Frem'itus*, *Phryagma*, from (G.) Schauder, Schauer, (F.) *Frémissement*, *Tressaillement*. A peculiar sensation, felt either externally or internally; and which seems to be the result of a spasmodic movement of the parts in which it occurs. A slight feeling of cold sometimes accompanies it. It is, at times, the result of a moral cause, and is often the precursor of shivering.

SIAGON, Maxillary bone.

SIAGON'NAGRA, from *σάγων*, 'the jaw,' and *αγα*, 'a seizure.' A gouty or rheumatic affection of the joint of the lower jaw.

SIALACHUS, Salivation.

SIALAGOGUE, *Sialago'gus*, *Sialagogue*, *Ptyalagogue*, *Ptyas'magogue*, *Sali'rans*, *Apo-phlegmatisans per os*, from *σάλων*, 'saliva,' and *αγω*, 'I expel.' That which provokes the secretion of saliva. Pyrethrum and mercury are sialagogues. Sialagogues may be of two kinds: those which act through the circulation, and those which act immediately on the salivary organs. Mercury belongs to the former—the pyrethrum to the latter class. The chief sialagogues are armoracia, calamus, mezereum, pyrethrum, tabacum, and zingiber.

SIALISMA, Salivation.

SIALOLOG'IA, from *σάλων*, 'saliva,' and *λογος*, 'a discourse.' A treatise on the saliva.

SIALON, Saliva.

SIALORRHEA, Salivation.

SIALOSYRINGES, Salivary fistulae.

SIBARE, Phrenitis.

SIBBENS, *Sivrens*. An infectious disease in the mountainous parts of Scotland, viewed to be of the venereal kind. *Sivvin*, in the Keltic, means raspberry; and it is said that, in this affection, fungi appear like raspberries. From *sivvin*, the inhabitants have made, *siccin*, *sibbin*, *sibbens*, and *sivrens*. By some, this affection is regarded as a complication of the venereal and itch. In the Orkneys, *sibbens* means itch.—Jamieson.

SIBILUS, Tinnitus aurium.

SICCANT'IA, from *siccare*, 'to dry.' *Xerant'ica*. (F.) *Siccatis*. Drying medicines.—Galen.

SICCANTIA, Desiccantia.

SICCATIFS, Siccantia.

SICCATIO, Drying.

SICCHA'SIA, *σικχασία*, 'disgust,' (q. v.) A distressing disgust for food; such as is experienced by women with child.

SICIL'ICUM. A Roman weight of about two drachms.

SICK, Sax. *reoc*, *Æger*, *Ægro'tus*, *Nos'eros*, *Noso'des*, (F.) *Malade*. Labouring under disease. Such is its acceptance in old English, and generally in the United States. In England, it most commonly means, disorder of the stomach,—nausea.

SICKLY, *Morbo'sus*, *Valetudina'rius*, *Adyn'atos*, (F.) *Maladif*. One who is subject to be sick.

SICKNESS, FALLING, Epilepsy—s. of the Stomach, Vomiting.

SICLIUM, Sicilicum.

SICUA, Cupping-glass.

SICULA, Beta, Penis.

SICYEDON, Cauldon.

SIDE, PAIN IN THE, Pleurodynia.

SIDERA'TIO, *Sydera'tio*, from *sidus*, 'a star,' because the condition was thought to be produced by the influence of the stars. The state of one struck suddenly, without apparent cause, and as if by the influence of the stars. The ancients comprised, under this name, different morbid conditions, such as paralysis, apoplexy, and gangrene.

SIDERATIO, Apoplexy, Phrenitis—s. Ossis, Spina ventosa.

SIDERATION, Astrobolismos.

SIDERION, Ferramentum.

SIDERITIS, Teucrium chamæpitys.

SIDEROS, Ferrum.

SIDEROXYLON, Chrysophyllum cainito.

SIDHEE, see Gunjah.

SIDMOUTH, (CLIMATE OF.) Sidmouth is in Devonshire, England, on the sea-beach, at the mouth of the Sid. It is much frequented by invalids, both during the summer and winter. The climate is, however, damp, and subject to sea fogs.—Sir James Clark.

SIELISMOS, Salivation.

SIELON, Saliva.

SIFPLEMENT, (F.) from *siffler*, 'to whistle.' Whistling.

SIFPLEMENT MODULE, ou *chant des artères*, 'modulated whistling, or music of the arteries.' A kind of sound heard on auscultation, resembling, at times, the humming of certain insects.

The sound is chiefly met with in those labouring under chlorosis.

SIGAULTIAN SECTION, Symphyseotomy.

SIGE, Taciturnity.

SIGH, Suspirium.

SIGHT, Vision—*s.* Askew, *Dysopia lateralis*

—*s.* False, Metamorphopsia, Pseudoblepsia—*s.* Feebleness of, Amblyopia.

SIGILLUM SALAMONIS, Convallaria polygonatum—*s.* Virginitatis, Hymen.

SIGMATOID, Sigmoid.

SIGMOID, *Sigmoïdal*, *Sig'matoid*. That which has the form of the Greek S or C; from sigma and εἶδος, 'resemblance.'

SIGMOID CAVITIES or *Fossæ of the Ulna*, (F) *Caritès ou Fosses sigmoïdes*, are two notches at the upper part of that bone: one for the reception of the humerus; the other for that of the radius.

SIGMOID FLEXURE OF THE COLON is the turn the colon takes immediately before its termination in the rectum.

SIGMOID or SEMILUNAR VALVES, *Valvulæ Sigmoïdes*, *Processus Sigmoïdes*, (F.) *Valvules sigmoïdes ou semilunaires*, are three valvular folds, at the commencement of the pulmonary artery and aorta. These valves have the form of a crescent, when applied against the parietes of the vessel. When the blood is sent from the ventricles by their contraction, the valves are applied against the sides of the vessel; but, during the diastole of the ventricle, they are depressed, and prevent the blood from returning to the heart. At the middle of the convexity of each valve is a small, hard, triangular granulum, called *Corpusculum Arantii*, which completely closes up the passage. It is, also, called *Corpusculum Morgagnii*, and *C. Sesa-moïdeum*, (F.) *Globule d'Arantius*.

SIGN, *Signum*, *Semion*, (F.) *Signe*. Any present or past circumstance, afforded by the examination of a patient, or of matters concerning him, whence a conclusion may be drawn, regarding the nature and seat of his disease. The phenomena which precede the disease are called *anamnestic* or *commemorative signs*;—those which accompany it, are termed *diagnostic*, if they reveal the nature or seat of the disease;—*prognostic*, when they indicate its probable duration and termination.

SIGNATURE, *Signatu'ra*, *Signa'tio*, from *signum*, 'a sign,' (q. v.) *Episphagismos*. This term was applied in the Eastern countries, in the middle ages, to mystic characters of good or bad augury, with which it was pretended, that every one was marked by the star under which he was born.

SIGNATURES OF PLANTS meant certain peculiarities in their formation or colour, by which they were judged proper for particular diseases:—as in the case of the *Lungwort*, *Liverwort*, &c.

SIGNES AVANT-COUREURS, Precursory signs—*s.* *Précurseurs*, Precursory signs.

SIGNUM. See Parturition.

SILACH, *Silac*. An Arabic word, used to designate thickening of the eyelids, *Crassities Palpebrarum*; and, also, *Alopecia*.—Forest., Stephanus.

SILENE VIRGINICA, *Ground Pink*, *Catch Fly*. The root has been employed in decoction, as an efficacious anthelmintic.

SILER MONTANUM, *Laserpitium siler*.

SIL/IQUA, *Cerd'tion*; the carat. A weight of about four grains.

SILIQUA ARABICA, *Tamarindus*—*s.* *Dulcis*, *Ceratonium siliqua*.

SILIQUASTRUM PLINII, *Capsicum annum*.

SILK, *Sericum*—*s.* *Weed*, common, *Asclepias Syriaca*—*s.* *Worm*, see *Sericum*.

SIL/LO, *Sulcus*—*s.* *Horizontal de la reine ombilicale*, see *Liver*—*s.* *Transversale*, see *Liver*—*s.* *de la Veine cave inférieure*, see *Liver*—*s.* *de la Veine porte*, see *Liver*.

SILPHIUM, *Laserpitium*.

SILVER, *Argentum*—*s.* *Nitrate of, Argenti nitras*.

SILYBUM, *Carduus marianus*.

SIMAROUBA, *Quassia simarouba*—*s.* *Bitter*, *Quassia simarouba*—*s.* *Faux*, *Malpighia mourella*.

SIMARUBA, *Quassia simarouba*—*s.* *officinalis*, *Quassia simaruba*.

SIMITIUM, *Plumbi subcarbonas*.

SIMPLES. Medicinal herbs. One, skilled in simples, is called a *Simplist*, a *Rhizotomist*.

SIMPLISTS. See *Simples*.

SIMUS, *Camus*.

SINAPELÆON, from σινάπι, 'mustard,' and ελαιον, 'oil.' Oil impregnated with mustard.

SINAPIS, *Sinapis nigra*, *Napus*, *Eru'ca*, *Sinapē*, *Sinapi*. *Common Black Mustard*, (F.) *Moutarde noire*, *Sénéclé*, *Sance*. *Family*, *Cruciferae*. *Sex. Syst.* *Tetradynamia Siliquosa*. The seeds are inodorous, when entire; but, when bruised, the odour is very pungent; taste bitterish and arid. They yield their virtues to water, and afford a bland oil by expression. The seeds are stimulant, diuretic, emetic, and rubefacient. They are, sometimes recommended to be swallowed whole, in dyspepsia, torpor of the bowels, &c. Externally, they are applied in the form of cataplasm. See *Sinapism*.

White Mustard, *Sinapis Alba*, is also used medicinally. It is somewhat less pungent than the black. The distilled oil—*Oleum Sinapis*—is a powerful stimulant and rubefacient.

Whitehead's Essence of Mustard consists of oil of turpentine, camphor, and a portion of spirit of rosemary: to which is added a small quantity of flour of mustard. It is a celebrated embrocation for rheumatism, &c.

Whitehead's Essence of Mustard Pills consists of yellow resin and balsam of tolu, enough to make into pills.

SINAPISIS, *Bole Armenian*.

SINAPISMUS, from σινάπι, 'mustard.' A cataplasm, of which mustard forms the basis: and which is used for exciting redness, and acting as a counter-irritant. It is prepared by mixing flour of mustard and vinegar together to the due consistence. See *Cataplasma Sinapis*.

SIN'CIPUT, *Sincipital Region*, *Bregma*, *Syn'ciput*, *Mesoeranium*; the top of the head. The French use it synonymously with *vertex*. By some it is applied to the frontal region or forepart of the cranium. The parietal bones have been called *sincipital bones*, *Ossa sincipitis*.

SINDON, *ardor*, very fine linen. A small piece of rag, or a round pledget, supported by a thread at its middle, and introduced into the opening in the cranium, made by the trephine.

SINEW, *Tendon*.

SINGULTUS, *Lynx*, *Lygmus*, *Clonus Sin-*

gultus, Hiccough, Hiccup, (F.) Hoquet. A noise made by the sudden and involuntary contraction of the diaphragm, and the simultaneous contraction of the glottis, which arrests the air in the trachea. It is a symptom of many morbid conditions, and especially of gangrene, but occurs, frequently, in persons otherwise in good health.

SINUEUX, Sinuoux.

SINUOSITAS, Sinus.

SIN'UOUS, Sinu'ous, (F.) Sinueux, from *sinus*, 'a bay or curve.' An epithet given to certain ulcers, and especially to certain fistulæ, which are tortuous.

SINUS ARTERIOSUS, S. pulmonalis—s. Cavernæ, Cavernous sinus—s. Cavernosus, Cavernous sinus—s. Cerebri, Ventricles of the brain—s. Choroidien, S. quartus—s. Circularis, S. coronarius—s. Coronaire du cœur, see Cardiac veins.

SINUS, Sinu'sitas, Colpos, Abscon'sio, Eurycho'ria, (F.) Clapier. Any cavity, the interior of which is more expanded than the entrance. In this sense, anatomists have applied the term to cavities in certain bones of the head and face. It has been, also, applied to certain venous canals, into which a number of vessels empty themselves; such as the sinuses of the dura mater and of the spine; the sinus of the vena porta; uterine sinuses, &c.

In *surgery*, it means a long, narrow, hollow track, leading from some abscess, diseased bone, &c.

SINUSES OF BONES. All these form part of the nasal cavities. They are the frontal, sphenoidal, maxillary, &c. The name has also been given, occasionally, to the ethmoid and mastoid cells.

SINUS CORONA'RIVS, Sinus circula'ris, S. circula'ris Ridleyi. It surrounds, in a more or less regular manner, the pituitary fossa and gland, emptying itself into the corresponding cavernous sinus by each of its extremities.

SINUS COXÆ, see Cotyloid—s. Droit, S. quartus.

SINUS DEXTER CORDIS, Sinus venarum cordis, S. venosus, Succus venarum cavarum. The right auricle of the heart:—*Atrium cordis dextrum.* See Auricula.

SINUSES OF THE DURA MATER, Sinus seu Fistulæ seu Cavita'tes seu Ventriculi seu Tubuli seu Sanguiductus seu Receptacula Duræ matris are formed by a separation of the layers of the dura mater, which act as a substitute for the outer membrane of veins. Bichat admits only four great sinuses, of which all the others seem to be dependencies;—the *two lateral sinuses, the straight sinus, and the longitudinal sinus.* To the lateral sinuses belong,—the *petrous sinuses*, superior and inferior; the *transverse sinus*; the *cavernous sinuses*; the *coronary sinus*, and the *occipital sinuses.* To the straight sinus belongs the *inferior longitudinal.* The longitudinal sinus, properly so called, has no sinus under its dependence.

SINUS FALCIFORMIS INFERIOR, S. longitudinal, inferior—s. Falciformis superior, S. longitudinal, superior—s. Fourth, Torcular Herophili—s. Genæ pituitarius, Antrum of Highmore—s. Lacrymalis, Lachrymal sac.

SINUSES OF THE LARYNX, Ventricles of the larynx.

SINUSES, LATERAL, Sinus transver'si, S. mag-

nî, S. laterales, (F.) Sinus latéraux. Each of these sinuses, distinguished into right and left, begins at the torcular Herophili, or confluence of the sinuses, and terminates at the sinus of the jugular vein.

SINUS LATÉRAUX, Sinuses, lateral.

SINUSES, LONGITUDINAL, S. longitudina'les. These are two in number. 1. *SUPERIOR LONGITUDINAL SINUS, S. falciformis superior, S. triangula'ris, Sinus médian, (Ch.)* A long, triangular canal; convex above, concave below, which occupies the whole of the upper edge of the falx cerebri. It is broad behind, and much narrower before, where it commences by a *cul-de-sac*, at the crista galli of the ethmoid bone. It passes along the frontal or coronal crest, sagittal suture, and the vertical groove of the occipital bone. It receives several veins from the dura mater; and all those that are spread over the convex and plane surfaces of the two hemispheres of the brain. It discharges itself into the upper part of the torcular Herophili. 2. *INFERIOR LONGITUDINAL SINUS, Sinus falciformis inferior, Vena falcis cerebri.* This is much narrower than the last, and occupies the inferior edge of the falx cerebri, from its anterior third to the tentorium cerebelli, where it terminates, commonly by two branches, in the straight sinus.

SINUS MAGNI, Sinuses, lateral—s. Maxillary, Antrum of Highmore—s. Médian, S. Longitudinal superior—s. Median, see Semicircular canals—s. Muliebris, Vagina—s. Occipitalis anterior, Sinus transversus—s. Perpendicularis, S. Quartus—s. Pituitarii frontis, Frontal sinuses—s. Polymorphus, Cavernous sinus—s. Portarum, see Liver—s. Pudoris, Vagina—s. of the Pulmonary veins, Auricle, left—s. Renum, Pelvis of the kidney—s. Rhomboidal, Calamus scriptorius—s. of the Septum lucidum, Ventricle, fifth—s. Sinister cordis, S. pulmonalis—s. Sphenoidalis, Cavernous sinus—s. Straight, S. quartus—s. Superciliares, Frontal sinuses—s. Transversi, Sinuses, lateral—s. Triangularis, S. longitudinal superior—s. Utriculosus, see Semicircular canals—s. des Vaisseaux semina'les, Corpus Highmori—s. of the Vena cava, Auricles, right—s. Venarum cavarum, S. dexter cordis—s. Venarum pulmonalium, S. pulmonalis—s. Venosus, S. dexter cordis.

OCCIP'ITAL SINUS, Sinus occipita'lis. These sinuses commence at the sides of the foramen magnum ossis occipitis, and ascend—becoming broader and nearer each other—into the substance of the falx cerebelli, where they frequently unite. Each opens into the inferior part of the torcular Herophili. They receive the veins of the falx cerebelli of the dura mater, which lines the fossæ cerebelli, and of the posterior part of the cerebellum. Haller and Sömmering have given them the name of *posterior occipital sinuses*, to distinguish them from the transverse sinus, which they have called *anterior occipital sinus.*

SINUS PULMONA'LVIS, S. sinister cordis, Atrium cordis sinisterum, S. venarum pulmonalium, S. arterio'sus, Succus venarum pulmonalium. The left auricle of the heart. See Auricula.

SINUS QUARTUS, S. perpendicularis, Sinus choroidien (Ch.) Straight Sinus, (F.) Sinus droit. This sinus, triangular throughout; wide posteriorly; narrower anteriorly; slightly oblique downwards and backwards—passes along the

base of the falx cerebri, from the termination of the inferior longitudinal sinus to the torcular Herophili. It receives the inferior longitudinal sinus, the veins of the lateral ventricles or *venæ Galeni*, the superior cerebellous veins, &c.

SINUS TRANSVERSUS, *S. occipitalis anterior*. This sinus lies transversely at the anterior part of the basilar process of the occipital bone. It forms a communication between the two petrous sinuses, and the cavernous sinus of one side and those of the other. Its breadth is commonly very great. It is situate between two layers of the dura mater, and presents, internally, a kind of cavernous tissue.

SINUS UTERINI, *Uterine sinuses*. A name given to cavities, formed by the uterine veins in the substance of the uterine parietes. They are very large during pregnancy.

SINUSES OF VALSALVA are three depressions in the aorta and pulmonary artery, immediately opposite the semilunar valves. Their use is to leave the edges of the valves free, so that they can be caught by the reflux blood. Where the aorta is about to send off the first of its large branches, at the top of the thorax, it is of great size, and has been called the *Large Sinus of Valsalva*.

SINUSES, VERTEBRAL, (F.) *Sinus vertebraux*. Two great venous sinuses, different from those of the dura mater, which extend the whole length of the vertebral canal, from the occipital foramen to the end of the sacrum, behind the bodies of the vertebrae, before the dura mater, and at the sides of the posterior vertebral ligament. At their inner side, they communicate with each other by means of branches, which form true *transverse sinuses*. They are situate at the middle of the body of each vertebra, passing under the posterior vertebral ligament. They receive, at their middle part, the veins that arise in the spongy tissue of the vertebrae. By their external side, the vertebral sinuses communicate with the posterior branches of the vertebral, intercostal, and lumbar veins. At their posterior side they receive the veins, which creep on the prolongation of the dura mater that envelops the marrow.

SIPHILIS, Syphilis.

SIPHITA PARVA, Choreia.

SIPHIO URINÆ, Diabetes.

SIRA, Orpiment.

SIRIASIS, *Coup de Soleil*, Insolation, Phrenitis—*s. Egyptiaca*, *Coup de Soleil*.

SIRIUM MYRTIFOLIUM, Santalum album.

SIRIUS, Canicula.

SIRUP DE CAPILLAIRE, see *Adiantum capillus veneris*—*s. de Coralline*, see *Corallina Corsicana*.

SIRUP, Syrup.

SISON AMMI. *Family*, Umbelliferae. *Sex*, Syst. Pentandria Digynia. The plant that affords the *Anmi verum* of the shops. (F.) *Anmi des Boutiques*. The seeds were once used as a carminative.

SISON AMOMUM, (F.) *Anome faux*, is considered to be excitant and diuretic. It is the *field horehound*.

SISYMBRIUM MENTHRASTRUM, *Mentha aquatica*.

SISYMBRIUM NASTURTIIUM, *Nasturtium aquaticum*, *Latter odora tum*, *Crataegium*, *Cressi*, *Cardaminæ fontana*, *Water Cress*, (F.) *Cresson de fontaine*. *Family*, Cruciferae. *Sex*

Syst. Tetradynamia Siliquosa. *Water cresses* are commonly used in salad. They have obtained a place in the *Materia Medica* for their antiscorbutic qualities.

SISYMBRIUM SOPHIA; the *Herb Sophia*. *Sophia Chirurgo rum*, *Fliz* or *Flux weed*, (F.) *Sagesse des Chirurgiens*. It was once reputed to be antihelmintic, and valuable in hysterical affections. It is not used.

SITICULOSUS. See *Alternative*.

SITIS, Thirst—*s. Morbosa*, Polydipsia.

SITOS, Aliment.

SIMUM, *Sium nodiflorum*, *Creeping Water-parsnep*, (F.) *Berle nodiflore*. *Family*, Umbelliferae. *Sex*, Syst. Pentandria Digynia. It is stimulant, and supposed to be diuretic and lithontriptic. It is, sometimes, employed in cutaneous eruptions.

SIMUM NINSI. The plant whose root is called *Radix Ninsi*, *Ninzu*, *Nindsin*. This root was long supposed to be the same as ginseng, and it possesses similar, though weaker properties.

SIVVENS, Sibbens.

SKELETIA, Emaciation.

SKELETOLOGY, *Sceletolog'ia*, (F.) *Squeletologie*, from *σκελετος*, 'a skeleton,' and *λογος*, 'a discourse.' A treatise on the solid parts of the body. This part of anatomy comprehends *Osteology* and *Syn-desmology*.

SKELETON, *Scel'etum*, from *σκελετος*, *cadaver exsiccatum*, (F.) *Squelette*, *Skeleton*, a dried body; from *σκειλω*, 'I dry.' The aggregate of the hard parts of the body, or the bones. A skeleton is found in almost all animals, although it may not be always formed in the same manner. In some, as in the crustacea and testacea, it is wholly or partly *external*. In others, as in birds, the mammalia, &c., it is *internal*. It serves as a support for other organs. On it the general shape of the body and of its various parts is greatly dependent. When the bones are united by their natural ligaments, the skeleton is said to be *natural*; when articulated by means of wires, *artificial*.

SKELETOPCEIA, *Sceletopce'ia*, from *σκελετος*, 'a skeleton,' and *παιω*, 'I make.' The part of practical anatomy which treats of the preparation of bones, and the construction of skeletons. Bones are prepared to exhibit their conformation, structure, chymical composition, mode of development, and changes—the different cavities formed by their union; and to demonstrate their connexions, relations, modes of union, &c.

SKEVISCH, *Erigeron Philadelphicum*.

SKIN, Cutis.

SKIN-BOUND DISEASE, Induration of the cellular tissue.

SKIRSE, Scirrhus.

SKUE-SIGHT, Dysopia lateralis.

SKULL CAP, *Scutellaria galericulata*.

SKUNK CABBAGE, *Dracontium foetidum*.

SLATE, IRISH, Hibernicus lapis.

SLATERS, Onisci aselli.

SLATKAIA TRAVA. See Spirit.

SLAVERING, from *saliva*; *Ptyalis musiners*, *Dried'elling*, (F.) *Bare*. Involuntary flow of saliva, from sluggishness of deglutition, without increased secretion. It is seen in the infant, the aged, and the idiot.

SLEEP, Sax. flep; *Somnus*, *Sompnus*, *Sopor*, *Dormitio*, *Hypnos*, (F.) *Somnucil*. Temporary interruption of our relations with external ob-

jects. A repose of the organs of sense, intellectual faculties, and voluntary motion.

The act of quitting this condition is called *awaking*, (F.) *Éveil*, *Reveil*. Sometimes this is progressive and natural; at others, sudden and starting, (F.) *Reveil en sursaut*, as in nightmare, affections of the heart, hypochondriasis, &c.

SLEEPLESSNESS, *Insomnia*.

SLEEP-WALKING, *Somnambulism*.

SLING, (G.) *Schlinge*, *Mittel*. A bandage, employed to keep the forearm bent on the arm, in cases of injury done to those parts, in fracture of the clavicle, injury of the hands, &c. A handkerchief is often sufficient for this purpose. It must be folded diagonally, and be tied, by the extremities, round the neck. The French surgeons have used many varieties of *Echarpes* or *slings*; as the *Grande écharpe*, *Echarpe moyenne*, *Petite écharpe*, *Echarpe de J. L. Petit*, &c.

SLIT AND TAIL BANDAGE, *Invaginated bandage*.

SLOE TREE, *Prunus spinosa*.

SLOUGH, *Eschar*.

SLUG, *Limax*.

SLUMBER, *Somnolency*.

SMALLAGE, *Apium graveolens*.

SMALL-POX, *Variola*—s. *Modified*, *Varioloid*.

SMALT, *Protoxide of Cobalt*, *Smaltum*, *Safr*, *Azur*, *Blue Starch*. This oxyd has been given in rheumatism, in the dose of ten to twenty grains. A larger quantity excites vomiting.

SMARAG'DUS, (F.) *Émeraude*. The emerald. It was formerly regarded as a tonic.

SMECTICA, *Detergents*.

SMECTIS, *Cimolia terra*.

SMECTRIS, *Cimolia terra*.

SMEGMA, *Sapo*—s. *Articulare*, *Synovia*.

SMELL. SENSE OF, *Olfaction*.

SMELLING, *Olfaction*.

SMILAX, *Taxus baccata*—s. *Aspera Chinen-sis*, *S. China*—s. *Aspera Peruviana*, *S. sarsaparilla*.

SMILAX CHINA, *China*, *China orientalis*, *Sankira*, *Gauquara*, *Smilax aspera Chinen-sis*, *China Root*, (F.) *Squine*, *Esquine*. Family, *Smilacæ*. *Sex. Syst.* *Diccia Hexandria*. Formerly much used in cutaneous and venereal affections.

SMILAX INDICA SPINOSA, *S. pseudo-China*—s. *officinalis*, *S. sarsaparilla*.

SMILAX PSEUDO-CHINA, *Smilax Indica spinosa*, *China occidentalis*, *China spuria nodosa*; *American* or *West India China*. In scrofulous disorders, the root has been often preferred to the oriental kind. In other cases, it possesses similar virtues.

SMILAX SARSAPARILLA, *S. officinalis*, *Sarsaparilla*, *Smilax aspera Peruviana*, *Sarza*, *Sarsa*, *Caritillan-di*, *Ira Pecan-ga*, *Macapatli*, *Zarsa*, *Zarzaparilla*, (America.) (F.) *Salsepaille*. The root of the Sarsaparilla is inodorous; taste bitterish, feculaceous, and fibrous. It is of a dark colour externally; white within. It is possessed of diuretic and demulcent properties, and has been often employed in the sequelæ of syphilis; when, after a mercurial course, nocturnal pains, ulceration, &c., continue. It has also been advised in scrofula, chronic rheumatism, &c.; but its efficacy is, to say the least of

it, a matter of doubt. Dose, ʒj to ʒj of the powder.

SMILE, *σμήλη*. A curved, two-edged bistoury. A knife, (q. v.)

SMILEON, *Scalpel*.

SMYRNA. *Myrrha*.

SMYRNISMOS, *Embalming*.

SMYRNIUM OLUSATRUM, *Hipposeli-num*, *Smyrnum*, *Macerona*, *Macedonismum*, *Herba Alexandrina*, *Grælum*, *Agrioselinum*, *Alexanders*. A plant, formerly cultivated for culinary purposes. The seeds are bitter and aromatic, and the roots more powerfully bitter. They have been recommended as resolvents, diuretics, emmenagogues, &c.

SNAIL, *Limax*—s. *Shell*, *Cochlea*.

SNAKEROOT, *BLACK*, *Actæa racemosa*—s. *Button*, *Eryngium aquaticum*—s. *Canada*, *Asarum Canadense*—s. *Virginiana*, *Aristolochia serpentaria*.

SNAKEWEED, *Polygonum bistorta*.

SNEEZEWORD, *Achillea ptarmica*.

SNEEZING, from *Sax. nieran*. (G.) *Niesen*, *Clonus Sternutatio*, *Sternutatio*, *Sternutamentum*, *Ptarmos*, (F.) *Éternuement*. A convulsive motion of the expiratory muscles, by which the air is driven rapidly, and rushes sonorously, through the nasal fossæ, carrying with it the mucus and foreign bodies, which adhere to the pituitary membrane, and which have occasioned the movement.

SNORING, *Ronchus*, *Rhonus*, *Stertor*, *Renchus*, (F.) *Ronflement*, from (G.) *scharnen*. Noise made in the posterior part of the mouth and nasal fossæ during the movements of inspiration, particularly in sleep, both when the person is in health, and in disease, as in apoplexy. In certain affections of the chest—in some cases of pulmonary catarrh—a kind of snoring may be distinctly heard by applying the ear, or the stethoscope, to the chest.

SNOW, *Sax. rnaß*, *Niz*, *Chion*, (F.) *Neige*. Water, in a solid state, which falls from the atmosphere in white flakes. It is used externally, as a tonic and discutient.

SNUFF, *CEPHALIC*, *Pulvis asari compositus*.

SNUFFLES, *Teut. Snuffeln*, *Grædo neonatorum*, *Rhinangia*, *Rhinanch'onæ*. Breathing hard through the nose. An affection to which infants are liable. It is relieved by oiling the interior of the nostrils.

SOAP, *Sapo*—s. *Berries*, *Sapindus saponaria*—s. *Castile*, *Sapo durus*—s. of the *Cocoa-nut* oil, *Sapo coqueus*—s. *Common* or *soft*, *Sapo mollis*—s. *Medicinal*, *Sapo medicinalis*—s. *Spanish*, *Sapo durus*.

SOAPWORT, *Saponaria*.

SOB, from *Sax. soefian*, 'to grieve.' (F.) *Sanglot*. A spasmodic, sudden, and momentary contraction of the diaphragm, immediately followed by relaxation; by which the little air, that the contraction has caused to enter the chest, is driven out with noise. It is an evidence of corporeal or mental suffering.

SOBRIETAS, *Temperance*.

SOCIA PAROTIDIS. See *Parotid*.

SOCIETY, *Societas*, (F.) *Société*, from *sociare*, 'to associate.' An association for the promotion of some common object.

MEDICAL SOCIETIES, or associations of medical gentlemen for the promotion of science, have been numerous, and productive of valua-

ble results. In the United States, societies exist in many of the States, possessing the power of examining into the qualifications of every one who may be desirous of practising within their particular jurisdiction. In some of the States, however, the qualified and unqualified are permitted to exercise their profession with equal privileges and immunities.

Amongst the medical associations, that have published from time to time their useful transactions, are the following: **IN AMERICA.**—The *Massachusetts Medical Society*; the *Physico-medical, and Medical Society of the State of New York*; the *College of Physicians of Philadelphia*. **IN EUROPE.**—The *Association of Fellows and Licentiates of the King's and Queen's College of Physicians of Ireland*; the *Medico-Chirurgical, and Phrenological Societies of Edinburgh*; the *College of Physicians, the Medico-Chirurgical, and Medical Societies of London*; the *Associated Apothecaries and Surgeon-Apothecaries of England and Wales*, and the *Provincial Medical and Surgical Association*; the *Royal Academy of Surgery*, the *Royal Society of Medicine*, the *Société Médicale d'Émulation*, the *Société de Médecine*, the *Royal Academy of Medicine*, and the *Société Médicale d'Observation, of Paris*; the *Medico-Chirurgical Academy of Vienna*; the *Medical Societies of Berlin and Copenhagen, &c.*, &c. **IN ASIA.**—The *Medical and Physical Society of Calcutta*.

Valuable medical essays are likewise contained in the published *Transactions of the American Philosophical Society*; of the *Royal Societies of London, Edinburgh, Göttingen, &c.*; of the *Royal Academy of Sciences of Paris*; the *Imperial Society of Sciences of St. Petersburg*; the *Royal Academy of Sciences of Turin*; the *Academia Imperialis Leopoldina Naturæ Curiosorum, &c.*

SODA. An Arabic word. *Soda impura*, *Barilla*, *Bariglia*, *Barillor*, *Soda Hispanica*, *Andron*, *Natron*, *Andon*, *Natron Antiquum*, *Kelp*, *Aphronitrum*, *Sal alkali nus fixus fos'silis*, *Carbonas Sodæ impurus*, *Subcarbonas Sodæ impura*, *Anchton*. The mineral alkali, as soda is termed, is obtained from several sources;—naturally, in Egypt: artificially, from the incineration of marine plants; and from the decomposition of sulphate of soda, &c. It is principally, however, derived from plants growing on the sea-coast;—as the *Salso'la sativra*, *S. soda*, *S. tragus*, *Salicornia herba'cea*, *Salicornia Arabica*, &c. The *Barilla* ashes are from the ashes of the *Salicornia Europæa*:—the *Kelp*, *Soude de Varec*, from the *Fucus vesiculosus* and other varieties:—the *Turkey Barilla*, *Rouquette*, *Cendre du Levant*, *Rochet'la Alexandrina*, from the *Mesembryanthemum Capitatum*;—the *Alicant Barilla*, *Soda Alicanti'na*, *S. Almonensis*, from the *Mesembryanthemum nodiflorum*;—and the *Carthagena Barilla*, from the *Salicornia* and *Salso'la*.

Impure subcarbonate of soda, (F.) *Soude du commerce*, consists of subcarbonate of soda, potash, chloride of sodium, clay, and other earthy substances. It is chiefly used for preparing the pure subcarbonate.

SODA, Cardialgia, Pyrosis.

SODA ACETATA, *Sodæ Acetas*, *Ac'etate of Soda*, *Terra folia'ta minera'lis*. This salt is used in similar cases with the acetate of potass.

SODA ARBATA, *Sodæ carbonas*—s. *Alonensis*,

Soda—s. *Bicarbonate of Soda*, *carbonas*—s. *Boraxata*, *Borax*.

SODA, CARBONATE OF, *Sodæ Carbonas*, *Carbonus Natricum*, *Soda Aera'ta*, *Sodæ Bicar'bonas*, *Bicar'bonate of Soda*, *Carbonate of protoxide of Sodium*, (F.) *Carbonate de Soude*, *S. effervescente*, *S. aërée*, *S. crayeuse*. (*Sodæ subcarb. liq.*, *aquæ destill.* Oij.) Dissolve the subcarbonate of soda, and pass carbonic acid through the solution; set it aside to crystallize. Its use is the same as the subcarbonate, than which it is less caustic, and is better adapted for effervescing draughts.

SODA CAUSTICA, *Protoxide of Sodium*, *Caustic Soda*, (F.) *Soude caustique*, *S. à la Chaux*, *Soude pure*. The impure subcarbonate, treated by quicklime, and consequently deprived of its carbonic acid. It may be used as a caustic, like the *Potassa fusa*, and is even preferable to it as it does not deliquesce, and run.

SODA, CHLORIDE OF, *Sodæ Chloridum*, *Chlorinated Soda*, *Natron Oxymuriaticum*, *Sodæ Chlorure'tum*, *Oxymuriate of Soda*. This salt is used as a disinfecting agent: both to remove offensive smells in chambers, and to alter the condition of fetid ulcers. See *Liquor Sodæ Chlorinatæ*.

SODA, CHLORINATED, *Soda*, chloride of—s. *Hispanica*, *Soda*—s. *Hydrochlorate of Soda*, *muriate of*—s. *Mephite of S. subcarbonate of*.

SODA, MURIATE OF, *Sodæ murias*, *Soda muri'ata*, *S. muriat'ica*, *Alkali minera'lè sal'num*, *Sal coumu'nis*, *Sal culina'ris*, *Sal font'ium*, *Sal gemmæ*, *Sal mari'nus*, *Natron muriat'um*, *Sal albus*, *Natron muriat'icum*, *Common salt*, *Sea salt*, *Hydrochlorinas Natricus*, *Sal fos'silis*, *Sal h'cidum*, *Muria*, *Rock salt*, *Bay salt*, *White salt*, *Quadrichloruret of Sodium*, *Hydrochlorate of protoxide of Sodium*, *Hydrochlorate of Soda*, *Chlorure'tum Sodii*, *Sodii Chloridum*, *Chloride of Sodium*, (F.) *Sel de Cuisine*. In an impure state, this salt is one of the most abundant of natural productions. It is soluble in 3 parts of water, and is tonic, purgative, and anesthetic. Externally, stimulant. It is a well known and useful culinary substance.

SODA, NITRATE OF, *Sodæ Nitras*, *Alkali minera'lè nitratum*, *Nitrum Cu'bicum*, *Nitrate of protoxide of Sodium*, *Protouitrate of Sodium*, *Nitrum Rhomboida'lè*, *Nitras Natricum*. Its virtues are similar to those of the nitrate of potass, for which it has been substituted.

SODA, OXYMURIATE OF, *Soda*, chloride of.

SODA, PHOSPHATE OF, *S. phosphor'ata*, *Subphosphate of protoxide of Sodium*, *Phosphas Natricum*, *Natron Oxophosphor'des*, *Subphosphosphate of Sodium*, *Alkali minera'lè phosphor'atum*, *Tasteless purging salt*, (F.) *Sel admirable perlé*. Bone, burnt to whiteness and powdered lix. *Sulphuric acid* lixvi; *Carbonate of soda*, q s. Mix the bone with the acid in a covered vessel, add a gallon of water, and stir. Digest for three days, occasionally adding a little water to that lost by evaporation, and frequently stirring the mixture. Pour in now a gallon of boiling water, and strain through linen, gradually adding more boiling water, until the liquor passes nearly tasteless. Set the strained liquor by, that the dregs may subside; from which pour off the clear solution, and boil down to a gallon. To this solution, poured off from the dregs and heated in an iron vessel, add by degrees the carbonate of soda

previously dissolved in hot water, until effervescence ceases, and the phosphoric acid is completely neutralized: then filter the liquor, and set it aside to crystallize. Having removed the crystals, add, if necessary, a small quantity of carbonate of soda to the liquor, so as to render it slightly alkaline; then alternately evaporate and crystallize so long as crystals are produced. Lastly, preserve the crystals in a well stopped bottle.—(Ph. U. S.) Cathartic, in the dose of from $\frac{3}{4}$ ss to $\frac{3}{4}$ j.

SODA, SUBCARBONATE OF, *Sodæ Subcarbonas*, **SODÆ CARBONAS**, (Ph. U. S.) Subcarbonate of protoxide of Sodium, Mephite of Soda, *Natron præparatum*, *Sal Sodæ*, Salt of Soda, *Flos Salis*, *Sagimen Vitri*, Salt of Baril'la, *Sal alkali*, *Carbonas Sodæ*, of some. (F.) *Sous-carbonate de Soude*. The impure subcarbonate, dissolved in water; the solution filtered and crystallized. Soluble in two parts of water at 60°. It is much used as an antacid; and, also, as a deobstruent in scrofulous and other affections. Dose, gr. x to $\frac{5}{4}$ ss.

The dried Subcarbonate of Soda, *Sodæ Subcarbonas exsiccatâ*, *Sodæ carbonas exsiccatâ*, *Carbonas Sodæ siccâ*, (F.) *Sous-carbonate de Soude desséchée*, is employed as an antacid and lithontriptic. Dose, gr. x to xv.

SODA, SULPHATE OF, *Sodæ Sulphas*, *Natron vitriolatum*, *Sal catharticus Glauberi*; *Alkali mineralé sulphuricum*, *Natrum sulphuricum*, *Soda vitriolâ*, *Sulphas natrius*, *Sal mirabilis Glauberi*, *Aperient Salt of Frederick*, *Glauber's Salts*. Obtained from the salt that remains after the distillation of muriatic acid; the superabundant acid being saturated with subcarbonate of soda. It is soluble in three parts of water at 60°; is purgative, and, in small doses, diuretic. Dose, $\frac{3}{4}$ j to $\frac{3}{4}$ x.

The LYMINGTON GLAUBER'S SALTS is a Sulphate of Magnesia and Soda, and is obtained from the mother liquor of sea-water, or by dissolving Epsom salt in a solution of Glauber's salt.

SODA, TARTRATE OF, *Tartrate of Potass and Soda*, *Soda Tartarizata*, *Tartrized Soda*, *Sal Rupellen'sis*, *Rochelle Salt*, *Sal Polyphrestum Seignetti*, *S. Seignetti*, *Seignette's Salt*, *Natron tartarizatum*, *Tuttris Potassæ et Sodæ*, *Sodæ et Potassæ Tartras*, (Ph. U. S.) *Tartras Potassæ et Sodæ*. (*Sodæ subcarb.*, p. 1; *potass. supertart.*, p. 3; *aq. fert.*, p. 15. Dissolve the subcarbonate in water; and add, gradually, the super-tartrate. Filter the solution, and crystallize.) It is a gentle cathartic. Dose, $\frac{3}{4}$ ss to $\frac{3}{4}$ j.

SODA VITRIOLATA, S. sulphate of.

SODÆ BICORAS, *Borax*—s. *Bicarbonas*, *Soda*, carbonate of—s. *Boras*, *Borax*—s. *Boras alcalescens*, *Borax*—s. *Boras supersaturus*, *Borax*—s. *Carbonas*, *Soda*—s. *Carbonas*, *Soda*, Subcarbonate of—s. *Carbonas exsiccatâ*, see *Soda*, subcarbonate of—s. subcarbonate of—s. *Carbonas impurus*, *Soda*—s. *Chloras*, *Soda*, chlorate of—s. *Murias*, *Soda*, muriate of—s. *Nitras*, *Soda*, nitrate of—s. *Subboras*, *Borax*—s. *Subcarbonas impura*, *Soda*—s. et *Potassæ Tartras*, *Soda*, tartrate of.

SODII CHLORIDUM, *Soda*, Muriate of—s. *Chloruretum*, *Soda*, muriate of.

SODIUM, Carbonate of protoxide of, *Sodæ carbonas*—s. chloride of, *Soda*, muriate of—s. Protonitrate of, *Soda*, nitrate of—s. Protoxide of, hydrochlorate of, *Soda*, muriate of—s. Pro-

toxide of, *Soda caustica*—s. Protoxide of, nitrate of, *Soda*, nitrate of—s. Protoxide of, phosphate of, *Soda*, phosphate of—s. Protoxide of, subcarbonate of, *Soda*, subcarbonate of—s. Quadrichloruret of, *Soda*, muriate of—s. Subborate of protoxide of, *Borax*—s. Subprotoborate of, *Borax*—s. Subprotophosphate of, *Soda*, phosphate of.

SOI-POUR-SOI, 'Self for self.' A law of development, indicated by M. St. Hilaire; by which like parts unite to like parts, and which is occasionally seen in cases of monstrosity, when two fetuses are united by the ischia, for example.

SOIE, Sericum.

SOIF, Thirst—s. *Excessive*, Polydipsia.

SOLAMEN INTESTINORUM, *Pimpinella anisum*—s. *Scabiosorum*, *Fumaria*.

SOLANUM, *S. nigrum*, *S. vulgarè*, *Common Nightshade*, *Garden Nightshade*, (F.) *Morelle à fruit noir*. Family, Solanæ. Sex. Syst. Pentandria Monogynia. A narcotic poison.—The *Huile de Morelle* is made, by macerating in oil, for several days, the leaves and fruit of this plant. The oil is anodyne and discutient.

SOLANUM DULCAMARA; the *Bittersweet*, *Dulcamara*, *Solanum Scandens*, *Glycipiros*, *Amara dulcis*, *Solanum lignosum*, *στεφύρος*, of Theophrastus, *Woody Nightshade*, (F.) *Douce-amère*, *Morelle grimpante*. The taste of the stalks is bitter, followed by sweetness; hence its name. It has been used in many diseases, as a diuretic and sudorific, especially in chronic rheumatism, humoral asthma, dropsy, various skin diseases, scrofula, and jaundice. Dose, in powder, $\frac{3}{4}$ j to $\frac{3}{4}$ j.

SOLANUM ESCULENTUM, *S. tuberosum*—s. *Fætidum*, *Datura stramonium*—s. *Furiosum*, *Atropa belladonna*—s. *Lethale*, *Atropa belladonna*—s. *Lignosum*, *S. dulcamara*.

SOLANUM LYCOPERSICUM; the *Love-apple plant*. The fruit of this, called *Toma'ta* or *Love-apple*, (F.) *Pomme d'Amour*, is much eaten in the United States; and with the French, Spaniards, Portuguese, &c., forms an esteemed sauce.

SOLANUM MAGNUM VIRGINIANUM RUBRUM, *Phytolacca decandra*—s. *Maniacum*, *Atropa belladonna*—s. *Maniacum*, *Datura stramonium* s. *Melanocerasus*, *Atropa belladonna*—s. *nigrum*, *Solanum*.

SOLANUM MELON'GENA, *Melongenâ*, *Egg plant*, (F.) *Aubergine*. The *Mud Apple plant*; a native of Asia, Africa, and America. Its oblong, egg-shaped fruit, *Pomum Melon'genæ*, *Melum insânium*, is prepared in soups and sauces in those countries, like the tomato.

SOLANUM RACEMOSUM AMERICANUM, *Phytolacca decandra*—s. *Scandens*, *S. dulcamara*.

SOLANUM SANCTUM, the *Palestine Nightshade*. The fruit of this is globular, and is much eaten in the countries where it is a native.

SOLANUM TUBEROSUM, *Bata'bas*, *Solanum esculentum*, *Papas Americana'us*, *Pappus America'nus*, *America'num Tuberosum*, *Batta'ta Virginiana*; the *Pota'to*, (F.) *Pomme de Terre*. A native of Peru. A nutritious and wholesome vegetable; one of the most useful, indeed, that exists. One hundred pounds of potatoes afford ten pounds of starch, which is equal to arrow-root, as a nutrient and demulcent. It is called *Potato Flour*, *P. Starch*, *French Sago*, *Petit Sague*, *Common Arrow-root*, &c.

SOLANUM URENS, *Capsicum annuum*—s. *Vesicarium*, *Physalis*—s. *Vulgare*, *Solanum*.

SOLAR, *Solaris*, from *sol*, 'the sun.' Having rays like the sun.

SOLAR PLEXUS, *Centrum communē, Cœbrum abdominale*. A collection of ganglions and filaments, interweaving and anastomosing with each other repeatedly, and belonging to the system of the great sympathetic. This vast plexus, lying on the vertebral column, the aorta, and the pillars of the diaphragm, has a very irregular shape. The ganglions and filaments, composing it, are soft, reddish, and almost all issue from the semilunar ganglions. It receives, also, branches from the pneumogastric. It seems to be chiefly intended for the aorta, and accompanies all its branches; furnishing many secondary plexuses, which are called the *infra-diaphragmatic, cardiac, superior mesenteric, inferior mesenteric, renal or emulgent, spermatic, &c.*

SOLDANELLA, *Convolvulus soldanella*.

SOLE, *Solum, Pēdion, Peza, Pelma, Plantaris superficies pedis, Facies concava seu inferior seu Planum seu Concavum seu Pars inferior seu Planities seu Planta Pedis*, (F.) *Plante du Pied*. The sole of the foot; the under surface of the foot.

SOLEAIRE, *Soleus*.

SOLEN, *Cradle*.

SOLENA'RIMUM, from *σωλην*, 'a canal.' An instrument of surgery, representing a kind of gutter, in the cavity of which the penis was placed, like a limb in a *cradle*, (q. v.)—Galen. The word *Solen* itself—*σωλην*, *Canal's*—was used, in antiquity, for a grooved channel, in which a fractured limb was placed.

SOLE'US, *Gastrocnemius inter'nus, Tibio-calcaneus*, (Ch;) (F.) *Solēaire*, from *solea*, 'a sole of a shoe.' A muscle, situate at the posterior part of the leg. It is broad, flat, and almost oval; and is attached, above, to the posterior edge of the fibula, to the oblique line on the posterior surface, and to the inner edge of the tibia. It terminates, below, by a large tendon, which unites to that of the *gastrocnemius externus*, to form the *tendo Achillis*. This muscle extends the foot on the leg, and conversely.

SOLID, *Solidus, Stereos*. A body, whose integument molecules are so united by the force of cohesion, that they will not separate by their own weight. The solids, in the human body, are the bones, cartilages, tendons, muscles, ligaments, arteries, veins, nerves, membranes, skin, &c. The anatomy, or rather study, of the solids, is called *Stercol'ogy*, from *στερεος*, 'solid,' and *λογος*, 'a discourse.'

SOLIDAGO, see *Solidago virgaurea*.

SOLIDA'GO VIRGAU'REA, *Virga aurea, Herba do'rea, Conf'za coma aurea, Sym'phytum, Petre'um, Elch'rysum, Consolida Saracē'ica, Golden Rod*. *Nat. Ord.* Composite *Corymbiferae*. *Sex. Syst.* Syngenesia superflua. (F.) *Verge d'or*. The leaves, *Solida'go* (Ph. U. S.), and flowers have been recommended as aperients and tonics, in urinary diseases, and in internal hemorrhage.

SOLIDISM. The doctrine of those physicians, who refer all diseases to alterations of the solid parts of the body. To the believers in this doctrine, the appellation *Solidist* has been given. The Solidists think, that the solids alone are endowed with vital properties;

that they alone can receive the impression of morbid agents, and be the seat of pathological phenomena. Solidism is, perhaps, the prevalent doctrine of the present day. It is scarcely necessary to say, that, in all our investigations, the condition of both solids and fluids must be regarded.

SOLIUM, *Baignoire*.

SOLUBILITY, *Solubilitas*, from *solvere*, *solutum*, 'to dissolve.' That property of a body, by virtue of which it can be dissolved in a menstruum.

TABLE OF THE SOLUBILITY OF SOME SUBSTANCES IN WATER.

NAMES OF SALTS.	Solubility in 100 parts water.	
	at 60°. .	at 212°
<i>Acids.</i>		
Benzoic,	0.208	4.17
Citric,	133	200
Oxalic,	50	100
Tartaric,	very soluble	
<i>Salts.</i>		
Acetate of Potass,	100

SOLUM, *Sole*.

SOLUTIO ALEXITERIA GAUBIANA, see *Disinfection*—s. *Ammonia subcarbonatis*, *Liquor ammonia subcarbonatis*—s. *Arsenicalis*, *Liquor arsenicalis*—s. *Arsenicata*, *Liquor arsenicalis*—s. *Arsenitis kalice*, *Liquor arsenicalis*—s. *Calcis*, *Liquor calcis*—s. *Camphoræ æthereæ*, *Tinctura æthereæ camphoræ*—s. *Camphoræ oleosa*, *Linimentum camphoræ*—s. *Guaiaçi gummosa*, *Mistura guaiaçi*—s. *Muriatis baryta*, *Baryta*, *muriate of*—s. *Muriatis calcis*, see *Calcis murias*—s. *Muriatis Ferrici æthereæ*, *Tinctura seu alcohol sulfurico-æthereus ferri*—s. *Muriatis hydrargyri oxygenati*, *Liquor hydrargyri oxymercurialis*—s. *Potassii iodidi iodureta*, *Liquor iodini compositus*—s. *Resinæ Guaiaçi aquosa*, *Mistura Guaiaçi*—s. *Subcarbonatis ammoniaci spirituosus*, *Spiritus ammoniæ*.

SOLUTIO SULPHATIS CUPRI COMPOSITA. *Aqua vitriol'ica caru'lea, Sydenham's Styptic Water.* (Sulph. cupri, ℥ij, alum., acid. sulph., aa ℥ij, aquæ, ℥viij: dissolve, and filter.)

SOLUTION, Solu'tio, Lysis, (F.) Dissolution. An operation, which consists in dissolving a solid body in a menstruum. Likewise, the product of such operation. It means, also, with many, the termination of a disease:—with others, a termination accompanied by critical signs;—and, with others, again, it is synonymous with crisis.

SOLUTION OF CONTINUITY is any division of parts previously continuous;—as a wound, a fracture, &c.

SOLUTION OF ACETATE OF AMMONIA, Liquor ammoniæ acetatis—s. of Acetate of morphia, *Liquor morphiæ acetatis*—s. Alkaline, see *Fuligokali*—s. of Alkaline iron, *Liquor ferri alkalini*—s. of Alum, compound, *Liquor aluminis compositus*—s. of Ammoniated copper, *Liquor cupri ammoniati*—s. Arsenical, *Liquor arsenicalis*—s. of Charcoal, concentrated, see *Tinctura catechu*—s. of chlorinated soda, *Liquor sodæ chlorinatæ*—s. of Citrate of potassa, *Liquor potassæ citratis*—s. of Corrosive sublimate, *Liquor hydrargyri oxymuriatis*—s. Fowler's, *Liquor arsenicalis*—s. of Hydriodate of potass, *Liquor potassæ hydriodatis*—s. of Iodide of iron, *Liquor ferri iodidi*—s. of Iodine, compound, *Liquor iodini compositus*—s. of Iron, nitrated, see *Tinctura ferri muriatis*—s. of Lime, *Liquor calcis*—s. Lugol's, *Liquor iodini compositus*—s. of Magnesia, condensed, *Magnesia fluidæ*—s. of Monro, *Liquor of Monro*—s. of Oxy muriate of mercury, *Liquor hydrargyri oxymuriatis*—s. Plenck's, see *Hydrargyri oxydum cinereum*—s. *de Potasse*, *Liquor potassæ*—s. of Potass, *Liquor potassæ*—s. of Subacetate of Lead, *Liquor plumbi subacetatis*—s. of Subacetate of lead, diluted, *Liquor plumbi subacetatis dilutus*—s. of Subcarbonate of potass, *Liquor potassæ subcarbonatis*—s. of Sulphate of morphia, *Liquor morphiæ sulphatis*—s. of Tartarized antimony, *Vinum antimonii tartarizati*—s. of Van Swieten, *Liquor hydrargyri oxymuriatis*.

SOLUTIVUS, Laxative.

SOLVENS MINERALE, Liquor arsenicalis.

SOLVENT, (F.) Fondant, from *solvere*, 'to dissolve.' A medicine supposed to possess the property of dissolving or removing obstructions and extraneous substances. Thus we have *solvents* of the stone in the bladder, &c.

SOLVENT, MINERAL, Liquor arsenicalis.

SOLVENTS, Dissolventia.

SOMA, Body, Corpus.

SOMACETICS, Gymnastics.

SOMATIC, Somat'icus; from *σῶμα*, 'the body.'

That which concerns the body;—as *somatic* death or death of the body, in contradistinction to *molecular* death, or the death of a part.

SOMATOLOGY, Somatolog'ia, from *σῶμα*, 'the body,' and *λογία*, 'a discourse.' A treatise on the human body. Anatomy, (q. v.)

SOMATOTOMY, Anatomy.

SOMMEIL, Sleep.

SOMNAMBULISM, Somnambula'tio, Hypnoba'tesis, Hypnob'asis, Selenoga'nia, Nyctoba'tesis, Seleni'asis, Selenias'mus, Somnambulis'mus, Nyctob'asis, Noctambula'tio, Paroni'ria amb'ulus, Sleep-walking, Noctisur'gium, Oneirodyn'ia acti'va, Somno-rigil, from *somnus*, 'sleep,' and *ambula'rē*, 'to walk.' A condition

of the brain, which occasions the individual to execute, during sleep, some of those actions that commonly take place when awake. It has been imagined, that the somnambulist is guided solely by his internal senses; but there are many facts which induce the belief that the external senses are not always entirely suspended. The causes of somnambulism are very obscure; and the principal indication of treatment is,—so to arrange the bed-chamber of the somnambulist, that he cannot get out of it during sleep; and to avoid suppers, as well as all bodily and mental excitement.

MAGNETIC OR ARTIFICIAL SOMNAMBULISM is that peculiar nervous condition, into which individuals have been occasionally thrown by the *Animal Magnetizer*. It has occurred only in those of weak nervous temperament; in hysterical females, &c.

SOMNAMBULIST, Somnam'bulus, Hypnoba'tes, Noctam'bulus. A sleep-walker.

SOMNIFEROUS, Hypnot'icus, Soporif'ic, Soporif'erous, Soporati'vus. A medicine, which causes sleep.

SOMNILOQUIUM, Somniloquis'mus, from *somnus*, 'sleep,' and *loquor*, 'I speak.' Talking in the sleep.

SOMNIUM, Enyp'nion, Insom'nium, a Dream, (F.) Rêve, Songe. A confused assemblage, or accidental and involuntary combination of ideas and images, which present themselves to the mind during sleep. Dr. S. Mitchell, of New York, used the word *Somnium* to signify the state between sleeping and waking, in which persons perform acts of which they are unconscious.

For 'waking dreams,' see *Hallucination*.

Those distressing dreams, which occur during a state of half sleep, are called, by the French, *Rêveries*.

SOMNO-VIGIL, Somnambulism.

SOMNOLENCY, Somnolen'tia, Heaviness, Carus Lethar'gus Cataph'ora, Cataphora, Coma Somnolent'um, Caro'sis, Slumber, (F.) Assoupissement. A state intermediate between sleeping and waking. It is often a symptom of disease.

SOMNUS, Sleep.

SOMPNUM, Sleep.

SON, Furfur.

SONCHUS OLERA'CEUS, Cicer'bita, Sow Thistle, (F.) Laiteron doux. Family, Cichoraceæ. Most of the species of *Sonchus* abound with a milky juice, which is very bitter, and said to possess diuretic virtues.

SONDE, Sound, Specillum.

SONDE CANNÉE, Director.

SONDE D'ANEL. A very fine stylet of silver, awl-shaped at one end. It is used for probing the lachrymal passages through the punctum lachrymale.

SONDE DE BELLOC. An instrument, invented by Belloc for plugging the nasal fossæ in cases of hemorrhage. It consists of a curved, silver canula, open at both ends, and furnished with a button. The instrument is passed through the nares to the throat; and a plug is attached to the button, so that, when the instrument is drawn forwards through the nose, the posterior nostril is stopped.

SONDE BRIÉE, (F.) Eyed probe. A long, straight stylet, composed of two parts, which may be screwed to each other; blunt at one end,

and furnished, at the other, with an eye: so that it may be used either as a probe for punctured wounds, or for a seton needle.

SONDE À CONDUCTEUR, (F.) A modification of the ordinary catheter;—to facilitate the changing of catheters, without the fear of making false passages. It is a common catheter, open at its beak. The *Stilet* or *Mandrin* is one half longer than that of the ordinary catheter. To use the instrument, the stilet is pushed into the cavity of the bladder through the catheter. The latter is then withdrawn by slipping it over the stilet, which is kept in its place, and serves as a guide to a fresh catheter.

SONDE DE LAFOREST. A small, crooked canula, used for probing the nasal duct from below upwards, and for throwing up injections into it.

SONDE OU PINCE DE HUNTER. A cylindrical, silver canula; of the size of a common catheter; open at both extremities, and containing a wire of iron, one of the ends of which is split into two parts; each being terminated by a small scoop, and separating from each other by virtue of their elasticity, when pushed out of the canula, and again approximating when drawn in. It has been used for laying hold of small calculi in the urethra.

SONDE DE VARECQ, Soda.

SONGE, Somnium.

SONUS VOCIS, Accent.

SOOJA, See Dolichos.

SOOT, Fuligo—s. Tea, see Fuligokali—s. Wart, Cancer, chimney-sweeper's.

SOPHIA, Sisymbrium sophia—s. Chirurgorum, Sisymbrium sophia.

SOPHISTICATION, Falsification.

SOPHORA HEPTAPHYLIA, Anticholerica. Family, Leguminosæ. Sex. Syst. Decandria Monogynia. The root and seeds of this shrub are intensely bitter, and are said to have been found useful in cholera, colic, dysentery, &c.

SOPHORA TINCTORIA; Podalyria Tinctoria, Indigofera, Wild Indigo, Indigo Weed, Broom. An American plant, the taste of whose root is unpleasant, subacid, and nauseous—very similar to Ipecacuanha. In a large dose, the bark of the root acts both as an emetic and cathartic. It has been considered antiseptic and febrifuge, and has been used, in the form of fomentation or cataplasm, in phagedenic and gangrenous ulcers. A liniment, prepared by simmering the cortical part of the root in cream, has been found an efficacious application to sore nipples and to ulcerated breasts.—Coxe.

SOPHROSYNE, Temperance.

SOPOR. A profound sleep, (q. v.) from which the person can be roused with difficulty. It is a symptom in many of the neuroses.

SOPOR CAROTICUS, Carus.

SOPORATIVUS, Somniferous.

SOPORIFIC, Somniferous.

SORA, Essera.

SORB TREE, Sorbus domestica.

SORBASTRELLA, Pimpinella saxifraga.

SORBEFACIENT, Sorbefaciens, from sorbere, 'to suck in,' and facere, 'to make.' A remedy that promotes absorption.

The following are the chief Sorbefaciens:—Acida Vegetabilia; Alkalia; Ammoniacum; Brominum; Galbanum; Hydrargyri Preparata; Iodinum; Liquor Calcii Chloridi; Spongia

usta; Compression, (Methodical;) Friction; Mental Sorbefaciens, (Imagination, Emotions.)

SORBIER DES OISELEURS, Sorbus acuparia.

SORBUM. See *Sorbus domestica*.

SORBUS, Cratægus aria, S. domestica.

SORBUS ACUPARIA, Mespilus, Mountain Service, Mountain Ash, Quicken Tree, Roan Tree, (F.) Sorbier des Oiseleurs. The berries of this tree are employed for similar purposes as the last.

SORBUS DOMESTICA, Sorbus, Oie, Service or Sorb Tree, (F.) Cormier. Family, Rosacæ. Sex. Syst. Icosandria Trigynia. The fruit of this tree, *Sorbum*, is astringent, and has been recommended in diarrhœa and dysentery. It is given in the form of rob. A kind of cider is made from it, and also brandy.

SORDES, Rhypos. A dirty-looking sanies, discharged from ulcers. Also, accumulations of the secretions of the mouth on the teeth, in adynamic fevers, more especially. The French call an ulcer, exhibiting such an appearance, *sordid*. Also, dirt of any kind.

SORDES, Ichor, Saburra—s. Ventris, Excrement.

SORE, Ulcer.

SORE, Bay. A disease, which Mosely considers to be a true cancer. It is endemic in the Bay of Honduras.

SORE MOUTH, Stomatitis—s. Gangrenous, Cancer aquaticus.

SORE THROAT, Cynanche—s. Clergymen's, Pharyngitis, follicular—s. Inflammatory, Cynanche tonsillaris—s. Putrid, Cynanche maligna—s. Throat, ulcerous, Cynanche maligna.

SORENESS, from Teut. seer, (G.) Sehr, 'very,' Sax. rap, Parap'sis acris teneritudo. Painful uneasiness or tenderness, local or general, on being touched with a pressure that does not usually excite distressing feeling. Often, a febrile symptom. Also, the tenderness of a wound, ulcer, &c.

SORGHUM, Panicum Italicum.

SORORIA'TIO. The period at which the breasts of the female become developed. The act of becoming thus developed. A young maiden, whose mammae begin to show was formerly called *sororians virgo*.—Plautus.

SORREL, COMMON, Rumex acetosa—s. French, Rumex scutatus—s. Garden, Rumex scutatus—s. Salt of, Potass, oxalate of—s. Roman, Rumex scutatus.

SOTIRELLA. Ancient name of a medicine, composed of opium, several narcotics, nutmeg, saffron, camphor, and snout. It was used in certain diseases of the teeth.

SOUBRESAUT, Subsultus tendinum.

SOUCHERLOON, Bit noben.

SOUCHET DES INDES, Curcuma longa—s. Odorant, Cyperus longus—s. Rond, Cyperus rotundus.

SOUCI, Calendula officinalis, Panophobia—s. des Champs, Calendula arvensis.

SOUDE AERE, Sodæ carbonas—s. Borate sursaturé de, Borax—s. Carbonate de, Sodæ carbonas—s. Caustique, Soda caustica—s. à la Chaux, Soda caustica—s. du Commerce, Soda—s. Crayeuse, Sodæ carbonas—s. Effervescente, Sodæ carbonas—s. Pure, Soda caustica—s. Sous-borate de, Borax—s. Souscarbonate de, Soda, subcarbonate of,

SOUFFLE. See Murmur, respiratory.

SOUFRE, Sulphur—*s. Sublimé*, Sulphur sublimatum.

SOUND, *Specillum, Stylus, Exploratorium.* (F.) *Sonde.* An instrument used, by surgeons, to discover whether there be a stone in the bladder. It is usually made of highly polished steel, and is shaped like the catheter.

The French *Sonde* has, however, a more extensive signification. It means different instruments, introduced into cavities of certain organs, or into wounds, fistulas, &c. to investigate their condition; or to fulfil some therapeutic indication. See *SONDE*.

SOUND, Bruit—*s.* Bellows, friction, rasp, saw, &c. see *Bruit*—*s.* Auricular, Apyromele.

SOUNDING, Searching.

SOUPIR, Sigh.

SOURCIL, Supercilium.

SOURCILIER, Corrugator supercilii, Superciliary.

SOURDS-MUETS. See Mutitas surdorum.

SOURIS, Nictation.

SOUS-ACROMIO-CLAVI-HUMÉRAL, Deltoïd—*s.* *Atloïdien*, Subatloïdæus—*s.* *Axôïdien*, Subaxôïdæus—*s.* *Clavier*, Subclavius—*s.* *Cos-taux*, Intercostal—*s.* *Culané*, Subcutaneus—*s.* *Épineux*, Infra-spinatus—*s.* *Lingual*, Sublingual—*s.* *Maxillaire*, Submaxillary—*s.* *Maxillo-labial*, Depressor anguli oris—*s.* *Mental*, Submental—*s.* *Métacarpo-lateri-phalangien*, Prior annularis—*s.* *Optico-sphéno-scléroticien*, Rectus inferior oculi—*s.* *Orbitaire*, Suborbitar—*s.* *Pubio-coccy-gien*, Levator ani—*s.* *Pubio-crêti-tibial*, Gracilis—*s.* *Pubio-prétibial*, Gracilis—*s.* *Pubio-trochanté-rien-externe*, Obturator-externus—*s.* *Pubio-trochantérien-interne*, Obturator internus—*s.* *Scapulaire*, Subscapularis—*s.* *Scapulo-trochinien*, Subscapularis—*s.* *Sels*, see Salt.

SOUTHERNWOOD, *Artemisia abrotanum*—*s.* Field, *Artemisia campestris*—*s.* Maritime, *Artemisia maritima*—*s.* Tartarian, *Artemisia santonica*.

SOWBREAD, *Arthanita, Cyclamen.*

SOY. See *Dolichos soja*.

SPA, MINERAL WATERS OF. A town, 7 leagues S. E. of Liège, where there are several springs, possessing a sharp, acidulous taste; containing much carbonic acid, carbonates of iron, lime, and magnesia; carbonate of soda, and chloride of sodium. The water is much used as a tonic.

ARTIFICIAL SPA WATER. *Sodæ subcarb.*, gr. vij; *magnesiæ carbon.* ʒj; *limat. ferri*, gr. iij, *sodæ muriat.*, gr. j; *aquæ*, Oijj. Impregnate with gas from marble powder and sulph. acid., aa ʒx.

SPADO, *Castratus, Eunuch.*

SPAG'IRISTS, from *σπαιω*, 'I separate,' and *αγειρω*, 'I assemble,' because they reduced compounds into elements; and formed the latter into compounds (?) A sect of physicians, who pretended to account for the changes that occur in the human body in health and disease, in the same manner as the chymists, of their day, explained those of the inorganic kingdom.—*Medicina Spagirica* was, likewise, called *Hermética*; because it was believed that the means of cure, adopted in it, had been found in the books of Hermes.

SPAGYRIA, Chymistry.

SPANDARAPUM. *Sparadrapum.*

SPANISH FLY, *Cantharis.*

SPANOPOGON, from *σπανος*, 'rare,' and *πωγων*, 'beard.' Loss of beard, or thinness of beard.—Vogel.

The Greeks called those who had little beard, or who had lost it, *Spanopogones*.

SPARADRAPIER. The name of a machine for spreading sparadraps. *A Plaster machine.* It consists of a table, with two raised pieces, movable, and furnished with points; by which the cloth can be stretched, and a lamina or blade of metal to extend the plaster over it.

SPARADRAPUM, *Sparadrapus, Tela emplas'tica, Spandarapum*, (F.) *Sparadrap.* Any adhesive plaster spread upon linen or paper. The chief sparadraps are the following:—

SPARADRAPUM PRO FONTICULIS, *Issue Plaster*; which is sometimes made of simple diachylon, ʒij; *Burgundy pitch*, and *sarcocolla*, each ʒiv; common turpentine, ʒj. Spread upon linen and polished with a moistened calendering glass rubber.

SPARADRAPUM VIRIDÈ, *Corn Plaster.* This may be made of yellow wax, ʒij; *Burgundy pitch*, ʒxij; common turpentine, ʒvj; verdigris, ʒiij, spread on cloth, and polished.

Kennedy's Corn Plaster is made of yellow wax, ʒij; Venice Turpentine, ʒij; verdigris, ʒj.

SPARADRAPUM SEU TELA GALTERI, *Defensive Plaster*, (F.) *Toile de Gautier.* This is made of olive oil, ʒbss; suet, ʒiv; wax, ʒx; litharge, common turpentine, thus, and mastich, aa ʒij; bole armeniac, flour, aa ʒj. Pour it, while liquid, upon cloth, and spread. Used for issues, and to keep on dressings.

SPARADRAPUM ADHÆSIVUM, *Adhesive Plaster.* A spread plaster of the *Emplastrum adhæ-sivum*, (q. v.) It is, also, called *Strapping*.

ENGLISH COURT PLASTER is a Sparadrap, (F.) *Taffetas agglutinatif*, T. gommé, *Taffetas d'Angleterre*, *Sericum Anglicum*, *Emplastrum Anglicum*, *E. Anglicum*, *E. adhæsivum*, *Woodstock'i*, *E. Ichthyocol'tæ telæ induc'tum*, *E. Glutin'sum*, *Tela Ichthyocol'tæ glu'tinans*. It is made by stretching black silk, and brushing it over with a solution of isinglass ʒj, in proof spirit, ʒxij, to which tinct. benz. ʒij, are added. When dry, this is repeated five times; after this, two coats are given it of a solution of tereb. ch'æ ʒiv, in tinct. benz. ʒvj, which renders it less liable to crack.

SPARAGMA. Laceration.

SPARAGMOS, Spasin.

SPARAGUS, Asparagus.

SPARAL'IUM, *Clyster uteri'nus*. An injection into the vagina.—Ruland and Johnson.

SPAREDIA. A ligature, covered with the white of egg.—Paracelsus.

SPARGANON, from *σπαργω*, 'I swathe, I wrap,' 'swathing clothes;' forming a kind of bandage, with which children were formerly surrounded.—Fœsius. Also, Fascia, (q. v.)

SPARGANO'SIS, *Intumescen'tia lactea mam-marum*, *Mastodyn'ia polyg'ala*, from *σπαργω*, 'I am ready to burst.' Extreme distention of the breasts by milk.—Galen.

SPARGANOSIS PUERPERARUM, Phlegmatia do-lens.

SPARROWGRASS, Asparagus.

SPARTIUM SCOPARIUM, *Cyt'isus scopar'ius*, *Genis'ta*, Broom, *Cytiso-genista*, *G. Tinc-to'ria*, (F.) *Génêt*. Family, Leguminosæ. See. Syst. Diadelphia Decandria. Broom Tops—*Spartii Cacumina*, *Scopar'ius* (Ph. U. S.)—have

a bitter taste, and are possessed of diuretic properties. They have been used in dropsies. Dose, of the powder, ℥j to ʒj. All the geniste have similar virtues. A decoction of the genista, along with the cauterization of the pustules under the tongue, has been recommended in hydrophobia.

SPASM, *Spasmus*, *Sparag'mos*, from *σπαιω*, 'I draw.' The Greeks gave this name to all kinds of convulsion. It is now usually applied to involuntary, muscular contractions; and these, again, have been divided into *tonic* spasm (see *Tetanus*.) which consists in complete rigidity and immobility of the muscles, that are the seat of it; and into *clonic* spasm, which consists in alternate contractions and relaxations, (see *Convulsion*.)

Cullen has a class, *Spasmi*.

SPASM, CLONIC, Convulsion—s. *Cynic*, see *Canine laugh*—s. with *Rigidity, Tetanus*.

SPASME DE LA VESSIE, *Cystospasmus*.

SPASMODES, *Convulsive*.

SPASMODIC, *Spasmodicus*.

SPASMOL'OGY, *Spasmolog'ia*, from *σπασμος*, 'spasm,' and *λογος*, 'a treatise.' A treatise on spasms.

SPASMOTICUS, *Spas'ticus Spasmod'ic*. Any thing relating to spasm. Also, an anti-spasmodic.

Morbi constrict'o'rii, *M. spasmod'ici*, &c., are diseases accompanied with spasm.

SPASMUS, *Convulsion, Spasm*—s. *Glottidis*, *Asthma thymicum*—s. *Maxillæ inferioris*, *Trismus*—s. *Aurium*, *Otalgia*—s. *Ventriculi*, see *Cardialgia*—s. *Vesicæ*, *Cystospasmus*.

SPAS'NIA, same etymon. (?) A term, used by Mercurialis, to designate the lancinating pain, produced, at times, in the chest, by violent fits of coughing.

SPASTICUS, *Spasmodicus, Tonic spasm*.

SPATHA, *Hypaleiptron*.

SPATHES'TER, from *σπαιω*, 'I draw.' (?) A surgical instrument, used for drawing the prepuce over the glans, when too short.—*P. Amman*.

SPATHOMELE, *Spatula*.

SPATHULA FÆTIDA, *Iris fætidi'ssima*.

SPATILE, *σπατ'ιλη*, 'human excrement.'

A liquid fecal evacuation. Excrement, (q. v.)—*Hippocr*.

SPAT'ULA, Diminutive of *Spa'tha*, *σπαθη*, 'a broad-sword.' *Spathom'e'le*, *σπαθομε'λη*, *Spacill'um lutum*. An instrument, used for spreading plasters, stirring ointments, &c.

SPEARWORT, *Ranunculus flammula*.

SPECIES, Powders, compound—s. *Aromaticæ*, *Pulvis cinnamomi compositus*—s. *Diacinamomi*, *Pulvis cinnamomi compositus*—s. *Diacretæ*, *Pulvis cretæ compos.*—s. *Dialapapæ*, *Pulvis jalapæ compositus*—s. *Diambre sine odoratis*, *Pulvis cinnamomi compositus*—s. *Diatragacanthæ frigidæ*, *Pulvis tragacanthæ compositus*—s. *Hieræ pieræ*, *Pulvis aloes cum canellâ*—s. *Lætificantes Rhazis*, *Pulvis cinnamomi compositus*—s. e. *Scordio cum opio*, *Pulvis cretæ compositus cum opio*—s. e. *Scordio sine opio*, *Pulvis cretæ compositus*.

SPECIFIC, *Specificus*, from *species*, 'a form or fashion,' and *facere*, 'to make.' A substance to which is attributed the property of removing, directly, one disease rather than any other. Probably no such remedy exists. *Mercury* in syphilis, and *sulphur* in the itch have been regarded as the strongest examples.

SPECIFIC OF HERRENSCHWAND. A once celebrated German vermifuge. It is said to have consisted of 10 grains of *Gamboge*, with 20 of *Carbonate of Potassa*. It is affirmed, also, that mercury and arsenic have been found in it.—*Paris*.

SPECIFICUM PARACELSI, *Potassæ sulphas*.

SPECIL'LUM, *Melè, Stylus*, from *specio*, 'I examine.'—*Specul'rion*, *Spic'illum*; a probe, (F.) *Stylèt, Sonde*, (q. v.) A surgical instrument, employed for examining wounds, fistulas, and for passing setons, &c. It is usually formed of silver; and is terminated, at one end, by an olive-shaped button. The *eyed probe* has an aperture at the other extremity.

SPECILLUM, *Everriculum, Hypaleiptron*, *Sound*—s. *Auricularium*, *Apyromele*—s. *Cereum*, *Bougie*—s. *Latum*, *Spatula*—s. *Minus*, *Me-lotis*.

SPECLARION, *Specillum*.

SPECTACLES, from *spectare*, 'to behold.'

Conspicill'a, (F.) *Besicles, Lunettes ordinaires, Conserve*. Glasses to assist the sight; arranged so as to be adapted to both eyes at the same time. These glasses are more or less *concave* or *convex*, according as the sight is more or less short (*Myopic*;) or long (*Presbyopic*.)

SPECULA'RIS LAPIS. A transparent mineral, but of what nature is not clear, which was formerly employed in epilepsy. In old times it was used for glass.—*Pliny*.

SPEC'ULUM, *Catop'ter, Cutopt'ron, Diop'tron*. In Latin, 'a mirror,' from *specio*, 'I see.' In surgery, it means different instruments for dilating cavities, and facilitating their examination. See *Dilator*. There are various instruments of this kind,—the *S. Ani*, *S. Matricis*, *S. Oculi*, *S. Oris* (F.) *Baillon*.) *S. Gutturis*, *S. Vesicæ*.

SPECULUM CITRINUM, *Orpiment*—s. *Indicum*, *Ferri limatura*—s. *Lucidum*, *S. lucidum*—s. *Oris*, *Glossocatochus*—s. *Veneris*, *Achillea millefolium*.

SPECUS, *Vulva*.

SPEECH, *Voice, articulated*.

SPEECHLESSNESS, *Mutitas*.

SPEEDWELL, *Brooklime, Veronica beccabunga*—s. *Female*, *Antirrhinum elatine*—s. *Of-ficial*, *Veronica*.

SPELTRUM, *Zincum*.

SPERM, from *σπερω*, 'I sow.' *Spermat'ic fluid* or *liquor*, *Sem'inal fluid*, *Seed*, *Semen*, *S. viri'le* seu *masculinum* seu *genital'e*, *Genital'e*, *Medullæ*, *Pyti's'ma*, *Ros*, *Sanguis*, *Serum*, *Humor genital'is seu seminal'is* seu *ven'e'rcus*, *Uri'na genital'is*, *Genit'ra*, *Sperma*, *S. viri'le*, *Tho'rè*, *Tho'rus*, *Lac maris*, *Male's milk*, *Propagatory* or *genital liquor*, *Vita'le virus*, *Vital* or *quicken-ing renum*. A whitish, viscid fluid, of a peculiar smell, secreted by the testicles, whence it is carried by the vasa deferentia to the vesiculae seminales, to be thrown into the vagina, during coition, through the ejaculatory ducts and the urethra. It is the fecundating fluid, and must come into actual contact with the germ of the female. The *Aura sem'inis* is incapable of effecting fecundation. The semen, at the time of emission, is composed of two different fluids; the one liquid and milky, which is considered to be the secretion of the prostate;—the other, white, and as thick as mucilage, the product of the testicular secretion. The sperm contains,

according to Vauquelin, 900 parts of water, 50 of animal mucilage, 10 of soda, and 30 of calcareous phosphate. The animal matter is peculiar, and by some termed *spermatin*.

Microscopic observations seem to show, that, like many other animal secretions, it contains animalcules—*Spermatozoa*, (q. v.) By careful examination, according to Wagner, other minute, round, granulated bodies may almost always be detected, which are in all cases much less numerous than the spermatozoa. These bodies he calls *seminal granules*, (q. v.) Pure sperm, he considers, in its most perfect state, consists principally of seminal animalcules and seminal granules; both of which are enveloped in a small quantity of fluid.

SPERMACETI, Cetaceum—s. Whale, see Cetaceum.

SPERMACRASIA, Spermatorrhœa.

SPERMATIC, *Spermaticus*, *Seminalis*. That which relates to the sperm. A name given to different parts, connected with the organs of generation.

SPERMATIC ARTERIES, *A. Spermaticæ*, *A. præparantes*, *Artères testiculaires*, *A. de l'ovaire* (Ch.), are two in number;—one on each side, —and arise from the sides of the aorta, sometimes from the renal arteries. They descend, almost vertically, at the sides of the vertebral column, and are distributed differently in the two sexes. In man, the spermatic artery, situate at the side of the vas deferens, issues by the abdominal ring; gives numerous ramifications to the spermatic chord, and divides into two fasciculi of branches, one of which goes to the testicle,—the other to the epididymis. In the female, the spermatic artery dips into the pelvis, and passes to the ovary, Fallopian tube, and round ligament.

SPERMATIC OF TESTICULAR CHORD, *Funiculus Spermaticus*, *Corpus varicosum*, (F.) *Cordon spermatique ou testiculaire*. The vascular and nervous chord, by which the testicle is suspended. It is composed of the spermatic artery and veins; of other small vessels; of lymphatics; of nervous filaments from the spermatic plexus, and from the genito-crural branch of the lumbo-abdominal plexus; of the vas deferens, and, very often, of a fibro-cellular chord, which unites the peritoneum to the upper part of the tunica vaginalis, and in which, encysted hydrocele of the spermatic chord occurs. All these parts are united together by a very lax, cellular tissue, and surrounded by coats, which, reckoning from without, are;—1. The skin and cellular membrane. 2. A fibro-cellular membrane, formed by the fascia superficialis. 3. A very thin layer, formed by fibres of the cremaster muscle, united archwise before, and often, also, behind, the chord. 4. The proper sheath of the spermatic vessels, or the tubular prolongation, furnished by the fascia transversalis to the chord, on a level with the superior orifice of the inguinal canal. The spermatic chord is commonly shorter on the right side than on the left; and of a different size in different individuals. It ascends, almost vertically, from the superior margin of the testicle, as far as the lower orifice of the inguinal canal; passes through this canal, and enters the abdomen, crossing the epigastric artery. Here it forms an evident elbow, directing its course backward. At this part, also, the organs, composing

it, separate from each other:—the vas deferens descending into the pelvis to pass behind the bladder;—the blood-vessels and lymphatics ascending towards the lumbar region, &c.

SPERMATIC PASSAGES or WAYS, *Via Spermaticæ*, are the canals concerned in the excretion of semen.

SPERMATIC PLEXUSES of nerves, *Plexus testiculares*, are two in number, and are furnished by the renal plexuses. Their filaments, called *Spermatic nerves*, follow the arteries of the same name to the testicle in man; and to the ovary and Fallopian tube in the female. They cannot be traced into the substance of these organs.

SPERMATIC VEINS are two or three in number, on each side. They accompany the spermatic artery, and open:—those of the right, into the vena cava inferior; those of the left, into the corresponding renal vein. These veins form, above the testicle, a kind of venous network, called, by some, the *Spermatic Plexus*; and another plexus before the psoas muscle, called the *Corpus pampiniforme*.

SPERMATIN, see Sperm.

SPERMATOCE'LE, *Her'nia semina'lis Scroti*, *Oscheocel'ë semina'lis*, *Gonocel'ë*, from *σπερμα*, 'sperm,' and *κίλη*, 'a tumour.' The ancients gave this name to certain swellings of the testicle, which were regarded as produced by an accumulation of sperm in the organ. Also, *Varicocele*, (q. v.)

SPERMATOID, *Gonoides*.

SPERMATOL'OGY, *Spermatolog'ia*, from *σπερμα*, 'sperm,' and *λογος*, 'a discourse.' A treatise on sperm.

SPERMATOPŒ'US, *Spermatopœus*, from *σπερμα*, 'sperm,' and *ποιειν*, 'to make.' Food, to which has been attributed the property of augmenting the secretion of semen; and, consequently of exciting the venereal act. Very succulent and very nutritious substances have been so considered.

SPERMATORRHŒ'A, *Spermorrhœ'a*, *Spermorrhœ'a*, *Gonorrhœ'a*, *Gonorrhœ'a*, (F.) *Flux de Sperme*; from *σπερμα*, 'sperm,' and *ρεω*, 'I flow.' An emission of sperm, without copulation. See Gonorrhœa and Pollution.

SPERMATORRHŒA ATONICA, *Gonorrhœa laxorum*.

SPERMATOZO'A, from *σπερμα*, 'sperm,' and *ζωον*, 'animal,' *Zoospermes*. Spermatic animalcules. Animalcules seen in the sperm, and by some supposed to be the formative agents in generation.

SPERMORRHŒA, *Spermatorrhœa*.

SPHACELIA SEGETUM. See Ergot.

SPHACELISMUS, *Sphacelus*—s. *Cerebri*, *Phrenitis*.

SPHAC'ELUS, *Gangræ'na Sphacelus*, *Sphacelis'mus*, from *σφαζω*, 'I slay.' This word is used, by some, synonymously with Gangrene (q. v.); by others, with gangrene when it occupies the whole substance of a limb. Commonly, it means the disorganized portion, in cases of mortification, which must be thrown off—or is, in other words, totally dead. The foul, disorganized portion of an ulcer—called the *slough*—must be considered a kind of sphacelus.

Sphacelus was formerly used for excessive pain; and for agitation from excessive pain, or violent emotion.

SPHÆRA, *Pila*—s. *Marina*, *Pila marina*—s. *Thalassia*, *Pila marina*.

SPHÆRANTHUS INDICUS, Adaca.

SPHERIDION, Pilula.

SPHERION, Globule, Pilula.

SPHEROCEPHALA ELATIOR, Echinops.

SPHEROCOCCUS CRISPUS, Fucus crispus.

SPHAGE, Throat.

SPENDONE, Funda.

SPHENO-SALPINGO-MALLIEN, Laxator tympani.

SPHENO-MAXILLARY, *Sphæno-maxillaris*. That which relates to the sphenoid and maxillary bones.

SPHENO-MAXILLARY OR INFERIOR ORBITAR FISSURE, (F.) *Fente sphéno-maxillaire ou orbitaire inférieure*. called, also, *Foramen lac'cerum inferius*, *F. spheno-maxillare*, is situate at the posterior part of the angle, formed by the union of the internal and inferior parietes of the orbit. It is constituted, above, by the sphenoid bone; below, by the superior maxillary and palate bones; and, before, by the malar bone. It is narrower at the middle than at the extremities, and forms a communication between the orbital cavity and the zygomatic fossa.

SPHENO-MAXILLARY FOSSA is a name given, by some anatomists, to a depression at the union of the spheno-maxillary and pterygo-maxillary fissures.

SPHENO-ORBITAR. A name given, by Bèclard, to the anterior part of the body of the sphenoid bone, which is developed by a variable number of points of ossification.

SPHENO-PALATINE, *Sphenopalatinus*. That which relates to the sphenoid and palate bones.

SPHENO-PALATINE ARTERY, or *Large lateral nasal*, is the termination of the internal maxillary. It enters at the posterior part of the superior meatus of the nose, through the spheno-palatine foramen, and spreads its numerous branches on the pituitary membrane covering the septum, the cornua, and the meatus.

FORAMEN SPHENO-PALATINUM is a round aperture, formed by the vertical portion of the os palati and the sphenoid. It establishes a communication between the nasal fossæ and the zygomatic fossa.

SPHENO-PALATINE GANGLION, or *Ganglion of Meckel*, *Sphenoidal G.* (Ch.) A small, nervous, cordiform, or triangular ganglion, of variable size, situate without the foramen spheno-palatinum, in the pterygo-maxillary fissure. It seems suspended, by several nervous filaments, to the trunk of the superior maxillary nerve, and gives off *internal or spheno-palatine filaments*, *inferior or palatine filaments*, and a *posterior filament*, which is the *Vidian or pterygoid nerve*.

SPHENO-PALATINE NERVES or *Lateral nasal*, arise from the ganglion—just described—at its inner part, and enter the nasal fossæ by the spheno-palatine foramen. They are 5 or 6 in number, and distribute their filaments to the outer and inner parietes of the nasal fossæ. One of the most remarkable branches is the *Naso-palatine*, (q. v.)

SPHENO-PALATINUS, Levator palati.

SPHENO-PARIETAL, *Spheno-parietalis*. That which belongs or relates to the sphenoid and parietal bones.

SPHENO-PARIETAL SUTURE is formed by the

articulation of the extremity of the greater ala of the sphenoid with the anterior and inferior angle of the parietal bone.

SPHENO-PTERYGO-PALATINUS, *Circumflexus*—s. *Salpingo-staphylinus*, *Circumflex*.

SPHENO-STAPHYLINUS, Levator palati.

SPHENO-TEMPORAL, *Spheno-temporalis*. That which belongs to the sphenoid and temporal bones.

SPHENO-TEMPORAL SUTURE is the suture at the articulation of the great ala of the sphenoid bone with the squamous portion of the temporal. Bèclard gives the name—*spheno-temporal*—to the posterior part of the body of the sphenoid, which is developed by distinct points of ossification.

SPHENOID, *Sphenoides Os*, from *σφην*, 'a wedge,' and *ειδος*, 'resemblance.' *Os basilarè*, seu *cuneiforme* seu *cu'no comparatim*, seu *sphenoidale*, seu *multiforme*, seu *azygos*, seu *papillare*, seu *polymorphon*, seu *paxillare*, seu *bazillare*, seu *alaforme*, seu *sphenoides*, seu *respiriforme*, seu *inconjugatum*, *Pterygoid Bone*. An azygous bone, situate on the median line, and at the base of the cranium. It articulates with all the other bones of that cavity; supports them, and strengthens their union. Its form is singular, and resembles a bat with its wings extended. It has, 1. An *inferior or guttural surface*, on which is situate the crista, that joins the vomer; a channel, which concurs in forming the pterygo-palatine foramen; the pterygoid process; the pterygoid fossa; the scaphoid depression; the Vidian or pterygoid canal; the foramina—ovale, spinale, &c. 2. A *superior or cerebral surface*, on which are:—the clinoid processes; the pituitary fossa; the foramina (ovale, rotundum, and spinale); the *Apophysis of Ingrassias* or lesser wing; the foramen opticum, &c. 3. An *occipital or posterior surface*, which is articulated with the basilar process of the occipital bone. 4. An *anterior or orbito-nasal surface*; having, anteriorly, a crista to unite with the ethmoid bone; and, on each side, a round aperture, which leads into two cavities in the substance of the bone, separated by a middle septum, and called the *sphenoidal sinuses*. 5. Two *zygomato-temporal or external surfaces*, which correspond to the temporal and zygomatic fossæ.

Some divide the sphenoid into *body* or *middle portion*; and *ala*, which are four in number, and are subdivided into *great (Temporal Plates or Wings)* and *little (Apophyses of Ingrassias)*. The *Sphenoid suture* surrounds the bone.

SPHENOID, SPINOUS PROCESS OF THE, *Sphenoidal spine*.

SPHENOIDAL, *Sphenoidal*. That which belongs or relates to the sphenoid.

CORNUA SPHENOIDALIA, *Cornets sphenoidaux*, *Cornets de Bérin*, *Ossa triangulæria*, *Pyramids of Wistar*. Two small, thin, and curved bones, situate between the sphenoid and ethmoid, with which they are confounded, in the adult. They have the shape of a hollow pyramid, with the base turned backwards; and are developed by a single point of ossification. They are articulated with the sphenoid, ethmoid, palate bone, and vomer.

SPHENOIDAL OR SUPERIOR ORBITARY FISSURE, *Foramen lac'cerum superius*, (F.) *Fente sphénoïdale*, is a large fissure, situate between

the great and little ala of the sphenoid. It is seen at the upper and back part of the orbit, between which and the cranium it is a means of communication.

SPHENOIDAL SPINE, (F.) *Épine sphénoïdale*, *Spinous Process of the Sphenoid*;—1. A projecting crista at the inferior surface of the sphenoid bone, for articulation with the vomer. 2. A triangular process, *Apophyse sous-temporale*, (Ch.) met with near the posterior margin of the same bone, behind the foramen spinale. At the point of the spinous process, a *styloid process* is frequently met with.

SPHENOIDES, Cuneiform.

SPHENOSIS. See Wedged.

SPHEX, Wasp.

SPHINCTER, *Constrictor*; from σφινγω, 'I constrict.' A name given to several annular muscles, which constrict or close certain natural openings.

SPHINCTER ANI, *Annularis Ani*. Many anatomists have described two sphincter muscles of the anus;—1. The *S. externus*, *Aspidiscos*, *S. cutaneus*, *Coccygio-cutané-sphincter*, *Orbicularis Recti*, *Constrictor Ani*, *Coccygio-anal*, (Ch.) It is situate around the anus; is elliptical from before to behind; flattened, and pierced at its middle. Its fibres describe concentric arcs, which are attached, behind, to the extremity of the coccyx, by a dense, cellular substance; and are confounded, anteriorly, with the bulbo-cavernosi and transversus perinæi muscles. This muscle contracts and closes the anus. 2. The *inner or internal Sphincter Ani*, *Sphincter intestinalis* of Winslow, is, by many anatomists, considered as the termination of the circular fibres of the rectum. It is annular, and situate around the inferior extremity of the rectum, to the extent of about a finger's breadth. It has the same uses as the other.

SPHINCTER GULÆ, *Constrictores pharyngis*—*s. Ilei*, *Bauhin*, valve of—*s. Intestinalis*, *Sphincter ani internus*—*s. Labiorum*, *Orbicularis oris*—*s. Oculi*, *Orbicularis palpebrarum*—*s. Palpebrarum*, *Orbicularis palpebrarum*—*s. Pylori*, see *Pylorus*—*s. Vaginæ*, *Constrictores cunni*—*s. Ventriculi*, *Pylorus*.

SPHINCTER VESICÆ, *Sphincter of the bladder*. Some anatomists have given this name to whitish, elastic, and circular fibres, which surround the neck of the bladder, but do not constitute a particular muscle. Morgagni has given the name **PSEUDO-SPHINCTER** to the anterior fibres of the levator ani, which pass beneath the neck of the bladder, and, by their contraction, close that opening.

SPHRAGIDONYCHARGOCOME'TA, from σφραγις, 'a seal,' οὐνξ, 'the nail,' ἄργος, 'white,' or perhaps ἀργυρεός, 'silver,' and κομεῖν, 'I adorn.' A charlatan who adorned his fingers to the very nails with rings.—Aristophanes. Hippocrates.

SPHYG'MICA ARS, from σφυγμος, 'the pulse.' The art of judging by the pulse, in health or disease.

SPHYGMOCEPHALUS, *Crotaphe*.

SPHYGMOLOG'IA, from σφυγμος, 'the pulse,' and λογος, 'a description.' The doctrine of the pulse.

SPHYGMOMETER, *Pulsilegium*.

SPHYGMOS, *Pulsation*, *Pulse*.

SPHYRA, *Malleolus*.

SPHYXIS, *Pulsation*.

SPIC, *Lavendula*.

SPICA, *Fascia Inguinalis*: the *Spica bandage*, (F.) *Épi*. A bandage, so called in consequence of its somewhat resembling a *spike* of barley. The turns of the bandage cross like the letter V;—each leaving a third of the roller uncovered. It is distinguished into *ascending* and *descending*. It may be applied over various parts of the body; and in a different manner in each case: thus, there is the *Spica inguinalis*, *Spica inguinalis duplex*, the spica for the shoulder, and another for the thumb.

SPICA ALPINA, *Valeriana Celtica*—*s. Celtica*, *Valeriana Celtica*—*s. Indica*, *Nardus Indica*—*s. Nardi*, *Nardus Indica*.

SPICES, **FOUR**. See *Myrtus pimenta*.

SPICILLUM, *Specillum*.

SPIDERWORT, *Liliago*.

SPIGELIA, *S. Marilandica*.

SPIGE'LIA MARILAN'DICA, *Anthel'mia*, *Spigelia Lonic'era*, *Pe'en'rial Wormgrass* or *Indian Pink*, *Caroli'na Pink*. *Nat. Order*, *Gentianææ*. *Class*, *Pentandria*. *Order*, *Monogynia*. *Indigenous*. The root—*Spigelia*, (Ph. U. S.)—is celebrated as an anthelmintic, particularly in cases of lumbrici. It is, also, asserted to have been found serviceable in remittent fever. It is a narcotico-acrid. Dose, gr. x to ʒss.

SPIGNEL, *Æthusa meum*.

SPIKENARD, *Conyza squarrosa*, *Nardus Indica*.

SPILAN'THUS ACME'L'LA, *Achmella*, *Ac-mella*, *Balm-leaved Spilanthus*. *Family*, *Corymbifera*. *Sex. Syst.* *Syngenesia*, *Polygamia æqualis*. This plant possesses a glutinous, bitter taste, and fragrant smell. The herb and seed are said to be diuretic and emmenagogue. They have been used in dropsies, jaundice, fluor albus, and calculous complaints;—given in infusion.

SPILANTHUS, **BALM-LEAVED**, *Spilanthus acmella*.

SPILANTHI'US OLERA'CEUS, *Spear-leaved Spilanthus*, (F.) *Cresson de Para*. A tincture of the plant has been recommended in toothache.

SPILOSIS, *Epicchrosis*—*s. Ephelis*, *Ephelides*—*s. Poliosis*, *Poliosis*.

SPILSBURY'S ANTISCORBU'TIC DROPS. An empirical preparation, formed of *hydrarg. ozymur.*, *rad. gentian.*, *cort. aurant. sic.*, āā ʒij, *antimon. crud.*, *santal. rubr.* āā ʒj, *spiritus vini rectif.*, *aquæ*, āā ʒviij.

SPINA, 'a thorn,' *Spine*, (F.) *Épine*. A process on the surface of a bone, which has been compared to the spines or thorns on certain vegetables. The chief processes of this name, are:—the *nasal spine*, the *spine of the scapula*, the *spine of the ischium*, the *four iliac spines*, the *palatine spine*, the *maxillary*, the *sphenoid*, &c. The *spine of the back* is the collection of vertebræ constituting the *vertebral column*, (q. v.)

SPINA, *Penis*—*s. Acidia*, *Oxycantha Galeni*—*s. Egyptiaca*, see *Acaciæ gunimi*—*s. Alba*, *Carduus marianus*, *Mespilus oxyacantha*—*s. Bifida*, *Hydrorachis*—*s. Cervina*, *Rhamnus*—*s. Dorsi*, *Vertebral column*—*s. Ferrea*, *Pin*—*s. Helmon-tii*, *Aiguillon*—*s. Hirci*, *Astragalus verus*—*s. Infectoria*, *Rhamnus*.

SPINA VENTO'sa, *Spinæ ventos'itas*, *Tere'do*, *Fungus Articuli*, *Arthroacæ*, *Pæd'arthroacæ*, *White Swelling*, (of some), *Sideratio Ossis*, *Cancer Ossis*, *Gangræna Ossis*, *Exosto'sis*. A term of no definite meaning, as is obvious from these

various words having been considered its synonimes. By some, it is defined to be—a disease of the osseous system, in which the texture of the bone dilates, seeming to be distended with air; and constituting a variety of osteo-sarcoma. By others, it is considered to be a tumour arising from an internal caries of a bone; occurring most frequently in the carpus or tarsus. The term itself is a translation from the Arabic of Rhazes.

SPINA VENTOSA, Hydrarthrus, Mollities ossium—s. Vertebralis, Vertebral column.

SPINACH, Spinacia.

SPINACIA, *Spina'chia*, *Spina'cia olera'cea*, *Spin'age*, *Spinach*, (F.) *Épinard*. Family, Atriplicæ. Sex. Syst. Diœcia Pentandria. A plant which resembles the cabbage in its dietetic powers. The leaves boiled, with the addition of oil, form a good emollient cataplasm. It has been used in phthisical complaints; but its medicinal properties, if it have any, are not now regarded.

SPINÆ VENTOSITAS, Spina ventosa.

SPINAGE, Spinacia.

SPINAL, *Spina'lis*, from *spina*, 'the spine.' That which relates to the vertebral column.

SPINAL ARTERIES are two in number, viz: 1. The posterior spinal, *Artère médiane postérieure du Rachis*, (Ch.) It arises from the vertebral, near the corpora pyramidalia, and descends on the posterior surface of the spinal marrow, distributing its ramifications to it. 2. The anterior spinal artery, *A. médiane antérieure*, (Ch.) is larger than the last, and arises, also, from the vertebral. It descends, in a serpentine manner, upon the anterior surface of the marrow; furnishes ramusculi to it, and unites with that of the opposite side, opposite the foramen magnum occipitis. A very tortuous branch arises from this union, which descends as far as the inferior extremity of the marrow, to which it sends numerous divisions.

The term SPINAL ARTERIES or RACHIDIAN ARTERIES is also given, in the abstract, to all the arteries of the spinal marrow and vertebral canal. The same may be said of the veins and nerves.

SPINAL CORD, *Medulla spinalis*—s. Prolongation, *Medulla spinalis*.

SPINAL FORAMINA, (F.) *Trous rachidiens*, in the abstract, are the foramina, formed by every two contiguous vertebræ, through which the spinal nerves issue. See Vertebral. The term FORAMEN SPINALE is especially applied, however, to a small foramen, in front of the spinous process of the sphenoid bone, through which the middle artery of the dura mater enters the cranium. It is, likewise, called *Foramen sphenospinosum*, (F.) *Trou sphéno-épineux* ou *petit rond*, *Trou épineux*.

SPINAL IRRITATION, *Rhachialgi'tis*. A modern pathological view, which refers most nervous diseases to irritation of the spinal cord. This irritation is presumed to be indicated by tenderness on pressure over the spinous process of one or more vertebræ, or over the nerves proceeding from the cord and distributed to the parts at the sides of the spine. Such tenderness, however, by no means indicates the pathological condition in question, as it is often met with in those enjoying perfect health. The treatment advised is cupping and counter-irritation on each side of the spine, which may

be beneficial in such diseases, no matter what part of the frame may be in a morbid state, by exciting a new and revellent impression on a very sensible portion of the cutaneous surface.

SPINAL NERVE, *Accessory of the Par vagum*, or 8th pair, *Accessory nerve of Willis*, *Spinal Accessory*, *Spino-cranio-trapézien*, *Superior respiratory N*, *Eleventh pair of encephalic nerves*, *Trachélo dorsal*, (Ch.) arises from the medulla spinalis, within the vertebral canal, between the anterior and posterior roots of the cervical nerves, at a greater or less distance from the cranium. The roots unite to form the nerve, which ascends into the cranium through the foramen magnum of the occipital bone, and issues by the foramen lacerum posterius, crossing the sterno-cleido-mastoideus, to which it gives filaments, and losing itself entirely on the trapezius muscle.

SPINALES COLLI MINORES, Interspinales colli—s. et Transversales lumborum, Transversalis dorsi.

SPINALIS CERVICIS, Semi-spinalis colli—s. Colli, Semi spinalis colli.

SPINALIS DORSI, *Grand épineux du dos*, *Spinalis Dorsi major*. Winslow calls thus, some fleshy fasciculi, which are situate on the lateral surfaces of the spinous processes; from the third dorsal vertebra to the first or second lumbar; and which form part of the transversospinalis of most authors. The same anatomist calls—*Spina'lis Dorsi minor*, *Petit épineux du dos*—some small, fleshy fibres, situate on each side of the interspinal ligament. They are short, flat, and pass from one spinous process to the other. Like the preceding, they form part of the transversospinalis. All these fleshy fasciculi strengthen the vertebral column.

SPINATI, Interspinales colli.

SPINE, Vertebral column—s. Curvature of the, Gibbositatis.

SPINI-AXOIDO-OCCIPITALIS, Rectus capitis posticus major—s. *Axoido-trachélio-atloïdien*, Obliquus inferior capitis.

SPINITIS, Myelitis.

SPINO-DORSITIS, Myelitis.

SPINOLA, Hydrorachis.

SPINOUS, *Spino'sus*, (F.) *Épineux*. Having the shape of a spine or thorn.

SPINOUS PROCESSES or APOPHYSES of the Vertebræ, *Acan'tha*, *Cyno'lophoi*, (F.) *Apophyses épineuses*, are situate at the posterior part of each vertebra, and afford attachment to the muscles, whose office it is to extend the spine. See Vertebra.

SPIRACULA, Pores of the skin.

SPIRÆA FILIPENDULA, *Filipendula*, *Saxifraga rubra*, *Dropwort*, (F.) *Filipendule*. Family, Rosacæ. Sex. Syst. Icosandria Pentagynia. The root of this plant is said to possess astringent and lithontriptic virtues.

SPIRÆA TOMENTOSA, *Hardback*. This indigenous species, which is abundant in the northern states of the Union, is tonic and astringent; and is usually administered either in the form of extract or of decoction, (*spirææ* ʒss; *aque* Oj.)

SPIRÆA TRIFOLIATA, *Gillenia trifoliata*

SPIRÆA ULMARIA, *Ulmaria*, *Regi'na Prati*, *Barba capræ*, *Meadow Sweet*, *Queen of the Meadows*, *Barb'ula capr'ina*, (F.) *Ulmair*. *Reine des Prés*. The leaves have been recommended

as mild astringents:—the flowers as antispasmodics and diaphoretics.

SPIRAMENTUM ANIMÆ, Pulmo.

SPIRATIO, Respiration.

SPIRIT, *Spiritus*, from *spirare*, 'to exhale or steam.' (F.) *Espirit*. A name given to every liquid product of distillation. These were formerly distinguished into—*inflammable, acid, and alkaline*; and consequently a number of substances were crowded together, which often resembled each other in no other property than in being volatile. The term is now confined to alcoholic liquors, of which the following are the chief.

AGUA ARDIENTE. Distilled from pulque, the fermented juice of the Agave, by the Mexicans.

ARRACK. Distilled from coarse palm sugar, named jaggery, fermented with the bark of the *Mimosa leucophlea*; also from rice and the fermented juice of the Palm; made in India. Its varieties are—

1. *Mahwah Arrack*. Made in India from the flowers of the Madhuca tree, *Bassia butyracea*.

2. *Tuba*. Made from palm wine, in the Philippine Islands.

ARAKA. Distilled, by the Tartars, from koumis, fermented mares' milk.

ARAKI. Distilled from dates, by the Egyptians.

ARIKA. A variety of koumis, distilled from fermented mares' milk, in Tartary and Iceland.

BRANDY. Distilled from wine, figs, peaches, Persimmon apple, mulberries, and sometimes other fruits, in Europe, Asia, N. and S. America, wherever wine is made. The best brandy is that of Cognac; the next, that of Bordeaux and Rochelle. The varieties are—

1. *Lau*. Made from rice, in Siam.

2. *Rakia*. Made in Dalmatia from the husks of grapes mixed with aromatics.

3. *Rossolio*. Made at Dantzic, from a compound of brandy, rossolis, and other plants.

4. *Troster*. Made on the Rhine, from the husks of grapes, fermented with barley and rye.

5. *Sekis-kayarodka*. Made from the lees of wine and fruit at Scio.

GENEVA HOLLANDS, (*genièvre*, French for juniper.) Distilled from malted barley and rye, rectified on juniper berries, in Holland. Its variety is—

Gin. Made in England, from malted barley, rye, potatoes; rectified with turpentine.

GOLDWASSER. Distilled at Dantzic, from wheat, barley, and rye, rectified with aniseed, cinnamon, and other spices.

KIRSCHWASSER. Distilled from the Malach cherry, in Switzerland.

MARASCHINO. Distilled from the Macarska cherry, at Zara, the capital of Dalmatia.

RUM, (supposed to be derived from the terminal syllable of the word *saccharum*: but the native Americans called this liquor Rum.) Distilled, in the West Indies and South America, from cane-sugar and molasses, and in North America from maple-sugar. Its variety is—

Slathua trava. Made at Kamtschatka, from a sweet grass.

SHOW-CHOO. Distilled, in China, from the lees of Mandarin, a wine made from boiled rice.

WHISKY, (supposed to be derived from *usque*, the two first syllables of *usquebaugh*, the original name in Ireland.) Distilled, in Scotland and

Ireland, from malted and raw barley, rye, oats, and potatoes; and in the south of France, from sloes. In Ireland it was called *buil-ceann*, or madness of the head. The best Scotch whisky is *Glenlivet*, the best Irish, *Enniskillen*.

Y-WER-A. Distilled, in the Sandwich Islands, from the root of the Tee-root, baked, pounded, and fermented.

To these may be added an intoxicating liquor, made by the Afghanihans, from ewes' milk; and that made at Kamtschatka, from a species of mushroom, named muchumer.

SPIRIT OF ANISEED, *Spiritus anisi*—s. Bathing, Freeman's, see *Linimentum saponis compos.*—s. Bathing, Jackson's, see *Linimentum saponis compos.*—s. Bezoardic of Bussius, see *Bussii spiritus Bezoardicus*—s. Bone, *Liquor volatilis cornu cervi*—s. of Burhus, *Burhi spiritus matricialis*—s. of Carraway, *Spiritus carui*—s. of Ether, aromatic, *Spiritus ætheris aromaticus*—s. Fuming, of Beguin, *Ammonie sulphuretum*—s. Fuming, of Boyle, *Ammonie sulphuretum*—s. of Hartshorn, *Liquor cornu cervi*—s. of Horseradish, compound, *Spiritus armoracis compositus*—s. of Lavender, *Spiritus lavandulæ*—s. of Lavender, compound, *Spiritus lavandulæ compositus*—s. of Mindererus, *Liquor ammoniæ acetatis*—s. of Nitre, sweet, *Spiritus ætheris nitrici*—s. of Nitric ether, *Spiritus ætheris nitrici*—s. of Pennyroyal, *Spiritus pulegii*—s. of Peppermint, *Spiritus menthæ piperitæ*—s. Proof, *Spiritus tenuior*—s. of Salt, *Muriaticum acidum*—s. of Scurvygrass, golden, see *Spiritus armoracis compositus*—s. of Spear-mint, *Spiritus menthæ viridis*—s. of Sulphuric ether, *Spiritus ætheris sulphurici*—s. of Sulphuric ether, compound, *Spiritus ætheris sulphurici compositus*—s. of Turpentine, *Oleum terebinthinæ rectificatum*—s. Verdigris, *Aceticum acidum*—s. of Wine and camphor, *Spiritus camphoræ*.

SPIRITS, ANIMAL, Nervous fluid.

SPIRITUS, Breath, Respiration—s. *Æthereus nitrosus*, *Spiritus ætheris nitrici*—s. *Æthereus vitriolicus*, *Spiritus ætheris sulphurici*.

SPIRITUS ÆTHERIS AROMATICUS, *Æther Sulphuricus cum alcohol'e aromaticus*, *Eliz'ir vitrioli dulcè*, *Sweet Eliz'ir of Vitriol*, *Vigani's Eliz'ir of Vitriol*, *Aromatic Spirit of Ether*. (*Cinnam. cort. contus. Zijj, cardam. sem. contus. Ziss, piperis longi fruct. cont., zingib. rad. concis.*, sing. $\frac{3j}{j}$, *spiritus ætheris sulphurici*. Oj. Macerate, for 14 days, in a stopped glass vessel, and strain. Ph. L.) It is used as a stimulant in nervous affections. Dose, f. $\frac{3ss}{ss}$ to f. $\frac{5j}{j}$.

SPIRITUS ÆTHERIS NITRICI, *Sp. Ætheris nitrosi*, *Sp. nitri dulcis*, *Sp. Æthereus nitrosus*, *Sweet Spirit of Nitre*, *Nitre drops*, *Æther nitricus ulcoolisatus*, *Spirit of Nitric Ether*. (*Nitrate of Potassa*, in coarse powder, $\frac{viij}{j}$, *Sulphuric acid*, $\frac{viiss}{j}$: *Alcohol*, Ojss; *Diluted Alcohol*, Oj; *Carbonate of Potassa*, $\frac{3j}{j}$. Mix the nitrate of potassa and the alcohol in a large glass retort, and having gradually poured in the acid, digest with a gentle heat for two hours; then raise the heat, and distil a gallon. To the distilled liquor add the diluted alcohol and carbonate of Potassa, and again distil a gallon.—Ph. U. S.) It is refrigerant, diuretic, antispasmodic, and diaphoretic. Dose gr. xxv. to f. $\frac{3j}{j}$.

SPIRITUS ÆTHERIS SULPHURICI, *Æther Sulphuricus cum Alcohol'e*, *Liquor Æthericus Sulphuricus*, *Spiritus Vitrioli dulcis*, *Spiritus Æther-*

ris vitriolici, Liquor Sulphuricus alcoholisatus, Spirit of Sulphuric Ether. (*Æther. sulphuric, Oss, sp. rect. Oj. Mix. Ph. L.*) Stimulant, diaphoretic, diuretic, and antispasmodic. Dose, f. ʒss to f. ʒij.

SPIRITUS ÆTHERIS SULPHURICI COMPOSITUS, Sp. ætheris vitriolici compositus, Liquor anodynus Hoffmanni, Compound Spirit of Sulphuric ether, Hoffmann's Anodyne Liquor. (*Æther. Sulphuric, Oss; Alcohol, Oj; Ol. Æther. f. ʒij. Ph. U. S. Ph. L.*) Mix. A stimulant and antispasmodic.

SPIRITUS ÆTHERIS VITRIOLICI COMPOSITUS, Spiritus ætheris sulphuric. comp.

SPIRITUS AMMONIÆ, Al'kali ammoniacum spirituosum, Alcohol ammoniatum, Sp. salis ammoniaci, Ammoniacal alcoholised tincture, Liquor ammoniaci vinosus, L. ammoniac spirituosus, Lixivium ammoniacale vinosum, Spiritus salis ammoniaci vinosus seu dulcis seu dulcificatus, Solutio subcarbonatis ammoniaci spirituosus, (F.) Esprit d'ammoniaque. (*Ammon. muriat. in pulv. subtilissim., calcis, aa lbj; alcohol. f. ʒxx; aquæ, ʒix.*) The water is employed to slake the lime; the muriate of ammonia is then well mixed with it, and by means of heat, the ammonia is made to pass into the distilled water contained in a quart bottle. (*Ph. U. S.*) Stimulant and antispasmodic. Dose, f. ʒss to f. ʒj.

SPIRITUS AMMONIÆ AROMATICUS, Alcohol ammoniatum aromaticum, Aromatic ammoniated Alcohol, Sal volatilis Drops, Spiritus salis volatilis oleosus, Sp. volatilis aromaticus, Sal volatile oleosum Syllæi, Sp. ammoniac compositus, Tinctura aromatica ammoniata, Liquor oleosus Syllæi, Lixivium ammoniacale aromaticum. (*Ammon. muriat. ʒv; Potass. carb. ʒviij; cinnam. cont., caryophyll. cont. aa ʒij; Limon. cort. ʒiv; alcohol, aquæ aa Or. M. Distil Ovijs.*) Stimulant. Dose, f. ʒss to f. ʒj.

SPIRITUS AMMONIÆ COMPOSITUS, Spiritus aromaticus.

SPIRITUS AMMONIÆ FÆTIDUS, Sp. volatilis fetidus. Fit Drops, Alcohol ammoniatum fetidum, Tinctura asafetide ammoniata, Fetid Spirit of Ammonia. (*Sp. ammoniac Oij, asafetide ʒij. Macerate for 12 hours, and distil Oiss. Ph. L.*) Stimulant and antispasmodic. Dose, f. ʒss to f. ʒj.

SPIRITUS AMMONIÆ SUCCINATUS, Succina'ted Spirit of Ammonia, Common Eau de Luce, Ammoniacum succinatum, Aqua Lul'ciæ, Liquor ex Ammonia et Oleo Succini, Liquor excitans, Spiritus Ammoniac cum Succino, Sp. Salis Ammoniaci lactescens seu lacteus. (*Mastich. ʒijj, sp. rect. f. ʒix, ol. lavand. gtt. xiv, succin. ol. gtt. iv. liq. ammon. f. ʒx.*) Macerate the mastich in the alcohol, and pour off the clear tincture: add the rest, and shake. (*Ph. L.*) Stimulant and antispasmodic. Dose, gtt. x to f. ʒss or f. ʒj.

SPIRITUS ANISI, Spiritus Anisi compositus, Aqua Anisi fortis, Aqua Seminum Anisi composita, Spirit of Aniseed, (F.) Esprit d'anis. (*Anisi sem. cont. lbs, spirit. tenuior. cong., aquæ quod satis sit ad prohibendum empyreuma. Ph. L.*) Carminative. Dose, f. ʒss to f. ʒss. In the compound spirit, angelica is usually an ingredient.

SPIRITUS ANTHOS, Spiritus rosmarini.

SPIRITUS ARMORACIÆ COMPOSITUS, Sp. Raphani compositus, Aqua Raphani composita, Compound Spirit of Horseradish, (F.) Esprit de rai-fort compound. (*Armorac. rad. recent. concis.,*

aurant. cort. exsicc., sing. lbj, myrist. nuc. contus. ʒss, spirit. ten. cong. j, aquæ q. s. ad prohibendum empyreuma. Ph. L.) Stimulant and antiscorbutic. (?) Dose, f. ʒj to f. ʒiv.

The *Golden Spirit of Scurvy Grass*—an empirical preparation—is formed by adding gamboge, ʒviij, to one gallon of the *sp. armoraciæ compositus*.

Greenough's Tincture of the Teeth, is formed of amygd. amar. ʒij, ling. Bresil., cassiæ bacc., aa ʒiv, irid. Florent. ʒij, coccinell., sal. acetosellæ, alum. aa ʒj, sp. vin. rect. Oij, sp. armoraciæ comp. f. ʒss.

SPIRITUS BEGUINIS, Ammoniac sulphuretum.

SPIRITUS CAMPHORÆ, Sp. camphoratus, Sp. vinosus camphoratus, Tinctura Camphoræ, Spirit of Wine and Camphor, Spirit of Camphor, (F.) Esprit de Camphre, Alcohol camphré, Eau de Vie camphré. (*Camphor. ʒiv, alcohol. Oij. Dissolve.*) Stimulant, anodyne and discutient. Used only externally.

SPIRITUS CARUI, Sp. Cari Carui, Spirit of Carraway, Aqua Seminum Carui fortis, A. Seminum Carui, Strong Carui Waters, (F.) Esprit de Carui. (*Carui sem. cont. lbs, sp. tenuior. cong. j, aquæ q. s. Distil a gallon. Ph. L.*) Carminative. Dose, f. ʒj to f. ʒss.

SPIRITUS CINNAMOMI, Sp. Lauri Cinnamomi, Spirit of Cin'namon, Aqua Cinnamomi fortis, Aqua Cinnam. spirituosus, Strong Cinnamon Water, (F.) Esprit de Cannelle. (*Cort. cinnam. ʒv, sp. rect. Oivss.*) Stimulant and carminative. Dose, f. ʒj to ʒss.

SPIRITUS COLCHICI AMMONIATUS, Ammoniated Spirit of Colchicum. (*Sem. colchic. cont. ʒij, sp. ammon. aromat. Oj. Ph. L.*) Nauseotic, cathartic, and diuretic. Used in gout, rheumatism, and dropsy. Dose, from gtt. xxx to f. ʒj.

SPIRITUS CORNI CERVI, Liquor C. C.—s. Fumans Beguini, Ammoniac sulphuretum.

SPIRITUS JUNIPERI COMPOSITUS, Compound Spirit of Juniper, Aqua Juniperi composita. (F.) Esprit de genièvre composé. (*Bacc. junip. cont. lbj, sem. carui cont., feniculi sem. cont., aa ʒiss, sp. ten. cong. j, aq. Oij. Distil a gallon. Ph. L.*) Stimulant and diuretic. Dose, f. ʒj to f. ʒss.

SPIRITUS LAURI CINNAMOMI, Spiritus cinnamomi.

SPIRITUS LAVANDULÆ, Sp. Lavandulæ spicæ, Spirit of Lavender, Sp. Lavand. simpl., Lavender Water, (F.) Esprit de Lavande. (*Lavand. flor. recent. lbj, sp. rectif. cong., aquæ Oij. Distil a gallon.*) Usually made by adding the oil to rectified spirit. Used as a perfume chiefly.

SPIRITUS LAVANDULÆ COMPOSITUS, Tinctura Lavandulæ composita, Red Hartshorn, Lavender drops, Compound Spirit of Lavender, (F.) Esprit de Lavande composé. (*Sp. lavand. Oij, sp. rosmarin. Oj, cinnam., cort. contus. ʒj, myristic. nucleor. cont., ʒss, caryophyll. cont. ʒij, pterocarp. ligni conc. ʒij.*) Macerate for 14 days, and filter through paper. Stimulant. Dose, gtt. xl to f. ʒij.

SPIRITUS LUMERICORUM, Liquor volatilis cornu cervi.

SPIRITUS MENTHÆ PIPERITÆ, Spirit of Peppermint, Aqua Menthæ piperitidis spirituosus, Sp. Menthæ piperitidis, (F.) Esprit de Menthe poivrée. (*Olei menth. pip. ʒvjss, sp. rectif. Oivss, aquæ, q. s. distil a gallon. Ph. L.*) Carminative and stimulant. Dose, f. ʒss to f. ʒij.

SPIRITUS MENTHÆ SATIVÆ, Spiritus menthæ viridis.

SPIRITUS MENTHÆ VIRIDIS, *Spearmint, Spiritus menthæ sativæ, Aqua Menthæ vulgaris spirituosæ*, (F.) *Esprit de Menthe verte*. (*Olei Menth. virid.* ʒviss, *sp. rectif.* Oivss, *aq. q. s.* Distil a gallon. *Ph. L.*) Like the last in properties and dose.

SPIRITUS MILLEPEDARUM, Liquor cornu cervi.

SPIRITUS MYRISTICÆ, *Spiritus Myristicæ Moschatæ*, *Sp. Nucis Moschatæ, Aqua Nucis Moschatæ, Nutmeg Water, Aqua Nephriticæ*, (F.) *Esprit de Muscade*. (*Myrist. nucl. cont.* ʒij, *spirit. tenuior. cong. j*, *aq. Oj.* Distil a gallon. Cordial and carminative. Dose, f. ʒj to f. ʒiv.

SPIRITUS MYRTI PIMENTÆ, Spiritus pimentæ—*s. Nitri vulgaris*, see Nitric acid—*s. Nitri acidus*, Nitric acid—*s. Nitri dulcis*, Spiritus ætheris nitrici—*s. Nitri duplex*, Nitric acid—*s. Nitri fumans*, Nitric acid—*s. Nitri Glauberi*, Nitric acid—*s. Nitri simplex*, see Nitric acid—*s. Nucis moschatæ*, Spiritus myristicæ—*s. Ophthalmicus Mindereri*, Liquor ammoniæ acetatis.

SPIRITUS PIMENTÆ, *Sp. Myrti Pimentæ, Spiritus Pimento, Spirit of Pimento, Aqua Mirabilis*. (*Piment. baccar. cont.* ʒij, *sp. tenuior. cong.*, *aq. Oj.* Distil a gallon. Cordial and carminative. Dose, f. ʒj to f. ʒiv.

SPIRITUS PULEGII, *Spirit of Pennyroyal, Aqua Pulegii spirituosæ, Spirituosus Pennyroyal Water*, (F.) *Esprit de Pouliot*. (*Olei pulegii ʒvij, sp. rect.* Oivss, *aq. q. s.* Distil a gallon. *Ph. L.*) Same as spirit of spearmint in properties and dose.

SPIRITUS RECTIFICATUS, *Sp. Vini rectificatus, Cénostag'ma, Sp. Vini's rectificatus, Alcohol, Spirit of Wine*, (F.) *Esprit de Vin rectifié*. Rectified spirit is much used, in Pharmacy, to dissolve resinous and other substances. It is seldom exhibited internally; although it exists in the diluted state in all vinous and spirituous liquors. Externally, it is employed as a discutient.—*S. G.*, according to the London Pharmacopœia, 0.838; according to that of Dublin, 0.840; of Edinburgh and United States, 0.835, (see Alcohol,) and of Paris, 0.819 to 0.827.

SPIRITUS RECTOR, Aroma—*s. Rhaphani compositus*, Spiritus armoracæ compositus.

SPIRITUS ROSMARINI, *Sp. Rorismarini officinalis, Spirit of Rosemary*, (q. v.) *Spiritus Anthos, Hungary Water*. (F.) *Esprit de Romarin*. (*Ol. rosmarini ʒij, sp. rect. cong. j*, *aq. Oj.* Distil a gallon.) Stimulant. Dose, f. ʒj to f. ʒiv.

SPIRITUS SALIS ACIDUS SEU FUMANS, Muraticum acidum—*s. Salis ammoniaci*, Spiritus ammoniæ—*s. Salis ammoniaci aquosus*, Liquor ammoniæ—*s. Salis ammoniaci lactescens seu lacteus*, Spiritus ammoniæ succinatus—*s. Salis ammoniaci sulphuratus*, Ammoniæ sulphuretum—*s. Salis Glauberi*, Muraticum acidum—*s. Salis marini coagulatus*, Potassæ murias—*s. Salis marini*, Muraticum acidum—*s. Salis volatilis oleosus*, Spiritus ammoniæ aromaticus—*s. Sulphurico-æthereus camphoratus*, Tinctura æthereæ composita—*s. Sulphurico-æthereus martialis*, Tinctura seu alcohol sulphurico-æthereus ferri—*s. Sulphuris*, Sulphurous acid—*s. Sulphuris per campanam*, Sulphurous acid—*s. Sulphuris volatilis*, Ammoniæ sulphuretum—*s. Sulphurous volatilis*, Sulphurous acid.

SPIRITUS TENUIOR, *Alcohol dilutum, Spiritus vinosus tenuior, Proof Spirit*, (F.) *Esprit de vin délayé*. Generally made, for pharmaceutical

purposes, by mixing equal parts of rectified spirit and water. *S. G. Lond.* 0.920; *Edinb.* and *United States*, 0.935. It is employed in the same cases as those in which alcohol is used:—chiefly, as a solvent of vegetable matters, in the form of tinctures.

SPIRITUS VENERIS, Aceticum acidum—*s. Vini rectificatus*, Spiritus rectificatus—*s. Vinosus camphoratus*, Spiritus camphoræ—*s. Vinosus tenuior*, Spiritus tenuior—*s. Vitalis*, Nervous fluid—*s. Vitrioli*, Sulphuric acid—*s. Vitrioli acidus Vogleri*, Sulphuricum acidum dilutum—*s. Vitrioli coagulatus Mynsichti*, Potassæ sulphas—*s. Vitrioli dulcis*, Spiritus ætheris sulphurici—*s. Vitrioli phlogisticatus*, Sulphurous acid—*s. Volatilis aromaticus*, Spiritus ammoniæ aromaticus—*s. Volatilis fœtidus*, Spiritus ammoniæ fœtidus.

SPIROPTERA HOMINIS. See Worms.

SPISSANTIA, Incrassantia.

SPIT, Sputum.

SPITAL, MINERAL WATERS OF. The village of Spital is situate on the south side of the Tweed, near Tweedmouth. The springs there contain chloride of calcium, sulphate of soda, sulphate and carbonate of lime. They act as saline cathartics.

SPITH'AMA, *Dorans*. A measure of twelve fingers' breadth.

SPITTLE, Saliva—*s. Sweet*, see Salivation.

SPLANCHNA, Entrails.

SPLANCHNEURYS'MA, from *σπλαγχνον*, 'an intestine,' and *ευρυσις*, 'I dilate.' Morbid dilatation of the intestines.

SPLANCHNIC, *Splanchnicus, Visceral*, from *σπλαγχνον*, 'viscus.' That which relates to the viscera.

SPLANCHNIC CAVITIES are the three great cavities of the body;—those of the cranium, chest, and abdomen.

SPLANCHNIC NERVES belong to the great sympathetic, and are two in number on each side. They are distinguished into:—1. The *great splanchnic nerve, Grand surnéal*, (Chaus.) Its roots—four or five in number, come from the 6th, 7th, 8th, 9th, and sometimes the 10th thoracic ganglion. They descend inwards, on the sides of the vertebral column, beneath the pleura, and unite into a single trunk, which enters the abdomen through a separation of the fleshy fibres of the pillars of the diaphragm; passes behind the stomach, and divides into several branches, which pass into the semilunar ganglion. 2. The *lesser splanchnic nerve, Splanchnique accessoire*, of Walther, *Petit surnéal*, (Ch.) is composed of two distinct branches, proceeding from the 10th and 11th thoracic ganglion, which unite on the 12th dorsal vertebra into a cord, that pierces the diaphragm singly; enters the abdomen, and divides into two branches, one of which anastomoses with the greater splanchnic nerve, whilst the other sends its filaments to the renal and solar plexuses.

SPLANCH'NICA. Medicines adapted to diseases of the bowels. Also, the 2d order of the class *Caliaca* of Good; defined,—diseases affecting the collatitious viscera, and characterized by,—disquiet or diseased action in the organs auxiliary to the digestive process, without primary inflammation.

SPLANCHNO'DYNĒ, from *σπλαγχνον*, 'a viscus,' and *δυσνη*, 'pain.' Pain in the bowels.

SPLANCHNOGRAPHY, *Splanchnogra'phia*, from *σπλᾶγχνον*, 'a viscus,' and *λογος*, 'a description.' The part of anatomy which treats of the viscera.

SPLANCHNOL'OGY, *Splanchnolog'ia*, from *σπλᾶγχνον*, 'a viscus,' and *λογος*, 'a discourse.' A treatise on the viscera:—also, *Splanchnography*.

SPLANCHNOPATH'IA, from *σπλᾶγχνον*, 'a viscus,' and *πάθος*, 'suffering.' A disease of the intestines.

SPLANCHNOTOMY, *Splanchnotom'ia*, from *σπλᾶγχνον*, 'a viscus,' and *τεμνω*, 'I cut.' Dissection of the viscera.

SPLEEN, *σπλήν*, *Lien*, (F.) *Rate*. A soft, spongy, parenchymatous organ; of a more or less deep violet red, situate deeply in the left hypochondrium, below the diaphragm, above the colon, between the great tuberosity of the stomach and the cartilages of the false ribs, and above and anterior to the kidney. Its ordinary length is $4\frac{1}{2}$ inches; its thickness, $2\frac{1}{2}$; and its weight 8 ounces. Its parenchyma, which is bathed in blood, contains a multitude of grayish, soft, and semi-transparent granulations—*splenic corpuscles*. It is covered by a serous membrane, furnished by the peritoneum; and by a proper coat, of a fibrous nature, which is intimately united with it, and transmits, into its interior, some delicate, solid, and very elastic prolongations. At its inner edge is a fissure, by which the vessels and nerves enter the tissue. The functions of the spleen are unknown. One of the latest opinions is, that it belongs to the lymphatic system.

SPLEEN, Hypochondriasis.

SPLEENWORT, *Asplenium*, *Asplenium scolopendrium*.

SPLENAL'GIA, from *σπλήν*, 'the spleen,' and *αλγος*, 'pain.' Pain in the spleen.

SPLENALGIA SUBINFLAMMATORIA CHRONICA, *Splenoncus*.

SPLENECTOM'IA, from *σπλήν*, 'the spleen,' *εκ*, 'out of,' and *τεμνω*, 'I cut.' Extirpation of the spleen.

SPLENECTOP'IA, *Dislocatio lienis seu splenis*; from *σπλήν*, 'the spleen,' and *εκτοπος*, 'out of place.' Dislocation of the spleen. Not a common occurrence.

SPLENEMPHRAX'IS, from *σπλήν*, 'the spleen,' and *εμφρασσω*, 'I obstruct.' Obstruction of the spleen.—Vogel.

SPLENES, Hypochondriasis.

SPLENET'ICUS, *Splēnicus*, (F.) *Ratéleux*. That which relates to the spleen: one labouring under diseased spleen. Medicines adapted to diseases of the spleen.

SPLENIC, *Splēnicus*, from *σπλήν*, 'the spleen.' That which relates to the spleen. A name given to several parts.

SPLENIC ARTERY It arises from the celiac; and passes from right to left, forming many windings along the upper edge of the pancreas, which lodges it in a special groove. It reaches the fissure of the spleen, and divides into several branches, that enter the organ. In its course it furnishes the pancreatic, left gastro-epiploic, and the *tansa brevis*.

SPLENIC PLEXUS is a nervous network, which proceeds from the celiac plexus, and accompanies the splenic artery, sending secondary plexuses to each division.

SPLENIC VEIN arises from the spleen, and ac-

companies the splenic artery; proceeding from left to right, to unite with the superior mesenteric vein, and to form, with it, the abdominal vena porta. In its course, it receives veins corresponding to the vasa brevia, the right and left gastro-epiploic, the duodenal, pancreatic, coronaria ventriculi, and inferior mesenteric veins.

SPLENIC CACHEXIA, see *Cachexia splenica*—s. *Corpuscles*, see *Spleen*.

SPLENICUS, *Spleneticus*.

SPLENIS TUMOR, *Ague cake*.

SPLENITIS, from *σπλήν*, 'the spleen,' and *itis*, denoting inflammation. Inflammation of the spleen. *Empres'mu splenitis*, *Inflammatio lienis*, *I. splenis*, (F.) *Inflammation de la Rate*. A rare disease characterized by local pain, swelling, and heat; which, sometimes, terminates by suppuration. It must be treated like other inflammations.

SPLENIUM, *Compress*—s. *Cruciatum*, *Croix de Malte*.

SPLENIUS, *S. Capitis*, *S. Colli*, *Cervico-dorso-mastoidien et dorso-trachélicn*, *Posterior mastoid muscle*, *Cervico-mastoidien* (Ch.) So called from its resemblance to the *spleen* of certain animals. A muscle, situate at the posterior part of the neck, and upper part of the back. It is much broader above than below, where it terminates in a point. It is attached, by its inner edge, to the spinous processes of the first five dorsal vertebræ; to that of the 7th cervical, and to the inferior part of the posterior cervical ligament. By its upper extremity, it is attached to the transverse processes of the first two cervical vertebræ, to the mastoid process, and to the posterior surface of the occipital bone. Some have considered this muscle to be formed of two portions, which they have called *Splenius colli*, and *Splenius capitis*. The *splenius* extends the head, inclines it, and rotates it. If the *splenii* of each side act together, they extend the head.

SPLENOCE'LE, from *σπλήν*, 'the spleen,' and *κηλη*, 'a tumour.' Hernia formed by the spleen.

SPLENOGRAPHY, *Splenograph'ia*, from *σπλήν*, 'the spleen,' and *γραφη*, 'a description.' A description of the spleen.

SPLENOHÆM'IA, (F.) *Splénohémie*, from *σπλήν*, 'the spleen,' and *αἷμα*, 'blood.' Congestion or hyperæmia of the spleen, a common phenomenon in many diseases, especially in typhoid and intermittent fevers.

SPLENOLOGY, *Splenolog'ia*, from *σπλήν*, 'the spleen,' and *λογος*, 'a discourse.' A treatise on the spleen.

SPLENO'NCUS, *Megalosplen'ia*, *Hypertroph'ia seu Supernutritio splenis seu lienis*, *Intumescen'tia lienis*, *Splēnal'gia subinflammatoria chron'ica*, *Splenemphrax'is* (q. v.), (F.) *Hypertrophie de la Rate*, *Hypersplēnotrophie*, from *σπλήν*, 'the spleen,' and *γκκος*, 'a tumour.' Tumor of the spleen. See *ague cake*.

SPLENOPAREC'TAMA, from *σπλήν*, 'the spleen,' and *παρεκταμα*, 'excessive volume.' Excessive enlargement of the spleen.—Ploucquet.

SPLENOTOMY, *Splenotom'ia*, from *σπλήν*, 'the spleen,' and *τεμνω*, 'I cut.' Dissection of the spleen.

SPLINT, *Teut. Splinter*, from *splijten*, 'to split:' *Hastella*, *Ass'ula*, *Asser'culum*, *Plag'ula*, *Nurthez*, *Fer'ula*. (F.) *Attelle*, *Éclisse*. A flexible and resisting lamina of wood, used in the treatment of fractures, to keep the frag-

ments in apposition, and prevent their displacement. Splints are made of iron, wood, bark of trees, leather, pasteboard, &c. They are generally padded, and are fixed by a roller or by tapes, according to circumstances.

SPLINTER, (F.) Esquille. Same etymon. This term is, sometimes, applied to a small portion of wood, which occasionally enters the skin, and gives occasion to much irritation, until it is removed.—*Aculeus lig'neus, (F.) Écharde.*

It is, also, applied to fragments that separate from a fractured or diseased bone.

SPODIUM GRÆCORUM, Album græcum.

SPOLIARIUM, Apodyterium.

SPOLIATI'VA, from spolio, 'I take away.' *Phlebotomia spoliati'va, (F.) Saignée spoliative.* Blood-letting, used for the purpose of diminishing the mass of blood.

SPOLIATORIUM, Apodyterium.

SPONDYLAL'GIA, from σπονδυλος, 'a vertebra,' and αλγος, 'pain.' Pain in the vertebræ. *Cacorrhachitis, (q. v.)* See Vertebral Disease.

SPONDYLARTHROCAE, Vertebral disease.

SPONDYLI, Vertebræ.

SPONDYLIUM, Heracleum spodylium.

SPONDYLOCACE, Vertebral disease.

SPOND'YLUS, σπονδυλος. A vertebra; and, especially, the two large cervical vertebræ.

SPONGE, BASTARD, Alcyonium.

SPONGIA, σπογγια, Spongos, Spongia officinalis, Spon'gia Mari'na, Sponge, (F.) Éponge. An organized, marine substance, of the great class of Zoophytes, met with in many seas, but especially in the Mediterranean and Arabian. It is supple, elastic, porous, and capable of absorbing fluids in which it may be placed, and of thus increasing in size. It is employed, in surgery, for cleansing or washing; for absorbing acid discharges from ulcers; suppressing hemorrhage; when the mouth of the vessel can be compressed by it, and for forming tents for dilating wounds; in which case, the sponge is immersed in melting wax, and cooled before being used. It is then called *Prepared Sponge* or *Sponge Tent*.

SPONGIA CYNOSBATI, Bedegar.

SPONGIA USTA or Burnt Sponge, contains carbonate and phosphate of lime, carbonate of soda, charcoal, and iodine. It is used in bronchocele, scrofulous affections, and herpetic eruptions; and its good effects seem to be dependent upon the iodine, (q. v.) It is made by cutting sponge into pieces, and heating it, that any extraneous matters may be separated; burning it in a close iron vessel until it becomes black and friable, and, lastly, rubbing it into very fine powder.—Ph. U. S.

SPONGIÆ LAPIS. A name given to small friable stones found in sponge. They were formerly esteemed lithontriptic.

SPONGIOLE, Spongiolum: from σπογγιον, 'a sponge.' The soft succulent extremity of the fibrils or true roots of a plant, by which it absorbs or sucks up fluid. Similar spongioles have been supposed to exist at the terminations of the absorbents in animals.

SPONGION, σπογγιον. Ancient name of an epithem made of goats' dung: and, also, of a malagma, which was considered capable of absorbing the serum in dropsies, like a sponge.—Paulus, Gorræus.

SPONGOID INFLAMMATION, Hæmatodes fungus.

SPONGOS, Tonsil.

SPONSA SOLIS, Calendula officinalis.

SPONTANEOUS, Spontaneus, from sponte, 'voluntarily.' That which occurs of itself, or without any manifest external cause. Evacuations are termed *spontaneous*, which are not produced by medicine. *Spontaneous lassitude* is that which is not the result of fatigue. Diseases are also *spontaneous* which supervene without apparent cause.

SPORAD'IC, Spor'ades, Sporad'ici, Morbi dispersi, Morbi sparsi, σποραδικος, 'dispersed:' from σπειρειν, 'to spread.' Diseases are so called which supervene indifferently in every season and situation, from accidental causes, and independently of any epidemic or contagious influence.

SPOTS, GERMINAL, see Molecule.

SPOTS, RED, (F.) Taches rouges, Rose spots. Small red spots, which appear in typhoid fever, from the 8th to the 15th day of the disease. They are most frequently seen on the lower and middle portions of the chest, and upper part of the abdomen.

SPOTS, ROSE, see Spots, red.

SPRAIN, corrupted from strain:—Subluzatio, Distor'sio, Dias'trophê, Diastren'mu, Exarthre'ma, Exarthro'sis, Stremma, Thlasma Stremma; a wrench, (F.) Détorse, Entorse, Foulure. A violent straining or twisting of the soft parts surrounding the joints. According to the degree of the sprain, the fibrous parts of the joint may be simply stretched, or they may be ruptured. This affection, which has been regarded as an incomplete luxation, occurs, particularly, in the ginglymoid joints;—as in the foot, wrist, knee, &c. The violence causes an afflux of blood; the serum of the blood is poured out, and, often, the blood itself, owing to the rupture of vessels; and inflammation arises, which ends in resolution or induration. Local, antiphlogistic applications are required, with perfect rest; and, when the inflammatory action has subsided, cold pumping and friction, with the application of a plaster and bandage, will afford support till the parts affected recover their due tone.

SPRAT, YELLOW-BILLED, Clupea thryssa.

SPRUCE BEER, White Spruce Beer. A beer, made as follows. To 10 gallons of water, add 6 pounds of sugar, and 4 oz. of essence of spruce. Add yeast; and bottle, when ready. It is grateful and antiscorbutic.

SPRUCE BEER POWDERS may be formed of white sugar, ʒj. and ʒij; sodæ subcarb, gr. xxvj; essence of spruce, gr. x, in each blue paper; and acid of tartar, ʒss in each white paper. For half a pint of water.

SPUTIO, Exspuition.

SPUMA ARGENTI, Plumbi oxydum semivitreum—s. Cerevisiæ, Yest—s. Trium draconum, Antimonium muriatum.

SPUMEUX, Frothy.

SPUMOSUS, Frothy.

SPUNK, Boletus ignarius.

SPUR, Sax. rþur, (F.) Éperon des Artères. The angle at which the arteries leave a cavity or trunk.

SPUR, Ergot.

SPURGE, CAPER, Euphorbia lathyris—s. Cypress, Euphorbia Cyparissias—s. Flax,

Daphne gnidium—s. Flowering, large, *Euphorbia corollata*—s. *Gurden*, *Euphorbia lathyris*—s. *Greater*, *Euphorbia palustris*—s. *Ipecacuanha*, *Euphorbia ipecacuanha*—s. *Laurel*, *Daphne laureola*—s. *Marsh*, *Euphorbia palustris*—s. *Olive*, *Cucurbit tricoecum*—s. *Olive*, *Daphne mezereum*—s. *Sea*, *Euphorbia paralias*.

SPUTAMEN, Sputum.

SPUTATIO, Exspuition.

SPUTUM, *Sputa'men*, *Ptyelon*, *Pytis'ma*, *Spit*, from *spuere*, *sputum*, 'to spit.' (F.) *Crachat*. The substance ejected from the mouth in the act of spitting. It is composed of saliva, and of the mucus secreted by the mucous membrane of the nasal fossæ and fauces, and often by the membrane of the larynx and bronchia. The sputa, are, sometimes, called *eruginous*, when of a greenish-yellow colour; *gummy*, when they resemble a thick solution of gum; *frothy*, (F.) *Mousseux*, when covered with froth; *rubiginous*, (F.) *Rubigineux* ou *rouillés*, when of a reddish-yellow; and *streaked*, (F.) *Striés*, when mixed with lines of blood.

SPUTUM CRUENTUM, Hæmoptysis—s. *Sanguinis*, Hæmoptysis.

SQUALLING, Vagitus.

SQUAMA, Scale, Table.

SQUAMÆ, Scaly diseases.

SQUAMARIA, Plumbago Europæa.

SQUAMEUX, Squamous.

SQUAMOUS, *Squamo'sus*, from *squama*, 'a scale.' That which relates to a scale.

SQUAMOUS PORTION of the temporal bone, (F.) *Portion squameuse* ou *écailleuse* du *Temporal*, is the upper part of the temporal, so called from a fancied resemblance to a scale.

SQUAMOUS SUTURE, *Sutu'ra squamo'sa*, *S. mendo'sa* seu *lepidod'ides* seu *lepidod'ides*, (F.) *Suture squameuse* ou *écailleuse*. The suture which unites the squamous portion of the temporal bone with the parietal.

Certain *scaly* cutaneous affections are also called *squamous*, (F.) *squameux*. See *Scale*.

SQUELETTE, Skeleton.

SQUELETTOLOGIE, Skeletology.

SQUILL, *Scilla*—s. *Vinegar* of, *Acetum scillæ*.

SQUILLA, *Scilla*.

SQUINANCIE, Cynanche, Cynanche tonsillar.

SQUINANCY, COMMON, Cynanche tonsillar.

SQUINANTHIA, Cynanche.

SQUINANTHUS, *Juncus odoratus*.

SQUINE, *Smilax China*.

SQUINSY, Cynanche tonsillar.

SQUINTING, Strabismus.

SQUIRRE, *Scirrhus*.

SQUIRRUS, *Scirrhus*.

STACHYS FÆTIDA, Galeopsis.

STACTE, Myrrha.

STADE, Stage.

STADIUM, Stage.

STAFF, (D.) *Staf*. An instrument of great importance in Lithotomy;—being the director for the gorget or knife. It is made of steel; and the handle is flat and rough, in order that it may be more securely held. The groove is on its convex surface.

STAG'S PIZZLE See *Cervus*.

STAGE, (F.) *Estage*, *Etage*, *Sta'dium*; *Stade*. The period or degree of a disease; especially

the period of an intermittent;—as the *cold stage*, *hot stage*, &c.

STA'GIUM. The sixth part of an ounce.

STAGMA, from *σταγω*, 'I distil.' *Stalag'ma*. Any distilled liquid or liquor.

STAGMA, Gutta.

STAGNATION, *Stagna'tio*, from *stagnare*, 'to form a pond.' Accumulation and retardation of fluids in any part of the body.

STAHLIAN. One who follows the doctrine of Stahl.

STAHLIANISM. The doctrine of Stahl, which considered every vital action under the direction and presidency of the soul.

STALAGMA, *Stagma*.

STALAGMITIS CAMBOGIOIDES. See *Cambogia*.

STALAGMOS, Distillation.

STAMMERING, Balbuties—s. of the *Fingers*, *Cramp*, *Writers*'.

STANGOS, Tin.

STANNI MURIAS, Tin, muriate of—s. *Oxyduli murias*, Tin, muriate of.

STANNIOLUM, Tinfoil.

STANNUM, Tin—s. *Foliatum*, *Tinfoil*—s. *Indicum*, *Zincum*.

STAPÉDIEN, Stapedius.

STAPÉDIUS, *Stapes*, *Pyramidal-stapédien*. A muscle of the middle ear, which draws the stapes obliquely upwards. (F.) *Stapédien*.

STAPES, 'a stirrup.' (F.) *Étrier*. The innermost of the small bones of the ear, so called because it resembles a *stirrup*. It is situated horizontally in the cavity of the tympanum. Its head, which is directed outwards, is articulated with the os orbiculare. Its base faces inwards, and is applied to the fenestra ovalis, which it closes imperfectly, and to which it is united by a membrane. Its *branches* are one *anterior*, and the other *posterior*. They are curved; and the space between them is parabolic. Surgeons have given the name *Stapes* to a bandage used in bleeding from the foot; which forms a figure of 8 around the ankles.

STAPHIS. Delphinium staphisagria.

STAPHISAGRIA. Delphinium staphisagria. STAPHYLÆMATOMA, from *σταφυλή*, 'the uvula,' and *Hæmatoma*, (q. v.) A tumour formed by effusion of blood beneath the mucous membrane of the uvula.

STAPHYLAGRA, Staphylepartes.

STAPHYLE, Uvula, see *Vitis vinifera*.

STAPHYLEPARTES, from *σταφυλή*, 'the uvula,' and *ελαγω*, 'I lift up.' *Staph'ylagra*. An instrument for laying hold of, and removing, the uvula.—Paulus.

STAPHYLINO-PHARYNGEUS, Palatopharyngeus.

STAPHYLINUS EXTERNUS, Circumflexus.

STAPHYLITIS, Uvulitis.

STAPHYLODIALYSIS, Cionis.

STAPHYLEDE'MA, *Ang'ina uvul'ris*, *Dyspha'gia uvul'sa*, *Hypostaph'yle*, *Prolapsus uvulæ*. (Ed'e'ma uvulæ, *Productio uvulæ à pituitâ*, *Craspedon*. Relaxation of the uvula, which, either from inflammation or infiltration, hangs down so as to occasion difficult deglutition, cough, &c. Scarification, astringent gargles, and, if necessary, excision, constitute the treatment.

STAPHYLO'MA, from *σταφυλή*, 'a grape.' *Urd'tio*, *Myceph'alon*, *Parop'sis* *Staphylo'ma*,

Staphylo'sis, Polygro'ma. A name given to different tumours of the anterior surface of the globe of the eye.

STAPHYLOMA CONICUM, S. of the Cornea—*S. Pellucidum conicum*, S. of the Cornea.

STAPHYLOMA OF THE CORNEA, *Sugar-loaf Cornea, Staphylo'ma con'icum, S. pellucidum con'icum, Prolap'sus cor'neæ, Ceraton'cus, Hypercerato'sis*, is an unequal, embossed, bluish or whitish, round or conical tumour; of variable size; formed by the projection of the transparent cornea, which is sometimes extenuated and distended, at others thickened.

STAPHYLOMA OF THE IRIS is the disease, described by Scarpa under the name *Procidencia Iridis*. It is hernia of the iris, through an accidental opening into the cornea.

STAPHYLOMA OF THE SCLEROTIC differs from the last, in the prominence existing on a part of the eye covered by the sclerotic, which is much thinner.

STAPHYLON'CUS, *Staphylon'cia*, from *σταφυλη*, 'the uvula,' and *ογκος*, 'tumour.' Tumefaction of the uvula.

STAPHYLOPLAS'TIC, *Staphyloplas'ticus*; from *σταφυλη*, 'the uvula,' and *πλασσω*, 'I form.' The operation for replacing the soft palate, where it has been lost.

STAPHYLORAPHY, *Velosynth'esis, Staphylorrhaphia, Kionorrhaphia, Uranorrhaphia, Uraniskorrhaphia*, from *σταφυλη*, 'the uvula,' and *ραφω*, 'a suture.' The operation for uniting a cleft palate. It consists in paring the edges of the cleft; passing ligatures through them, and bringing them together.

STAPHYLOSIS, *Staphyloma*.

STAR-APPLE, BROAD-LEAVED, *Chrysophyllum cainito*—*Star Grass, Aletris farinosa*—*Star Knap-weed, Centaurea calcitrapa*—*Star-stroke, Coup-de-soleil*—*Star-Wort, Aletris farinosa*—*Star-Wort, golden, Bubonium*.

STARBECK SPA. A chalybeate spring at Harrogate, (q. v.)

STARCH, *Amylum*—s. Blue, Smalt—s. Iodide of, see Iodine—s. Potato, see *Solanum tuberosum*.

STASIS, *στασις*, from *σταω*, 'I stop.' This word has nearly the same signification as stagnation. Stagnation, however, sometimes includes a morbid condition of the fluids,—*Stasis* never.

STASIS, Station.

STATIC. An epithet applied to the physical phenomena presented by organized bodies, in contradistinction to the organic or vital.

STATICE LIMO'NIUM, *Behen rubrum, Limonium, L. majus, Behen, Statice Caroliniana, Sea Lavender, Red Behen, Behmen Ackmar, Marsh Rosemary, Lavender Thrift*, (F.) *Behen rouge*. Family, *Plumbaginæ*. See *Syst. Pentandria Pentagynia*. The roots have been esteemed astringent, tonic, and eminently antiseptic.

The **STATICE CAROLINIANA** of the United States, is considered to be a mere variety of the *S. Limonium*.

STATION, *Stu'tio, Stasis, Status*; from *stare*, 'to stand.' The act of standing.

STATIONARY, *Stationarius*, from *stare*, 'to stand.' A name given by Sydenham and Stoll to certain diseases, which depend upon a particular state of the atmosphere; and which prevail in a district for a certain number of years, and then give way to others.

STATISTICS, MEDICAL. *Vital Statistics*. That part of Medicine which relates to the detail of facts connected with the mortality, salubrity, &c. of different countries and situations.

STATISTICS, VITAL, S. medical.

STATURE, *Statu'ra, Meg'ethos*. The height of the human figure. The following table exhibits the results of several admeasurements on the authority of Mr. Lawrence, with the heights of some of the monkey species.

	Stature.	
	Feet.	In.
An Englishman	6	4½
	5	00
An Englishwoman.....	5	4
	5	00
European male skeleton	5	8
Do.....	5	5
A Negro at the Lunatic Hospital, Liverpool.....	5	10½
Another from Virginia	5	5½
Another from the Gold Coast	5	8
Another	5	00
Negro skeleton.....	4	11
Another	5	7½
A Lascar	5	4
Venus de' Medici.....	5	00
Tyson's Chimpanzé (<i>Simia Troglodytes</i>).....	2	2
Mr. Abel's Ourang Outang.....	2	7
Camper's Do.....	less than	30
Mr. White's Monkey.....	2	2

STATUS. *Acme*—s. *Erethicus, Nervous diathesis*—s. *Nervosus, Nervous diathesis*—s. *Sthenicus, Sthenia*—s. *Verminosus, Helminthiasis*.

STAVESACRE, *Delphinium staphisagria*. **STAXIS**, *Apostax'is*. A slight epistaxis or nasal hemorrhage.—*Hippocrates*.

STEAR. *Pinguedo, Sebum*.

STEARRHŒ'A, *Sed'ceous Flux*, from *στεαρ*, 'suet,' and *ρρω*, 'I flow.' Augmentation of secretion from the sebaceous follicles of the skin.

STEATITES, *Polysarcia*.

STEATOCE'LE, from *στεαρ*, 'suet,' and *κηλη*, 'a tumour.' A tumour formed by a collection of steatomatous matter in the scrotum.

STEATOMA, *στεατωμα*, from *στεαρ*, 'suet.' *Senc'tio, Steato'sis, Emphy'ma encys'tis steatoma*. An encysted tumour, whose contents are similar to fat.

STEEL, *Chalybs*.

STEGANOP'ODES, *στεγανοποδες, Planip'edes*. They who have flat feet, or are web-footed, from *στεγανος*, 'covered,' and *πους*, 'foot.'

STEGNO'SIS, *Constipa'tio, Stipa'tio, Condensa'tio, Obstruc'tio*, from *στεγνω*, 'I constrict.' Constriction of the pores and vessels. Constipation. Suppression of the evacuations.

STEGNOTICA, *Astringents*.

STEIROSIS, *Sterilitas*.

STELENGIS, *Stridor dentium*.

STELLA, *Fus'cia stella'ta*, (F.) *Étoile*. A bandage, improperly compared to a star, because it is crossed like the letter X. This bandage is applied upon one or both shoulders. In the first case, it is called *simple*; in the second, *double*. It was employed in cases of fractures of the sternum, clavicle, scapula; in luxations of the humerus, &c.

STELLA TERRE, *Plantago coronopus*.

STELLATA RUPINA, *Centaurea calcitrapa*.

STELOCHITIS, *Osteocolla*.

STENAGMUS, *Suspirium*.

STENAXIS, *Suspirium*.

STENIA, *Sthenia*.

STENICUS, *Active*.

STENOBREGMATE. See *Cranium*.

STENOCARDIA, *Angina pectoris*.

STENOCHORIA, *Angustia*—s. *Œsophagi*, *Dysphagia constricta*.

STENTHORA'CES, from *στενός*, 'narrow,' and *ὄραξ*, 'the chest.' They who have narrow chests.

STENTOROPHONUS, from *Στεντορ*, *Stentor*, a Greek in the army before Troy; and *φωνή*, 'voice.' One who has a strong voice.

STEPHANE, *Crown*.

STEPHENS, MRS., REMEDY FOR THE STONE. This consisted of lime, prepared by calcining the shells of eggs and snails, made into pills with soap. A decoction was, also, administered, consisting of chamomile, fennel, parsley, and burdock, with a portion of Alicant soap. Its virtues were dependent upon the lime and the tonic properties of the decoction. Hales, Hartley, Kirkpatrick, Lobb, and others, wrote in favour of this nostrum; and it was ultimately bought by the British Parliament for £5000!

STERA, *Uterus*.

STERCORACEOUS, *Stercorarius*, from *stercus*, 'dung.' (F.) *Stercoraire*, *Stercoral*.

The French use the term *Fistules stercoraires* for those which are kept up by the constant passage of fecal or *stercoraceous matter*. The name *Stercoraires* is sometimes given, in derision, to those physicians, who are fond of purging their patients: *à posteriori* has been similarly used.

STERCORAIRE, *Stercoraceous*.

STERCUS, *Excrement*, *Fimus*—s. *Anseris*, *Fimus anseris*—s. *Caninum album*, *Album Græcum*—s. *Diaboli*, *Asafetida*—s. *Equi non castrati*, *Fimus*—s. *Lacertæ*, *Crocodilia*.

STEREOS, *Solid*.

STEREOTICA, from *στερεός*, 'hard.' Fortuitous lesions or deformities affecting the hard parts. The 2d order, class *Tychica* of Good.

STERILITAS, *Agonia*, *Steiro'sis*, *Stiro'sis*, *Agenne'sis*, *Sterility*, *Acye'sis*, *Barrenness*, *Aphor'ia*, *Ate'nia*, *Acie'sis*, from *στεργός*, or *στερεός*, 'hard, barren.' Quality of that which is barren. Sterility may be *absolute* or *relative*. The former depends upon some vitious conformation of the genital organs, apparent or concealed; and, occasionally, admits of cure. Sterility is *relative*, when a female does not conceive with one individual, but does with another. Sterility, in females, is often dependent upon a condition of the uterus, characterized by membranous menstruation.

STERNALGIA, *Angina pectoris*.

STERNO-CLAVICULAR, *Sterno-clavicu-laris*. That which relates to the sternum and clavicle.

STERNO-CLAVICULAR ARTICULATION is the union of the inner extremity of the clavicle with a round facette at each side of the superior extremity of the sternum. In this articulation there are, besides the incrusting cartilages, two radiated *sterno-clavicular*, (F.) *Sterno-clavicu-laires rayonnées*; one anterior, and one posterior;

—an *inter-clavicular ligament*, extending between the two clavicles, and two synovial capsules, separated by an *inter-articular fibro-cartilage*. The costo-clavicular ligament may, also be considered to belong to this articulation.

STERNO-CLAVIO-MASTOIDEIEN, *Sterno-cleido-mastoideus*—s. *Cleido-hyoideus*, *Sterno-hyoideus*.

STERNO-CLEIDO-MASTOIDEUS, *Sterno-mastoideus*, *Cleido-mastoideus*, *Mastoideus*, *Sterno-clavio-mastoidien*, *Mastoideus anterior*; (F.) *Sterno-mastoidien*; from *στερνον*, 'the sternum,' *κλεις*, 'the clavicle,' and *μαστός*, 'the mastoid process.' A muscle situate at the anterior and lateral part of the neck. It is long and flattened: simple, above; and divided into two portions below; where it is inserted into the anterior and superior part of the sternum, and the inner quarter of the clavicle. Above, it terminates at the mastoid process,—which it embraces,—at the neighbouring part of the temporal bone, and at the outer third of the upper curved line of the occipital bone. It carries the head forward: inclines, and rotates it to one side. When both contract, they bend the head directly forwards.

STERNO-COSTAL, *Triangularis sterni*—s. *Costo-clavio-huméral*, *Pectoralis major*—s. *Huméral*. *Pectoralis major*.

STERNO-HYOIDEUS, *Sterno-cleido-hyoideus*, *Sterno-hyoïdes*, *Hyoïdes primus*: from *στερνον*, 'the sternum,' and *υοειδής*, 'the os hyoides.' A muscle, situate at the anterior part of the neck; inserted, above, at the inferior edge of the body of the hyoid bone; below, into the upper part of the posterior surface of the sternum:—at the posterior part of the sterno-clavicular articulation, and sometimes into the cartilage of the first rib. It depresses the os hyoides.

STERNO-MASTOIDEIEN, *Sterno cleido-mastoideus*—s. *Pubien*. *Rectus abdominis*.

STERNO-THYROIDEUS, *Sterno-thyroïdes*, *Bronchius*. A muscle, situate at the anterior part of the neck. It is attached, above, to the oblique line seen on the outer surface of the thyroid cartilage; and terminates, below, at the upper part of the posterior surface of the sternum, and the cartilage of the second rib. When it contracts, it depresses the thyroid cartilage and os hyoides, by the medium of the thyrohyoid membrane.

STERNODYNIA SYNOPTICA ET PALPITANS, *Angina pectoris*.

STERNUM. *Sternon*, from *στερεός*, 'solid'; *Os asser seu pectoris seu xiphoides seu gladioli seu ensiforme*, *Scutum cordis*, *Breast Bone*. An azygous, symmetrical bone, situate at the forepart of the chest. It is flat; broad above; narrower in the middle; and terminates, below, by a pointed cartilage—the xiphoid, (q. v.) It has an *anterior* or *cutaneous surface*, a *posterior* or *mediastinal*;—a *superior* or *clavicular extremity*, and an *inferior* or *abdominal*. It is articulated with the clavicles and the seven upper ribs on each side, by means of their cartilages. According to Bôclard, it is formed of six principal bones, which he names, from their position, 1. *Primi-sternal* or *clavi-sternal*: 2. *Duo-sternal*: 3. *Tri-sternal*: 4. *Quarti-sternal*: 5. *Quinti-sternal*: 6. *Ultimi-sternal* or *ensisternal*.

STERNUTAMENTORIA, *Achillea ptarmica*.

STERNUTAMENTUM, *Sneezing*.

STERNUTATIO, Sneezing.

STERNUTATOIRE, Sternutatory.

STERNUTATORIUM, Errhine.

STERNUTATORY, *Sternutatorius*, from *Sternutamentum*, *Errhînum*, *Plarmicum*, (F.) *Sternutatoire*; from *sternutare*, 'to sneeze.' A substance, which provokes sneezing;—as tobacco, &c.—See Errhine.

STERTEUR, Stertor.

STERTOR, *Ronchus* or *Rhonchus*, *Renchus*, *Rhenchus*, (F.) *Sterteur*, from *stertere*, 'to snore.' That deep snoring (q. v.) which accompanies inspiration, in some diseases,—particularly in apoplexy. Such respiration is said to be *stertorous*.

STETHODESMIUM, Corsets.

STETHOSCOPE, from *στήθος*, 'the chest,' and *σκοπεω*, 'I examine.' An instrument, invented by Laënnec, of Paris, for exploring the chest. The stethoscope, sometimes called *Pectoriloque*, is a cylinder of wood, from four inches to a foot long; pierced through and through by a longitudinal canal about a quarter of an inch in diameter. The longer are generally composed of two portions, that fit together by means of a screw, one of which is hollowed at the extremity, in the shape of a funnel. These two portions being screwed to each other, the physician lays hold of the instrument, as he would of a pen, puts the funnel-shaped extremity on the chest of the patient, and applies his ear to the other. To *explore* the pulsations of the heart, the funnel is plugged up by a piece of the same kind of wood accurately adapted to it, and pierced by a canal of the same width as that in the body of the instrument. Stethoscopes are sometimes flexible, like the flexible ear-trumpet.

This mode of examining affections of the chest, &c., is what Laënnec terms, *Auscultation médiate*.—*Mediate Auscultation*.

STETHOSCOPIA. See Auscultation.

STEW, Stove.

STHENIA, *Sten'ia*, *Dialthesis sthen'ica*, *Status sthen'icus*, from *σθεος*, 'strength,' 'power.' Excess of strength; excitement of the organic actions. A word used, especially by the Brunonians,—as well as *Asthenia*,—its antithesis. *Sthenic* or *dynamic diseases* are such as depend upon excessive excitement.

STHENICUS, Active.

STHENOPYRA, Synocha.

STIBI, Antimonium.

STIBIALIS, Antimonial.

STIBIATUS TARTRIS LIXIVIÆ, Antimonium tartarizatum.

STIBI BUTYRUM, Antimonium muriatum—

s. Deuto-murias sublimatus, Antimonium muriatum—s. et potassæ deuto-tartaras, Antimonium tartarizatum—s. Hydrosulphuretum rubrum, Antimonii sulphuretum rubrum—s. Oxidum acido muriatico oxygenato paratum, Algaroth—s. Oxidum album mediante nitro confectum, Antimonium diaphoreticum—s. Oxidum præcipitando paratum, Algaroth—s. Oxides album, Antimonium diaphoreticum—s. Oxides sulphuratum, Antimonii sulphuretum præcipitatum—s. Oxydi sulphurati hydro-sulphuretum luteum, Antimonii sulphuretum præcipitatum—s. Oxydulati sulphuretum, Antimonii sulphuretum præcipitatum—s. Oxydulum vitreatum, Antimonii vitrum—s. Oxydum semivitreum, Antimonii vitrum—s. Oxydum sulphuratum,

Oxydum stibii sulphuratum—s. Subhydrosulphas, Antimonii sulphuretum rubrum—s. Suburias præcipitando paratum, Algaroth—s. Sulphurati hydrosulphuretum rubrum, Antimonii sulphuretum rubrum—s. Sulphuretum nigrum, Antimonium—s. Vitrum, Antimonii vitrum.

STIBIOSUM HYDROSULPHURETUM CUM SULPHURE, Antimonii sulphuretum præcipitatum—s. Oxidum, Antimonium diaphoreticum.

STIBIUM, Antimonium.

STIFF JOINT, MUSCULAR, Contractura.

STIGMATA. See Nævus.

STILBOMA, Cosmetic.

STILLA, Gutta.

STILLICIDIUM, *Substillum*, from *stillare*, 'to drop.' This term is often used synonymously with *Strangury*. It means the flow of any fluid—particularly of the urine—drop by drop. Also, a kind of embrocation effected by dropping a liquid upon a part.

STILLICIDIUM NARIUM, Coryza.

STILLINGIA, *S. sylvatica*, *Queen's Root*. An indigenous plant, which grows in pine barrens, from Virginia to Florida. *Sex. Syst.* Monœcia Monadelphæa. *Nat. Ord.* Euphorbiacæ. The root is said to be used in syphilis, obstinate cutaneous affections, &c., like *sarsaparilla*.

STIMATO'SIS, *Stymatosis*, *Hæmorrhægia Penis*, *Stymatorrhægia*, *Phallorrhægia*, from *στυμα*, 'priapism,' itself from *στυειν*, 'to erect.' Hemorrhage from the male organ: accompanied, or not, with priapism.

STIMMI, Antimonium.

STIMULANT, *Stim'ulans*, *Excitans*, *Excitant*, from *stimulare*, 'to goad.' A medicine, which has the power of exciting the organic action of the different systems of the economy. Some stimulants are *diffusible*; i. e. have a prompt but temporary action; others are *permanent* or *persistent*. The action of stimulants is called *Stimulation*.

The chief stimulants are the following:—Æther Sulphuricus, Ammonia, Asafœtida, Brucia, Camphora, Capsicum, Castoreum, Cinnamonum, Copaiba, Cubeba, Guaiacum, Hydrargyri Præparata, Iodinum, Nux Vomica, Olea Essentia, Opium (in small dose,) Piper, Sinapis, Strychnia, Zingiber, — Alcohol, Caloric, Electricity, Mental Emotions. (the Impetuous.)

STIMULUS, 'a goad.' *Incitantum*, *Incitatio*. Anything which excites the animal economy.

STINKWEED, Chenopodium anthelminticum.

STIPATIO, Stenosis.

STIROSI, Sterilitas.

STITCH, Pleurodynia—s. Common, Suture, common—s. in the Side, Pleurodynia—s. Royal, Suture, common.

STIZOLOBIUM, *Dolichos pruriens*.

STILENGIS, Stridor dentium.

STOCHEION, Element.

STOCKING (LACED,) (F) *Bas lassé*. A bandage used by surgeons, which consists of a stocking made of firm cloth or dog-skin, admitting of being tightly laced anteriorly. It is employed in varices and ulcers of the legs.

STOMA, Mouth.

STOMACACÆ, *Stomal'gia*, *Labrisul'cium*, *Cheloc'acæ*, *Aluc'acæ*, *Chelomald'cia*, *Stomatod'ma*, *Stomatonecro'sis*, from *στομα*, 'the mouth,

and *zaxos*, 'evil:' *Cancer Oris*, *Canker*. Factor of the mouth with a bloody discharge from the gums. (F.) *Cancer aqutique*. See *Cancer Aquaticus*. Also, *Scurvy*.

STOMACACE, *Porphyra nautica*—s. *Gangrænousum*, *Cancer aquaticus*—s. *Universale*, *Purpura hæmorrhagica*.

STOMACAL, *Stomachal*.

STOMACALGIA, *Cardialgia*.

STOMACH, *Stomachus*, *Ventriculus*, *Nedys*, *Anocallia*, *Gaster*, (F.) *Estomac*, from *στούα*, 'a mouth.' One of the principal organs of digestion. It is a musculo-membranous reservoir; continuous, on the one side, with the œsophagus; on the other, with the duodenum. It is situate beneath the diaphragm, between the liver and the spleen; and occupies the epigastrium and a part of the left hypochondrium. In it the food is converted into chyme. When viewed externally, the stomach has, 1. An *anterior face*, which looks a little upwards. 2. An *inferior face*, directed downwards. 3. An *inferior or colic margin*, which is convex and extensive, and is called the *greater curvature*, (F.) *Grand courbure*. It gives origin to the omentum majus. 4. A *superior or diaphragmatic margin*, which is shorter, concave, and is called the *lesser curvature*, (F.) *Petit courbure*. The lesser omentum is attached to this. 5. A *left or œsophageal orifice*, called, also, the *cardia*, *Os ventriculi* or *upper orifice*. 6. A *right or intestinal, or inferior orifice*, called the *pylorus*. 7. A considerable dilatation, situate to the left of the cardia and greater curvature—the *great tuberosity of the stomach*; and, 8. A less extensive dilatation, situate to the right of the greater curvature—the *lesser tuberosity* or *lesser cul-de-sac*, *Antrum Pylori*. The inner surface of the stomach is of a reddish-white colour, and has a marbled appearance. It is constantly covered by a thick mucus, and is lined by a mucous membrane, which presents numerous wrinkles. The parietes of the stomach consist of three membranes in superposition. The outermost is serous; and is an extension of the peritoneum; the middle coat is *muscular*,—some of its fibres running longitudinally; others, transversely: the innermost membrane is of a mucous nature, but not exactly a continuation of the membrane that lines the œsophagus. The mucous and muscular membranes form, at the pylorus, a valve, called the *Pyloric valve*. These three coats are united by a dense, close, cellular membrane; and, between the mucous and muscular coats, along the two curvatures especially, is a quantity of muciparous glands, called *Glands of Brunner*. The arteries of the stomach are very numerous, and proceed from the coronaria ventriculi, the pyloric, splenic, and right and left gastro-epiploic. The veins have the same name, and pursue the same course as the arteries. They pour their blood into the trunk of the vena porta. Its lymphatic vessels are very numerous, and pass into ganglia, situate along the two curvatures. The nerves of the stomach proceed from the pneumogastric, and three divisions of the celiac plexus.

STOMACH DISEASE, *Limosis*.

STOMACH PUMP. A useful instrument for conveying fluids to the stomach, when deglutition is impracticable, and for pumping up the contents of the stomach. It consists of a forcing syringe, to the bottom and nozzle of which

flexible tubes can be attached. When the object is to force fluids into the stomach, the stomach-tube must be attached to the nozzle, and passed down the throat,—the tube connected with the bottom of the syringe being placed in the fluid to be injected. To empty the stomach, the stomach-tube must be attached to the bottom of the instrument. This instrument has been of great service where poisons have been taken. The antidote, when any exists, and is at hand, should be administered immediately prior to its use.

The stomach-pump was first employed in America by Dr. Physick, in the year 1812.

STOMACH-TUBE, see *Tube*, *œsophageal*.

STOMACHAL, *Stomachic*, *Cardiacus*, *Stomachicus*, *Stomachalis*, (F.) *Stomacal*, *Stomachique*. That which belongs to the stomach; that which is good for the stomach; which strengthens the stomach. A medicine that gives tone to the stomach.

STOMACHIQUE, *Stomachal*.

STOMACHUS, from *στούα*, 'mouth.' This word has been used in several different acceptations; e.g. for the œsophagus, for the cardiac orifice of the stomach, (see *Cardia*), and for the stomach itself. Hippocrates calls the neck of the bladder *στούαχος κύστεως*; and the neck of the uterus, *της μήτρας στούαχος*.

STOMAL'GIA, from *στούα*, 'mouth,' and *αλγος*, 'pain.' Pain in the mouth. *Stomaceae*, (q. v.)

STOMAT'IC, *Stomaticus*, from *στούα*, 'mouth.' A medicine used in diseases, &c., of the mouth. Dentifrices, masticatories, &c., are *stomatics*.

STOMATITE CHARBONNEUSE, *Cancer aquaticus*—s. *Couenneuse*, *Stomatitis pseudomembranous*—s. *Crèmeuse pustacée*, *Aphthæ*—s. *Gangræneuse*. *Cancer aquaticus*.

STOMATITIS, from *στούα*, 'the mouth,' and *itis*, denoting inflammation. (F.) *Inflammation de la Bouche*. Inflammation of the mouth.

STOMATITIS, *APHTHOUS*, *S. follicular*, *Emphysis aphthæ*, *Aphthæ*, *A. Adultærum*. An inflammation of the follicles of the mouth, constituting the aphthæ of the adult, which is generally accompanied by cephalic, gastric, and general disturbance. It may be either discrete or confluent, and requires general and local treatment, adapted to the case.

The *Stomatitis of nursing-women* appears to be a variety of this.

STOMATITIS, FOLLICULAR, s. *Aphthous*—s. *Gangrenous*, *Cancer aquaticus*—s. of *Nursing-women*, see *S. Aphthous*.

STOMATITIS, PSEUDOMEMBRANOUS, (F.) *Stomatite couenneuse*, *Diphthérie buccale*, *Pseudomembranous inflammation of the mouth*. Inflammation of the mouth accompanied by the exudation of a false membrane,—a disease, which is rarely seen except in large foundling establishments.

STOMATONECROSIS, *Stomaceae*.

STOMATONOMA, *Stomaceae*.

STOMATOPANUS, from *στούα*, 'the mouth,' and *πανος*, 'a glandular tumour.' *Stomatophyma glandulosum*, *Panus Furcicum*. Tumefaction of the glands of the mouth.

STOMATOPHYMA, from *στούα*, 'the mouth,' and *φύμα*, 'a swelling.' A swelling in the mouth.

STOMATOPHYMA GLANDULOSUM, *Stomatopanus*. **STOMATOPLASTIC**, *Stomatoplasticus*;

from *στομα*, 'the mouth,' and *πασσω*, 'I form.' The operation of forming a mouth, where the aperture has been contracted from any cause.

STOMATORRHA'GIA, (F.) *Hémorrhagie buccale*, from *στομα*, 'the mouth,' and *γῆρυναι*, 'I break out.' Hemorrhage from the mouth. *Stomorra'h'gia*.

STOMATORRHAGIA GINGIVARUM, Ulorrhagia.

STOMOMANICON, *Platysma myoides*.

STOMORRHAGIA, *Stomatorrhagia*.

STONE IN THE BLADDER, *Calculi, vesical*—s. *Binder, Osteocolla*—s. *Crop, Sedum*—s. *Pock, Acne*.

STONES, THE, *Testes*.

STORAX, *Styrax*—s. *Liquida, Liquidambar styraciflua*.

STOREY'S WORM CAKES. An empirical preparation, formed of *calomel* ℥j, *jalap.* ʒj. *zingib.* ℥ij, *sacch.* ʒj, *cinnab. antim.* q. s. to colour them; *syrup. simpl.* q. s. to make into cakes.

STOVE. Old French *Estuve, Stupha*; a *Stew, Æstud'rium*, (F.) *Étuve*. A limited space, warmed artificially, and in which the air is slowly renewed. It is used for drying various substances, as plants, extracts, conserves, &c., or for taking vapour baths. In this case, the *stew* or *stove* is said to be *wet* or *humid*; in the opposite case, it is said to be *dry*, (F.) *sèche*. The latter, which is used by the Turks, is the *Lacon'icum* or *Calida'rium* of the Romans. The former is their *tepida'rium* or *vapora'rium*. These kinds of baths greatly excite the cutaneous transpiration; and are valuable agents in rheumatic and other affections.

STRABI. See *Strabismus*.

STRABILISMOS, *Strabismus*.

STRABISMUS, *Strabilismos, Parop'sis Strabismus*, from *στραβος*, 'twisted,' 'one who squints.' *Strabos'itis, Distor'sio, Luscitas, Illu'sis, Squinting, Goggle Eye*, (F.) *Strabisme, Vue louché, Louchement*. Want of concordance of the optic axis. It may be dependent upon natural or acquired inequality in the action of the motory muscles of the eye; on a convulsive state of one of those muscles; a difference in the sensibility of the two eyes; or a cerebral affection. In the treatment, if the disease seem to depend upon an excess of strength, in one of the motory muscles, we must endeavour to give tone to that which is too weak, by placing before the eye a mask having a small aperture on the side to which it is necessary to direct the pupil; or by wearing glasses, provided with a piece of looking-glass, on the side to which the eye is vitiously turned; so that the reflection may be inconvenient, and occasion the organ to be turned in an opposite direction; or by putting a black patch on the angle opposite to that to which the eye is turned. If owing to weakness, the organ must be strengthened by being exerted alone, and by leaving the other at rest. If the disease be symptomatic of cerebral affection, attention must, of course, be directed to the latter.

Those affected with *Strabismus*, are called *Strabi, Strebli*; in French, *Louches, Bigles*.

STRABOSITAS, *Strabismus*.

STRABOT'OMY, *Strabotom'ia*, from *στραβος*, 'one who squints,' and *τομή*, 'incision.' The operation for the removal of squinting by the division of the muscle or muscles that distort the eye-ball.

To **STRAIN**, *colare*, (F.) *couler*, from *σπᾶναι*, *stringere*, (F.) *estreindre*, 'to constrict or squeeze.' To pass decoctions, infusions, &c., forcibly through linen; also, to exert an effort. This is accomplished by fixing firmly the parts where the muscles to be exerted originate, in order that their full power may be developed.

STRAINING, *Nisus*.

STRAMOINE, *Datura stramonium*—*Stramonium majus album, Datura stramonium*—s. *Spinosum, Datura stramonium*.

STRANGALIDES, from *σπᾶγγεω*, 'I torment.' Small, hard tumours, which form in the breast, when the milk does not find issue.

STRANGERS' FEVER. See *Fever, strangers'*.

STRANGULATIO, *Orthopnœa*—s. *Uterina, Hysteria*.

STRANGULATION, *Strangula'tio, Pnix, Pnix'mos*, (F.) *Étranglement, Strangulation*. State of a part too closely constricted. Thus we say that there is *strangulation* of an intestinal hernia, when the opening that gives passage to the portion of protruded intestine contracts, so as to intercept the continuity of the digestive canal. In *Legal Medicine*, it means the forcible obstruction of the air-passages, by a ligature or by the hand for criminal purposes. See *Suffocation*.

STRANGULATION, UTERINE, *Strangulatio uter'ina, Suffocatio uterina, S. hyster'ica, Præfocul'tio*. The sense of suffocation which often accompanies attacks of hysteria.

STRANGURIA, *Enuresis*.

STRANGURY, *Stranguria, Paru'ria stillat'ia*, from *σπᾶναι*, 'to squeeze,' and *ουρον*, 'urine.' *Dysu'ria* (q. v.) *Urinæ Stillicid'ium vel Substil'ium*. Extreme difficulty in evacuating the urine, which issues only drop by drop, and is accompanied with heat, pain, tenesmus at the neck of the bladder, &c. See *Ischuria*, and *Retention*.

STRATHPEFFER, MINERAL WATERS OF. A sulphuretted water, at *Strathpeffer*, a few miles west from *Dingwall*, in *Ross-shire, Scotland*. It contains sulphate of soda, sulphate of lime, chloride of sodium, sulphate of magnesia, and sulpho-hydric acid.

STRATIOTES, *Achillea millefolium*.

STRATUM PROLIGERUM, *Proligerous Disc*.

STRAWBERRY, *Fragaria*—s. *Shrubby, Rubus arcticus*.

STREATHAM, MINERAL WATERS OF. *Streatham* is a village near *London*. The waters are saline cathartic.

STREBLI. See *Strabismus*.

STREMA, *Luxation, Sprain*.

STREPITO'SUS MORBUS. 'Noisy disease.' A kind of flatulent disease, said by *Sor-bait* to be not uncommon in the *Austrian Alps*, in which emphysematous tumours form on different parts of the body,—accompanied by sonorous excretions of gas by the mouth and anus.

STREPITUS AURIUM, *Tinnitus aurium*.

STRETCHING, *Pandiculation*.

STRÆ CORNEÆ, *Tenia semicircularis*—s. *Retina subjectæ ligamento ciliari, Halo signatus*—s. *Semilunares, Tænia semicircularis*.

STRATIUS, *Cannelé*, *Grooved*.

STRIBILIGO, *Efflorescence*.

STRICTURA INTESTINI RECTI SPASMODICA, *Stricture of the Rectum, spasmodic*

—s. *Œsophagi callosa*, *Dysphagia constricta*—*s. Œsophagi spasmodica*, *Œsophagismus*—*s. Pharyngis seu œsophagi vera*, *Dysphagia constricta*.

STRICTURE, *Strictu'ra*, from *stringere*, *strictum*, 'to tie hard.' *Coarctatio*, (F.) *Rétrécissement*. A diminution or contracted condition of some tube or duct, as the *œsophagus*, *rectum*, *urethra*, &c. This must be dilated by appropriate bougies. Strictures may, also, occur in the intestines, &c., when they are unmanageable;—with the exception of those of the rectum, which admit of topical applications.

STRICTURE OF THE ŒSOPHAGUS, *Dysphagia constricta*—*s. of the Pharynx*, *Dysphagia constricta*.

STRICTURE OF THE RECTUM, *SPASMODIC*, *Strictu'ra Intesti'ni Recti spasmodica*, *Obstructio Recti spas'tica*. An affection occurring in the nervous especially, which subsides, spontaneously, after a longer or shorter continuance.

STRIDOR DENTII, *Prisis*, *Frismos*, *Brygmus*, (q. v.) (F.) *Grincement des dents*. 'Grinding of the teeth.' A common symptom, in children, of gastric and other derangement; and often present when there is no reason to suspect any.

STRIGIL, *Strig'ilis*, *Stlen'gis*, *Stelengis*. A flesh brush. Also, an instrument, anciently used in the baths, for scraping off the sweat.

STROBILITES, from *στροβίλος*, 'a cone of the pine.' Wine impregnated with the cones of the pine.

STROEMIA, *Cadaba*.

STROKE, **APOPLECTIC**. An apoplectic seizure.

STROKE, BACK, OF THE HEART, *Impulse diastolic*.

STROKE, PARALYTIC. A sudden attack of encephalo spinal paralysis.

STROMBULCUS, *Forceps* (bullet.)

STRONGLE, *Strongylus*.

STRONGYLUS, from *στρογγύλος*, 'round.' Hippocrates, Chabert, and others, mean the *Ascaris lumbricoides* by this term. The *Strongylus Gigas*, (F.) *Strongle*, is, however, distinct. It has an obtuse, flat head: mouth surrounded with six flattish papillæ: the whole bursa of the male truncated: the tail of the female rounded. It is sometimes met with,—five inches, a foot, a foot and a half, and even three feet long,—and from two lines to half an inch in diameter. It is occasionally found in the human kidney: rarely in other viscera; and, still more rarely in the intestinal tube.

STRONGULUS, *Teres*.

STROPHOS, *Torinina*.

STROPHULUS, *Lichen'asis strophulus*, *Ebullitio*, *Ezanthema strophulus*, *Eor'mia strophulus*, *Red Gum*, *Red Gown*, *Tooth Rash*, *White Gum*, *Milk-spots*. It consists of an eruption of red, or sometimes whitish pimples; occurring in early infancy, chiefly about the face, neck, and arms, surrounded by a reddish halo; or interrupted by irregular patches of cutaneous blush. All the varieties, under this genus, arise in consequence of the extreme vascularity and irritability of the skin at this period of life, when the constitution is liable to be disturbed by irritation, either in the alimentary canal, gums or other parts. None of these eruptions are of any importance; and no medical treatment is usually necessary. If the stomach seem at

all disordered, a little rhubarb and magnesia may be occasionally administered. Willan and Bateman reckon five species,—*Strophulus intertinctus*, *Red gum or gown*; *S. albidus* or *white gum*; *S. confertus* or *rank red gum*, *Tooth rash*; *S. voluticus* or *Erythema voluticum*, and *S. candidus*.

STROPHULUS SYLVESTRIS, *Iguis sylvaticus*—*s. Volaticus*, *Iguis sylvaticus*.

STRUCTURE, *Structu'ra*, *Catasceud'e*, from *struere*, *structum*, 'to build.' The arrangement of the different tissues or organic elements of which animals and vegetables are composed.

STRUMA, *Bronchocele*, *Scrofula*.

STRUTHIOPHAGUS, from *στρουθός*, 'the ostrich,' and *φαγω*, 'I eat.' *Struthiophagus* tribes still exist in some parts of Africa.

STRUTHIUM, *Saponaria*.

STRYCHNIA, *Strychnina*.

STRYCHNINA, *Strych'nine*, *Strychnia*, *Fauqueline*. An alkaline principle; solid, crystalline, inodorous, bitter, and excessively poisonous, which has been discovered in the *Strychnos nux vomica*, (*Nucis vomicae*, *rasur.* ℞ij; *calcis*, *pulv.* ℥vj; *acid muriat.* f. ℥ij; *alcohol*; *acid. sulphuric dil.*, *Liquor. ammoniac*; *carbon. animal. purif.*, *aquæ*, āā q. s. Digest the *nux vomica* in two gallons of water, acidulated with a fluidounce of muriatic acid, for 24 hours: then boil for two hours, and strain with expression through a strong linen bag. Boil the residuum twice successively in the same quantity of acidulated water, each time straining as before. Mix the decoctions, and evaporate to the consistency of thin syrup; then add the lime previously mixed with a pint of water, and boil for ten minutes, frequently stirring. Pour the mixture into a double linen bag, and having washed the precipitate well with water, press, dry, and powder it. Treat the powder repeatedly with boiling alcohol, until deprived of its bitterness; mix the liquors and distil off the alcohol by means of a water bath. Mix the residue with water, and having applied heat, drop in sufficient diluted sulphuric acid to neutralize and dissolve the strychnia; then add purified animal charcoal; boil for a few minutes, filter, evaporate and crystallize. Dissolve the crystals in water, and add sufficient solution of ammonia to precipitate the strychnia. Lastly, dry the precipitate on bibulous paper. Ph. U. S.) The medical action of strychnia on man and animals is exactly like that of the alcoholic extract of *nux vomica*. It is, however, more active. An eighth of a grain is sufficient to kill a large dog; and a quarter of a grain produces marked effects on the human body, when in health. It has been given in paralysis and other cases like the *nux vomica*. Dose, gr. one-twelfth to one-eighth.

The **ACETATE OF STRYCHNIA**, the *Iodate* in the dose of one-eighth of a grain; the *Nitrate* and the *Sulphate* have been given in the same cases as pure Strychnia.

STRYCHNOS, *Solanum dulcamara*.

STRYCHNOS NUX VOMICA, *Nux Vomica*, *Nux Metella*, *Caniram*, *Family*, *Strychnoidæ*. *Sex. Syst.* Pentandria Monogynia. (F.) *Vomiquier*. A tree of the family *Strychnoides*, which grows in India, and the seeds of which have been long sold in the shops, under the names, *Nux vomica*, *Vomic nut*, *Poison nut*, *Bachelor's buttons*, &c. (F.) *Noix vomique*. For a long time, these seeds were used only for poisoning rats; but, of late

years, an alcoholic extract has been prepared from them, which has been administered in paralytic affections, in small doses. Dose of the *alcoholic extract*, *Extractum nucis vomicæ spirituosum*, *E. nucis vomicæ resinosum*, *E. n. v. alcoholicum*, (F.) *Extrait alcoolique de noix vomique*, one or two grains. It produces a kind of tetanic convulsion in the paralyzed parts, when given to the requisite extent. It has, also, been administered in chronic diarrhœa and dysentery. The following is the formula for the preparation of the *EXTRACTUM NUCIS VOMICÆ* of the Pharm. U. S. (1842.) Take of *Nux vomica*, lbj; *Alcohol*, a sufficient quantity. Expose the *Nux Vomica* to steam till it is softened; then, having sliced and dried it, grind it into powder. Introduce it into an apparatus for displacement, and pour alcohol upon it gradually, until the liquid passes without bitterness. Distill off the greater part of the alcohol from the filtered liquor, and evaporate the residue to the proper consistence.

The wood of *STRYCHNOS COLUBRINA*, an Indian tree, contains strychnia. It was formerly considered a specific against the bites of venomous animals; and was recommended by Boerhaave, in intermittents. It is the *Lignum Colubrinum*. (F.) *Bois de Couleuvre*.

STRYPHNOS, Acerb.

STUDIUM INANE, Aphelxia otiosa.

STUDY, BROWN, Aphelxia otiosa.

STUFFING, Cynanche trachealis.

STULTITIA, Fatuitas.

STUNNED. Old French *Estonné*, (L.) *attonitus*, 'astonished' (F.) *Étonné*. An epithet, applied to one, who, in consequence of a fall or other accident, has received such a concussion of the brain as to deprive him, for a time, of his mental manifestations.

STUPA, στῦπη, *Stuppa*, *Stupeion*. Tow, used in certain surgical apparatus and dressings. Also, a *Stupe*, i. e. cloth or tow used in fomentations. A flannel, wrung out of hot water, and applied to a part, is a *stupe*.

STUPE, Stupa.

STUPEFACIENTIA, Narcotics.

STUPEFACTIFS, Narcotics.

STUPEFACTIO, Narcosis.

STUPEFIANTS, Narcotics.

STUPEION, Stupa.

STUPEUR, Stupor.

STUPHA, Stove.

STUPIA, Tin.

STUPOR, *Eplexis*, *Consternatio*, (F.) *Stupeur*, from *stupere*, 'to be stupefied.' Diminished activity of the intellectual faculties; often amounting to lethargy. It occurs in many affections, especially in the neuroses.

STUPOR, Narcosis—s. *Mentis*, *Fatuitas*—s. *Vigilans*, *Catalepsy*.

STUPPA, Stupa.

STUPRUM, Rape, (F.) *Défloration*, *Viol*. Forcible and illicit enjoyment of a married or unmarried female. When committed upon the latter, which is most commonly the case, it is also called, *Défloration*, *Défloratio*, *Derirginatio*, *Vitiatio*, *Apanthismus*, &c. In judging whether rape has been committed, under such circumstances;—the state of the genital organs; the age of the individual; and the possibility of accidents and diseases of the parts, will have to be considered. It will be necessary, also, to be acquainted with the evidences of virginity;

and to determine,—if signs of virginity no longer exist,—whether its loss be attributable to copulation, or to the introduction, into the vagina, of another body than the male organ, &c. Recent *deflowering* can be much more readily distinguished than that which has taken place for some time.

STYAN, *Hordeolum*.

STYE, *Hordeolum*.

STYGMATES. M. J. Cloquet has proposed this word or *Stigmates*, from *στυγμα*, 'a mark,' to designate the marks, in form of cicatrices, which remain on the peritoneum after the obliteration of the neck of the hernial sac. They are, commonly, radiated folds, of a whitish appearance, more or less thick, and of a fibrous or fibro cartilaginous nature.

STYLET, *Specillum*.

STYLIFORM, *Styloid*.

STYLO-CERATOIDES, *Stylo-hyoideus*—s. *Cerato-hyoideus*, *Stylo-hyoideus*.

STYLO-CHONDRO-HYOIDEUS. A name given, by Douglas and Albinus, to a fleshy fasciculus, which the stylo-hyoid muscle sometimes presents, and which is attached to the lesser cornu of the os hyoides. It is the same fasciculus, which Santorini calls *Stylo-hyoïdes novus*, *Stylo-hyoïdes alter*.

STYLO-GLOSSUS. A muscle, situate at the anterior and superior part of the neck. It is narrow behind; much broader before; and is attached to the styloid process of the temporal bone, and to the stylo-maxillary ligament; and is inserted into the side of the tongue. It raises the base of the tongue and carries it backwards.

STYLO-HYOIDEUS, *Stylo-hyoïdien*, *Stylocerato-hyoïdeus*, *Stylo-ceratoïdes*, *Stylo-hyoïdes major*. A muscle, situate at the superior, anterior, and lateral part of the neck. It is thin and narrow,—especially posteriorly; anteriorly, it opens to give passage to the tendon of the digastricus. It is attached to the styloid process of the temporal bone, and to the body of the os hyoides. It raises the os hyoides, and carries it backwards.

STYLO-HYOID LIGAMENT is a fibrous, flattened cord, which passes from the styloid process to the lesser cornu of the os hyoides.

STYLO-HYOID NERVE is the second branch given off by the facial nerve.

STYLO-MASTOID, *Stylo-mastoïdeus*. That which relates to the styloid and mastoid processes.

STYLO-MASTOID ARTERY arises from the posterior auricular, and, in some subjects, from the occipital. It enters the stylo-mastoid foramen; passes along the aqueduct of Fallopius, and spreads its ramifications on the mucous membrane of the tympanum, and in the mastoid cells, and semicircular canals; and terminates by anastomosing with a branch of the *Arteria meningæa media*, which enters by the *Hiatus Fallopii*. Murray has given the name—*Stylo-mastoid*—to the posterior auricular artery itself.

STYLO-MASTOID FORAMEN, *Foramen Stylo-mastoïdeum* or *F. Aquæductus Fallopii*, (F.) *Trou anonyme*, is situate at the inferior surface of the petrous portion of the temporal bone, between the styloid and mastoid processes. It terminates the aqueduct of Fallopius, and gives passage to the facial nerve.

STYLO-MAXILLARY, *Stylo-maxillaris*.

That which relates to the styloid processes and jaw

The **STYLO-MAXILLARY LIGAMENT** is a ligamentous, flat cord, extending between the styloid process and the angle of the jaw.

STYLO-PHARYNGEUS, *Stylo-thyro-pharyngien*. A muscle, situate at the anterior and lateral part of the neck. It is slender; thin, above; attached to the styloid process of the temporal bone, and terminates in the pareties of the pharynx, as well as at the posterior margin of the thyroid cartilage. It raises the pharynx, and carries it backwards. Professor Chaussier has united, under the name *Stylo-pharyngien*, the three constrictor muscles of the pharynx, the stylo-pharyngeus, and palato-pharyngeus.

STYLO-THYRO-PHARYNGIEN, *Stylo-pharyngeus*.

STYLOID, *Styliform*, *Styloïdes*, *Graphioïdes*, *Belonoïdes*, from *στυλος*, 'a style,' 'a peg,' 'a pin,' and *ειδος*, 'shape,' shaped like a peg or pin.

STYLOID PROCESSES or pencil-like Processes, *Procesus Beloides seu Belemonoides seu Belonoïdes seu Graphioides seu Graphoïdes*, are, 1. A long and slender process of the temporal bone, to which are attached the stylo-glossus, stylo-pharyngeus, and stylo-hyoideus muscles; and the stylo-hyoid and stylo-maxillary ligaments. 2. Two slender and pyramidal processes at the inferior extremities of the radius and ulna.

STYMATOSIS, *Stimatosi*.

STYM'MATA, from *στυμμα*, 'that which constricts or thickens.' The most solid ointments. Also, the ingredients proper for increasing their consistence.

STYPSIS, *Astriction*, *Constipation*.

STYPTERIA, *Alumen*.

STYPTIC, **EATON'S**. A name first given to *Helvetius's Styptic*, when introduced into Great Britain. It is now usually made of calcined green vitriol, 3j; proof spirit, tinged with a little oak bark, Oij.

STYPTIC, **HELVETIUS'S**, see *Ferrum tartarizatum*.

STYPTICS, *Contrahentia*, *Constrictiva Medicamenta*, *Constringentia*, *Anastaltica*, from *στυπν*, 'I constringe.' Sometimes used synonymously with astringent, (q v.) generally applied to a substance, employed to arrest hemorrhage;—*Enæmon*. A mechanical styptic is one that arrests the flow of blood, by being applied immediately to the mouth of the bleeding vessel, or by inducing a coagulum, mechanically, in the vessel. A chymical styptic is one which coagulates, chymically, the blood around a bleeding orifice.

STYRAC'INUM O'LEUM. Oil, obtained by boiling storax in good olive oil.

STYRAX, from *στυραξ*, 'a reed,' in which it was preserved. A resin obtained from the *Styrax officinalis*, and *S. calamita*. It is the solid storax;—*officinal storax*. There are two kinds of storax met with: 1. The Red Storax, *Gum Storax*, *Thu-Judæorum*, *Styrax rubra*, *Styracis balsamum*, *Balsamum styracis officinalis*, which is obtained by incision from the *Styrax officinalis*, and, perhaps, from the *Liquidambar orientalis*. The purest is in tears; but it has lost some of its smell in drying. 2. Common Storax, *Styrax calamita*. That which has been received in reeds or vessels, and has had saw-dust added

immediately to thicken it. The odour of storax is fragrant: the taste aromatic. It is considered, like the other balsams, to be stimulant and expectorant, but is rarely used long.

PURIFIED STORAX, *S. colata*, *S. purificata*, is prepared by dissolving storax in alcohol; straining the solution; then distilling off the alcohol with a gentle heat, until the storax acquires the proper consistence.—Ph. U. S. Dose, gr. x to xxx

STYRAX ALBA, see *Myroxylon Peruiferum*—s. Benzoin, see Benjamin—s. Liquida, Liquidambar styraciflua.

SUB. A common Latin prefix, signifying 'beneath.'

SUBACTIO, *Chiro'sis*, *Cheirosi*. The operation of making plasters, extracts, &c. with the hand, or with the pestle and mortar.

SUBAGITATRIX, *Tribade*.

SUB-ATLOIDE'US, *Infra-atloïdeus*, (F) *Sous-atloïdien*. That which is situate beneath the atlas or first cervical vertebra. Chaussier has given this name to the second pair of cervical nerves.

SUB-AXOIDE'US, *Infra-axoïdeus*, (F) *Sous-axoïdien*. That which is below the axis or vertebra dentata. Chaussier has given this name to the third pair of cervical nerves.

SUBBORAS NATRICUM, *Borax*.

SUBCARTILAGINEUM, *Hypochondre*.

SUBCLA'VIAN, *Subclavius*, from *sub*, 'under,' and *clavis*, 'the clavicle.' That which is under the clavicle.

SUBCLAVIAN ARTERIES, (F) *Artères sous-clavières*, are situate at the upper part of the chest, and the lateral and lower parts of the neck. The right arises at the corresponding side of the trachea, and comes off from the arteria innominata or brachio-cephalic trunk. The left leaves the aorta at the end of the arch. Both extend as far as the superior surface of the first rib, in the space between the scaleni muscles, beyond which they take the name axillary arteries. The subclavian arteries run, for some distance, without sending off any branch. In the neighbourhood of the first rib, however, they give off, 1. Upwards, the vertebral and inferior thyroïdal. 2. Downwards, the internal mammary, and superior intercostal. 3. Outwards, the transverse cervical or posterior scapular, the superior scapular, and the posterior cervical or profunda.

SUBCLAVIAN or SUBCLAVIUS MUSCLE, *Subclavi'us*, *Costo-claviculaire* (Ch.) (F) *Sous-clavier*, is situate at the superior and anterior part of the chest. It is attached, by its inner extremity, to the superior surface of the cartilage of the first rib; and by its superior margin and outer extremity to the inferior surface of the clavicle. This muscle depresses the clavicle, and carries it forward. When the shoulder is fixed, it can raise the first rib.

SUBCLAVIAN VEINS, (F) *Veines sous-clavières*, are continuations of the axillary, and extend from the inferior extremity of the scalenus anticus, in front of which they pass, to the vena cava superior, which they form by their union. The right subclavian vein is very short: the left, longer and broader. These veins receive the mouths of the internal and external jugulars, vertebral, and superior intercostal. The left subclavian receives two veins more than the right.—the left internal mammary and left inferior thyroïd.

The thoracic duct opens into the left subclavian:—the corresponding great lymphatic vessel into the right.

SUBCLAVIUS, Subclavian muscle.

SUBCRUENTUS, 'some what bloody;' from *sub*, and *cruentus*, 'bloody,' *Hyphæmos*. That which has the colour and nature of blood. An epithet given to certain excreted substances, which are mixed with blood, or have the appearance of blood.

SUBCRURÆI. See *Cruræus*.

SUBCUTANEUS, *Subcutaneus*, from *sub*, 'under,' and *cutis*, 'the skin,' *Intercutaneus*, (F.) *Sous-cutané*. That which is placed immediately under the skin.

SUBDELIRIUM, Typhomania.

SUBDITA, *Subditi'tia*, from *subdere*, 'to put under,' *Prostheti*. Medicines introduced into some one of the natural apertures;—as suppositories, pessaries, &c.

SUBDITI'TIA, Subditi'tia.

SUBDUCTIO, Dejection.

SUBER, *Cork*:—the bark of the *Quercus Suber* or *Cork Tree*, (F.) *Liège*. Family *Amentaceæ*. *Sex. Syst.* Monœcia Polyandria. Cork, when burnt, is applied as a mechanical styptic to bleeding piles, &c. Surgeons use it for making tents; and it has been recommended to be worn as an amulet to suppress the secretion of milk.

SUBFRONTALIS SUTURA. A suture, resulting from the articulation of the os frontis with the nasal process of the superior maxillary bone, and the proper bones of the nose.

SUBGRONDATIO, Depression.

SUBHUMERATIO, Catomismos.

SUBINFLAMMATION, *Subinflamma'tio*, from *sub*, 'under,' and *inflammati'o*. *Inflammati'cula*, *Hypophlegma'sia*. A mild degree of inflammation, so slight as hardly to deserve the name *inflammation*. Broussais understood by the term, an augmentation in the vital phenomena of the vessels that convey white blood. Lymphatic engorgements, scrofula, herpes, and cancer he considered subinflammations.

SUBINTRANTES FEBRES, from *sub*, 'under,' and *intrare*, 'to enter.' *Communicantes febres*. Fevers, primarily intermittent, whose paroxysms approximate, so that one paroxysm begins before that which preceded it has gone through its stages.—L. Bellini.

SUBJEE, see *Gungah*.

SUBLIMAMENTUM, Enœorema.

SUBLIMATE, CORROSIVE, Hydrargyri oxymurias.

SUBLIMATION, *Sublima'tio*, *Meteoris'mus*, *Hypos'is*, &c. from *sublimo*, 'I raise up.' An operation, by which dry and solid matters are volatilized and condensed at the upper part of a subliming apparatus. The oxymuriate of mercury, sal ammoniac, &c. are commonly obtained by sublimation. The product of sublimation is a *Sub'limite*, *Sublimatum*, *Sublimé*.

SUBLIMATUS CORROSIVUS, Hydrargyri oxymurias.

SUBLIMÉ, *Sublimite*—s. *Corrosif*, Hydrargyri oxymurias.

SUBLIMIS, 'high, elevated, superficial.' Anatomists have given the name *sublimis* to certain muscles, which are situate more superficially than their kindred muscles. These last they have called *profundi*. Of the former, the *flector sublimis digitorum* is an example.

The French use the term '*respiration sublime*' for the respiration which is accompanied by considerable elevation of the ribs, and with separation of the *alæ nasi* at the time of inspiration.

SUBLINGUAL, *Sublingua'lis*, (F.) *Souslingual*, from *sub*, 'under,' and *lingua*, 'the tongue.' That which is seated under the tongue.

SUBLINGUAL ARTERY, with some, is the *Lingual*, (q. v.) With others, it is a branch, given off by the lingual opposite the genio-glossus muscle, which is distributed, particularly, to the sublingual gland, to the mylohyoid, and genio-glossus, muscles, &c.

SUBLINGUAL GLAND, *Glandula sublingua'lis*, *G. Bartholinia'na*, *G. Rivinia'na*, is seated in the substance of the inferior paries of the mouth, beneath the anterior part of the tongue. It is smaller than the submaxillary, of which it frequently seems to be only a prolongation. It is oblong, flattened, amygdaloid, and is covered by the mucous membrane of the mouth, beneath which it projects. This gland has 10 or 12 excretory ducts—*Ductus Rivinia'ni* seu *Waltheria'ni*—some of which open beneath the frænum lingue, joining Wharton's duct, whilst others pierce the mucous membrane of the mouth separately. It has the same structure as the parotid.

SUBLUXATIO, Sprain.

SUBMAXILLARY, *Submaxilla'ris*, (F.) *Sous-maxillaire*, from *sub*, 'under,' and *maxilla*, 'the jaw.' That which is seated beneath the jaw.

SUBMAXILLARY GLAND, *Maxillary Gland*, is a salivary gland, less than the parotid, seated at the inner side of the ramus and body of the inferior maxillary bone, in the triangular space between the two bellies of the digastricus. Irregularly ovoid, and flattened on three surfaces, it has the same aspect and organization as the other salivary glands. Its excretory duct is called *Wharton's Duct*, and terminates at the side of the frænum lingue, by a very small orifice. It is also called *Ductus inferior*.

SUBMAXILLARY GANGLION is a small nervous ganglion, situate opposite the gland. It seems to be formed by the superior branch of the Vidian nerve, and communicates with the lingual nerve of the inferior maxillary. Its filaments form a plexus which penetrates the submaxillary gland.

SUBMENTAL, *Submenta'lis*, (F.) *Sous-mental*, from *sub*, 'under,' and *mentum*, 'the chin.'

SUBMENTAL ARTERY is furnished by the facial, near the base of the jaw. It passes forwards along the attachment of the mylo-hyoideus, to which it furnishes branches, that cross it, to anastomose with those of the sublingual. Near the median line it bifurcates, to be distributed to the chin and muscles of the infrahyoid region.

SUBMENTAL VEIN, which accompanies the artery, opens into the labial.

SUBMER'SION, *Submer'sio*, from *sub*, 'under,' and *mergere*, *mersum*, 'to plunge.' The act of plunging, or being entirely plunged, in a liquid *Asphyxia* by submersion or drowning, *Asphyxia Immer'sorum*, is not owing to a certain quantity of liquid being introduced into the alimentary or air-passages: but simply to the interception of air, and of the respiratory phenomena. It is a case of suffocation, the

signs of which, on dissection, are equivocal, without circumstantial evidence.

SUBMISSIO, Remission.—s. Cordis, Systole. **SUBMURIAS** **AMMONIACO HYDRARGYRICUS**, Hydrargyrum præcipitatum.

SUBORBITAR, *Infra-orbital*, *Infra-orbitalis*, *Infra-orbitarius*, (F.) *Sous-orbitaire*, from *sub*, 'under,' and *orbita*, 'the orbit.' That which is seated beneath the orbital cavity.

INFRA-ORBITAR ARTERY proceeds from the internal maxillary, from which it separates near the anterior and superior part of the zygomatic fossa. It enters the infra-orbital canal, and passes through it, giving branches to the anterior and superior dental canal; issues by the foramen infra-orbitarium; and divides, in the fossa canina, into a number of branches, which lose themselves in the neighbouring parts. The infra-orbital vein follows the same course.

SUBORBITAR OR INFRA-ORBITAR CANAL, (F.) *Canal ou Conduit sous orbitaire*, is a small canal, which runs obliquely through the substance of the inferior paries of the orbit. It begins, behind, by a simple gutter, and divides, anteriorly, into two branches;—one of which descends into the anterior paries of the maxillary sinus, whilst the other passes out, in the canine fossa, by an orifice, called *Foramen infra-orbitarium*, (F.) *Trou sous-orbitaire*. The infra-orbital artery and nerve pass along it.

INFRA-ORBITAR OR SUBORBITAR NERVES seem to terminate the superior maxillary. They issue from the infra-orbital canal by the foramen of the same name, and spread out in a radiated manner in the fossa canina, to divide into *superior or palpebral filaments*, *inferior or labial*, *internal or nasal*, and *external or buccal*.

SUBPOPLITEUS, Popliteus muscle.

SUBPUBIO-FEMORALIS, Abductor brevis.—s. Prostatæ, Compressor prostatae.

SUBSCAPULARIS, (F.) *Sous scapulaire*, from *sub*, 'under,' and *scapula*, 'the shoulder-blade.' *Sous-scapulo-trachinien*. That which is beneath the scapula.

FOSSA SUBSCAPULARIS. A considerable excavation at the anterior surface or venter of the scapula, in which the subscapularis is seated.

SUBSCAPULARIS MUSCLE, *Immer-sus*, *Infra-scapularis*, *Sous-scapulo-trachinien*. (Ch.) *Porte-feuille*, (F.) *Muscle sous-scapulaire*. A muscle, situate in the preceding fossa. It is flat, broad, and triangular; is attached, by its base, to the subscapular fossa, and to the anterior lip of the edge of the spine of the scapula, and is inserted into the lesser tuberosity of the humerus. It carries the arm in rotation inwards. It can, also, depress it, and bring it towards the body.

SUBSTANCE, HYALINE, Cytoblastema.

SUBSTANTIA HYALINA, Cytoblastema.—s. *Ostioidea*, see Teeth.—s. *Filamentosa dentium*, Enamel.—s. *Ossea dentium*, see Tooth.—s. *Rhomboidea*, Corpus dentium.—s. *Spongiosa Urethrae*, Corpus spongiosum urethrae.—s. *Vitreæ dentium*, Enamel of the teeth.—s. *Vitreæ*, Cytoblastema.

SUBSTANTIVE, *Substantivus*, from *sub-stare*, (*sub* and *stare*), 'to stand under or subsist.' An epithet applied by Dr. Paris to aliments which are nutritious, in contradistinction to *adjective* aliments, which are themselves not possessed of nutritive virtues, but impart to the digestive organs greater energy, so as to

enable them to extract more nutriment from the substantive aliments. Meat for example, is a *substantive* aliment; the condiment, as mustard, eaten with it, an *adjective* aliment.

SUBSTILLUM, Stillædium.

SUBSULTIO, Palpitation.

SUBSULTUS TENDINUM, *Clonus subsultus*, *Subsultus*, *Carpholog'ia spasmodica*, *Myopal'mus*, *Twitching of the Tendons*, (F.) *Soubresaut*, from *subsilire*, *subsultum*, (*sub* and *salire*), 'to make short leaps.' Twitching, communicated to the tendons by the involuntary and instantaneous contraction of the muscular fibres. It is more observable at the wrist than elsewhere; and is an evidence of great cerebral irritability, and debility, when it occurs at an advanced period of fever.

The muscular agitations or twitchings observed in febrile diseases, especially of children, have been termed *Convulsibil'itas*, *Scelotyrbēfibil'is*, and *Irritabilitas morbo'sa*.

SUBSURTITAS, Deafness.

SUBUBERES, from *sub*, 'under,' and *uber*, 'the breasts.' *Infantes sugentes*, *Sucking children*. Infants at the breast, in contradistinction to the *Etuberes*, *αργαλακτοι*, or those which have been weaned.

SUBVOLA, Hypothenar.

SUC GASTRIQUE, Gastric juice.—s. *Medullæ*, Marrow.

SUCCAGO, from *succus*, 'juice.' The inspissated juices of plants—robs, jellies, &c.

SUCCEDA'NEUM, *Substitutum*, *Antemballon'enus*, *Quid pro quo*, from *succedere*, (*sub* and *cedere*), 'to go under, to come in place of another.' An epithet for medicines that may be substituted for others possessing similar properties.

SUCCHAR, Saccharum.

SUCCIN, Succinum.

SUCCINI RESINA, Musk, artificial.

SUCCINUM, *Electrum*, *Ambræ*, *Ambram*, *Ampyr*, *Bercail'ce*, *Amber*, *Yellow Amber*, (F.) *Succin*, *Ambre jaune*. This substance, which is found on the shores of the Baltic, is composed of a resinous matter, of essential oil, and an acid, *sui generis*. It is inodorous, except when heated or rubbed. It is insipid; in fragments of a pale golden yellow colour; transparent, and has a shining lustre. S. G. 1.08: insoluble in water, and slightly acted on by alcohol. It is used for affording its essential oil—the *Oleum* or *Balsamum Succini*. This oil possesses stimulant, antispasmodic, diuretic, and rubefacient properties, (F.) *Huile de Succin*.

The *Oleum Succini rectificatum*, *Rectified Oil of Amber*, is made as follows:—Oil of Amber, Oj, water, Ovj. Mix in a glass retort, and distil until Oiv of the water have passed with the oil into the receiver; separate the oil from the water, and keep it in well stopped bottles. (Ph. U. S.)

The *white amber*, *Leucelectrum*, (F.) *Ambre blanc*, is a variety.

SUCCINIC ACID, *Ac'idum Succini*, *A. Succinicum*, *Acor succineus*, *Sal Succini*, *Sal volat'ile Succini*, has been considered antispasmodic and diaphoretic, in the dose of from five to twenty grains.

SUCCINUM CINEREUM, *Ambergris*—s. *Griseum*, *Ambergris*.

SUCCION, Sucking.

SUCCISA, *Scabiosa succisa*.

SUCCOLATA, Chocolate.

SUCCORY, WILD, *Cichorium intybus*.

SUC'CUBUS, from *sub*, and *cubare*, 'to lie.'

Some authors have used this word synonymously with Nightmare. Others mean, by it, a female phantom, with which a man, in his sleep sometimes believes he has intercourse;—as *Incubus*, (q. v.) has been applied to the male phantom, with which a female may dream she is similarly situate.

SUCCUS, *Juice*. The fluid obtained by pressing plants, flesh, &c. It is, also, applied to certain animal fluids, as *S. Gastricus*, &c.

SUCCUS ACACIÆ GERMANICÆ INSPISSATUS, see *Prunus spinosa*—*s. Acaciæ nostratis*, see *Prunus spinosa*—*s. Cicutæ spissatus*, *Extractum conii*—*s. Cyrenaicus*, *Laserpitium*.

SUCCUS ENTERICUS, *S. intestinalis*, *Intestinal Juice*. The fluids secreted from the lining membrane of the small intestines.

SUCCUS GASTRICUS, *Gastric juice*—*s. Intestinalis*, *Succus entericus*—*s. Japonicus*, *Catechu*—*s. Nervus*, *Nervous fluid*—*s. Nutritus*, *Chyle*—*s. Spissatus aconiti napelli*, *Extractum aconiti*—*s. Spissatus atropæ belladonnæ*, *Extractum belladonnæ*—*s. Spissatus conii maculati*, *Extractum cicutæ*—*s. Spissatus hyoscyami nigri*, *Extractum hyoscyami*—*s. Spissatus lactucæ sativæ*, *Extractum lactucæ*.

SUCCUS'SION, *Hippocratic Succus'sion*, *Succus'sio*, from *succutio*, (*sub* and *quatio*), 'I shake from beneath.' A mode of ascertaining the existence of a fluid in the thorax, by giving the body one or more slight shakes.

SUCCUSSIO, *Ballottement*.

SUCHOR, *Saccharum*.

SUCKING, *Suctio*, *Suctus*, *Athelxis*, *Bdalsis*, *Myze'sis*, (F.) *Succion*; from *sugere*, *suctum*, 'to suck.' The act of drawing liquid into the mouth, by forming a vacuum with the tongue acting as a piston, during inspiration.

To SUCKLE, *Lactare*, γαλακτοποιεῖν, τιθῆναι, (F.) *Allaiter* ou *Alaiter*. To give suck. To nurse.

SUCKLING, *Lactation*.

SUCRE, *Saccharum*—*s. Condi*, *Saccharum candidum*—*s. de Saturne*, *Plumbi superacetat*.

SUCTIO, *Exsuctio*, *Sucking*.

SUCTION POWER is the force exerted on the blood in the veins, by the active dilatation of the heart. See *Derivation*.

SUCTUS, *Sucking*.

SUDAM'INA, *Hydro'a*, or *Hidro'a*; from *sudor*, 'sweat;' *Boa*. Small vesicles, which appear upon the skin, especially in the summer time, in hot countries, and in diseases attended with much sweating. It is a miliary eruption. See *Miliary Fever*.

SUDAMINA, *Desudatio*, *Échaubouluures*, *Lichen tropicus*.

SUDARIUM, *Achicolum*, *Vaporarium*.

SUDATIO, *Ephidrosis*.

SUDATORIA, *Ephidrosis*—*s. Maligna*, see *Sudor Anglicus*.

SUDATORIUM, *Achicolum*, *Vaporarium*.

SUDOR, *Hidros*, (F.) *Sueur*, 'sweat.' The product of cutaneous transpiration, when visible on the surface of the body. It is colourless; of an odour more or less strong and variable; and of a saline taste. It is composed, according to Berzelius, of water, lactic acid, lactate of soda united with a little animal matter, chloride of sodium, and a little chloride of potas-

sium, an atom of earthy phosphate, and some oxyd of iron.

SUDOR AN'GLICUS, *Hidron'osos*, *Hidropyretos*, *Efebris sudatoria*, *Morbus sudatorius*, *Ephem'era maligna*, *E. sudatoria*, *Sudatoria maligna*, *E. Anglica pestilens*, *Sweating Sickness*, (F.) *Suette*, *Sueur Anglaise*. A very severe epidemic disease, characterized by profuse sweating, which appeared in England in 1486; and recurred, at different times, until about the middle of the 16th century. It was accompanied with coldness, excessive prostration of strength, palpitation, frequency and inequality of the pulse, &c., and terminated favourably or unfavourably in the course of 24 hours. The French have given the name *SUETTE DE PICARDIE*, *Sudor Picard'icuz*, to an epidemic disease, which has appeared several times in that province; the principal symptoms of which were, profuse sweats, and a miliary eruption. The disease recurred in 1821, and has been described, at length, by M. Rayer, who considers it to consist of a simultaneous state of inflammation of various tissues; and proposes to class it with variola, scarlatina, and measles.

SUDOR CRUENTUS, *S. sanguineus*, *Hæmatidrosis*, *Ephidrosis cruenta*. Cutaneous perspiration intermixed with blood. A very uncommon affection.

SUDOR SANGUINEUS, *S. cruentus*.

SUDORIFEROUS, *Sudorifer*, *Hydrophorus*, from *sudor*, 'sweat,' and *fero*, 'I carry.' That which carries sweat, as the *sudoriferous* ducts or glands, &c. &c.

SUDORIF'IC, *Sudorificum*, *Sudoriferum*, *Hidrot'icum*, from *sudor*, 'sweat,' and *ficio*, 'I make.' A medicine which provokes sweating. See *Diaphoretic*.

FOUR SUDORIFIC WOODS, *Quatuor ligna sudorifica*, were, formerly, *guaiacum*, perfumed cherry, *sarsaparilla*, and *sassafras*.

SUDORIPAROUS. See *Perspiration*.

SUET, *Sebum*.

SUETTE, *Sudor Anglicus*—*s. de Picardie*, *Sudor Picardicus*.

SUEUR, *Sudor*—*s. Anglaise*, *Sudor Anglicus*—*s. d'Expression*, *Expression*, sweat of—*s. de Sang*, *Diapedesis*.

SUFFIMENTUM, *Hypocapnis'ma*, *Suffimen*, *Thymia'ma*, *Suffitus*, *Suffumigatio*, (F.) *Parfum*. A perfume. A fumigation, (q. v.)

SUFFITUS, *Fumigation*, *Suffimentum*.

SUFFOCATIO, *Oithopnœa*—*s. Hysterica*, *Hysteria*, *Strangulation*, *uterine*—*s. Stidula*, *Cynanche trachealis*—*s. Uterina*, *Strangulation*, *uterine*.

SUFFOCATION, *Suffocatio*, *Præfocatio*, *Apopnix'is*, *Asphyxia*, (q. v.) from *sub*, 'under,' and *faux*, 'the throat.' (?) Death, or suspended animation from impeded respiration, whether caused by the inhalation of noxious gases, drowning, hanging, strangling, or smothering. The principal morbid appearances in such cases are:—the lungs of a deep-blue colour, with the blood extravasated in the air-cells; right auricle and ventricle filled with dark blood, as well as the neighbouring veins; lividity of the countenance, turgescence, and, perhaps, rupture of the vessels of the brain.

Treatment of suspended animation by suffocation in general. The patient must be conveyed into a room not too warm; and, if practicable, be immersed in a warm bath. Blood-letting

must be used, if at all, with caution:—friction must be employed with salt or warm flannels: stimulating fluids, in a dilute state, be poured into the stomach by means of a tube, and attempts be made to inflate the lungs. Laryngotomy, if necessary.

SUFFOCATION, *Pnigophobia*, (F.) Étouffement, is used for threatened suffocation, as *strangling* is. It means the state of dyspnoea and oppression experienced when a sufficient quantity of air does not enter the lungs, or when the chemical phenomena of respiration are imperfectly executed;—as in cases of asthma.

SUFFUMIGATION, *Suffumentum*.

SUFFUSIO, *Pseudoblepsia*.—s. Auriginosa, Icterus—s. Multiplicans, see *Diplopia*.—s. Oculi, Cataract.—s. Oculorum, Metamorphopsia.

SUGAR, *Saccharum*.—s. Barley, *Penidium*.—s. Candy, *Saccharum candidum*.—s. Cane, see *Saccharum*.—s. of Lead, *Plumbi superacetas*.

SUGARS, Various, see *Saccharum*.

SUGILLATION, *A bruise*, from *sugillare*, 'to give a black eye.' By most authors used synonymously with *Ecchymosis* and *Ecchymoma*, (q. v.) It is, also, applied to the spots or ecchymoses which occur in consequence of intrinsic causes,—in disease and in incipient putrefaction. It is common in dead bodies. To this last case it is, indeed, restricted by some medico-legal writers: and an interesting question sometimes arises:—Whether the appearance have been induced before death or afterwards? Whether it be a case of *ecchymosis* or of *sugillation*? In the former, the extravasated blood will usually be coagulated; not so in the latter. It is often, however, difficult to form a correct judgment without reference to the history of the case.

SUICIDE, *Suicidium*; from *sui cades*, 'murder of one's self.' The act of killing one's self. *Antochiria, Autoctonia, Idioctonia*. Suicide is, very frequently, the result of disease of the mind; the individual seeming, at times, to be irresistibly impelled to self-destruction. *Melancholia Suicidium*.

SUIE, Fuligo.

SUIF, Sebum.

SUITES DE COUCHES, Lochia.

SULCATUS, *Cannelé*, Grooved.

SULCUS. A furrow. A groove, (q. v.) (F.) Sillon. Anatomists have given this name to grooves on the surface of bones and other organs.

French writers on anatomy often use the term *Sillons* for the grooves which lodge the arteries and creep on the surface of bones; whilst those that receive veins are called *gouttières*, 'gutters.' Also, the Vulva.

SULCUS ANTERO-POSTERIOR JECORIS, see Liver—s. Transversalis, see Liver—s. Umbilicalis, see Liver.

SULFATE D'AMMONIACQUE, Ammoniac sulphas.

SULFURE DE CARBON, Carbonas sulphuretum.

SULPHAS AMMONIACÆ CUPRATUS, Cuprum ammoniatum—s. Cadmicus, Cadmii Sulphas—s. Kalico aluminicum, Alumen—s. Natrius, Soda, sulphate of—s. Zincicum, Zinci sulphas.

SULPHUR, *Sulfur, Scorith, Thi'on, Thi'an, Averick, Terra foliata, Fumus citrinus, Aq'ula,*

Brimstone, (F.) Soufre. The Native Sulphur is called *Rock Sulphur, Sulphur vivum*, &c. Sulphur, as we meet with it, is in rolls, *Sulphur in rotulis, S. rotundum, Roll Brimstone*. It is a volcanic production, and is obtained, in large quantities, from Solfatara in Italy. *Roll Sulphur* is impure sulphur, melted, and run into moulds. It is unpleasantly odorous, when heated or rubbed; insipid; solid, and brittle. S. G. 1.99 Fusible at 226°; volatilizable by heat, and condensing unchanged.

SULPHUR LOTUM, *Sulphur sublimatum lotum, Washed Sulphur, Magisterium Sulphuris, Sulphuris Flores loti*, is prepared by pouring boiling water on sublimed sulphur, so as to wash away any acid it may contain, and then drying it.

SULPHUR PRÆCIPITATUM, *Lac Sulphuris, Milk of Sulphur, Precipitated Sulphur, (F.) Crème de Soufre*, is prepared by boiling sublimed sulphur and lime together, and adding muriatic acid to precipitate the sulphur.

SULPHUR SUBLIMATUM, *Sulphur, (Ph. U. S.) Sublimed Sulphur or Flowers of Sulphur, (F.) Soufre sublimé, Fleurs de Soufre*, is the sulphur of commerce, sublimed in close vessels.

Sulphur is possessed of stimulant, laxative, and diaphoretic properties. As a laxative, it is used in hemorrhoidal and other affections. In the itch, applied externally and taken internally, it has been considered as a specific (?); and it is a valuable remedy in most cutaneous affections that are local. Dose, ʒss to ʒij.

The faces or dregs, left in the purification or sublimation of sulphur, are called *Horse Brimstone, Dregs of Sulphur vivum, Sulphur caballinum, S. vivum, Sulphuris vivi recrementum*. They are very impure, and are used only externally.

SULPHUR ANTIMONIATUM, Antimonii sulphuretum præcipitatum—s. Carburet of, Carbonis sulphuretum—s. Iodatum, see Iodine—s. Iodide of, see Iodine—s. Liver of, Potassæ sulphuretum—s. Vegetable, Lycopodium—s. Wort, Peucedanum.

SULPHURETUM AMMONIACÆ, Ammoniac sulphuretum—s. Ammoniac hydrogenatum, Liqueur fumans Boylii—s. Kalicum, Potassæ sulphuretum—s. Lixiviæ, Potassæ sulphuretum.

SULPHURIC ACID, *Ac'idum Sulphuricum vel Sulfuricum, Oleum Vitrioli, Spiritus Vitrioli, S. v. fortis, Acidum vitriolicum, Oil of Vitriol, Vitriolic Acid, Acidum Vitrioli dephlogistica'tum, Acor Sulphuris*. Sulphuric acid is inodorous; has a strong acid taste, and is corrosive. S. G. 1.845 (Ph. U. S.) It is escharotic, stimulant, rubefacient. Mixed with lard, it is sometimes used in local pains, and certain cutaneous affections.

ACIDUM SULPHURICUM AROMATICUM, *A. vitriolicum aromaticum, A. vitriolicum alcoholis aromaticum, Elixir vitrioli, E. V. aromaticum, E. vitrioli Mynsichti, E. vitrioli Edinburgensium, E. vitrioli cum tinctura aromatica, E. vitrioli dulcè seu acido-aromaticum, Alcohol cum aromaticis sulphuricatus, Tinctura acidis sulphurici*, is formed of sulphuric acid, f. ʒiijss; ginger, bruised, ʒj; cinnamon, bruised, ʒiiss; Alcohol, Oij.—Ph. U. S. Dose, gr. x. to xxx. Ph. L.

ACIDUM SULPHURICUM DILUTUM, *Diluted Sulphuric Acid, Acidum vitriolicum dilutum, Elixir of Vitriol, Elixir vitrioli, Spiritus vitriolici, Acidus Vogleri, (F.) Acide sulfurique diluëe*, is formed, according to the Pharmacopœia of the United

States, by adding *aq. destillat.* ʒxij to *acid. sulph.* ʒi. It is tonic, astringent, and refrigerant. Dose, grt. x to xx, largely diluted. When used as a gargle, half a drachm may be added to ʒvj of water.

SULPHURIS IO'DIDUM, *Iodide of Sulphur*. See Iodine. It is thus directed to be prepared in the Pharmacopœia of the U. S. (1842.) (*Iodin.* ʒiv: *sulphur.* ʒj. Rub the iodine and sulphur together in a glass, porcelain, or marble mortar until they are thoroughly mixed. Put the mixture into a mattress, close the orifice loosely, and apply a gentle heat, so as to darken the mass without melting it. When the colour has become uniformly dark throughout, increase the heat so as to melt the iodide; then incline the mattress in different directions, in order to return into the mass any portions of iodine which may have condensed on the inner surface of the vessel: lastly, allow the mattress to cool, break it, and put the iodide into bottles, which are to be well stopped.

SULPHUROUS ACID, *Ac'idum sulphuros'icum*, *A sulphuris volat'ile*, *A. Sulphuro'sum vel Sulfurosum*, *Spir'itus sulphuris*, *Spiritus sulphuro'sus volat'ilis*, *Sp. sulphuris per campanam*, *Sp. vitrioli phlogisticatus*, *Gas sulphuris*, (F.) *Acide Sulfureux*, *Air Acide Vitriolique*. Obtained by treating mercury with concentrated sulphuric acid, or by burning sulphur. It is sometimes used in the gaseous, at others, in the liquid state. Sulphurous acid gas is used to disinfect cloths, confined air, letters coming from infected places, &c. It is also exhibited, with great success, in the form of fumigation, in the treatment of certain chronic cutaneous affections, and of sciatic and rheumatic pains in general. If respired pure, it acts in the manner of violent irritants; and is not long in producing death.

SULTZMALT, **MINERAL WATERS OF**. Sultz malt is a village in the department of the Upper Rhine; where are several sources of cold, acidulous waters, which seem to contain carbonic acid, subcarbonate of soda, subcarbonate of lime, sulphate of lime, and a little bitumen. They are refrigerant, aperient, and alterative.

SUMAC DES CORROYEURS, *Rhus coriaria*—s. *Vénéneux*, *Rhus toxicodendron*.

SUMACH, *Rhus coriaria*.

SUMEN, *Hypogastrium*.

SUMMER COMPLAINT. A popular name, in the United States, for diarrhœa occurring in summer. It is often, also, made to include dysentery and cholera infantum.

SUMMER DISEASES, see *Estival*—s. *Rash*, *Lichen tropicus*.

SUNBURN, *Ephelides*—s. *Dew*, *Drosera Rotundifolia*—s. *Pain*, see *Hemicrania*—s. *Sun-rash*, *Lichen*—s. *Stroke*, *Coup de soleil*.

SUNSTROKE, **EGYPTIAN**, *Coup de soleil*.

SUPER. A common Latin prefix; in composition, signifying 'above.'

SUPERBUS, *Rectus superior oculi*.

SUPERCILIARIS, *Corrugator supercillii*.

SUPERCILIARY, *Supercilia'ris*, from *super*, 'above, and *cilium*, 'the edge of the eyelid.' That which relates to the supercilia or eyebrows. (F.) *Sourcilier* ou *Surcilier*.

SUPERCILIARY ARCHES or RIDGES, (F.) *Arcales sourcilières*, are two, slightly projecting, apophyses, situate at the anterior surface of the os frontis, above the superior margin of the or-

bits. They are separated by the nasal *bosse*, and covered by the superciliaris muscle, to which they give attachment.

SUPERCILIUM, *Ophrys*, *Vallum*, (F.) *Sourcil*. Same etymon. The eyebrows are two arched eminences,—convex above, and more or less prominent, according to the individual,—which lie on the superciliary arch of the os frontis, above the eyelids, and extend from the sides of the root of the nose to the temple. Their inner extremity or *head* is more prominent than the outer or *tail*. The eyebrows are covered with short and stiff hairs, which are directed, obliquely, from within outwards, and are, commonly, of the colour of the hair. The skin in which these hairs are implanted, rests on the *orbicularis palpebrarum*, *frontalis*, and *superciliaris* muscles, which move the eyebrows in different directions. The eyebrows serve as an ornament to the countenance; and by covering the eye, defend it from the impression of too strong a light. They direct the perspiration, also, from the eye.

SUPERCILIUM ACETABULI. The edge of the cotyloid cavity of the os innominatum.

SUPEREVACUATIO, *Hypercrisis*.

SUPERFECUNDATION, *Superfœtation*.

SUPERFŒCUNDATIO, *Superfœtation*.

SUPERFŒTATION, *Superfœtatio*, *Epicye'sis*, *Superimpregnatio*, *Epig'omon*, *Superfœcundatio*, *Epicye'ma*, *Superfecundation*, from *super*, 'upon,' and *fœtare*, 'to bring forth young.' Conception of a fœtus in a uterus which already contains one. The impregnation of a female already pregnant. The possibility of this has been denied; but there is abundant evidence to show, that it is possible at a very early period of pregnancy.

SUPERGEMINALIS, *Epididymis*.

SUPERGENUALIS, *Patella*.

SUPERHUMERALE, *Epomis*.

SUPERIMPRÆGNATIO, *Superfœtation*.

SUPERIOR AURIS, *Attollens aurem*—s. *Rotundus clitoridis*, *Ischio-cavernous*.

SUPERLABIA, *Clitoris*.

SUPERNUTRITIO LIENIS, *Splenoncus*—s. *Splenis*, *Splenoncus*.

SUPEROXALAS KALICUM, *Potass. oxalate of*.

SUPERPURGATIO, *Hypercatharsis*.

SUPERSCAPULARIS, *Supraspinatus*—s. *Inferior*, *Infra-spinatus*.

SUPINATEUR COURT ou **PETIT**, *Supinator radii brevis*—s. *Grand ou long*, *Supinator radii longus*.

SUPINATION, *Supinatio*, from *sup'ius*, 'lying on the back.' The movement in which the forearm and hand are carried outwards, so that the *anterior* surface of the latter becomes *superior*.

In Physiology, *Supination*, *Supinatio*, *Hyptias'ma*, *Hyptias'mus*, means the horizontal position on the back, with the head thrown back, and the legs and arms extended. It is often a sign of great weakness in disease.

SUPINATOR. Same etymon. That which produces supination. A name given to two muscles of the forearm.

SUPINATOR BREVIS seu **MINOR**, *Supinator radii brevis*—s. *Longus seu major*, *S. radii longus*.

SUPINATOR RADII BREVIS, *S. brevis seu minor*, *Epicondyl'o-radial*, (Ch.) (F.) *Supinateur court*,

ou *petit supinateur*. A muscle, seated at the outer and back part of the forearm. It is flattened, triangular, and curved upon itself, in such a manner, that it embraces the superior extremity of the radius. It is attached, on the one hand, to the external tuberosity of the humerus, and to a small portion of the posterior surface of the ulna, and is inserted into the upper third of the outer and upper surfaces of the radius. It produces, by contracting, the motion of supination.

SUPINATOR RADII LONGUS, *S. longus* sive *major*, *Brachio-radialis*, *Húmero-sus-radialis*, (Ch.) (F.) *Long* ou *grand supinateur*, is seated at the anterior and outer part of the forearm. It arises from the inferior part of the outer edge of the os humeri, and from the external intermuscular aponeurosis; and is inserted, by a long tendon, into the outer edge of the radius, near the base of the styloid process. It causes the supination of the forearm, which it can likewise bend on the arm.

SUPPOSITION DE PART, Pregnancy, pretended.

SUPPOSITORIUM UTERINUM, Pessary.

SUPPOSITORY, *Suppositorium*, *Hypotheton*, from *supponere*, (*sub*, and *ponere*, 'to put,') 'to put under.' Any solid medicine, in the form of a long cone or cylinder, intended to be introduced into the rectum;—either for the purpose of favouring intestinal evacuations, or to act as an anodyne. Purgative suppositories are made of soap, aloes, or any other irritating substance.

SUPPRESSIO LOTII, Ischuria.

SUPPRESSIONE DU FLUX MENSTRUËL, Amenorrhœa—*s. de Part*, see Parturition—*s. d'Urine*, Ischuria.

SUPPURANS, Suppurative.

SUPPURATION, *Ecpyema*, *Purulentia*, *Pyosis*, *Pyësis*, *Diapyeina*, *Diapyeësis*, (F.) *Aboutissement*. Formation or secretion of pus, (q. v. and also *Pyogenia*.) from *sub*, 'under,' and *pus*. It is a frequent termination of inflammation, and may occur in almost all the tissues. This termination is announced by slight chills; by remission of the pain, which, from being lancinating, becomes heavy; by a sense of weight in the part, and, when the collection of pus can be easily felt, by fluctuation. When pus is thus formed in the cellular membrane, and is collected in one or more cavities, it constitutes an *abscess*. If it be formed from a surface exposed to the air, it is an *ulcer*; and such ulcers we are in the habit of establishing artificially in certain cases of disease.

SUPPURATIVE, *Suppurans*, *Suppurativus*, *Diapyeëticus*, *Ecpyëticus*, *Ecpyëcon'tus*. That which facilitates suppuration. Suppuratives are, generally, vesicants mixed with lard.

SUPRA. A common Latin prefix: in composition, signifying 'above.'

SUPRA COSTALES, *Levatores Costarum*, (F.) *Sur-costaux*, from *supra*, 'above,' and *costa*, 'a rib.' A name given to twelve small, fleshy fasciculi, which are flattened, triangular, and with radiating fibres. They pass from the transverse processes of the dorsal vertebræ to the superior margin of the rib beneath. Spigelius, Cowper, Boyer, Chaussier, and others consider them to form part of the intercostales externi.

SUPRA-ORBITAR, *Supra-orbita'lis*, *Supra-*

orbita'rius, from *supra*, 'above,' and *orbita*, 'the orbit.' That which is situate above the orbit.

SUPRA ORBITAR FORAMEN, *Foramen Supra-orbitarium*, *F. orbitarium superius*, (F.) *Trou sus-orbitaire ou orbitaire supérieur*, is a foramen or notch completed by a ligament at the inner third of the orbital arch. It gives passage to the *supra-orbital* or *superciliary* artery, a branch of the ophthalmic, which ascends the forehead, and is distributed thereto.

SUPRA-PUBIAN, *Supra-pubic*, *Supra-pubianus*, from *supra*, and *pubes*. That which is seated above the pubis.

SUPRA-PUBIAN NERVE, (F.) *Nerf suspubien*, is the internal ramus of the inguino-cutaneous branch of the first lumbar nerve. It is the *genito-crural* branch of Bichat. It descends almost vertically before the psoas muscle; and, near the crural arch, divides into two branches. One of these accompanies the spermatic cord, and is distributed to the cremaster, scrotum, and integuments on the inner part of the thigh. The other issues from the pelvis with the femoral filaments; traverses the aponeurosis of the thigh; and is distributed to the integuments of the upper and anterior part of the limb.

SUPRA-SCAPULARIS, *Supra-spinatus*.

SUPRA-SEMIORBICULARIS, *Orbicularis oris*.

SUPRA-SPINATUS, *Supra-spinosus*, (F.) *Sur-épineux*, *Sus-épineux*, from *supra*, and *spina*. That which is seated above the spine.

Fossa SUPRA-SPINATA, (F.) *Fosse Sus-épineuse*, is a triangular depression above the spine of the scapula.

SUPRA-SPINATUS MUSCLE, *Super-scapula'ris*, *Sus-spino-scapulo-trochitérien*, *Supra-scapularis*, *Petit sus-scapulo-trochitérien*, (Ch.) is situate in the fossa supra-spinata. It is elongated, thick, and triangular, and is attached, on the one hand, to the two inner thirds of the fossa supra-spinata; and terminates, on the other, at the anterior part of the great tuberosity of the humerus. This muscle raises the arm.

LIGAMENTA SUPRA-SPINOSA, *Supra-spinal ligaments*, are two in number. 1. The *Dorsolumbar-supra-spinal ligament*, (F.) *Ligament sur-épineux dorso-lombaire*, extending above the spinous processes of the dorsal and lumbar vertebræ, from the 7th cervical as far as the median crista of the sacrum. 2. *Cervical supra-spinal ligament*, (F.) *Ligament sur-épineux cervical*, which extends above all the cervical spinous processes, and is attached, above, to the outer occipital protuberance.

SURA. The calf of the leg, (F.) *Mollet*, *Gras de Jambe*. The projection, formed at the posterior part of the leg by the gastrocnemii muscles: the fibula, (q. v.)

SURCILIER, *Corrugator supercillii*, *Superciliary*.

SURCOSTAUX, *Supracostalis*.

SURDENT, (F.) *supra*, 'above,' and *dens*, 'a tooth.' When a milk tooth does not fall out at the period of the second dentition, but is merely forced to one side by the new tooth, it is called a *surdent*.

SURDITAS, *Cophosis*, *Deafness*.

SURDITÉ, *Cophosis*, *Deafness*.

SUREAU COMMUN, *Sambucus*.

SURELLE, *Oxalis acetosella*.

SURÉPINEUX, *Supraspinatus*.

SURFET, *Colica crapulosa*.

SURGEON, *Chirur'geon*; old French, *Sur-gien*, *Chiro'nax*, *Chirur'gus*, *Vulnerum med'icus*, *Cheiria'ter*, *Chiri'uter*, (F.) *Chirur'gien*, from *χειρ*, 'the hand,' and *εργον*, 'work.' One who practises surgery. The surgeon, says Celsus, ought to be young, or, at all events, not advanced in life. His hand must be steady, expert, and never tremulous: he must use the right or left with equal facility: his sight must be clear and penetrating: his mind intrepid; and although unmoved when he proceeds to operate, he must not be in haste, or cut less than is necessary, but finish his operation, as if the cries of the patient made no impression upon him.

SURGEON-APOTHECARY. One who unites the practice of surgery with that of the apothecary. A *general practitioner*.

SURGEON-DENTIST, Dentist.

SURGERY, *Chirur'gia*, *Chiriatri'a*, *Cheiria'is*, *Metacheiria'is*, *Medici'na operati'va*, *Medici'na eff'icax*, (F.) *Chirurgie*. The part of the healing art which relates to external diseases; their treatment; and, especially, to the manual operations adapted for their cure.

SURGERY, ANAPLASTIC, *Morioplastice*—s. *Autoplastic*, *Morioplastice*—s. *Dental*, *Dentistry*.

OPERATIVE SURGERY is termed *Acur'gia*, and *Acidur'gia*.

MILITARY SURGERY, (F.) *Chirurgie militaire*, is that which relates to the operations to be performed on the field of battle, or subsequently;—with the attention to be paid to the wounded, &c.

SURGERY, PLASTIC, *Morioplastice*.

SURGICAL, *Chirur'gicus*, (F.) *Chirurgical*, *Chirurgique*. That which relates to surgery; as *surgical anatomy*, *surgical operations*, *surgical instruments*, &c.

SURGIEN, Surgeon.

SURINAMINE. See *Geoffræa Surinamensis*.

SUROXYGENESES. A name given by Baumes to diseases attributed by him to superabundance of oxygen.

SURPEAU, Epidermis.

SURRECTA ALBA, *Ranunculus flammula*.

SURSELS. See *Salt*.

SURTOUTS LIGAMENTEUX DE LA COLONNE VERTÉBRALE, Vertebral ligaments.

SURVIE, Survivorship.

SURVIVORSHIP, (F.) *Survie*, from *super-rire*, (*super*, and *vivre*,) (F.) *survivre*, 'to live longer.' In *legal medicine*, this word means the probability that any individual has survived others in an accident, which has been fatal to all. This is often an important question, connected with the inheritance of property, and on which physiology can rarely afford more than presumptive grounds for conclusion.

SUS-ACROMIO-HUMÉRAL, Deltoid—s. *Épineux*, *Supraspinatus*—s. *Maxillo-labial*, *Levator anguli oris*—s. *Maxillo-labial. grand*, *Levator labii superioris alæque nasi*—s. *Maxillo-labial. moyen*, *Levator labii superioris proprius*—s. *Maxillo nasal*, *Compressor naris*—s. *Optico-sphéno-sciéroticén*, *Rectus superior oculi*—s. *Phalangien-du-pouce*, *Abductor pollicis brevis*—s. *Pubio-fémoral*, *Pectinalis*—s. *Scapulo-trochitérien*, *le plus petit*, *Teret minor*—s. *Scapulo-trochitérien. petit*, *Supraspinatus*—s. *Spino scapulo-trochitérien*, *Supraspinatus*.

SUSCEPTIBILITY, from *facile suscipiens*,

(*sub* or *sus*, and *capio*, 'I take,') 'easily taking, or undertaking.' Sensibility, in its most enlarged acceptation. Impressibility. This term, with the epithet *nervous*, is sometimes used for that increase in the moral sensibility which is particularly observed in nervous affections.

SUSPENDICULUM, Cremaster.

SUSPENSIOIRE, Suspensory.

SUSPENSORIUM TESTIS, Cremaster.

SUSPENSORY, *Suspensori'us*, from *suspen-dere*, (*sub* or *sus*, 'under,' and *pendere*, 'to hang,') 'to hang under,' (F.) *Suspensoire*. That which sustains or suspends.

SUSPENSORY BANDAGE, *Suspensori'um*, is a bandage, intended to support the scrotum, in cases of disease of the testicles or of scrotal hernia. It consists of a kind of bag, fixed above to a cincture, and retained below by strings passing between the thighs, and fixed to the cincture behind.

SUSPENSORY LIGAMENT OF THE LIVER is a triangular duplicature of the peritoneum, between the inferior surface of the diaphragm and the upper surface of the liver, which is continuous with the great falcx of the umbilical vein.

SUSPENSORY LIGAMENT OF THE PENIS is a fibro-cellular fascia, of a triangular shape, which extends from the anterior part of the symphysis pubis to the corpus cavernosum, which it sustains. A similar ligament belongs to the clitoris.

SUSPENSUM, *Enæorema*.

SUSPIRIUM, from *sub* or *sus*, 'under,' and *spiro*, 'I breathe,' *Nygmus*, *Myel'mus*, *Myel-this'mus*, *Stenag'mus*, *Stenax'is*. A *sigh*, (F.) *Soupir*. A short breathing. A slow, voluntary contraction of the diaphragm and intercostal muscles; the effect of which is, to restore the due relation between the circulation and respiration, or to free ourselves from an inconvenient sense of weight felt in the chest, when we are much depressed—a weight, which appears to be chiefly dependent on the functions of the heart being disturbed through the moral influence. The sigh differs from the *sob*:—the latter being involuntary and spasmodic. Sighing, occurring in fevers to a great extent, indicates considerable depression. When accompanied with a vocal sound, it constitutes a *groan*.

SUSURRUS, *Bourdonnement*, *Tinnitus aurium*.

SUTELA, Suture.

SUTORIUS, *Sartorius*.

SUTTER, *Saccharum*.

SUTURA ABDOMINALIS, *Gastrophathy*—s. *Arcualis*, *Coronal suture*—s. *Clavata*, *Suture quilled*—s. *Dentata*, see *Suture*—s. *Fronto-parietalis*, *Coronal suture*—s. *Jugalis*, *Sagittal suture*—s. *Lambdoidalis*, *Lambdoid suture*—s. *Limboza*, see *Suture*—s. *Lepidoides*, *Squamous suture*—s. *Mendosa*, *Squamous suture*—s. *Notha*, see *Suture*—s. *Obelæa*, *Sagittal suture*—s. *Proræ*, *Lambdoid suture*—s. *Punctata*, *Suture common*—s. *Puppis*, *Coronal suture*—s. *Rhabdoides*, *Sagittal suture*—s. *Serrata*, see *Suture*—s. *Vera*, see *Suture*—s. *Virgata*, *Sagittal suture*.

SUTURE, *Sutu'ra*, *Sute'la*, *Armè*, *Rhaphe*, from *surre*, *sutum*, 'to stitch,' *Dore-tail joint*, (F.) *Engrenure*. A kind of immovable articulation, in which the bones unite by means of

serrated edges, which are, as it were, *dove-tailed* into each other. The articulations of the greater part of the bones of the skull are of this kind. The coronal, lambdoidal, and sagittal sutures are called *true sutures*; the two temporal are called *false sutures*, *suture nothæ*.

A *dentated suture*—*Sutu'ra denti'tu*—is one in which the processes are long and dentiform, as in the interparietal suture. In a *serrated suture*—*sutu'ra serra'tu*—the indentations and processes are small and fine, like the teeth of a saw, as in the suture between the two portions of the frontal bone. In the *sutu'ra limbo'sa* there is along with the dentated margins a degree of bevelling of one, so that one bone rests on the other, as in the occipito-parietal suture.

SUTURE, in *Surgery*, *Rhu'phæ*, means an operation which consists in stitching the lips of a wound to procure their union. The suture was, at one time, largely employed; but, in modern times, its use has been wisely restricted. There are few wounds in which the edges may not be brought together by adhesive plaster appropriately applied. This kind of union, by adhesive plaster simply, has been absurdly termed *Sutura sicca* or *dry suture*, in opposition to the *Sutura cruenta*, or suture properly so called. The suture is generally performed with waxed thread and straight or curved needles, according to the arrangement of parts.

The chief sutures are the *interrupted suture*, the *quilled suture*, the *glover's suture*, and the *twisted suture*. 1. The INTERRUPTED SUTURE, (F.) *Suture à points séparés*, *Suture entrecoupée*, is performed by passing a needle, armed with a ligature, through the lips of the wound, previously brought into contact; and then tying the extremities of the thread. The other stitches are made in the same manner. They are separate or interrupted. It is the suture most commonly used. 2. The QUILLED SUTURE, *Sutura clava'ta*, (F.) *Suture enchevillée* ou *emplumée* ou *empennée*, *Compound Suture*, is merely the interrupted suture, with this difference, that the ligatures are not tied over the face of the wound, but over two quills or rolls of plaster, or bougies, which are laid along the sides of the wound. It is used by some surgeons, on account of there being less danger of the stitches tearing out. It is not much employed. 3. The GLOVER'S SUTURE, *Continued Suture*, *Uninterrupted Suture*, (F.) *Suture de Pelletier*, *Suture en surget*, is executed by introducing the needle first into one lip of the wound from within outwards, then into the other in the same way; and, in this manner, sowing up the whole extent of the wound. It has been chiefly used in wounds of the intestinal canal. It is now rarely employed except for stitching up dead bodies. The common stitch or suture, *Sutura punctata*, (F.) *Suture à points passés*, has been used in similar cases. 4. The ROYAL STITCH OR SUTURE is the name of an old operation for the cure of Bubonocœle. It consisted in putting a ligature under the hernial sac, close to the abdominal ring, and then tying that part of the sac, so as to render it impervious, by the adhesive inflammation thus excited. 5. The TWISTED SUTURE, (F.) *Suture entortillée*, is employed, chiefly, to unite wounds of the cheeks and of the free edge of the lips. To perform it, a pin or needle is passed through

the edges of the wound, so as to keep them accurately in contact. A piece of thread is then wound accurately round the pin, from one side of the division to the other, in the form of the figure ∞ . The number of pins and sutures must, of course, correspond with the extent of the wound. This is the suture used in cases of harelip, (q. v.) 6. The SUTURE À ANSE of Le Dran has only been employed in cases of wounds of the intestines. For this purpose, the edges of the wound are brought together, and as many needles, with unwaxed threads, used as there are to be stitches. Each stitch is then made by passing a needle through the edges; and all the ligatures which belong to one side of the wound, are tied together, and twisted so as to form a thread, which is fixed externally.

SUTURE À POINTS PASSÉS, Suture, common—s. Compound, Suture, quilled—s. Continued, S. glover's—s. *Écailleuse*, Squamous suture—s. *Empennée*, Suture, quilled—s. *Emplumée*, Suture, quilled—s. *Enchevillée*, Suture, quilled—s. *Entortillée*, Suture, twisted—s. *Entrecoupée*, Suture, interrupted—s. False, Harmony—s. *Occipitale*, Lambdoid suture—s. Occipito-parietal, Lambdoid suture—s. *de Pelletier*, Suture, Glover's—s. *à Points séparés*, Suture, interrupted—s. *Squameuse*, Squamous suture—s. *en Surget*, Suture, Glover's—s. Superficial, Harmony—s. Uninterrupted, see Glover's.

SWADDLING CLOTHES, Swathing clothes.

SWALLOW, *Hirundo*—s. Wort, *Asclepias vincetoxicum*.

SWATHING OR SWADDLING CLOTHES, *Incunabu'tu*, *Fasciæ*, *Panni*, from Sax. *þresan*, 'to bind,' (F.) *Maillot*. The kind of clothing or bandaging formerly applied to children during the first year of life. It is now, properly, laid aside, and every freedom allowed to muscular exertion.

SWEAT, *Sudor*—s. Scab, *Crusta genu equinæ*.

SWEATING OF BLOOD, see Diapedesis—s. Sickness, *Sudor Anglicus*.

SWEATING SICKNESS, MALWAH. A disease which appears to be allied to the worst form of cholera, and to bear a close relation to malignant congestive fever. As its name imports it occurs in Malwah in India.

SWEETFLAG, *Acorus calamus*.

SWEETPOD, *Ceratonium siliqua*.

SWELLING, *Exad'sis*, *Presis*, *Extumescatio*, *Tumor*, *Tumefactio*, (F.) *Enflure*, *Gonflement*, from Sax. *þwellan*, (D.) *swellen* (G.) *schwellen*, 'to swell.' Morbid increase of bulk in the whole, or a part, of the body. See Tumour.

SWELLING, WHITE, *Hydrarthrus*, *Spina ventosa*.

SWERTIA CHIRAYITA, *Gentiana chirayita*.

SWIETENIA FEBRIFUGA, *Feb'rifuge Swietenia*, (F.) *Mahagon febrifuge*, Family, Mliacæ. Sex Syst. Decandria Monogynia. The bark of this tree, which is a native of the East Indies, and called there *Rohena Bark*, has an aromatic odour and bitter taste. It is tonic and stomachic, and has been used in intermittents, and in diseases where bitter tonics are indicated. Dose, ʒj to ʒij of the powder.

SWIMMING, Natation—s. of the Head, *Vertigo*.

SWOON, *Syncope*.

SYCAMINOS, *Morus nigra*.

SYCAMINUM. See *Morus nigra*.

SYCE, *Ficus carica*.

SYCEPH'ALUS, from *συρ*, 'with,' and *κεφαλη*, 'head.' A monster having two heads united together.

SYCION, *συκιον*, from *συζωρ*, 'a fig.' A decoction of dried figs.

SYCI'TES, *συκιτης*. Wine, in which dried figs have been infused.

SYCITES, *Catorchites*.

SYCOMA, *Ficus*.

SYCO'SIS, *συκωσις*. Same etymon. A tumour of the shape of a fig. Also, a fungous ulcer. An excrescence about the eyelids. Dr. Bateman defines it:—an eruption of inflamed but not very hard tubercles occurring on the bearded portion of the face and on the scalp, in adults; and usually clustering together in irregular patches;—*Phyma Sycosis*. Of this he has given two species: 1. *Sycosis Menti*, *S. barbæ*, *Mentagra*, *Varus Men'tagra*, *Chimchellk*, *Barber's Itch*, (F.) *Dartre pustuleuse mentagre*; and, 2. *Sycosis Capill'is*, *S. Capilli'tii*. The treatment, in both cases, resembles that for *Porigo favosa*.

SYCOSIS, *Ficus*.

SYDERATIO, *Sideratio*.

SYM, SYN, *συν*, 'with, together,' like the *cum*, *col*, *con*, *cor*, &c., of the Latins. A common prefix. Before *b*, *p*, *ph*, *ps*, and *m*,—*syn*, or *xyn* is changed into *sym* or *xym*, (com;) before *c*, *ch*, *g*, *l*, and *x*, into *syn* or *xyn*, *συγ*, *ξυγ*, (con;) before *l* into *syl* or *xyl*, (col;) before *r* into *sy* or *xry*, (cor;) and before *s* into *sy* or *xy*, *sys*, (co and cos.)

SYMBLEPHARON, *Ankyloblepharon*.

SYMBLEPHARO'SIS, from *συρ*, 'with,' and *βλεφαρον*, 'an eyelid.' A preternatural adhesion between the eyelids; and especially between the upper eyelid and globe of the eye.

SYMBLEPHAROSIS, *Ankyloblepharon*.

SYMBOLE, *Commissure*.

SYMBOLEUSIS, *Consultation*.

SYMBOLISMUS, *Sympathy*.

SYMBOLIZATIO, *Sympathy*.

SYMBOLOGICA, *Symptomatology*.

SYMMELES; from *συρ*, 'with,' and *μελος*, an extremity. *Monopus*. A genus of monsters whose extremities are joined together. I. G. St. Hilaire.

SYMMET'RICAL, *Symmet'ricus*, *συμμετρος*, from *συρ*, 'with,' and *μετρειν*, 'to measure.' An epithet given to those parts of the body, which, if seated on the median line, may be divided into two equal, and perfectly like halves; or which, if situate—the one to the right, the other to the left of this line—have a similar conformation, and a perfectly analogous arrangement.

SYMMETRY, *Symmet'ria*. The regularity in form, observed in many parts, situate on the median line; and, also, the resemblance which exists between many organs that are situate on each side the median line. Bichat first noticed that this symmetry was confined to the organs of animal life; as the head, brain, spine, organs of sense, of locomotion, &c.

SYMPARATERESIS, *Observation*.

SYMPASMA, *Catapasma*.

SYMPATHET'IC, *Sympath'icus*, *Sympathe'ticus*, (F.) *Sympathique*, from *συρ*, 'with,' and

παθος, 'suffering.' That which depends on sympathy. Sympathetic affections of an organ are those morbid phenomena that supervene, without any morbid cause acting directly on it, and by the reaction of another organ primarily affected. Thus, itching of the nose is a *sympathetic affection*, produced by irritation in the intestinal canal.

The epithet, *sympathetic*, is, also, given to different nerves. See *Trisplanchnic*, *Pneumogastric*, and *Facial*.

SYMPATHETIC POWDER, *Pulvis sympathet'icus* of Sir Kenelm Digby, was composed of calcined sulphate of iron, prepared in a particular manner. It was long supposed to be able to cure a wound, if applied to the weapon that inflicted it; or, even to a portion of the bloody clothes. It is proper to remark, however, that the wound itself was carefully excluded from the air, and from all irritation.

SYMPATHETIC, GREAT, *Trisplanchnic nerve*—s. Middle, *Pneumogastric*.

SYMPATHETICUS MINOR, *Facial nerve*.

SYMPATHETISMUS, *Sympathy*.

SYMPATHIA, *Consent of parts*.

SYMPATHICUS, *Sympathetic*.

SYMPATHIQUE, *Sympathetic*.

SYMPATHY, *Sympath'ia*, *Compas'sio*, *Consensus*, *Sympathet'ismus*, *Conflux'io*, *Conspiratio*, *Commer'cium*, *Consor'tium*, *Homoioopath'ia*, *Homoeothnia*, *Adelphiz'is*, *Symbolis'mus*, *Symbolizatio*. The connexion that exists between the action of two or more organs, more or less distant from each other; so that the affection of the first is transmitted, secondarily, to the others, or to one of the others, by means unknown to us. A knowledge of the particular sympathies between different organs throws light on the etiology of diseases, their seat, and the particular organ towards which our therapeutical means should be directed. See *Irritation*.

SYMPEXIS, *Concretion*.

SYMPHITUM MINUS, *Prunella*.

SYMPHOREMA, *Congestion*.

SYMPHYOCEPHALUS, *Metop'ages*, *Cephalop'ages*, from *συμφυσις*, 'united together,' and *κεφαλη*, 'head.' A monstrosity in which twins are united by the head.

SYMPHYSEOT'OMY, *Symphysot'omy*, *Synchondrot'omy*, *Symphysiotom'ia*, from *συμφυσις*, and *τευνω*, 'I cut.' The operation or section of the *Symphysis*, *Sigaultian operation*, *Sigaultian section*. This operation is performed with the view of augmenting the diameter of the pelvis, in order to facilitate delivery in certain cases of faulty conformation of that cavity, with wedging of the head of the child therein. To perform the operation, the female is placed on her back; the pubes is shaved; and, with a strong scalpel, the soft parts are divided on the median line. The articulation is then cut. As soon as the fibrous parts, which hold the bones together, are divided, they separate to a certain distance from each other; and the delivery may be accomplished. The knife, with which the operation is performed, is called, by the French, *Couteau symphysien*.

SYMPHY'SIA, from *συμφυσις*, 'a growing together.' A malformation consisting in the union of parts that are usually divided.—Breschet.

SYM'PHYSIS, from *συμφυω*, (*συρ*, 'with,' and *φυω*, 'I grow,') 'I unite together.' A union

of bones. The bond of such union. The aggregate of means used for retaining bones *in situ* in the articulations. The name symphysis has, however, been more particularly appropriated to certain articulations; as to the *symphysis pubis*, *sacro-iliac symphysis*, &c.

SYMPHYSIS. Coalescence. Commissure, Insertion—s. *Ossium muscularis*, *Syssarcosis*—s. *Pubis*, *Pubic articulation*.

SYMPHYSOTOMY, Symphyseotomy.

SYMPHYTOS, Hereditary.

SYMPHYTUM. Same etymon. *Symphytum officinale*, *Consolida major*, *Comfrey*, *Alum*, *Alus*, (F.) *Grande Consoude*. Family, *Boraginæ*. See *Syst. Pentandria Monogynia*. The roots of this European plant are very mucilaginous, and are employed as emollients. They are used in decoction, in hæmoptysis, dysentery, and chronic diarrhœa, &c.

SYMPHYTUM, *Solidago virgaurea*—s. *Minium*, *Bellis*—s. *Petræum*, *Sanicula*.

SYMPHYTUM PETRÆUM, *Coris Monspelien'sis*, *Montpelier Coris*. An intensely bitter and nauseous plant, which is said to have been useful in syphilis.

SYMPLOCARPUS FÆTIDUS, *Dracontium fœtidum*.

SYMPTOM, *Symptomata*, *Adcidens*, from *συν*, 'with,' and *πτωω*, 'a fall,' from *πιπτω*, 'I fall.' Any change, perceptible to the senses, in any organ or function, which is connected with morbid influence. It is by the aggregate and succession of symptoms that a disease is detected. The term *symptoms of symptoms* has been used for the effects which result from the symptoms of a disease; but which effects are not essentially connected with the disease itself. Thus, the debility arising from the frequency of the evacuations in dysentery is a symptom of symptoms. See *Signa*.

SYMPTOMA TURPITUDINIS, *Nymphomania*.

SYMPTOMATIC, *Symptomatiæus*. That which is a symptom of some other affection. Thus, we speak of a symptomatic disease, in opposition to one that is idiopathic.

SYMPTOMATOLOGY, *Symptomatolog'ia*, *Symbolog'ica*, from *συμπτωμα*, 'a symptom,' and *λογος*, 'a treatise.' The branch of pathology, the object of which is the knowledge of symptoms.

SYMPTOM'SIS, from *συν*, 'with,' and *πιπτω*, 'I fall.' Depression or rather emaciation or atrophy, either of the whole body or of a part.

SYNETION, *Concausa*.

SYNANCHE, *Cynanche*, *Cynanche tonsillar*.

SYNANCIE, *Cynanche*.

SYNARTHRODIAL, *Synarthrodial'sis*, from *συν*, 'with,' and *αρθρωσις*, 'articulation.' That which belongs to synarthrosis; as *Synarthrodial articulation*.

SYNARTHROSIS, *Abarticulatio*, *Courticulatio*. An immovable articulation. Synarthrosis includes three species:—*Suture*, *Hurmony*, and *Gomphosis*.

SYNATHROISMUS, *Congestion*.

SYNCANTHIUS, from *συν*, 'with,' and *κωνθος*, 'the corner of the eye.' A morbid adhesion between the globe of the eye and the orbit.

SYNCHONDROSIS, from *συν*, 'with,' and *χονδρος*, 'a cartilage.' Union or articulation of bones by means of cartilage:—as the articula-

tions of the ribs with the sternum, by means of their cartilages of prolongation.

SYNCHONDROTOMY, *Symphyseotomy*.

SYNCHRONOUS, *Syn'chronus*, from *συν*, 'with,' and *χρονος*, 'time.' That which occurs at the same time. Thus, the pulsations of an artery may be synchronous with those of the heart.

SYNCHYSIS, *Confusio*.

SYNCIPUT, *Sinciput*.

SYNCLONUS, from *συνκλονειν*, (*συν*, 'with,' and *κλονειν*, 'I shake,') 'I shake together.' *Clon'ici universales*, *Clonus* (Young.) Tremulous, simultaneous, and chronic agitation of various muscles, especially when excited by the will. See *Tremor*, *Chorea*, &c.

SYNCLONUS CHOREA, *Chorea*—s. *Beriberia*, *Beriberi*—s. *Raphania*, *Raphania*—s. *Tremor*, *Tremor*.

SYNCOMISTOS, from *συνκομιζω*, (*συν*, and *κομιζω*,) 'I bring together;' *Antop'gros*, *Pamis domes'ticus*, *secundu'rius*, *cibari'us*, *confusiv'neus*. Bread of the whole wheat or of the unsifted meal. *Household bread*.

SYNCOPE, from *συνκοπτω*, 'I fall down.' *An'imi defectio*. *Animi del'equium*, *Leipopsych'ia*, *Apsych'ia*, *Asphyx'ia*, *Apsych'ia*, *Lipothym'ia*, *Sub'itus animi casus*, *Siccon*, *Fainting fit*. (F) *Évanouissement*, *Défaillance*, *Pamaisin*. Complete, and commonly, sudden loss of sensation and motion, with considerable diminution, or entire suspension, of the pulsations of the heart and the respiratory movements. Syncope is, commonly, an affection of no consequence; but, sometimes, it is an index of diseased heart. Placing the patient in the horizontal posture; sprinkling cold water over the face, and the application of volatile substances to the nose, are all that will be required during the fit. See *Asphyxia* and *Suffocation*.

SYNCOPE ANGINOSA, *Angina pectoris*.

SYNCRITICA, *Astringents*.

SYNDACTYLUS, *Aschistodactylus*.

SYNDESMOGRAPHY, *Syndesmograph'ia*, from *συνδεσμος*, 'a ligament,' and *γραφειν*, 'a description.' A description of the ligaments. The part of anatomy which describes the ligaments.

SYNDESMOLOG'Y, *Syndesmolog'ia*, from *συνδεσμος*, 'a ligament,' and *λογος*, 'a treatise,' dis'course.' A treatise on the ligaments.

SYNDESMO-PHARYNGEUS. A fasciculus of the constrictor pharyngis superior. (q. v.)

SYNDESMOS, *Ligament*.

SYNDESMOSIS, *Synneuro'sis*, *Synymen'sis*, from *συνδεσμος*, 'ligament.' The articulation of two or more bones by means of ligament;—as of the radius with the ulna.

SYNDESMOTOMY, *Syndesmotom'ia*, from *συνδεσμος*, 'ligament,' and *τεμνω*, 'I cut or dissect.' Dissection of the ligaments.

SYNDROME, from *συν*, 'with,' and *δρομος*, 'a course.' *Concur'sus*, (q. v.) *Concourse*. A name given, by the Empirical Sect, to the union of symptoms, which takes place in diseases. *Syndromē plethor'ica*, e. g. meant the union of symptoms produced by plethora.

SYNDYASMUS, *Coition*.

SYNECHIA, from *συν*, 'with,' and *εχειν*, 'to have,' 'or to hold.' Adhesion between the iris and transparent cornea, or between the iris and

crystalline lens. The former case is called *Synechia anterior*; the latter *S. posterior*.

SYNESIS, Intellect.

SYNEUROSIS, Syndesmosis.

SYNEZYZIS, *Synze'zsis, Considentia*, from *syn*, 'with,' and *εἰσέρπειν*, 'to join.' *Pupop'sis Synze'zsis, Caligo à Synze'zsi, Caligo Pupillæ, Closure or occlusion or obliteration of the Pupil, Phthisis Pupillæ, Amyop'sis*. This disease is sometimes a case of faulty conformation, depending upon the continued existence of the membrana pupillaris, or the absence of the pupil. It is, in other words, *congenital*. At other times, it is owing to accident, and supervenes on violent ophthalmia, or on the operation of the cataract. Those who are affected with *synzezisis* are completely blind;—the iris having no central aperture. In certain cases, a remedy may be obtained by making an opening in the iris, which may supply the place of the pupil, and through which the rays of light may reach the retina. This operation is called the *operation for artificial pupil*.

SYNGENES, Hereditary.

SYNIMENSIS, Synmensis.

SYNZEZESIS, Considentia, Synezisis.

SYN'CHHA, from *συνχω*, (*syn*, and *εχω*, 'I have or hold,') 'I continue.' *Inflammatory Fever, Angiopy'ria, Febris caus'des, Febris dentrens, F. ardens, Febris contin'ua sanguinea, Febris contin'ua non putris, Syn'ochus (Vogel,) Febris acma'stica, Synochus impu'tris (Galen,) Febris ac'uta, F. continens, F. continens non putrida, F. angioten'ica, F. sthenica, F. sanguinea, Homot'onos, Sthenop'gra, F. inflammato'ria, Ene'cia cauma, F. ton'ica, Phlogop'yrus, Cauma, General inflammation, Gastro-enterite intense*. A species of continued fever, characterized by increased heat; and by quick, strong, and hard pulse; urine high-coloured; disturbance of mind slight. It requires, of course, the most active treatment.

SYNOCHA RHEUMATICA, Rheumatism, acute—s. *Vaccina, Vaccina*.

SYN'CHUS, Febris lenta, (Linnæus.) *F. continens putrida, F. continua putrida* (of some) same etymon. Continued fever, compounded of synocha and typhus:—in its commencement often resembling the former; in its progress, the latter. *Mixed fever, Common continued fever*. See *Fever*, and *Typhus*.

SYNOCHUS, Synocha—s. *Biliosa, Fever, gastric*—s. *Biliosus, Fever, bilious*—s. *Icterodes, Fever, yellow*—s. *Inputris, Synocha*—s. *Miliaria, Miliary fever*—s. *Varicella, Varicella*.

SYNONIA, Variac.

SYNSTEOGRAPHY, *Synstoeogra'phia*, from *syn*, 'with,' *σσετορ*, 'a bone,' and *γραφω*, 'I describe.' The part of anatomy which describes the joints.

SYNSTEOL'OGY, *Synstoeolog'ia*, from *syn*, 'with,' *σσετορ*, 'a bone,' and *λογος*, 'a treatise.' A treatise of the joints.

SYNSTEOT'OMY, *Synstoeotom'ia*, from *syn*, 'with,' *σσετορ*, 'a bone,' and *τεμνειν*, 'to cut.' Dissection of the joints.

SYNO'VIA, from *syn*, 'with,' and *ων*, 'an egg.' *Mucilago, Un'guen articula'ræ, Synonia, Azun'gia articula'ris, Unguentum seu Smegma articula'ræ, Mucilago articulo'rum seu junctura'rum, Humor articula'ris, Humor seu Hal'midum nutritivum seu Gluten articulo'rum, (F.) Synovie*. A fluid resembling the white of egg, which is

exhaled by the synovial membranes surrounding the moveable articulations. The synovia of man, according to Hildenbrandt, consists of water, a little albumen, soda, chloride of sodium, phosphate of lime,—and Fourcroy fancied—uric acid. Its use is to lubricate the joints, and the sheaths in which tendons play.

SYNO'VIAL, *Synovia'lis*. That which relates to the synovia.

SYNOVIAL GLANDS, HAVERS'S GLANDS, *Glandulæ articula'rcs, G. Synovia'les, G. Haversia'næ*, are the secretory fringes, which float in the interior of the synovial capsules (see *Capsules*.) They do not seem to be glandular. They have been called *Syn'vial fimbriae, (F.) Franges synoviales*.

SYNOVITIS; from *Synovia*, and *itis*, a termination denoting inflammation. A term, badly compounded, applied at times to inflammation of the synovial membrane.

SYNOVITIS RHEUMATISMALIS, Rheumatism, (acute.)

SYN'TASIS, *συντασις*, from *συντείνω*, (*syn*, and *τείνω*, 'I stretch,') 'I strain.' Tension of parts: hence *συντασις*, are medicines, which render parts tense. *Syntex'is*, on the other hand, means *Colligatio*, or wasting of the body; from *συντίζω*, 'I melt together.'

SYNTAXIS, Articulation.

SYNTECOPYRA, Hectic fever

SYN'ECTYCOPYRA, Hectic fever.

SYNTENO'SIS, from *syn*, 'with,' and *τενω*, 'a tendon.' A species of articulation, in which two bones are joined by means of tendon; as the sesamoid bones with the toes, the rotula, with the tibia, &c.

SYNTERETICUS, Prophylactic.

SYNTEXIS, Colligation, Consumption.

SYN'THENA. A term employed, by Paracelsus, to designate a species of epilepsy, accompanied by cardialgia and tormina.

SYN'THESIS, *Reu'nio*, 'composition or putting together,' from *syn*, and *τιθημι*, 'I place.' A surgical operation, which consists in uniting parts that are divided; and approximating such as are separated or distant from each other. *Synthesis of continuity*, means the union of the edges of a wound, or the approximation of the extremities of a fractured bone. *Synthesis of continuity* is the reduction of displaced organs; as in cases of hernia and luxations.

SYNTHESIS, Composition.

SYN'THETISMUS, same etymon. The aggregate of operations and means for reducing a fracture, and maintaining it reduced:—comprising extension, counter-extension, coaptation, and bandaging.

SYNTRIMMA, Constrict.

SYNTRIPSIS, Constrict.

SYNTROPHOS, Connutritus.

SYNULOTICA, Cicatrisantia.

SYNYMEN'SIS, *Synimen'sis*, from *syn*, 'with,' and *μνην*, 'a membrane.' Union of bones by membrane, as in the case of the bones of the head in the fœtus.

SYNYMENSIS, Syndesmosis.

SYPHILIDES, Syphilida, (F.) Dermo-syphillides. Dermatosis sycloleuses. Same etymon as Syphilis. The cutaneous eruptions that accompany constitutional syphilis are so denominated by the French writers.

SYPHILIDOMANIA, Syphilomania.

SYPHILIPHOBIA; from *Syphilis*, and *φοβ*

φοε, 'dread.' A morbid dread of syphilis, giving rise to fancied symptoms of the disease: a form of hypochondriasis.

SYPHILIS, *Morbus Gallicus*, *Syphilis*, *Syphilismus*, *Cuchez'ia venerea*, *Cucochym'ia Venerea*, *Mulum venereum*, *Morbus Italicus*, *M Hispanicus*, *Puden'dogra*, *Lues Mercuri*, *Lues venerea*, *Lues syphilis*, *Morbus aphrodisius*, *Syphilis venerea*, *S. maligna*, *Morbus Neapoltanus*, *Morbus Indicus*, *Patru'su*; the *Veneral Disease*, *Poz*, *French Poz*; the *Veneral*, (F.) *Vérole*, *Maladie vénérienne*, *Mal de Naples*, *Mal Français*, *Maladie de Vénus*. The etymology of syphilis is unknown. Some consider it to proceed from *συσ*, 'a hug'; and others, from *σιφίλος*,—formed, by contraction, from *σιφίλος*, 'shameful,' 'dirty,' &c. It is an infectious disease, communicable by coition; or by the contact of parts that are only lined with a thin epidermis; as the lips, nipple, &c. It generally makes its first appearance by a chancre, (q v) followed sooner or later by a bubo. The chancre is a primary symptom or sore; but there are others, which are secondary or constitutional. These are:—ulcers in the throat; copper-coloured blotches on the skin; pains in the bones, nodes, &c.: the last are sometimes termed *tertiary phenomena*. The origin of syphilis is not known. It is believed to have been introduced into Europe from America, at the end of the 15th century. Its progress is extremely variable, as well as its duration, which is often unlimited, if left to itself. Mercury may be esteemed the best remedy, but the disease admits of cure without it. Almost every antisyphilitic composition, whose use is attended with success, probably contains mercury united with diaphoretics or other medicines. It is generally sufficient to keep the mouth sore for a fortnight, for the cure of chancre: for venereal sore throat, and other recent constitutional symptoms, eight or ten weeks will be required; and, of course, a longer time, if these symptoms have persisted long. Sometimes, after mercury has been given for a time, the symptoms continue stationary; and do not yield until the mercury has been discontinued, and tonics and eutrophics have been administered. The preparations of iodine have been much used, of late, in the revellent treatment of this disease.

SYPHILIS INDICA, *Frambesia*.

SYPHILIS PSEUDO-SYPHILIS, *Lues Syphilo'des*, *Pseudo-syphilis*. A term given to ulcers or other affections, that resemble syphilis, but are indeterminate in their character,—the symptoms being irregular in their appearance, and usually yielding spontaneously, or under the use of tonics, change of air, &c. The condition has not been at all well defined. The *Sivrens*, *Radesyge*, &c. have been referred to this head.

SYPHILISMUS, *Syphilis*.

SYPHILOMANIA, *Syphilidomania*, vulgarly, *Noddle Poz*. A mania, with which some persons are affected, so that they subject themselves to antivenereal treatment, under the belief that they are affected with syphilis.

SYPHO-AURICULARIS, *Otenchytes*.

SYRIGMOPHONIA, from *συριγμός*, 'whistling,' and *φωνή*, 'voice.' A piping state of the voice.

SYRIGMUS, *Tinnitus aurium*.

SYRINGMOS, *Tinnitus aurium*.

SYRINGOTOMUM, from *συριγμός*, 'a pipe,' 'a fistula,' and *τεμνέω*, 'to cut.' A surgical instrument, formerly used in the operation for *fistula in ano*. It is a bistouri, concave at its edge, and terminated by a long, flexible, probe-pointed stylet. This stylet or probe was first introduced by the external opening of the fistula into the rectum, whence it was drawn externally through the anus, carrying with it the cutting edge of the instrument, which divided the intermediate parts. The operation for fistula in ano has been called *Syringotomy*.

SYRIX, *Fistula*—*s. Hiera*, *Vertebral column*.

SYRMAISMOS, from *συγμαίζω*, 'I evacuate.' A gentle evacuation by vomiting or stool.

SYROP, *Syrup*—*s. d'Ail*, *Syrupus allii*—*s. d'Armoise composé*, *Syrupus aromaticus*—*s. de Chicorée composé*, *Syrupus de eichorio compositus*—*s. des Cingraces*, *Syrupus e cinque radicibus*—*s. de Cuisinier*, *Syrupus de sarsaparilla et senna compositus*—*s. d'Ether*, *Syrupus cum aethere sulphurico paratus*—*s. de Gingembre*, *Syrupus zingiberis*—*s. de Guimauve*, *Syrupus althææ*—*s. de Longue vie*, *Mellitum de mercuriali compositum*—*s. de Mercure*, *Syrupus de mercurio mediante guinmi*—*s. de Mûres*, *Syrupus mori*—*s. de Nerprun*, *Syrupus rhamni*—*s. de Pavots blancs*, *Syrupus papaveris*—*s. de Pommes composé*, see *Syrupus sennæ*—*s. de Quinquina avec le Vin*, *Syrupus de kinâ kinâ cum vino*—*s. de Roses pâles*, *Syrupus rosæ*—*s. de Roses rouges*, *Syrupus rosæ*—*s. de Vinaigre*, *S. aceti*.

SYRUP, *Syrupus*, *Scrd'pium*, *Syrop*, *Syrup*; derived, according to some, from *συνω*, 'I draw,' and *οισ*, 'juice'; but, more probably, from the Arabic, *Siruph*, *Sirab* or *Scharab*, which signifies 'a potion.' A saturated solution of sugar in water, either simply, or united with some vegetable or other principle. Syrups, in general, require two pounds of sugar to the pint, and they are judged to be sufficiently boiled when a portion, taken up in a spoon, pours like oil. In the Pharmacopœia of the United States, (1842,) it is directed, that syrups, whose density is not precisely determined by the process, should have the S. G. 1.261, when boiling, and of about 1.319 at ordinary temperatures. Syrups should be kept in small bottles in a cool place. They are chiefly used to render medicines palatable.

SYRUP, see *Syrupus*—*s. of Almonds*, *Syrupus amygdalæ*—*s. Antiscorbutic*, *Syrupus antiscorbuticus*—*s. of Buckthorn*, *Syrupus rhamni*—*s. of Capillaire*, common, *Syrupus simplex*—*s. of Cinchona with wine*, *Syrupus de kinâ kinâ cum vino*—*s. of Clove July flower*, *Syrupus caryophylli rubri*—*s. of Clove pinks*, *Syrupus caryophylli rubri*—*s. of Ether*, *Syrupus cum aethere sulphurico-paratus*—*s. of Five roots*, *Syrupus e cinque radicibus*—*s. of Garlick*, *Syrupus alli*—*s. of Ginger*, *Syrupus zingiberis*—*s. of Hive*, *Syrupus scillæ compositus*—*s. of Honey*, *Mellitum simplex*—*s. of Ipecacuanha*, *Syrupus Ipecacuanhæ*—*s. of Lemon*, *Syrupus limonis*—*s. of Marshmallows*, *Syrupus althææ*—*s. of Meadow saffron*, *Syrupus colchici autumnalis*—*s. of Mugwort*, compound, *Syrupus aromaticus*—*s. of Mulberries*, *Syrupus mori*—*s. of Orange juice*, see *Syrupus aurantii*—*s. of Orange peel*, *Syrupus aromaticus*—*s. of Orgeat*, *Syrupus*

amygdalæ—s. of Poppies, Syrupus papaveris—s. of Poppy, red, Syrupus rhæados—s. of Rhatany, Syrupus krameriæ—s. of Rhubarb, Syrupus rhej—s. of Rhubarb, aromatic, Syrupus rhei aromaticus—s. of Rhubarb, spiced, Syrupus rhej aromaticus—s. of Saffron, Syrupus croci—s. of Squills, Syrupus scillæ—s. of Squill, compound, Syrupus scillæ compositus—s. of Succory, compound, Syrupus de cichorio compositus—s. of Tolu, Syrupus tolutanus—s. of Vinegar, Syrupus aceti—s. of Violets, Syrupus violæ.

SYRUPUS, S. simplex—s. Acidi acetosa, S. aceti.

SYRUPUS ACETI, S. *Acidi Aceto'si*, Syrup of Vinegar, (F.) Syrop de Vinaigre. (Aceti Oñss, sacch. purif. liiiss. Boil to form a syrup. Ph. E.) It is refrigerant and antiseptic. Dose, f. ʒj to f. ʒij.

SYRUPUS CUM ÆTHERE SULPHURICO PARATUR, Syrup of Ether, (F.) Syrop d'éther. (Very pure sugar, 1000 p.; distilled water, 500 p.; dissolve in the cold, and strain; add sulphuric ether, 48 p. Shake for five or six days, and draw off the limpid syrup. Ph. L.) Properties like those of ether.

SYRUPUS ALLII, Syrup of Garlic, (F.) Syrop d'ail. (Allii concis. ʒvj, acet. destillat Oj, sacchar. liij. Macerate the garlic in the vinegar, in a glass vessel, for four days; then express the liquor, and set it by, that the dregs may subside; lastly, add the sugar to the clear liquor, and proceed in the manner directed for syrup. Ph. U. S.) Use, same as that of garlic. Dose, f. ʒj to f. ʒiv.

SYRUPUS ALTHÆÆ, Syrup of Marshmallow, Syrupus ex Althæâ, S. de Althæâ, S. Althææ officinalis, (F.) Syrop de Guimauve. (Althææ rad recent. cont. liiss, sacch. pur. liij, aquæ Oiv. Boil the root in the water to one-half; and press out the liquor; when cold, defecate; add the sugar, and boil. Ph. L.) Emollient and demulcent. Dose, f. ʒi to f. ʒij.

SYRUPUS AMOMI ZINGIBERIS, S. zingiberis—s. Anticausoticus, see Anticausodic.

SYRUPUS AMYGDALÆ, Syrup of Almonds, Syrup of Orgeat, Orgeat. (Amygdal. dulc. liij. amygdal. amar. ʒiv, aquæ Oijj, sacchar. liij. Blanch the almonds, and rub them in a mortar to a very fine paste, add in, during the trituration, three fluidounces of the water, and a pound of the sugar. Mix the paste thoroughly with the remainder of the water; strain with strong expression; add the remainder of the sugar to the strained liquor, and dissolve it with the aid of a gentle heat. Strain the syrup through fine linen, and having allowed it to cool, put it into bottles, which must be well stopped, and kept in a cool place. Ph. U. S.)

SYRUPUS ANTISCORBUTICUS, S. de Armoraciâ compositus, Antiscorbutic Syrup. (Leaves of cochlearia, buckbean, water-cresses, horseradish root and bitter oranges, each liij, cinnamon ʒiss. Cut, and pour white wine liiv. Macerate for two days; distil over Oj in a sand bath; add to this sugar liij. and form a syrup. Again, take what remains in the cucurbit; pass it through cloth; let it rest; decant, and add sugar liij; make into a syrup, and clarify with white of egg. Mix it with the first while yet warm. Ph. P.) Antiscorbutic. alterative, tonic, stomachic, &c. Dose, f. ʒij to f. ʒij.

SYRUPUS AROMATICUS, S. de Artemisiâ com-

positus, Compound Syrup of Mugwort, (F.) Syrop d'armoise composé. (Tops of artemisia vulgaris, in flower, ʒvj, inula root, ligusticum levisticum, and fennel, each ʒss, pennyroyal, catmint, savine leaves, each ʒvj, marjoram, hyssop, pyrethrum, rue, basil, each ʒij, aniseed and cinnamon, each ʒix; bruise, and macerate, in hydromel lixviij; distil over Oss; add to this a pound of sugar. Again, take the liquid that remains in the cucurbit, strain it gently; add sugar liiv. Then mix the two. Ph. P.) Tonic, emmenagogue, &c.

SYRUPUS DE ARMORACIÂ COMPOSITUS, S. Antiscorbuticus—s. de Artemisiâ compositus, S. antiscorbuticus.

SYRUPUS ASPARAGI see Asparagus—s. Balsamicus, S. Tolutanus.

SYRUPUS AURANTII, S. Aurantiorum, S. Citri Aurantii, S. Corticis Aurantii, S. Aurantii Corticis, (Ph. U. S.) S. e Corticibus Aurantiorum, S. de Cortice Aurantiorum, Syrup of Orange peel. (Aurant. cort. cont. ʒij, aq. ferv. Oj, sacch. pur. liijss. Macerate the peel in the water for 12 hours. Add the sugar. Ph. U. S.) Stomachic. Dose, f. ʒj to f. ʒij.

A Syrup of Orange Juice, Orange Sherbet, Syrupus e succo Aurantiorum, may be made by adding white sugar liij to liij of the juice of oranges, strained and clarified.

SYRUPUS CARYOPHYLLI RUBRI, S. Dianthi Caryophylli, Syrup of Clove July Flower, Syrup of Clove Pinks, Syrupus infusio'nis florum caryophyllo'rum. (Petalorum dianth. caryoph. recent unguibus resectis liij, aquæ bull. Oiv, sacch. purif. liiij. Ph. E.) Aromatic.

SYRUPUS CASSIÆ SENNÆ, S. sennæ.

SYRUPUS DE CICHORIO COMPOSITUS, S. de Rhio, Compound Syrup of Succory, (F.) Syrop de chicorée composé. (Root of succory, ʒvj, leaves of succory ʒix, leaves of fumitory and scolopendrium, each ʒij, Alkekengi berries ʒij Boil in water Oxiv to Oxij; pass through cloth, and dissolve in it white sugar liiv. Boil till it has the consistence of syrup. Again, take water Oviiij, rhubarb ʒvj, yellow sanders and cinnamon, each ʒss. Infuse for twenty-four hours; pass through luen, and add the preceding syrup. Ph. P.) It is laxative and stomachic. Dose, f. ʒj to f. ʒss.

SYRUPUS CINCHONÆ CUM VINO, S. de kinâ kinâ cum vino.

SYRUPUS CINCHOINÆ, Syrup of Cinchonia. (Simple syrup one pound; sulphate of cinchonia nine grains. Mix.) Six spoonfuls are commonly sufficient to arrest an intermittent.

SYRUPUS CITRI AURANTII, S. aromaticus.

SYRUPUS COLCHICI AUTUMNALIS, S. Colchici, Syrup of Meadow Saffron. (Rad. colch. autumn. recent. ʒj, acidi acetosi f. ʒxvi, sacch. pur. ʒxxvj. Macerate the root in the vinegar for two days, occasionally shaking the vessel; then strain, with gentle expression. To the strained fluid add the sugar, and boil to a syrup. Ph. E.) Diuretic, antiarthritic. Dose, f. ʒj to f. ʒss, or more.

SYRUPUS CORTICIS AURANTII, S. aromaticus —s. Citri medicæ, S. limonum—s. e Succo citronum, S. limonum.

SYRUPUS CROCI, Syrup of Saffron. (Croci stigmat. ʒj, aquæ fervent. Oj, sacch. purif. liiiss. Ph. L.) Cardiac. Chiefly used for colour.

SYRUPUS DIANTHI CARYOPHYLLI, S. caryophylli rubri.

SYRUPUS EMETICÆ, Syrup of Emetine. (Sim-

ple syrup *liij*, *emetine* 16 gr. M.) In small doses, expectorant; and in large, emetic.

SYRUPUS HYDRARGYRI, *S. de Mercurio mediante gummi*—*s. Infusionis florum caryophyllorum, S. caryophylli rubri.*

SYRUPUS IPECACUANHÆ, *Syrup of Ipecacuanha. (Ipecac. in pulv. crass. ʒij, alcohol. dilut. Oj, syrup. Oij. Macerate the ipecacuanha in the alcohol for 14 days, and filter. Evaporate the filtered liquor to two fluidounces, and again filter; then mix it with the syrup, and evaporate by a water bath to a proper consistence. Ph. U. S.)* It may also be prepared by displacement.

SYRUPUS DE JALAP'PÆ, *Syrup of Jalap. (Pulv. Jalapæ ʒx, sem. coriandr., fœnicul. dulc., aa ʒss, aquæ f. ʒxiiss, sacch. ʒxxv, f. syrupus. Ph. P.) Cathartic. Dose, f. ʒij to f. ʒss for children.*

SYRUPUS DE KINA KINÆ CUM VINO, *S. Cinchonæ cum vino, Syrup of Cinchona with wine, (F.) Syrop de quinquina avec le vin. (Cort. cinchonæ officinalis ʒij, ext cinchonæ ʒvj, vini albi (Vin Lunel. vel cujusvis ei similis), Oj, alcohol (S. G. .955 to .915), f. ʒj, sacchar. alb. liiss. Bruise the cinchona; gradually add the alcohol, so as to form a soft mass; pour on the wine; macerate for two days, and strain. Dissolve the extract, add the sugar, and make a syrup. Ph. P.) Dose, f. ʒss to f. ʒj.*

SYRUPUS KRAMERIÆ, *Syrup of Rhatany. (Ext. Kramer. ʒij, aquæ Oj, sacchar. liiiss. Dissolve the extract in the water, and filter; then add the sugar, and form into syrup. Ph. U. S.)* An adjunct to astringent mixtures; or given in diarrhœa,—a teaspoonful to a child.

SYRUPUS LIMONIS, *S. limonum*—*s. Succi Limonis, S. limonium.*

SYRUPUS LIMO'NUM, *S. limonis, S. citri med'ice, S. e succo citro'num, S. e succo limo'num, S. succi limonis, Syrup of Lemon, Lemon Syrup. (Limon. succ. colut. Oj, sacchar. pur. liij.) Cooling, antiseptic.*

SYRUPUS E MECONIO, *S. papaveris*—*s. de Melle, Mellitum simplex*—*s. e Succo mororum, S. mori.*

SYRUPUS DE MERCURIO MEDIAN'TE GUMMI, *Mercurius gummosus Plenkii, Syrupus Hydrargyri, (F.) Syrop de mercure, ou Mercure gommeux de Plenck. (Hydrargyri pur. ʒj, p. gummi. acaciæ, ʒiiij, syrup diacot. ʒss. Rub together till the mercury is extinguished. Ph. P.) Possesses the properties of the blue pill. Dose, gr. ij to viij, or more.*

SYRUPUS MORI, *S. e succo moro'rum, S. succi mori, Syrup of Mul'berries, (F.) Syrop de mûres. (Mori succ. colat. Oj, sacchar. purif. liij. Ph. L.) Gratefully refrigerant.*

SYRUPUS MORPHIÆ ACETA'TIS, *Syrup of acetate of morphia. (Syrup, one pint, acetate of morphia, gr. iv.) Dose, two tea-spoonfuls, as an opiate. It is about the strength of the same quantity of syrup of poppies.*

SYRUPUS MORPHIÆ SULPHA'TIS is made in the same way.

SYRUPUS PAPAV'ERIS, *S. papaveris somniferi, S. papaveris albi, S. e meco'nio, S. de meconio, Diacodion, Syrup of poppies, (F.) Syrop de pavots blancs, ou diacode. (Papav. capsul. exsicc. et contus. exemptis seminibus, ʒxiv, sacch. pur. liij, aq. ferrent. cong. iijss. Macerate the capsules in water, for 12 hours; boil to a gallon, and express strongly. Boil the liquor to Oij; and strain while hot. Defecate by rest, and boil to Oj, adding the sugar so as to form a sy-*

rup. *Ph. L.)* One ounce contains about one grain of opium. Anodyne and demulcent.

The Dublin college has a SYRUPUS OPII, called *Common Syrup of Poppies*, which is made by dissolving 18 grains of the *Watery Extract of Opium* in 18 ounces of boiling water. Properties, those of opium and syrup.

SYRUPUS DE PAPAVERE ERRATICO, *S. rhœados*—*s. de Pomis compositus, see S. sennæ.*

SYRUPUS QUIN'INÆ, *Syrup of Quinia. (Simple syrup, 2 pints, sulphate of quinia, 64 grains.) Six spoonfuls are commonly sufficient to arrest an intermittent.*

SYRUPUS E QUINQUE RADICIBUS, *Syrup of five roots, (F.) Syrop des cinq racines. (Rad. upii, fœniculi, apii petroselinii, aa ʒv. Infuse for 24 hours in boiling water Oiiiss, and strain. Rad. asparag., rusci aculeati, aa ʒv. Aqua. Oviij. Boil and reduce to half; adding, towards the end, the residue of the preceding infusion. Boil again for some minutes; strain, and add white sugar liij. Ph. P.) Aperient and diuretic. Used in obstructions of the liver, spleen, and mesentery; and in dropsy, &c. Dose, f. ʒss to f. ʒj, or more.*

SYRUPUS RHAMNI, *S. rhamni cathartici, S. de spinâ cervinâ, S. spinæ cervinæ, Syrup of Buckthorn, (F.) Syrop de nerprun. (Rhamn. baccar. succ. recent. Oiv, zingib. rad. concis., pimentæ bacc. contrit., aa ʒss, sacch. purif. liiiss. Defecate the juice for 3 days, and strain. To a pint of this, add the ginger and pimento; macerate for 4 hours and strain; boil what remains to Oiss. Mix the liquors and add sugar, so as to form a syrup. Ph. L.) Cathartic, hut apt to gripe. Dose, f. ʒiv to f. ʒij.*

SYRUPUS RHEJ, *Syrup of Rhubarb. (Rhej, cont. ʒij; Aquæ bullientis Oj; Sacchar. liij. Macerate the rhubarb in the water for 24 hours, and strain: add the sugar, and form into syrup. Ph. U. S.) Dose to a child, as a laxative, one or two teaspoonfuls.*

SYRUPUS RHEJ AROMAT'ICUS, *Aromatic Syrup of Rhubarb, Spiced Syrup of Rhubarb. (Rhej, cont. ʒiiss; Caryophyll. cont.; Cinnam. cont. aa ʒss; Myrist. cont. ʒij; Alcohol. dilut. Oij; Syrup. Ovj. Macerate the rhubarb and aromatics in the diluted alcohol for 14 days, and strain; then, by means of a water bath, evaporate the liquor to a pint, and while still hot, mix it in the syrup previously heated.—Ph. U. S.) It may also be made by the process of displacement.*

The aromatic syrup of rhubarb is a gentle carminative cathartic. Dose to a child, f. ʒj; to an adult, f. ʒj.

SYRUPUS DE RHEO, Syrupus de Cichorio composito.

SYRUPUS RHÆ'ADOS, *S. de papav'erē errat'ico, S. papaveris erratici, Syrup of Red Poppy, (F.) Syrop de coquelicot. (Rhæad. petal. recent. liij, aq. ferrent f. ʒxviij, sacch. purif. liiiss. To the water, heated in a water bath, add the petals. Remove the vessel; macerate for 12 hours; express; defecate and add sugar to form a syrup. Ph. L.) Chiefly used to give colour.*

A fætitious syrup is often made of aloes dissolved in simple syrup.

SYRUPUS ROSÆ, *Syrupus rosarum soluti'vus, S. e rosis siccis, S. rosæ centifoliz, S. rosæceus soluti'vus, Syrup of Roses, (F.) Syrop de roses pâles. (Rosæ centif. petal. exsic. ʒvij, sacch. purif. liij, aq. ferrent. Oiv. Macerate the petals for 12 hours. Evaporate the strained liquor to*

biiss. Add the sugar. *Ph. L.*) Gently laxative. Dose, f. ʒij to f. ʒiiss or more.

SYRUPUS ROSÆ GAL'LICÆ, Syrup of Red Roses. (*F.*) *Syrop de roses rouges.* (*Rosæ Gallic. petal. exsic.* ʒviij, *aq.æ bull.* Ov, *sacch. purif.* lbvj; prepared like the last. *Ph. E.*) Mildly astringent. Added to stomachic infusions.

SYRUPUS SARSAPARILL'Æ, Syrup of Sarsaparilla. (*Rad. Sarsap.* cont. lbj, *aq.æ bullient. cong., sacch. purif.* lbj. Macerate the root for 24 hours; boil to Oiv. Strain while hot; add the sugar, and boil. *Ph. L.*) Used in the same cases as the root. Dose, f. ʒj to f. ʒiv, and more.

SYRUPUS DE SARSAPARILL'Æ ET SENNÆ COMPOS'ITUS, Compound Syrup of Sarsaparilla and Senna. (*F.*) *Syrop de cuisinier.* (*Rad. Sarsap. concis.* lbj. Infuse for 24 hours in warm water Oxi; boil for a quarter of an hour; pass with expression, and boil again the residuum in Ox of water. Reduce this to Ovj, and repeat the operation 2 or 3 times. Mix all the liquors and boil them together with flowers of borage, white roses, senna leaves, and aniseed, each ʒij; reduce to half, pass, and add honey lbj. Boil to a syrup. *Ph. P.*) It is considered to be alterant, depurative, and sudorific. Dose, f. ʒss to f. ʒij.

A similar syrup, under the name **SYRUPUS SARSAPARILL'Æ COMPOS'ITUS, Compound Syrup of Sarsaparilla**, is directed in the Pharmacopœia of the United States, (1842.) (*Sarsaparill. cont. lbij; Lign. guaiac. rasur. ʒiiij; Rosæ centifol., Sennæ, Rad. Glycyrrhiz. cont. āā ʒij; Ol. Sassafras; Ol. Anisi, āā m. v.; Ol. Gaultheriæ m. iij; Alcohol. dilut. Ox; Sacchar. lbviij.* Macerate the sarsaparilla, guaiacum wood, roses, senna, and liquorice root in the diluted alcohol for 14 days; express and filter. Evaporate the tincture in a water bath to four pints; filter, add the sugar, and form into syrup. Lastly, having rubbed the oils with a small quantity of the syrup, mix them thoroughly with the remainder. *Ph. U. S.*)

It may also be made by the process of displacement.

SYRUPUS DE SCAMMO'NIO, Syrup of Scammony. (*Pulv. Scammon. ʒss, sacch. alb. ʒiv, alcohol. (S. G. .985 to .915) f. ʒviij.* Heat the mixture moderately; then set fire to the alcohol with a lighted taper; agitate constantly, until the flame is extinguished. Suffer it to cool; pass through cloth, and add *Syrup of Violets, f. ʒiv. Ph. P.*) ʒj contains 18 grains of scammony. Dose, f. ʒj to f. ʒss.

SYRUPUS SCILLÆ, S. scillit'icus, S. scillæ murit'imæ, Syrup of Squills. (*Acet. scillæ Oj, sacch. pur. lbij.*) Diuretic, expectorant, and emetic. Used in the same cases as the oxymel.

SYRUPUS SCILLÆ COMPOS'ITUS, Mel Scillæ Compos'itum, Compound Honey of Squill, Compound Syrup of Squill, Hive Syrup. (*Scillæ cont. Senegæ cont. āā ʒiv; Anim. et Potassæ Tart. gr. xlviii; Aquæ Oiv; Sacchar. lbiiiss.* Pour the water upon the squill and seneka, and, having boiled to one half, strain and add the sugar. Then evaporate to three pints, and while the syrup is still hot, dissolve in it the tartrate of antimony and potassæ.—*Ph. U. S.*)

It may also be made by the process of displacement.

It is often given as an emetic in cases of croup, and in catarrh, especially to children. Dose, to infants, 10 drops to a drachm, repeated every 15 minutes, if vomiting be desirable.

SYRUPUS SEN'EGÆ, Syrup of Seneka. (*Senegæ cont. ʒiv; Aquæ Oj; Sacchar. lbj.* Boil the water with the seneka to one half, and strain: then add the sugar, and form into syrup. *Ph. U. S.*) It may also be formed by the process of displacement.

This is a favourite stimulant expectorant (?) with many practitioners. Dose, f. ʒj or f. ʒij.

SYRUPUS SENNÆ, S. cassiæ sennæ, Syrup of Senna. (*Sennæ ʒij, sem. fœnicul. cont. ʒj, sacch. pur. ʒxv, aquæ ferv. Oj.* Macerate the senna leaves and fennel seeds with a gentle heat for an hour. Strain; add the sugar, and make into a syrup.—*Ph. U. S.*) Cathartic. Dose, f. ʒj to f. ʒiiss or more.

The Parisian Codex has a *Syrupus de Sennâ* of a compound character, called *Syrupus de pomis compos'itus, Syrop de pommes composé.* It contains, also, borage, bugloss, &c. Dose, f. ʒss to f. ʒij.

SYRUPUS SIMPLEX, Syrupus (Ph. U. S.), Simple syrup, Common syrup of capillaire, Syrupus. (*Sacch. purif. biiss, aquæ, Oj.* Dissolve the sugar; set aside for 24 hours; remove the scum, and pour off the clear liquid.) Used to cover nauseous tastes, &c.

SYRUPUS DE SPINA CERVINA, S. Rhamni—s. de Stœchade communis, see Lavendula.

SYRUPUS TOLUT'ANUS, S. Tolut'ni, S. toluif'erae bal'sami, S. balsam'icus, Balsam'ic syrup, Syrup of tolu. (*Tinct. Tolut. f. ʒj; Syrup. Oiss.* Mix the tincture with the syrup, and, by means of a water bath, evaporate to the proper consistence.—*Ph. U. S.*) Use. To give flavour.

SYRUPUS VIOLÆ, S. violæ odorat'æ, S. violæ'rum, S. e succo violarum, Syrup of Violets. (*Flor. recent. viol. odorat. lbj, aq. bull. Oviiij, sacch. pur. lbxv.* Macerate, in a covered vessel, for 24 hours; pass, without expression, through linen; add the sugar so as to form a syrup. *Ph. E.*) Very gently laxative. Dose, f. ʒj to f. ʒij.

SYRUPUS E SUCCO VIOLARUM, S. Violæ.

SYRUPUS ZINGIB'ERIS, S. am'ni zingiberis, Syrup of Ginger. (*F.*) *Syrop de gingembre.* (*Tinct. Zingib. f. ʒiv; Syrup. cong.* Mix the tincture with the syrup, and, by means of a water-bath, evaporate to the proper consistence.—*Ph. U. S.*) To the strained liquor add the sugar, and form a syrup.

N. B. The Parisian Codex contains a few other compound syrups besides those enumerated, amongst these is a *Syrup of calf's lungs, Syrupus e pulmon'ibus vituli'nis, Syrop de mou de veau*, as an expectorant!!

These syrups are made according to the usual rule, and possess the virtues of the substances after which they are named.

SYSPA'SIA, from *συσπαι*, (*συν*, and *σπαι*, 'I draw,' 'I contract.' Clonic spasm, with diminished sensibility and inability of utterance. A genus in Good's Nosology, which includes convulsion, epilepsy, and hysteria.

SYSPASIA CONVULSIO, Convulsion—s. Epilepsia, Epilepsy—s. Hysteria, Hysteria.

SYSSARCO'SIS, from *συν*, 'with,' and *σαρξ*, 'flesh.' *Commissu'ra ossium carnea, Symph'ysis ossium muscul'aris, Connexio ossium corn'osæ, Carnatio.* Union of bones by means of muscles; such as the union of the os hyoides with the lower jaw, of the scapula with the ribs, &c.

SYSTAL'TIC, Systalt'icus; from *συστελλω*, (*συν*, and *τελλω*), 'I contract.' A systaltic mo-

tion in a part is one in which there is alternate contraction and dilatation. See Systole.

SYSTATICA, from συστασις, (συρ, and ιστημι, 'place,') 'I associate.' Diseases affecting several or all the sensorial powers simultaneously; irritation or inertness of mind, extending to the muscles, or external senses; or of the muscles, or external senses, extending to the mind:—the 4th order, class *Neurotica*, of Good.

SYSTEM, *Système*, from συρ, 'together,' and ιστημι, 'I place.' This word, taken in a good sense, means the collection and arrangement of different matters having an analogy to each other, or working towards the same end. In natural history, it means a methodical arrangement of beings, for the purpose of facilitating their study. System is, however, sometimes used in an unfavourable sense in physical science, and often means,—a purely gratuitous supposition, by which the march of nature is attempted to be universally explained, and to which every thing is made to bend. In anat-

my, *system* is an assemblage of organs, composed of the same tissues, and intended for similar functions; for instance the *nervous system*, *muscular system*, &c.

SYSTEMATISM. A method, according to which every fact of a science is collected around an opinion, true or false. One, who reduces things to such a method is called a *Systematist*.

SYSTÈME VASCULAIRE À SANG NOIR, see Vascular.—*s. Vasculaire à sang rouge*, see Vascular.

SYSTEMIC. Belonging to the general system—as 'systemic circulation' in contradistinction to the 'pulmonic.'

SYSTOLE. Same etymon as SYSTALTIC, (q. v.) *Constrictio*, *Contractio* seu *Angustatio* seu *Submissio* seu *Micatio cordis*. The movement of constriction or contraction (q. v.) of the heart, to give impulse to the blood, or to cause its progression. It is opposed to the *Diastole* of the organ.

T.

T. BANDAGE, *Fas'cia T. formis*, *Crucial Bandage*. A bandage, shaped like the letter T. It consists of a strip of linen, of variable length and breadth, the middle of which is attached, at right angles, to the extremity of another strip, also of variable length and breadth. When two such strips are attached, at a distance from each other, the bandage is called a *double T*. This bandage is used, principally, for supporting the dressings after the operation for fistula in ano, in diseases of the perinæum, groin, anus, &c.

TABAC, *Nicotiana tabacum*—*t. des Vosges*, *Arnica montana*.

TABACUM, *Nicotiana tabacum*.

TABARZET, *Saccharum album*.

TABELLA, *Tab'ula*, *Tabula'tum*, a *lozenge*; *Tessel'la*, (F.) *Tablette*, 'a small table.' A solid medicine, composed of a powder, sugar, and mucilage; and generally shaped like a disk. See *Pastil* and *Troch*.

TABELLA, *Table*.

TABELLÆ ABSORBENTES, *T. de Magnesîa*.

TABELLÆ ACIDI OXAL'ICI, *T. ad sitim*, *Lozenges of Oxalic Acid*. (*Acid. oxalic. 3j, sacch. alb. ʒss, ol. limonis. gtt. xviiij vel gtt. xij*. Make into lozenges with *mucilage of gum tragacanth*. *Ph. P.*) Lozenges are made in the same way with the citric and tartaric acids. They are refrigerant.

TABELLÆ DE ALTHÆÂ, *Lozenges of Marshmallows*. (*Rad. althææ pulv. ʒiiss, p. sacchar. alb. ʒivss, f. massa. Ph. P.*) Demulcent, expectorant.

TABELLÆ ANTIMONIA'LES KUNCKELII, *Tabellæ de stibii sulphure'to*, *Lozenges of Sulphuret of Antimony*, *Mor'suli antimoniales*, *M. stibii*, *M. stibia'ti*, *Trochisci stibiati* (*Amygdal. dulc. 3j, sacch. lbss, sem. cardam. cinnam. pulv. sulph. antim. præpar. aa ʒj, fiant tabellæ. Ph. P.* Each to weigh 10 grains.) Recommended in cutaneous diseases, bleedings, arthritic pains, &c. Dose, 4 or more.

TABELLÆ AD ARDOREM VENTRICULI, *Trochisci carbonatis calcis*—*t. Cardialgiæ*, *Trochisci carbonatis calcis*.

TABELLÆ DE CAT'ECU ET MAGNE'SIA, *Lozenges of Catechu and Magnesia*. (F.) *Tablettes de catechu et de magnesie*. (*P. catech. ʒvj, p. magnes. ʒiv, p. cinnam. ʒijj, sacch. alb. lbss, g. tragac. gr. xij, aq. cinnam. q. s. ut f. massa. Ph. P.* Each to weigh 12 gr.) Antacid, absorbent, and stomachic. Dose, 5 to 10 lozenges.

TABELLÆ CINCHONÆ, *T. de kinâ kinâ*, *Bark lozenges*. (*Ext. cinchon. sicc. ʒss, sarch. ʒiv, cinnam. ʒss, mucilag. g. trag. q. s. ut f. massa. Ph. P.*) Tonic.

TABELLÆ DE CITRO ET DIACARTHAMO, *T. de Scammonio et Senna*.

TABELLÆ DE FERRO, *Steel lozenges*, *Tabulæ martiales*, *T. instaurantes*, *T. antichloroticae*. (*Ferri limat. porphyriz. ʒss, p. cinnam. ʒj, p. sacch. ʒvj, g. trag. et aq. cinnam. q. s. ut fiat massa. Each lozenge to weigh 12 gr. Ph. P.*) Tonic, stomachic. Dose, v. to x.

Aromatic lozenges of steel. These consist of *sulphate of iron*, with a small proportion of the *Tincture of Cantharides*.

TABELLÆ DE KINA KINA, *T. cinchonæ*.

TABELLÆ DE MAGNESIÂ, *T. absorbentes*, *Magnesia lozenges*. (*Magnes. ʒj, sacchar. alb. ʒiv, mucil. g. tragac. q. s. Ph. P.*) Absorbent and antacid.

TABELLÆ DE RHEO, *Rhubarb lozenges*. (*P. rhej ʒss, sacch. ʒvj, mucilag. gum. tragac. q. s; f. massa. Each to contain 12 grains. Ph. P.*) Stomachic and laxative.

TABELLÆ DE SCAMMONIO ET SENNÂ COMPOS'ITÆ, *Compound lozenges of scammony and senna*, *T. de citro et diacarthamo*. (*Scammon. ʒijj, Sennæ ʒivss, rhej ʒiss, caryoph. ʒj, corticis limon. confect. ʒj, sacch. ʒvj, f. massa. Ph. P.*) Purgative. Dose, ʒij to ʒvj, or more.

TABELLÆ AD SITIM, *T. acidi oxalici*—*t. ad Sodam*, *Trochisci carbonatis calcis*—*t. de Stibii sulphure'to*, *T. antimoniales Kunckelii*.

TABELLÆ DE SULPHURE SIM'PLICES, *Simple*

sulphur lozenges. (*Sulphur* lot. $\frac{3}{4}$ ss, *sacch.* $\frac{3}{4}$ iv, *muc. g. tragac.* cum aquæ rosæ præpar. q. s. *Ph. P.*) Expectorant, demulcent, &c. Used in diseases of the chest, and in cutaneous affections. Dose, 1 lozenge.

TABELLE DE SULPH'URE COMPOSITE, Compound *sulphur lozenges.* (*Sulph.* lot. $\frac{3}{4}$ ij, *acid benzoic.* gr. xij, *rad. irid. p.* $\frac{3}{4}$ ss, *ol. anisi* gr. viij, *sacch.* $\frac{3}{4}$ vss, *g. trag.* q. s. *Ph. P.*) Aperient, expectorant, and stimulant. (?) Dose, 4 a day.

TABES, *Marasmus Tabes*, from *tabere*, 'to consume,' *Te'kedon*, *Atroph'ia*, *Decline*. Emaciation of the whole body, with general languor, hectic fever, and for the most part, depressed spirits.

TABES, Atrophy, Phthisis.

TABES DORSALIS, *Marasmus tabes dorsalis*, *Phthisis notias*, *Phthisis dorsalis*, *Myelophthisis*, *Tabes ossis sacri*. By this term is meant a wasting of the body, attended at first with a pain in the back or loins, and afterwards in the neck or head,—caused, it has been conceived, by too early or too frequent addiction to venery.

TABES GLANDULARIS, *T. mesenterica*, *Scrofula*—*t. Lactea*, see *Galactia*.

TABES MESENTERICA, *Atroph'ia mesenterica*, *Atroph'ia Infant'um*, *A glandula'ris*, *A. infant'ilis*, *Ma'cies Infant'um*, *Pædatroph'ia*, *Tabes glandula'ris*, *Scrofula mesenterica*, *Rachial'gia mesenterica*, *Phthisis mesara'ica*, *Physcon'ia mesenterica*, *Mesenter'itis*, (*F.*) *Carreau*, *Chartre*, *Scrofules* ou *Écouvelles mesentériques*, *Étisie mesentérique*, *Rachialgie mesentérique*, *Physconie mesentérique*, *Entéro-mesenterite*. An engorgement and tubercular degeneration of the mesenteric glands, followed by emaciation and general disorder of the nutritive functions. The disease is often owing to inflammation or irritation of the lining membrane of the intestines, giving occasion to enlargement of the glands of the mesentery, as injury to the upper or lower extremities causes inflammation, and enlargement of the lymphatic glands of the axilla and groin. It occurs, particularly, in children of a scrofulous diathesis; and in those who are weaned too early, or fed on indigestible substances. Diarrhœa, emaciation, anorexia, or immoderate appetite; hardness and swelling of the abdomen; and, towards the end, hectic fever, are the chief symptoms of this affection; the prognosis of which is usually unfavourable. On opening the bodies of those who die of the disease, the mesenteric glands are found disorganized, tubercular, or in a more or less advanced state of suppuration. The treatment is the same as in scrophulosis. Frictions may be added over the abdomen and spine; and mercury, in small doses, so as to excite a new action in the system. The food must be easy of digestion, and the bowels be kept soluble.

TABES NUTRICUM, see *Galactia*—*t. Pectora*, *Rachitis*—*t. Pulmonalis*, *Phthisis pulmonalis*—*t. Ossis sacri*, *T. dorsalis*.

TABIDUS, *Phthisicus*.

TABLE, *Tab'ula*, *Tabell'a*, *Tabula'tum*, *Lam'ina*, *Pa'ries*, *Squama*. A name given to the plates of compact tissue, which form the bones of the cranium. Of these, one is external; the other internal, and called *Tab'ula vi'trea*, on account of its brittleness.

TABLES DE MORTALITÉ, *Mortality*, bills of.

TABLET, *Trochiscus*.

TABLETTE, *Tabella*.

TABLETTES DE CACHOU ET DE MAGNESIE, *Tabellæ de catechu et magnesiâ*.

TABLIER, *Ventreale cutaneum*.

TABULA, *Tabella*, *Table*.

TABULE ANTICHLOROTICÆ, *Tabellæ de ferro*—*t. Instanturantes*, *Tabellæ de ferro*—*t. Martiales*, *Tabellæ de ferro*.

TABULATUM, *Tabella*, *Table*.

TABUM, *Ichor*, *Sanies*.

TAC, *Influenza*.

TACAMAHACA, *Fagara octandra*—*t. Caragna*, *Caranna*.

TACHE, *Macula*.

TACHES HÉPATIQUES, *Chloasma*—*t. de Roussure*, *Ephelides*—*t. Rouges*, *Spots*, *red*.

TACITURNITY, *Taciturnitas*, *Sigē*, 'silence,' from *tacere*, 'to be silent.' State of a person who does not speak.' Morbid taciturnity sometimes exists as a symptom of the neuroses, especially of melancholy.

TACT, *Tactus*. Modification of the sense of touch. Passive judgment by the cutaneous organ regarding bodies exterior to it. *Tact* is passive: *Touch*, active.

TACTUS, *Touch*.

TÆDÆ, *Dæs*, *daïs*. A term used for a medicine employed under the form of fumigation, pessary, or troch.

TÆNIA, *Ténia*, from *ταΐνια*, 'a fillet, a riband.' See *Bandage* and *Nymphomania*. Also, a genus of intestinal worms, characterized by an elongated, flattened, and articulated body, with four suckorial oscula on the head. Of this genus, two only inhabit the human body—the *Ténia lata*, (see *Bothriocephalus latus*), and *Ténia solium*.

TÆNIA ACEPHALA, *Bothriocephalus latus*—*t. à Anneaux courts*, *Bothriocephalus latus*—*t. Articulus demittens*, *T. solium*—*t. Cucurbitina*, *T. solium*—*t. Dentata*, *Bothriocephalus latus*—*t. Grisea*, *Bothriocephalus latus*—*t. Hippocampi*, *Corpora fimbriata*—*t. Humana armata*, *T. solium*—*t. Humana inermis*, *Bothriocephalus latus*—*t. Hydatigena*, *Hydatid*—*t. Lata*, *Bothriocephalus latus*—*t. Membranacea*, *Bothriocephalus latus*—*t. Oculis lateralis geminis*, *Bothriocephalus latus*—*t. Oculis lateralis solitariis*, *Bothriocephalus latus*—*t. Oculis marginalibus solitariis*, *T. solium*—*t. Oculis superficialibus*, *Bothriocephalus latus*—*t. Prima*, *Bothriocephalus latus*—*t. Secunda*, *T. solium*.

TÆNIA SEMICIRCULARIS, *Gem'inum centrum semicircula're*, *Limbus post'erior corp'oris striati*, *Striæ corp'neæ*, *Striæ semilunares*, *Frænulum novum*, *Fascia semicircularis*, *Bandelette des éminences pyriformes*, (*Ch.*) (*F.*) *Bandelette*, *B. demicirculaire*, *Lame cornée*. A medullary, grayish, semitransparent layer, situate in the groove that separates the thalamus opticus from the corpus striatum in the lateral ventricle.

TÆNIA SOLIUM, *T. oculis marginalibus solitariis*, *T. cucurbitina*, *T. humana armata*, *Hal'ysis solium*, *Vermis cucurbitinus*, *Lumbri'cus latus*, *Ténia sans épine*, *Ver cucurbitaire*, *Tenia articulos demittens*, *T. secunda*, *Ténia à longues articulations*; *T. à anneaux longs*, *ver solitaire*, or *Long Tape Worm*, has an almost hemispherical, discrete head; an obtuse beak; the neck full anteriorly; all the joints slightly obtuse, the anterior very short; the next almost

square, and the rest oblong; the marginal foramina vaguely alternated. The *tænia solium* is commonly a few feet long; sometimes its length is enormous. It is said to have been met with 600 feet long. It principally inhabits the small intestines, and is not common. The oil of turpentine, in some form, largely exhibited, is perhaps the best remedy.

TÆNIA TENELLA, *Bothriocephalus latus*—*L. Vulgaris*, *Bothriocephalus latus*.

TÆNIAFUGE, *Teniasugum*, from *tænia*, and *fugo*, 'I drive off.' A remedy calculated to expel *tænia*.

TÆNIOLA, *Bandelette*. Used by Gerber for a simple, band-like, or flat fibre, *Filum tæniiforme*, seen under the microscope.

TAFFETAS AGGLUTINATIF, *Sparadrapum adhesivum*—*t. d'Angleterre*, see *Lithotomy* *adhesivum*—*t. Gominé*, see *Sparadrapum adhesivum*.

TAFIA, Rum.

TAILLADE, Incision, see *Entaille*.

TAILLE, Lithotomy—*t. Hypogastrique*, Hypogastric operation of lithotomy, see *Lithotomy*—*t. Par le rectum*, see *Lithotomy*—*t. Postérieure*, see *Lithotomy*—*t. Recto-résicale*, see *Lithotomy*—*t. Sus-pubica*, see *Lithotomy*.

TAL. A word formerly employed for alkali. It also meant the dung of the peacock.

TALENTUM, *ταλάντον*. An ancient weight, equal to 54 pounds, 2 oz., 5 dr., and 24 grains *Poids de Marc*. See *Weights and Measures*.

TALIACOTIAN OPERATION, *Rhinoplasty*.

TALIPES, *Kyllosis* (Clubfoot.)

TALPA, 'a mole.' *Topinaria*, (F.) *Taupe*. A tumour situate on the head, which has been supposed to burrow like a mole.

TALUS, *Astragalus*, *Malleolus*.

TAMARA CONGA, *Averrhoa carambola*.

TAMARÆA ZECLA, *Tamarindus*.

TAMARIN, *Tamarindus*.

TAMARINDI PULPA, *Pulp of Tamarinds*, (*Tamarinds*, q. s. Digest them with a small quantity of water, until they become of a uniform consistence; then separate the seeds and filaments, by pressing through a hair-sieve. Ph. U. S.)

TAMARINDS. PULP OF, *Tamarindi pulpa*.

TAMARINDUS, *T. Indica*, *Oxyphænicon*, *Siligna Arabica*, *Balampulli*, *Tamaræa zecla*, *Oxyphænicia*, *Acacia Indica*, *Tum'arind tree*, (F.) *Tamarin*. Family, Leguminosæ. *Sex. Sys.* Triandria Digynia. The pulp of the tamarind, with the seeds, connected by numerous tough strings, is exported from the West Indies, preserved in syrup.—*Tamarindus*, (Ph. U. S.) It is refrigerant and laxative. *Tamarind chey* is made by boiling ζij of the pulp with Biss of milk. When strained, it is used as a diluent in fever.

TAMARISCUS, *Tamarix Gallica*.

TAMARIX GALICA, *Tamariscus*. The *Tamarisk tree*. Family, *Portulacæ*. *Sex. Sys.* Pentandria Pentagynia. The bark, wood, and leaves were formerly employed medicinally;—the former for its aperient and corroborant virtues, in obstructions of the liver; the latter in icterus, hæmoptysis, and some cutaneous affections.

TAMBOUR, CAVITÉ DU, *Tympanum*.

TAMPA BAY, see *Saint Augustine*.

TAMPONNEMENT, *Plugging*.

TANACE'TUM, *T. vulgare*, *Tana'sia*, *Athanasia*, *Partheniam mas*, *Tansy*, (F.) *Tanaisie vulgaire*. Family, *Corymbifera*. *Sex. Sys.* Syngenesia Polygamia. The leaves and flowers of tansy have a peculiar, strong odour, and warm, bitter taste. They are tonic, deobstruent, (?) and anthelmintic. Dose, ζss to ζj . The infusion is usually drunk as tea.

TANACE'TUM BALSAM'ITA, *Balsam'ita mas*, *B. suar'colens*, *B. major*, *Tanacetum hortensæ*, *Costus hortorum*, *Mentha Romanæ* seu *Saracenica*, *Costmary*, *Alcost*, *Cock-mint*, (F.) *Menthe coq*, *Herbe au coq*, *Grand Baume*. A fragrant-smelling herb, somewhat resembling mint, and formerly much esteemed as a corroborant, carminative, and emmenagogue.

TANACE'TUM HORTENSE, *T. balsamita*.

TANAISIE VULGAIRE, *Tanacetum*.

TANASIA, *Tanacetum*.

TANGE, *ταγγη*, 'rancidity.' A putrescent tumour.

TANNIC ACID, *Tannin*.

TANNICUM PURUM, *Tannin*.

TANNIN, from (F.) *tanner*, 'to tan.' *Tannicum purum*, *Tanninum*, *Principium adstringens*, *P. Seytdephicum*, *Acidum Tannicum*, *A. Quercitanicum*, *Tannic acid*. A principle obtained from oak bark and other astringent vegetables, so called from its forming the principal agent in the process of *Tanning*. Pure *Tannin*, obtained from galls, (see Ph. U. S.) has been lately introduced into medicine as an excellent and powerful astringent. Dose, two grains, repeated several times a day. The *Tannate of Lead*, *Plumbi Tannas*, has been applied, in the form of ointment, to excoriations, and sloughing sores from pressure, (ζij of the tannate to ζi of cerate.)

TANSY, *Tanacetum*—*t. Wild*, *Potentilla anserina*.

TAPER. HIGH, *Verbascum nigrum*.

TAPETUM, *Tu'pestry*. A shining spot, on the outside of the optic nerve, in the eyes of certain animals, which is owing to the absence of the pigmentum nigrum occasioning the reflection of a portion of the rays from the membrana Ruyschiana. Its use appears to be, by reflecting the rays to cause a double impression on the retina, and thus add to the intensity of vision.

TAPEWORM, BROAD, *Bothriocephalus latus*—*t. Long*, *Tænia solium*.

TAPIOCA. See *Jatropha manihot*—*t. Pearl*, see *Jatropha manihot*.

TAPSARIA, *Decoctum hordei*.

TAR, see *Pinus sylvestris*—*t. Barbadoes*, *Pentrolæum*—*t. Mineral*, *Pissasphaltum*.

TARACHÊ, *Turaz'is*, 'disorder.' A disorder of sight, which arises from a blow, compression of the eye, or the action of dust, smoke or other external cause. By some, it is understood to signify mild or incipient ophthalmia.

Ταραχῆς κοιλίας, 'disturbance of the belly,' *Diarrhœa*.

TARAGON, *Artemisia dracunculus*.

TARANTALISMUS, *Tarantismus*.

TARANTISM'US, *Tarentis'mus*, *Tarantalis'mus*, *Tarentulism*. A feigned or imaginary disease in Apulia, characterized by excessive avidity for dancing at the sound of instruments, and which was ascribed, by the vulgar, to the bite of the tarantula. A sort of *tarantismus*, considered peculiar to Africa, and believed to

be spontaneous, has been called *Tarentismus Tangitanus*, *Janon-tarentisme*.

TARANTULA, from Tarentum or Tarento, a town of Italy where they abound; *Tarentula*, (F.) *Tarentule*. A species of spider—the *Ara-neæ Tarentula* of Linnæus, *Lyco-sa Tarentula* of Latreille, whose bite has been looked upon as dangerous. Music has been thought to cure it.

TARASCON, MINERAL WATERS OF. Chalybeate springs in the department of Ariège, France. They contain iron and carbonic acid.

TARAXACUM, *Leontodon Taraxacum*.

TARAXIS, Tarache, see Ophthalmia.

TARCHON SYLVESTRIS, *Achillea ptarmica*.

TARENTISMUS, *Tarantismus*—t. *Tangitanus*, *Tarantismus*.

TARENTULA, *Tarantula*.

TARENTULISM, *Tarantismus*.

TARGAR, *Juniperus communis*.

TARI. Palm or cocoa wine, from which sugar was obtained, called *Jagre*. It was once used as a tonic.

TAR'NI PONS. A cineritious substance, between the corpora albicantia, which assists in forming the bottom of the third ventricle.

TARU, *Arum esculentum*.

TARQUETTE, *Herniaria glabra*.

TARSAL, *Tar'seus*. That which relates to the tarsus.

THE TARSAL ARTICULATIONS result from the union of the bones of the tarsus with each other.

TARSEUS, *Tarsal*.

TARSO-METATARSAL, *Turso-metatar'seus*. That which relates to tarsus and metatarsus.

TARSO-METATARSAL ARTICULATIONS are those between the bones of the second row of the tarsus and the metatarsal bones. The term *Tarso-metatarsal* is, likewise, applied to ligaments, connected with these joints; some of which are *dorsal*, others *plantar*.

TARSO-MÉTATARSIPHALANGIEN DU POUCE, *Adductor pollicis pedis*—t. *Phalangien du pouce*, *Flexor brevis pollicis pedis*—t. *Sous-phalangien du petit orteil*, *Flexor brevis minimi digiti pedis*—t. *Sous-phalangien du premier orteil*, *Flexor brevis pollicis pedis*.

TARSUS, *Planta prima pedis*, *Rasse'ta pedis*, *Pedum*, *Cavic'ulæ pedis nodus*. 1. The posterior part of the foot. The tarsus consists of 7 bones, arranged transversely in two rows, between which amputation is sometimes performed. The first or *Tibial row*, (F.) *Première rangée*, *R. jambière*, consists of the astragalus and os calcis; the second or *metatarsal*, (F.) *seconde rangée*, *R. métatarsienne* of the scaphoides, cuboides, and three ossa cuneiformia. 2. The *Tarsi*, *Tarsal cartilages*, *Tarsal fibro cartilages*, *Orchoi*, *Crepid'ines* seu *Coro'næ* seu *Chelæ* seu *Un'gu'la Palpebra'rum*, *Tharsi*, are two small, cartilaginous layers, seated in the substance of the free edge of each eyelid. The upper is larger and broader than the lower. Both commence at the bifurcated extremity of the tendon of the orbicularis palpebrarum, and pass to the opposite commissure of the eyelids. They are broader in the middle than at their extremities.

TARTAR, *Antimonium tartarizatum* (improperly)—t. *Calcareous*, *Potassæ subcarbonas*—t.

Crystals of, *Potassæ supertartaras*—t. *Emetic*, *Antimonium tartarizatum*—t. *Soluble*, *Potassæ tartaras*, see *Potash*.

TARTA'REI MORBI. A term employed by Paracelsus to designate certain diseases which he attributed to tartar.

TARTARI CRYSTALLI, *Potassæ supertartaras*.

TARTARIC ACID, *Ac'idum tartar'icum*, *A. tartar'o'sum*, *Acor tartar'icus*, *Acidum tar'tari essentia'lē*. *Tartareous acid*, *Sal tartari essentialē*. (*Potassæ bitart. liiiss*, *aq. destillat. ferō*, *cong. iij*, *creta pptæ. liij*, *acidi sulph. liij*). Boil the bitartar with two gallons of the water, and gradually add the prepared chalk, until no more bubbles appear; let the tartrate of lime subside; then pour off the fluid and wash the tartrate of lime with distilled water, until it is tasteless. Pour upon it the sulphuric acid, diluted with a gallon of boiling distilled water; and set the mixture aside for 24 hours, occasionally stirring it. Filter and evaporate to crystallize. (*Ph. L.*) It is refrigerant and antiseptic, but is chiefly used for making effervescent draughts with soda.

TARTARUM, *Potassæ supertartaras impurus*—t. *Vitriolatum*, *Potassæ sulphas*.

TARTARUS AMMONIÆ, *Ammoniaë tartaras*—t. *Chalybeatus*, *Ferrum tartarizatum*—t. *Crudus*, *Potassæ supertartaras impurus*—t. *Dentium*, *Odontolithos*—t. *Emeticus*, *Antimonium tartarizatum*—t. *Kalicoferricus*, *Ferrum tartarizatum*—t. *Kalinus*, *Potassæ tartaras*—t. *Lixivæ*, *Potassæ tartaras*—t. *Martialis*, *Ferrum tartarizatum*—t. *Potassæ ferruginosus*, *Ferrum tartarizatum*—t. *Subpotassicus*, *Potassæ supertartaras*—t. *Superpotassicus*, *Potassæ supertartaras*—t. *Tartarizatus*, *Potassæ tartaras*.

TARTRATE D'AMMONIAQUE, *Ammoniaë tartaras*.

TARTRE BRUT, *Potassæ supertartaras impurus*—t. *Cru*, *Potassæ supertartaras impurus*—t. *des Dents*, *Odontolithos*—t. *Émetique*, *Antimonium tartarizatum*—t. *Sibbié*, *Antimonium tartarizatum*.

TARTRUM SOLUBILE, *Potassæ tartaras*.

TASIS, *Extension*, *Tension*.

TASTE, *Gustus*, *Geusis*, *Geuma*, *Geuthmos*, (F.) *Gout*. One of the five external senses, which instructs us of the savours of bodies, and of which the tongue is the principal organ.

Gustation, *Gustatio*, is the exercise of this faculty. In disease, the taste frequently becomes variously vitiated.

TASTE, *Savour*.

TAUPE, *Calpa*.

TAUROCOLLA, *ταυροζolla*. Glue made of the ears and genitals of the bull. It was formerly much esteemed.

TAURUS, *Penis*, *Perinæum*.

TAXIS, 'Arrangement,' from *τασσω*, 'I order,' 'I arrange,' *Repositio*, *Reductio*. A methodical pressure exerted by the hand on a hernial tumour, for the purpose of reducing it. This operation is generally easy in herniæ that are free from adhesions, of small size, and with a large opening to the sac; but it is very difficult and frequently impracticable in those that are adherent or strangulated. To perform the taxis, the patient should be put in the horizontal posture, and in one in which the parietes of the abdomen are relaxed. The manual procedure varies in each species of hernia. In all

cases, too strong pressure of the parts must be avoided; as inflammation and gangrene might be induced. The displaced organs must be pushed into the abdomen, exactly according to the direction of the axis of the hernial sac. The reduction is sometimes favoured by blood-letting *ad deliquium*; the warm bath; warm fomentations; tobacco, emollient gylsters; and, at times, by cold applications, as ice, &c. In a case of strangulated hernia, should the taxis fail, an operation becomes necessary.

TAXUS BACCA'TA. The *Yew tree*, *Smilax*, *Smilas*, *Thymalos*, (F.) *If.* Family, Coniferæ. *Sex. Syst.* Diœcia Monadelphica. The ancients believed the yew to be poisonous, but the fruit may be eaten without inconvenience. The leaves have been often recommended in epilepsy. The resin, obtained from the bark, has been called *albir*.

TAYE, Caligo.

TEA, Thea—t. Berried, Gaultheria—t. Blankenheimer, see *Galeopsis grandiflora*—t. Mexico, *Chenopodium ambrosioides*—t. Mountain, Galtheria—t. New Jersey, *Celastrus*—t. Soot, see *Fuligokali*—t. South sea, *Ilex vomitoria*—t. Spanish, *Chenopodium ambrosioides*.

TEAR, Sax. *teap*. *Lacryma*, *Lachryma*, *Lacruma*, *Dacryon*, (F.) *Larme*. An excrementitious humour, secreted by the lachrymal gland, and poured between the globe of the eye and the eyelids, to facilitate the motions of those parts. The tears are saline, inodorous, and colourless. They turn the syrup of violets green; and contain chloride of sodium, with excess of base, phosphates of lime and soda, and albumen.

TEASEL, CULTIVATED, *Dipsacus sylvestris*.

TEAT, Nipple.

TECNOCTONIA, Infanticide.

TECOLITHOS, Judæus (lapis.)

TEETH, see Tooth—t. Eye, Canine teeth—t. Jaw, Molar teeth—t. Milk, see Dentition—t. Neck of the, *Collum dentium*—t. Vitreous substance of the, Enamel of the teeth.

TEETHING, Dentition.

TEGULA HIBERNICA, *Hibernicus lapis*.

TEGUMEN, Integument.

TÉGUMENT, Integument.

TEGUMENTUM, Integument—t. Ventriculorum cerebri, Centre, oval, of the brain.

TEIGNE, Porrigo, *P. lupinosa*—t. *Annu-laire*, *Porrigo scutulata*—t. *Furcuse*, *Porrigo favosa*—t. *Furfuracæ*, *Porrigo furfurans*.

TEINESMOS, Tenesmus.

TEINTURE, Tincture—t. *Ethérée*, *Æthereal*—t. *Rubéfiante*, *Tinctura cantharidis*.

TEKEDON, Tabes.

TELA ACCIDENTALIS MEDULLARIS, *Encephaloid*—t. *Galteri*, *Sparadrapum Galteri*—t. *Ichthyocollæ glutinans*, see *Sparadrapum adhæsivum*.

TELAMON, Habena.

TELA MO'NES, *τελαμονες*, 'bandages.' Charpie, used for wounds; or linen, employed for bandages.

TELANGIECTASIA, or **TELANGIECTASIS**, Dilatation of vessels. See *Hæmatodes fungus*.

TELEPHIUM, *Ulcus telephium*. The ancients gave this name to an ulcer of a very bad kind, and difficult to cure, because the wound,

which Achilles inflicted on Telephus, degenerated into a similar ulcer.

TELEPHIUM, *Sedum telephium*.

TELLURISMUS, Magnetism, animal.

TELUM, Penis—t. *Emplasticum*, *Sparadrapum*.

TEMPE, Temple.

TEMPERAMENT, *Temperamentum*, *Temperatura*, *Temperatio*, *Temperies*; originally from *tempus*, 'time,' the great *temperer*; *Complezio*, *Crisis*, *Eucrasia*. A name given to the remarkable differences that exist between different individuals, in consequence of the variety of relations and proportions between the constituent parts of the body. Thus, of old, it was supposed, that, according to the predominance of any one of the four humours then generally admitted—blood, lymph, bile, and atrabilis or black bile—the manifestations of the functions were *tempered* or modified so as to give rise to a *sanguine*, *lymphatic*, *choleric*, or *atrabilious* or *melancholic* predominance or temperament. The idea of the existence of certain of these humours has been banished, yet the influence of some, as of the blood, lymph, and bile, is still admitted by many. Too much influence has, doubtless, been assigned to temperament in the sense in which it was formerly and still is generally understood, although there can be no question that difference of organization does occasion a difference in the activity of organs.

TEMPERAMENT, **BILIOUS**, **Choleric** temperament.

TEMPERANCE, *Sophrosynê*, *Nephalotes*, *Sobrietas*, *Sobrietas*. Moderation, opposed to gluttony and drunkenness. The advantage of temperance, in a hygienic point of view, requires no comment.

TEMPERANTS, Sedatives.

TEMPERATIO, Temperament.

TEMPERATURA, Temperament.

TEMPERIES, Temperament.

TEMPLE, *Tempus*, *Crotaphus*, (F.) *Tempe*. A depression, on each side of the head, between the forehead and eye anteriorly, and the ear posteriorly. The *temples*, distinguished into *right* and *left*, correspond to the temporal fossa on each side. The word is said to be from the Latin *tempus*, 'time,' because in this part the hair begins to turn white, and to indicate age.

TEMPORAL, *Temporalis*. That which relates to the temples.

TEMPORAL APONEUROSIS is a very strong aponeurosis, of a bluish, shining colour, which is attached to the whole of the curved line of the temporal bone; to the posterior edge of the malar bone; to the superior margin of the zygomatic arch, and forms an envelope for the temporal muscle.

TEMPORAL or CROTAPHITE ARTERIES, are several. 1. The *Temporal Artery*, properly so called, arises from the outer side of the superior part of the external carotid. It ascends between the ramus of the jaw, the meatus auditorius externus, and the parotid gland, which covers it as far as the zygomatic arch. Above this, it becomes subcutaneous; and, when it has attained the middle of the temporal region, it divides into two branches: the one anterior—the *temporalis frontalis seu interna seu anterior*; and the other posterior—the *temporalis occipitalis seu externa seu superior*. The temporal artery, before its division, gives off, 1. Branches

to the parotid; to the joint of the lower jaw; to the meatus auditorius, and to the masseter. 2. The *transverse artery of the face*. 3. The *middle temporal*, which arises beneath the cheek-bone, and traverses the temporal aponeurosis, immediately beneath that bone. II. The *Deep-seated Temporals*, *A. temporal'es profundæ*. These are two in number. They arise from the internal maxillary, and have been distinguished, from their position, into *anterior* and *posterior*. They send their principal divisions into the temporal muscle.

TEMPORAL BONE, *Os tem'poris seu tempore'le seu arcuall'e seu arma'll'e seu lapideum seu lapido'sum seu saxum seu petro'sum seu litho'des seu lepidoi'des seu squamo'sum seu squamifor'me seu durum seu mendo'sum seu præruptæ rupi assinillat'um seu nerod'le*, *Crotaphus*, is seated at the lateral and inferior part of the cranium, of which it forms part; and contains, within it, the special organs of audition. It is usually divided into three portions:—1. The *squamous*, *Pars squamo'sa*. (F.) *Portion écaill'euse ou squameuse*. 2. The *mastoid portion*, and 3. The *Petrous portion*, *Pars petro'sa*, *Pyr'amis trig'ona*, (F.) *Portion pierreuse*, *Rocher*. It has, first, an *auricular* or *external face*, on which is a surface that makes part of the temporal fossa; the *zygomatic process*; the *glenoid cavity*; the *fissure of Glaserius*; the *meatus auditorius externus*; the *mastoid process*; the *digastric groove*; the *canalis caroticus*; the *jugular fossa*; the *styloid process*; the *stylo mastoid foramen*, &c. 2. A *cerebral* or *internal surface*, which corresponds to the cavity of the cranium and on which is the *Pars petrosa*, the *hiatus Fallopii*, the *meatus auditorius internus*, the *fissure of the aquæductus vestibuli*, a *portion of the gutter for the lateral sinus*, &c. 3. A *circumference*, on which is observed the orifice of the *bony portion of the Eustachian tube* and the *Aquæductus cochleæ*, &c. The temporal bone is articulated with the sphenoid, occipital, parietal, malar, and inferior maxillary bones. It is developed from five points of ossification.

TEMPORAL FOSSA is an excavation, observed at each side of the head. It is filled by the muscle whose name it bears, and is formed by the temporal and sphenoid, below; by the parietal and frontal bones, above; is separated, by a transverse crista, from the zygomatic fossa; and completed, before, by the cheek bone.

TEMPORAL MUSCLE, *Tempora'lis*, *Arcadi-temporo-maxillaire*, *Crotaphites*, *Temporo-maxillaire* (Ch.) is a broad, flattened, triangular muscle, which fills the temporal fossa. Its fibres are attached to the temporal aponeurosis and fossa; and all converge into a strong tendon, which passes under the zygomatic arch, and is inserted into the coronoid process of the lower jaw. This muscle raises the lower jaw, and applies the teeth against each other.

TEMPORAL NERVES. These are distinguished into the *superficial temporal*, furnished by the inferior maxillary branch of the 5th pair, behind the condyle of the jaw; and the *temporales profundi*, *anterior* and *posterior*, furnished by the same nerve, at its exit from the cranium. Sömmering has given the name *temporal* to the divisions sent by the facial nerve to the temporal region.

TEMPORAL VEINS were formerly called *Ætoi* or *Ætoi Phlebes*, *Aquiæ Venæ*.

TEMPORO-AURICULAIRE, *Attollens aurem*—*t. Maxillaire*, Temporal muscle.

TEMPORO-MAXILLARY, *Temporo maxilla'ris*. That which belongs to the temporal bone and lower jaw.

TEMPORO-MAXILLARY ARTICULATION or joint of the lower jaw, is seated between the glenoid cavity and transverse process of the temporal bone on the one hand, and the condyle of the lower jaw on the other. Two thin cartilages cover the surfaces of these bones. The one is common to the transverse process and the portion of the glenoid cavity, anterior to the fissure of Glaserius; the other belongs to the condyle. This articulation is furnished with an inter-articular fibro-cartilage, two synovial capsules, and two lateral ligaments:—the one internal, and the other external.

TEMPORO MAXILLARY NERVES of Bichat are the divisions of the facial nerve, distributed to the temporal and maxillary regions.

TEMPUS, Temple.

TEMULENTIA, *Ebrietas*, *Drunk'ness*. Plater gave this name to delirium; Ettmüller, to an apoplectic condition, depending upon drunkenness—the *Apoplexia temulentia*, or dead drunkenness. Commonly, *Temulentia* is used synonymously with drunkenness, *Methæ*, and is often employed in the description of diseases to indicate a state resembling drunkenness. *Mania e temulentia* is the same as *Delirium tremens*, (q. v.)

TENACULA, Bone-nippers—*t. Volseila*, Forceps (lithotomy.)

TENACULUM, from *teneo*, 'I hold.' A kind of fine hook attached to a handle which is thrust through the parietes of a blood-vessel, to draw it out and enable it to be tied.

TENACULUM, ASSALINI'S. An ingenious instrument, invented by Assalini. It consists of a forceps, or double tenaculum, the points of which are fine, sharp, and bifurcated, so as to be readily received into each other when the instrument is closed on the artery, which it is by a spring. It is of great use when the surgeon has no assistant at hand. The instrument is figured in S. Cooper's, "First Lines."

TENAILLE INCISIVE, Bone-nippers.

TENDON, *Tendo*, *Præterdictio*, from *τενω*, 'I stretch.' *Tenon*, a *Sinevo*. A fibrous cord, more or less round, long, or flattened; of a white, pearl colour, and composed of very close parallel fibres. The tendons are attached to the bones, by one extremity; by the other, they receive the insertions of the fleshy fibres: sometimes they afford attachment to fleshy fibres at both ends;—as in the digastric muscle. The tendons must be considered as so many cords, for transmitting the motion of muscles to the bones or levers.

TENDON D'ACHILLE, *Achillis tendo*.

TENDONS, TWITCHING OF THE, *Subsultus tendinum*.

TENESMUS, *Teines'mos*, *Tinas'mus*, from *τενω*, 'I stretch.' *Proctica Tenesmus*, *Obstipatio Tenesmus*, (F.) *Épreintes*. Frequent, vain, and painful desire to go to stool;—one of the chief symptoms of inflammation of the lining membrane of the digestive tube, as of dysentery.

TENESMUS VESICÆ, *Bradysuria*.

TENETTES, Forceps (craniotomy.)

TENIA, *Tania*—*t. à Anneaux longs*, *Tania*

solium—*t. à Longues articulations*, *Tænia solium*—*t. Sans épine*, *Tænia solium*.

TENNESSEE', MINERAL WATERS OF. On the waters of French Broad River, in this State, is a large, clear, thermal spring. The heat is so great that, on first going into the water, it is almost insupportable.

TENON, Tendon.

TENONT'AGRA, from *τενον*, 'tendon,' and *αγρα*, 'seizure.' A variety of gout; which affects the tendinous parts of muscles, or the tendinous ligaments, which strengthen certain articulations.

TENONTOTRO'TI, from *τενον*, 'tendon,' and *τενωσων*, 'I wound.' They who are wounded in the tendons.—Galen.

TENOT'OMY, *Tenotom'ia*, from *τενον*, 'a tendon,' and *τομη*, 'incision.' The operation of dividing a tendon, often practised for the removal of Loxarthrus or deviations of the joints—as in club foot.

TENSEUR DE L'APONEVROSE FÉMO-RALE, *Fascia lata muscle*.

TENSION, *Ten'sio*, *Tasis*, *Diat'asis*, *Entonia*, (*Entonia* is also used for over-tension.) *Con'ten'sio*, *Disten'sio*, from *tendere*, 'to stretch.' State of a part, which is stretched, when its textures are distended by the afflux of fluids, or the accumulation of gas; or when its fibres are drawn, as it were, in an opposite direction, and are, consequently, more resisting than usual.

TENSOR TARSI. A small muscle, belonging to the inner commissure of the eyelids, well described by Prof. Horner, of Philadelphia, and hence termed, also, *Muscle of Horner*. It is about three lines broad and six long; arises from the posterior flat surface of the os unguis, near its junction with the ethmoid bone, and passes forwards and outwards, lying on the posterior face of the lachrymal ducts. As it approaches the commissure of the lids, it splits into two nearly equal parts; each of which is appropriated to a duct, and inserted along its course, almost to the punctum lachrymale. Its chief office seems to be, to influence the position of the puncta lacrymalia, and to regulate the course of the tears through the lachrymal ducts.

TENSOR TYM'PANI, *Inter'nus Auris*, *Internus Mallei*, *Salpingo-malléen*. A small muscle, which arises from the petrous portion of the temporal bone, and the cartilage of the Eustachian tube, and terminates by a tendon, which is reflected over the processus cochleariformis, and is inserted into the apophysis of the handle of the malleus.

TENSOR PALATI, *Circumflexus musculus*—*t. Vaginæ Femoris*, *Fascia lata muscle*.

TENSUS, Penis.

TENT, *Tenta*, *Turun'da*, *Penic'ulus*, *Penic'ilus*, *Penic'ilum*, *Motos*, *Lemnis'cus*; (F.) *Tente*, *Mèche*, from *tentare*, 'to try or explore.' In Surgery, tents are small rolls of lint, of a cylindrical or pyramidal shape, which are introduced into wounds and deep ulcers, to prevent them from closing before they are filled up from the bottom. Tents are sometimes also made of prepared sponge, gentian root, &c. They are not so much used as they formerly were.

TENTACULUM CEREBELLI, *Tentorium*.

TENTE, Tent—*t. du Cervelet*, *Tentorium*.

TENTIGO VENEREA, *Nymphomania*—*t. Veretri*, *Satyrasis*.

TENTIPEL'LUM, from *tendo*, 'I stretch,' and *pellis*, 'the skin.' Ancient name of a cosmetic, with which, it was pretended, wrinkles could be effaced.

TENTORIUM, *T. cerebelli super-exten'sum*, *T. cerebelli*, *Tentac'ulum cerebelli*, *Septum transverse*, (Ch.) *Transverse Septum*, *Septum enceph'ali*, *Intersep'ta horizonta'lia Pacci'o'ni*, *Processus transversus duræ matris*, *Lateral Processes of the Dura Mater*, *Diaphrag'ma cerebri*. (F.) *Tente du cervelet*, *Plancher du Cerveau*, from *tendere*, *tentum*, 'to stretch.' A process of the dura mater, which separates the cerebrum from the cerebellum. It extends from the internal horizontal spine of the occipital bone, directly forwards to the sella turcica of the sphenoid.

TENTORIUM CEREBELLO, *Tentorium*.

TENTUM, Penis.

TENTWORT, *Asplenium ruta muraria*.

TENUIS MATER, *Pia mater*.

TEPIDARIUM. See *Stove*.

TEPLITZ, *Toeplitz*.

TERAS, *Monster*.

TERATOL'OGY, *Teratolog'ia*, from *τερας*, 'genitive,' *τεματος*, 'a monster,' and *λογος*, 'a discourse.' A description, or the doctrine, of monsters.

TEREBELLA, *Trepan*.

TEREBIN'THINA, from *τερενιδος*, or *τερεβινθος*, 'the turpentine tree.' *Tw'pentine*, *Bot'in*, *Altobin*, *Altibit*, *Brutino*. (F.) *Térébenthine*. A substance, of the consistence of honey, which flows from many trees of the terebinthaceæ, and confers families. It is viscid; shining; more or less transparent; inflammable; of a warm, pungent taste; strong smell, and is entirely composed of resin and essential oil, without benzoic acid. It is soluble in alcohol. See *Turpentine*. All the turpentine is stimulant, diuretic, and cathartic.

TEREBINTHINA ARGENTORATENSIS, see *Pinus picea*—*t. Balsamea*, see *Pinus balsamea*—*t. Canadensis*, see *Pinus balsamea*—*t. Chia*, see *Pistacia terebinthus*—*t. Communis*, see *Pinus sylvestris*—*t. Cypria*, see *Pistacia terebinthus*—*t. Empyreumatica*, see *Pinus sylvestris*—*t. Veneta*, see *Pinus larix*—*t. Vera*, see *Pistacia terebinthus*—*t. Vulgaris*, see *Pinus sylvestris*.

TEREBINTHINE, *Terebinthina*—*t. de Copahu*, *Copaiba*—*t. d'Égypte*, see *Amyris opobalsamum*—*t. de Gilead*, see *Amyris opobalsamum*—*t. du Grand Caire*, see *Amyris opobalsamum*—*t. de Judée*, see *Amyris opobalsamum*—*t. de Melzé*, see *Pinus larix*—*t. de Venise*, see *Pinus larix*.

TEREBINTHUS, *Terminthus*—*t. Gummi-fera*, *Bursera gummi-fera*—*t. Lentiscus*, *Pistacia lentiscus*—*t. Vulgaris*, *Pistacia terebinthus*.

TEREBRA, *Trepan*.

TEREBRATIO, *Trepanning*.

TEREDO, *Caries*, *Spina ventosa*.

TERES, *Stron'gylus*, *Cylindroi'des*, 'long and round,' (q. v.) An epithet given to many organs, the fibres of which are collected into round fasciculi.

LIG'AMENTUM TERES, (F.) *Ligament rond*. This name is given to the round ligament in the cotyloid cavity, which is attached to the head of the bone, and to the bottom of the cavity. It is also given to a small fibrous fascia, which extends from the coronoid process of the ulna to below the bicipital tubercle of the radius.

TERES MAJOR, *Anguli-scapulo huméral*, *Scapulo-huméral*, (Ch.) (F.) *Grand rond*, is situate at the inferior and posterior part of the shoulder. It is attached, on the one hand, to the outer surface of the inferior angle of the scapula; to the corresponding part of its axillary margin; and, on the other, to the posterior margin of the bicipital groove of the humerus. It carries the arm backwards and inwards, and carries it also inwards in rotation. When it acts with the *longissimus dorsi* and *pectoralis major*, it applies the arm against the lateral part of the chest, and keeps it forcibly there.

TERES MINOR, *Margini-sus scapulo-trochitérien*, *Nonus humeri Placentini*, *Le plus petit sus-scapulo-trochitérien*, (Ch.) (F.) *Petit rond*, is situate at the posterior and inferior part of the shoulder: it is narrow and flattened, from above to below, in its inner half; and, from before to behind, in the outer. It is attached, on the one part, to the outer surface of the scapula, near its inferior angle; and, on the other, to the inferior part of the great tuberosity of the humerus. It depresses the arm, and causes it to turn on its axis from within outwards. It also carries it backwards.

TERESIS, Observation.

TERETRON, Trepan.

TERGUM, Dorsum, Vertebral column.

TERMINTHUS, *Terebinthus*, from *requir-902*, 'the turpentine tree.' *Phyna Anthrax Terminthus*, *Berry* or *Fungous carbuncle*. The ancients gave this name to a tumour, surmounted by a black pustule, and resembling the fruit of the turpentine tree.

TERMINTHUS, *Pistacia terebinthus*

TERMINUS SUPERIOR ASPERÆ ARTERIÆ, Larynx.

TERMS, Terms.

TERRA ABSORBENS MINERALIS, *Magnesiæ carbonas*—t. *Aluminis*, *Argilla pura*—t. *Amara*, *Magnesiæ carbonas*—t. *Amara sulphurica*, *Magnesiæ sulphas*—t. *Bolaris*, *Argilla pura*—t. *Foliata*, *Sulphur*—t. *Foliata mineralis*, *Soda acetata*—t. *Foliata tartari*, *Potassæ acetas*—t. *Fornacum*, see *Bricks*—t. *Futlonica*, *Cimolia purpurescens*—t. *Japonica*, *Catechu*.

TERRA LEM'NIA, *Lemnian Earth*, *Lemp'nia*. A name given by the ancients to a solid, reddish, astringent substance, prepared with the pulp of the fruit of the Baobab, an African tree, according to Prosper Alpinus. It seems, however, to be an argillaceous earth. It has been employed as an astringent.

TERRA LIVON'ICA, *A Terra sigilla'ta* or *sealed earth* from Livonia, redder than that from Silesia, and very astringent.

TERRA MERITA, *Curcuma longa*.

TERRA NOCERIA'NA. A whitish, soft, and astringent earth, found in the environs of Nocera in Italy.

TERRA ORLEA'NA, *Pigmentum urucu*, *Urucu*. (F.) *Rocou*, *Roucou*, *Bichet*. A ceraceous mass, obtained from the seeds of the *Bixa Orleana*. In Jamaica, it is recommended in dysentery, and is considered to possess astringent and stomachic qualities. It is called, according to its shape, *Flag Annotto*, *Roll* or *Egg Annotto*.

Spanish Annotto, *Bixa*, is in small, oblong cakes. It is chiefly employed as a colouring matter.

TERRA PONDEROSA, *Baryta*—t. *Ponderosa muriata*, *Baryta*, *muriate* of—t. *Ponderosa sa-*

lita, *Baryta*, *muriate* of—t. *Saponaria*, *Cimolia purpurescens*.

TERRA PORTUGAL'ICA, *Barros*, *Bucaros*. A reddish, astringent, styptic earth, obtained from Portugal.

TERRA SIGILLA'TA, *Sealed Earth*. A bole or earthy matter, made into little cakes or flat masses, and stamped with certain impressions, as with the head of the Grand Seigneur. To these belong the *Terra Silesiaca*, *Terra Lemniu*, *T. Tur'cica*.

TERRA SIGILLATA, *Bolus alba*—t. *Silesiaca*, see *Terra sigillata*—t. *Talcosa oxyanthracodes*, *Magnesiæ carbonas*—t. *Turcica*, see *Terra sigillata*—t. *Vitrioli dulcis*, *Colcothar*.

TERRAPIN, *Emys palustris*.

TERRE-NOIX, *Buniun bulbocastanum*—t. *Pesante*, *Baryta*—t. *Sigillée*, *Bolus alba*.

TERRETTE, *Glecoma hederacea*.

TERTIAN FEVER, *Febris tertiana*, *An'etus tertianus*, *Tritæus*, *Tertian Ague*, (F.) *Fièvre tierce*. An intermittent, whose paroxysms recur every third day, or every 48 hours. The mildest, and the most pernicious, intermittents belong to this head. As a general principle, it is the most manageable form of ague.

TERTIANARIA, *Scutellaria galericulata*.

TESSARA, Cuboid.

TESSELLA, *Tabella*.

TEST, **DANIEL'S**, see *Docimasia pulmonum*—t. *Hydrostatic*, see *Docimasia pulmonum*—t. *Ploucquet's*, see *Docimasia pulmonum*—t. *Static*, see *Docimasia pulmonum*.

TESTA PRÆPARA'TA, *Prepared Oyster-shell*. Oyster-shell, freed from extraneous matter, washed with boiling water, reduced to powder, and prepared in the same manner as *Creta præparata*.

TESTA, see *Ostrea*.

TESTA'CEOUS, from *testa*, 'a shell.' A powder, consisting of burnt shells. These contain carbonate of lime, chiefly, and hence the term has been applied to cretaceous substances. See *Creta*.

TESTÆ FORNACEÆ, *Bricks*—t. *Ostrææ*, see *Ostrea*.

TESTES. The *Testicles*. Vulgarly, the *Stones*. A name given to the inferior tubercles of the corpora quadrigemina, (q. v.) to distinguish them from the superior, called *Nates*.

TESTES MINORES, Prostate.

TESTICLE, *Testis*, *Testiculus*. *Orchis*, *Col-leus*, *Didymus*, *Gemini* (pl.); *Gemelli* (pl.) *Orum*, (F.) *Testicule*, from *testis*, 'a witness,' because the testicles are evidences of virility. The name of two glandular organs, contained in the scrotum, whose office is to secrete sperm. They are formed of a gray and softish substance, composed of tortuous canals, called *Tu'buli seminiferi* vel *Vasa seminalia*, folded on each other, and of extreme fineness; the number of which, according to the estimate of Monro, is 62,500, and the total length 5,208 feet. All these canals, uniting in their course, pass through the corpus Highmorianum, concur in forming the epididymis, and give origin to the vas deferens. The testicles are covered, immediately, by a fibrous membrane, of an opaque white colour, and very tough, called *Tunica Albuginea*, or, simply, *Albuginea*. *Perites'tis*, of which the corpus Highmorianum is only an en-

largement. Over this, again, is the tunica vaginalis, the second envelope of the testis.

TESTICLE, SWELLED. Hernia humoralis.

TESTICONDUS, Crypsorchis.

TESTICULE, Testicle.

TESTICULUS ACCESSORIUS, Epididymis—t. Vaninus, Orchis mascula.

TESTIS FEMINEUS, Ovary—t. Muliebriis, Ovary.

TESTUDINATIO CRANII, Camarosis.

TESTUDO, *Chelone*, (F.) *Tortue*. A genus of reptiles, including the turtle, the flesh of which is much esteemed as an article of diet.

Also, an encysted tumour, which has been supposed to resemble the shell of a turtle; *Emphyema encystis ganglion*. See Ganglion.

TESTUDO, Fornix.

TETANIC, *Tetanicum*, *Convulsivum*, *Convulsive*, from *τενω*, 'I stretch.' A remedy, which acts on the nerves, and, through them, on the muscles, occasioning, in large doses, convulsions. The chief agents of this class are *Nux Vomica*, *Strychnia*, *Brucia*, *Araica* and *Toxicodendron*.

Also, an epithet for atonic convulsion.

TETANOMATA, Tetanothra.

TETANO'THRA, *Tetanomata*, *Ergastoria*. Medicines which remove wrinkles.—Gorræus.

TETANUS, from *τενω*, 'I stretch;' *Spasm with rigidity*, *Convulsio Indica*, *Holiotonicos*, *Rigor nervosus*, *Extensio seu Distensio*, *Entesia Tetanus*, *Catochus cervinus*, *Catochus holotonicus*. A disease which consists in a permanent contraction of all the muscles or merely of some, without alterations of relaxation. It is characterized by closure of the jaws; difficulty or impracticability of deglutition; rigidity and immobility of the limbs and trunk, which is sometimes curved forwards (*Emprosthotonos*, q. v.) sometimes backwards (*Opisthotonos*, q. v.) and sometimes to one side, (*Pleurothotonos*, q. v.) When tetanus is confined to the muscles of the jaws, it is called *Trismus*. It is a most formidable affection. The means of treatment are:—copious and repeated blood-letting; bathing cold and warm; powerful doses of opium, and other narcotics. In *Traumatic Tetanus*, or that which supervenes on a wound, every extraneous matter must, of course, be removed from the wound, and soothing applications be made to it.

TETANUS ANTICUS, *Emprosthotonos*—t. Dolorificus, Cramp—t. Dorsalis, *Opisthotonos*—t. Lateralis, *Pleurothotonos*—t. Maxillæ inferioris, *Trismus*—t. Posterganeus, *Opisthotonos*—t. Posticus, *Opisthotonos*.

TETARTÆUS, Quartan.

TETARTOPH'IA, from *τεταρτος*, 'the fourth,' and *φωω*, 'I arise.' *Quartanus remittens*. A quartan, in which the intermission is inordinately short or imperfect.

TÊTE, Caput, Head—t. de Veau, Elephantiasis of the Greeks.

TETRADRACH'MON, from *τετρας*, 'four,' and *δραχμη*, 'a drachm.' A weight of four drachms or half an ounce.

TETRAGONUS, *Platysma myoides*.

TETRAMY'RON, from *τετρας*, 'four,' and *μυρον*, 'an ointment.' An ointment of four ingredients. Galen.

TETRANGURIA, *Cucurbita citrullus*.

TETRANTHERA PICHU'RIM, *Faba Pichurim*. The seeds of this Brazilian plant have

been used in diarrhœa, dysentery, flatulent colic, &c. Dose, ʒij.

TETRA'O COTUR'NIX, *Coturnix*; the Quail, (F.) *Caille*. The quail is an esteemed article of diet. The Greek name is *ορνις*; and the places, called *Ortygia*, are named after it. The excrements of the quail were formerly extolled in epilepsy: and the fat in specks of the eye.

TETRAPHARMACUM, from *τετρας*, 'four,' and *φάρμακον*, 'a medicine.' A medicine consisting of four ingredients.

TETRAS'CELUS, from *τετρα*, 'four,' and *σκελος*, 'leg.' A monster having four legs.—Gurlt.

TETROB'OLON. The weight of four oboli, or two scruples.—Gorræus.

TETROROS, *Astragalus*.

TETTER. Herpes—t. Crusted, *Impetigo*—t. Honeycomb, *Porrigo favosa*—t. Humid, *Eczeina impetigo*—t. Milky, *Porrigo larvalis*—t. Pustular, *Impetigo*—t. Running, *Impetigo*—t. Scaly, *Psoriasis*.

TETTERWORT, *Chelidonium majus*.

TEUCRIUM CHAMÆ'DRYS, *Chamædrys*, *C. minor repens*, *C. vulgare*, *Quercula minor* seu *Calamandrina*, *Trissago*, *Chamædrops*, *Trissago*, *Common Germanander*, *Creeping Germanander*, *Small Germanander*, *English Treacle*, (F.) *Petit chêne*, *Germandrée officinale*. Family, Labiate. *Sex. Syst.* Didymnia Gymnospermia. This is possessed of aromatic and bitter properties. The dose of the dried powder is from ʒss to ʒj.

TEUCRIUM FLAVUM has similar properties.

TEUCRIUM CHAMÆ'ITYS, *Chamæpitys*, *Arthetica*, *Arthetica*, *Aju'ga*, *Abiga*, *Chamæmorum*, *Ioa arthetica*, *Holocyon*, *Io'nia*, *Sideritis*, *Common Groundpine*. (F.) *Petite Ictie*. Properties like the last. The tops or leaves have been recommended as aperients and tonics; especially in female obstructions, and in paralytic disorders.

TEUCRIUM CRE'TICUM, *Poley-mountain of Candy*, *Polium Cre'ticum*. The tops and whole herb enter into the old compounds—*Mithridate* and *Theriaca*. It has a moderately aromatic smell; and a nauseous, bitter taste, and is placed among the aperients and corroborants.

TEUCRIUM CAPITA'TUM, or *Poley-mountain of Montpellier*, *Polium montanum*, is, generally, substituted for the last. The common *Poley mountain* is the *Teucrium montanum*; and the *Golden Poley-mountain*, the *Teucrium Polium*, *Polium*.

TEUCRIUM IVA, *Chamæpitys moschata*, *Iva moschata* *Napoliensis*, *Iva*, *Chamæpitys anthyllus*, *French Groundpine*, (F.) *Ictie musquée*. It has similar virtues to the *Chamæpitys*, but weaker.

TEUCRIUM MARUM, *Marum Syriacum*, *Marum Cre'ticum*, *Majordana Syriaca*, *Marum zerum*, *M. Cortusi*, *Chamædrys inca'na maritima*, *Marum germander*, *Syrian herb mastich*, *Orig'anum Syriacum*, (F.) *Marum ou Germandrée Maritime*, *Herbe aux chats*. A very aromatic plant; of a camphorated smell; and formerly much used in medicine as a tonic, antispasmodic, emmenagogue, &c.

TEUCRIUM SCORDIUM, the *Water Germanander*, *Scordium*, *Trissago pilustris*, *Chamædrys palustris*, *Allium redolens*, (F.) *Germandrée Scordone*, *Sauge des bois*, *Germandrée aquatique*.

The leaves have a garlicky smell, and bitterish, and slightly pungent taste. It has the tonic properties of the other *Teucria*.

TEXTURE, *Textu'ra*, from *texere*, *textum*, 'to weave.' The particular arrangement of the tissues that constitute an organ.

TEXTUS, Tissue—*t*. Desmosus, Desmoid tissue—*t*. Organicus, Cellular tissue—*t*. Parenchymalis, Cellular tissue.

THERIA, Radzyge.

THALAMUS, *θαλαμος*, (F.) *Couche*; 'a room or chamber; a bed.' The place at which a nerve originates, or has been considered to originate.

THALAMI NERVORUM OPTICORUM SEU OPTICI, *Eminentia magna cerebri, Ganglia cerebri postica, Crura medullæ oblongatæ*, (of some), *Striata corpora superiora posteriora, Colliculi nervorum opticorum, Couches des nerfs oculaires*, (Ch.,) (F.) *Couches des nerfs optiques, Couches optiques*. Two rounded and irregular surfaces, which are seen exposed in the lateral ventricles of the brain, and in the third ventricle, the inferior surface of which presents two projections, called *Corpora geniculata*, that furnish several filaments to the optic nerves. The name was given from a belief that the optic nerves originate from them. They, however, arise more posteriorly, and adhere merely to the inner margin of those bodies. Gall considers, that the thalami act as ganglions to the nerves; and, hence, he calls them *Grand ganglion cérébral inférieur*. They are also called *Posterior ganglion of the cerebrum*. From the thalami and corpora striata fibres proceed upwards to constitute the convolutions of the brain, and the various bands that connect the different parts of the brain together. The upper and inner parts of the thalami are so closely connected as to form one continued surface, called *Commissura mollis*. The posterior parts turn downwards and outwards; after which they are elongated to form the two white cords, termed *Tractus optici*.

THALICTRON, *Thalictrum. T. magnum, T. flavum, T. flavescens, Poor Man's Rhubarb, Rhubarbarum pauperum*, (F.) *Pigamon jaunâtre, Rue des près, Fausse-Rhubarbe, Rhubarbe des pauvres. Family, Ranunculacæ. Sex. Syst. Polyandria Polygynia*. The root resembles rhubarb in its properties.

THANATODES, Mortal.

THANATOLOGY, *Thanatolog'ia*, from *θανατος*, 'death,' and *λογος*, 'a discourse.' A description, or the doctrine, of death.

THANATOS, Death.

THAPSIA, from the island Thapsus. The deadly carrot, *Thapsia asclepias. Family, Umbelliferæ. Sex. Syst. Pentandria Digynia*. The root operates violently, both upwards and downwards. It is not used.

THAPSUS BARBATUS, *Verbascum nigrum*.

THARSI. See Tarsus.

THÉ, *Thea*—*t. des Apalaches, Ilex vomitoria*—*t. de France, Salvia*—*t. d'Europe, Veronica*—*t. de la Mer du sud, Ilex vomitoria*—*t. du Mexique, Chenopodium ambrosioides*—*t. de Simon Pauli, Myrica gale*—*t. Suisse, Falltrane*.

THEA, *Chaa, Tea*, (F.) *Thé*. There are two principal species of tea-plants;—the *Thea Bohea*, and *Thea viridis*; the black tea, and the green. *Family, Hesperidæ. Sex. Syst. Poly-*

andria Monogynia. In commerce, many kinds of teas are met with. Several of the differences between these appear to result from the age at which the leaves have been collected, and the mode of their desiccation.

Tea-drinking was introduced into Europe about the year 1666; since which time its use has become universal; and, in spite of the assertions of medical terrorists, it is, except in particular idiosyncrasies, entirely harmless.

By an analogical transference, very common in language, the word *Tea* has been used almost synonymously with infusion, as *Beef tea, Mint tea, &c.*

THEA GERMANICA, *Veronica*.

THEBESIIUS, VEINS OF. A name given to supposititious branches of the coronary veins, which Christopher Adam Thebesius, a German anatomist, described as opening into the heart by small depressions observable in the right auricle; and which have been called *Foramina Thebesii*. No such veins can be demonstrated. The valve, at the orifice of the coronary vein, in the right ventricle, is called *Valvula Thebesii, V. Guiffartiana, V. venæ magnæ*.

THECA, Case, Vagina or sheath—*t. Cordis, Pericardium*—*t. Vertebralis*, see Vertebral canal.

THEION, Sulphur.

THEIOTHERMÆ, Waters, mineral, sulphureous.

THELASIS, Lactation.

THELASMUS, Lactation.

THELE, Nipple, Papilla.

THELITIS, from *θηλη*, 'the female nipple,' 'the female breast,' and *itis*, denoting inflammation. Inflammation of the nipple.

THELOS, Mamma.

THELYPTERIS, *Pteris aquilina*.

THENAR, *θαλαρ*, from *θενω*, 'I strike.' The palm of the hand, or sole of the foot.

THENAR EMINENCE is the projection at the anterior and outer part of the hand, formed by the abductor brevis, opponens, and flexor brevis pollicis.

THENAR MUSCLE. Riolan and Winslow give this name to the fleshy mass, formed of the abductor brevis, opponens pollicis, and the anterior part of the flexor brevis pollicis. In the foot, Winslow gives the name *Thenar muscle* to the abductor, and flexor brevis pollicis pedis.

THENAR, Flexor brevis pollicis manus, Palm.

THEOPLEGIA, Apoplexy.

THEOPLEXIA, Apoplexy.

THEORETICAL, *Theoreticus, Theoricus*, from *θεωρεω*, 'I contemplate.' (F.) *Théorique, Théorique*. That which is confined to theory, or is connected with it. An epithet also applied to a sect of physicians, who founded their doctrine chiefly on reasoning.

THÉORIQUE, Theoretical.

THEORY. *Theoria*, from *θεωρεω*, 'I contemplate.' The speculative part of a science. The connexion established in the mind between a general fact, or the least possible number of general facts, and all the particular facts dependent thereon: for example,—the motions of the heavenly bodies, and the most important natural phenomena are connected with a single fact, previously known by observation; viz. that the force of gravity acts inversely, according to the square of the distance. This constitutes the theory of universal gravitation. *Theory* must not be confounded with *system*. Theory regards

nature as it is; and is a rigid deduction from facts. *System* is too often the creature of the imagination, to which nature is made to bend.

THEORY OF MEDICINE, *Institutes of Medicine, Theoretica Medicine*, is that part of the science which attempts, philosophically, to account for the various phenomena that present themselves during health, as well as in disease. It is the philosophy of Medicine. The *Institutes of Medicine* are generally considered to comprise Physiology and its applications to Pathology, Hygiene, and Therapeutics.

THERAPEIA, Curation, Therapeutics.

THERAPEUSIA, Therapeutics.

THERAPEUTICS, *Therapeutikē, Therapeutica, Ιατροεχ'νική, Practice of Physic, Therapeia, Curatoria Methodus, Methodus Medendi*, from *ἔρχομαι*, 'I wait upon, I alleviate, I attend upon the sick.' (F.) *Thérapeutique*. That part of medicine, the object of which is the treatment of disease. With others, the department which comprises an explanation of the *modus operandi* of medicines.

THERAPEUTIQUE, Therapeutics.

THERAPEUTIST. Same etymon. One who practises Therapeutics. A practitioner of medicine. To be a good therapist, he must be well versed in every department of medicine, and be capable of observing and of reasoning well. A man may be a good *observer*, and yet a bad *reasoner*. He cannot practise well unless he is both. Hence, the comparatively small number of good Therapists.

THERIA, Radzyge.

THERIAC OF ANTIPATER, Antipatri theriaca.

THE'RIACA, *ἑρ'ιακα*, from *ἑρ'ο*, 'a ferocious or venomous animal,' and *αἰσ'ομαι*, 'I cure.' *Treacle*, (q. v.) (F.) *Thériaque*. Also, a medicine, believed to be capable of curing, or preventing the effects of the bite of a venomous animal. In this sense it is chiefly used by writers.

THERIACA ANDROM'ACHI, or Venice Treacle, is an ancient *alexipharmic electuary*; consisting of a farrago of 61 different ingredients, possessing the most opposite properties. It was invented by Andromachus of Crete, and prepared by order of Nero. It has received various modifications; and, to the discredit of the *Faculté de Médecine* of Paris, holds its place in their Codex, with even an additional number of ingredients. The *Electuarium Opium polypharmacum* of the Codex contains *acid ingredients*, 5; *astringent*, 5; *bitter*, 22; *indigenous aromatics*, 10; *umbelliferous aromatics*, 7; *balsams and resinous substances*, 8; *fatid ingredients*, 6; *narcotics*, 1; *earthy substances*, 1; *gummy or amylaceous*, 4; *saccharine*, 3; total, 72! and one of these is the *flesh of the viper!* A little more than a grain of opium is contained in each drachm of the compound.

THERIACA CELESTIS, Tinctura opii—t. Communis, Melasses—t. Edinensis, Confectio opii.

THERIACA GERMANO'RUM. An extract or rob, prepared from juniper berries. Used as a stomachic.

THERIACA LONDINEN'SIS, Cataplasma Cym'ni. A cataplasm of *cumin seed*, *bay berries*, *germander*, *snakeroot*, *cloves*, *honey*, and sometimes *opium* or *syrup of poppies*.

THERIACA RUSTICORUM, Allium.

THERIAQUE, Theriaca.

60.

THERIODES, Ferine.

THERIO'MA, *Therion*, from *ἑρ'ο*, 'a venomous animal.' Any extremely malignant ulcer. Sometimes, confined to ulcers of the lungs.

THERION, Therioma.

THERIOTOMY, Zootomy.

THERMÆ, *ἑσ'ουα*. Warm baths or springs. See *Waters (mineral)*.

THERMÆ FABARIÆ, Pfeffers, Mineral Waters of—t. *Piperinæ, Pfeffers, Mineral Waters* of—t. *Plumbariæ, Plombières, Mineral Waters* of.

THERMASMA, Fomentation.

THERMATICA, Calefactants.

THERME, Heat.

THESIS, *θέσις*, from *τι'θ'μι*, 'to place.' 'A position or proposition.' *Disputatio, Inaugural Dissertation*. The name usually given to the essay composed by a candidate for graduation in Medicine, which he is at times required to defend publicly. Often, however, it is a mere form giving useless labour and trouble to the student, inasmuch as it is executed as a task, and never afterwards regarded by the preceptor or by others. Sandifort, Haller, Smellie, and Stoll, have published collections of these.

Also, a suffix denoting 'arrangement';—hence *Diathesis*.

THEVE'TIA A'HOUI, *Ahouai*. The kernels of the nut of this Brazilian tree are said to be a violent poison. At the Antilles, its nuts are called *Noix de Serpent*; and they are used against the bites of serpents.

THIGH, Sax. *seoh, Femur, Femen, Crus, Meros*, (F.) *Cuisse*. The part of the lower limb which extends from the pelvis to the leg. The thigh is larger at its superior than inferior part, and has the form of an inverted and truncated cone, slightly depressed from within outwards. *Above*, it is bounded, *anteriorly*, by the groin; *externally*, by the hip; *behind*, by the fold of the nates; and *within*, by the perineal region. *Below*, it is bounded, *anteriorly*, by the prominence of the knee; *posteriorly*, by the ham. It is formed of a considerable number of muscles, blood-vessels, lymphatics, nerves, &c.; and is covered by a strong aponeurosis.

THIGHBONE, Femur—t. Neck of the, *Col-lum femoris*.

THION, Sulphur.

THIRST, Sax. *ḡynrc*, Dutch, *Dorst, Sitis, Dipsa*, (F.) *Soif*. A simple desire or an absolute want for liquids. Physiologists are not entirely agreed regarding the seat of thirst; some place it in the fauces; others in the stomach. Its immediate cause is not known. It has been attributed to a dry condition of the nervous papillæ of the pharynx, produced by suppression of the salivary and mucous secretions. This is probably true; but, again, it is owing to the wants of the system,—a supply of fluid being required to compensate the numerous losses that are constantly taking place. Thirst is an *internal sensation*,—an *instinctive want*,—arising from organization, and inexplicable. It is an urgent symptom in many diseases, particularly in those of vascular excitement.

THIRST, EXCESSIVE, Polydipsia—t. Morbid, *Dipsosis*.

THISTLE, BLESSED, *Centaurea benedicta*—t. Cotton, *Onopordium acanthium*—t. Globe, *Echinops*—t. Holy, *Centaurea benedicta*—t. Ladies', *Carduus Marianus*—t. Milk, common,

Carduus Marianus—t. Pine, *Atractylis gummifera*—t. Sow, *Sonchus oleraceus*—t. Star, *Centaurea calcitrapa*.

THLASIS, Contusion—t. Depressio, Depression.

THLASMA, Contusion—t. Concussio, Concussion—t. Stremma, Sprain.

THLASPI, *Pennycress*. Family, Cruciferae. *Sez. Syst.* *Tetradynamia Siliculosa*. Two species of thlaspi are directed, in some pharmacopœias, for medical use:—the *Thlaspi arven'se* or *Treacle mustard*, and the *Thlaspi campestre* or *Mithridate mustard*. The pharmaceutical properties of both kinds resemble those of common mustard.

THLIP'SIS, *θλιψις*, *Compressio*. Compression, and especially constriction of vessels by an external cause. Oppression, (q. v.)

THOLUS, Achiculum—t. Diocleus, Scapha. THORACENTE'SIS, from *θώραξ*, 'the chest,' and *κτενω*, 'I pierce.' The same as paracentesis of the thorax.

THORACHIQUE, Thoracic.

THORAC'IC, *Thorac'icus*, from *thorax*, 'the chest,' (F.) *Thoracique* ou *Thorachique*. That which relates or belongs to the chest; as *Thoracic vis'cera*, &c.

ARTERIA THORACICA EXTERNA INFERIOR VEL LONGA, *A. mamma'ria externa*, *A. thoracica inferior*, *Deuxième des Thoraciques* (Ch.) arises from the axillary, a little below the preceding, and descends vertically over the lateral part of the thorax, and the serratus major anticus. It afterwards bends inwards; becomes subcutaneous, and divides into several branches, which embrace the breasts. It gives numerous ramifications to the pectoralis major, serratus major anticus, intercostals, ganglions of the axilla, mamma, &c.

ARTERIA THORACICA EXTERNA SUPERIOR, *A. thoracique supérieure*, *Première des Thoraciques* (Ch.) arises from the axillary artery or from the acromial; and descends forwards between the pectoralis major and P. minor, to which it distributes itself by a great number of branches. In some subjects, there are two or three *Arteriae thoracicae externae superiores*.

THORACIC DUCT, *Ductus thorac'icus* seu *chyli'fer* seu *chyli* seu *lac'teus* seu *ro'riser* seu *Pecqueti* seu *Pecquetianus*. *Vena alba thorac'is*, *Alveus ampulles'cens*, *Distributo'ria lactea thoracica*, *Ductus thoracicus post'rior* seu *vertebra'lis*, *Galax'ia*, *Duct of Pecquet*, *Alimen'tary Duct*, (F.) *Canal* ou *Conduit Thoracique*, is the duct in which the lymphatics of the lower limbs, abdomen, left superior extremity, left side of the head, neck, and thorax terminate. It begins at the *receptaculum chyli* (q. v.) which is formed by the union of five or six large lymphatic trunks,—themselves formed from the union of all the absorbent plexuses of the abdomen. The duct ascends into the chest through the pillars of the diaphragm, and by the side of the aorta and vena azygos. It contracts in dimensions, as far as the 6th dorsal vertebra, when it inclines towards the left hand; ascends behind the arch of the aorta; passes behind the left internal jugular vein, and opens at the posterior part of the subclavian vein of the same side. Its embouchure is furnished with two valves, which prevent the blood from passing from the vein into the duct.

THORACIC LIMBS are the upper limbs;—so

called because they are articulated with the lateral and upper parts of the chest.

THORACIC REGIONS are the different regions of the chest. Thus we say, *anterior*, *lateral*, and *superior thoracic*, &c.

THORACIC, LONG or INFERIOR, Mammary inferior external artery—t. Superior external, Mammary superior external artery.

THORACICA, Pectorals.

THORACICS, FIRST OF THE, Mammary superior external artery—t. Second of the, Mammary inferior external artery.

THORACIQUE, Thoracic.

THORACO-CYSTIS, Thoracystis.

THORACO-FACIAL, *Platysma myoides*—t. *Mazillo-facial*, *Platysma myoides*.

THORACO-GASTRODID'YMUS, *Did'y-mus syn'phyo-thoracogast'rius*, *Xiphodid'y-mus*: from *θώραξ*, 'the chest,' *γαστήρ*, 'the belly,' and *διδυμος*, 'a twin.' A monstrosity in which twins are united by the chest and abdomen.—Gurlt.

THORACODID'YMUS, from *θώραξ*, 'the chest,' and *διδυμος*, 'a twin.' A monstrosity in which twins are united by the thorax.—Gurlt.

THORACODYNE, Pleurodynia.

THORACOSCOPIA. See Auscultation.

THORACYSTIS, from *θώραξ*, 'the chest,' and *κύστις*, 'a bladder.' Encysted dropsy of the chest. Hydatids in the chest.

THORAX, *θώραξ*, 'a cuirass, a coat of mail.' *Cith'arus*, *Me'dius venter*, *Pectus*, the *Breast*, the *Chest*, *Bir*, *Chelys*, *Cassa*, (F.) *Poitrine*. One of the splanchnic cavities; bounded, posteriorly, by the vertebræ; laterally, by the ribs and scapula; anteriorly, by the sternum; above, by the clavicle; and, below, by the diaphragm. It is destined to lodge and protect the chief organs of respiration and circulation:—the lungs and the heart.

THORAX, Corset.

THORE, Sperm.

THORNAPPLE, *Datura stramonium*.

THOROUGHSTEM, *Eupatorium perfoliatum*.

THOROUGHWAX, *Eupatorium perfoliatum*.

THOROUGHWORT, *Eupatorium perfoliatum*.

THOROW-WAX, *Bupleurum rotundifolium*.

THORULUS STRAMINEUS, *Fanon*.

THREADWORM, LONG, *Tricocephalus*.

THREPSIS, Assimilation, Nutrition.

THREPTICE, Assimilation.

THRIDACE, *Lactucarium*.

THRIDAX, Lettuce.

THRIFT LAVENDER, *Statice limonium*.

THRIX, Capillus, Hair.

THROAT, *σπρω*, *σπρωα*, *Jugulum*, *Guttur*, *Sphagē*. The anterior part of the neck. (F.) *Gorge*. Also, the *Fauces*, (F.) *Gosier*.

THROATWORT, *Campanula trachelium*.

THROBBING, *Pulsat'ivus*. A *throbbing pain*, (F.) *Douleur pulsative*, is a kind of pain, which is, or seems to be, augmented by the pulsations of arteries.

THROMBOSIS, Thrombus.

THROMBUS, *θρόμβος*, 'a clot,' from *τροβειν*, 'to coagulate,' *Thrombo'sis*, *Trumbus*, *Hæmato'ma*. A small, hard, round, bluish tumour; formed by an effusion of blood in the vicinity of a vein which has been opened in the operation of blood-letting. The thrombus is most commonly owing to the opening in the vein

and that of the skin not corresponding; to excessive smallness of the cutaneous orifice; or to small,  granules, which prevent the discharge of the blood. Compresses, dipped in salt water; camphorated spirit, and slight compression usually disperse it.

THRUSH, Aphthæ—t. White, aphthæ—t. Milk, aphthæ.

THRYPSIS, Communion.

THUREA, Juniperus lycia—t. Virga, Juniperus lycia.

THUS, see Pinus abies—t. Fœmininum, see Pinus abies—t. Judæorum, Croton cascarilla—t. Judæorum, Styrax—t. Judæorum, Thymiana—t. Libanotos, Juniperus lycia—t. Masculum, Juniperus lycia—t. Verum, Juniperus lycia—t. Vulgare, see Pinus abies.

THUYA APHYLLA. See Sandarac.

THUYA OCCIDENTALIS, *Arbor Vitæ*, *Tree of Life*. *Nat. Family*, Coniferæ. The leaves and wood were formerly in high repute as resolvents, sudorifics, and expectorants, and were given in plithisical affections, intermittent fevers, and dropsies. The expressed juice has been applied to condylomata. The arrangement of the medullary matter of the cerebellum, termed *Arbor Vitæ*, is also called *Thuya*.

THYM, Thymus.

THYMALOS, *Taxus baccata*.

THYMBRA, *Satureia hortensis*—t. Hispanica, *Thymus mastichina*.

THYME, COMMON, *Thymus*—t. Lemon, see *Thymus serpyllum*—t. Mother of, *Thymus serpyllum*—t. Wild, *Thymus serpyllum*.

THYMELEA, *Daphne gnidium*.

THYMIAMA, *Θυμαία*, 'a perfume,' *Musk-wood*, *Thymus Judæorum*, (F.) *Narcaphte*. A bark from Syria, Cilicia, &c., supposed to be the product of the liquid storax tree. It has an agreeable, balsamic smell; approaching that of liquid storax.

THYMIAMA, Fumigation, Suffimentum.

THYMIATECHNY, from *θυμία*, 'an odour,' and *τεχνή*, 'art.' The art of employing perfumes in Medicine.

THYMION, *Verruca minor*, from *θυμός*, 'thyme.' A small wart on the skin, resembling the buds of thyme.

THYMIOSIS, *Frambœsia*.

THYMITES. Wine impregnated with thyme.

THYMOS, Rage.

THYMOXALME, from *θυμός*, 'thyme,' *ὄξύς*, 'acid,' and *ἅλς*, 'salt.' A compound of thyme, vinegar, and salt.

THYMUS, *θυμός*, *Glandula Thymus*, *Corpus Thymicum* seu *Thymicum*, *Glandium*, *Thymus gland.* An organ, the uses of which are totally unknown, and which is seated in the upper separation of the anterior mediastinum. The thymus has the appearance of a glandular body. It is oblong; bilobate; soft, and very variable in size and colour. In the fœtus, it is very large, and contains a milky fluid; but it gradually disappears, and in old age is scarcely discernible. The arteries, called *Thymicæ*, are from the inferior thyroid, internal mammary, bronchial, and mediastinal. The veins have the same arrangement. It receives some nervous filaments from the pneumogastric nerves, the phrenic, and from the inferior cervical ganglia.

THYMUS, *T. vulgaris*, *Common Thyme*, (F.)

Thym, *T. Ordinaire*. *Family*, Labiatæ. *Ser. Syst.* Didynamia Gymnospermia. This herb has an agreeable, aromatic smell; and a warm, pungent taste. It is reputed to be resolvent, emmenagogue, tonic, and stomachic. It is not much used.

THYMUS, *Satureia capitata*—t. Creticus, *Satureia capitata*.

THYMUS MASTICHINA, *Common Herb Mastich*, *Marum vulgare*, *Samp'suchus*, *Clinopodium*, *Mastichina Gullorum*, *Thymbra Hispanica*, *Jaca Indica*. A low, shrubby, Spanish plant, used as an errhine. It has a smell like mastich. Its virtues resemble those of the *Marum Syriacum*; but it is said to be less powerful.

THYMUS SERPYLLUM, *Mother of Thyme*, *Wild Thyme*, *Herpyllus*, *Herpyllus*, *Serpyllum*, *Serpyllum*, *Serpyllum*, *Gullorum*, *Serpyllum vulgare minus*, (F.) *Serpollæ*. This plant has the same sensible properties as the garden thyme; but has a milder, and rather more grateful flavour. *Lemon Thyme*, the *Serpyllum citratum*, is merely a variety of the *Thymus serpyllum*. It is very pungent; and has a particularly grateful odour, approaching that of lemons.

THYMUS SYLVESTRIS, *Satureia capitata*.

THYRA, *θύρα*, 'a gate, folding door.' In composition, *Thyro* and *Thyro*, mean the thyroid cartilage.

THYREMPHRAXIS, *Bronchocele*.

THYREO-ARYTENOID, *Thyro-arytenoideus*, or *Thyro-arytenoides*. That which relates to the thyroid and arytenoid cartilages.

THYREO-ARYTENOID LIGAMENTS, *Inferior Ligaments of the Larynx*, *Lips of the Glottis*, *Vocal Cords*, are two ligaments about two lines broad, formed of elastic and parallel fibres, which are contained in a duplicature of the mucous membrane of the larynx. They extend horizontally from the anterior projection at the base of each arytenoid cartilage to the middle of the angle of union of the thyroid cartilage. They are the essential organs of voice. See *Glottis*.

THYREO-ARYTENOIDÆI MUSCLES are thin muscles, which arise from the middle and inferior part of the posterior surface of the thyroid cartilage: whence they proceed backwards and outwards, to be inserted into the outer part of the base of the arytenoid cartilage. They give the necessary tension to the ligaments of the glottis, in the production of the voice. Santorini has given the name *Thyreo arytenoideus obliquus* to a portion of the *arytenoideus* muscle.

THYREO-EPIGLOTTIC, *Thyreo-epiglottideus*. Sabatier and Santorini have given this name to the outer portion of the thyro arytenoid muscle; because it passes from the thyroid cartilage to the anterior part of the epiglottis.

THYREO-HYOID, *Thyro-hyoideus*, *Thyro-hyoides*. That which belongs or relates to the thyroid cartilage and os hyoides.

THYREO-HYOID or HYO-THYROID MEMBRANE is a very broad, yellowish, fibrous membrane, thicker at the middle than at the extremities, which is attached, above, to the posterior surface of the body and great cornu of the os hyoides; and, below, to the whole superior edge of the thyroid cartilage.

THYREO-HYOIDEUS or HYO-THYREOIDEUS Muscle is situate at the anterior and superior part of the neck. It is attached to the oblique line on the anterior surface of the thyroid car-

tilage; to the inferior edge of the body of the os hyoides, and to the anterior portion of its great cornu. It approximates the thyroid cartilage and os hyoides to each other, by raising the cartilage, and with it the whole larynx: or, it can depress the os hyoides.

THYREO-PHARYNGEUS, Thyro-pharyngeus.

THYREOID, Thyroid.

THYREOIDEUS, Thyroideal.

THYREONCUS, Bronchocele.

THYRO-ARYTENOID, Thyreo-arytenoid

—t. Crico-pharyngeus, see Crico-pharyngeal—t. Hyoideus, Thyreo-hyoid.

THYRO-PHARYNGEUS, *Thyreopharyngeus*. Valsalva, Morgagni, Santorini, and Winslow have given this name to the portion of the constrictor pharyngis inferior, which is attached to the thyroid cartilage.

THYRO-PHARYNGEUS, Constrictor pharyngis—t. Pharyngeus, see Crico-pharyngeal—t. Pharyngo-staphylinus, Palato-pharyngeus.

THYROCELE, Bronchocele.

THYROID, *Thyreoid*, *Thyroïdes*, from *θυρα*, 'a gate or folding door,' and *ειδος*, 'form.' That which has the shape of a folding door.

THYROID CARTILAGE, *Cartilago Scutiformis*, *C. Scutalis*, *C. Clypealis*, *Cochleatum*, *C. Peltalis*, *Adami Morsus Os*, is the largest of the cartilages of the larynx, at the anterior part of which it is situate. It is larger transversely than vertically; broader above than below; and seems formed by the junction of the two quadrilateral plates, which produce, by their union, an angle that projects forwards. Its two posterior margins terminate above, and on each side, by an ensiform prolongation, called the *greater cornu of the thyroid cartilage*; and, below, by a less prominent eminence, the *lesser cornu*, which is articulated with the cricoid.

THYROID GLAND, *Corpus Thyroideum*, *Glandula Thyroidea*, (F.) *Gland on Corps Thyroïde*, is an organ, the uses of which are not known. It covers the anterior and inferior part of the larynx, as well as the first rings of the trachea, and seems to be composed of two lobes, flattened from before to behind, which are united by a transverse prolongation of the same nature as themselves, called the *Isthmus of the Thyroid Gland*. The tissue of the thyroid is soft, spongy, and of a brownish colour; but its intimate structure is unknown. It is formed of several distinct lobules; collected in lobes of greater or less size. These are composed of granulations, some of which contain a yellowish or milky fluid. The thyroid gland receives four large arteries, called *Thyroideal*, as well as corresponding veins. Its nerves proceed from the pneumogastric, and from the cervical ganglia. No excretory duct has ever been found in it. Its uses are not known.

THYROIDEAL, *Thyroïdeus*, *Thyreïdeus*, (F.) *Thyroïdien*. That which concerns the thyroid gland or cartilage.

THYROIDEAL ARTERIES are two on each side. 1. The *superior Thyroideal*, *superior laryngeal* or *superior guttural*, arises from the anterior part of the external carotid, and proceeds to the upper part of the thyroid gland, after having given off a *laryngeal branch* and a *crico-thyroid*. 2. The *inferior Thyroideal*, or *inferior guttural*, much larger than the last, arises from the upper part of the subclavian.

It passes, in a serpentine manner, to the inferior part of the thyroid gland, to which it is distributed, after having given a number of branches to the neighbouring parts, among which is the *cervicalis ascendens*.

THYROIDEAL VEINS are, 1. A *superior thyroideal*, and several *middle thyroideal*, which open into the internal jugular vein. 2. An *inferior thyroideal*, much larger than the preceding, whose branches form—by anastomosing with those of the opposite side, in front of the trachea—a very remarkable venous plexus, which J. Cloquet calls the *infra-thyroideal plexus*. The inferior thyroideal veins open,—the left, into the corresponding subclavian;—the right, into the vena cava superior.

THYROIDIEN, Thyroideal

THYROPHRAXIA, Bronchocele.

THYRSUS, Penis.

TIBI-PERONÆO-TARSIEN, *Peronæus longus*.

TIBIA MINIMA, Fibula.

TIBIA, *Cnemē*, *Procnēmē*. A Latin word, which signifies a flute or pipe. *Focile majus*, *Arun'do major*, *Canna major*, *Canna major seu domestica cruris*. The largest bone of the leg. A long, irregular, and triangular bone, situate on the inner side of the fibula. It has, 1. A *Superior or femoral extremity*, which is very large, rounded, and has two eminences at the sides, called *Tuberosities of the Tibia*, or *Tibial tuberosities*. The outermost is articulated with the fibula. On its head are two articular, oval, concave surfaces, separated by a process, called *Spine of the tibia*, which are articulated with the condyles of the *Os femoris*. 2. An *inferior or tarsal extremity*, having an articular surface beneath, which joins the astragalus; within, a triangular eminence, which forms the malleolus internus; and, on the outside, a triangular surface, which articulates with the fibula. 3. The body or shaft of the tibia has three faces, separated by three angles, the anterior of which is the most prominent, and is called the *spine or crista of the tibia* or *tibial spine*. It is the *shin*. The tibia is articulated with the femur, fibula, and astragalus. It is developed by three points of ossification, one for the body, and one for each extremity.

TIBILEUS, Tibial.

TIBIAL, *Tibialis*, *Tibiæus*. (F.) *Tibial*, *Jambier*. That which relates to the tibia or to the leg.

TIBIAL APONEUROSIS, (F.) *Aponévrose Jambière*, surrounds the muscles of the leg. It is continuous, above, with the femoral aponeurosis, and arises, also, from the head of the fibula, and from several fibrous expansions which detach themselves from the tendons of the triceps, sartorius, gracilis, and semitendinosus. Thence it descends around the leg, attaching itself to the whole extent of the anterior and inner edges of the tibia. It sends, below, an expansion, which passes before the tendo Achillis, and is continuous with the anterior annular ligament of the tarsus. It is attached, also, to the sheath of the peronei muscles.

TIBIAL ARTERIES are two in number. 1. The *Tibialis Antica*, which arises from the popliteal artery, before its bifurcation; passes immediately through the opening in the upper part of the interosseous ligament, and reaches the anterior part of the leg; when it turns downwards,

and descends, obliquely, between the extensor communis digitorum pedis and the tibialis anticus, anterior to the interosseous ligament; glides under the anterior annular ligament of the tarsus, and takes the name *Dorsalis tarsi*. Amongst the numerous branches, given off by the tibialis antica, may be distinguished—the *Tibialis recurvens*, *A. malleolaris interna*, and *A. malleolaris externa*. 2. The *Tibialis postica*, arises from the bifurcation of the popliteal artery; and, slightly tortuous, descends between the two planes of the posterior muscles of the leg; until it arrives under the arch of the calcaneum, where it divides into two branches—the *Plantar arteries*.

TIBIAL NERVES are two in number. 1. The *anterior tibial nerve*, *Pré-tibio-susplantaire*, (Ch.) One of the two branches in which the external popliteal terminates. It accompanies the *arteria tibialis antica*. 2. The *posterior tibial nerve*, *Branche tibiale du nerf fémoro-poplitée*, (Ch.) is the *internal popliteal*, (q. v.)

ANTERIOR AND POSTERIOR TIBIAL VEINS have the same arrangement as the arteries which they accompany.

TIBIALIS ANTI'CUS, *Caténæ musculus*, *Tibio-sus-métatarsien*, *Tibio-sustarsien*, (Ch.) (F.) *Jambier antérieur*. A muscle, situate at the anterior part of the leg. Above, it has the shape of a triangular prism; below, it is slender and tendinous. It is attached, above, to the anterior part of the external tuberosity of the tibia; to the superior half of the outer surface of that bone; and to the anterior surface of the interosseous ligament. Below, its tendon terminates at the base of the first cuneiform bone, and at the posterior extremity of the first metatarsal bone. This muscle bends the foot on the leg, and directs its point inwards, at the same time that it raises its inner edge. It can, also, bend the leg on the foot, and prevent it from falling backwards in standing.

TIBIALIS GRACILIS, *Plantar muscle*.

TIBIALIS POSTI'CUS, *Tibio-tarsien*, *Tibio-sous-tarsien*, (Ch.) (F.) *Jambier postérieur*. This muscle is situate at the posterior and deep part of the leg. It is thicker above than below; and is attached, above, to the posterior surface of the fibula; to the posterior surface of the tibia, and to the interosseous ligament. Its tendon terminates, below, at the tuberosity on the inferior extremity of the os scaphoides. This muscle extends the foot on the leg; at the same time raising its inner edge. It, likewise, extends the leg on the foot.

TIBIO-CALCANIEN, *Soleus*—*t. Phalangetien*, *Flexor longus digitorum pedis profundus perforans*—*t. Sous-tarsien*, *Tibialis posticus*—*t. Sus-métatarsien*, *Tibialis anticus*—*t. Sus-tarsien*, *Tibialis anticus*.

TIBIO-TARSAL, *Tibio-tarsus*, (F.) *Tibio-tarsienne*. What relates to the tibia and tarsus.

TIBIO-TARSAL ARTICULATION is the articulation of the foot with the leg. It is formed by the tibia and the astragalus; and is strengthened by lateral, and by anterior, and posterior ligaments.

TIBIO-TARSIEN, *Tibialis posticus*.

TIC, *Twitching*. A local and habitual convulsive motion of certain muscles; and, especially, of some of those of the face. It is, sometimes, called in France *Tic convulsif*, to distinguish it from *Tic douloureux* or *neuralgia faciei*,

(q. v.) and has been termed a *partial chorea* or form of *chronic chorea*.

TIC DOULEUREUX, *Neuralgia. facial*.

TICKLE WEED, *Veratrum viride*.

TICKLING, (F.) *Chatouillement*. This word, sometimes, means the action of tickling (*titillatio*); at others, the sensation produced by this action (*pruritus*). A vivid sensation, which commonly causes laughter, and a state of general spasm that may be dangerous if too long protracted. There are some parts of the body, where we are easier tickled than others; e. g. the soles of the feet, and the hypochondriac regions.

TIGE PITUITAIRE, *Infundibulum of the brain*—*t. Sus-sphénoïdale*, *Infundibulum of the brain*.

TIGILLUM, *Crucible*.

TIGULA, *Saccharum*.

TIKIMMA, *Cacoucia coccinea*.

TILBURY, MINERAL WATERS OF. A saline chalybeate at West Tilbury in Essex. England. It is not much frequented.

TILIA, *T. Europæa*, *Phillyra*. The *Lime tree* or *Linden tree*, (F.) *Tilleul*. Family, *Tiliaceæ*. The flowers have been supposed to possess anodyne and antispasmodic virtues.

TILLEUL, *Tilia*.

TILMOS, *Eulsion*.

TILMUS, *Carphologia*.

TIMAC. The name of an East India root, but of what vegetable is not clear. It is said to possess diuretic properties; and hence has been given in dropsies.

TIMIDUS, *Rectus inferior oculi*.

TIN, (D.) *Ten*. *Stannum*, *Cassiteros*, *Cuttileros*, *Stangos*, *Ju'piter*, *Stu'pin*, *Laos*, *Plumbum album*, *Plumbum candidum*, (F.) *Étain*. A solid metal; of a peculiar odour when rubbed; insipid; colour whitish; S. G. 7.291; giving a peculiar tinkling sound when struck. It is used, in medicine, only as a mechanical anthelmintic. Dose, \mathfrak{zj} of the *Pulvis stanni* or *Granular tin*, in molasses. This is made by melting tin in an iron vessel over the fire, and, while it is cooling, stirring until it is reduced to a powder, which is passed through a sieve.—Ph. U. S.

TIN, BUTTER OF, *Tin, muriate of*—*t. Chloruret of Tin*, *Muriate of*—*t. Deutohydrochlorate of T. muriate of*.

TIN-FOIL, *Stannum foliatum*, *Stanni'olum*, is used for plugging carious teeth, &c.

TIN-GLASS, *Bismuth*.

TIN, GRANULAR, see *Tin*—*t. Muriate of*, *superoxygenated T. muriate of*.

TIN, MURIATE OF, *Butter of Tin*. *Fuming liquor of Liban'ius*, *Murias Stanni*, *Murias Oxiduli Stanni*, *Chlor'uret of Tin*, *Deuto-hydrochlorate of Tin*, *Superoxygenated Muriate of Tin*. This is formed of *Tin*, one part; *concentrated muriatic acid*, three parts. To be crystallized by the aid of heat. A violent cathartic. Dose, gr. ij or iij.

TIN, SULPHURET OF, *Aurum musivum*.

TINASMUS, *Tenesmus*.

TINCTURA, from *tingere*, *tinctum*, 'to dye.' *Tincture*, *Essen'tia*, (F.) *Teinture*, *Alcoolat*, *Alcool*. The term tincture is generally restricted to spirituous solutions of vegetable, animal, and some saline substances. It corresponds, therefore, with the word *Quintessence*, in one of its old significations; and with the *Alcoholatum* of the *Codex* of Paris. It is not unusual, however,

to speak of *aqueous tincture*, *ethereal tincture*, &c. Tinctures are made, either with pure alcohol or proof spirit. The former are precipitated by water; and, therefore, are seldom used internally; the latter are common additions to infusions, decoctions, &c. They ought not, of course, to be united with any vehicle which can decompose them or separate any thing from them in a palpable form; unless such decomposition is desired by the prescriber. In making tinctures, the ingredients should be reduced to a coarse powder; and the maceration be made in close vessels, exposed to a heat of about 80°, and frequently shaken. When completed, they must be filtered, and put away for use in close bottles. When the process of displacement is employed, great care must be taken, so that the substances treated may be, as far as possible, exhausted of their soluble principles, and a perfectly clear tincture be obtained. To those who are not familiar with the process, the plan of maceration is preferable.—(Ph. U. S.)

TINCTURA ABSINTHII COMPOSITA, *Compound Tincture of wormwood*, *Essentia absinthii composita seu amara*. (Absinth., artem. pontic., caryoph. aa \mathfrak{z} ss, sacch. \mathfrak{z} ij, alcohol Oss. Macerate for fifteen days. Ph. P.) Tonic, stomachic, vermifuge, and carminative. Dose, f. \mathfrak{z} ij to f. \mathfrak{z} ss.

TINCTURA ACACIÆ CATECHU, *T. catechu*—t. Acetatis ferri cum alcohol, see T. ferri acetatis—t. Acidi sulphurici, Sulphuricum acidum aromaticum.

TINCTURA ACONITI, *Tincture of Aconite*, (*aconit.* \mathfrak{z} iv, alcohol dilut. Oij. Macerate for 14 days, express, and filter through paper. Ph. U. S.) It may also be made by displacement. Ph. U. S.

TINCTURA ÆTHEREÆ CAMPHORATÆ, *Solutio camphoræ æthereæ*, *Liquor nervinus Bangii*, *Spiritus sulphurico-æthereus camphoratus*, *Naphtha vitrioli camphorata*. (Camphor. p. i. Æther. sulphuric, p. ii) Stimulant in atonic diseases, arthritic cardialgia and spasm. Dose, 20 to 30 drops in white wine.

TINCTURA ÆTHEREÆ FERRI, Alcohol (seu Tinctura) sulphurico-æthereus ferri—t. Alcoholica Chinæ composita, T. cinchonæ composita—t. Alcoholica corticum aurantium Whytii, Tinctura cinchonæ amara—t. Alexipharmaca Huxhami, Tinctura cinchonæ composita.

TINCTURA ALOËS, *T. Aloes Socotorina*, *Essentia Aloes*, *Alcohol cum Aloe perfoliata*, *Tincture of Aloes*. (Aloes, \mathfrak{z} ij, ext. glycyrrh. \mathfrak{z} ijj; aquæ, Oiss, alcohol, Oss. Macerate, for fourteen days, and filter. Ph. U. S.) Properties, those of aloes. Dose, f. \mathfrak{z} ss to f. \mathfrak{z} iss.

TINCTURA ALOËS ÆTHEREÆ, *Æthereal Tincture of Aloes*, *Tinctura aloes vitriolata*. (Aloes. Socot., myrrh, aa \mathfrak{z} iss, croci \mathfrak{z} ij, sp. ætheris sulph. Oj. Digest the myrrh in the ether for four days; then add the aloes and saffron Ph. E.) Stimulant and cathartic. Dose, f. \mathfrak{z} ij to f. \mathfrak{z} ij.

TINCTURA ALOËS COMPOSITA, *Elixir Proprietatis*, *E. aperitivum*, *Elixir Aloes*, *Tinctura Aloes cum Myrrhâ*, *T. Aloës et Myrrhæ*, (Ph. U. S.) *T. Aloes et Myrrhæ crocata*, *Elixir of long life*, *Compound Tincture of Aloes*. (F.) *Elixir de longue vie*, *Baume de vie de Lellèvre*. (Aloes, in pulv., \mathfrak{z} ijj, croci, \mathfrak{z} ij, Tinct. Myrrhæ, Oij.) Macerate for fourteen days, and filter. Purgative and stomachic. Dose, f. \mathfrak{z} ij to f. \mathfrak{z} ij.

Radcliffe's Elixir is formed of Aloes Socotr. \mathfrak{z} vj, cort. cinnam., rad. zedoar, aa \mathfrak{z} ss, rad. rhei \mathfrak{z} ij, coccinell. \mathfrak{z} ss, syrup. rhamni \mathfrak{z} ij, sp. tenuior, Oj, aquæ puræ f. \mathfrak{z} v.

TINCTURA ALOËS ET MYRRHÆ, *T. aloës composita*.

TINCTURA ALOËS ET MYRRHÆ CROCATÆ, *T. A. composita*—t. Aloes vitriolata, T. A. ætherea—t. Amara, T. gentianæ composita—t. Anomi repentis, T. Cardamomi—t. Anomi zingiberis, T. zingiberis.

TINCTURA ANGUSTURÆ, *Tincture of Angustura*. (Cort. cuspar. in pulv. crass. redact. \mathfrak{z} ij, sp. vin. ten. Oij. Digest. Ph. D.) Dose, f. \mathfrak{z} ij to f. \mathfrak{z} ij.

TINCTURA ARISTOLOCHIÆ SERPENTARIÆ, *T. serpentariæ*—t. Aromatica, T. cinnamomi composita—t. Aromatica ammoniata, Spiritus ammoniæ aromaticus.

TINCTURA ASAFETIDÆ, *T. Ferula Asafetida*, *Tincture of Asafetida*, *T. fetida*, *T. asafetida*, (*Asafetid.* \mathfrak{z} iv, sp. rect. Oij. Macerate for fourteen days, and filter. Dose, gth xv. to f. \mathfrak{z} ij.

TINCTURA ASAFETIDÆ AMMONIATA, Spiritus Ammoniaë fetidus.

TINCTURA AURANTII, *T. Corticis Aurantii*, *Tincture of Orange Peel*. (Aurant. cort. recent. \mathfrak{z} ijj, sp. rect. Oij. Digest for 14 days.) Stomachic. Used as an adjunct to stomachic draughts. Dose, f. \mathfrak{z} ss to f. \mathfrak{z} ij.

TINCTURA AUREÆ, Alcohol seu tinctura sulphurico-æthereus ferri.

TINCTURA BELLADONNÆ, *Tincture of Belladonna*, (*Belladonnæ*, \mathfrak{z} iv, alcohol dilut. Oij. Macerate for 14 days; express, and filter through paper. Ph. U. S.) It may, also, be prepared by displacement. Ph. U. S.

TINCTURA BENZOÏNI COMPOSITA, *Compound Tincture of Benzoin*, *T. Benzoes composita*, *Friar's Balsam*, *Verrain's Balsm*, *Wade's Drops*, *Jesuit's drops*, the *Commander's Balsam*, *Wound Balsam*, *Balsam for cuts*, *Balsamum Catholicum*, *B. Pericum*, *Balsanum traumaticum*, *Elixir traumaticum*. (Benzoin. \mathfrak{z} ijj. styrac. purif. \mathfrak{z} ij, tolu. \mathfrak{z} ij, aloes in pulv. \mathfrak{z} ss, alcohol. Oij. Macerate for 14 days and filter.) Stimulant. Used chiefly to wounds and ulcers.

The basis of TURLINGTON'S BALSAM OF LIFE, is the Compound Tincture of Benzoin. The following form is recommended by a committee of the Philadelphia College of Pharmacy:—(Alcohol. Oviiij, Benzoin. \mathfrak{z} xij, Styrac. liquid, \mathfrak{z} iv, Aloes Socotrin, \mathfrak{z} ij, Balsam Peruvian, \mathfrak{z} ij, Myrrhæ \mathfrak{z} ij, Rad. Angelic. \mathfrak{z} ss, Balsam Tolut., Ext. Glycyrrh. aa \mathfrak{z} iv. Digest for ten days, and strain.)

The ESSENCE OF COLTSFOOT consists of equal parts of the Compound Tincture of Benzoin and Balsam of Tolu, to which is added double the quantity of Rectified Spirit of Wine. It is sold as a pectoral.

TINCTURA CALUMBÆ, *T. Colombæ*, *T. Colombo*, *Tincture of Columba*, *Columbo Bitters*. (Calumb. rad. cont. \mathfrak{z} iv, alcohol dilut. Oij. Macerate for 14 days; express, and filter. Ph. U. S.) Dose, f. \mathfrak{z} ss to \mathfrak{z} iv. It may, also, be made by displacement. Ph. U. S.

TINCTURA CAMPHORÆ, Spiritus camphoræ.

TINCTURA CAMPHORÆ COMPOSITA, *T. Opii Camphorata*, *Compound Tincture of Camphor*, *Camphorated Tincture of Opium*, *Elixir Paregoricum*, *Paregoric Elixir*. (Opii, in pulv. Acid. Benzoic. aa \mathfrak{z} ij, ol. anisi, f. \mathfrak{z} ij, mellis despu-

mat. $\frac{3}{4}$ ij, Camphor. $\frac{3}{4}$ ij, alcohol. dilut. Oij. Macerate for 14 days, and filter through paper. Ph. U. S.) One fluidounce contains nearly gr. ij of opium. Anodyne. Dose, f $\frac{3}{4}$ ij to f $\frac{3}{4}$ ij.

Squire's Elixir, an empirical carminative preparation, is thus made, according to one formula. (Op $\frac{1}{2}$ ij, camphor. $\frac{3}{4}$ ij, coccinell $\frac{3}{4}$ ij, fœnicul. dulc. $\frac{3}{4}$ ij, tinct. serpent. Oj, sp. anis, cong. ij, aquæ Oj, urri musivi $\frac{3}{4}$ vj.)

TINCTURA CANTHARIDIS, T. C. Vesicatoriæ, T. Lytta, Tincture of Blistering Fly, T. of Spanish Fly, T. Meloes vesicatorii. (F.) Teinture rubéfiante. (Cantharid. cont. $\frac{3}{4}$ ij, alcohol. dilut. Oij. Macerate for 14 days; express, and filter.) It may, also, be prepared by displacement. Ph. U. S. Stimulant and diuretic, but not often used internally. Externally, stimulant. Dose, gr $\frac{1}{2}$ x.

Mathew's Injection, a once celebrated nostrum for fistula in ano, consisted wholly of a dilute Tincture of Cantharides.

TINCTURA CAPSICI, Tincture of Capsicum. (Capsic. $\frac{3}{4}$ ij, alcohol. dil. Oij. Macerate for 14 days, and filter. Ph. U. S.) It may, also, be prepared by displacement. Ph. U. S. Stimulant. Dose, f $\frac{3}{4}$ ss to $\frac{3}{4}$ ij.

TINCTURA CARDAMOMI, T. amo'ni repen'tis, Tincture of Cardamoms. (Cardam. cont. $\frac{3}{4}$ iv, alcohol. dilut. Oij. Macerate for 14 days, strain, and filter. Ph. U. S.) It may, also, be made by displacement. Ph. U. S. Use, the same as the seeds. Dose, f $\frac{3}{4}$ ij to f $\frac{3}{4}$ iv.

Solomon's Balm of Gilead, an empirical preparation, seems to be an aromatic tincture,—of which Cardamoms form a leading ingredient,—made with brandy. Some affirm that it contains cantharides.

TINCTURA CARDAMOMI COMPOSITA, Compound Tincture of Cardamoms, Stomach Tincture, Tincture Stomach'lica. (Card. sem., carui sem., cocci, aa $\frac{3}{4}$ ij, cinnam. cort. cont. $\frac{3}{4}$ iv, uvar. passar. demp'tis acinis $\frac{3}{4}$ iv, spirit. ten. Oij. Ph. L.) Stomachic and carminative. Dose f $\frac{3}{4}$ ij to f $\frac{3}{4}$ iv.

TINCTURA CARMINAT'VA SYLVII, Alcoolatum Carminutivum Sylvi, Carminative Elixir of Sylvius. (Rad. angelic. 4 p., rad. imperator., galang. aa 6 p., fol. rosmarin., majoran., rute, basilic. aa 48 p., baccar. laur. nobil., 12 p., sem. angelic., ligust. levist., anis. aa 16 p., zingib., nuc. moschat. aa, 6 p., cinnam. 12 p., caryoph., cort. limon. aa, 4 p. Add alcohol, 1500 p. Macerate and distil 1000 p. Ph. P.) A warm stomachic, carminative, &c. Dose, $\frac{3}{4}$ ss to $\frac{3}{4}$ ss.

TINCTURA CASCARILLÆ, T. Crotonis Eleutherie, Alcohol cum Crotonæ Cascarillâ, Tincture of Cascarella. (Cascarill. cort. cont. $\frac{3}{4}$ iv, sp. ten. Oij. Ph. L.) Dose, f $\frac{3}{4}$ ij to f $\frac{3}{4}$ ij.

TINCTURA CASTOREI, T. Castorei Rossici, Essentia Castorei, Alcohol castoridum, T. Castorei Canaden'sis, Tincture of Castor. (Castor cont. $\frac{3}{4}$ ij, alcohol. Oij. Macerate for 7 days, express, and filter.) Tonic and antispasmodic. Dose, gr $\frac{1}{2}$ xx to f $\frac{3}{4}$ ij, or more.

TINCTURA CASTOREI COMPOSITA, Compound Tincture of Castor. (Cust. $\frac{3}{4}$ ij, g. asafatid. $\frac{3}{4}$ ss, alcohol. ammoniat. Oj. Ph. E.) Antispasmodic. Dose, f $\frac{3}{4}$ ij to f $\frac{3}{4}$ iv. Called, also, Elixir fatidum, Tinctura castorei fatida seu fatida ammoniat'a.

TINCTURA CATECHU, Tinctura Japon'ica, T. Mimosa Catechu, T. Aca'cia Catechu, Tincture of Catechu. (Catech. $\frac{3}{4}$ ij, cinnam. contus $\frac{3}{4}$ ij, alcohol. dilut. Oij. Macerate for 14 days, ex-

press, and filter. Ph. U. S.) Astringent. Dose, f $\frac{3}{4}$ ij to f $\frac{3}{4}$ ij.

The CONCENTRATED SOLUTION OF CHARCOAL, sold for cleaning the teeth, seems to be little more than the tincture of catechu.

TINCTURA CICUTÆ, T. conii maculati.

TINCTURA CINCHONÆ, Tincture of Cinchona, T. Corticis Peruvia'ni Simplex, T. Cort. Peruviani, Tincture of Bark. (Cinchon. cont. $\frac{3}{4}$ vi, alcohol. dilut. Oij. Macerate for 14 days, express, and filter through paper. Ph. U. S.) It may, also, be made by displacement. Ph. U. S.) Dose, f $\frac{3}{4}$ ij to $\frac{3}{4}$ iv or more.

TINCTURA CINCHONÆ AMA'RA, Elixir antihypochondriacum, E. rob'orans Whyttii, E. Whyttii, Essentia Corticis Peruvia'ni Compasita, Tinctura alcohol'ica corticum aurantiacum Whyttii, T. Kinkina' ama'ra, Elixir stomachicus spirital'sus. (Cinch p. viij, Gentian. Rad. Cort. Aurant. 3 p. Alcohol (300) 96 p. Digest.) Dose, one or two teaspoonfuls.

TINCTURA CINCHONÆ AMMONIAT'A, T. Corticis Peruvia'ni volut'ilis, Ammoniated Tincture of Bark, Volatile Tincture of Bark. (Cinchon. lancifol. cort. cont. $\frac{3}{4}$ iv, sp. ammon. aromat. Oij. Ph. L.) In dyspepsy, combined with acidity and languor.

TINCTURA CINCHONÆ ÆTHEREA COMPOSITA, T. Kina Kina ætherea compos'ita, Elixirium Antisepticum Doctores Chaussier, Chaussier's Antiseptic Elixir. (Cinchon. officin. $\frac{3}{4}$ ij, cascarill. $\frac{3}{4}$ ss, cinnam. $\frac{3}{4}$ ij, croci $\frac{3}{4}$ ss, sacch. alb. $\frac{3}{4}$ xxxvij. Put these bruised into a mattress, and add vin. alb. Hispanic. vel vin. muscat., alcohol. aa Oj. Macerate for two days, and add sulphuric ether f $\frac{3}{4}$ ss. Ph. P.) Tonic, stimulant, and antiseptic. Dose, f $\frac{3}{4}$ ss to f $\frac{3}{4}$ ij.

TINCTURA CINCHONÆ COMPOSITA, Compound Tincture of Cinchona or Bark, Huxham's Tincture of Bark, T. Corticis Peruvia'ni Compos'ita, T. febrifuga Doct'ris Huxhami, Essentia Chinae, E. Corticis Peruviani Alexipharmaca Huxhami, Essentia antiseptica Huxhami, Tinctura Alexipharmaca Huxhami, Tinctura Alcohol'ica Chinae Compos'ita. (Cinchon. cont. $\frac{3}{4}$ ij, aurant. cort. cont. $\frac{3}{4}$ ss, serpent. cont. $\frac{3}{4}$ ij, croci, santal. aa $\frac{3}{4}$ ij, alcohol. dilut. f $\frac{3}{4}$ xxx. Macerate for 14 days, express, and filter. Ph. U. S.) It may, also, be made by displacement. Ph. U. S. More grateful than the simple tincture. Dose, f $\frac{3}{4}$ ij to f $\frac{3}{4}$ ij.

TINCTURA CINNAMOMI, Tincture of Cinnamon, Essentia Cinnamomi, T. Lauri Cinnamomi, (Cinnam. cont. $\frac{3}{4}$ ij, alcohol. dilut. Oij. Macerate for 14 days, express, and filter. Ph. U. S.) It may, also, be prepared by displacement. Ph. U. S. Stomachic. Dose, f $\frac{3}{4}$ ij to f $\frac{3}{4}$ ij.

TINCTURA CINNAMOMI COMPOSITA, Compound Tincture of Cinnamon, Tinctura Aromatica, Essentia Aromatica, Alcohol cum Aromatibus Compos'itus, Eau de Bonferme ou d'Armagnac. (Cinnam. cont. $\frac{3}{4}$ ij, cardam. cont. $\frac{3}{4}$ ss, zingib. cont. $\frac{3}{4}$ ij, alcohol. dilut. Oij. Macerate for 14 days, express, and filter. Ph. U. S.) It may, also, be prepared by displacement. Ph. U. S. Use, same as the last. Dose, f $\frac{3}{4}$ ij to f $\frac{3}{4}$ ij.

TINCTURA DE COCHLEARIIS, Alcoolatum de Cochleariis, A. antiscorb'iticum. (Fol. cochlear. recent. 2500 p., rad. armoraciae, 230 p., alcohol. (220 to 320 Be.) 3000 p., distil off 2000 p. Ph. P.) Antiscorb'itic. Dose, f $\frac{3}{4}$ ij to f $\frac{3}{4}$ ij.

TINCTURA COLCHICI, T. C. Seminis, (Ph. U. S.) Tincture of Colchicum Seed. (Colchic. sem.

cont. Ziv , alcohol. dilut. Oij. Macerate for 14 days, express, and filter. *Ph. U. S.*) It may, also, be prepared by displacement. Dose, ten to sixty drops.

TINCTURA COLCHICI SEMINIS, T. colchici.

TINCTURA COLOMBÆ, T. Calumbæ.

TINCTURA CONII, T. C. *Maculati*, T. *Cicutæ*, Tincture of Hemlock. (*Conii fol.* Ziv , alcohol. dil. Oij. Macerate for 14 days, express, and filter. *Ph. U. S.*) It may, also, be made by displacement. *Ph. U. S.* Use;—the same as that of the leaves.

TINCTURA CONII MACULATI, T. conii.

TINCTURA CONVULVULI JALAPÆ, T. jalapii—t. Corticis aurantii, T. aurantii—t. Corticis Peruviani composita, T. cinchonæ comp.—t. Corticis Peruviani simplex, T. cinchonæ—t. Corticis Peruviani volatilis, T. cinchonæ ammoniata.

TINCTURA CROCI SATI'VA, T. Croci, Tincture of Saffron. (*Croci Angl.* cont. Zj , alcohol. dilut. Zxv . *Ph. E.*) Slightly stomachic (?) Dose, f. Zj to f. Zij .

TINCTURA DE CROCO COMPOSITA, *Elizir'ium de Garus, Alcoholatum de Croco Compositum, Compound Tincture of Saffron, Elizir of Garus.* (*Aloes Socotr.* 320 p., myrrh. 64 p., croci 32 p., cinnam., nuc. moschat., caryoph. aa, 16 p., alcohol. 1000 p., aq. flor. aurant. 5000 p. Digest for two days; distil 4000 p. and add syrup of capillaire, 5000 p. *Ph. P.*) Aromatic, cordial, stomachic. It is, also, called *Elizir cordiale et stomachicum*, and *E. anticol'icum crocatum*.

TINCTURA CROTONIS ELEUTHERIÆ, T. cascarillæ.

TINCTURA CUBEÆ, Tincture of Cubebs. (*Cubeb.* cont. Ziv , alcohol. dilut. Oij. Macerate for 14 days, express, and filter. *Ph. U. S.*) It may, also, be prepared by displacement. *Ph. U. S.* Dose, one or two fluidrachms.

TINCTURA DIGITALIS, Tincture of Digitalis, T. *Digitalis purpureæ*. (*Digital.* Ziv , spirit. ten. Oij. Macerate for 14 days, express, and filter.) It may, also, be prepared by displacement. *Ph. U. S.* Use, same as that of the leaves. Dose, gtt. x.

TINCTURA FEBRIFUGA DOCTORIS HUXHAMI, T. cinchonæ composita.

TINCTURA FERRI ACETAT'IS, Tincture of Acetate of Iron. (*Kali acetat.* Zij , sulph. ferri Zj , sp. rectif. Oij. Rub the acetate and sulphate into a soft mass. Dry and rub with the spirit. Digest for 7 days, and pour off. *Ph. D.*) Tonic and astringent. Dose, gtt. xx. to f. Zj . The Dublin college directs a *Tinctura Acetatis Ferri cum Alcohole*, which differs from the other, in having half the quantity, only, of the *Acetate of Potass*.

TINCTURA FERRI AMMONIATA, Tincture of Ammoniated Iron, T. *Ferri Ammoniacalis*, T. *Florum martialis*, T. *Martis Mynsichti*. (*Ferri ammon.* Ziv , sp. ten. Oj. *Ph. L.*) Use—same as that of the ammoniated iron. Dose, f. Zss to f. Zij .

TINCTURA FERRI CHLORIDI, T. *Ferri muriatis*.

TINCTURA FERRI MURIAT'IS, T. *Ferri chloridi*, (*Ph. U. S.*) Tincture of Muriate of Iron, T. *Martis in Spiritu Salis*, T. *M. cum Spiritu Salis*, T. *Ferri Muriati*, Tincture of Steel, *Alcohol ferratus*. (*Ferri subcarb.* lbss., acid muriat. Oj, alcohol. Oij. Add the acid to the subcarbonate in a glass vessel, and shake during three days. Pour off and add the spirit. *Ph. U. S.*) Tonic and styptic. Dose, g't. x to xx.

A solution of nitrate of iron has been recently recommended in chronic diarrhœa and dysentery. Its virtues exactly resemble those of the muriate of iron.

The *Antivenereal Drops*, at one time so celebrated at Amsterdam, were examined by Scheele, and found to be a tincture of muriate of iron and corrosive sublimate.

TINCTURA FERULÆ ASAFETIDÆ, T. *asafetidæ*—t. *Florum martialis*, T. *ferri ammoniata*—t. *Fœtida*, T. *asafetidæ*—t. *Fœtida ammoniata*, T. *castorei composita*—t. *Fuliginis*, see *Fuligo*.

TINCTURA GAL'BANI, Tincture of Galbanum. (*Galb.* Zij , sp. tenuior. Oij. *Ph. D.*) Stimulant and antispasmodic. Dose, f. Zj to f. Zij .

TINCTURA GALLA'RUM, T. *Gallæ*, Tincture of galls. (*Gall. contus.* Ziv , alcohol. dilut. Oij. Macerate for 14 days, express, and filter. *Ph. U. S.*) It may, also, be prepared by displacement. Astringent. Dose, f. Zj to Zij .

TINCTURA GENTIANÆ COMPOSITA, Compound Tincture of Gentian, *Tinct. Ama'ra, Spirit Bitters, Elizir Stomachicum*. (*Rad. gent. concis.* Zij , aurant. cort. exsicc. Zj , cardam. sem. cont. Zss , spirit tenuior. Oij. Macerate for 14 days, express, and filter. It may, likewise, be prepared by displacement. *Ph. U. S.* Tonic and stomachic. Dose, f. Zj to f. Zij .

BRODUM'S NERVOUS CORDIAL consists of the Tinctures of Gentian, Columba, Cardamom, and Bark, with the Compound Spirit of Lavender, and Wine of Iron.

STOUGHTON'S ELIX'IR is a compound tincture of gentian. The *Elizir'ium Doct'oris Stoughton* seu *Tinctura Amara* of the Parisian Codex is prepared as follows:—*Absinth. summit.* exsicc., *Teucri chamædrys*, *Rad. gentian.*, cort. aurant. aa Zvj , cascarillæ Zj , rhei Zss , aloes socotr. Zj , alcohol. Oij.) Digest.

TINCTURA GUA'IACI, T. G. *Officinalis*, Tincture of Guaiacum. (*Guaia.* lbss., sp. rect. Oij. Macerate for 14 days, and filter.) Stimulant and sudorific. Used especially in rheumatic and arthritic cases. Nearly the same as *Hill's Essence of Bardana*.

TINCTURA GUA'IACI AMMONIATA, Ammoniated Tincture of Guaiacum, T. *Guaia'ci'na Volatilis*, *Elizir Guaiaci Volatilis*, *Alcohol cum Guaiaco officinali ammoniat'us*, *Alcohol ammo'niæ et Guaiaci*, T. *Gua'iaci*, P. L. 1788, *Volatile Tincture of Guaiacum*. (*Guaia.* cont. Ziv , sp. ammon. arom. Oiss. Macerate for 14 days, and filter.) Properties same as the last. Dose, f. Zj to f. Zij .

HATFIELD'S TINCTURE—a nostrum—consists of Guaiacum and Soap aa Zij , rectified spirit, Oiss.

TINCTURA HELLEB'ORI, T. H. *Nigri*, Tincture of Black Hellebore, T. *Melamp'dii*. (*Rad. helleb. nigr.* cont. Ziv , sp. tenuior. Oij. Macerate for 14 days, express and filter.) It may also be prepared by displacement.—*Ph. U. S.* Dose, f. Zss to f. Zj .

TINCTURA HIERA, Vinum aloes.

TINCTURA HU'MULI, Tincture of Hops. (*Humuli strobil.* Zv , sp. tenuior. Oij.) Tonic and sedative. Dose, f. Zss to f. Zij .

TINCTURA HYOSCY'AMI, T. *Hyoscyami nigri*, Tincture of Henbane. (*Hyoscyam. fol.* Ziv , sp. ten. Oij. Macerate for 14 days, express and filter.) It may also be prepared by displacement.—*Ph. U. S.* Narcotic, anodyne. Dose, gtt. xx to f. Zj .

TINCTURA IO'DINI, *Alcohol Io'dii, Tincture of Iodine.* (Iodin. $\frac{3}{4}$, alcohol. Oj. Dissolve. Ph. U. S.) The tincture spoils by keeping, or at least, deposits the iodine. It has been much used in goitre, &c. Dose, ten drops, three times a day.

TINCTURA IODINI COMPOSITA, *Compound Tincture of Iodine.* (Iodin. $\frac{5}{8}$ ss; Potassii Iodid. $\frac{3}{4}$ J. Alcohol. Oj. Dissolve—Ph. U. S.) Dose 10 to 30 drops.

TINCTURA JALAP'II, *T. Jalapæ, T. Convolvuli Jalapæ, Tincture of Jalap, Val'iga.* (Jalap. rad. cont. $\frac{3}{4}$ vij, sp. ten. Oij. Macerate for 14 days, express, and filter—Ph. U. S.) It may also be made by displacement—Ph. U. S. Cathartic. Dose, f. $\frac{3}{4}$ to f. $\frac{5}{4}$.

TINCTURA JALAP'II COMPOSITA, *Elixir Jalap'pæ Compositum, Elixir purgans, Essentia catholica purgans Rothii, Elixir anthelminticum Succorum.* Eau de vie Allemande, (Jalap. lbss, Scammon $\frac{3}{4}$ J, Alcohol, (22 $\frac{1}{2}$) Ovj. Macerate for eight days. Ph. P.) Dose, 60 to 100 drops.

TINCTURA JAPONICA, *T. catechu—T. Kinæ kinæ ætherea composita—T. cinchonæ ætherea composita—T. Kinkinæ amara, T. cinchonæ amara.*

TINCTURA KINO, *Tincture of Kino.* (Kino contrit. $\frac{3}{4}$ ij, sp. ten. Oij. Ph. L. E. & D.) Astringent.) Dose, f. $\frac{3}{4}$ to f. $\frac{5}{4}$.

TINCTURA KRAMERIE, *Tincture of Rhatany* (Kramer. in pulv. $\frac{3}{4}$ vj; alcohol. dilut. Oij. Macerate for 14 days, express, and filter. Ph. U. S.) It may also be prepared by displacement. Ph. U. S. Dose, f. $\frac{3}{4}$ to f. $\frac{5}{4}$.

TINCTURA LAURI CINNAMOMI, *T. cinnamomi—t. Lavandulæ composita, Spiritus lavand. comp.—t. Lyttæ, T. cantharidis—t. Martis Glauberi, see Ferrum tartarizatum—t. Martis in spiritu salis, Tinctura ferri Muriatis—t. Martis Mynsichti, T. ferri ammoniata—t. Martis vinosa, Vinum ferri—t. Melampodii, T. hellebori nigri—t. Meloes vesicatorii, T. cantharidis—t. Metallorum, Lilium Paracelsi—t. Mimosæ catechu, T. catechu.*

TINCTURA LOBELIE, *Tincture of Lobelia.* (Lobel. $\frac{3}{4}$ v; alcohol. dilut. Oij. Macerate for 14 days, express, and filter. Ph. U. S.) It may also be prepared by displacement. Ph. U. S. Dose f. $\frac{3}{4}$ to f. $\frac{5}{4}$.

TINCTURA LUPULINÆ, *Tincture of Lupuline.* (Lupulin. $\frac{3}{4}$ v; alcohol. Oij. Macerate for 14 days, and filter. Ph. U. S.) Dose f. $\frac{3}{4}$ to f. $\frac{5}{4}$.

TINCTURA MOSCHI, *Tincture of Musk, Essence of Musk.* (Mosch. in pulv. redact. $\frac{3}{4}$ ij, sp. vini rect. Oj.) Dose, f. $\frac{3}{4}$ to f. $\frac{5}{4}$.

TINCTURA MYRRHÆ, *Tincture of Myrrh, Simple Tincture of Myrrh.* (Myrrhæ contusæ $\frac{3}{4}$ v, alcohol Oij. Macerate for 14 days, and filter. Ph. U. S.) Tonic, deobstruent, antiseptic, and detergent. It is chiefly used in gargles, and applied to foul ulcers, spongy gums, &c.

HUDSON'S PRESERVATIVE FOR THE TEETH AND GUMS consists of Tinct. myrrh, tinct. ciuch., aq. cinnum. aa $\frac{3}{4}$ ij, eau d'arquebusade, $\frac{3}{4}$ J, pulv. gum. Arab. $\frac{3}{8}$ ss. M.

TINCTURA NERVINA BESTUCHEFFI, *Tinctura seu alcohol sulphurico-æthereus ferri—t. Nervina Halensis, Tinctura seu alcohol sulphurico-æthereus ferri—t. Nervino-tonica Lamotte's, Alcohol seu tinctura sulphurico-æthereus ferri.*

TINCTURA NUCIS VOMICÆ, *Tincture of Nux Vomica.* (Alcohol. S. G. .837, f. $\frac{3}{4}$ J. Dry Ex-

tract of Nux Vomica, 3 gr.) Dose, grt. v to xxx in cases where the nux vomica is indicated.

TINCTURA OLEI MENTHÆ PIPERITÆ, *Tincture of Oil of Peppermint, Essence of Peppermint* (ol. menthæ piperitæ, f. $\frac{3}{4}$ ij, alcohol Oj. Dissolve. Ph. U. S.) Dose, 5 drops as a carminative. The TINCTURA OLEI MENTHÆ VIRIDIS, *Tincture of Spearmint, Essence of Spearmint* is made in the same manner. Ph. U. S.

TINCTURA OPII, *Tincture of Opium, Liquid Laudanum, Theriaca cales'tis, Alcohol cum Opio, Tinctura Thebaïca, Tinctura Sedat'va.* (Opii contriti $\frac{3}{4}$ ss, alcohol. dilut. Oij. Macerate for 14 days, express, and filter. Ph. U. S.) Nineteen minims contain about one grain of opium. Properties, those of opium. Dose, grt. xx to lx and more. By macerating the dregs remaining after making the Tinctura Opii in a solution of Tartaric Acid, a solution is obtained, which is devoid of the exciting and constipating properties of the tincture of opium. Gray calls it *Haden's Liquor Opii Sedat'vus.*

TINCTURA OPII ACETA'TA, *Acetated Tincture of Opium* (Opii $\frac{3}{4}$ ij; aceti. f. $\frac{3}{4}$ xij; alcohol. Oss. Rub the opium with the vinegar; add the alcohol, and having macerated for 14 days, express, and filter. Ph. U. S.) Twenty drops are equivalent to a grain of opium.

TINCTURA OPII AMMONIATA, *Ammoniated Tincture of Opium, Edinburgh Paregoric Elixir.* (Flor. benz., croci aa $\frac{3}{4}$ ij, opii $\frac{3}{4}$ ij, ol. anisi $\frac{3}{8}$ ss, alcohol. ammoniat. f. $\frac{3}{4}$ xvj. digest. Ph. E.) f. $\frac{3}{4}$ J. contains one grain of opium. Used like the Tinctura Camphoræ Composita.

TINCTURA OPII CAMPHORATA, *T. camphoræ composita—t. Plumbosa, Liquor plumbi subacetatis dilutus.*

TINCTURA QUASSIÆ, *T. Quassiæ excel'sæ, Tincture of Quassia.* (Quassiæ rasæ $\frac{3}{4}$ ij, alcohol dilut. Oij. Macerate for 14 days, express, and filter. Ph. U. S.) It may also be prepared by displacement. Ph. U. S. Tonic. Dose, f. $\frac{3}{4}$ to $\frac{5}{4}$.

TINCTURA QUINIÆ, *Tincture of Quinia.* (Sulphate of Quinia, gr. vj, alcohol, (.847) f. $\frac{3}{4}$ J. M.) Dose, f. $\frac{3}{4}$ to $\frac{5}{4}$, in the day.

A TINCTURA CINCHONIÆ may be made in a similar manner.

TINCTURA RHABARBARI, *T. rhej—t. Rhabarbari composita, T. rhej—t. Rhabarbari vinosa, Vinum rhej palmati.*

TINCTURA RHEI, *T. Rhabarb'ari, T. Rhabarbari spirital'isa, T. Rhei, Tincture of Rhubarb, T. Rhei palmati.* (Rhei. rad. concis. $\frac{3}{4}$ ij, cardam. cont. $\frac{3}{8}$ ss, alcohol. dilut. Oij. Macerate for 14 days, express, and filter. It may also be prepared by displacement. Ph. U. S.) Stomachic or purgative, according to the dose employed: f. $\frac{3}{4}$ to $\frac{5}{4}$ as stomachic; f. $\frac{5}{4}$ to $\frac{5}{4}$ as a purgative.

TINCTURA RHEI COMPOSITA, *T. Rhabarbari composita, Compound Tincture of Rhubarb.* (Rhei rad. concis. $\frac{3}{4}$ ij, glycyrrhiz. rad. cont. $\frac{3}{8}$ ss, zingib. rad. concis., croci stigmat. aa $\frac{3}{4}$ ij, aquæ, f. $\frac{3}{4}$ xij, sp. ten. Oj. Ph. L.) Properties same as the last.

TINCTURA RHEI ET AL'OE'S, *Tincture of Rhubarb and Aloes, Elixir sacrum.* (Rad. rhei concis. $\frac{3}{4}$ xi, aloes $\frac{3}{4}$ vj, sen. cardam. cont. $\frac{3}{8}$ ss, alcohol dilut. Oij. Macerate for 14 days, express, and filter. Ph. U. S.) Properties like the last.

RYMER'S CARDIAC TINCTURE consists of an

infusion of Capsicum, Camphor, Cardamom seeds, Rhubarb, Aloes and Castor in Proof Spirit, with a very small quantity of Sulphuric Acid.

TINCTURA RHEI ET GENTIANÆ, *Tincture of Rhubarb with Gentian*, *Tinctura Rhei Amara*. (Rhei cont. $\frac{3}{4}$ ij, gentian. cont. $\frac{3}{4}$ ss, alcoholis diluti Oij. Macerate for 14 days, express, and filter. Ph. U. S.) It may also be prepared by displacement. Ph. U. S. Properties same as the last.

TINCTURA RHEJ ET SENNÆ, *Tincture of Rhubarb and Senna*, *Warner's Gout Cordial*. (Rhej. cont. $\frac{3}{4}$ j, sennæ $\frac{3}{4}$ ij, coriandr. cont., fœnicul. sem. cont. aa $\frac{3}{4}$ j, santal. rasur. $\frac{3}{4}$ j, croci. glycyrrhiz. rad. aa $\frac{3}{4}$ ss, uvar passur., acinis exemptis, lßss, aleohol. dilut. Oij. Macerate for 14 days, express, and filter. Ph. U. S.) Dose, f. $\frac{3}{4}$ ss to f. $\frac{3}{4}$ j.

TINCTURA RHÆJ, T. rhej—t. Rhœj amara, T. rhej et gentianæ—t. Sacra, Vinum aloes—t. Saponis camphorata, Linimentum saponis compositum—t. Saponis et opii, Linimentum saponis et opii—t. Sedativa, T. opii.

TINCTURA SANGUINARIÆ, *Tincture of Blood-root*. (Sanguinar. cont. $\frac{3}{4}$ iv, alcohol. dilut. Oij. Macerate for 14 days, express, and filter. Ph. U. S.) It may also be prepared by displacement. Ph. U. S. Dose, 30 to 60 drops.

TINCTURA SAPONIS CAMPHORATA, Linimentum saponis.

TINCTURA SCILLÆ, *Tincture of Squill*. (Scillæ exsiccata. $\frac{3}{4}$ iv, alcohol. dilut. Oij. Macerate for 14 days, express, and filter. It may also be made by displacement. Ph. U. S.) Properties, same as those of the bulb. Dose, gtt. xv to lx.

TINCTURA SENNÆ, T. Sennæ Composita, *Elixir Salutis*, *Daffy's Elixir*, *Tincture of Senna*. (Sennæ fol. $\frac{3}{4}$ ij, Carui sem. cont. $\frac{3}{4}$ ij, cardam. sem. cont. $\frac{3}{4}$ j, uvarum passarum demptis acinis, $\frac{3}{4}$ iv, sp. ten. Oij. Ph. L. & D.) Stomachic, carminative, and cathartic. Dose, f. $\frac{3}{4}$ j to f. $\frac{3}{4}$ j.

TINCTURA SENNÆ ET JALAPÆ, *Tincture of Senna and Jalap*. (Sennæ $\frac{3}{4}$ ij, jalap. pulv. $\frac{3}{4}$ j, coriandr. cont., carui cont. aa $\frac{3}{4}$ ss, cardam. cont. $\frac{3}{4}$ j, sacch. $\frac{3}{4}$ iv, alcohol. dilut. Oij. Macerate for 14 days, express, and filter. Ph. U. S.) It may also be prepared by displacement. Ph. U. S. Dose, f. $\frac{3}{4}$ j to f. $\frac{3}{4}$ j.

TINCTURA SERPENTARIÆ, T. S. Virginia'næ, T. Aristolochiæ Serpentariæ, *Tincture of Snake-root*. (Rad. serpent. $\frac{3}{4}$ ij, sp. ten. Oij. Macerate for 14 days, express, and filter. Ph. U. S.) It may also be prepared by displacement. Ph. U. S. Tonic. Dose, f. $\frac{3}{4}$ ss to f. $\frac{3}{4}$ j.

TINCTURA STOMACHICA, T. cardamomi composita.

TINCTURA STRAMONII, *Tincture of Stramonium*. (Stramon. sem. cont. $\frac{3}{4}$ iv, alcohol. dilut. Oij. Macerate for 14 days, express, and filter. Ph. U. S.) It may also be prepared by displacement. Ph. U. S. Dose, ten to twenty minims.

TINCTURA STRYCHNIÆ, *Tincture of Strychnia*. (Alcohol. S. G. .837. Oj, strychnia, gr. ij.) Dose, 6 drops to 24. Properties, those of the strychnine.

TINCTURA SEU ALCOHOL SULPHURICO-ÆTHEREUS FERRI, *Gutta nervina*, *Liquor Anodynus Martialis*, *Alcohol athereus ferratus*, *Naphtha Vitrioli Martialis*, *Solutio Muriatis ferriæ athereæ*, *Spiritus Sulphurico-æthereus Martialis*, *Tinctura nervina Halen'sis*, *T. tonico-nervina Halen'sis*, *Tinctura aurea*, *T. nervina Bestuchefski*, *T. nervino-tonica Lamotte's*, T.

æthereæ ferri, *Æther Martialis*, *De La Motte's Golden Drops*, *Bestucheff's Nervous Tincture*, *Elixir d'or de M. le Général De La Motte*. An ethereal solution of muriate of iron. It is much used in gout, hypochondriasis, &c.

TINCTURA SULPHURIS VOLATILIS, *Liquor fumans Boyllii*—t. Thebaica, T. opii—t. Thebaica, Vinum opii.

TINCTURA TOLUIFERÆ BAL'SAMI, *Tincture of Balsam of Tolu*, T. Bal'sami Toluta'ni. T. Toluta'ni, (Ph. U. S.) (Balsam. Toluif. $\frac{3}{4}$ ss, alcohol. lbj.) Reputed to be expectorant and corroborant. Dose, f. $\frac{3}{4}$ ss to f. $\frac{3}{4}$ j or more.

TINCTURA TONICA NERVINA HALENSIS, Alcohol seu Tinctura sulphurico-æthereus ferri.

TINCTURA VALERIANÆ, *Tincture of Valerian*. (Valerian. cont. $\frac{3}{4}$ iv, alcohol. dilut. Oij. Macerate for 14 days, express, and strain. It may also be prepared by displacement. Ph. U. S.) Stimulant and antispasmodic. Dose, f. $\frac{3}{4}$ ss to $\frac{3}{4}$ j.

TINCTURA VALERIANÆ AMMONIATA, *Ammoniated or Volatile Tincture of Valerian*, T. Valerianæ Volatilis. (Valerianæ cont. $\frac{3}{4}$ iv, sp. ammon. arom. Oij. Macerate for 14 days, express, and filter. It may also be made by displacement. Ph. U. S.) Like the former. Dose, f. $\frac{3}{4}$ ss to f. $\frac{3}{4}$ j.

TINCTURA VERA'TRI, T. Veratri albi, *Tincture of White Hellebore*. (Rad. veratri. alb. cont. $\frac{3}{4}$ vij, alcohol. dilut. Oijss. Ph. E.) Emetic and cathartic; but not very manageable. Dose, gtt. v to x.

TINCTURA ZINGIBERIS, T. Amo'ni Zingiberis, *Tincture of Ginger*. (Zingib. cont. $\frac{3}{4}$ vij, alcohol. Oij. Macerate for 14 days, express, and filter. It may also be made by displacement. Ph. U. S.) Stimulant and carminative. Dose, f. $\frac{3}{4}$ ss to $\frac{3}{4}$ j.

TINCTURE OF ACETATE OF IRON, Tinctura ferri—t. of Aconite, Tinctura aconiti t. of Balsam of Tolu, Tinctura toluiferæ balsami—t. of Bark, Tinctura cinchonæ—t. of Bark, ammoniated, Tinctura cinchonæ ammoniata—t. of Bark, compound, Tinctura cinchonæ composita—t. of Bark, Huxham's, Tinctura cinchonæ composita—t. of Bark, volatile, Tinctura cinchonæ ammoniata—t. of Belladonna, Tinctura belladonnæ—t. of Blistering Fly, Tinctura cantharidis—t. Cardiac, Rymer's, Tinctura rhej et aloes—t. of Colchicum seeds, Tinctura colchici—t. of Cubeb, Tinctura cubebæ—t. of Galls, Tinctura gallarum—t. of Ginger, Tinctura zingiberis—t. for the Gout, Dr. Wilson's, see Colchicum autumnale—t. Hatfield's, see Tinctura guaiaci ammoniata—t. of Hellebore, white, Tinctura veratri—t. of Hemlock, Tinctura conii maculati—t. of Henbane, Tinctura hyoscyami—t. of Hops, Tinctura humuli—t. of Iodine, compound, Tinctura iodini composita—t. of Iron, ammoniated, Tinctura ferri ammoniata—t. of Iron, muriated, Tinctura ferri muriatis—t. of Lobelia, Tinctura lobeliæ—t. of Ludwig, see Ferrum tartarizatum—t. of Lupuline, Tinctura lupulinæ—t. of Musk, Tinctura moschi—t. TINKLING, METALLIC, Tintement métallique.

TINNIMENTUM METALLICUM, Tintement métallique.

TINNITUS AURIUM, *Paracusis imaginaria*, *Susurrus*, *Syrrigmus*, *Syringmos*, *Sibilus*, *S. clangosus*, *Strepitus aurium*, *Echos*, *Enechema*, *Bombus*, 'ringing of the ears,' from *tinare*, 'to ring.' (F.) *Tintement*, *Tintouin*. An imaginary sound, like the ringing of a bell, the noise of wind, the murmur of water, &c., heard in health and in sickness. It is, often, an accompaniment of cerebral disorder.

TINTEMENT, Tinnitus aurium—t. *Bullaïre*, *T. métallique*.

TINTEMENT MÉTALLIQUE, (F.) *Tintement bullaïre*, *Tinnimentum metallicum*, *Metallic Respiration*, *Metallic Voice*, *Metallic Tinkling*. A particular noise, heard by the stethoscope when applied to the chest, and which, according to Laënnec, resembles that caused by striking metal, glass, or porcelain, with a pin; but which is, perhaps, more like the sound of the keys of a musical snuff box. The *tintement métallique* or *metallic tinkling* is heard on causing the patient to speak or breathe; but is more distinct when he coughs. When the phenomenon is not so strongly marked it produces only the *metallic resonance*. The 'metallic tinkling' is a pathognomonic symptom of a communication between the bronchia and cavity of the chest; in other words, of *Pneumothorax*.

TINTINNABULUM, Uvula.

TINTOUIN, Tinnitus aurium.

TIPSARIA, Decoction hordei.

TIRE-BALLE, Forceps (bullet)

TIRE-FOND, (F.) A surgical instrument, formerly used to elevate the piece of bone sawn off by the trephine.

TIRE-PUS, Pyulcon.

TIRE-TÊTE, (F.) A name given to different instruments used for extracting the head of the child when left in the uterus, and in certain cases of difficult labour. The crotchet (q. v.) is one of those, as well as the *Tire-tête à bascule* of Levret, &c.

TISANE, *Pisa'na* or *Pissa'na*, *Plisane*, from *πιττανη*, 'barley.' A name given to aqueous medicines, containing but little, if any, medicinal agent. The ancients gave the name particularly to the decoction of barley.

TISANE COMMUNE, Decoction hordei.

TISSU, Tissue—t. *Accidentel*, see *Accidental*—t. *Caverneux*, Cavernous texture—t. *Celluleux*, *des os*, *Cancelli*.

TISSUE, *Textus*, (F.) *Tissu*. By this term, in anatomy, is meant the various parts, which, by their union, form the organs; and are, as it were, their anatomical elements. General anatomy is the anatomy of the tissues, which are the seat of the investigations of the pathological anatomist. The best division, indeed, of diseases would be according to the tissues mainly implicated. For the elementary Tissues, see *Fibre*. The compound tissues, which, by associating or combining variously, form every organ of the body, have been variously classed: but every division is imperfect and liable to objections. The following, by Messrs. Todd and Bowman, is one of the most recent.

TABULAR VIEW OF THE TISSUES OF THE HUMAN BODY.

Examples.

- | | |
|--|---|
| 1. Simple membrane, homogeneous, or nearly so, employed alone, or in the formation of compound membranes. | Posterior layer of the cornea.—Capsule of the lens.—Sarcolemma of muscle, &c. |
| 2. Filamentous tissues, the elements of which are real or apparent filaments. | White and yellow fibrous tissues.—Areolar tissue. |
| 3. Compound membranes, composed of simple membrane, and a layer of cells of various forms, epithelium or epidermis, or of areolar tissue and epithelium. | Mucous membrane.—Skin.—True or secreting glands.—Serosa and synovial membranes. |
| 4. Tissues which retain the primitive cellular structure as their permanent character. | Adipose tissue.—Cartilage.—Gray nervous matter. |
| 5. Sclerous or hard tissue. | Bone.—Teeth. |
| a. Compound tissues. | |
| a. Composed of tubes of homogeneous membrane, containing a peculiar substance. | Muscle.—Nerve. |
| b. Composed of white fibrous tissues and cartilage. | Fibro-cartilage. |

ACCIDENTAL OR ADVENTITIOUS TISSUES consist of every substance—foreign to the primitive organization of the economy, but yet organized and living—which may be developed in the anterior or at the surface of organs. Laënnec divides the accidental tissues into two sections. 1. Those that resemble others in the animal economy, or *analogous accidental Tissues*; and, 2. Those that have nothing analogous in the body, and which are always the result of a morbid process—the *heterologous* or *heteroclite accidental tissues*. To the first class belong,—ossifications; accidental fibrous, fibro-cartilaginous, cartilaginous, cellular, and corneous tissues; hairs; the serous membranes of certain encysted tumours; the mucous membranes of fistulous canals, and accidental synovial membranes. To the second belong tubercles, scirrhi, melanoses, &c.

TISSUE, AREOLAR, Cellular tissue—t. Cribiform, Cellular tissue—t. Filamentous, Cellular tissue—t. Laminated, Cellular tissue—t. Ligamentous, Desmoid tissue—t. Mucous, Cellular tissue—t. Porous, Cellular tissue—t. Reticulated, Cellular tissue.

TITHENESIS, Lactation.

TITHYMALUS, Euphorbia palustris—t. Cyparissia, Euphorbia cyparissias—t. Latifolius, Euphorbia lathyris—t. Paralias, Euphorbia paralias.

TITILLATIO, Gargle.

TITTHE, Nipple.

TITTHION, Nipple.

TITTHIS, Nipple.

TITTHOS, Mamma, Nipple.
 TITUBANTIA, *Bredouillement*.
 TITUBATIO, Fidgets.
 TO-AND-FRO SOUND, *Bruit de frottement*.
 TOADFLAX, *Antirrhinum linaria*.
 TOBACCO, *Nicotiana tabacum*—t. English,
Nicotiana rustica—t. Indian, *Lobelia inflata*.
 TOCETOS, Parturition.
 TOCOLOGY, Obstetrics.
 TOCOS, Parturition.
 TODDY TREE, Mamei.
 TOE, *Digitus pedis*.
 TOEPLITZ, MINERAL WATERS OF

Toeplitz is a town of Bohemia, celebrated for its numerous thermal springs. The water contains chloride of sodium, carbonate, and sulphate of soda; and carbonates of lime and iron, &c. Temp. 114° to 122° Fahr.

TOFUS, Tophus.

TOILE D'ARAIGNÉE, Aranei tela—t. *Choroidienne*, see *Choroid*—t. de Gaultier, *Sparadrapum Galteri*.

TOKAS, Puerpera.

TOKOLOGY, Obstetrics.

TOLES, Tonsil.

TOLLES, Tonsil.

TOLU, Tonsil.

TOLUIF'ERA BAL'SAMUM, *Myroxylon Toluiferum*. Family, Terebinthaceæ. *Sex. Syst.* Decandria Monogynia. The name of the tree which affords the *Balsam of Tolu*, *Balsamum Tolutanum*, *Tolutanum*, (Ph. U. S.), *Tolui'era Balsami Balsamum*, *Gouac'onaz*, *Red Balsam of Peru*, (F.) *Baume de Tolu*, *B. de Carthagène*. It has a very fragrant odour, and warm, sweetish taste; is thick, and of a reddish-yellow colour. It is stimulant and expectorant, (?) and is used in coughs. It is chiefly, however, employed on account of its flavour.

TOLUTANUM, see *Tolui'era Balsamum*.

TOMATA, *Solanum lycopersicum*.

TOM'E, *Ton'us*, *τοῦς*, *τοῦς*, 'incision.' A common suffix, as in *Lithotomy*, *Bronchotomy*, &c.

TOME, Cut, Incision.

TOMEION, Knife.

TOMENTUM CER'EBRI, from *tomen'tum*, 'a flock of wool.' The infinite number of small vessels, which pass between the pia mater and convolutions of the brain. They enter the substance of the brain at right angles.

TOMEUS, Knife.

TOMIS, Scissors.

TOMOTOCIA, Cæsarean section.

TONE, *Tonus*, from *τενω*, 'I stretch.' The state of tension or firmness, proper to each organic tissue. It is the effect of Tonicity, (q. v.)

TONE, Elasticity.

TONGRES, MINERAL WATERS OF. The town of Tongres is about a league from Maestricht, in the Low Countries. The springs, of which there are several, are chalybeate, containing carbonates of iron and magnesia.

TONGUE, Sax. *tuns*, (D.) *Tong*, *Lingua*, *Glossa*, *Glotta*, (F.) *Langue*. The tongue is a muscular, symmetrical, and very mobile organ; situate in the mouth, from the os hyoides and epiglottis to the incisor teeth. Its use is, particularly, to procure for us the sensation of savours; and it aids in the acts of sucking, mastication, deglutition, pronunciation, and expuition. It has the shape of a pyramid, flattened above and below; rounded at its angles,

and terminated, anteriorly, by a blunt point. Its upper surface, called the *dorsum*, is free, flat, and divided into two portions by a median furrow, *linca mediana*; at the posterior extremity of which is the *foramen cæcum*. The inferior surface is free, and covered by the mucous membrane on its anterior third and sides; but behind and in the middle it is attached to the lower jaw, by means of the *genio-glossus*; and to the hyoides by the *hyoglossus*. Its margins are rounded; thick behind, thinner anteriorly. Its tip, or point, or dental extremity is rounded and free:—the root, base, or hyoid extremity is continuous with the epiglottis and velum palati. It is very thick at the *foramen cæcum*; but thinner as it approaches the hyoid bone. The tongue is composed of muscles, and covered by a mucous membrane—*Periglottis*, *Intol'd'rum linguæ*, *Membr'na seu Tu'nica vaginalis* seu *Cutis*, *Epider'mis* seu *Tunica* seu *Intol'd'rum mucosum* seu *Crusta villosa linguæ*—which forms also the *frænum* beneath the tongue. On this membrane are seen the different *papillæ*, (q. v.) The nerves of this organ proceed from the inferior maxillary, *glosso-pharyngeal*, and *hypoglossal*. The first is perhaps connected with taste; the last two with the motions of the organ. Some recent observers, however, consider the *glosso-pharyngeal* to be the special nerve of gustation. The arteries are the *lingual*, from the external carotid; and the *palatine* and *tonsillar*, from the labial. The veins are the *superficialis lingue*, *ramina*, *lingualis*, and *submental*. They open into those of the pharynx and larynx. Its lymphatic vessels pass into ganglia, situate at the edge of the *hyoglossi* muscles.

TONGUE, BLACK. A fever which prevailed in the western states in the winter of 1842-3; probably typhoid fever. According to some, an epidemic erysipelas.

TONGUE, HERNIA OF THE, *Glossocoele*—t. Inflammation of the, *Glossitis*—t. Red, fever, see *Typhus*—t. Scraper, *Curclangue*—t. Tic, see *Ankyloglossum*.

TONIC, *Ton'icus*. Same etymon as *Tone*, (q. v.) Relating to tone.

Tonic, *Ton'icus*, *Tono'ticus*, (F.) *Tonique*, *Fortifiant*, in Therapeutics, means a medicine, which has the power of exciting slowly and by insensible degrees the organic actions of the different systems of the animal economy, and of augmenting their strength in a durable manner. Bitter, vegetable substances, which are not associated with an acid or narcotic principle; preparations of iron; cold water. &c., act as tonics. They are also called *Comfortant'ia*, *Corroborant'ia*, *Confirmant'ia*, *Roborant'ia*, &c.

The following are the chief Tonics:—*Acidum Arseniosum*, *Acidum Nitricum*, *Acidum Sulphuricum*, *Argenti Nitras*, *Bismuthi Subnitrates*, *Carbo Ligni*, *Cascarilla*, *Cinchona*, *Cinchonia*, *Colomba*, *Cornus Florida*, *Cupri Acetas*, *Cupri Sulphas*, *Cuprum ammoniatum*, *Cusparia*, *Eupatorium perfoliatum*, *Ferri Præparata*, *Gentiana*, *Liriodendron*, *Lupulina*, *Piperina*, *Prunus Virginiana*, *Quassia*, *Quinia*, *Salix*, *Salicina*, *Serpentaria*, *Zinci præparata*, — *Aquæ minerales acidulæ et ferrugineæ*, *Mental Tonics*, (*Confidence*, *Hope*, *Amusement*.)

Tonic Power, Irritability.

TONIC SPASM, *Spasmus ton'icus*, *Convul'sio tonica*, *Conductio*, *Spasticus*, *Tonos*, *Ento'nia*,

Entesia. A rigid contraction of muscles without relaxation, as in trismus, tetanus, &c. See Tetanus, and Spasm.

TONICITY, *Tonicitas*. The faculty that determines the general tone of the solids. Excessive tonicity causes *erethism* or *crispness*; deficient tonicity, *atony* and *weakness*. Tonicity has been used in the same sense as irritability.

TONICITY, Elasticity.

TONIQUE, Tonic.

TONOS, Tonic spasm—*t. Trismus*, Trismus.

TONOTICUS, Tonic.

TONSIL, *Tonsilla*, *Amygdala*, *Paristh'mia*, Almond of the ear, Almond of the throat, *Tolu*, *Tolles*, *Toles*, *Spongos*, Pl. *Antistes*, (F.) *Amygdale*, *Tonsille*. An ovoid follicle, about half an inch in length, similar in shape to an almond, and situate, on each side, between the pillars of the velum palati. The inner surface, projecting into the isthmus of the throat, is covered by the mucous membrane, in which are the orifices of a dozen cells, whence a transparent, viscid mucus oozes on pressure. This mucus is destined to facilitate deglutition, by lubricating the isthmus faucium; and is forced out during the passage of the alimentary bolus.

TONSILLARUM GANGRÆNA, Cynanche maligna.

TONSILLE, Tonsil.

TONSILLITIS, Cynanche tonsillaris.

TOOTH, *Sax* *τοὺς*, *Dens*, *Odus*, (F.) *Dent*.

The teeth are small, hard bones, fixed in the alveoli of each jaw, and serving to lay hold of, and to cut, tear, and triturate alimentary substances. True teeth are found only in man, the mammalia, reptiles, and fish. The teeth have, in general, the shape of an irregular cone, the base of which is towards the interior of the mouth; and the apex, single or divided, towards the bottom of the alveoli. Each tooth has a part situate out of the alveolus, and covered by a vitriform substance. This part is called the *crown* or *corona*. It is bounded by a narrower portion, called the *cervix*, (F.) *collet*, which separates it from the portion in the alveolus—the *fang* or *root*, (F.) *racine*. In the adult, the teeth are 32 in number; 16 to each jaw: these consist of 4 *incisors*, 2 *canine*, 4 *bicuspidati*, and 6 *molars*. (See these various terms.) The teeth enclose a vascular and nervous pulp, in a central cavity, *Cavitas Pulpæ*. They are formed of a very hard, compact tissue; and the corona is covered by a vitreous substance called *Enamel*, (q. v.) The incisor and canine teeth are developed by a single point of ossification; the lesser molars, by two; and the larger, by four or five. See Dentition. Recent researches by Retzius, Müller and others, have shown that the ivory or *Dentine*, *Substantia ossea*, of Malpighi, of the tooth consists of tubular fibres, which contain organic deposits of calcareous salts; and of intertubular substance, in which are observed corpuscles or osseous cells of the tooth, called by Professor Owen, *calcigerous cells*, which also contain earthy salts. At the part where the enamel terminates at the cervix of the tooth, the *crusta petrosa* or cortical substance commences in an extremely thin stratum, passes down and gradually increases in thickness towards the extremity of the root, where it is generally the thickest. It is said, by Nasmith, to have been traced on the enamel, and Purkinje and Fränkel found it

lining the *cavitas pulpæ*. They gave it the name *Substantia ostioidea*. It is the *materia tartarea* of Malpighi. In the compound teeth of the herbivorous animal, a deposition is found on the surface of the enamel, which has been called the *cementum* or cement. Müller, however, regards it to be a deposit from the salts and the saliva, and to be essentially the same as what is called tartar in the human subject.

TOOTHACHE, *Odontalgia*—*t. Tree*, *Aralia spinosa*, *Xanthoxylum clava Herculis*.

TOOTH EDGE, *Agacement des Dents*, *Hæmodia*—*t. Rash*, *Strophulus*—*t. Shell*, dog-like, Dentalium.

TOPHACEOUS CONCRETION, *Tophus*.

TOPHUS, *Tofus*, *Tophaceous Concretion*. A collection of hard, calcareous matter, which forms, particularly, at the surface of joints affected with gout; (see *Calculi*, *arthritic*,) and, occasionally, in the interior of organs, around the teeth, &c. It likewise meant gravel.

TOPIC, *Topicus*. A local application. (F.)

Topique. See Local.

TOPICUS, Local.

TOPINARIA, *Talpa*.

TOPIQUE, Topic.

TOPLITZ, *Toeplitz*.

TOPOGRAPHICAL ANATOMY, see Anatomy.

TORCULAR HEROPHILI, *The Press of Herophilus*, *Lechenœon*, *Lenos*, *Fourth Sinus*. (F.) *Confluent des Sinus*, *Pressoir d'Hérophile*. A smooth and polished cavity, of irregular shape, in which several sinuses of the dura mater meet. It is situate before the internal occipital protuberance, at the union of the three great duplicatures of the dura mater. It has six openings into it:—one above, that of the superior longitudinal sinus:—two below, answering to the occipital sinuses: one anterior, belonging to the straight sinus; and two lateral, and very broad, which lead into the lateral sinuses; and convey, from the cavity, the blood that has been poured into it by the others.

TORCULAR, Tourniquet.

TORDYLITUM OFFICINALE, *Seseli Créticum*, (F.) *Séseli de Crète*. Family, Umbellifera. Sex. Syst. Pentandria Digynia. The seeds and roots of this Southern European plant are considered carminative and diuretic. They enter into the theriaca (q. v.)

TORENIA ASIATICA, *Calu-dolo*. A small Malabar plant, the juice of whose leaves, sweetened with sugar, is said to cure gonorrhœa.

TORMENTIL'LA, *T. erecta*, *Potentill'a tormentill'a*, *Common Tormen'til*, *Upright Seftfoil*, *Heptaphyllum*, *Consolida rubra*, (F.) *Tormentille*. Family, Rosaceæ. Sex. Syst. Icosandria Polygynia. The root has a slightly aromatic odour; and austere, styptic taste. It is astringent. Dose, of the powder, gr. x. to ʒj.

TORMENTUM, Ileus, Intussusceptio.

TORMINA, *Strophos*, *Calial'gia*, *Gripes*, *Multigrubs*. (F.) *Tranchées*. Acute colicky pains. Dysentery, (q. v.)

TORMINA CELSI, Dysentery.

TORNACULUM, Tourniquet.

TOROSITAS, *Corpulentia carnos'a*, *Hal'itus athleticus*. Muscular strength, from *torosus*, 'brawny,'—*tori*, 'brawn.'

TORPEDO, Narcosis.

TORPOR, *Parap'sis exers*, (F.) *Engour-*

dissement, from *torpere*, 'to be numbed.' State of a part which becomes numb, and almost incapable of motion. It is also applied to a debilitated, sluggish condition of a part or of the whole of the body. (F.) *Accablement*.

TORPOR, Narcosis—*t.* of the Colon, see Colon, torpor of the—*t.* Intestinorum, Constipation.

TORQUAY. A town in Devonshire, England, which, on account of the mildness of its climate, and its sheltered situation from the bleaker winds, is a frequent retreat for the phthical invalid.

TORSION, *Torsio*. The act of twisting. Torsion of the extremities of bleeding vessels, until the blood ceases to flow, is sometimes used to arrest hemorrhage from divided vessels.

TORTELLE, *Erysimum*.

TORTICOLLIS, *Obstipitas*, *Caput obstipum*, *Obsti'pa cervix*, *Collum obstipum*, *Wry-neck*; from *torquere*, *tortum*, 'to twist,' and *collum*, 'the neck.' *Trachelagra*, *Entasia*, *Loxia*, *Cephaloxia*. A variety of rheumatism, seated in the muscles of the neck, which prevents the motion of the head, and causes the patient to hold it inclined to the side affected. It is, commonly, of short duration; usually disappearing in a few days. Rubefacients are the best topical applications. The term is also applied to permanent contraction of the muscles of the neck, which causes the head to be held to one side. The remedy is the division of the contracted muscles.

TORTUE, *Testudo*.

TORTURA ORIS, *Risus Sardonicus*, *Trismus*.

TOTA BONA, *Chenopodium bonus Henricus*.

TOTUM CARNOSUM, *Pancreas*.

TOUCH, *Tactus*, *Tactio*, *Hap'hē*, *Hapsis*, *Palpa'tion*, (F.) *Toucher*. One of the five senses, and that which makes known to us the palpable qualities of bodies, such as their consistence, quality, &c. It is seated, particularly, in the hands; and differs from tact (q. v.) in being active.

TOUCH, ROYAL. It was at one time universally believed, in England, that the Royal touch would remove the *Scrofula* or *King's Evil*, (as it was thence called.) This superstition is now entirely exploded. Edward, the Confessor, was the first English king who touched for the Evil.

TOUCHER, *Esape*, *Touch*.

TOUCHWOOD BOLETUS, *Boletus ignarius*.

TOUR DE MAÎTRE, *Coup de maître*.

TOURBILLON VASCULAIRE, *Vasa vasorum*.

TOURNESOL, *Heliotropium Europæum*.

TOURNIOLE, *Paronychia*.

TOURNIQUET, *Tor'cular*, *Tornaculum*, *Fas'cia tor'tilis*, from (F.) *turner*, 'to turn.' A surgical instrument for stopping the course of blood in the limbs, by exerting a strong compression upon the principal artery. It was invented by a French surgeon, Morel, in the middle of the 17th century; and was modified, subsequently, by Nuck, Verduc, Monro, Petit, and Louis. It is used to suspend, for a time, the circulation in a limb, during great operations; to arrest arterial hemorrhage in cases of

wounds; to compress certain aneurismal and other tumours, &c.

TOUS-LES-MOIS. A fecula obtained from the root of a species of *Canna*. It resembles potato starch; and may be substituted for arrow root. It is obtained from St. Kitts.

TOUTE BONNE, *Salvia sclarea*.

TOUTE ÉPICE, see *Myrtus Pimenta*—*t. Saine*, *Sanicula*.

TOUX, *Tussis*—*t. Bronchique*, *Bronchial cough*—*t. Caverneuse*, see *Cavernous respiration*—*t. Tubaire*, *Bronchial cough*.

TOXICAL, *Poisonous*.

TOXICATIO, *Poisoning*.

TOXICODENDRON, *Rhus toxicodendron*.

TOXICOHÆMIA, from *τοξικον*, 'a poison,' and *αἷμα*, 'blood.' Poisoning of the blood.—*Piorry*.

TOXICOL'OGY, *Toxicolog'ia*, from *τοξικον*, (itself from *τοξον*, 'a bow,' 'a poison,' and *λογος*, 'a description.' A treatise on poisons, (q. v.)

TOXICUM, *Poison*, *Venom*.

TRABECULA, *Corpus callosum*—*t. Willisii*, *Chordæ Willisii*.

TRABS, *Penis*—*t. Cordis*, *Columnæ carneæ*—*t. Medullaris*, *Corpus callosum*.

TRACHEA, (generally, however, accented *Trachea*), *Trach'ea art'eria*, *Bronchus*, *As'pera arteria*, *Fistula spiritalis*, *T. pulmonalis*, *Canna*; the *Windpipe*, (F.) *Trachée artère*, from *τραχης*, 'rough,' and *αρτηρια*, 'artery,' composed of *αργ*, 'air,' and *τηρειν*, 'to keep.' The trachea is a cylindrical, fibro-cartilaginous and membranous tube, flattened behind, and situate on the median line, before the vertebral column, from the inferior part of the larynx, as far as the third dorsal vertebra. There it divides into two branches, the *bronchia*, which separate to go to each lung, (q. v.) The trachea, the function of which is to convey air to the lungs during respiration, is composed, 1. Of cartilaginous rings, incomplete behind, situate one above the other, and kept *in situ* by a fibrous membrane. 2. Of a mucous membrane, which lines it internally, and contains numerous mucous follicles. 3. Of transverse muscular fibres, not well marked, which occupy its posterior surface. 4. Of vessels, which proceed from the superior and inferior thyroideal; and, 5. Of nerves, that are given off by the pneumogastric and the cervical ganglia.

TRACHEA ARTERIA, *Trachea*.

TRACHEAL, *Trach'ed'lis*. An epithet applied to the respiration as heard through the stethoscope opposite the trachea, larynx, and root of the bronchia; the air appearing as if sucked in from the cylinder during inspiration, and expelled again during expiration.

TRACHÉE ARTERE, *Trachea*.

TRACHEITIS, *Cynanche trachealis*.

TRACHELAGRÀ, *Torticollis*.

TRACHELIAN, *Cervical*.

TRACHELITIS, *Cynanche trachealis*.

TRACHELO-ATLÔIDO-OCIPITAL, *Obliquus superior capitis*—*t. Atlôido-basilaire*, *Rectus capitis lateralis*—*t. Basilaire*, *Rectus capitis internus major*—*t. Basilaire, petit*, *Rectus capitis internus minor*.

TRACHELO-DIAPHRAGMATIC, *Trachelo-diaphragmaticus*. The 4th pair of cervical nerves, whence the phrenic nerve chiefly arises.—*Chaussier*.

TRACHÉLO-MASTOIDIEN, Complexus minor—*t. Occipital*, Complexus—*t. Phyma*, Bronchocele—*t. Scapulaire*, Levator scapulæ.

TRACHELOŚ, Collum.

TRACHEOPHONY, Laryngophony.

TRACHITIS, Cynanche trachealis.

TRACHOMA, *Asprédo*, from *τραχυς*, 'rough,' (F.) *Asperité des Paupières*. A roughness of the inner surface of the eyelids. A variety of ophthalmia, of which three kinds have been designated:—*T. sabulo-sum*, from sand, &c. getting between the eyelids; *T. carunculo-sum*, from fleshy excrescences; and *T. herpeticum*, from hard pustules on the inner surface of the eyelids. This last is also called *Ficosis* and *Palpebra flosa*.

TRACTORATION, Perkinism, see Tractors, metallic.

TRACTORS, METALLIC. Metallic agents, introduced by Dr. Elisha Perkins, of Connecticut, about the end of the last century, to cure diseases. The parts were rubbed with these tractors, and hundreds of thousands of cases were reported to have been cured by the *tractoration*. The affections, in which they were chiefly used, were local inflammations, and pains in different parts. The good effects were, doubtless, owing to the influence exerted by the mind over the body. The bubble did not exist long. See PERKINISM.

TRACTUS RESPIRATORIUS, Respiratory tract.

TRAGACANTHA, *Gummi Tragacantha*, *G. Astragalí Tragacanthæ*, *Gum Tragacanth*, *Gum Dragon*; the concrete juice of the *Astragalus Tragacantha* or *Astragalus verus*, a native of Persia. *Family*, Leguminosæ. *Sex. Syst.* Diadelphia Decandria. (F.) *Gomme Astragant*. This gum is inodorous; nearly insipid; of a whitish colour; semi-transparent, and striated. It is in thin, vermiform pieces; and does not form a smooth, uniform mucilage with water. It is demulcent, but is rarely used alone.

TRAGEA AROMATICA, Pulvis cinnamomi compositus.

TRAGICUS, *Tragien*, (Ch.) from **TRAGUS** (q. v.) A small, flat, triangular muscle, which almost wholly covers the outer surface of the tragus, arising from its base, and terminating at the top of the eminence.

TRAGIEN, *Tragicus*.

TRAGOPOGON, from *τραγος*, 'a goat,' and *πογων*, 'beard.' A genus of plants; *Family*, Cichoraceæ. *Sex. Syst.* Syngenesia Polygamia Æqualis. (F.) *Barbe de Bouc*; of which the roots of the *Tragopogon porrifolium* or *Salsif*, and the young shoots of the *T. pratensis*, *Meadow Salsif*, or *Common Goat's Beard*, (F.) *Salsifs des prés*, are eaten as a food. The root of the latter has been used as a diuretic.

TRAGOSELINUM, *Pimpinella saxifraga*—*t. Majus*, *Pimpinella magna*.

TRAGUS, *τραγος*; 'a goat;' from its being furnished, in some persons, with hair, like the beard of a goat; *Antilobium*; *Hircus*. A small, flattened, triangular nipple, situate before the meatus auditorius externus, which it appears to conceal. It is covered with hair in old people, whence its name.

TRAGUS MATTHIOLI, *Salsola kali*.

TRAINASSE, *Polygonum aviculare*.

TRAMIS, *Perineum*.

TRANCE, Catalepsy, Ecstasis.

TRANCHÉES, Tormina—*t. Uterines*, Pains, after.

TRANSFORMATIONS DE TISSU, (F.) The French pathologists designate thus the change that occurs in an organ, the tissue of which becomes similar to that of another organ. The chief transformations are cartilaginous, osseous, and adipous. See Tissue.

TRANSFUSION, *Transfusio*, *Transfusio San'guinis*, *Cura Medea'na*, *Methæmachym'ia*, *Transplantatio Medica nova*, *Chirurgia transfusoria*, *Exotichæmatosis*, from *transfundere*, (trans, and fundere, 'to pour,') 'to pour from one vessel into another.' The act of passing the blood of one animal into the veins of another; an operation, which was formerly used to fulfil various therapeutical intentions. It has been revived in cases of uterine hemorrhage; and, apparently, with some success.

The operation can only be performed safely on animals having like kinds of blood. See Globule.

TRANSLATION, Metastasis.

TRANSPLANTATIO, *Metaphyteia*. A pretended method of curing diseases, devised by Paracelsus—by making them pass from one individual to another, either animal or vegetable.

TRANSPLANTATIO, *Morioplastice*—*t. Medica nova*, *Transfusion*.

TRANSPIRATIO, Perspiration.

TRANSPORT, Delirium.

TRANSPOSITIO, Metathesis.

TRANSPOSITIO, *Transpositio*, from *trans*, 'over,' and *ponere*, 'to put;' *Metathesis*. Change of situation.

TRANSPOSITION OF THE VISCERA, *Polype'ria promiscua translativa*, is a congenital vice of conformation, which consists in the viscera being found out of the situations they ordinarily occupy: the heart, for example, being on the right side; the liver on the left, &c.

TRANSUDATIO, Diapedesis.

TRANSUDATION, *Transudatio*, from *trans*, 'through,' and *sudare*, *sudatum*, 'to sweat.' The passage of a fluid through the tissue of any organ, which may collect in small drops on the opposite surface, or evaporate from it.

TRANSUDATION, Exomose.

TRANSVERSAIRE ÉPINEUX, *Transversalis dorsi*—*t. Épineux du cou*, *Semispinalis colli*—*t. Grêle*, see *Sacro-lumbalis*—*t. Épineux du dos*, *Semispinalis dorsi*.

TRANSVERSAL DE LA CONQUE, *Transversalis auris*—*t. du Nez*, *Compressor nasi*.

TRANSVERSALIS ABDOMINIS, *Lombo-abdominal*, (Ch.) (F.) *Transverse de l'Abdomen*. This muscle is seated, deeply, on the lateral parts of the abdomen. It is flat, thin, and broader before than behind. It is attached, above, to the cartilage of the last true rib, and to those of every false rib; and, below, to the inner lip of the crista of the ilium; to the two outer thirds of the crural arch, and to the upper part of the pubis. Its fibres, moreover, are inserted, behind, by means of broad aponeuroses, into the top of the transverse and spinous processes of the first four lumbar vertebræ; and, before, into the linea alba, and the ensiform cartilage. This muscle, all of whose fibres have a transverse direction, constricts the belly, and diminishes the base of the chest, by drawing inwards the ribs to which it is attached.

TRANSVERSALIS ANTICUS PRIMUS, Rectus capitis lateralis—t. Collateralis colli, see Sacrolumbalis.

TRANSVERSALIS COLLI, *Transversalis major colli*, Portion of the Sacro-spinal, (Ch.) (F.) *Transversaire*. A muscle, seated at the posterior and lateral part of the neck and upper part of the back. It is attached to the transverse processes of the 5 or 6 lowest vertebrae of the neck; and to those of the 4 or 5 first dorsal. It extends the vertebrae of the neck, and inclines them to its side.

TRANSVERSALIS COLLI, Semi-spinalis colli.

TRANSVERSALIS DORSI, *Transverso-spinalis*, *Multifidus Spinæ*, *Lumbo-cervical portion of the Spinal*, (Ch.) (*Transverso-spinalis Lumborum*, *Transverso-spinalis Dorsi*, *Transverso-spinalis Colli*,) *Musculus sacer*, *Spinales et transversales lumborum*, *Semi-spinalis internus*, sive *Transverso-spinalis colli pars interna*, (Winslow,) *Lombo-dorsi-spinal*, &c. (F.) *Transversaire épineux*. This muscle, usually called by English anatomists, *Multifidus spinæ*, and including all the *transverso-spinales*, is situate in the vertebral gutters, extending from the posterior part of the sacrum to the second cervical vertebra. It is thicker in the neck and loins than in the back and behind the sacrum. Its use is—to straighten the vertebral column, and to impress upon it a slight rotary motion.

TRANSVERSALIS NASI, Compressor nasii.

TRANSVERSE, *Transversus*, *Transversalis*, from *trans*, 'over,' and *vertere*, 'to turn.' That which runs across; also, that which relates to the transverse processes of the vertebrae.

TRANSVERSE ARTERY OF THE FACE arises from the temporal; passes transversely across the face, in front of the condyle of the lower jaw, and gives its branches to the different muscles of the cheek.

TRANSVERSE PERINEAL ARTERY, *Urethro-bulbar* (Ch.) is given off from the upper branch of the internal pudic; and passes inwards and forwards above the transversus perinæi muscle, as far as the bulb of the urethra, into which it dips;—subdividing into numerous branches.

TRANSVERSE PROCESSES OF THE VERTEBRÆ, (F.) *Apophyses transverses des vertèbres*, are the bony eminences that jut out transversely from the sides of the vertebrae.

TRANSVERSE SUTURE, *Sutura transversalis*, runs across the face, and sinks into the orbits; joining the bones of the skull to those of the face, but with so many irregularities and interruptions, that it can scarcely be recognised as a suture.

TRANSVERSE DE L'ABDOMEN, *Transversalis abdominis*—t. de l'Oricule, *Transversus auris*—t. du Perinée, *Transversus perinæi*.

TRANSVERSO-SPINAL, *Semi-spinalis colli*, *Semi-spinalis dorsi*—t. Spinalis, *Transversalis dorsi*—t. Spinalis colli, *Semi-spinalis colli*—t. Spinalis dorsi, *Semi-spinalis dorsi*.

TRANSVERSUS AURIS MUSCLE, *Transverse de l'Oricule* (Ch.) (F.) *Transversal de la Conque*, is often wanting. It is formed of some transverse fibres, situate transversely, behind the projection of the helix which divides the concha into two portions.

TRANSVERSUS PERINÆI, *Levator Ani parvus*, *Ischio-perineal* (Ch.) (F.) *Transverse du Périnée*, is placed at the posterior part of the perinæum. It is thin, triangular, and situate trans-

versely. Its external extremity is attached to the ramus and tuberosity of the ischium: its inner extremity is confounded with its fellow of the opposite side, and with the anterior part of the sphincter ani and posterior part of the bulbo-cavernosus. The use of this muscle is,—to compress the urethra, and to support the rectum and bladder. To a fasciculus of this muscle Santorini has given the name *Urethra Elevator* seu *Ejaculator*.

TRANSVERSUS PERINÆI ALTER, *Prostatæ inferior*. A small muscle which occasionally accompanies the last.

TRAPA NATANS, (F.) *Macræ flottante*, *Noix d'Eau*, *Chataigne d'Eau*. Ser. Syst. Tetrandia Monogynia. The plant which affords the *Nuces Aquaticæ*, *Tribuli aquatici*, *Calcrops*. The nut is considered nutrient and demulcent, and is said to be useful in diarrhœa from abrasion of the bowels, and in calculus. A poultice is sometimes made of it to discuss hard and indolent tumours.

TRAPEZE, Trapezium.

TRAPEZIUM, OS, *τραπέζιον*. So called from its shape. *Os multangulum majus*. The first bone of the second row of the carpus. It is articulated, above, with the scaphoides; below, with the first bone of the metacarpus; within, with the trapezoides, and second metacarpal bone. Anteriorly, posteriorly, and externally, it gives attachment to ligaments.

TRAPEZIUM, *Cucullaris*, *Dorso-sus-acromien* (Ch.) (F.) *Trapeze*, *Capuchon*. A muscle, seated at the posterior part of the neck and shoulder, and at the upper part of the back. It has the shape of a trapezium; is attached, on the one hand, to the inner third or the upper curved line of the occipital bone: to the posterior cervical ligament; to the spinous process of the 7th cervical vertebra; and to those of all the dorsal vertebrae; and, on the other hand, to the spine of the scapula; the acromion and the outer third of the posterior margin of the clavicle. Its upper fibres are situate obliquely downwards and outwards; the transverse and inferior, obliquely outwards and inwards. This muscle elevates the shoulder; carries it backwards, or depresses it, according as its upper, middle, or lower fibres contract separately. It straightens the head, also, and inclines it to one side.

TRAPEZOID LIGAMENT. The anterior part of the coraco-clavicular ligament, (q. v.) It is a very strong, fibrous fasciculus, which has the shape of a trapezium, and is situate obliquely, between the acromion process and clavicle.

TRAPEZOIDES, OS, *Os multangulum minus*, *Os pyramidele Carpi*, from *τραπέζιον*, 'a trapezium,' and *ειδος*, 'shape or resemblance.' The second bone of the second row of the carpus, so called from its shape. It is smaller than the trapezium, on the inside of which it is situate. It is articulated, above, with the os naviculare; below, with the second metacarpal bone; on the outside, with the trapezium; and internally, with the magnum. Anteriorly and posteriorly, it affords attachment to ligaments.

TRAULISMUS, see Balbuties and Blæsitæ.

TRAULOTES, see Blæsitæ.

TRAUMA, Wound.

TRAUMATIC, *Traumatæcus*, *Vulnerarius*;

from *τραύνα*, 'a wound.' Any thing relating to a wound.

TRAUMATICUS, Abstergent.

TRAVAIL D'ENFANT, Parturition.

TRAVELLER'S JOY, Clematis vitalba.

TREACLE, Melasses, Theriaca—t. English, Teucrium chamædrys—t. Venice, Theriaca.

TREAD, Cicatricula—t. of the Cock, Mole-cule.

TREE OF LIFE, Thuya occidentalis.

TREFLE D'EAU, Menyanthes trifoliata.

TREFOIL, BEAN, STINKING, Anagryis—t. Water, Trifolium fibrinum.

TREMA, Foramen.

TREMLEMENT, Tremor—t. *Métallique*, see Tremor.

TREMILES, Milk-sickness.

TREMBLING, Tremor.

TREMOR, *Trepidatio*, *Synclonus Tremor*, *Tromus*, *Trembling*, (F.) *Tremblement*; from *tremere*, 'to tremble.' Involuntary agitation of the body, or of some part of it, without any obstacle to voluntary motion. It depends, generally, upon debility of the muscular, or of the nervous system; and, hence, is observed in convalescence, and in typhoid affections. It occurs, also, in old people; in hard drinkers; workers in mercury, lead, &c.: in the last case, it is called by the French, *Tremblement métallique*. Tremor seems to resemble paralysis more than convulsion.

TREPAN, *Trep'anum*, *Terebell'a*, *Trip'anon*, *Chan'icis*, *Chanicion*, *Ter'ebra*, *Ter'etron*, *Trypanon*, from *τρύανω*, 'I perforate.' A surgical instrument resembling a wimble, and worked in the same manner. It is used for removing portions of bone, and particularly of the bones of the skull. The term, *trep'an*, is given more particularly to the part of the instrument that makes the perforation. The handle is so constructed as to receive different bits, as the Crown, (q. v.) the *Trep'an perforatif*, or *Perité'ron*, the *T. exfoliatif*, or *Desquamato'rium trep'anum*, and the *T. abaptis'ta*.

In Great Britain and the United States, this instrument has been superseded by the trephine, which is more manageable.

TREPANATIO, Trepanning.

TREPANATION, Trepanning.

TREPAN'NING, *Terebra'tio*, *Anatre'sis*, *Cephalotrype'sis*, *Trepand'tio*, *Trype'sis*, *Tresis*, (F.) *Trépanation*. Same etymon. The methodical application of the trepan.

TREPANON, Trepan.

TREPANUM, Trepan.

TREPHINE. The instrument which has replaced the trepan in some countries. It consists of a simple, cylindrical saw; with a handle placed transversely like that of a gimlet, and from the centre of the circle, described by the teeth of the saw, a sharp little perforator projects called the *Centrepin*. The centrepin is capable of being removed, at the surgeon's option, by means of a key for the purpose. It is used to fix the instrument until the teeth of the saw have made a circular groove, sufficiently deep for it to work steadily. The pin must then be removed. Sometimes the pin is made to slide up and down, and to be fixed in any position, by means of a screw.

TREPHOUSA, Nurse.

TREPIDATIO, Tremor—t. Cordis, Cardiotromus.

TREPON'DO. A weight of three pounds.—Scribonius.

TRE'SIS, *τρησις*, from *τρηω*, 'I bore.' Properly a perforation. A wound. A forcible solution of continuity in a soft part, commencing externally. A genus in the nosology of Good.

TRESIS, Trepanning, Wound—t. Causis, Burn—t. Punctura, Puncture—t. Vulnus, Wound—t. Vulnus laceratum, see Laceration—t. Vulnus simplex, Cut.

TRESSAILLEMENT, Shuddering.

TRESSO'RIA, *Epis'ton*, *επιστορία*. A term formerly applied to the hair covering the mons veneris, the absence of which has, by the vulgar, been esteemed a matter of reproach.

TRI, *τρι*, in composition, 'three.' Hence:

TRIANGLE MEDULLAIRE, Fornix.

TRIANGULAR, *Trig'onos*, *Triangula'ris*, from *tris*, for *tres*, 'three,' and *angulus*, 'an angle.' That which has three angles.

INFRA-PURIAN OF TRIANGULAR LIGAMENT is a ligamentous fascia with short fibres, situate transversely beneath the symphysis pubis, which it strengthens.

TRIANGULARIS, Depressor anguli oris—t. Coccygis, Coccygeus—t. Nasi, Compressor naris.

TRIANGULARIS STERNI muscle, *Sterna-costalis* (Ch.) *Pectoralis inter'nus*, is situate at the anterior and inner parts of the chest, behind the cartilages of the ribs. It has the shape of a lengthened triangle, the base of which is directed downwards. It is attached to the posterior, lateral, and inferior part of the sternum, whence its fibres pass upwards and outwards, and terminate by as many distinct digitations at the cartilages of the 3d, 4th, 5th, and 6th true ribs. This muscle depresses the ribs and contributes to expiration.

TRIBADE (F.) *τριβας*, from *τριβο*, 'I rub' *Frictrix*, *Futur*, *Mus'cula*, *Subagita'trix*. A female whose clitoris is so large as to cause her to be regarded as an hermaphrodite.

TRIBULI AQUATICI. See *Trapa natans*.

TRIBUTUM LUNARE, Menses.

TRICAGO, Teucrium chamædrys.

TRICAUDALIS, Retrahens auris.

TRICEPS, from *tris* for *tres*, 'three,' and *caput*, 'a head.' A name given to muscles that have three fleshy bundles at one of their extremities.

TRICEPS ADDUC'TOR FEM'ORIS. Under this appellation are comprehended three distinct muscles:—*Adductor brevis*, *A. longus*, and *A. magnus* (q. v.)

TRICEPS AURIS, Retrahens auris—t. Brachialis, T. extensor cubiti.

TRICEPS CRURIS, *Trifémoro-rotulien* (Ch.) *Crural*, *Trifémoro-tibi-rotulien*, *Femoralis*, (F.) *Triceps crural*, *T. de la cuisse*, is situate at the anterior, inner, and outer part of the thigh. It is formed of three bundles at its superior extremity, viz. 1. A middle fasciculus (the *cruralis* of most anatomists.) 2. An external fasciculus (the *vastus externus*) and 3. An inner fasciculus (the *vastus internus*.) It is attached, above, to the anterior, inner, and outer surfaces of the femur, and to the two edges of the linea aspera, from the base of the trochanter to within four fingers' breadth of the knee. Below, it terminates by a large tendon, which is attached to the base and edges of the patella, as well as

to the inner and outer tuberosities of the tibia. The triceps extends the leg on the thigh, and conversely.

TRICEPS DE LA CUISSE, *T. cruris*—*t. Crural*, *T. cruris*.

TRICEPS EXTENSOR CUBITI, *Triceps Brachialis*, *Scapulo huméro-olecraniæ* (Ch.) (F.) *Triceps brachialis*. This muscle, which occupies all the posterior part of the os humeri, is described as two muscles by Douglas, and as three by Winslow. It arises by three heads. The first or long head,—*long head of the biceps externus* of Douglas, *Anconeus major* of Winslow—arises from the anterior extremity of the inferior costa of the scapula, near its neck, and below the origin of the *teres minor*. The second head, or *short head of the biceps externus* of Douglas, *Anconeus externus* of Winslow, arises from the upper and outer part of the os humeri, at the base of the great tuberosity; and the third head—*Brachialis externus* of Douglas, *Anconeus internus* of Winslow, the shortest of the three, arises from the back part of the os humeri, behind the flat tendon of the *latissimus dorsi*. These three portions unite about the middle of the arm, so as to form one thick and powerful muscle, which is inserted at the upper part of the olecranon. It extends the forearm on the arm, and conversely.

TRICEPS MAGNUS, *Adductor magnus*—*t. Minor*, *Adductor longus femoris*—*t. Secundus*, *Adductor brevis*.

TRICHÆ INCUBORUM, *Plica*.

TRICHIA, *Entropion*.

TRICHIASIS, *Trichio'sis*, *Tricho'sis*, from *τρῑχῑ*, 'hair,' *Morbus pila'ris*. This name has been given to several affections. 1. To a disease of the kidneys or bladder, in which filamentous substances, resembling hairs, are passed in the urine. This is also called *Pilimictio*. It must be regarded as a variety of *Catar'hus vesicæ*, (q. v.) 2. To a painful swelling of the breasts, in childbed women, when the milk is excreted with difficulty:—a disease attributed, by Aristotle, to a hair swallowed by accident and carried to the breasts through the circulation; and 3dly, To inversion of the eyelashes. See *Entropion*.

TRICHINA SPIRALIS. Same etymon. A small species of entozoa discovered in the muscles of voluntary motion. They consist of very minute cysts, of an oblong figure, having considerable resemblance in size and colour to young pediculi, and are somewhat allied to the eels found in paste and vinegar. No symptoms have as yet been observed to be pathognomonic of their presence.

TRICHIOSIS, *Trichiasis*.

TRICHISMUS. Same etymon. *Capilla'tio*, *Fissu'ra pila'ris*. A capillary fracture, fissure, or crack.

TRICHOLABIUM, *Madisterium*.

TRICHOLOGIA, *Carphologia*.

TRICHOMA, *Capillamentum*, *Plica*.

TRICHOMANES, *Asplenium trichomanoides*.

TRICHOMATION, *Capillamentum*.

TRICHOSCHISIS, *Schizotrichia*.

TRICHOSIS, *Pila'rè malum*; same etymon. Morbid organization or deficiency of hair. A genus in the system of Good.

Trichosis, *Entropion*, *Trichiasis*—*t. Area*, *Porrigo decalvans*—*t. Athrix*, *Alopecia*—*t. Dis-*

trix, *Distrix*—*t. Hirsuties*, *Hirsuties*—*t. Plica*, *Plica*—*t. Poliosis*, *Poliosis*—*t. Setosa*, *Hystri-*
ciasis.

TRICHOTON, *Scalp*.

TRICHURIS, *Tricocephalus*.

TRICOCEPHALUS, *Tricocephalus dispar*; from *τρῑχῑ*, 'a hair,' and *κεφαλή*, 'head.' *Trichu'ris*, *Trichuris vulgaris*, *Trichuris intestinalis*, *As'caris trichu'ria*, *Tricocephalus homin'is*, *Mustigodes hominis*, long thread worm. A worm, from an inch and a half to two inches long; the head acute; the body spirally involuted in the male, almost straight in the female. The *tricocephalus dispar* generally inhabits the cæcum and colon, and is rarely met with in the small intestines. It gives rise to no peculiar symptoms, and requires the usual anthelmintic treatment.

TRICUSPID, *Tricus'pis*; from *tris*, for *tres*, 'three,' and *cuspis*, 'a point.' That which has three points.

TRICUSPID VALVES, *Valvulæ Tricus'pides* seu *triglochinæ* seu *trisulcæ*, are three triangular, valvular duplicatures, formed by the inner membrane of the right cavities of the heart, around the orifice by which the auricle communicates with the ventricle. The elongated and pointed top of each of these valves is continuous with the chordæ tendinæ, which set out from the columnæ carneæ of the heart. These valves are depressed to allow the blood to flow from the auricle into the ventricle; and are raised to prevent its reflux into the auricle.

TRIENS, *Un'ciæ quatuor*. The third part of a pound. Four ounces, Troy.—Galen.

TRIFACIAL, *Trigemini*.

TRIFÉMORO-RÔTULIEN, *Triceps cruris*.

TRIFÉMORO-TIBI-ROTULIEN, *Triceps cruris*.

TRIFOLIUM ACETOSUM, *Oxalis acetosella*—*t. Aquaticum*, *Menyanthes trifoliata*—*t. Aureum*, *Hepatica triloba*—*t. Cervinum*, *Eupatorium cannabinum*—*t. Fibrinum*, *Menyanthes trifoliata*—*t. Hepaticum*, *Anemone hepatica*.

TRIFOLIUM MELILO'TUS OFFICINA' LIS, *Melilotus*, *Lotus sylvestris*, *Sertula Compa'na*, *Trifolium caball'ium*, *Coro'na regia*, *Trifolium odoratum*, *Common melilot*, (F.) *Melilot*. *Famili'is*, *Leguminosæ*. *Sez. Syst.* *Diadelphia Decandria*. The infusion or distilled water of this plant has been employed in cases of ophthalmia. It has also been used in fomentations, gylsters, &c.

TRIFOLIUM PALUDOSUM, *Menyanthes trifoliata*—*t. Palustre*, *Menyanthes trifoliata*.

TRIGAS'TRIC, *Trigas'tricus*, *Triven'ter*; from *τρῑς*, 'three,' and *γαστήρ*, 'belly.' That which has three bellies. An epithet for muscles so circumstanced.

TRIGEMINI, from *tris*, 'three,' and *gem'inus*, 'double,' 'threefold,' 'triplets.' The fifth pair of nerves, *Par trigem'inum*, *Nervi divisi*, *N. gustato'rii*, *Nervus quintus*, *Par quintum nervorum cerebr'alium*, *N. tremellus*, *N. mixtus*, *N. sympathet'icus med'ius*, *N. sympath'icus medius*, *N. anon'ymus*, *N. innomina'tus*, *Par trium funiculor'um*, *Trifu'cial*, *Nerv' gustatif*, *innominé*, *Nerv' à trois cordes*, (F.) *Nerv' trijumeau*. This nerve arises below the tuber annulare by one large posterior root from the corpora restiformia, and by two small anterior roots from the corpora olivaria, whence, proceeding forwards to the side of the sella turcica, the filaments

composing the large root form a ganglion—the Gasserian. Emerging from this ganglion, the filaments, of which the large root consists, form, with those constituting the small roots, and which had not passed through the ganglion, two flattened trunks, each of which is soon divided into three branches, in such a manner, however, that the *first*, or *ophthalmic branch*, and the *second* or *upper maxillary*, are composed exclusively of the filaments that arose from the corpora restiformia and passed through the Gasserian ganglion; whilst the *third* or *lower maxillary branch* is composed in part of those filaments, and in part of those that arose from the corpora olivaria, and passed on one side of the ganglion without going through it. The whole, therefore, of the first and second branches, and a part of the third are sensiferous nerves, whilst the remaining part of the third—the *manducatory* or *masticatory*—is wholly motiferous, and passes to the pterygoid and other muscles concerned in mastication.

TRIGONE CÉRÉBRAL, Fornix—*t. Vésical*, see Urinary Bladder.

TRIGONELLA FÆNUM, *Fænugreek*, *Fænum Græcum*, *Bu'ceras*, *Carpophos*, *Ægoc'eras*. (F.) *Fænugrec*. Family, Leguminosæ. *Sex. Syst.* Diadelphia Decandria. A native of the south of France. The seeds have a strong, disagreeable smell, and an unctuous, farinaceous taste; accompanied by a slight bitterness. They are chiefly used in poultices.

TRIGONOS, Triangular.

TRIGONUS LIEUTAUDI. See Urinary bladder.

TRIOCEPHALIA, Aprosopia.

TRIORCHIS, from *τρεῖς*, 'three,' and *ὄρχις*, 'a testicle.' One who has three testicles.

TRIOS' TEUM, *T. Perfoliatum*. *Bastard Ipecacuan'ha*, *Fever Root*. In very large doses, the bark of the root proves emetic. It is a good cathartic, in doses of twenty or thirty grains. It sometimes operates as a diuretic.

TRIPE DE ROCHE. Different lichens of the species *Gyrophora*, inhabiting the arctic regions of America, bear this name. They are eaten as food by the hunters.

TRIPIAR'MACUM, *τριψαρμακον*. A medicine composed of three ingredients.

TRIPSIS, Trituration.

TRIQUETRUM, (OS.) Cuneiform, (bone.)

TRISMUS, from *τριζω*, 'I gnash.' *Enta'sia Trismus*, *Capistrum*, *Tonos Trismus*, *Locked Jaw*, *Spasmus maxill'æ inferioris*, *Tet'anus maxill'æ inferioris*, *Tortu'ra Oris*, (F.) *Mul de Machoire*. Spastic closure of the under jaw; and a partial tetanus. Cullen makes two varieties—*T. nascentium*, *T. neonatorum*, *Sarrète*, attacking infants during two weeks from birth; and *T. traumaticus*, originating from a wound.

TRISMUS CAPISTRATUS, *Brédissure*—*t. Catarhalis maxillaris*, *Neuralgia maxillaris*—*t. Clo-nicus*, *Neuralgia faciei*—*t. Dolorificus*, *Neuralgia faciei*—*t. Maxillaris*, *Neuralgia faciei*—*t. Nascentium*, see *Trismus*—*t. Neonatorum*, see *Trismus*.

TRISPER'MUM, from *τρεῖς*, 'three,' and *σπέρμα*, 'a grain or seed.' A cataplasm, consisting of three seeds,—*cumin*, *bay*, and *small-age*.—Gorræns.

TRISPLANCHNIA, Cholera.

TRISPLANCH'NIC, *Trisplanch'nicus*; from

τρεῖς, 'three,' and *σπλᾶγχνον*, 'viscus.' That which relates to three orders of viscera.

TRISPLANCHNIC NERVE, *Great sympathet'ic*, *Intercos'tal*, *Ganglion'ic nerve*, *Nerve of organ'ic life*, *Ver'tebral nerve*:—named by Bichat the *organic nervous system*, in opposition to the other nervous parts, called the *animal nervous system*. Gall terms it, the *nervous system of the automatic functions*. It is called *Trisplanchnic*, because it distributes its branches to the organs in the three great splanchnic cavities—the head, chest, and abdomen. It is composed of a series of ganglia, united by intermediate branches, and passing along the side of the spine to the lowest part of the trunk; communicating, by a branch, with each of the thirty pairs of spinal nerves and several of the cerebral nerves; and detaching nerves from its several ganglia, which accompany the arteries, and are distributed, particularly, to the organs of involuntary functions. At its upper part, it is concealed in the canalis caroticus and cavernous sinus, and is joined there by a branch of the 6th pair of nerves, and by a twig from the Vidian nerve of the 5th pair. In passing down by the side of the spine, it forms three ganglia in the neck:—the *superior*, *middle*, and *inferior*; 12 in the back,—the *thoracic*; 5 in the loins—the *lumbæ*; and three or four *sacral*. When it reaches the coccyx it unites with its fellow from the opposite side, forming a small ganglion—the *coccygeal*. Meckel divides it into two portions—1. The *central ganglions* or *central part*, composed of the numerous ganglionic plexuses in the abdomen; the centre of which is the *semilunor and solar plexuses*. 2. The *external ganglions*, *Limitrophes* or *external part*, which comprise the series of ganglions, situate at the sides of the spine, from the base of the cranium to the sacrum. The great sympathetic seems to form a distinct nervous system, destined for the organs of involuntary motion; for, although communicating with both brain and spinal marrow, it does not seem to be immediately under the influence of either.

TRISSAGO, *Teucrium chamædrys*—*t. Palustris*, *Teucrium scordium*.

TRISTEMANIA, Melancholy.

TRISTERNAL. Béchard has given this name to the third bony portion of the sternum;—that which corresponds to the third intercostal space.

TRISTIA, Athymia.

TRITÆOPHYA AMERICANA, *Fever*, yellow.

TRITÆOPH'YES, *Tritæoph'ya*, from *τριταῖος*, 'tertian,' and *φύω*, 'I originate.' A fever, whose type approaches the tertian. Sauvages gave the name *Tritæophya Vratislaviensis*, to an epidemic, which broke out in the Prussian army at Breslaw, in the middle of the last century.

TRITÆUS, Tertian fever.

TRITICUM ÆSTIVUM, 'Summer wheat.' *Trit'icum Hybern'um*, *Wheat*, *Pyros*, *Fru ment'um*, (F.) *Froment*. Family, Graminæ. *Sex. Syst.* Triandria Digynia. From these plants our wheaten flour is obtained, by grinding the seeds; and to them we are indebted for our bread and pastry. The nutritive properties of wheaten flour are so well known as not to need comment.

Bread, (F.) *Pain*, mixed with milk, constitutes

the ordinary emollient poultice;—and the *crumbs of bread*, *Micæ panis*—are a common excipient for pills and boluses.

TRITICUM FAGINUM, *Polygonum fagopyrum*.

TRITICUM REPENS, *Gramen caninum*, *Gramen Dioscoridis*, *G. repens*, *Lolium radice repente*, *Dog's grass*, *Couch grass*, (F.) *Chicident*. The roots are sweet, and possess aperient properties. They are said, also, to be diuretic.

TRITIO, Contritio, Trituration.

TRITURA, Contritio.

TRITURATIO, *Trituratio*, *Tritura*, *Tritio*, *Tripsis*, from *terere*, *tritum*, 'to bruise.' The act of reducing a substance to powder.

TRITURATIO, Contritio.

TRITUS, Contritio.

TRIVENTER, *Trigastric*.

TROCAR, *Acus paracentica*, *A. triquetra vulgaris*, *Paracenticon*. Corrupted from the (F.) *Troisquarts* or *Trocart*, "three quarters;" so called from the triangular shape of the point, *Triquetrum*:—an instrument used for evacuating fluids from cavities, particularly in ascites, hydrocele, &c. A trocar consists of a perforator or stilet and of a cannula, which is so adapted to the perforator, that, when the puncture is made, both enter the wound with facility; after which, the stilet being withdrawn, the cannula remains in the wound and affords the fluid a ready passage outwards.

TROCART, Trocar.

TROCH, Trochiscos.

TROCHANTER, *Trokanter*, *Rota'tor*, from *τροχων*, 'I turn.' Anatomists have given the names—*great* and *little trochanter* to two processes at the upper extremity of the femur. The *great trochanter* is the one on the outside; the *less* is lower down and more internally. Both afford attachment to rotator muscles of the thigh, and hence their name. Chaussier, by the word *trochanter*, means the larger process; the smaller he calls *trochantin*.

TROCHANTERIAN, *Trochanterid' nus*, *Trokanterian*. That which belongs or relates to the great trochanter.—Chaussier.

TROCHANTINIAN, *Trokanthinian*, *Trochantinid' nus*. That which belongs or relates to the trochantin or lesser trochanter.

TROCHES OF CARBONATE OF LIME, *Trochisci carbonatis calcis*—t. of Chalk, *Trochisci carbonatis calcis*—t. Escharotic, *Trochisci escharotici*—t. Gum, *Trochisci gummosi*—t. of *Ipecacuanha*, *Trochisci Ipecacuanhæ*—t. *Liquorice*, *Trochisci glycyrrhizæ*—t. *Liquorice*, with opium, *Trochisci glycyrrhizæ cum opio*—t. of *Magnesia*, *Trochisci Magnesie*—t. *Nitre*, *Trochisci nitratis potassæ*—t. of *Peppermint*, *Trochisci menthæ piperitæ*.

TROCHIA, Orbit.

TROCHILIA, Trochlea.

TROCHIN, from *τροχειν*, 'to turn.' Chaussier has given this name to the smaller of the tuberosities, at the upper extremity of the os humeri; because it gives attachment to one of the rotator muscles of the arm,—the subcapularis.

TROCHINIAN, *Trochinia' nus*. That which belongs or relates to the trochin.

TROCHISCUS, *Phthois*, *Artis' cus*, *Collix*, *Colix*, *Phthois' cos*, *Rot' ula*, *Cyclis' mos*, diminutive of *τροχος*, 'a wheel.' A *troch* or *round tablet*, (F.) *Trochisque*. See *Pastil* and *Tabella*. A solid medicine, prepared of powders, incor-

porated by means of mucilage, crumb of bread, juices of plants, &c. In French nomenclature, the *trochisque* differs from the *tablette*,—the former containing no sugar. This form of preparation is adopted for the purpose of allowing the medicines, of which the troch is composed, to dissolve slowly in the mouth, and to pass gradually into the stomach.

TROCHISCI BECHICI NIGRI, *Tr. glycyrrhizæ glabriæ*.

TROCHISCI CARBONATIS CALCIS, *Troches of Carbonate of lime*, *T. of chalk*, *Tabellæ ad ardo'rem ventriculi*, *Lozenges for the heartburn*, *Tabellæ cardial' gicæ*, *T. ad sodam*, *Trochis' cæ cretæ*, *T. cretæ* (Ph. U. S.) (*Cret. pp. 3iv*, *acaciæ*, in pulv. 3j, *myrist.* in pulv. 3j, *sacch.* in pulv. 3vj. M. Form into troches with water.) Antacid and absorbent.

TROCHISCI ECRETÆ, *Tr. carbonatis calcis*—t. *Cretæ*, *T. carbonatis calcis*.

TROCHISCI VEL PASTILLI EMETINÆ PECTORALES, *Pectoral Lozenges of Emetine*. (*Sugar*, 3iv, *emetine*, 32 grains. Form into lozenges of 9 grains each.) One is a dose.

TROCHISCI ESCHAROTICI, *Escharotic Troches*. (*Hydrag. ozymur.* p. 8, *amyli*, p. 16, *mucilag. g. tragac.* q. s. Make into troches to which a few drops of laudanum may be added.) Used in foul ulcers, to remove excrescences, &c.

TROCHISCI ESCHAROTICI DE MINIO. (*Oxyd. plumbi. rubr.* p. 16, *hydrag. ozymur.* p. 32, *mic. panis*, p. 123, *aq. rosæ*, q. s.) Used like the last.

TROCHISCI GLYCYRRHIZÆ GLABRÆ, *Liquorice Troches*, *Black pectoral lozenges*, *Trochis' ci bechici nigri*. (*Ext. glyc. glabr.*, *gum. acac.* aa p. j. *sacch. purif.* p. ij. Dissolve in warm water; strain; evaporate, and form into troches. Ph. E.) Demulcent. To allay cough.

TROCHISCI GLYCYRRHIZÆ CUM OPIO, *T. G. et opii*, *Trochisci Thebaidici*, *T. sedati' vo-balsamici*, *T. pectorales regis Danorum*, *Liquorice Troches with Opium*. (*Opii*, in pulv. 3ss, *glycyrrhiz.* in pulv. *sacchar.* in pulv. *acaciæ*, in pulv. aa 3x, *ol. anisi*, f. 3ij. Make into troches. Ph. U. S.) Demulcent and anodyne.

TROCHISCI GUMMOSI, *Gum Troches*. (*G. acac.* p. v. *amyli*, p. i. *sacch. pur.* p. xij. Make up the troches with rose-water. Ph. E.) Demulcent.

TROCHISCI IPECACUANHÆ, *Troches of Ipecacuanha*. (*Ipecacuanh.* in pulv. 3ss, *sacchar.* in pulv. 3xiv, *marantæ*, in pulv. 3iv, *mucilag. Tragacanth.* q. s. Make into troches. Ph. U. S.)

TROCHISCI MAGNÆSIE, *Troches of Magnesia*. (*Magnes. 3iv*, *sacchar.* ʒij, *myrist.* pulv. 3j, *mucilag. tragacanth.* q. s. Make into troches. Ph. U. S.) Useful in acidity of the stomach, with constipation.

TROCHISCI MENTHÆ PIPERITÆ, *Troches of Peppermint*. (*Ol. menth. piperit.* f. 3j, *sacchar.* in pulv. ʒij, *mucilag. tragacanthæ*, q. s. Make into troches. Ph. U. S.) Used as carminatives.

TROCHISCI NITRATIS POTASSÆ, *Nitre Troches*. (*Nitrat. potassæ*, p. j. *sacch. pur.* p. iij. Make into troches with mucilage of tragacanth. Ph. E.) In slight inflammatory sore throat and fever.

The Parisian Codex has two formulæ for troches, for external use.

TROCHISCI PECTORALES REGIS DANORUM, *Tr. glycyrrhizæ cum opio*—t. *Sedativo-balsamica*, *Tr. glycyrrhizæ cum opio*—t. *Stibiati*, *Tabellæ*

antimoniales Kunkelli—*t. Thebaici*, Tr. gly-cyrrhizæ cum opio.

TROCHISQUE, Trochiscos.

TROCHTER, from τροχῆν, 'to turn.' The larger of the two tuberosities at the upper extremity of the os humeri; so called because it affords insertion to rotator muscles.—(Chaussier.)

TROCHITERIAN, in the language of Chaussier, means any thing belonging or relating to the trochiter.

TROCH'LEA, *Trochilia*, (F.) *Trochlée* ou *Troclée*. A pulley; from τροχῶν, 'I turn.' The articular surface at the lower extremity of the os humeri; so called from its forming a kind of pulley on which the ulna moves, in flexion and extension of the foramen. Also, the cartilaginous pulley, over which the tendon of the trochlearis muscle passes, at the upper and inner part of the orbit.

TROCHLEARIS, Obliquus superior oculi.

TROCHLÉATEUR, **GRAND**, Obliquus superior oculi—*t. Petit*, Obliquus superior oculi.

TROCHLÉE, Trochlea.

TRO'CHOID, from τροχός, 'a wheel,' and εἶδος, 'resemblance.' *Trochoïdes*, *Axæ commissura*. An articulation, in which one bone turns upon another, like a wheel upon its axle; such as the *Alloïdo-axoïd articulation*.

TROCHOIDES, *Axæ commissura*.

TROISQUARTS, Trocar.

TROKANTER, Trochanter.

TROKANTERIAN, Trochanterian.

TROKANTINIAN, Trochantinian.

TROKLÉE, Trochlea.

TROMPE, Tuba—*t. d'Eustache*, Eustachian tube—*t. de Fallope*, Tuba Fallopiana—*t. Uterine*, Tuba Fallopiana.

TROMUS, Tremor.

TRO'NC, Trunk—*t. Brachial*, Brachial artery—*t. Basiliary*, Basiliary artery.

TROPE'OLUM MAJUS, *Indian Cress*, *Nasturtium Indicum*, *Acricola*, *Flos sanguineus monardi*, *Nasturtium Peruvia'num*, *Cardamin'dum minus*. Family, Geraniaceæ. *Sex. Syst.* Octandria Monogynia, (F.) *Cresson des Indes*, *Cresson du Mexique*, *Cupucine*. An antiscorbutic.

TROPHALIS, Colostrum.

TROPHE, Aliment, Cibatio, Pabulum.

TROPHIMOS, Nutritious.

TROPHODES, Nutritious.

TROPHON'OSI, *Trophonou'si*; from τροφή, 'nourishment,' and νόσος, 'a disease.' Diseases of nutrition.

TROSTER. See Spirit.

TROU, Foramen—*t. Anonyme*, Foramen stylomastoideum—*t. Aveugle* ou *Borgne*, Cæcum foramen—*t. de Botal*, Botal foramen, *Ovale foramen*—*t. Déchiré antérieur*, Lacerum anterius foramen—*t. Déchiré postérieur*, Lacerum posterius foramen—*t. Épineux*, Spinale foramen—*t. Mentonnier*, Mental foramen—*t. Optique*, Foramen opticum—*t. Orbitaire supérieur*, Foramen supra-orbitarium—*t. Orbitaire supérieur*, Orbital foramen superior—*t. Ovale*, *Ovale foramen*—*t. Rond*, *petit*, Spinale foramen—*t. Sous-orbitaire*, see Suborbitar canal—*t. Sous-pubien*, Obturatorium foramen—*t. Sphéno-épineux*, Spinale foramen—*t. Sus-orbitaire*, Foramen supra-orbitarium.

TROUS CAROTIDIENS, Carotica foramina—*t. Condylodiens*, Condylodea Foramina—*t.*

de Conjugaison, Conjugationis foramina—*t. de Conjugaison*, see Vertebræ—*t. Olfactifs*, Olfactory foramina—*t. Ruchidiens*, Spinal foramina.

TROUSSEAU, Fasciculus.

TROUSSEAUX ARRIÈRE-MÉSENTÉRIQUES, (F.) A name given by Winslow to the nervous plexus situate between the two mesenteric plexuses, of which it is a dependence, and which descends into the pelvis to concur in the formation of the hypogastric plexus.

TRUBS, Lycoperdon tuber.

TRUELOVE, Paris.

TRUFFE, Lycoperdon tuber.

TRUFFLE, Lycoperdon tuber.

TRUMBUS, Thrombus.

TRUMPETWEED, Eupatorium purpureum.

TRUNK, *Truncus*, (F.) *Tronc*. The principal part of the body, to which the limbs are articulated. The trunk has been divided into three parts;—a *superior*, the *head*;—a *middle*, the *thorax*,—and an *inferior*, the *pelvis*. These three regions contain the great splanchnic cavities. They are united by a common *stulk*—the vertebral column. To the *middle* are articulated the superior extremities; and, to the *inferior*, the lower extremities.

The *trunk* of an artery, vein, nerve, or lymphatic is its largest part, which has not yet given off branches. It is, also, applied to the parent vessel, after branches have been sent off.

TRUSS, from (F.) *trousser*, 'to tie up.' *Brachærium*, *Brachæriolum*, *Arima*, (F.) *Brayer*. A hernial bandage for keeping the hernia reduced. The ancient trusses were inelastic. They consisted simply of a pad and strap. At the present day, elastic bandages are alone employed. They possess the advantage of making an equable and continuous pressure on the aperture of the sac; and of yielding to the changes of form in the abdominal parietes. The most important part of these bandages is a piece of narrow steel, flat and adapted to the shape of the body. This is the *spring*, (F.) *Ressort*. It embraces the body on the side affected; extends from beyond the spine, and terminates opposite the ruptured part, by an iron plate to which it is riveted. The posterior surface of this plate is furnished with a convex *pad*, (F.) *Pelote*, adapted in shape and size to the aperture which it has to close. The spring is covered with leather, and its inner surface is padded; a strap extends from its posterior extremity; passes round the sound side, and is attached to the plate of the pad. This strap is pierced with numerous holes, which allow the patient to tighten or slacken it at pleasure. Trusses have been variously constructed; and different patents obtained for the modifications. They all act upon the above principle. Sometimes they have a double pad.

TRYGODES, Feculent.

TRYPANON, Trepan.

TRYPESIS, Trepanning.

TRYPISIS, Friction.

TSIANA, Costus.

TSJAMPACA, *Michelia champaca*.

TUBA, Tube—*t. Aristotelica*, Eustachian tube—*t. Cæca*, *T. Fallopiana*—*t. Uterina*, *T. Fallopiana*.

TUBE, Tuba, *Trumpet*, *Salpinx*, (F.) *Trompe*. A name given to some parts, which are hollow and have the shape of a trumpet.

TUBE, FALLOPIAN, Tuba Fallopi'na, Oviduc-tus mulie'bris, Vas deferens mulie'ris, Tuba ute-rina, T. cæca, Ductus varico'sus, seu Proces'sus latera'lis, seu Me'atus semina'lis, seu Me'atus semi'na'rius u'teri, (F.) Trompe de Fallope, T. uté-rine, is a canal, floating in the abdomen, and extending on each side from the superior an-gles of the uterus as far as the sides of the brim of the pelvis. They are 4 or 5 inches long. Near the uterus, they are straight and very narrow; but, in their course, they widen, be-come tortuous, and terminate by a free, ex-panded, and *fimbriated extremity*; called, also, *Folia'ceum ornamen'tum, Morsus diab'oli, (F.) Morceau frangé, Pavillon de la trompe, Morceau du diable*. Within, the tubes are hollow and lined by a mucous membrane: the tissue, which it lines, is spongy and erectile. The use of the Fallopian tubes is to conduct the sperm to the ovarium, and the fecundated ovum back to the uterus. They establish a communication be-tween the cavity of the peritoneum and that of the uterus.

TUBE, ŒSOPHAGE'AL, Stomach Tube. A long elastic gum tube, capable of being passed into the œsophagus or stomach.

TUBE, RECTAL. An elastic gum tube, simi-lar to the last, which is sometimes passed into the colon, to remove air from that intestine, or to enable enemata to be thrown up into it.

TUBE, STOMACH. See Tube, œsophageal.

TUBER, Hump, Lycoperdon tuber, Tu-bercle.

TUBER CINE'REUM. A grayish tubercle, seen at the base of the brain behind the commissure of the optic nerves, which is continuous with the infundibulum.

TUBER PELLAGRA, Pellagra—t. Atrodo-occi-pital, Rectus capitis posticus minor—t. Ciba-rium, Lycoperdon tuber—t. Gulosorum, Lyco-perdon tuber—t. Ischio-trochanterien, Quadra-tus femoris—t. Ischii, see Ischiatic—t. Tym-pani, Promontory of the tympanum.

TUBERA TERRÆ, Lycoperdon tuber.

TU'BERCLE, Tu'ber'culum, Tuber. A tumour in the substance of organs, from the production of new matter:—sensation dull; growth slug-gish. In *Pathological Anatomy*, the term is given to a species of degeneration which con-sists of an opaque matter, of a pale yellow col-our: this, in its crude condition, has a con-sistence analogous to that of concrete albumen, but greater: it subsequently becomes soft and friable, and gradually acquires a consistence and appearance analogous to those of pus. Tu-bercles may be developed in different parts of the body; but they are most frequently ob-served in the lungs and mesentery. Pulmonary tubercles are the cause of *Tubercular Phthisis, Tu'ber'cula Pulmo'num, (F.) Tubercle pulmo-naires*. *Mesenteric tubercles* are often met with in the same affection, but particularly in *Tubes Mesenterica, (q. v.)* Laënnec classes the tuber-cles among the accidental tissues, which have no resemblance to the natural tissues, and which never exist except in consequence of morbid action. Others consider them as a scrofulous degeneration. Broussais conceives that they are produced exclusively by inflam-mation of the white vessels. When tubercles in any organ are few in number, they may pass to the state of permanent induration without danger to the patient; but when they are very

numerous, they usually cause serious mischief. Dr. Baron considers that they are produced by hydatids. The morbid condition which gives rise to the development of tubercles, is termed *Tuberculo'sis, Morbus tuberculo'sus, and Dyscras-ia Tuberculosa*.

TUBERCLES DES GLANDES LYMPHA-TIQUES, Scrofula—t. du Foie, Hépat'o-strumosie—t. of the Larynx and Fauces, Pharyngitis, follicular—t. Miliary, see Granulation—t. Pisi-formes, Mamillary tubercles—t. Pulmonaires, see Tubercle—t. Quadrjumeaux, Quadrigemi-na corpora.

TUBER'CULA ARANT'II, Corpora Arantii, Corpuscula Arantii, Tubercles of Arantius or Aranzi. Small eminences at the middle part of the semilunar valves of the pulmonary artery and aorta.

TUBER'CULA ARTHRITICA, Calculi, arthritic—t. Hepatis, Hépat'o-strumosie—t. Nervorum no-dosa, Ganglions, nervous—t. Parva duræ matris, Glandulæ Pacchioni—t. Pulmonum, see Tubercle.

TUBER'CLAR, Tu'ber'culous, Tuberculo'sus, Tu'ber'culate, (F.) Tuberculeux. That which re-lates to tubercles, or which is formed by tuber-cles.

TUBERCULAR or TUBERCULOUS CONSTITUTION or Diathesis, *Phthisio'sis*, is the habit of a body which predisposes to tubercular phthisis; as *Tuberculous Cachexia, Tuberculosis, Morbus tu-berculo'sus, Dyscras-ia tuberculo'sa*, is the condi-tion of one labouring under tuberculosis.

TUBERCULAR MATTER is a morbid produc-tion, contained in cysts, or loose in the tissue of organs. It varies, in its consistence, at the different periods of the tubercular affection: being, at first, compact, and yellowish; at times, calcareous; afterwards pultaceous, semi-fluid, and curdy.

TUBERCULAR PHTHISIS is that produced by the development of tubercles in the lungs.

TUBERCULATE, Tubercular.

TUBERCULATE SARCO'MA of ABERNETHY, Em-phy'ma Sarcoma tuberculo'sum, Tumor tuberculo-sus. Tubercles, firm, round, and clustering; pea-sized or bean-sized; yellowish or brownish-red; when large, disposed to ulcerate, and pro-duce a painful, malignant, and often fatal sore. Found chiefly in the lymphatic glands of the neck; often, simultaneously, in other glands and organs.

TUBERCULATED LIVER, Cirronosis.

TUBERCULEUX, Tubercular.

TUBERCULOSIS. See Tubercle and Tu-bercular Cachexia—t. Pulmonum, Phthisis pul-monalis.

TUBERCULOSUS, Tubercular.

TUBERCULOUS, Tubercular—t. Disease of the Lungs, Phthisis pulmonalis.

TUBER'CULUM CINE'REUM, 'Ash-co-loured tubercle,' diminutive of tuber; Fasci'ola cinerea. A mass of cineritious substance at the top of the calamus scriptorius, which is con-tinuous below with the posterior horn of cine-ritious substance in the cord, and upon the sides with the corpus restiforme.

TUBERCULUM LOWERI, Lower, tubercle of.

TUBEROSITAS TYMPANI, Promontory of the tympanum.

TUBEROSITÉ BICIPITALE, Bicipital tu-bercle—t. Sciatique, see Ischiatic.

TUBEROS'ITY, from tuber, 'a bump.' Ana-

tomists have given this name to eminences or processes, the surface of which is unequal and rough; and which give attachment to muscles or ligaments.

TUBI MEMBRANACEI, see Villous membranes.

TUBULI DURÆ MATRIS, Sinuses of the dura mater—*t. Pelvis renum*, see *Calix*—*t. Uriniferi Bellini*, Uriniferous tubes.

TUBULUS, Cannula.

TUBUS ACUSTICUS, Ear-trumpet—*t. Nervorum*, Neurilemma.

TUE-CHIEN, Colchicum autumnale.

TULIP TREE, Liriodendron.

TULAPIER, Liriodendron.

TUMEFACTIO, Swelling—*t. Mollis*, Puffiness.

TUMEUR, Tumour—*t. Anomale*, see *Hæmatodes fungus*—*t. Blanche*, Hydrarthrus—*t. Carneuse*, see *Hæmatodes fungus*—*t. Erectile*, see *Hæmatodes fungus*—*t. Lymphatique des articulations*, Hydrarthrus—*t. Variqueuse*, see *Hæmatodes fungus*.

TUMOR, Swelling—*t. Albus*, Hydrarthrus—*t. Carneus*, Sarcoma—*t. Cysticus*, Encystis—*t. Cysticus serosus*, Hygroma—*t. Ficosus*, Ficus—*t. Flatulentus*, Emphysema—*t. Fungosus sanguineus*, *Hæmatodes fungus*—*t. Gangliiformis*, Ganglion, nervous—*t. Squamiformis carnosus*, *Lepidosarcoma*—*t. Tuberculosus*, *Tuberculate sarcoma*—*t. Tunicatus*, Encystis.

TUMOUR, from *tumeo*, 'I swell'; *Oncos*, *Oncosis*, *Epar'ma*, *Eparsis*, *Emphy'ma*, *Exerescen'tia* (Sauvages,) *Ecphy'ma*, (F.) *Tumour*. Risings or prominences, of greater or less size, developed by a morbid cause in some part of the body. Cullen defines a tumour to be "a partial swelling without inflammation." Sauvages restricts the term to risings formed by the congestion of a fluid; and he calls *exerescences* those which have a fleshy or osseous consistence. Boyer defines it "any preternatural eminence developed in any part of the body." Good uses it synonymously with tubercle. Boyer's is the best general definition. Tumours differ greatly from each other; according to their seat, the organs interested, their nature, &c.

The French use the term *Tumeur blanche* synonymously with *White swelling*;—see *Hydrarthrus*. The term is, however, applied by the generality of surgeons, to swellings of the greater joints, without change of colour of the skin, and of a more or less firm consistence, which are dependent upon disease of the osseous or of the soft parts about the joint.

Scrofula is the most common cause of these affections.

ERECTILE TUMOUR is a tumour, produced by the development of a soft, vascular tissue, which is susceptible of dilatation and depression. See *Erectile*.

VARICOSE TUMOUR, *Tumor varicosus*, is a circumscribed, bluish tumour, formed by the dilatation and turgescence of the capillary vessels of a part.

TUNBRIDGE, MINERAL WATERS OF. A celebrated acidulous chalybeate in Kent, England, a few miles distant from the village of Tunbridge, and thirty-six miles south of London, which is much frequented. It contains carbonic acid, carbonate of iron, and sulphate of magnesia.

TUNIC, *Tu'nica*, *Chi'ton*, a coat. An envelope. A name given to different membranes, which envelop organs; such are, the tunics or coats of the eye, stomach, bladder, &c.

TUNICA ACINALIS, Uvea—*t. Aciniformis*, Uvea—*t. Acinosa*, Uvea—*t. Adnata*, Conjunctiva—*t. Agnata*, Conjunctiva—*t. Alba oculi*, Sclerotic—*t. Albuginea*, Albuginea—*t. Albuginea oculi*, Sclerotic—*t. Arachnodes*, Arachnoid membrane—*t. Aranea*, Arachnoid membrane—*t. Caduca*, Decidua—*t. Candida oculi*, Sclerotic—*t. Carnosa*, Panniculus carnosus—*t. Conjunctiva*, Conjunctiva—*t. Costalis*, Pleura—*t. Crassa*, Decidua—*t. Dura oculi*, Sclerotic—*t. Durior et crassa*, Sclerotic—*t. Elytroides*, Vaginalis tunica—*t. Erythroides*, Cremaster—*t. Exterior ovi*, Decidua—*t. Extima oculi*, Sclerotic—*t. Filamentosa*, Decidua—*t. Hortensis*, Dianthus caryophyllus—*t. Innominata oculi*, Sclerotic—*t. Interna oculi*, Retina.

TUNICA JACOBI. A highly delicate serous membrane, interposed between the retina and the choroid coat, discovered by Dr. Jacobs, of Dublin.

TUNICA MUSCULARIS, Dartos—*t. Nervorum*, Neurilemma—*t. Prætensa abdominis*, Peritonæum—*t. Reticularis*, Retina—*t. Retiformis*, Retina—*t. Rubicunda scroti*, Dartos—*t. Rubra*, Dianthus caryophyllus—*t. Ruyschiana*, see *Choroid*—*t. Subcostalis*, Pleura—*t. Thoracis*, Corset—*t. Uvalis*, Uvea—*t. Uviformis*, Uvea—*t. Vaginalis*, see *Vaginal*—*t. Vaginalis Linguae*, see *Tongue*—*t. Vasculosa oculi*, Choroid.

TUNICA VASCULO'SA TESTIS, *Pia mater testis*. An extremely delicate membrane, consisting of minute ramifications of the spermatic vessels united by cellular tissue, which separates the lobules of the testis from each other. It is situated immediately within the tunica albuginea, and encloses the substance of the gland. It sends processes inward that separate the lobules, in the same manner as the pia mater is reflected between the convolutions of the brain.

TUNICA VITREA, Hyaloid membrane.

TUNIQUE ALBUGINEE, Albuginea.

TUNNYFISH, SALTED, Omotrichos.

TUPHLO-ENTERITIS, Typhlo-enteritis.

TUPHUS, Typhus.

TURBINATED BONES, *Ossa turbina'ta*. Bones shaped like a top. From *turbo* or *turben*, 'a top.' *Ossa spongio'sa*, Cornua, *Conchæ na'tium*, *Conchylia*, *Bucci'næ*, *Lam'inæ spongio'se nasi*, *Ossa tertia maxillæ superio'ris*. Very thin, bony plates, rolled up in the form of horns, and situate in the nasal fossæ. 1. The *Ossa spongiolum superius* or *Cornet de Morgagni*;—the highest. 2. The *Ossa spongiolum me'dium*, the middle cornu of French anatomists,—the *ethmoid'al cornu* or *Ossa spongiolum superius*, *Ossa turbinatum*, of English anatomists,—*Ossa concholum superius*, *Concha*, (F.) *Cornet Moyen*. This bone projects inwards and downwards into the cavity of the nose, from the ethmoid cells at the side of the nasal lamella, and serves to enlarge the organ of smell. It is convex towards the septum, and concave outwards. 3. The *Ossa spongiolum vel turbinatum inferius*, *Concha inferior*, *Concholum inferius os*, *Ossa sous-ethmoid'al*, (Ch.) projects at the under part of the side of the nose, is convex towards the septum, and concave outwards. It is connected to the os maxillare, os palati, and os unguis. 4. The *Sphenoid'al cornua*, (q. v.)

All the turbinated bones extend the sphere of smell.

TURBITH BLANC, *Globularia alypum*—t. Mineral, *Hydrargyrum vitriolatus*—t. Montpellier, *Globularia alypum*—t. Plant, *Convolvulus turpethum*.

TURGENTIA, *Turgescence*.

TURGES'CENCE, *Turgescen'tia*, *Turgen'tia*, *Orgus'mus*, from *turgescere*, 'to swell.' Superabundance of humours in a part. The term *Turgescence of Bile* was formerly used to denote the passage of that fluid into the stomach, and its discharge by vomiting. A vital action of *Turgescence*—*Turgor vitalis*—or expansibility has been presumed to exist in certain organs, as in the capillaries; but the generality of physiologists do not admit it.

TURGESCENTIA VESICULÆ FELL'Æ, *Ascites hepato-cysticus*, *Physconia biliosa*, *Hepatalgia*, *Petit'na*, *Cystocèle biliosa*, *Hydrops vesicæ fell'æ*, (F.) *Hydropisie de la Vésicule du Fiel*, *Distension de la Vésicule du Fiel*, *Cholicystiectasie*. Distention of the gall-bladder by bile.

TURGOR VITALIS. See *Turgescence*.

TURMERIC, *Curcuma longa*, *Sanguinaria Canadensis*.

TURNING, *Versio*, from (F.) *tourner*, 'to turn,' (F.) *Versio*. The operation of bringing down the feet, or some part of the lower extremity, when the presentation of the child is such, that it cannot be delivered by the natural efforts.

TURNIP, *Brassica rapa*—t. Indian, *Arum triphyllum*.

TURNS, *Menses*.

TURPENTINE, *Terebinthina*—t. Briançon, see *Pinus cembra*—t. Chio, see *Pistacia terebinthus*—t. Common, see *Pinus sylvestris*—t. Cyprus, see *Pistacia terebinthus*—t. Horse, see *Pinus sylvestris*—t. Strasburg, see *Pinus picea*—t. Tree, *Pistacia terebinthus*—t. Venice, see *Pinus larix*—t. Venice, true, see *Pistacia terebinthus*.

TURPETHUM, *Convolvulus turpethum*—t. Minerale, *Hydrargyrum vitriolatus*—t. Nigrum, *Hydrargyri oxydum cinereum*.

TURQUOISE. This stone has been long imagined to change its colour as the wearer is at the time in good or bad health:—a superstitious notion.

TURTLE, GREEN, *Chelonia mydas*.

TURUNDA, *Tent*.

TUSSEDO, *Tussis*.

TUSSILA'GO, *T. Farfara*, *Be'chium*, *Be'chion*, *Cal'ceum equinum*, *Chamæleu'ce*, *Chamægei'ron*, *Fil'ius ante patrem*, *Farfurell'a*, *Gallio-marchus*, *Farfara*, *Tussil'do vulga'ris*, *Farfara Bechium*, *Ungula cavalli'na*, *Coltsfoot*, (F.) *Pas d'ane*. *Family*, *Corymbifera*. *Sex. Syst.* *Syngenesia Polygamia Superflua*. It is demulcent and expectorant, and has been used in coughs, and pulmonary affections in general, and in some cutaneous diseases.

TUSSILAGO PETASITES, *Butterbur*, *Petasites*, *Pesilent-wort*, *Petasites major*, *P. vulgaris*, *P. rubens*. The roots of this plant have been recommended as aperient and alexipharmic.—They have a strong smell; and a bitterish, acrid taste, of the aromatic kind, but not agreeable.

TUSSIS, *Cough*, *Be'x*, *Tusse'do*, *Be'xis*, *Tussis nera'da*, *Catar'rhus*, *Pneusis Tussis*, (F.) *Toux*. Violent, sonorous, frequent, and short expira-

tions; by means of which the air, in passing rapidly through the bronchia and trachea, carries along with it the mucus of the parts, which forms the sputa, (q. v.) The cough is said to be *dry*, when unaccompanied by expectoration. It is symptomatic of many diseases. See *Bronchitis*.

TUSSIS CATARRHALIS SIMPLEX, *Catarrh*—t. *Clamosa*, *Pertussis*—t. *Clangosa*, *Pertussis*—t. *Convulsiva*, *Pertussis*—t. *Ferina*, *Pertussis*—t. *Pueros strangulans*, *Pertussis*—t. *Quinta*, *Pertussis*—t. *Senilis*, *Bronchitis* (chronic),—t. *Spasmodica*, *Pertussis*—t. *Stomachalis*, *Pertussis*—t. *Suffocativa*, *Pertussis*.

TUTAM'INA, *Tuta'men*, 'a defence,' 'a protection,' from *tutare*, 'to defend.' Parts are so called which defend or protect each other.

TUTAMINA CEREBRI are the scalp, pericranium, bones of the skull, and the meninges.

TUTAMINA OCULI are the eyebrows, eyelids, and lachrymal apparatus.

TUTENAG, *Zincum*.

TUTHIA, *Tutia*.

TUTIA, *Pom'pholyx*, *Cadmia*, *Alfasa*, *Mesera*, *Capnitis*, *Tuthia*, *Oxydum zinci impurum*. The oxyd of zinc that attaches itself to the chimneys of furnaces, in which ores of zinc are smelted. It is in the form of gray incrustations; and is sometimes used for making an eye-salve. It is prepared, for this purpose, by levigation.

TWINKLING OF THE EYE, *Nictation*.

TWINS, SIAMESE. Two brothers, Chang and Eng, connected by means of a ligamentous band passing from the epigastrium of one to that of the other, who were exhibited in various parts of Europe and America, about the year 1830. See *XIPHOPAGES*.

TWITCHING, *Tic*.

TYCH'ICA, from *τυχη*, 'accident.' Fortuitous lesions or deformities. The 7th class of *Good's Nosology*.

TYLOMA, *Callosity*.

TYLOSIS, *Callosity*.

TYMMA, *Wound*.

TYMPAN, *Tympanum*.

TYMPANIA, *Tympanites*.

TYMPANIAS, *Tympanites*.

TYMPANITA, *Tympanites*.

TYMPANITES, *Emphyse'ma Abdom'inis*, *Hydrops Tympanitis*, *Affectio tympanit'ica*, *Pneumatosis Abdom'inis*, *Hydrops abdominis aëreus*, *Chol'era sicca*, *Aero-enterectasia*, *Physocælia*, *Tympanosis*, *Phys'e'ma*, *Phys'e'sis*, *Hydrops siccus et flatulentus*, *Tympania*, *Tympa'nias*, *Tympanit'a*, *Emphyse'ma Tympanites*. *Meteoreorismus*, *E. Tympaniticum*, *Tymp'any*, *Meteorism*, (F.) *Bul-lonnement*, from *τυμπαρον*, 'a drum;' so called because the abdomen is distended with wind, and sounds like a drum when struck. A swelling of the abdomen, caused by accumulation of air in the intestinal tube or in the peritoneum. Tympanites may be idiopathic or symptomatic. The former depends upon exhalation of air from the inner surface of the intestine, or from the decomposition of substances contained in it; the latter is the result of some organic affection, and often depends upon obliteration of the digestive tube, which prevents the gas from escaping. Idiopathic tympanites may be more readily cured. The symptomatic is usually fatal. On dissection, in such cases, the stomach and intestines are found enormously distended;

with strangulation or disorganization of some part of the mucous membrane of the intestine. Carminatives may be proper when tympanites depends upon atony of the digestive organs; but, in cases of the symptomatic kind, they cannot be productive of advantage, and may do harm.

Sometimes the air is contained in the cavity of the peritoneum—constituting *Tympanites abdominalis*, *Aeroperitonæ*, of some:—the accumulation in the intestines being called *Tympanites intestinalis*.

TYMPANITES, UTERINE, *Physometra*.

TYMPANITIS, *Inflammatio tympani*; from *τυμπανος*, 'a drum,' and *itis*, denoting inflammation. Inflammation of the lining membrane of the middle ear.

TYMPANOSIS, *Tympanites*

TYMPANUM, *τυμπανον*, 'a drum.' The Drum or Barrel of the Ear. The names *Cavity of the Tympanum* or *Cavity of the Drum*, *Cavitas Tympani*, *Antrum* seu *Cavitas antrorsa Auris*, *Cacum Tympani*, (F.) *Tympan*, *Cavité du tympan*, *Caisse du tambour*—have been given to a cavity of an irregular shape, which constitutes the middle ear, and has been compared to a drum. It is situate in the pars petrosa of the temporal bone, between the meatus auditorius externus and the labyrinth. This cavity is lined by a mucous membrane; and communicates, externally, by means of the Eustachian tube, which is situate between it and the pharynx. The tympanum has six parietes. 1. An external, which is almost entirely formed of the Membrane of the Drum, *Membrana tympani*, *Myrin'ga*, *Myrinz*, (F.) *Membrane du tympan*—a species of thin, transparent, circular septum; convex within, and concave without, which closes the inner extremity of the meatus auditorius. 2. An internal, on which are the *Fenestra ovalis*, *Promontory*, and *Foramen rotundum*. 3. A superior. 4. An inferior, on which is the *glenoid fissure*. 5. A posterior, on which are, the opening of the mastoid cells, and the pyramid. 6. An anterior, on which are, the *Processus cochleariformis* and the inner orifice of the Eustachian tube. The cavity of the tympanum is crossed by a series of four small bones, articulated with each other by diarthrosis, moved by certain muscles, and representing a kind of bent lever extending from the membrana tympani to the fenestra ovalis. They are called the *Bones* or *Ossicles of the Ear*, and are the malleus, incus, orbicular, and stapes.

For the nervous plexus of the tympanum, see Petrosal Ganglion, and Otic Ganglion.

TYMPANY, *Tympanites*—t. of the Womb, *Physometra*.

TYPE, *Typus*, from *τυπος*, 'a stamp,' itself from *τυπω*, 'I strike.' The type is the order in which the symptoms of a disease exhibit themselves, and succeed each other. It may be continued, intermittent, or remittent.

TYPIA AROMATICA, *Acorus calamus*.

TYPHIQUE, Typhoid.

TYPHLITIS, Typhlo-enteritis.

TYPHLO-ENTERITIS, *Typhlo-enteritis*, *Typhlitis*, *Inflammatio Cæci*, *Phlegmonous Tumour of the Cæcum*, (F.) *Inflammation du Cæcum*, from *τυφλος*, *cæcus*, and *enteritis*, 'inflammation of the intestines.' Inflammation of the cæcum, occasionally leading to perforative ulceration.

TYPHLOSIS, *Cæcitas*.

TYPHLOTERON MONOCOLON, *Cæcum*.

TYPHLOTES, *Cæcitas*.

TYPHODES, Typhoid.

TYPHOLEMIA, see Putrefaction.

TYPHOID, *Typhoides*, *Typhodes*, *Lactica*, (F.) *Typhique*, *Typhode*. Resembling typhus; as *Typhoid Fever*. Also, typhus, according to some, (q. v.)

TYPHOID AFFECTION, see Typhus—t. Fever, of India, *Cholera*.

TYPHOMA'NIA, *τυφομανια*, from *τυφος*, 'stupor,' and *μανια*, 'delirium.' *Delirium iuth stupor*, *Subdelirium*. The kind of delirium common in typhus.

TYPHOMANIA, *Coma vigil*, *Insomnia*.

TYPHONIA, *Coma vigil*.

TYPHOSEPTOSES, from *τυφος*, 'stupor,' and *σηπτις*, 'putrefaction.' Typhous affections.

TYPHUS, *Semipestis*, *Tuphus*, *Febris Typhodes*, (F.) *Fièvre adynamique*, *F. atuzique*, *Typhus d'Europe*, from *τυφος*, 'stupor.' A fever characterized by small, weak, and unequal, but usually frequent pulse, with great prostration of strength, and much cerebral disturbance; its duration being usually from a fortnight to three weeks or longer. It is continued fever, accompanied with great cerebral irritation and prostration. (See Fever.) By most writers, this disease has been divided into two varieties—the *Typhus mitior* and *Typhus gravior*. TYPHUS MITIOR, *T. simplex*, *T. nervosus*, *T. comatosus*, *Febris lenta nervosa*, *Blechnop'yrus*, *F. putrida nervosa*, *F. hectica maligna nervosa*, *Nervous Fever*, *Neurop'ya*, (F.) *Fièvre nerveuse*, is characterized by slight shiverings, heavy, vertiginous headache; great oppression, peculiar expression of anxiety, nausea, sighing, despondency, and coma or quiet delirium.

TYPHUS GRAVIOR, *Typhus carcerum*, *T. castrensis*, *Febris pestilens maligna*, *Febris nautica pestilentialis*, *Febris petechialis*, *Typhus petechialis*, *Pulicul'ris morbus*, *Febris puncticul'ris*, *F. Sapprop'ya*, *F. carcerum et nosocomiorum*, *F. Putrida*, *Septop'ya*, *Putrid Fever*, *Jail Fever*, *Hospital Fever*, (F.) *Fièvre des Camps*, *F. nautique*, *F. d'Hôpital*, *F. nosocomiale*, *F. des Prisons*, *F. lenticulaire*, is attended with rigors and heat, alternating; little or no perspiration; pulse, tense and hard, usually quick, but fluttering; pain over the forehead and vertex; delirium, succeeded by stupor; signs of incipient putrescency,—as petechiæ, vibices, hemorrhages, &c. Typhus, under particular circumstances, seems to be communicable by contagion; but, if proper attention be paid to cleanliness and ventilation, there is not much danger of communication. The general principles of treatment, laid down under the head of Fever, are applicable here. All the varieties of continued fever resemble each other in the cardinal points, although they may differ in many of their characters. Ventilation and cleanliness; warm or cold ablation or sponging; keeping the bowels free; and attending to symptoms as they may rise, with the avoiding of all irritation of every kind, are the main indications. When symptoms of great prostration occur, the strength must be supported by wine; and tonics be exhibited, with the mineral acids. Of the tonics, the sulphate of quinia is perhaps as good as any, whilst it is free from the objection which applies to most

others,—of being too bulky. In the whole management of this affection, however, the physician has to discriminate carefully between oppression and prostration. The former may require evacuations: the latter cannot.

Of late, certain observers have endeavoured to show, that there is an essential difference between typhoid fever, and typhus: that the former is an abdominal affection, and dependent upon, or connected with, an inflamed or ulcerated condition of the mucous follicles of the intestines; hence it has received the names *Fièvre mésentérique*, *F. entéro-mésentérique*, *Entérite typho-hémique*, *Exanthème intestinal*, *Dothinenterite*, (q. v.) *Ileodididite*, *Entérite folliculeuse*, *Gastro-enterite* with nervous affection of the brain, *Follicular gastro-enteritis*, *F. enteritis*, *Typhus abdominalis*, *T. ganglionaris abdominalis*, *Febris intestinalis ulcero-sa*, *Typhus entericus*, *Typhoid affection*, *Dothinenteria*. Accompanying this form of fever there is generally a typhoid eruption, consisting of rose-red papulæ, which appear mostly on the abdomen. They are distinct from true petechiæ, as they can be removed by pressure, and distinct also from sudamina, which are perhaps the universal accompaniments of sweating, and are consequently a variety of miliaria. The common continued fever, or Synochus (q. v.) of Great Britain, and of this country, has been presumed

to be this variety: but further observations are needed to establish the distinctions which have been attempted, and there is some reason to believe, that the abdominal affection is a complication, existing in certain cases and epidemics, and not in others. The *Red Tongue Fever* of Kentucky is considered by Professor Bartlett to be typhoid fever.

TYPHUS ABDOMINALIS, see Typhus—*t. d'Amérique*, Fever, yellow—*t. Aphthoideus*, Aphthæ—*t. Carcerum*, Typhus gravior—*t. Castrensis*, Typhus gravior—*t. Comatosus*, Typhus mitior—*t. d'Europe*, Typhus—*t. Ganglionaris abdominalis*, see Typhus—*t. Icterodes*, Fever, yellow—*t. Miasmaticque ataxique pu'ride jaune*, Fever, yellow—*t. Morbillosus*, Rubæola—*t. Nervosus*, Typhus mitior—*t. d'Orient*, Plague—*t. Pestis*, Plague—*t. Petechialis*, Typhus gravior—*t. Scarlatinus*, Scarlatina—*t. Simplex*, Typhus mitior—*t. Tropicus*, Fever, yellow—*t. Vesicularis*, Pemphigus.

TYRANNUS. See Critical days.

TYREMESIS, from τυρος, 'cheese,' and ἐμεσις, 'vomiting,' Tyrosis, Tyreusis. Vomiting of curdy matter, in infants especially.

TYREUSIS, Tyremesis.

TYRIASIS, Elephantiasis Arabica.

TYRODES, Cheesy.

TYROS, Cheese.

TYROSIS, Tyremesis.

U.

ULA, Gingivæ.

ULATROPHIA, from οὐλον, 'the gum,' and atrophia, atrophy. Shrinking of the gums; falling away of the gums.

ULCER, *Ulcus*. *Helcos*, *Elco'sis*, *Elco'ma*, *Helco'ma*, a Sore. (F.) *Ulçère*. A solution of continuity in the soft parts, of longer or shorter standing; accompanied by a purulent discharge, and kept up by some local disease or constitutional cause. Professor Richerand makes four great distinctions between a wound and an ulcer. 1. A wound arises from the action of an extraneous body:—the cause of an ulcer is inherent in the economy. 2. A wound is always idiopathic:—an ulcer is always symptomatic. 3. A wound has essentially a tendency to heal, because the action of its cause has been momentary:—an ulcer, on the contrary, has a tendency to enlarge, because its cause persists. 4. The treatment of a wound is purely surgical; that of an ulcer is medical as well. The immediate cause of an ulcer is an augmented action of the absorbents; and a specific action of the small vessels, which secrete pus from the blood. Ulcers have been variously divided, according to their nature:—into *simple*, *sinuous*, *fistulous*, *fungous*, *gangrenous*, *scorbutic*, *syphilitic*, *cancerous*, *invertebrate*, *scrofulous*, *phagedenic*, *virulent*, *cacoethic*, *sordid*, *curious*, *varicose*, &c. The treatment consists in removing, by appropriate means, the internal or local cause which keeps up the ulceration, and in exciting the vessels of the part, where necessary, by appropriate bandaging.

ULCER. MALIGNANT, Hospital gangrene—*u. Putrid*, Hospital gangrene.

ULCERA SERPENTIA ORIS, Aphthæ.

ULCERATION, *Ulcera'tio*, *Exulcera'tio*. A superficial ulcer. The formation of an ulcer, —*Exelco'sis*.

ULCÈRE, Ulcer—*u. de Larynx*, Phthisis laryngea.

ULCEROUS, *Ulcero'sus*, *Helco'des*, *Helcoïdes*. Having the character of an ulcer.

ULCERS, EGYPTIAN, *Ægyptia ulcera*.

ULCUS, Ulcer—*u. Atonicum*, Rupia—*u. Cancrosum*, Cancer, Chancre—*u. Depascens*, Phagedenic ulcer—*u. Narium fœtens*, Ozæna—*u. Syriacum*, Cynanche maligna—*u. Telephium*, Telephium—*u. Tuberculosum*, Lupus.

ULCUSCULUM CANCROSUM, Chancre.

ULE, Cicatrix.

ULITIS, from οὐλος, 'solid.' (Σαξὲ οὐλή, 'solid flesh;' hence οὐλον, 'the gum.') *Inflam-ma'tio gingivæ*, (F.) *Gingivite*, *Inflammation des Gencives*, from οὐλον, 'the gum,' and *itis*, denoting inflammation. Inflammation of the gums.

ULMAIRE, Spiræa ulmaria.

ULMARIA, Spiræa ulmaria.

ULMUS, *U. campestris*, *Ptelea*, *Common Elm*. (F.) *Orme*. Family, *Amentacæ*. Sex. Syst. Pentandria Digynia. The inner, rough bark of this tree is inodorous; and has a bitter, austere, and mucilaginous taste. It is considered tonic, alterative, and diuretic; and has been used, chiefly, in lepra and other cutaneous affections.

ULMUS ALA'TA, *Lynn Wahoo*. The bark of the root has been used successfully as a cataplasin in phlegmonous inflammation.

ULMUS AMERICA'NA, *U. fulva*, *Rough-leaved Elm*, *Red Elm*, *Slippery Elm*. The inner bark is highly mucilaginous, and is used in coughs,

diarrhœas, and dysenteries; also, as a poultice for tumours; lacerated and contused wounds, &c.

ULMUS CAMPESTRIS, Ulmus—u. Fulva, U. Americana.

ULNA. *O'lenz*, *Foc'ilē inferius seu majus*, *Canna Brachii*, *Os cubiti inferius*, *Os procubitalē*, *Cubitus*, *Cubit*, *Arundo brachii major*; the *Elbow*, (q. v.) Anatomists have given this name to the bone of the forearm, which forms the prominence of the elbow, during the flexion of that joint. It is the longer and larger of the two bones, and is inserted at the inner side. Its upper and larger extremity has, behind, a considerable process, called *olecranon*; and, before, a smaller one, called *coronoid*. These two eminences are separated from each other by the greater *sigmoid* or *semilunar fossa*, which receives the articular trochlea of the humerus. The tubercle of the ulna is a small, rough spot, under the root of the coronoid process, for the insertion of the *Brachialis internus*. On the outside of this extremity of the bone, is the *lesser sigmoid cavity*. It is articulated with the head of the radius. The inferior extremity of the cubitus, which is much smaller than the superior, and articulated with the radius, has a surface, that corresponds to the fibro-cartilage which separates it from the os cuneiforme; and a pointed process, called *styloid*. The body of the ulna is manifestly triangular. It is articulated with the os humeri and radius, and, mediately, with the os cuneiforme. It is developed by three points of ossification.

ULNARIS EXTERNUS, see Cubital muscles—u. Gracilis, Palmaris longus—u. Internus, see Cubital muscles.

ULOCACE, Stomacace.

ULON'CUS, from *ουλον*, 'the gum,' and *ογκος*, 'a tumour.' Swelling of the gums; Epulis, (q. v.)

ULORRHA'GIA, *Stomatorrhœgia*, *gingivæd-rum*, from *ουλον*, 'the gum,' and *γενννμι*, 'I break forth.' Bleeding from the gums.

ULOTICA, Cicatrisantia.

ULTIMI-STERNAL. Professor Bèclard has given this appellation to the 6th or last bony portion of the sternum. He calls it also *Ensi-sterinal*.

ULTIMUM MORIENS, 'last dying.' A term given to the part of the economy which dies last.

ULVA CRISPA, *Fucus crispus*.

UMBILICAL, *Umbilicalis*, from *umbilicus*, 'the navel.' That which belongs or relates to the navel.

UMBILICAL ARTERIES, which exist only in the fœtus, seem, as it were, continuations of the primitive iliaes. They clear the umbilical ring, and proceed to the placenta, to which they carry the residuum of the blood sent to the fœtus by the umbilical vein. As soon as respiration is established, the blood ceases to pass by the umbilical arteries, which become obliterated, as well as the vein, and are transformed into two very strong ligamentous cords,—the vein forming the *Ligamentum rotundum* of the liver.

UMBILICAL CORD, Funiculus umbilicalis.

UMBILICAL REGION, (F.) *Région ombilicale*, is the middle region of the abdomen, in which the umbilicus is placed. The sides of this are called the *flanks* or *lumbar regions*. In the umbilical region, are the omentum majus; the in-

ferior extremity of the duodenum; the jejunum; and the greater part of the mesentery; the aorta; vena cava; the trunks of the renal arteries and veins; the origin of the spermatic arteries, &c.

UMBILICAL RING, *An'nulus umbilicalis*, (F.) *Anneau ombilical*, is a fibrous ring which surrounds the aperture of the umbilicus, and through which umbilical hernia occurs in children.

UMBILICAL VESSELS, (F.) *Vaisseaux ombilicaux*, include the two arteries, and umbilical vein. The umbilical vein arises from the placenta, and terminates at the fissure on the inferior surface of the liver of the fœtus; to which it conveys the blood necessary for its nutrition.

UMBILICUS, *Umbo*, *On'phalos*, *Umbilic'um*, *Rudix ventris*, *Mesomphalum*, *Protne'sis* (navel of a new-born child;) the navel, from *umbo*, 'the button or prominence in the midst of a buckler,' or from *ὀμφαλος*, or rather *ομφαλος*, which signifies the same, as well as the navel. (F.) *Ombilic*, *Nombril*. A round cicatrix, about the median line of the abdomen. It is in the situation of an aperture, which, in the fœtus, affords passage to the vessels of the umbilical cord.

UMBILICUS MARI'NUS, *Cotyle'don marina*, *Andros'acē*, *Acetabulum marinum*, *Androsacē Matthi'oli*, *Fungus petraeus marinus*. A submarine production, found on rocks and the shells of fishes, in the south of France. It is reputed to be anthelmintic and diuretic.

UMBO, Umbilicus.

UMBRELLA TREE, *Magnolia tripetala*.

UNCAS, INDIAN, *Veratrum viride*.

UNCIA, Ounce.

UNCIFORM, *Uncifor'mis*, from *uncus*, 'a hook,' and *forma*, 'shape.' That which has the shape of a hook.

UNCIFORM EMINENCE, *Hippocampus minor*.

Os UNCIFORM'E, *Os hamat'um*, *Os uncinat'um*, (F.) *Os crochu*. The fourth bone of the second row of the carpus. Its shape is very irregular. Inwards and forwards, it has a considerable eminence, which is curved upon itself, and gives attachment to the annular ligament of the carpus. It is articulated with the os semilunare, os magnum, os cuneiforme, and the 4th and 5th metacarpal bones. It is developed from a single point of ossification.

UNCINUS, Hook.

UNCTIO, Inunction.

UNCTION, Unguentum hydrargyri.

UNCUS, Hook.

UNDERCLIFF, ISLE OF WIGHT, ENGLAND, (CLIMATE OF.) The Undercliff comprehends a tract of country from Dunnose to St. Catherine's Hill, on the south-east coast, about six miles in length, and from a quarter to half a mile in breadth. It is well protected from the colder winds; and the climate is remarkably equable, as well as mild and dry, so that there are not many days during the winter, in which the invalid cannot take some exercise in the open air. It is an excellent climate for the pulmonary valetudinarian.

UNDIM'IA. A name given, by Paracelsus, to a tumour, filled with a gelatinous matter, like the white of egg.

UNDOSUS, *Cynatodes*.

UNDULATIO, Fluctuation.

UNEDO. *Arbutus unedo*—u. *Papyracea*, *Arbutus unedo*.

UNGUEN, Unguentum—u. Articulare, Synovia.

UNGUENT, ARMATORY, Hoplochrysin.

UNGUENTARIA, (F.) see *Myristica moschata*.

UNGUENTARIUS, *Myropœus*, *Myrep'sus*, *Myropœtes*, *Pigmentarius*; from *unguentum*, 'an ointment.' One who makes and sells ointments. A perfumer.

UNGUENTUM, *Unguen*, *Myron*. (F.) *Onguent*, from *ungere*, 'to anoint.' Ointments are topical applications, of a consistence more or less analogous to that of lard. They are used, chiefly, as local applications to ulcers and wounds; but are sometimes rubbed upon a part, in cutaneous affections; and, especially, where it is desired, that the constituents of the ointment should be absorbed. Ointments are of less consistence than cerates, although the terms are often used indiscriminately.

UNGUENTUM ADIPOCERÆ CETORUM, Ceratum cetacei—u. *Ægyptiacum*, *Linimentum æruginis*—u. *Ægyptium album*, *Crinomyron*—u. *Album*, U. cetacei—u. *Oxidi plumbi albi*, U. *plumbi subcarbonatis*.

UNGUENTUM DE ALTHÆÆ, *Marshmall'loro Ointment*, U. de *Terebinthina* et *cerâ*, *Cerdum de Althææ*, *Emplastrum mucilaginosum*, E. *emolliens*, E. *citrinum*, E. *flavum*, E. de *Althææ*, *Unguentum flavum*, U. *citrinum*, U. *resinæ pinii sylvestris compositum seu resumptum seu lenitum*, (F.) *Onguent de guinaure*, O. d'althéu. (*Olei de mucilaginis*, 1000 p., *ceræ flavæ*, 250 p., *resinæ terebinthin.*, aa, 125 p. Liquefy; strain; and stir till cold. Ph. P.) *Common Olive oil* might be substituted for the *Oil of Mucilages*.

UNGUENTUM AC'IDI NITRO'SI, *Ointment of Nitrous Acid*, *Pomatum vel Unguentum Nitricum vel Oxygenatum*, (F.) *Pommade oxygénée*, *Graisse oxygénée*, *Pommade d'Alyon*. (*Adip. suillæ*, ℞j, *acid. nitros.* ℥vj. Melt the fat and rub in the acid, gradually, till cold. Ph. E.) Stimulant. Used in itch and other cutaneous eruptions, and in foul ulcers.

UNGUENTUM ALBUM RESOLVENS, *Linimentum ammoniæ fortius*—u. *Amygdalinum*, *Ceratum Galeni*.

UNGUENTUM ANTIMONII, U. A. *Tartariz'dti*, *Ointment of tartarized antimony*. (*Antimon. et potass. tartrat.* ℥ij, *adipis* ℥ij.) If a drachm of this ointment be rubbed upon any part, night and morning, it will excite, in a few days, a painful pustular eruption. Hence, it is employed as a counter-irritant. This preparation is also called *Ung. Tarturi stibid'ti seu emet'ici*. *Ung. c Tartaro stibid'to*, *Adeps Tartaræ stibii medicatus*, *Ung. Tartatis Potassæ stibid'ti*, *Pommade d'Autenrieth*, *Pommade stibiée*.

UNGUENTUM ANTIMONII TARTARIZATI, u. *Antimonii*.

UNGUENTUM AQUE ROSÆ, *Ointment of Rose water*. Cold cream (*Aq. Rosæ*, ol. *amygdal.* aa f ℥ij; *celacei*, ℥ss; *ceræ albæ*, ℥j. Melt together, in a water bath, the oil, spermaceti and wax; then add the rose water, and stir until it is cold. Ph. U. S.) Cooling to irritated surfaces.

UNGUENTUM ARMARIUM, Hoplochrysa—u. *Arthanitæ*, see *Arthanita*—u. *Articulare*, *Synovia*—u. *Basilicon flavum*, *Ceratum resinæ*—u. *Basilicon nigrum*, U. *resinæ nigræ*—u. *Basilicum viride*, U. *subacetatis cupri*—u. *Cantharidis*, U. *lyttæ*—u. *Cantharidis*, U. *Lyttæ*.

UNGUENTUM CERÆ, (*albæ vel flavæ*) *Wax Ointment*. *Unguentum simplex*, *Linimentum simplex*, *Oil and Bees Wax*, (F.) *Onguent de cire*. (*Ceræ* ℞j, *adipis* ℞iv. Ph. U. S. or—*ceræ* ℥ij, ol. oliv. ℥v.) Emollient. A mild dressing. Also, the basis of most of the compound ointments.

UNGUENTUM CERATUM, *Ceratum Galeni*—u. *Cerussæ*, U. *oxidi plumbi albi*, U. *plumbi subcarbonatis*—u. *Cerussæ acetatæ*, *Ceratum plumbi superacetatis*, U. *plumbi superacetatis*—u. *Citrinum*, U. de *althææ*.

UNGUENTUM CETACEI, *Unguentum Spermat'is Ceti*, U. *album*, *Linimentum album*, *Spermaceti ointment*, (F.) *Onguent de blanc de baleine*. (*Cetacei* ℥vj, *ceræ albæ* ℥ij, ol. oliv. f. ℥ij. Ph. L.) The ordinary dressing for blisters and excoriations.

UNGUENTUM CREASOTI, *Ointment of Creasote*. (*Creasot.* f. ℥ss; *adipis*, ℥j. Add the creasote to the lard previously melted with a moderate heat, and stir constantly till cold. Ph. U. S.) Used in chronic cutaneous affections.

UNGUENTUM CUPRI SUBACETATIS, U. *Subacetatis cupri*.

UNGUENTUM DIGESTIVUM SIMPLEX, U. *Terebinthina et ovorum vitell'i*, *Simple digestive ointment*, (F.) *Onguent digestif simple*. (*Terebinthin. pur.* 64 p. *Vitell. ovor.* No. 2, vel 32 p. Mix, for a long time, in a glass mortar, and add, gradually, enough of the *Oil of the Hypericum* (*Millepertuis*) to make a soft ointment. Ph. P.) Detergent. It may be rendered more so by the addition of a little of the *Acetate of copper*.

UNGUENTUM ELEMI, *Balsam of Arcæus*, U. *elemi compositum*.

UNGUENTUM ELEMI COMPOSITUM, *Linimentum Arcæi*, *Unguentum e gummi elemi*, *Ung. de Terebinthina et Adipibus*, U. *elemi*, *Ointment of Elemi*, (F.) *Baume d'Arcæus*. (*Elemi* ℞j, *terebinthina vulgaris* ℥x. *sevi preparati* ℞ij, *olivæ olei* f. ℥ij. Melt the elemi with the suet; remove it from the fire; and mix in the turpentine and oil. Strain the mixture through a linen cloth. Ph. L.) Stimulant and digestive. To keep open issues, &c.

UNGUENTUM EPISPASTICUM DE DAPHNÆ GNIDIO, *Adeps Corticæ daphnæ gnidii medicatus*, (F.) *Pommade de Garou*. (*Adip. prepar.* 320 p., *ceræ*, 32 p., *cort. daphn. gnid.* 128 p. Melt the fat and wax; and add the bark softened in water. Boil until the moisture is evaporated; then pass through cloth. Ph. P.) To keep open blisters, issues, &c. See *Unguentum Mezerei*.

UNGUENTUM EPISPASTICUM FORTIUS, *Cerate of cantharides*—u. *Epispasticum mitius*, U. *lyttæ*—u. *Epispasticum viride*, U. *lyttæ medicatum*—u. *Flavum*, U. de *althææ*—u. e *Gummi elemi*, U. *compositum*—u. *Hellebori albi*, U. *veratri*.

UNGUENTUM GALLÆ, *Ointment of Galls*, (*Gullæ in pulv.* ℥j; *adipis*, ℥vij. M.—Ph. U. S.) As an astringent in piles, indolent ulcers, &c.

UNGUENTUM HYDRARGYRI, U. *coriuleum*, U. *Neapolitanum*, *Blue ointment*, *Ceratum mercuriul'e*, *Adeps Hydrargyri medicatus*, *Mercurial Ointment*, *Uction*, (F.) *Onguent mercuriel ou Napolitain*.

The *Strong Mercurial Ointment*, *Unguentum Hydrargyri fortius* of the London Pharmacopœia is thus made—*Hydrarg. purif.* ℞ij, *adipis*

præparat. 3xxiiij, sevi præp. 3j. Rub till the globules entirely disappear.

The *Milder Mercurial Ointment*,—*Unguentum Hydrargyri Mitius*,—is made by adding, to one pound of the strong, two pounds of lard.

The *UNGUENTUM HYDRARGYRI*, (Ph. U. S.) is made as follows:—*Hydrarg. lbij; adipis 3xxiiij; sevi 3j.* Rub the mercury with the suet and a small portion of the lard until the globules disappear; then add the rest of the lard, and mix.

Mercurial ointment is antisyphilitic and dis-cutient. It is rubbed on the inside of the thigh, in venereal affections; especially in those cases where mercury, given internally, runs off by the bowels. The *stronger* ointment is used for this purpose. The *weaker* is employed as a dressing, or as an application to cutaneous eruptions.

UNGUENTUM HYDRARGYRI AMMONIATI, U. Hydrargyri præcipitati albi—u. Hydrargyri Calcis Albæ, U. hydrargyri præcipitati albi—u. Hydrargyri compositum, U. hydrargyri nitratis—u. Hydrargyri deutoxydi nitrati, U. hydrargyri nitrico-oxydi—u. ex Hydrargyro initus dictum cinereum, Unguentum Oxydi Hydrargyri cinereum.

UNGUENTUM HYDRARGYRI NITRATIS, U. H. nitrati, U. supernitratis hydrargyri, *Ointment of Nitrate of Mercury, Citrine Ointment, Balsamum mercuriale, Ung. hydrargyri compositum, U. mercuriale citrinum, Adeps nitratis hydrargyri medicatus, Unguentum citrinum ad scabiem*, (F.) *Onguent de nitrate de mercure, O. citrin contre la gale.* (Hydrarg. 3j, acid nitric. f. 3xj, olei bubuli, f. 3ix; adipis 3iiij. Dissolve the mercury in the acid; and, while hot, add the oil and melted lard.—Ph. U. S.)

A milder ointment—*Ung. Nitratis Hydrargyri mitius*—is made with triple the quantity of oil and lard. It is stimulant and detergent, and is much used as an application to herpes, porrigo, and cutaneous eruptions. The weaker ointment is, sometimes, used in ophthalmia tarsi, &c.

UNGUENTUM HYDRARGYRI NITRICO-OXYDI, *Ung. subnitratis hydrargyri, Ung. Oxydi Hydrargyri rubri*, U. H. acidi rubr. (Ph. U. S.) *Ointment of Nitric Oxyd of Mercury, Balsamum ophthalmicum rubrum, Unguentum deutoxydi hydrarg. nitrati, Red Precipitate Ointment, Golden Ointment, Singleton's Eye Salce, U. Hydrargyri rubri*, U. ex Hydrargyro oxydato rubro, U. mercurii rubrum, U. ophthalmicum rubrum, U. subnitratis hydrargyrici. (Hydrarg. nitrico-oxyd. 3j, Ung. simpl. 3viij. Add the oxyd, reduced to a fine powder, to the melted ointment Ph. U. S.) Stimulant and escharotic. Applied to foul ulcers, to inflammation of the tarsi, &c. &c.

UNGUENTUM HYDRARGYRI OXIDI RUBRI, U. Hydrargyri Nitrico-oxydi—u. ex Hydrargyro Oxydato Rubro, U. hydrargyri nitrico oxydi—u. Hydrargyri oxydi rubri, U. hydrargyri nitrico oxydi.

UNGUENTUM HYDRARGYRI PRÆCIPITATI ALBI, U. Hydrargyri ammoniati, (Ph. U. S.) U. subnitratis hydrargyri ammoniati, *Unguentum ad scabiem Zelleri, U. mercuriale album, U. mundificans Zelleri, Ointment of white precipitate, Ung. e mercurio præcipitato. Ung. calcis hydrargyri albæ* (Hyd. præcip. alb. 3j, adipis suillæ seu ung. simpl. 3iiss. Melt the fat, and add the precipitate.) Detergent. Used in cutaneous eruptions, to destroy vermin, &c.

UNGUENTUM HYDRARGYRI RUBRI, U. hydrargyri nitrico-oxydi—u. Hydrargyri subnitratis ammoniati, U. hydrargyri præcipitati albi—u. Hydrargyrici subnitratis, U. hydrargyri nitrico-oxydi—u. Hydrargyri subnitratis, U. hydrargyri nitrico-oxydi—u. Hydrargyri supernitratis, U. hydrargyri nitratis—u. Infusi meloes vesicatorii, U. lyttæ—u. Irritans, U. lyttæ.

UNGUENTUM IODINI, U. Iodini, Ointment of Iodine, (Iodin gr. xx; alcohol. m. xx; adipis, 3j. Rub the iodine first with the alcohol and then with the lard until mixed. Ph. U. S.) Used as a local application to goitrous and other swellings.

UNGUENTUM IODINI COMPOSITUM, U. Iodini compositum, Compound Ointment of Iodine, (Iodin. 3ss; Potassii iodid, 3j; Alcohol. f. 3j; adipis 3ij. Rub the iodine and iodide first with the alcohol and then with the lard until they are well mixed. Ph. U. S.)

UNGUENTUM LAURINUM, O'leum laurinum, Adeps lauro-medica'tus, Bay Ointment, (F.) *Onguent ou Huile de laurier.* (Pol. lauri, 500 p., adip. suillæ, 1000 p. Bruise in a marble mortar; evaporate all humidity by boiling; and add Bay berries, in powder, 500 p. Digest and pass through linen. Ph. P.) Reputed to be corroborant and nervine. It is simply emollient.

UNGUENTUM LENITIVUM, U. de althæa—u. Lilaceum, Crinomyron.

UNGUENTUM LYTTÆ, Ung. cantharidis, U. vesicatorium, U. irritans, U. ad vesicatu, Blistering Salce, Ung. infusi meloes vesicatorii, Ointment of Spanish Flies, Ointment of Infusion of Spanish Flies, Unguentum epispasticum mitius, Milder blistering Ointment. (Cantharid. in pulv. 3ij; aquæ destillat. Oss. corat. resin. 3viij. Boil down the water with the Spanish flies to one half, and strain; then mix the cerate with the strained liquor, and evaporate to the proper consistence. Ph. U. S.) It is stimulant and epispastic; and is chiefly used for keeping up the discharge from a blistered surface.

UNGUENTUM LYTTÆ MEDICATUM, Adeps cantharidibus medicatus, Pomatum seu Unguentum epispasticum viridè stimulus ac'ribus, Green blistering Ointment, (F.) *Pommade épispastique verte.* (Pomati vel unguenti cantharid. 64 p., unguent. populei 168 p., ceræ albæ, 256 p., cupri acetat., ext. opii, aa 24 p. Melt the ung. populeum, and wax, and add, as they cool, the oxyd of copper, cantharides, and opium. Ph. P.) Use, same as the last.

UNGUENTUM LYTTÆ MEDICATUM ALIUD, Adeps cantharidibus medicatus alius, Pomatum epispasticum florum ac' mitius, Yellow Blistering Ointment, (F.) *Pommade épispastique jaune.* (Pulv. cantharid 120 p., adip. præp. 1680 p., aquæ 250 p. Melt the lard; mix the cantharides, and add the water at the same time; place the whole on a gentle fire; stir continually for two hours, and add a little water to replace that which has been evaporated. Pass through linen and strain. Keep it in a water bath, and add powdered turmeric, 8 p. Let it cool till the superfluous liquid separates; pour off and add yellow wax, 250 p., Oil of Lemon, 8 p. Ph. P.) A complex preparation. Use, same as the last.

An ointment, not very philosophically combined, was used by Dr. Physick, which is known by the name of "*Dr. Physick's Issue Ointment.*" It is made by boiling half an ounce

of powdered *cantharides* in two ounces of *rose-water*, and evaporating until one half of the fluid is driven off, having previously added 15 grains of *tartar emetic*. The decoction is to be strained, and three ounces of *olive oil*, an ounce and a half of *white wax*, and one ounce of *spermaceti* added to it, and the mixture then boiled till all the water is evaporated.

UNGUENTUM MERCURIALE ALBUM, U. hydrargyri præcipitati albi—u. Mercuriale citrinum, U. hydrargyri nitratis—u. e Mercurio præcipitato, U. hydrargyri præcipitati albi—u. Mercurii rubrum, U. hydrargyri nitrico-oxydi—u. Mundificans Zelleri, U. hydrargyri præcipitati albi.

UNGUENTUM MEZE'REI, *Ointment of Mezereon*. (Mezer. incis. transversim, $\frac{3}{4}$ iv; adipis. $\frac{3}{4}$ xiv; cera alba $\frac{3}{4}$ ij; Moisten the mezereon with a little alcohol, and beat in an iron mortar, until reduced to a fibrous mass; then digest it with the lard, in a salt water bath, for 12 hours; strain forcibly, and allow the strained liquor to cool slowly, so that any undissolved matters may subside; from these separate the medicated lard; melt it with the wax at a moderate heat, and stir constantly till they are cold.—Ph. U. S.) To keep open blisters, issues, &c.

UNGUENTUM MURIA'TIS HYDRARGYRI OXYGENA'TO MEDICA'TUM, *Adeps muria'te hydrargyri oxygena'to medicatus*, *Cyrillo's Ointment*, (F.) *Pommade de Cyrillo*. (Hydrarg. oxymur. 4 p. adipis suilla præp. 32 p. Ph. P.) Antivenereal and alterative. Used in friction, 3ss at a time.

UNGUENTUM NARDINUM, see *Nardus Indica*—u. Neapolitanum, U. hydrargyri—u. Nervinum, U. Sambuci—u. Nitricum vel oxygenatum, U. acidi nitrosi.

UNGUENTUM OPHTHAL'MICUM, *Adeps ox'ido hydrargyri rubro et plumbi acetat'le medica'tus*, *Regent's Pommade ophthalmique*, (F.) *Pommade ophthalmique*. (Butyr. recent., aq. rosar. lavat. $\frac{4}{5}$ p., camphor., oxyd. hydrarg. rubr., acetatis plumbi aa 0.25 p. Mix intimately. Ph. P.) In chronic inflammation of the conjunctiva or tarsi.

UNGUENTUM OPHTHALMICUM, U. oxidi zinci impuri—u. Ophthalmicum rubrum, U. hydrargyri nitrico-oxydi.

UNGUENTUM OX'IDI HYDRARGYRI CINE'REI, *Adeps seu Unguentum ex hydrargyro mitius dictum cinereum*, *Ointment of gray oxide of mercury*, (F.) *Onguent. gris*. (Oxyd. hydrarg. ciner. p. j. adipis suillæ, p. iij. Ph. E.) Properties like the mercurial ointment. It is not much used.

UNGUENTUM OX'IDI PLUMBI ALBI, *Ung. cerus'sæ*, *Ung. album*, *Ung. subacetatis plumbi*, *Ointment of white oxide of lead*, *White ointment*. (Ung. simplicis, p. v. oxyd. plumb. alb. p. j. Ph. E. & P.) Cooling and desiccative. Applied to excoriated and burnt surfaces.

UNGUENTUM OX'IDI ZINCI IMPU'RI, *Unguentum tu'tiæ*, *Ung. ophthalmicum*, *Eye Salve*, *Adeps ox'idi zinci medica'tus*, *Tutty ointment*. *Ointment of impure oxide of zinc*. (Linim. simpl. p. v. oxyd. zinc. impur. præp., p. j. Ph. E.) Generally used in ophthalmia tarsi and atonic ophthalmia.

UNGUENTUM PICIS LIQ'UIDÆ, *Ung. Picis*, *Ung. e Picæ*, *Tar Ointment*. (Picis liquid., seri, sing. lbj. Melt and stir till cold. Stimulant and detergent. Used in tinea capitis, and other cutaneous eruptions.

UNGUENTUM PICIS NIGRÆ, U. resinæ nigræ—u. Acetatis plumbi, Ceratum plumbi superaceta-

tis—u. Plumbici carbonatis, U. plumbi subcarbonatis—u. Plumbi Carbonatis, U. P. Subcarbonatis—u. Plumbi oxydi carbonati, U. plumbi subcarbonatis—u. Plumbi subacetatis, U. oxidi plumbi albi.

UNGUENTUM PLUMBI SUBCARBONA'TIS, U. *Plumbi Carbona'tis*, *Cera'tum de Cerus'sæ*, *Ung. album*, *U. album simplex*, *U. Carbona'tis Plumbici*, *U. Cerus'sæ*, *U. Ox'idi Plumbi Carbona'ti*, (F.) *Onguent blanc de Rhazès*, *O. de Cerusse*, *O. de Tornamira*. (Plumbi Carbonat. in pulv. subtiliss. $\frac{3}{4}$ ij; Unguent. simpl. lbj. Add the carbonate of lead to the ointment previously softened over a gentle fire, and mix.—Ph. U. S.) Chiefly used as a dressing for burns.

UNGUENTUM PLUMBI SUPERCETA'TIS, U. *aceta'tis plumbi*, *Ointment of sugar of Lead*, *Unguentum Saturni'nium*, *U. cerus'sæ aceta'tæ*, *Balsamum Saturna'læ*. (Olive oil, lbss, white wax, $\frac{3}{4}$ ss, superacetate of lead, $\frac{3}{4}$ ij.) Cooling, desiccative. Called, also, *Balsamum Saturni'nium*, *Butyrum Satur'ni*, *Linimen'tum plumba'tum*, *Pom'a'tum satur'ni*, *Ung. triphar'macum*.

UNGUENTUM POPULEUM, *Adeps papav'eris, hyosc'amo, et belladon'næ medica'tus*. (Fresh buds of the *Populus nigra*, 500 p., macerated in adeps suilla præp. melted, 1500 p. for 24 hours. Preserve this. Again, take black poppy leaves, belladonna, hyoscyamus, black nightshade, aa 128 p.; bruise in a mortar with the former preparation; boil until all the humidity is evaporated, and strain. Ph. P.) Anodyne. Applied to local inflammations, hemorrhoids, sore nipples, cancer, &c. Green elder ointment is often sold for this.

UNGUENTUM POPULEUM, see *Populus*.

UNGUENTUM POTAS'SÆ HYDRIODATIS, U. *Potussii Iodidi*, *Ointment of Hydr'iodate of Potass.* (Hydr'iodate of potass 3ss, hog's lard $\frac{3}{4}$ ss.) Half a drachm of this ointment is rubbed on scrofulous glands, goitre, &c.

UNGUENTUM POTASSII IODIDI, U. Potassæ Hydr'iodatis.

UNGUENTUM PULVIS MELOES VESICATORII, *Cerate of cantharides*—u. Resinæ flavæ, Ceratum resinæ flavæ.

UNGUENTUM RESINÆ NIGRÆ, *Ung. resinæ nigrum*, *Ung. basilicon nigrum*, *Ung. tetrapharm'acum*, *Black Basilicon*, *Black resin ointment*, *Unguentum picis nigræ*. (Resin. nigr., ceræ flavæ, resinæ flav. aa, $\frac{3}{4}$ ix, olei olivæ Oj. Ph. L.) Uses, the same as the Ceratum resinæ or Yellow basilicon, (q. v.)

UNGUENTUM RESINÆ PINI SYLVESTRIS COMPOSITUM, U. de althæa—u. Resinosum, Ceratum resinæ flavæ—u. Resumptivum, U. de althæa.

UNGUENTUM SAMBU'CI, *Ung. sambu'cinum*, *Green ointment*, *Unguentum nerrinum*, *Elder ointment*, (F.) *Onguent de sureau*. (Sambuci flor. lbj, adipis præp. lbj. Boil. Ph. L. & D.) Emollient.

UNGUENTUM SATURNINUM, U. plumbi superacetatis—u. Sabinæ, Ceratum sabinæ—u. ad Scabiem Zelleri, U. hydrargyri præcipitati albi—u. Simplex, Ceratum Galeni, U. ceræ—u. Solidum de cicuta, Emplastrum cicutæ—u. Spermatidis ceti, U. cetacei.

UNGUENTUM SIMPLEX. U. Ceræ.

UNGUENTUM STRAMO'NI, *Ointment of Stramo'nium*. (Stramon. fol. recent. concis. lbj; Adipis lbij; Ceræ flavæ lbss. Boil the leaves in the lard until they become friable; then strain through linen. Add the wax previously melted, and stir until they are cold.—Ph. U. S.) An

anodyne ointment to irritable ulcers, hemorrhoids, &c.

UNGUENTUM SUBACETATIS CUPRI, *U. Cupri subacetat'is*, *Ung. detergens*, *Ung. basilicum citr'idē*, *Ung. æruginis*, *Balsamum citr'idē*, *Ointment of subacetate of copper*, *Ver'digris ointment*. (*Cupri subacet. in pulv. subtiliss* ʒj; *Ung. simp* ʒxv. Add the subacetate to the ointment previously melted with a moderate heat, and stir till cold.—*Ph. U. S.*) Detergent and escharotic.

UNGUENTUM SULPHURIS, *Ung. e Sulph'urē*, *Sulphur ointment*. (*Sulph. sublim.* lbj; *adip. præp.* lbj. *Ph. U. S.*) Used chiefly in itch and some herpetic affections.

UNGUENTUM SULPHURIS COMPOSITUM, *Compound Sulphur Ointment*, *Itch Ointment*, *Unguentum Antipsor'icum*, *Jackson's Itch Ointment*, *Pommade antipsorique de Jasser*. (*Sulph. sublim.* lbss, *veratri rad. contus.* ʒij, *potassæ nitrat.* ʒj, *suponis mollis lbss.* *Ph. L.*) The UNGUENTUM SULPHURIS COMPOSITUM of the *Pharm. U. S.* (1842) is made as follows:—*Sulphur.* ʒij; *Hydrargyri ammoniat.*, *acid. Benzoic.* aa ʒj; *ol. Bergamot.*, *acid. sulphuric.* aa f. ʒj; *Potassæ Nitrat.* ʒij; *adipis lbss.* To the melted lard, add the other ingredients, and stir till cold. *Use*, the same as the last; but it is more stimulating.

UNGUENTUM SULPHURATUM AD SCABIEM, *Adeps sulphurē et ammoniæ muriatē medicatus*. (*Adipis*, 120 p., *sulph. lot.* 60 p., *ammoniæ muriatē*, *aluminæ sulphat.* aa 4 p., *fiat unguentum.* *Ph. P.*) Antipsoric.

BAILEY'S ITCH OINTMENT is composed of olive oil, lard, nitre, alum, sulphate of zinc, and cinnabar, scented with oil of aniseed, oil of origanum, and oil of spike, and coloured with alkanet root.

UNGUENTUM SULPHURATUM ALCALINUM AD SCABIEM, *Adeps sulphurē et carbonatē Potassæ medicatus*, *Helmerick's Alcaline Sulphurated Itch Ointment*. (*Adip.* præp. 800 p., *sulphur. lot.* 200 p., *carbonat. potass. pur.* 100 p., *fiat ung.* *Ph. P.*) *Use*, same as the last.

BATEMAN'S ITCH OINTMENT resembles this. It is coloured with cinnabar and scented with essence of bergamot.

UNGUENTUM SUSINUM, *Crinomyron*—*u. Tartari emetici*, *U. antimonii tartarizati*—*u. Tartari stibiat*, *U. antimonii tartarizati*—*u. e Tartaro stibiato*, *U. antimonii tartarizati*—*u. Tartaratis potassæ stibiat*, *U. antimonii tartarizati*—*u. de Terebinthinā et adipibus*, *U. eleni compositum*—*u. de Terebinthinā et cerā*, *U. de althæā*—*u. Terebinthinæ et ovorum vitelli*, *U. digestivum simplex*—*u. Tetrapharmacum*, *Basilicon*, *U. resinæ nigre*—*u. Tripharmacum*, *U. plumbi superacetatis*—*u. Tutivæ*, *U. oxidi zinci impuri*—*u. ad vesicata*, *U. lyttæ*—*u. ad vesicatoria*, *cerate of cantharides*—*u. Vesicatorium*, *U. lyttæ*—*u. Oxidi zinci*, *U. zinci*.

UNGUENTUM TABACI, *Tobacco Ointment*. (*Tabac. recent. concis.* ʒj; *Adipis*, lbj. Boil the tobacco in the lard over a gentle fire till it becomes friable: then strain through linen.—*Ph. U. S.*) Applied to irritable ulcers, tinea capitis, &c.

UNGUENTUM VERA'TRI, *Unguentum helleb'ori albi*, *White hellebore ointment*. (*Veratr. rad. pulv.* ʒij, *adipis præp.* ʒviij, *olei limon.* m. xx.) Used in cases of itch, where sulphur is objected to. It is not equally efficacious.

The principal ingredients in the EDINBURGH

OINTMENT are white hellebore and muriate of ammonia.

UNGUENTUM ZINCI, *Ung. ox'idi zinci*, *U. Zinci Oxidi*, *Zinc Ointment*. (*Zinci oxyd.* ʒj, *adipis ʒvj* *Ph. L.*) *Use*, the same as that of the *Unguentum lutiæ*.

UNGUENTUM ZINCI OXIDI, *U. Zinci*.

UNGUIS, *Hippocampus minor*, *Nail*, *Pterygion*—*u. Odoratus*, *Blatta Byzantia*.

UNGUIS, *Os*, *Os lachrymalē*. A small, quadrilateral, very thin, and semi-transparent bone, which has been compared to a human nail, and is situate at the anterior and inner part of the orbit. It aids in the formation of the lachrymal gutter and the nasal duct. It is articulated with the frontal, superior maxillary, ethmoid, and the inferior spongy bones, and is developed by a single punctum ossificationis.

UNITING BANDAGE, (*F.*) *Bandage unissant*. A bandage for bringing the edges of a wound into approximation. The arrangement of such a bandage differs according as the wound is transverse or longitudinal.

UNGULA CABALLINÆ, *Tussilago*.

UNGULÆ PALPEBRARUM. See *Tarsus*.

UNIO, *Pearl*.

UNIOCULUS, *Cyclops*.

UNOCULUS, *Borgne*, *Cyclops*.

UNWELL (Being), *Menstruation*.

UPAS. A word, used in the Archipelagos of Molucca and Sunda, and signifying *Vegetable Poison*, *Ipo*, *Bohon Upas*, *Boa Upas*, and *Pohom Antiar*, *Boon Upas*. A substance used by the natives of those places for poisoning their arrows. The smallest quantity is capable of destroying the largest animal. The tree, which produces it, is said to be the *Antiaris Toxicaria*. Another species of upas, the *U. Tienté*, is the produce of a *Strychnos*. Many idle stories are told regarding the upas; most of which are fabulous.

URACHUS, *U'racus*, *Urinaculum*, from *ουρον*, 'urine,' and *εχω*, 'I contain.' (*F.*) *Ouraque*. The urachus, in certain animals, is a long membranous canal, which arises from the bladder, makes its exit from the abdomen by the umbilicus, and terminates in the pouch called *allantois*. According to Sabatier, this is the arrangement of the urachus in the human fœtus; but Bichat and other anatomists consider, that when the canal exists in the human fœtus, it is a malformation. They regard it as a kind of suspensory ligament of the bladder, extending from the top of that organ to the umbilicus; and, at the umbilicus, confounded with the abdominal aponeuroses.

URACRATIA, *Euuresis*.

URACUS, *Urachus*.

URANA, *Ureter*.

URANE, *Urenal*.

URANISCOPLAS'TICÆ, from *ουρανισκος*, 'the roof of the mouth,' and *πλαστικός*, 'forming.' The operation of engraving in cases of deficiencies of the soft palate.

URANISCOS, *Palate*.

URANISKORRHAPHIA, *Staphyloraphy*.

URANORRHAPHIA, *Staphyloraphy*.

URAS, *Urate*.

URATE, *Uras*; *Lithate*, *Lithas*; from *ουρον*, 'urine.' A generic name for salts, formed by the combination of uric or lithic acid with different bases.

URATE OR LITHATE OF SODA is found in ar-

thritic calculi:—*Urate* or *Lithate of Ammonia* in some urinary calculi.

UREA, *Uren*, *Uren'ium*, *Uricum*, (F.) *Urée*. Same etymon. A white, pearly, brilliant substance, in transparent plates, inodorous, and of a cool taste; very soluble in water; deliquescent, and soluble in alcohol. It exists, in great quantity, in the urine; and is an essential part of it. It has been used as a diuretic. Dose, gr. xv to ʒj.

UREC'CHYSIS, *Urechysis*, from *ovgor*, 'urine,' and *ερχοις*, 'effusion.' Effusion of urine into the cellular membrane.

UREDO, *Urticaria*.

URÉE, *Urea*.

UREMA, *Urine*.

UREN, *Urea*.

URENIUM, *Urea*.

URESIS, *Uri'asis*, from *ovgair*, 'to void the urine.' The act of passing the urine.

URE'TER. Same etymon. *U'iana*, *Vena alba renum*, *Canalis ner'teus fistulosus renum*. *Ductus seu Ductor Urinæ*, *Vas urinarius*, (F.) *Urètre*. A long, excretory canal—membranous and cylindrical—which conveys the urine from the kidney to the bladder. It extends, obliquely, between the pelvis of the kidney, with which it is continuous, and the *Bas fond* of the bladder, into which it opens. It enters at the posterior and inferior part, for some distance, between the coats, and opens into the cavity of the bladder, at the posterior angle of the *Trigone vesical*. The ureter is formed of an exterior, white, opaque, and fibrous membrane; and of an inner, which is mucous.

URETERALG'IA, from *ουρητηρ*, 'the ureter,' and *αλγος*, 'pain.' Pain in the course of the ureter.

URETÈRE, *Ureter*.

URETER'ICUS. An epithet to ischury, &c. arising from an affection of the ureter.

URETERITIS. Inflammation of the ureter. Generally caused by calculus.

URETERO-LITH'ICUS, from *ουρητηρ*, 'the ureter,' and *λιθος*, 'a stone.' An epithet applied to ischury or other affection caused by a stone in the ureter.

URETERO-PHLEGMAT'ICUS, from *ουρητηρ*, 'the ureter,' and *φλεγμα*, 'phlegm or mucus.' Any affection caused by mucus accumulated in the ureter.

URETERO-PY'ICUS, from *ουρητηρ*, 'the ureter,' and *πυρ*, 'pus.' An epithet applied to affections caused by the presence of pus in the ureter.

URETERO-STOMAT'ICUS, from *ουρητηρ*, 'the ureter,' and *στομα*, 'orifice.' That which is dependent upon obstruction of the orifice of the ureter.

URETERO-THROMBOIDES, from *ουρητηρ*, 'the ureter,' *θρομβος*, 'grumous blood,' and *ειδος*, 'resemblance.' Ischury, from grumous blood in the ureter.

URE'THRA. *ουρηθρα*, *Canalis seu Meatus seu Ductus urinarius*, *Urias*, *Urëtra*, *Fistula urinaria*, *Iter urinarius*; (F.) *Urèthre*, *Urètre*, from *ovgor*, 'urine.' The excretory duct for the urine, in both sexes; and for the sperm, in man. In the latter, it is 10 or 12 inches long; and extends from the neck of the bladder to the extremity of the penis, in which its external aperture is situate. In the male urethra, three portions are distinguished:—1 A *Prostatic portion*, near the bladder, about an inch and

a quarter in length, which traverses the prostatic gland:—2 A *membranous portion*, from 8 to 10 lines long, which is separated from the rectum by the cellular tissue only:—3. A *spongy portion*, which expands, anteriorly, to form the glans, and which commences at the *bulb of the urethra*. Before opening externally, the canal has a dilatation, called the *Fossa or Fossicula navicularis*. On the interior of the urethra two white lines are perceptible—the one above, the other below. The latter commences at the *verumontanum*; and at the surface of this, the *ejaculatory ducts* and *prostatic ducts* open. The urethra is lined, in its whole extent, by a mucous membrane; on which are seen, particularly at the bulb, the orifices of a number of follicular ducts, called *Sinuses of Morgagni*. The arteries of the urethra are numerous, and proceed from the internal pudic,—the largest branches entering the bulb. The veins follow the course of the arteries. The lymphatics pass into the inguinal and hypogastric plexuses. The nerves come from the pudic and gluteal. In the *female*, the urethra is only about an inch long. It is wider than in man, and susceptible of great dilatation. It is very wide at its commencement; and descends obliquely forwards, to terminate at the top of the external aperture of the vagina, by the *meatus urinarius*. In its course, it is slightly curved, the concavity being forwards.

URETHRA, **BLIND DUCTS OF THE**, see *Cæcus*—u, *Mucous lacunæ* of the, see *Cæcus*.

URETHRALGIA, *Gonorrhœa*.

URÈTHRE, *Urethra*.

URETHRITIS, *Gonorrhœa*.

URETHROPHRAX'IS, from *ουρηθρα*, 'the urethra,' and *φρασσα*, 'I obstruct.' Obstruction of the urethra.

URETHROPLASTIC, *Urethroplast'icus*; from *ουρηθρα*, 'the urethra,' and *πλασσα*, 'I form.' An epithet given to the operation which supplies defects in the canal of the urethra, through which the urethra escapes.

URETHRORRHA'GIA, from *ουρηθρα*, 'the urethra,' and *ρηνναι*, 'I break out.' Hemorrhage from the urethra—Frank.

URETHRORRHŒ'A, from *ουρηθρα*, 'the urethra,' and *ρεω*, 'I flow.' A discharge from the urethra.

URETHROTOME, from *ουρηθρα*, 'the urethra,' and *τεμνω*, 'I cut.' An instrument, so called by Le Cat, with which he divided the skin, and laid open the urethra, in the operation for lithotomy. Also, an instrument for dividing strictures of the urethra.

URETHRYMENO'DES, from *ουρηθρα*, 'the urethra,' and *υμη*, 'a membrane.' That which is caused by a membrane, formed in the urethra.

URETICUS, *Diuretic, Urinary*.

URETRA, *Urethra*.

URÈTRE, *Urethra*.

URETRIS, *Urinal*.

URIAS, *Urethra*.

URIASIS, *Lithia, Uresis*.

URIC A'CID, *Acidum Uricum*, *Lithic Acid*, *Acidum lithicum*. An acid which exists in human urine, and which constitutes the greater part of urinary calculi. It is often deposited from the urine, in health. See *Calculi, Urinary*.

URICUM, *Urea*.

URICUS, Urinary.

URINA GENITALIS, Sperm—u. Mucosa, Cystirrhœa—u. Potūs, see Urine—u. Sanguinis, see Urine—u. Vacce, Urine, cow's.

URINACULUM, Urachus, Urinal.

URINÆ PROFLUVIUM, Diabetes—u. Suppressio, Ischuria—u. Stillicidium, Strangury—u. Substillum, Strangury.

URINAL, *Urinatōrium*, *Chernib'ium*, *U'ranē*, *Uret'ris*, *Urinac'ulum*, *Urodochi'um*, *Uratra'cium*, from *urina*, 'urine.' A name given, 1. To certain vessels, used to pass the urine into. 2. To reservoirs, of different shapes and character, which are adapted to the penis, in cases of incontinence of urine, and which are intended to receive the urine as it flows off.

URINARIA, Antirrhinum linaria, Leontodon taraxacum.

URINARY, *Urinari'us*, *U'ricus*, *Uret'icus*. Same etymon. That which relates to the urine.

URINARY BLADDER, *Ves'ica Urina'ria*, *Cystis*, (F.) *Vessie*. A musculo-membranous reservoir, intended for the reception of the urine, until the accumulation of a certain quantity solicits its excretion. The bladder is situate in the hypogastric region, between the rectum and pubis, in man; and between the pubis and vagina, in the female. Its upper region is not covered, except by the peritoneum posteriorly. From its centre arises the *urachus*. Its lower region is bounded, anteriorly, by the prostate, in man; and rests on the vesiculæ seminales and rectum. In the female, it corresponds to the vagina. The lowest portion of this region bears the name *Bas-fond*. The anterior surface of the organ is not covered by peritoneum. It is attached to the symphysis pubis by a fibro-cellular expansion called the *anterior ligament*. The posterior ligaments are duplicatures of the peritoneum on its posterior surface, which extend from this surface to the rectum, in the male, and to the uterus, in the female. The bladder is composed of a serous membrane, formed by the peritoneum;—of a muscular membrane; of a somewhat thick layer of cellular tissue; and is lined, on its inner surface by a mucous membrane, which is, sometimes, raised up, here and there, in long prominences or *columns* by the muscular fibres beneath. To this condition, the French anatomists give the term—*ressie à colonnes*. In the *Bas-fond* the two ureters open, and the urethra commences; and the triangular space, which the apertures of these three canals leave between them, is called, by the French, the *Trigōne vésical* or *Vesical Triangle*, *Trigōnus Lieutau'di*. In the orifice of the urethra, which is also called the neck of the bladder, there is, at its lower part, a more or less prominent tubercle, which is formed by the anterior angle of the *Trigōne vésical*, and is called the *Vesical uvula*, (F.) *Luette vésicale*.

The arteries of the bladder proceed from the hypogastric, umbilical, sciatic, middle hemorhoidal, and internal pudic. Its veins, which are more numerous than the arteries, open into the hypogastric venous plexus. Its nerves emanate from the sciatic and hypogastric plexuses; and its lymphatic vessels pass into the hypogastric ganglia.

URINARY CALCULI. The calculi, which form in the urinary passages. See Calculi, Urinary.

URINARY PASSAGES, (F.) *Voies urinaires*.

The aggregate of canals and cavities, intended to contain the urine and convey it externally. These *ways* are composed of excretory ducts, which form the tubular portion of the kidney; of calices; pelvis: ureters; bladder; and urethra.

URINATORIUM, Urinal.

URINE, *Uri'na*, *ουρον*, *ουρῖνα*, *U'ron*, *Ure'ma*, *Lotium*, *Lot*, *Lapis au'reus*. An excrementitious fluid; secreted by the cortical part of the kidneys; filtered through their tubular portion; poured *guttatim* from the apices of the tubular papillæ into the pelvis of the kidney; and transmitted by it to the ureters; which convey it slowly, but in a continuous manner, into the bladder, where it remains deposited, until its accumulation excites a desire to void it. The excretion of the fluid takes place through the urethra; and is caused by the action of the abdominal muscles and diaphragm and the contraction of the fibrous coat of the bladder. Urine is transparent; of a citron-yellow colour: of a peculiar odour, and of an acid, saline, and slightly bitter taste. That which is passed, some time after taking fluid, is less coloured, and less odorous and dense than that which is voided 7 or 8 hours after eating. The first is the *Uri'na potus*, (F.) *Urine du Boisson*, *Urine from drink*:—the latter *Uri'na san'guinis*, (F.) *Urine de la digestion*, *Urine de la coction*, *Urine cuite*, *Coccted urine*, *Urine of digestion*. According to the analysis of Berzelius, urine contains, in 1000 parts, 933 of water, 30.10 of urea, 3.71 of sulphate of potass, 3.16 of sulphate of soda, 2.94 of phosphate of soda, 4.45 of chloride of sodium, 1.65 of phosphate of ammonia, 1.50 of muriate of ammonia, 17.15 of free lactic acid, lactate of ammonia united with an animal matter soluble in alcohol and an animal matter insoluble in that agent:—1.00 of earthy phosphate, with an atom of lime, 1.00 of uric acid, 0.32 of mucus of the bladder, and 0.03 of silica. There are found in it, moreover, albumen, sulphur, &c. Its average specific gravity is about 1015. The quantity passed by the adult in the 24 hours varies. On the average it may amount to two pounds and a half. Sometimes, the urine, in health and disease, exhibits appearances, that have received special names. Thus, that which is characterized by a deficiency of solid matters generally, has been called *Hydra'ria*, (*υδωρ*, 'water,') by a deficiency of urea, *Anazoti'ria*, (*αν*, privative, and *azote*,) by a superabundance of urea, *Azoti'ria*. Urine, in which the deposit consists of lithic acid, and the lithates, has been termed *Lithu'ria*; and that in which the deposit consists of the earthy and earthy-alkaline phosphates, *Ceramu'ria*, (*κεραμος*, 'potter's earth,' &c. &c. At times, a *pellicle* forms on the surface (*Cremor urinæ*) which consists of mucus and some salts: at others, there is a *cloud*, (*Nubecula*, *nubes*) towards its upper part, which is called *Emaze'ma* when it is suspended, as it were, about the middle of the liquid. Occasionally, there is a sediment, to which the names *Hypo'stasis*, *Sedimen'tum*, &c. have been given. (See these various words.) The urine is often deserving of attention in disease; but it has been considered a matter of more importance than it merits. Some empirics have presumed to pronounce on the nature of a disease by simply inspecting it. See Uroscopy. Human urine was, at one time, considered aperient; and was given in jaundice,

in the dose of one or two ounces. Cow's Urine, *Urina Vaccæ*, *Allflower water*, was once used, warm from the cow, as a purge, in the dose of Oss.

Urine has been variously designated by pathologists, according to its appearance, &c.; for example:—

URINE, BLOODY, *Hæmaturia*.

CRUDE URINE, (F.) *Urine crue*. Urine that is thin, transparent, and but little coloured, affording neither cloud nor deposit.

CYSTINIC URINE, *Cystinuria*. Urine containing cystine or cystic oxide in solution, or as a deposit.

DIABETIC URINE, *Melituria*. Urine passed in *Diabetes mellitus*. It does not contain, apparently, either urea or uric acid, except in accidental cases; but has a large quantity of sugar analogous to that of the grape, which may be separated in the form of crystals. In other respects, the urine is very abundant and very limpid in that affection.

DROPICAL URINE is an ammoniacal urine, often containing much albumen and scarcely any urea.

DYSPEPTIC URINE has been found to precipitate tannin abundantly, and to soon putrefy.

FLOCCULENT URINE, (F.) *Urine floconneuse*, is when the fluid is troubled by flocculi, suspended in it.

GOUTY URINE, (F.) *Urine des gouteux*, contains much phosphate of lime, and, after severe attacks of gout, precipitates a mixture of the uric and rosacic acids.

HYSTERIC URINE is clear, colourless, and similar to the *Urine de la Boisson*.

ICTERIC URINE contains bile.

URINE OF INFLAMMATORY DISEASES. This is, generally, small in quantity, and very high-coloured.

URINE JUMENTEUSE, (F.,) a term used, by the French, for ammoniacal urine, rendered turbid by a substance similar to small grains of dust, which causes it to resemble the urine of herbivorous animals.

MILKY URINE, (F.) *Urine lactescente ou laiteuse*. White and troubled urine.

MUCILAGINOUS URINE, (F.) *Urine épaisse*. Urine containing much mucus.

NERVOUS URINE. Thin and very liquid urine; such as is passed shortly after the attack of nervous diseases.

URINE OF NERVOUS FEVERS is generally very thin; and often deposits a mixture of uric and rosacic acids.

OILY URINE, (F.) *Urine huileuse*, is that which pours like oil, or which has an oily pellicle at its surface.

OXALIC URINE, *Oxaluria*. Urine containing a salt of the oxalic acid.

PHOSPHORESCENT URINE, *Phosphoruria*. Urine which is luminous or phosphorescent.

PURPURIC URINE, *Porphuria*. Urine containing purpuric acid and its salts.

RICKETY URINE contains much phosphate of lime.

THIN URINE, (F.) *Urine ténue*. Urine that is transparent, slightly coloured, and but little dense.

URINE ARDENTE, Ardent urine—*u. de la Boisson*, Urine, hysterical, see Urine—*u. de la Caction*, see Urine—*u. Crue*, Urine, crude—*u. Cuite*, see Urine—*u. de la Digestion*, see Urine—*u. Épaisse*, Urine, mucilaginous—*u. Fiocon-*

neuse, Urine, flocculent—*u. des Gouteux*, Urine, gouty—*u. Huileuse*, Urine, oily—*u. Incontinence* of, Enuresis—*u. Involuntary discharge* of the, Enuresis—*u. Lactescente*, U. milky—*u. Laiteuse*, Urine, milky—*u. Sandy*, Arenosa urina—*u. Stoppage* of, Ischuria—*u. Ténue*, U. thin.

URINIFEROUS, *Urinifer*, from *ovgor*, 'urine,' and *φερω*, 'I carry.' That which carries urine.

URINIFEROUS TUBES OR DUCTS OF BELLINI, *Tubuli vel ductus uriniferi Bellini*, *Bellenia-ni Ductus*, *Bellenia-næ Fis'tulæ*, are the collection of small tubes, converging from the cortical part of the kidney to the apices of the papillæ.

URINODES, Urinous.

URINOMETER, from *ovgor*, 'urine,' and *μετρον*, 'measure.' A hydrometer for taking the specific gravity of urine.

URINOUS, *Urinous*, *Urinodes*. Having the character of urine. Similar to urine.

UROCRASIA, Enuresis.

UROCRISIA, from *ovgor*, 'urine,' and *κρινω*, 'I judge.' *Urocrite'ron*. A judgment formed either of the urine, or of disease after inspecting the urine.

UROCRITERION, Urocrisia.

UROCYSTITIS, Cystitis.

URODIALYSIS, from *ovgor*, 'urine,' and *διαλυσις*, 'dissolution, loss of strength.' A partial and temporary suspension of the function of the kidney, such as occurs in the course of most acute diseases. A condition of the function of the kidney and of the urine, similar to that observed in acute diseases, but without local mischief or preceding inflammatory fever, has been termed, when occurring in children, *Urodial'ysis Neonato'rum*; in the aged, *Urodial'ysis Senum*.—Schönlein.

URODOCHIUM, Urinal.

URODYNIA, from *ovgor*, 'urine,' and *οδυνη*, 'pain.' Pain during the excretion of the urine.

UROLITHI, Calculi, urinary.

UROLITHIASIS, Lithia.

UROLITHOLOGIA; from *ovgor*, 'urine,' *λιθος*, 'a stone,' and *λογος*, 'a description.' A description of urinary calculi.

UROLITHOTOMIA, Lithotomy.

UROMANTIA, from *ovgor*, 'urine,' and *μαντεία*, 'divination.' The art of divining diseases by simple inspection of the urine. *Uroscopia*. One professing to be able to do this is called *Uromantes*.

URON, Urine.

URONOL'OGY, *Uronolog'ia*, from *ovgor*, 'urine,' and *λογος*, 'a description' The part of medicine which treats of the urine.

UROPYGION, Coccyx.

UROPYGIUM, *Croupion*.

URORRHAGIA, Diabetes.

URORRHOEA, Enuresis, Diabetes.

UROSCOPIA, see Uromantia.

UROSES, from *ovgor*, 'urine.' Diseases of the urinary organs.—Alibert.

URTICA, *U. Dioica*; the Common stinging nettle, *Adircé*, (F.) *Ortie*. Family, Urticæ. *Sex. Syst.* Monœcia Tetrandria. This plant has been long used for medical and culinary purposes. The young shoots, in the spring, are considered to possess diuretic and antiscorbutic properties.

URTICA DIOICA, Urtica—*u. Iners magna* sœtidissima, Galeopsis—*u. Mortua*, Lamium

album—*u. Pilulosa*, *U. Pilulifera*—*u. Roman*, *U. Pilulifera*.

URTICA PILULIFERA, *Pill-bearing Nettle*, *U. Pilulosa*, *U. Roma'na*, (F.) *Ortie Romaine*. The seed was formerly given in diseases of the chest. Nettles have been used as stimulants to paralytic limbs.

URTICA URENS, (F.) *Ortie brulante*. A lesser variety of the nettle, possessing similar virtues.

URTICA'RIA, from *urtica*, 'a nettle'; *Enanthesis urtica'ria*, from *urtica*, 'a nettle'; *Enanthesis urtica'ria*, from *urtica*, 'a nettle'; *Urtica'ria porcellana*, *Exanthema urticatum*, *Epinyetis pruriginosa*, *Febris urtica'ia*, *Purpura urticata*, *Febris rubra pruriginosa*, *Saltans rosa*, *Nettle rash*; from *urtica*, 'a nettle,' because the eruption resembles that produced by the stings of a nettle. A disease, distinguished by those elevations of the cuticle called *wheals*. They have a white top, and are often surrounded by a diffuse redness. They excite intolerable itching, especially when the person is warm in bed. The eruption frequently goes and comes, once or more in the 24 hours, and is generally dependent upon gastric derangement. In some people, nettle-rash is induced by shell-fish, eggs, nuts, &c. It is not, usually, a disease of any consequence, and its treatment is limited to the use of absorbent laxatives, and some general means. Willan has described six varieties of the complaint;—the *Urtica'ria febrilis*, *U. evanida*, *U. perstans*, *U. confer'ia*, *U. subcutanea*, and *U. tuberosa*.

URTICARIA PORCELLANA, *Essera*, *Urticaria*.

URTICA'TIO, from *urtica*, 'a nettle.' A sort of flagellation, with nettles;—used with the intention of exciting the skin.

URUCU, *Terra Orleana*.

USNEA, *Lichen saxatilis*.

USILAGO, *Ergot*.

USTIO, *Burn*.

USTION, *Ustio*, *Causis*, from *urere*, *ustum*, 'to burn.' The act of burning, or of applying the actual cautery. Also, the effect of cauterization;—a burn.

USTULA'TIO. An operation by which a substance is dried by warming.

USUS, *Habit*.

UTER, *Uterus*.

UTERI ANTEVERSIO, *Hysteroloxia anterior*—*u. Convulsivus morbus*, *Lorind matricis*—*u. Coryza*, *Leucorrhœa*—*u. Flexio*, *Hysteroloxia*—*u. Inclination*, *Hysteroloxia*—*u. Obliquitas*, *Hysteroloxia*—*u. Pronatio*, *Hysteroloxia anterior*—*u. Pruritus*, *Nymphomania*—*u. Reflexio completa*, *Hysteroloxia posterior*—*u. Retroversio*, *Hysteroloxia posterior*—*u. Rheuma*, *Leucorrhœa*—*u. Versio incompleta*, *Hysteroloxia*.

UTERI ASCENSUS, *Hysteria*.

UTERINE, *Uteri'nus*, from *uterus*, 'the womb.' That which belongs or relates to the womb.

UTERINE ARTERY, *Arteria uterina hypogastrica*, in size is always in a ratio with the greater or less state of development of the uterus. It arises from the hypogastric, either separately or with the umbilical, or from the internal pudic. It passes upon the lateral parts of the vagina, to which it gives branches; and afterwards ascends on the sides of the uterus, and divides into a considerable number of very tortuous branches, which enter the tissue of the organ.

UTERINE MUSCLE OF RUYSCH consists of some fleshy fibres at the fundus of the uterus, which he regarded as forming a particular muscle.

UTERO GESTATIO, *Pregnancy*.

UTEROMANIA, *Nymphomania*.

UTERUS, *Uter*, *Utriculus*, *Loci*, *Loci muliebres*, *Vulva*, *Venter*, *Arctum naturæ*, *Conceptaculum*, *Matriz*, *Ager naturæ*, *Hystera*, *Metra*, *Stera*, *An'gos*, *Delphys*, *Alvus*, the *Womb*, (F.) *Matrice*, *Sein*. The uterus,—destined to lodge the fœtus from the commencement of conception till birth,—is a hollow, symmetrical organ, having the shape of a truncated conoid: it is situate in the pelvis, between the bladder and the rectum, above the vagina, and below the convolutions of the small intestine. The uterus is flattened from before to behind, and is nearly an inch in thickness. It is two inches broad, in its highest part, and becomes narrower towards the vagina; terminating in a contracted portion, called the *cervix* or *neck*;—to distinguish it from the rest of the organ, called the *body*. From its *fundus* or upper portion the Fallopian tubes pass off. The mouth is called *Os Uteri* or *Os Tincæ*. The cavity is very small, and its parietes are thick. The portion of the cavity, corresponding with the body, is triangular and flattened. Its superior angles present the extremely fine orifices of the Fallopian tubes. The cavity of the neck is slightly dilated before opening into the vagina. The uterus is composed, 1. Of a *serous membrane*. This is external, and furnished by the peritoneum; which is reflected upon the uterus from the posterior surface of the bladder and the anterior surface of the rectum. It forms, also, the *broad ligaments of the uterus*, *Ligamenta lata*, *Alæ resperitilionis*. These contain, above, the Fallopian tube; beneath and anteriorly, the round ligaments; and, behind, the ovary. They are two membranous productions or duplicatures of the peritoneum, sent from the edges of the uterus and posterior extremity of the vagina, in a transverse direction, to be fixed to, and to line the side of the pelvis. 2. Of a *mucous membrane*, which is a prolongation of that of the vagina, and extends into the tubes. 3. Of a *proper tissue*, whose thickness is considerable. It is of a close texture; is grayish and elastic; and resists the instrument that divides it. Its intimate nature is but little known. During gestation it is truly muscular. The arteries of the uterus proceed from the spermatic and hypogastric. Its veins follow the same course, and bear the same name as the arteries. They are very tortuous, and form large sinuses in the parietes of the organ,—called *Uterine Sinuses*. Its nerves proceed from the sciatic and hypogastric plexuses. Its lymphatic vessels are very multiplied; and during pregnancy acquire enormous dimensions. The changes experienced by the uterus during gestation, and after delivery, are very numerous and important to be known. They regard its situation, direction, size, shape, texture, connexions, vital properties, &c.

UTERUS, *Abdomen*—*u. Anteversion of the*, *Hysteroloxia anterior*—*u. Hourglass contraction of the*, *Chaton*—*u. Inclination*, *Hysteroloxia*.

UTERUS, *IRRITABLE*, *Neuralgia of the uterus*. A disease characterized by deep-seated pain in the lower part of the abdomen, and in the back and loins; generally diminished by lying down, and increased by exercise, and more severe for a few days preceding and during menstruation.

On examination *per vaginam*, the uterus is found to be tender on pressure; and the cervix and body slightly swollen, but not usually indurated. It is an obstinate affection, but frequently ends of itself after years of suffering. The treatment must be,—the horizontal posture; local blood-letting to the uterus; emollients; soothing injections; narcotics, warm bath, &c. See Hysteralgia.

UTERUS, INVERSION OF THE, *Inversio Uteri*, *Metranastrophê*, *Ædoptosis Uteri inversa*, (F.) *Inversion de la Matrice*, *Renversement de la Matrice*. The uterus, displaced and turned inside out. This can only happen through want of caution on the part of the medical practitioner. It is a fatal accident, unless speedily reduced. This must be done by gradually returning the superior part, by grasping it with the hand, and making the rest follow.

UTERUS OBLIQUUS, Hysteroloxia—u. Retroversion of the, Hysteroloxia posterior.

UTERUS, RUPTURE OF THE, *Metrorrhæxis*, *Ruptura Uteri*, *Perforatio Uteri*, *Laceratio of the Womb*, (F.) *Rupture de la Matrice*. This dreadful accident occurs during labour, and is known to have taken place, when the child's head suddenly recedes during a pain, with vomiting, sinking of the pulse, cold sweats, &c. When it is evident that this has occurred, the hand must be passed into the uterus, and the feet of the child be brought down.

Cases are on record, in which partial lacerations of the uterus have healed, and the patient has done well. This is a rare event, and not to be anticipated.

UTRICLE. See Semicircular canals.

UTRICULUS, Uterus—u. Lacteus, Receptaculum chyli.

UVA, Uvula, see *Vitis vinifera*—u. Ursi, see *Arbutus uva ursi*.

UVÆ CORINTHIACÆ, see *Vitis Corinthiaca*.

UVÆ PASSÆ, Dried Grapes, Raisins. See *Vitis Vinifera*.

UVÆ PASSÆ MAJORES, see *Vitis vinifera*—u. Passæ minores, see *Vitis Corinthiaca*—u. Passæ sole siccatae, see *Vitis vinifera*.

UVATIO, Ceratocoele, Staphyloma.

UVÆA, from *Uva*, 'an unripe grape.' *Tu'nica acinosa*, seu *aciniformis*, seu *uvula lis*, seu *acinod-lis* seu *uriformis*, *Rhagoïdes*, *Rhoz*, (F.) *Uvée*. Some anatomists have given this name to the choroid coat of the eye; others, to the posterior surface of the iris, on account of the black and very thick varnish that covers it.

UVÆA, COMMISSURE OF THE, Ciliary ligament.

UVÉE, Uvea.

UVIGENA, Uvula.

UVIGERA, Uvula.

U'VULA, diminutive of *uva*, 'a grape.' *Pinna-culum fornicis gutturalis*, *Uva*, *Staphylê*, *Tintinnabulum*, *Columella*, *Cion*, *Cionis*, (q. v.) *Garga'reon*, *Colum'na oris*, *Gurgulio*, *Interseptum*, *Processus seu Cartilago Uvifer*, *Uv'gena*, *Uv'gera*, *Pap of the Throat*, (F.) *Luette*. A fleshy appendix or prolongation, which hangs from the middle or free edge of the velum palati. The uvula has a conical shape, and is of a greater or less size in individuals. It is formed, especially, by the mucous membrane of the velum palati; and contains, within it, the *azygos uvulae* muscle. Its use is not clear.

UVULA, VESICAL, see Urinary bladder.

U'VULAR, *Uvula'ris*, from *uvula*. That which belongs to the uvula.

UVULAR GLANDS are small follicles, belonging to the mucous membrane covering the uvula.

UVULARIA, *Ruscus hypoglossum*.

UVULITIS, from *uvula*, and *itis*, denoting inflammation. *Angina uvularis*, *Staphylitis*, *Cionitis*, *Inflammatio u'vulae*, (F.) *Inflammation de la Luette*, *Falling down of the Palate*. Inflammation of the uvula.

V.

VACCINA, *Vaccinia*, *Variola vaccina*, *V. vaccinica*, *Exanthema vaccina*, *Syn'ocha vaccina*, *Vacc'ola vera*, *Vacc'ina antirariolosa*, *Vacciola scutellata*, *Variolæ tuto'rix*, *Cowpox*, *Kine Pock*, *Inoculated Cowpox*, *Em'phylis vaccina inserta*, from *vacca*, 'cow,' (F.) *Vaccine*. The cow-pox is a disease of the cow, arising spontaneously, which, if transmitted to man by means of inoculation, preserves him from small-pox contagion. The promulgation of this valuable property of the vaccine virus is due to Dr. Jenner. When inoculating for the small-pox in Gloucestershire, in 1775, he was surprised to meet with a number of persons in the same district, on whom the insertion of the virus produced no effect; although they had never passed through the small-pox. On investigation, he found that all these persons had previously been affected by a pustular eruption of the cow, which they had taken, by milking the animal; and which eruption they called *Cow-pox*. This discovery induced him to institute experiments, and he found that such preservative effect actually existed. The *Vaccine Virus*, or the fluid of the

eruption, is not now usually taken immediately from the cow; experience having demonstrated, that it is nearly as efficacious when obtained from the human vesicle. The characteristic of cow-pox eruption is:—a semi-transparent, pearl-coloured vesicle, with a circular or somewhat oval base; its upper surface, until the end of the 8th day, being more elevated at the margin than in the centre; and the margin itself being turgid, shining, and rounded, so as often to extend a little over the line of the base. This vesicle is filled with clear lymph, contained in numerous little cells, that communicate with each other. After the 8th or 9th day from the insertion of the virus, it is surrounded by a bright red, circumscribed aureola, which varies, in its diameter, in different cases, from a quarter of an inch to two inches; and is usually attended with a considerable tumour, and hardness of the adjoining cellular membrane. This aureola declines on the 11th or 12th day: the surface of the vesicle then becomes brown in the centre; and the fluid, in the cells, gradually concretes into a hard, rounded scab, or crust, of a reddish-

brown colour, which at length becomes darker, contracted, and dry, but is not detached till three weeks after vaccination. It leaves a permanent, circular cicatrix, about five lines in diameter, and a little depressed; the surface being marked with very minute pits or indentations, denoting the number of cells, of which the vesicle had been composed. This is the progress of the *genuine cow-pox*. At times, fever occurs about the 9th or 11th day; but, at others, not the slightest indisposition is felt. Aberrations from this progress occur, which must be attended to; as the same preservative influence is not exerted by *irregular* or *spurious cow-pox*. If the eruption runs speedily to a height; has an aureola too early; is irregular at its edges; and contains pus, instead of a limpid fluid,—it cannot at all be depended upon.

Small-pox occurs, at times, as an epidemic after vaccination. For a time, the enthusiastic advocates of vaccination would not admit the affection to be small-pox; and, accordingly, they gave it the name Varioloid, (q. v.) It is unquestionably small-pox, but modified, and greatly divested of its terrors by previous vaccination; and it is said to happen less frequently after vaccination than after *small-pox inoculation*. Vaccination is now practised every where, except among those in whom ignorance and prejudice exclude the lights of reason and philanthropy. There is ground, however, for the belief, that for full protection revaccination may be occasionally necessary.

VACCINA ANTIVARIOLOSA, Vaccina.

VACCINATION, *Vaccinatio*, from *vacca*, 'a cow.' *Cow-pox inoculation*, *Jennërian inoculation*. An operation, which consists in inserting the vaccine virus under the cuticle, so that it may come in contact with the absorbents. It is extremely simple, and requires merely that the point of a lancet should be held under the cuticle for a short time. The best time for taking the matter for vaccination is about the 7th or 8th day, before the appearance of the aureola, when it ought to be limpid and transparent. The most certain method is, to pass it from arm to arm; but this is not always convenient; and, hence, it is taken upon *points* or pieces of quill, or between glasses. It must, of course, be softened for use. This is done by means of a little water, which does not destroy its efficiency. The scab, too, which falls off about the end of three weeks—sooner or later—is capable of communicating the affection, if dissolved in water; and this is the most common method of transmitting the vaccine virus in some countries.

VACCINE, Vaccina.

VACCINELLA. A term employed by some to designate spurious cow-pox.

VACCINIA, Vaccina—v. *Palustris*, *Vaccinium oxycoccus*.

VACCINIUM MYRTILLUS. The *Myrtle Berry*, *Vaccinia myrtillus*, *Bilberry*, *Bleu-berry*, *Whortle-berry*, *Black Whorts*, *Vaccinium nigrum*, (F.) *Airelle Anguleuse*, *Raisin de Bois*. Family, Vaccinæ. *Scz. Syst.* Octandria Monogynia. The berries—*Baccæ Myrtillorum*—are esteemed to be antiscorbutic, when prepared with vinegar. They are also said to possess antiseptic and subastringent properties, when dried. They are not used in medicine; but are frequently eaten with milk and sugar.

VACCINIUM NIGRUM, V. *myrtillus*.

VACCINIUM OXYCOCOS, *Oxycoccus*, *Vaccinia palustris*, *Vitis Idæa palustris*, *Moorberry*, *Cranberry*, (F.) *Canneberge*. The berries are pleasantly acid and cooling. They make an agreeable preserve.

VACCINIUM VITIS IDÆA, *Red Bilberry*, *Am-pelos Idæa*, *Whortleberry*, *Cowberry*, (F.) *Airelle ou Canneberge ponctuée*. A decoction of the leaves has been used in calculous affections. They are astringent. The ripe berries are pleasantly acid, and refrigerant.

VACCIOLA SCUTELLATA, Vaccina—v. *Vera*, Vaccina.

VAGIN, Vagina.

VAGINA, 'a sheath.' *Vagi'na mulie'bris* seu *uteri'na* seu *Uteri*, *Sinus mulie'bris*, *S. Pudor'is*, *Colpos*, *Vagi'na Penis*, *Vulvo-uterine canal*, (F.) *Vagin*. A cylindrical canal, five or six inches long; situate within the pelvis, between the bladder and rectum. It communicates by one extremity—*Aulus*—with the vulva; by the other, with the womb,—the neck of which it embraces. The vagina is lined, internally, by a mucous membrane; and is partly closed, in young females, by the hymen, and carunculae myrtiformes. Around the mucous membrane is a layer of spongy, erectile tissue; and a celluloso-vascular membrane. A constrictor muscle; numerous vessels furnished by the vaginal artery particularly; veins and nerves, proceeding from the sciatic plexus, also, enter into the composition of the organ.

The term *Vagina* or *Sheath*, *Theca*, is extended to many parts, which serve as envelopes to others.

VAGINA OR SHEATH OF THE VENA PORTA, (F.) *Guine de la Veine-porte*, is the cellular membrane that accompanies the divisions of the vena porta into the substance of the liver.

Sheath, (F.) *Guine*, is sometimes applied to the fascia enveloping the limbs; to cellular membrane, enveloping the muscles, and entering between their fibres, to that which surrounds the blood-vessels; to the synovial membranes surrounding tendons, and lining the gutters of bones, &c.

VAGINA GLISSONI, Capsule of Glisson—v. *Muliebris*, *Vagina*—v. *Nervorum*, *Neurilemma*—v. *Penis*, *Vagina*—v. *Portæ*, Capsule of Glisson—v. *Uterina*, *Vagina*.

VAGI'NAL, *Vagina'lis*, from *vagi'na*, 'a sheath.'

VAGINAL ARTERY exists, as a matter of course, only in the female. It arises from the hypogastric or from the uterine, vesical, internal pudic, umbilical, &c., and sends its branches, first to the lateral parts of the vagina, and afterwards to the anterior and posterior surfaces.

VAGINAL COATS, *Tunica Vagina'lis*, *T. Elytroïdes*, vel *Elytro'des*, is the serous membrane, which envelops the testicles. Before the descent of the testicle, the tunica vaginalis does not exist. It is formed by a prolongation—furnished by the peritoneum to the testicle, when it issues from the abdomen—which, subsequently, contracts; and, ultimately, is entirely separated from it, constituting a distinct coat. The tunica vaginalis forms a close sac, which is reflected over the testicle and epididymis, without containing them in its cavity. Its inner surface is smooth, and lubricated by a serous fluid. Its outer surface adheres to the fibrous

coat, common to the spermatie cord and testicle. This reflected portion is the *Tunica vaginalis testis*.

VAGINAL PROCESS of the temporal bone, (F.) *Apophyse vaginale ou engainante*, *Gaine de l'apophyse styloïde*, *Chaton*, is a bony crista, which embraces the base of the styloid process.

THE TUNICA VAGINALIS OCULI, *Submuscular Fascia*, is a membranous coat, which separates the eye-ball from the other structures on the orbit, and forms a smooth hollow surface, by which the motions of the eye are facilitated.

VAGINITIS, Leucorrhœa (vaginal.)

VAGISSEMENT, Cry, Vagitus.

VAGITUS, (F.) *Vagissement*. The cry, (q. v.) of the new-born child. *Squalling*.

VAGUS NERVUS, Pneumogastric.

VAIRON, (F.) *Dispar oc'ulus*. One who has eyes of different colours. It also means a *wall-eyed* animal; or one whose iris is surrounded by a whitish circle.

VASSEAU, Vessel.

VASSEAUX CAPILLAIRES, Capillary vessels.—*v. Chylifères*, Chyliferous vessels.—*v. Lactés*, Chyliferous vessels.—*v. Lactifères*, Lactiferous vessels.—*v. Umbilicaux*, Umbilical vessels.

VALANIDA, *Fagus sylvatica*.

VALERIAN, GARDEN, *Valeriana* phu—*v. Wild*, *Valeriana*.

VALERIANA, *V. officinalis*, *Wild Valerian*, *Valeriana minor*, *Officinal Valerian*. Family, *Dipsacæ*. *Sex. Syst.* Triandria Monogynia. The root, *Valeriana* (Ph. U. S.) has been long extolled as an efficacious remedy in epilepsy, and in a variety of nervous complaints. It has been also advised as a tonic, antispasmodic, and emmenagogue. It has a strong, fetid odour; bitterish, subacid, and warm taste; and its virtues are extracted by water and alcohol.

VALERIANA CELTICA, *Celtic Nard*, *Spica Celtica*, *S. Alpina*, *Nardus Celtica*, *Salum'ca*, *Nardum Gallicum*, *Spica Celtica Dioscoridis*, (F.) *Nard Celticum*. The roots of this Alpine plant have been recommended as stomachic, carminative and diuretic. It has a moderately strong smell; and a warm, bitterish, subacid taste.

VALERIANA DENTATA, *V. locusta*, *Corn Salad*. A wholesome, succulent plant, cultivated in Europe as a salad. It is antiscorbutic and gently aperient.

VALERIANA MAJOR, *V. phu*—*v. Locusta*, *V. dentata*—*v. Minor*, *Valeriana*—*v. Officinalis*, *Valeriana*.

VALERIANA PHU, *V. major*, *Garden Valerian*, (F.) *Grand Valériane*. The root has been recommended in rheumatism; especially in sciatica, and in epilepsy, &c.

VALERIANE GRANDE, *Valeriana phu*.

VALET À PATIN, (F.) *Volsella Patini*. The common ligature forceps is a modification of this instrument invented by one Patin. It consists of two branches, united at the middle by a hinge, which may be separated or approximated by means of a screw or running ring. It is used for seizing hold of vessels that are to be tied.

VALETUDINARIUS, Sickly.

VALETUDINARY, *Valetudinarian*, *Valetudinaris*, from *valetudo*, 'health.' One of delicate health. One subject to frequent diseases. An Invalid.

VALETUDO, Sanitas.

VALGUS. See *Kyllosis*.

VALIGA, *Tinctura jalapii*.

VALLUM. The eyebrow or supercilium, (q. v.) Also, a species of bandage.—*Galen*.

VALS, MINERAL WATERS OF. A French acidulous chalybeate, at Vals, six leagues from Viviers, in the department of Ardèche. There are five springs, containing carbonic acid, sulphate of iron, and alum. They are employed in passive hemorrhages, leucorrhœa, &c.

VALVE, *Valvula*, (F.) *Valvule*, from *valvæ*, 'folding doors,' itself from *volvō*, 'I fold up.' A small door. Any membrane or duplicature of a membrane, which prevents a reflux of humours or other matters in the vessels and canals of the animal body. There are some valves, whose functions appear to be,—to retard or to modify the course of substances along canals, &c. See *mitral*, *sigmoid*, *tricuspid*, *ileo-cæcal valve*, &c.

VALVE OF FALLOPIUS, *Bauhin*, valve of—*v. Ileocæcal*, *Bauhin*, valve of—*v. of Tulpus*, *Bauhin*, valve of—*v. of Variolus*, *Bauhin*, valve of.

VALVES, SEMILUNAR, Sigmoid valves.

VALVULA, Valve—*v. Cæci*, *Bauhin*, valve of—*v. Cerebelli*, *V. Vieussenii*—*v. Coli*, *Bauhin*, valve of—*v. Foraminis ovalis*, *Ovalis fossa*—*v. Guiffartiana*, see *Thebesius*, veins of—*v. Ilei*, *Bauhin*, valve of.

VALVULA VEL PLICA SEMILUNARIS. A small doubling of the tunica conjunctiva, which lies between the caruncula lacrymalis and the ball of the eye. In birds, this is large, and called *Membrana nictitans vel Palpebra tertia*.

VALVULA THEBESII, see *Thebesius*, veins of—*v. Vaginæ*, *Hymen*—*v. Venæ magnæ*, see *Thebesius*, valve of.

VALVULA VIEUSSENI, *Velum Vieussenii*, *Valvula cerebelli seu Willisiana*, *Velum interjectum cerebelli*, *V. apophysi vermiformi obtentum*, *Lacunar ventriculi quarti superior*, *Velum medullarè seu medullarè anticum*. (F.) *Valvule de Vieussens*, *Voile médullaire supérieure*. A thin, medullary lamina, over the under end of the Aquæductus Sylvii, and upper part of the 4th ventricle. At the sides of the valves are two medullary tracts, called *Processus ad Testes*, *Colum'næ Valvulæ Vieussenii*, or *Oblique intercerebral Commissure*.

VALVULA WILLISIANA, *V. Vieussenii*.

VALVULÆ CONNIVENTES. Numerous circular folds in the intestinal canal from the pyloric orifice through the greater part of the small intestine. They are folds of the mucous membrane; and their chief use appears to be,—to retard the course of the alimentary mass, and to afford a larger surface for the origin of chyliferous vessels.

VALVULÆ EPISCOPALES, Mitral valves—*v. Triglochinæ*, *Tricuspid valves*—*v. Trisulcæ*, *Tricuspid valves*.

VALVULE, Valve—*v. d'Eustache*, *Eustachian valve*—*v. de Pyloræ*, see *Pyloræ*—*v. de Vieussens*, *Valvula Vieussenii*.

VALVULES SIGMOIDES ou *SEMILUNAIRES*, Sigmoid valves.

VANELLOE, Vanilla

VANILLA, *Banilla*, *Banilas*, *Banilloës*, *Banilla*, *Benzô'ênil*, *Aracus aromaticus*, (F.) *Vanille*, *Baume de Vanille*. The *Vanellœ* is a long, flattish pod; containing, under a wrinkled, brittle shell, a reddish-brown pulp, with small,

shining, black seeds. The parasitic plant, which affords this pod, is the *Epidendrum Vanilla*. Family, Orchidæ. Sex. Syst. Gynandria Diandria. Vanelloes have an unctuous, aromatic taste, and a fragrant smell, like that of some of the finer balsams, heightened with musk. Although chiefly used as perfumes, they are reputed to possess aphrodisiac virtues.

VAPORARIUM, *Atmisterion*, *Laconicum*, *Sudarium*, *Sudatorium*; a Vapour bath. A useful remedy in rheumatic and cutaneous affections; and wherever it is important to relax the cutaneous capillaries. In the *Russian Vapour Bath*, the vapour is produced by throwing water over hot stones. Its temperature is from 122° to 145°.

VAPORARIUM, Hypocaustum. See Stove.

VAPORATIO, Evaporation.

VAPORES UTERINI, Hysteria.

VAPOUR BATH, Vaporarium.

VAPOURS, Hypochondriasis, Hysteria.

VARA, Burra.

VAREC, Kelp—*v. Vésiculeux*, Fucus vesiculosus.

VARENI, Ambulo-flatulentus, Gout (wandering)

VARICE, Varix.

VARICELLA, (diminutive of *Variola*, Small-Pox.) *Euphyllis varicella*, *Exanthema varicella*, *Synochus varicella*, *Chicken pox*, *Variola lymphatica*, *V. spuria*, *Variolæ nothæ*, *V. illegitimæ*, *Pseudo-variolæ*, *V. voluticæ*, *V. pucillæ*, *Æolion*, (F.) *Varicelle*, *Petite vérole volante*, *Vérolute*. A disease, characterized by vesicles scattered over the body, which are glabrous, transparent, and about the size of peas. They appear in successive crops; are covered by a thin pellicle; and, about the 3d, 4th, or 5th day from their appearance, burst at the top, and concrete into small, puckered scabs, which rarely leave a pit in the skin. Three varieties have, sometimes, been designated. 1. The *V. lentiformes*, or *lenticular chicken pox*, which are irregularly circular, and flattened on the top; the fluid being at first whitish, and afterwards straw-coloured. This is the *common chicken pox*. 2. The *Varicella coniformis*, or *Conoidul Chicken Pox*, *Peniphigus varioloides*, *Variola lymphatica*, *Hydrachnis*, *Swine Pox*, *Water Pox*, *Water Jags*, in which the vesicles are generally acuminated, and the fluid pellucid throughout; and 3dly, the *Varicella globularis* or *Hives*, in which the vesicles are globular and larger; the fluid being, at first, whey-coloured, and afterwards yellowish. These divisions are, however, very arbitrary, for they are generally confounded.

Variola has been, sometimes, mistaken for this disease, and conversely. A little attention to the history of the eruption in the two affections will prevent error. Varicella is not contagious. At times, it prevails epidemically. It cannot be propagated by inoculation. The treatment is extremely simple; rest, abstinence, and the antiphlogistic regimen, being all that is, generally, required.

VARICIFORMES PARASTATÆ. A name given, by some authors, to the ducts of the epididymis, because they seem knotty and varicose.

VARICOBLEPHARON, from *Varix*, and *πτερον*, 'eyelid.' A varicose tumour of the eyelid.

VARICOCELE, from *varix*, and *κίλη*, 'a tumour,' *Oscheocele varicoça*, *Her'nia varicoça*, *Ramex varicoçus*, *Spermatocele*, (q. v.) *Cirsocele*. A varicose dilatation of the veins of the scrotum and spermatic cord. This latter variety of the disease is more common on the left side than the right. It appears under the form of a soft, doughy, unequal, knotty, compressible, and indolent tumour, situate in the course of the cord, and increasing from below upwards. It is less, when the individual is in the recumbent posture, and increases when he is erect. It is, ordinarily, an affection of no moment, and is very common, requiring merely the use of a proper suspensory bandage. It has been advised, in bad cases, to tie the enlarged vein, but the operation is not free from danger induced by phlebitis. Sir A. Cooper has proposed the removal of a portion of the scrotum, so as to render the remainder of the scrotum a natural bandage. This plan has been found effectual.

VARICOMPHALUS, from *varix*, and *ομφαλος*, 'the umbilicus.' Varicose tumour of the umbilicus; cirsocephalus, (q. v.)

VARICOSE, *Varicoçus*, (F.) *Variqueux*; affected with varix; or belonging to, or connected with, varix;—as a *varicose vein*, (q. v.) a *varicose ulcer*. i. e. one kept up by varices.

VARICOSITAS CONJUNCTIVÆ, Cirsophthalmia.

VARICULA, *Varix parva*. A diminutive of *varix*. Also, a varicose swelling of the veins of the tunica conjunctiva.—M. A. Severinus.

VARIOLA, *Variolæ*, *V. vera*, *Varioli*, *Small-Pox*, *Emphyesis Variola*, *Euphlogia*, *Chaspe*, *Æolethyma*, *Pox* (N. of England,) *Pestis variolosa*, *Febris variolosa*; from *varius*, 'spotted,' or from *vari*, 'pimples.' (F.) *Variole*, *Petite Vérole*, *Picote*. A disease now of somewhat less interest than before the discovery of vaccination. It is of a very contagious nature, and is supposed to have been introduced into Europe from Asia, at an early period of the middle ages. It is characterized by fever, with pustules, appearing from the 3d to the 5th day, and suppurating from the 8th to the 10th, and it possesses all the distinctive properties of the major exanthemata. It is capable of being produced by inoculation, (q. v.) but this inoculated small-pox—*Variola inserta*—communicates the disease as readily through the air as the *natural small-pox*, or that received without inoculation.

Small-pox is distinguished into two classes, according to the character of the eruption, the *discrete* or *distinct*, and the *confluent*. 1. In **VARIOLA DISCRETA**, *Emphyesis variolæ discreta*, *Variola discreta benigna*, *Variolæ regulares seu discreta*, *Distinct Small-Pox*, the pustules are usually of the size of peas; distinct, distended, and circular; the intervening spaces being red; the fever inflammatory throughout; and ceasing when the eruption is complete. 2. In **VARIOLA CONFLUENS**, *Emphyesis variolæ confluens*, *Variolæ regulares confluentes*, *Vesiculae Divæ Barbae*, *Vésicules de Sainte-Barbe*, or *Confluent Small-Pox*, the pustules are confluent or run together; flaccid and irregularly circumscribed; the intervening spaces being pale, and the accompanying fever typhoid. In children, diarrhoea, and, in adults, pytialism, with swelling of the hands and feet generally appear towards the period of the *secondary fever*, which occurs

from the tenth to the thirteenth day. The fever that precedes and accompanies the eruption is called the *Eruptive fever*. The prognosis is favourable in the distinct kind, if properly managed. The confluent is always dangerous,—the unfavourable symptoms being—flattening of the pustules, or subsidence of the eruption; the breathing becoming much obstructed or oppressed; or marks of inflammatory and congestive affections occurring in the different viscera. The treatment of the distinct kind is very simple; the antiphlogistic regimen, with cathartics, being all that is necessary. The confluent kind requires the same management as typhus fever.

VARIOLA AMBOINENSIS, Frambœsia—v. Insetta, Variola (by inoculation)—v. Lymphatica, Varicella.

VARIOLA sine VARIO'IS, *Variolous Fever*. These terms are applied to cases, occasionally observed during the prevalence of variola, in which the constitutional phenomena are present without the cutaneous eruption.

VARIOLA SPURIA, Varicella—v. Vaccina, Vaccina.

VARIOLÆ, Variola—v. Illegitimæ, Varicella—v. Modificatæ, Varioloid—v. Nothæ, Varicella—v. Pucillæ, Varicella—v. Tutoriæ, Vaccina—v. Veræ, Variola—v. Volaticæ, Varicella.

VARIOLE, Variola.

VARIOLI, Variola—v. Bridge of, Pons Varolii.

VARIOLOID, *Varioloides*, *Variolæ modificatæ*, from *variola*, small-pox, and *εἶδος*, 'form,'—resembling small-pox. This is, really, small-pox, modified by previous inoculation or vaccination; and hence it has been properly called *modified small-pox*. That it is small-pox is proved by the fact, that matter, taken from a varioloid pustule, will communicate small-pox to one who has never had it naturally or by inoculation, or who has never been vaccinated. It is, almost always, a milder disease than small-pox; and this circumstance, with its shorter duration, exhibits the salutary effects of previous vaccination. It has appeared epidemically.

VARIQUEUX, Varicose.

VARIX, *Phlebeurysma*, *Hernia seu Ectasia venarum*, *Angiectasia venosa*, *Idia*, *Circus*, *Varicose Vein*, (F.) *Varice*, is considered, by some, to come from the verb *variare*, 'to turn,' 'to twist';—on account of the sinuities of varicose veins. Dilatation of a vein Varices are owing to the retardation of venous circulation; and in some cases, to relaxation of the parietes of the veins. They are very common in the superficial veins of the lower limbs, especially of pregnant females. The tumour or tumours, formed by varices, are soft, knotty, unequal, indolent, and livid; without pulsation, and yielding readily to the impression of the finger; but returning as soon as the compression is discontinued. Sometimes, the vein bursts and gives rise to hemorrhage. The treatment is usually palliative, and consists in exerting a uniform and constant pressure upon the part, by means of an appropriate bandage. The radical cure has, also, been obtained by extirpation, division of the vein, or ligature. The second course is apt to be followed by phlebitis.

VARUS, Acne, Ionthus. See Kyllosis—v. Mentagra, Sycosis.

VAS, Vessel, Penis—v. Deferens mulieris, *Tuba Fallopiana*—v. Urinarium, Ureter.

VASA LACTEA, Chyliferous vessels—v. Sedalia, Hæmorrhoidal vessels.

VASA VASORUM. Small vessels that supply larger. However minutely we trace a vessel, we always find its parietes supplied with blood for its nutrition by a smaller vessel.

VASA VORTICOSA, (F.) *Tourbillon vasculaire*. The contorted vessels which creep on the choroid coat of the eye, ciliary veins, (q. v.)

VASCULAR, *Vascularis*, *Vasculosus*, from *vas*, 'a vessel.' That which belongs or relates to vessels;—arterial, venous, or lymphatic; but generally restricted to blood-vessels only. Bichat gave the name—*Vascular system*—to the blood-vessels, and of this he made two divisions. 1. The *Arterial System*, or *System of red blood*, (F.) *Système vasculaire à sang rouge*, which commences with the radicles of the pulmonary veins; and includes the pulmonary veins, the left cavities of the heart and the aorta, with all its ramifications. The blood, in this system, is distributed to the general capillary system, where it loses its arterial quality and becomes venous. 2. The *Venous system* or *Vascular system of black blood*, (F.) *Système vasculaire à sang noir*, carries the venous blood from every part of the system to the lungs. It takes its origin in the general capillary system; continues in the veins, right auricle, and ventricle of the heart and the pulmonary artery and its branches, and is finally lost in the capillary system of the lungs. See Circulation.

VASCULAR SYSTEM, INTERMEDIATE, Capillary system—v. System, Peripheral, Capillary system.

VASCULUM, Penis.

VASCULUM ABERRANS, *Appendix to the Epididymis*. A small convoluted duct, of variable length, generally connected with the duct of the epididymis, immediately before the commencement of the vas deferens.

VASE À SAIGNER, Cup.

VASTUS. That which is *vast* or has a great extent.

VASTUS EXTERNUS and **V. INTERNUS** are two considerable, fleshy masses, which form part of the Triceps Cruris, (q. v.)

VAULT, (old F. *Voulte*,) 'a round or turn,' from *volvere*, *volutum*, 'to turn,' *Fornix*, *Camæra*, (F.) *Voûte*. A name given by anatomists to several parts which are rounded superiorly; concave and arched inferiorly,—as the *Vault of the cranium*, or the upper part of the skull,—the *Palatine vault or roof of the mouth*, &c., &c.

VAUQUELINE, Strychnina.

VECTIS, Lever—v. Elevatorius, Elevator—v. Triploides, Elevator, triploid.

VEGETATION, *Vegetatio*, 'growing like a plant.' A morbid part, which rises as an excrescence in syphilis, &c.—as the *Cauliflower excrescence*, &c. The term is, also, applied to the fleshy granulations or *Hypersarcoscs*, which sometimes arise at the surfaces of wounds or ulcers.

VEHICLE, *Vehiculum*, *Oche'ma*, (F.) *Véhicule*, from *vehere*, 'to carry.' Any thing which serves to carry; thus, air is the *vehicle* of sound; the arteries are the *vehicles* of the blood. In *Pharmacy*, the name *vehicle* is given to any excipient; or to substances which serve as the media of administration for any medicine.

VEHICULE, Vehicle.

VEIN, *Vena*, *Phlebs*, *Phleps*, (F.) *Veine*. The veins are vessels for the conveyance of black

blood from every part of the body to the heart. They are found wherever there are arteries; and, altogether, form the *venous system*, which may be subdivided into two distinct secondary systems. 1. The *General venous system*, which commences in all the organs, by very minute radicles; and terminates in the heart by the vena cava and the coronary vein. 2. The *Abdominal venous system*, which is limited to the abdominal cavity; commences, also, by a great number of branches, and terminates in the liver by a single trunk, which subdivides in that organ. It is called, also, the *System of the Vena Porta*, or the *Portal System*. See *Porta*. The veins form two sets, one *deep-seated*, *Venæ sutel-*

lites, *V. concom'ites*, which accompany the arteries; the other *superficial* or *subcutaneous*. Their parietes, which are thinner than those of the arteries, are composed of two coats; the one, external, loose, extensible, and with parallel, longitudinal fibres—the *proper membrane*; the other, the *common* or *inner membrane*, which is thin, polished, and has numerous duplicatures or folds forming parabolic valves. These valves are most numerous in the veins of the lower extremities. The coats of the veins are supplied with small arteries or *vasa vasorum*, veins, and lymphatics. They have not as many nervous filaments as the arteries. These filaments are from the great sympathetic.

TABLE OF THE VEINS.

TABLE OF THE VEINS.

1. VEINS WHICH FORM THE SUPERIOR VENA CAVA.		2. Right Internal Mammary Vein.		3. Inferior Thyroid Vein, opening into the Vena Cava, between the two Subclavians.			
1. Subclavians.	1. Axillary which Receives the 1. Basilic, formed of the 2. Cephalic, forming the 3. Circumflex veins. 4. Inferior scapular. 5. Long thoracic. 6. Superior thoracic. 7. Acromial veins.	1. Posterior ulnar. 2. Anterior ulnar. 3. Median basilic. 3. Superficial radial. 2. Median cephalic.	4. Vena Azygos, which receives the 1. Right Bronchial. 2. Intercostal Veins. 3. Semi-azygos.				
	2. External Jugular. Receives the 1. Internal maxillary, composed of the 2. Superficial Temporal, composed of the 3. Posterior Auricular. The trunk then takes the name of <i>External Jugular</i> , and, in its course along the neck, receives— 4. Cervical Cutaneous. 5. Trachelo-scapular, &c. Receives 1. Superior Cerebral Veins. 2. Veins of the Corpus Striatum. 3. Veins of the Choroid plexus. 4. Superior Cerebellar Veins. 5. Inferior Cerebellar Veins. 6. Lateral and inferior Cerebral Veins.		2. VEINS WHICH FORM THE INFERIOR VENA CAVA. Receives the 1. Femoral or Crural, which is a continuation of the 2 Popliteal, commencing by 3 veins which accompany the fibular arteries, and receiving the— 1. External Saphena and 2. Internal Saphena, which receive— 3. External pudic veins. 2. Internal Iliac which receives the 1. Vesical Veins, commencing with the 2. Dorsal veins of the penis in the male. 2. Vains of the clitoris, in the female. 3. Middle Sacral Vein. 4. Lumbar Veins—four in number on each side, commencing by an— 1. Abdominal branch. 2. Dorsal branch. 5. Spermatic Veins, commencing with the 1. Spermatic plexus, in the male. 2. Ovarium, Fallopian tube, &c. in the female. 6. Renal Veins. 7. Capsular and Adipose Veins. 8. Hepatic Veins. 9. Middle, and 10. Left, and Hepatic Veins. 11. Right 12 Inferior Diaphragmatic Veins, two in number.				
	3. Internal Jugular. Receives 1. Ophthalmic Vein, composed of the 2. Infra-orbital. 3. Ciliary. 4. Ethmoidal. 5. Palpebral, and 6. Nasal Veins. 7. Palpebral, and 8. Superior 5. Inferior 6. Several Buccal and 7. Masseteric Veins. 8. Rarine, 9. Submental, and 10. Inferior Palatine. 9. Lingual and Pharyngeal Veins. 10. Superior thyroid. 11. Occipital, and 12. Veins of the Diploë.		3. VEINS OF THE HEART. 1. Great right Coronary. 2. Small right Coronary. 3. Left Coronary Veins. 4. VEINS WHICH FORM THE VENA PORTA. Receives the 1 Veins which correspond to the vasa brevia. 2. Right and left gastro-epiploic. 3. Duodenal, and 4. Pancreatic veins. 5. Coronary Vein of the Stomach, and 6. Small mesenteric vein. 2 Superior Mesenteric Vein.				

VEIN, BRONCHIAL, LEFT, see Azygos—
v. Demi-azygous, see Azygous—v. Frontal, see Facial vein—v. Semi-azygous, see Azygous, (vena,)—v. Superior intercostal, left, see Azygos—v. Tibio-malleolar, Saphena, great—v. Palato-labial, Facial vein—v. Peroneo-malleolar, Saphena minor—v. Varicose, Varix.

VEINE, Vein—v. Cure, Vena cava—v. Céphalique, Jugular vein, internal—v. Céphalique du ponce, Cephalic vein of the thumb—v. Cubital cutanée, Basilic vein—v. Fessière, Gluteal

vein—v. Porte, Porta vena—v. Prélombo-thoracique, Azygos, (vena,)—v. Préparate, Cephalic vein—v. Radiale cutanée, Cephalic vein—v. Trachélo-sous-cutanée, Jugular vein, external.

VEINES ARTERIELLES, Arterial veins—
v. Ciliaries, Ciliary veins—v. Sous-clavières, Subclavian veins

VEINS, CORONARY, Cardiac veins—v. Intra-lubular, Hepatic veins—v. Supra-hepatic, Hepatic veins.

VEINSTONE, Phlebolite.

VELAMENTA BOMBYCINA, Villous membranes.

VELAMENTUM ABDOMINALE, Peritonæum—v. Corporis commune, Integument.

VELAR, Erysimum.

VELOSYNTHESIS, Staphyloraphy.

VELUM, V. pendulum palati—v. Apophys vermiformi obtentum, Valvula Vieussenii—v. Interjectum cerebelli, Valvula Vieussenii—v. Medullare anticum, Valvula Vieussenii.

VELUM MEDULLARÉ INFERIUS, (F.) *Voile médullaire inférieur*. A name given, by Reil, to the medullary band or strip, by which the cerebellum communicates with the medulla.

VELUM PALATI, V. pendulum palati—v. Palatinum, V. pendulum palati.

VELUM PENDULUM PALATI, 'Pendulous veil of the palate.' *Velum, Velum Palati'num, Velum Palati, Velum Pendulum, Velum Staphyli'num, Claustrum Palati, Soft Palate, Palatum Mollè, Septum Staphylin, (Ch.,) (F.) Voile du Palais*. A movable, soft, and broad septum, attached to the posterior extremity of the palatine arch, and separating the mouth from the pharynx. Its form is nearly quadrilateral. Its *anterior surface* corresponds to the mouth; the *posterior* to the pharynx. Its *superior edge* is fixed to the palatine arch; the inferior is free, floating, and has an appendix at its middle—the *uvula*. The lateral margins of the velum are held down by two folds, separated from each other by a triangular space; these are called the *pillars*; the anterior passes to the base of the tongue, the posterior to the sides of the pharynx. The velum palati is formed of a mucous coat, which contains numerous follicles, and of a muscular stratum, in which are the peristaphylini interni and p. externi muscles, the glosso-staphylini, the pharyngo-staphylini and the palato-staphylinus. The arteries of the velum palati are furnished by the internal maxillary, the labial and the superior pharyngeal. Its veins open into the internal jugular. Its nerves are sent off from the ganglion of Meckel, and come from the palatine branches. The glosso-pharyngeal nerve, likewise, sends it some filaments.

VELUM STAPHYLINUM, V. pendulum palati—v. Vieussenii, Valvula Vieussenii.

VENA, Vein, Penis—v. Alba renum, Ureter—v. Alba thoracis, Thoracic duct—v. Apoplectica, Jugular vein, internal—v. Arteriosa, Porta vena—v. Capitis, Cephalic vein—v. Cubiti interior, Basilic vein—v. Falcis cerebri, Sinus longitudinal inferior—v. Lactea, Porta vena—v. Magna, Porta vena—v. Medina Arabum, Dracunculus—v. Ostiaria, Porta vena—v. VENÆ APOPLECTICÆ, Jugular veins—v. Cavæ hepatis, Hepatic veins—v. Concomites, see Vein—v. Galeni, Choroid, (veins,)—v. Lactææ, Chyliferous vessels—v. Lymphaticæ, Lymphatic vessels—v. Micantes, (arteries,) see Artery—v. Pulsatiles, (arteries,) see Artery—v. Satellites, see Vein—v. Soporales, Jugular veins—v. Sphagittides, Jugular veins.

VENEFICIUM, Poisoning.

VENENATUS, Venomous.

VENENUM, Poison, Venom.

VENEREAL, *Vene'reus, Aphrodisiæcus, Ve-*

ne'rean, from *Venus*, 'the goddess of pleasure.' That which relates to the pleasures of love. In a more restricted sense, the word *Vene'real* is synonymous with *syphilitic*, and also with *syphilis*. Some authors have proposed that those diseases should be called *vene'real*, which are produced by excess in venery; and that *syphilitic* should be limited to those which are the result of impure connexion.

VENEREAL DISEASE, Syphilis.

VÉNÉRIEN, Venereal. This term, also, means one labouring under syphilis; as *Hôpital des vénériens*.

VEN'ERY. Same etymon. The pleasures of love. Sexual communication: Coition, (q. v.)

VENIMEUX, Venomous.

VENIN, Venom.

VENOM, *Vene'nium, Tox'icum, (F.) Venin*. A poisonous fluid, secreted by certain animals, as the viper, in a state of health, and which they preserve in a particular reservoir, to use as a means of attack or defence. It differs from *virus*, as the latter is always the result of a morbid process, may be produced by the individuals who receive it, in their turn, and be transmitted to others.

VENOM, QUICKENING, Sperm—v. Vital, Sperm.

VEN'OMOUS, *Vene'natus, (F.) Venimeux*. An epithet applied to animals which have a secretion of venom, as the viper, rattlesnake, &c., and, also, to liquids, in the animal body, which have been so perverted by previous disease, that their contact occasions serious mischief in sound individuals; as happens in hydrophobia.

VENOUS HUM, *Bruit de diable*—v. System, Abdominal, Porta vena—v. System, see Vascular.

VENT, Wind.

VENTER, Uterus—v. Imus, Abdomen, Hypogastrium—v. Inferius, Abdomen—v. Medius, Thorax—v. Parvus, Hypogastrium—v. Propendens, Hysteroloxia superior—v. Renum, Pelvis of the kidney—v. Superius, Cavum cranii.

VENTEUX, Windy.

VENTILATION, *Ventila'tio*; from *ventus*, 'wind.' The act of renewing the air of vessels, hospitals, and apartments, or of situations where many people are collected together. The utility of such renewal must be evident, when it is considered that atmospheric air loses its oxygen during respiration, and that carbonic acid supplies its place. Stagnant air, also, becomes loaded with numerous impurities; and hence one of the greatest hygienic improvements, of modern times, has been a proper attention to circulation of air. It is, moreover, one of the most valuable additions to our stock of therapeutical agents in many diseases.

Instruments, used for the purpose of renewing the air, in ships, apartments, &c., have been called *ventilators*.

VENTOSITÉ, Flatulence.

VENTOUSES SCARIFIÉES, Cupping with the scarificator.

VENTOUSES SÈCHES, Cupping, dry.

VENTRALE CUTANEUM, 'Cutaneous apron.' (F.) *Tublier*. An elongation of the nymphæ in the Bosjesman female, which hangs down before the vulva like an apron.

VENTRE, Abdomen—v. *Inferieur, Abdomen*—v. *Resserré*. Constipation.

VENTRICLE, *Ventriculus*; diminutive of

venter, 'belly.' Literally, a little belly. A name given, in anatomy, to various parts.

VENTRICLE OF ARANTIUS. A small cavity lined with gray substance, at the point of the calamus scriptorius.

VENTRICLES OF THE BRAIN, *Ventriculi seu Cavitates seu Sinus Cerebri*, (F.) *Ventricules du cerveau*, are five cavities in the interior of that organ, which are distinguished into the *lateral ventricles*, *middle ventricle*, *4th ventricle* or *ventricle of the cerebellum*, and *5th ventricle*. The *middle ventricle*, or *3d ventricle*, (F.) *Ventricule moyen du cerveau*, is situate in front of the pineal gland. It is bounded, *above*, by the tela choroidea and the fornix; *below*, by a portion of cerebral substance, which separates it from the base of the cranium; *laterally*, by the thalami nervorum opticorum; *anteriorly*, by a medullary cord, called the *anterior commissure*; and, *posteriorly*, by another medullary cord, called the *posterior commissure*. It communicates with the lateral ventricles by two openings, situate behind the anterior pillar or crus of the fornix. The *Lateral Ventricles, Ventriculi majores, V. priores, V. superiores, V. tricornes*, (F.) *Ventricules latéraux*, are two in number. They are large, and owing to their considerable curvature, occupy a great part of the cerebral centre. They are bounded, *above*, by the inferior surface of the corpus callosum; *anteriorly*, by the curved portion of the same body; *posteriorly*, by a considerable mass of cerebral substance; and, *internally*, they are separated from each other by the septum of the ventricles,—a medullary plate, which is given off from the lower part of the corpus callosum. The lateral ventricles have, in their upper and anterior portion, the *Corpora striata, Thalami optici*, and *Tænia semicircularis*:—their inferior portion contains the *corpus fimbriatum, cornu Ammonis*, &c. The *Fourth Ventricle, (F.) Quatrième ventricule*, is situate beneath the *aqueduct of Sylvius*, by which it communicates with the third ventricle. It extends from this aqueduct to the upper part of the medulla; and is seated in the substance of the tuber annulare. The *Fifth Ventricle, (F.) Cinquième ventricule*, is the small serous cavity between the laminae of the septum lucidum;—called, also, *Fissure* or *Fossa of Sylvius* or *Sinus of the Septum lucidum*.

VENTRICLES OF THE HEART, *Ventriculi Cordis*, (F.) *Ventricles du cœur*, are two in number. The *Right Ventricle, Pulmonary ventricle, Ventriculus anterior, V. primus, V. pulmonalis*, (F.) *Ventricule droit ou pulmonaire*, is situate on the fore-part of the heart, the base and apex corresponding to those of the heart. In it are seen the *Columnæ carnea* and *Cordæ tendineæ*. The right ventricle communicates with the right auricle by the *Ostium venosum*, and from it the *Pulmonary artery* issues. Around the auricular orifice is a tendinous margin or ring, from which the tricuspid valve is given off. The use of the ventricle is to send the blood, by its contraction, along the pulmonary artery to the lungs. The *Left Ventricle, Ventriculus aorticus, V. posterior, V. secundus*, (F.) *Ventricule gauche ou aortique*, is situate at the posterior and left part of the heart. Its parietes are much thicker and stronger than those of the right, owing to its having to send the blood over the whole system. The inner surface has the same general appearance as that of the right. The *Columnæ*

carnea and *Cordæ tendineæ* are, however, much stronger. It communicates with the left auricle by means of the *Mitral valve*; and from it proceeds the largest blood-vessel of the body,—the aorta.

VENTRICLES OF THE LARYNX, *Sacculi laryngæi, Sinus of the Larynx, (F.)* *Ventricules ou Sinus du larynx*, are two depressions in the larynx, comprised between the superior and inferior ligaments.

VENTRICLE, PULMONARY, V. right.

VENTRICLE AORTIQUE, Ventricle, left—v. Cinquième, Ventricle, fifth—v. Droit, Ventricle, right—v. Gauche, Ventricle, left—v. Moyen de Cerveau, Ventricle, middle, of the brain—v. Pulmonaire, Ventricle, right—v. Quatrième, Ventricle, fourth.

VENTRICULES DU CERVEAU, Ventricles of the brain—v. du Cœur, Ventricles of the heart—v. Latéraux, Ventricles, lateral.

VENTRICULI CORDIS, Ventricles of the heart—v. Dissolutio, Gastro-malacia—v. Duræ matris, Sinus of the dura mater—v. Emolliatio, Gastro-malacia—v. Majores, Ventricles, lateral—v. Metamorphosis gelatiniformis, Gastro-malacia—v. Perforatio, Gastro-brosis—v. Priores, Ventricles, lateral—v. Pseudophillogosis resolutiva et colliquativa, Gastro-malacia—v. Superiores, Ventricles, lateral—v. Tricornes, Ventricles, lateral.

VENTRICULUS, Stomach, Ventricle—v. Anterior, Ventricle, right—v. Aorticus, Ventricle, left.

VENTRICULUS CALLOSUS, 'Callous stomach.' The gizzard or *third stomach* of the gallinaceous bird. It consists of a double-bellied or *digestive* muscle; is lined by a firm cuticle, and forms a kind of pouch depending from the alimentary tube, in which the second stomach terminates, and from which the duodenum or *Ventriculus succenturiatus* issues. In the interior of the gizzard, there are numerous pebbles, which seem to be destined to aid in the trituration of the food. The gizzard is an organ of mastication, and is possessed of great muscular power.

VENTRICULUS POSTERIOR, Ventricle, left—v. Pulmonalis, Ventricle, right—v. Primus, Ventricle, right—v. Secundus, Ventricle, left—v. Succenturiatus, Duodenum.

VENTRILIQUE, Engastrimythos.

VENTRILQUIST, Engastrimythos.

VENTROSITAS, Physconia.

VENTUS, Wind.

VENULA, Phlebon, diminutive of Vena. A small vein. Hippocrates seems to use it in the same sense as *Arteria*.

VENUS, Clitoris, Coition, Cuprum—v. Crystals of, Cupri subacetates—v. Crystaux de, Cupri subacetates

VER CUCURBITAIRE, Tænia solium—v. de Guinée, Dracunculus—v. Luisant, Cicindela—v. Solitaire, Bothriocephalus latus, Tænia solium.

VERATRIA, Veratrina.

VERATRINA, *Veratrina, Veratrine.* A vegetable alkali, found in the seeds of the *Veratrum Sabadilla* and in the *Veratrum album* and *Colchicum autumnale*. It is solid, white, pulverulent, and inodorous; of a very acrid taste; decomposable by heat; very soluble in water, and soluble in alcohol. When prepared in the usual manner, it still contains other substances,

—*Sabadillin, Vêratin*, gum resin of the *Sabadilla*, and a black greasy matter. It is extremely poisonous, and is but little used internally in medicine. Magendie has given it as an emetic and drastic in very small doses. Of late, it has been recommended to be applied in the way of friction, or endermically, (from gr. v to xx, to ʒj of lard or cerate,) in various neuralgic affections. The following is the formula for its preparation in the Pharmacopœia of the United States, (1842):—Take of *cevadilla*, ℥ij; *alcohol*, 3 gallons; *diluted sulphuric acid*, *solution of ammonia*, *purified animal charcoal*, and *magnesia*, each a sufficient quantity. Boil the *cevadilla* in a gallon of the *alcohol*, in a retort with a receiver attached, for an hour, and pour off the liquor. To the residue add another gallon of the *alcohol*, together with the portion recently distilled; again boil for an hour, and pour off the liquor. Repeat the boiling a third time with the remaining *alcohol*, and with that distilled in the previous operation. Press the *cevadilla*, mix and strain the liquors, and, by means of a water bath, distil off the *alcohol*. Boil the residue three or four times in water acidulated with sulphuric acid, mix and strain the liquors, and evaporate to the consistence of syrup. Add *magnesia* in slight excess, shake the mixture frequently, then express and wash what remains. Repeat the expression and washing two or three times, and having dried the residue, digest it with a gentle heat several times in *alcohol*, and strain after each digestion. Distil off the *alcohol* from the mixed liquors, boil the residue for 15 minutes in water with a little sulphuric acid and purified animal charcoal, and strain. Having thoroughly washed what remains, mix the washings with the strained liquor, evaporate with a moderate heat to the consistence of syrup, and then drop in as much solution of ammonia as may be necessary to precipitate the veratria. Lastly, separate and dry the precipitate.

VERATRINE. See *Colchicum autumnale*.

VERATRUM ALBUM, *Helleborus albus*, *Elleborum album*, *Cherbachem*, *White hellebore*. (F.) *Hellebore blanc*. The root or rhizoma of this common European plant is indebted to the *Veratrine* for its properties. It is inodorous: has a bitterish, acrid, and nauseous taste, and is violently emetic and purgative, even when applied to an ulcerated surface. It is, also, possessed of errhine properties, and acts, externally, as a stimulant. It is rarely exhibited internally. Sometimes it is given as a *sneezing powder*; but it operates with great violence. It forms, also, an itch ointment. See *Ung. Veratri*.

VERATRUM SABADILLA, or *Sabadilla*, *Canis Intersector*, *Causiticum Americanum*, *Cevadilla Hispanorum*, *Senadilla*, *Hordeum causiticum*. (F.) *Cevadille*. The seeds of this plant have been used, mostly, as anthelmintics. Dose. gr. ij to a child, four years old. It possesses the same general properties as the *veratrum album*.

VERATRUM VIRIDE, *American hellebore*, *Swamp hellebore*, *Indian poke*, *Indian Uncas*, *Poke weed*, *Bear weed*, *Itch weed*, *Tickle weed*, is indigenous in the swampy districts of almost every part of the United States. Its properties are like those of the genus.

VERBASCULUM, *Primula veris*.

VERBASCUM NIGRUM, *Black Mullein*, *Candela regia*, *Thapsus barbatus*, *Candalaria*, *Lanaria*; and the *Verbasum Thapsus*, *great broad-leaved mullein*, *High Taper*, *Cow's Lungwort*, or *Yellow Mullein*, (F.) *Molène*, *Bouillon blanc*. Family, Solanæ. Sex. Syst. Pentandria Monogynia,—especially the latter,—have been used as emollients, applied externally, in the form of fomentation. The large leaves have been chosen for this purpose. Occasionally, the mucilage, which they contain, has been extracted by decoction or infusion, and administered in pectoral affections.

VERBASCUM THAPSUS, V. nigrum.

VERBENA OFFICINALIS, *Verbena*, *Dichromos*, *Verbena ca*, *Peristarium*, *Hierobotanæ*, *Herba sacra*, *Vervain*, (F.) *Verveine*. Family, Pyrenacæ. Sex. Syst. Diandria Monogynia. A plant, formerly held sacred; used in sacrifices, and suspended round the neck as an amulet. In the form of cataplasm, it is said to have relieved obstinate headaches, and to have been of service in scrofula. It is not used.

VERBENACA, *Verbena officinalis*.

VERBUS, Penis.

VERCOQUIN, *Phrenitis verminosa*. A form of phrenitis, attributed to the presence of a worm in the brain!

VERDET, Cupri subacetatis.

VERDIGRIS, Cupri subacetatis.

VERETRUM, Penis.

VERGE, Penis.—v. d'Or, *Solidago virgaurea*.

VERGERETTE DE PHILADELPHIE, *Erigeron Philadelphicus*.

VERGETURES, (F.) from (F.) *verge*, 'a rod.' Linear, reddish impressions, similar to those which would be produced by the strokes of a rod, and which are seen in some diseases.

VERJUICE, *Omphaeum*, (F.) *Verjus*, *verdus*. A sour kind of grape. Also, an acid liquor prepared from very sour grapes or crab-apples. It is principally used in culinary preparations; although, occasionally, an ingredient in medicinal compounds. See *Vitis Vinifera*.

VERJUS, Verjuice.

VERMES, Worms.

VERMICULAIRE BRULANTE, *Sedum*.

VERMICULAR, Vermiform.

VERMICULARIS, Lumbicalis, *Sedum*.

VERMICULUM, *Vermiculum*. An elixir, a tincture.—Ruland and Johnson.

VERMICULUS CAPILLARIS, *Dracunculus*.

VERMIFORM, *Vermicular*, *Vermicularis*, *Vermiformis*, from *vermis*, 'a worm,' and *forma*, 'form.' That which resembles a worm.

PROCESSUS VERMIFORMES, *Protuberantiae vermiformes*, *Appendices vermiformes*, (F.) *Eminentes vermiformes du cercelet*, are two medullary projections, at the surface of the cerebellum. The superior vermiform process, *Vermis superior cerebelli*, is an elongated projection, at the anterior and middle part of the superior surface of the cerebellum;—and the inferior vermiform process, *Vermis inferior cerebelli*, is a somewhat large projection, situate in the depression at the inferior surface of the same organ. The anterior portion of the superior vermiform process is elevated, and termed *Monticulus*.

VERMIFUGE, Anthelmintic, Helminthagogue.

VERMIFUGE, MATHIEU'S. This consisted of two distinct electuaries; the one for killing,

the other for expelling the tape-worm. The former consisted of an ounce of *tin filings*, and six drachms of *fern root*.

VERMIFUGUS, Anthelmintic.

VERMILION, Hydrargyri sulphuretum rubrum.

VERMILLO DE PROVENCE, Antimonii sulphuretum rubrum.

VERMINATIO, Helminthiasis.

VERMINATION, CUTANEOUS, Malis.

VERMINEUX, Verminous.

VERMINOUS, *Vermineosus*, (F.) *Vermineux*, That which is caused by worms; as a *verminous affection*.

VERMIS BOMBYCINUS, Cornu ammonis—v. Cerebelli, Vermiform process—v. Cucurbitinus, Tænia solium.

VERMITIO, Helminthiasis.

VERNIX SICCA, Sandarac.

VERNONIA ANTHELMINTICA, *Ascaricida anthelmintica*, *Calagirah*, *Calugeri*. A plant, which is indigenous in India. *Family*, Compositæ. *Sex. Syst.* Syngenesia Polygamia superflua. It has great celebrity in the East Indies, and is a bitter tonic; but the seeds are chiefly used as an anthelmintic, in cases of ascarides and lumbrici in children.

VEROLE, Syphilis—v. *Petite*, Variola—v. *Petite volante*, Varicella.

VEROLETTE, Varicella.

VERONICA, *Veronica officinalis*, *Veronica mas*, *Thea Germanica*, *Betonica Pauli*, *Chamædryas*, *Male Veronica*, *Fluellin*, *Officinal Speedwell*, (F.) *Véronique*, *Thé d'Europe*. *Family*, Rhinanthodæ. *Sex. Syst.* Diandria Monogynia. This plant was once used as a pectoral.

VERONICA AQUATICA, v. *beccabunga*.

VERONICA BECCABUNGA, *Beccabunga*, *Anagallis aquatica*, *Laver Germanicum*, *Veronica aquatica*, *Cepæa*, *Water Pimpernel*, *Brooklime*, *Brooklime Speedwell*, (F.) *Véronique cressonnée*. This plant was formerly used in a variety of diseases. It is, however, almost insipid and inodorous; and has been long banished from practice.

VERONICA MAS, *Veronica*—v. *Officinalis*, *Veronica*—v. *Purpurea*, *Betonica officinalis*.

VERONIQUE, *Veronica*—v. *Cressonnée*, *Veronica beccabunga*.

VERPA, Penis.

VERRE, Vitrum—v. *d'Antimoine*, *Antimonii vitrum*.

VERRUCA, *Echyma verruca*, *Phymato'sis verrucosa*, a *Wart*, (F.) *Verrue*. A small, hard, mammillary tumour, which forms at the surface of the skin, and particularly on that of the hands and face. Warts are generally rugous at the surface, and broad at the base; their roots being implanted in the derma by whitish filaments, which are dense, semifibrous, and very numerous.

Warts may be destroyed by caustic, or removed by excision. Their vitality is, generally, not great.

VERRUCA MINOR, Thymion—v. *Palpebrarum*, see Hydatid.

VERRUCARIA, *Heliotropium Europæum*.

VERRUE, Verruca.

VERS, Worms.

VERSION, Turning.

VERT-DE-GRIS, Cupri subacetat.

VERTEBRA DENTATA, Axis.

VERTEBRÆ, *Spondyli*, (F.) *Vertèbres*; from

vertere, 'to turn.' This name has been given to the bones, which by their union, form the vertebral or spinal column. The vertebræ are short, thick, very angular bones; twenty-four in number, and situate one above another. The body of the vertebra is the middle and anterior portion. Above and below, it is articulated, by means of a fibro-cartilage, with the contiguous vertebræ. The Processes, *Masses apophysaires*, of each vertebra are:—1. The *spinous process*, situate behind, and in the median line. 2 The two *transverse processes*, standing off from each side. 3. The *four articular processes*—two superior, and two inferior—which serve to unite the vertebræ with each other. These transverse and articulating processes are made continuous with the lateral and posterior parts of the body of the vertebra by narrow bony portions or pedicles, on each of which are notches. These, by their union with similar notches in the contiguous vertebra, form the lateral foramina, (F.) *Trous de conjugaison*, through which the spinal nerves leave the vertebral canal. The different processes are united with each other, so as to form a kind of ring of the lateral and posterior parts of the vertebra; and the foramen, within this, i. e. between the body and processes, concurs in forming the vertebral canal. The vertebræ have particular characters, according to the regions they occupy. They are divided into seven *cervical*, twelve *dorsal*, and five *lumbar*. The first cervical is called *atlas*; the second, *axis* or *vertebra dentata*; and the seventh, *vertebra præminens*. The vertebræ are articulated with each other. Those of the back are joined, moreover, to the ribs. The first or atlas is articulated with the occipital bone; and the last lumbar vertebræ with the sacrum. The cervical vertebræ are developed by nine points of ossification; the dorsal and lumbar by eight.

VERTEBRAL, *Vertebra'lis*. That which relates or belongs to the vertebræ.

VERTEBRAL ARTERY, *Posterior cerebral artery* (Ch.) is the largest of the branches of the subclavian. It arises from the posterior part of that vessel; is lodged in a canal, (F.) *Petit canal vertébral*, formed by the foramina in the transverse processes; enters the cranium, and proceeds to anastomose with its fellow of the opposite side, and to form the *Basiliary artery*, (q. v.) Besides the branches sent to the neck, the vertebral artery gives off—the *anterior* and *posterior spinal arteries*, and the *inferior cerebellous*, in the cavity of the cranium.

VERTEBRAL COLUMN, *Rachis*, *Rhachis*, *Notos*; the *Spine*; the *back bone*, *Acu'tha Cur'ina*, *C. hom'inis*, *Spina dorsi* seu *dorsalis*, *Column'na spinal'is*, *C. vertebra'lis*, *C. dorsi*, *Spina*, *Dorsum*, *Tergum*, *Compages Vertebra'rum*, *Acu'tha*, *Sacra fistula*, *Hiera Syrinx*, (F.) *Colonne vertébrale*, *Épine du dos*, *Échine*. A kind of bony column, situate at the posterior and central part of the trunk; extending from the head to the sacrum; flexible in every direction, yet very solid; and hollowed by a canal called *vertebral*, which gives it lightness without diminishing its strength, and runs through its whole length. The vertebral column is formed by the superposition of the vertebræ. It represents a pyramid, whose base is below. Anteriorly, it is convex in the neck; concave in the back, and convex, again, in the loins. Behind, the curvatures are of course the reverse of these. There

is also, in the dorsal region, a lateral curvature, the concavity of which is towards the left side. Considered as a whole, the vertebral column has an *anterior* or *prespinal* surface; a *posterior* or *spinal*; two *lateral*; a *base*, and an *apex* or *top*. In the nomenclature of Chaussier, the anterior surface, in the neck, is called *trachelian*; in the back, *predorsal*; and, in the loins, *prelumbur*. The dorsal surface has, at its middle, the spinous processes; and, at its sides, the *vertebral gutters*, (F.) *Gouttières vertébrales*, formed by the succession of the *vertebral plates*, (F.) *Lames vertébrales*, which, by their junction, constitute the spinous processes. These are filled by the sacro-spinalis muscle. The sides or lateral surfaces present the foramina, resulting from the union of the *vertebral notches*, (F.) *Échancrures vertébrales*. These are called *vertebral foramina*, (F.) *Trous de conjugaison*, and give passage to the *vertebral nerves*. The base of the vertebral column is oblique, to unite with the sacrum; and forms with it an angle, called *sacro-vertebral angle* or *promontory*. The *apex* or *top* of the vertebral column is articulated with the occipital bone. Sometimes, the term *vertebral column* includes the whole of the column from the occipital bone to the extremity of the coccyx. The *Vertebral* or *Spinal Canal*, *Rachidian Canal*, exists through the whole of the vertebral column, whose curvatures it follows. It is continuous, above, with the cranium; below, with the sacral canal, if we consider the vertebræ to terminate at the sacrum. It is lined by a prolongation of the meninges, forming the *Theca vertebralis*, and lodges the spinal marrow.

The vertebral column, which unites lightness with solidity, serves to support the head and chest. It is the seat of all the movements of the trunk, the weight of which it transmits to the pelvis. It lodges and protects the spinal marrow, and gives passage to the vertebral nerves, and to numerous vessels.

VERTEBRAL DISEASE, Rachial'gia (of some,) *Caries of the Vertebrae, Spondylarthroc'acé, Spondyloc'acé, Kypho'sis inflammato'ria, K. paralyt'ica, Gibbos'itas cario'sa, Cur'ies vertebral'rum, Spondylal'gia*. The spinal column is liable to distortion, (see Hump) at times, without the vertebræ being much, if at all, diseased. At other times, a more formidable affection is induced; the vertebræ becoming carious, and the intervertebral cartilages ulcerated; followed by a more or less complete loss of power over the lower extremities. In such case, on examining the spine, one or more of the spinous processes is found to project beyond the rest. The disease was first well described by Mr. Percival Pott; and, hence, it has been called, by the French, *Maladie de Pott, Malum Pottii, Gibbus Pottii, or Pott's Disease*. It usually occurs in scrofulous subjects, and the treatment consists in establishing a counter-irritation by blisters, issues, or the moxa, opposite the transverse processes of the diseased vertebra. The sore must be suffered to remain open and the patient kept in the horizontal posture until the use of the limbs is recovered; employing tonics—the free admission of fresh air, &c. at the same time.

VERTEBRAL LIGAMENTS, (F.) Ligamens vertébraux, Surtouts ligamenteux de la colonne vertébrale, are distinguished into *anterior* and

posterior. They consist of long, ligamentous coverings; the *anterior* occupying the anterior part of the vertebral column; and the *posterior* seeming to arise from the occipito-axoid ligament, and existing, behind the bodies of the vertebræ, from the axis to the sacrum.

VERTEBRAL or SPINAL NERVES spring successively from the spinal marrow; from its origin to its termination. These nerves—30 pairs in all—arise by two roots; one *anterior*, and the other *posterior*, and afterwards issue by the vertebral and sacral foramina. Each of these roots seems to have a distinct function; the *posterior* being destined to convey sensation to parts; the *anterior*, motion. On the posterior root, before its junction with the anterior, there is a ganglion. Of the 30 pairs, 7 are *cervical nerves*, 12 *dorsal*, 5 *lumbar*, and 6 *sacral*. See Nerves.

VERTEBRAL NERVE, Trisplanchnic.

VERTÈBRES, Vertebrae.

VERTEBRO-ILIAC LIGAMENT, Ileo-lumbar L.

VERTEX, Cor'yphè. The top or highest part of the head. See Sinciput.

VERTEX CUBITI, Olecranon—v. Palpitans, Fontanella.

VERTIGE, Vertigo.

VERTIGO, from *vertere*, 'to turn;' *Dinos, Il'in'gos, Giddiness, Dizziness, Dinus verti'go, Hallucinati'o vertigo, Autal'gia vertigo, Swimming of the head, (F.) Vertige, Étourdissement*. A state in which it seems that all objects are turning round; or that the individual himself is performing a movement of gyration. Two varieties have been designated;—*simple vertigo*, where the objects are seen; and *scotodynia*, in which the sight is obscured, and the individual often falls. Vertigo is dependent upon the condition of the brain; and often announces an attack of apoplexy or epilepsy.

VERTIGO TENEBRICO'SA, Scotodynia.

VERUMONTANUM, Caput gallinaginis, Gallinaginis caput.

VERVAIN, Verbena officinalis.

VERVEINE, Verbena officinalis.

VESA'NIA, Vesa'nizè, 'madness.' Derangement of the intellectual and moral faculties, without coma or fever. Many nosologists have used this as a generic term; under which they have included the different species of mental alienation, hypochondriasis, somnambulism, and even hydrophobia. See Nosology.

VESANIA MANIA, Mania.

VESANIÆ, Insanity.

VESICA BILIARIA, Gall-bladder—v. Fellea, Gall-bladder—v. Intestinalis, Vesicula umbilicalis—v. Urinaria, Urinary bladder.

VESICÆ IRRITABILITAS, Cysteresthismus.

VESICAL, Vesica'lis, from vesica, 'the bladder.' That which belongs or relates to the bladder.

VESICAL ARTERIES vary in number and origin. The umbilical artery always sends off two or three; the middle hemorrhoidal, internal pudic, and obturator furnish others, which ramify and anastomose in the parietes of the bladder; the hypogastric furnishes one which is somewhat larger, the *Vesico-prostatic*, (Ch.) and proceeds to the *bas-fond* of the bladder, sending numerous ramifications to it as well as to the surrounding parts.

VESICAL VEINS, much more numerous than the arteries, open into the hypogastric plexus.

VÉSICANT, Blister.

VÉSICATOIRE, Blister.

VESICATORIUM, Blister.

VESICLE, ALLANTOID, Allantois—v. Germinal, see Molecule—v. Purkinjean, see Molecule.

VESICLES OF DE GRAAF, Folliculi Graafiani.

VES'ICO-VAG'INAL, *Vesi'co-vagina'lis*. Relating to the bladder and the vagina; as *vesico-vaginal fistula*.

VESIC'ULA, *Cystinz*; diminutive of *vesica*, 'a bladder.' A small bladder.

VESICULA ÆNIGMATOSA, V. umbilicalis—v. Alba, V. umbilicalis—v. Bilis, Gall-bladder—v. Chyli, Receptaculum chyli—v. Erythroidea, Erythroid vesicle—v. Fellis, Gall-bladder—v. Gangrænescens, Anthracion—v. Germinativa, see Molecule—v. Omphalo-mesenterica, V. umbilicalis—v. Ovalis, V. umbilicalis—v. Prolifera, see Molecule.

VESIC'ULA UMBILICAL'IS, *Umbilical Vesicle*, *Vesicula alba seu om'phalo-mesenter'ica seu ænigmatosa seu oval'is*, *Vesi'ca intestinal'is*, *Intestinal Vesicle*, *Vitelline Pouch*. A small, pyriform, round, or spheroidal sac, which, about the fifteenth or twentieth day after fecundation, is of the size of a common pea, and probably acquires its greatest dimensions in the course of the third or fourth week. After the seventh week, it becomes shrivelled and disappears insensibly. It seems to be situate between the chorion and amnion, and is commonly adherent either to the outer surface of the amnion, or to the inner surface of the chorion, but at times is loose between them. The *vitelline pedicle*, which attaches the vesicle to the embryo, is continuous with the intestinal canal; and, up to twenty or thirty days of embryonic life, is hollow. Its arteries are the omphalo-mesenteric, (q. v.) The *vitelline fluid*, contained in the vesicle, has been compared, from analogy, to the *vitellus* or yolk of birds; and, like it, is an oleaginous substance, and presumed to be inservient to the nutrition of the embryo.

VESIC'ULA, *Ves'icle*, *Eraphylis*, *Cystinz*, in Pathology, means a small orbicular elevation of the cuticle, containing lymph, which is sometimes clear and colourless, but often opaque and whitish or pearl-coloured. It is succeeded, either by a scurf, or by a laminated scab.

VESICULÆ constitute the 6th order of Bate-man's classification of *Cutaneous Diseases*.

VESICULÆ, see Villous membranes—v. Divæ Barbaræ, Variola confluens—v. Gingivarum, Aphthæ—v. Pulmonales, see Cellule—v. Rotundæ cervicis uteri, Nabothi glandulæ—v. Sanguinis, Globules of the blood—v. Seminales mulierum, Nabothi glandulæ—v. Spermaticæ, V. seminales.

VESICULÆ SEMINAL'ES, V. *Seminal'is seu spermaticæ*, *Cap'sule seminal'es*, *Conceptacula seminal'ia*, (F.) *Vésicules séminales*, *Gardouches*, *Greniers*, are two small membranous sacs, which serve as reservoirs for the sperm, and probably secrete a fluid to be mixed with the sperm. They are situate beneath the bladder, and above the rectum, behind the prostate and to the outer side of the vasa deferentia. They are of an irregular conoidal shape; flattened from above or below; embossed on their surface, and of a grayish tint. Their *posterior extremity*, or *fundus*, terminates by a round cul-de-sac. Their *anterior extremity* or *neck* is narrow and elon-

gated, and is continuous with the excretory duct of the vesicula. This duct joins the vas deferens, and forms with it the ejaculatory duct. The interior of the vesiculæ exhibits several cells, which communicate with each other, and are lined by a very thin, mucous membrane.

VESICULE BILIAIRE, Gall-bladder—v. du Fiel, Gall-bladder.

VESICULES DE SAINTE BARBE, Variola confluens—v. *Séminales*, Vesiculæ seminales.

VESPA, Wasp.

VESSEL, *Vas*, *Angel'on*, *Angos*, from (L.) *vās*, *vasculum*, (F.) *Vaisseau*. A canal, more or less elastic, formed by the superposition of several membranes; and distinguished, according to its uses and general arrangement, into *Artery*, *Vein*, and *Lymphatic*, (q. v.) See, also, *Vascular*.

VESSELOUP, Lycoperdon.

VESSIE, Urinary bladder—v. à Colonnes, see Urinary bladder—v. *Col de lu*, Collum vesicæ.

VES'TIBULE, *Vestibulum*, (F.) *Vestibule*. A cavity of an irregular shape, which forms part of the labyrinth or internal ear. The vestibule is situate on the inner side of the tympanum; on the outer side of the meatus auditorius internus; before the semicircular canals, and behind the cochlea. It is lined by a particular membrane, and contains the liquor of Cotunnus and branches of the auditory nerve. There is also another membrane, constituting the *membranous vestibule*, but it is not an exact imitation of the osseous cavity. It is composed of two distinct sacs, which open into each other—the *sacculus vestibuli*, and the *sacculus*, (q. v.) There are three contiguous cavities in the vestibule, one of which, the *semi-oval*, is situate above; another, the *hemispherical*, below; and the third, or *sulciform*, which is the orifice of the aquæductus vestibuli, behind.

VES'TIB'ULUM is, also, a smooth cavity between the perinæum and nymphæ in the female, which leads to two passages—to the urethra above, and to the vagina below.

VESTIGE, (F.) *Vestig'ium*, 'a vestige,' 'a trace.' A kind of fracture of flat bones, consisting of a simple incision having the mark of the instrument that caused it. The term is, also, applied to a part of the body, which may have no evident use in man, and yet may be greatly employed in animals. For example, the muscles of the external ear in man are almost devoid of use, or are *vestiges* of what they are in certain animals.

VESTIGIUM FORAMINIS OVALIS, Ovalis fossa.

VESTITUS, *Esthe'ma*, *Esthe'sis*, *Clothing*, *Res vestid'ria*, *Dress*, *Vesture*, (F.) *Vêtement*, from *vestire*, *vestitum*, 'to clothe.' Any substance used for the purpose of covering our nakedness, or preserving us from atmospheric temperature, by being worn on the body. The best clothing in winter is composed of articles that are bad conductors of caloric, and do not admit of ready evaporation of the matter of perspiration. In this respect, woollen vestments deserve the first place, and cotton the second. Colour has likewise to be regarded—the darkest hues transmitting the heat most readily through them. It has been found that the same rule applies to odours—the darker colours retaining

a greater amount of odorous particles than the lighter. Hence, the necessity of white walls, white bed-clothes, &c., in the wards of hospitals, for it is probable the like law applies to contagious miasms.

VESTURE, Vestitus.

VETA, Puna.

VETEMENT, Vestitus.

VETERANA, Rubeola.

VETERINARY, *Veterinarius*, (F.) *Vétérinaire*, from *veterinus*, 'that which bears burdens,' itself from *vetere*, 'to carry.' That which appertains to beasts of burden: hence, *veterinary surgeon*, *veterinary college*, and *veterinary medicine*.

VETERINARY ART, *Farriery*. The art of treating the diseases, &c. of cattle.

VETERINARY ANATOMY, see Anatomy.

VETERNUS, Coma vigil.

VETONICA CORDI, *Betonica officinalis*.

VEXILLUM, *Drapeau*.

VIA, Way—*v. Stomachi et ventris*, *Cesophagus*.

VIABILITY. See Viable.

VI'ABLE, *Viabilis*, from *via*, 'way,' or from *vie*, (F.) 'life,' (Orfila.) A word, which may be introduced, with great advantage, from the French into our language. It is an epithet, applied to a fœtus, whose organs are properly formed, and so developed as to permit its continued existence. Every fœtus is not *viable*. Anencephali have lived ten or twelve days, yet they are not *viable*;—a part or the whole of the brain being wanting. The older the fœtus, the more *viable* is it. It is an idle prejudice that a child, born at the end of eight months, is less likely to live than one born at the end of seven. The signs of *viability* are drawn from the weight, length, external conformation, &c. of the fœtus. It may be laid down as a general rule that no fœtus, born before the end of the seventh month, is *viable*.

VIAE LACHRYMALES, Lachrymal passages—*v. Primæ*, Ways, digestive—*v. Secundæ*, Ways, second.

VIAL, Phiala.

VIBICES, *Molops*. Large purple spots, like the marks produced by the strokes of a whip, which appear under the skin in certain malignant fevers. They are unfavourable indications, as they denote great prostration.

VIBRANS, Vibratory.

VIBRATILE, Vibratory.

VIBRATORY, *Vibrative*, *Vibrans*, (F.) *Vibratile*, from *vibrare*, 'to quiver.' An epithet applied to the pain that accompanies some neuralgiæ; and which seems to the patient to vibrate among the nerves.

VIBRATORY MOTION, see Cilia.

VIBRIS'SÆ. The hairs which grow at the entrance of the nostrils and of other outlets.

VIC-LE-COMPTE, MINERAL WATERS OF. Vic-Le-Compte is a small village in the department of Puy-de-Dôme, three leagues from Issoire; where there is an acidulous chalybeate, which is aperient.

VICAR'S BRAY, MINERAL WATERS OF. This spring is situate in Perthshire, Scotland, about two miles from Dollor, and near Blarngone. The water is one of the strongest chalybeates known.

VICHY, MINERAL WATERS OF. Carbonated alkaline chalybeates, the sources of

which are at Vichy, six leagues from Moulins in the department of Allier. The springs are seven in number. Almost all are thermal; give off bubbles of carbonic acid gas, and have a slightly sulphureous odour. They deposit carbonates of lime and magnesia, and a little oxide of iron; and afford, on analysis, carbonates of lime, soda, iron, and magnesia, carbonic acid, sulphate of soda, and chloride of sodium. They are employed as tonics, particularly in chronic affections of the abdominal viscera, in old catarrhs, diseases of the joints, &c.

FACTITIOUS VICHY WATER, *Aqua Viciensis*, (F.) *Eau de Vichy*, is made of simple *acidulous water*, impregnated with twice its bulk of *carbonic acid*, $\frac{3}{4}$ xxss; *subcarbonate of soda*, gr. xxxij; *sulphate of soda*, gr. xvj; *chloride of sodium*, gr. iv; *subcarbonate of magnesia*, gr. ss; *muriate of iron*, gr. $\frac{1}{4}$. Mix. Ph. P.

VIC'IA FABÆ. The Common Garden Bean, (F.) *Fève ou fève des marais*. Family, Leguminosæ. *Sec. Syst.* Diadelphia Decandria. A native of Egypt, of which there are many varieties. Beans are not easy of digestion. They are proverbially flatulent, especially when old. When young, they are more digestible and wholesome. Bean meal was one of the four resolvent meals of the ancients.

VICINI TRACTUS, Erysipelas.

VICINITRAHA, Erysipelas.

VICTORIALIS FEMINEA, *Gladiolus vulgaris*—*v. Longa*, *Allium victorale*—*v. Rotunda*, *Gladiolus vulgaris*.

VICTUS RATIO, Diet.

VIDANGES, Lochia.

VIDIAN CANAL, Pterygoid C.

VIE, Life.

VIELLIËSSE, Senectus.

VIF ARGENT, Hydrargyrum.

VIGILANCE, Insomnia.

VIGILIA, Egregorsis.

VIGILÆ NIMIÆ, Coma vigil.

VIGNE, *Vitis vinifera*—*v. Blanche*, *Bryonia alba*—*v. du Nord*, *Humulus lupulus*—*v. Vierge*, *Bryonia alba*.

VIGOR, Acme.

VILLA FRANCA, (CLIMATE OF.) This little town is situate immediately to the eastward of Montalbano, which separates the bay of Villa Franca from that of Nice. It is on the southern declivity of a steep and lofty range of mountains; and is more effectually sheltered from the north and north-west winds than Nice: with the climate of which that of Villa Franca closely corresponds.

VILLI. See Villous membranes.

VILLOUS, *Villo'sus*, from *villus*, 'a hair.'

VILLOUS MEMBRANES OR COATS, *Velamenta Bombyc'ina*, (F.) *Membranes villosæ*, *Membranes veloutées*, are such as are covered with soft papillæ or *Villi*, *Flocci*, *Floc'culi*, *Vesiculæ*, *Cylindri*, *Tubi Membran'cei*,—constituted of blood-vessels, nerves, and absorbents; or such as are covered with fine down, so as to cause them to feel soft and velvety. The term is, however, chiefly restricted to the former. Chaussier gives the name *simple villous membranes* to the serous membranes; and that of *complicated or follicular villous membranes* to the mucous membranes. These villi are endowed with *ciliary motion*, (q. v.)

VIN, Wine—*v. de Bordeaux*, *Claret*—*v. de*

Quinquina composé, Vinum de kinâ kinâ compositum—v. *See*, Sack.

VINAIGRE, Acetum, see *Aceticum acidum*—v. *Scillitique*, Acetum scillæ.

VINAIGRE DE BOIS, Pyroligneous acid.

VINAIGRES MEDICINAUX, Acetica.

VINCA MINOR, *Vinca perivincæ*, *Clematis daphnoides major*, *Lesser perivincæ*, (F.) *Perrenche*, *Violette des Sorciers*. It has bitter and astringent properties, and has been used in gargles, and diseases of the chest.

VINCULA, Fascia.

VINCULUM, Bandage, Lien.

VINE, *Vitis vinifera*—v. *Grape*, *Vitis vinifera*—v. *Poison*, *Rhus radicans*.

VINEGAR, AROMATIC SPIRIT OF, see *Aceticum acidum*—v. of *Cantharides*, *Acetum cantharidis*—v. *Common*, *Acetum*—v. *Distilled*, see *Aceticum acidum*—v. *Marseilles*, *Acetum aromaticum*—v. of *Meadow saffron*, *Acetum colchici*—v. *Radical*, *Aceticum acidum*—v. of *Squills*, *Acetum scillæ*—v. of the four *Thieves*, *Acetum aromaticum*—v. *Thieves*, *Acetum aromaticum*—v. of *Wood*, see *Aceticum acidum*.

VINETTIER, *Oxyantha Galeni*.

VINUM, Wine, Sherry wine (Ph. U. S.)

VINUM MEDICINALE, A Medicated Wine. Wine, holding in solution one or more medicines. Medicinal wines are obtained by macerating or digesting medicinal substances in wine. They differ, of course, according to the nature of the medicine employed, the strength of the wine, &c. In a late Pharmacopœia of the London College, all the wines were changed into weak tinctures; but the old names were left unaltered. Sherry is the wine usually employed.

VINUM ALBUM HISPANICUM, see *Wine*—v. *Album Montanum*, see *Wine*.

VINUM ABSINTHITES, *Wine of Wormwood*. (Fol. *absinth. exsic.*, *absinth. Pontic.*, aa ʒvj, *vini albi* Oij. Macerate for 24 hours, and strain. Ph. P.) Stimulant, tonic, febrifuge, vermifuge, &c.

VINUM ALOËS, *V. aloës Socotori'næ*, *Vinum aloëticum*, *V. aro'maloëticum*, *Wine of Aloes*, *Tinctura hiera*, *Tinctura sacra*. (Aloës, in pulv. ʒj, *cardam.* cont. *zingib.* cont. aa ʒj; *vini* Oj. Macerate for 14 days, and filter. Ph. L.) Purgative and stomachic, according to the dose. Dose, f. ʒj to f. ʒij.

VINUM AMARUM, *V. Gentianæ* comp.—v. *Amarum scilliticum*, &c. *V. diureticum amarum*—v. *Amarum cum spiritu vini*, *V. gentianæ compositum*.

VINUM ANTIMONII TARTARIZATI, *V. tartaritis antimonii*, *Solution of tartarized antimony*, *Essentia antimonii seu stibii*, *Antimonial wine*, *Vinum benedictum*, *Vinum antimonialtum Huxhami*, *V. antimonialæ*, *Aqua benedicta Rulan'di*, *Vinum emeticum*. (Ant. et Potass. tart. ʒj, *vini* f. ʒx. Dissolve the tartarized antimony in the wine. Ph. U. S.) Each fluidounce contains two grains of the tartrate.

The ordinary *Antimonial wine* is made with glass of antimony ʒj, sherry Oiss.

WARD'S RED DROP consists of a strong vinous solution of tartarized antimony.

VINUM ANTISCORBUTICUM, *Antiscorbutic wine*. (Rad. *armoraciacæ* recent. ʒj, fol. *cochleariæ* recent., nasturtii aquat., trifol. aquatic., semin. sinap.,

aa ʒss, ammoniæ murial. ʒij, *vini albi* Oij. Macerate for 36 hours; filter, and add *tincturæ cochlear.* ʒss. Ph. P.) Stimulant and tonic. Dose, f. ʒss to f. ʒij.

VINUM AROMATICUM, *Aromatic wine*. (Species aromatic. ʒiv, *vini rubr.* Oij. Macerate for 6 days, and filter. Ph. P.) Stimulant, and tonic. Used, externally, in fomentations, embrocations, &c.

VINUM AROMO-ALOETICUM, *V. Aloes*—v. *Antimoniatum Huxhami*, *V. antimonii tartarizati*—v. *Benedictum*, *V. antimonii tartarizati*—v. *Canarinum*, see *Wine*—v. *Chalybeatum*, *V. ferri*—v. *Cinchonæ compositum*, *V. de kinâ kinâ comp.*

VINUM COLCHICI, *Wine of Colchicum*, *V. Colchici Radicis*, *Want's Eau d'Husson*. (Colchic rad. benè contus. lbj, *vini* Oij. Macerate for 14 days, with occasional agitation, and then express strongly, and filter. Ph. U. S.) It may also be prepared by displacement. Ph. U. S. Diuretic, sedative, and purgative. Chiefly used in gout. Dose, gr. 40 to f. ʒj.

Reynold's Specific for gout and rheumatism consisted of the fresh bulb of *Colchicum* ʒviij, *Sherry wine* f. ʒxvj. The colchicum was macerated for eight or ten days in the wine, at a gentle heat; coloured with syrup of poppies and flavoured with rum. Reynolds is said to have killed himself by taking an over-dose of it.

VINUM COLCHICI RADICIS, *V. Colchici*.

VINUM COLCHICI SEMINIS, *Wine of Colchicum seed*. (Colchic. sem. cont. ʒiv; *vini* Oij. Macerate for 14 days, with occasional agitation, then express and filter. Ph. U. S.) Dose, f. ʒj to f. ʒij.

VINUM DIURETICUM AMARUM, *Vinum amarum scilliticum compositum in Churita'tis Nosocomio usurpatum*, *Bitter diuretic wine*. (Cort. cinchon., *Winteran.*, *limon.*, aa ʒij, *rhus toxicodendr.*, *scillæ*, *cucumin. angelicæ*, aa ʒss, fol. *absinth.*, *melissæ*, aa ʒj, *baccar. junip.*, *macis*, aa ʒss, *vini albi* Oviij. Macerate and filter. Ph. P.) Stimulant, tonic, and diuretic. Dose, f. ʒss to f. ʒiss.

VINUM EMETICUM, *V. antimonii tartarizati*.

VINUM ERGOTÆ, *Wine of Ergot*. (Ergotæ, cont. ʒij; *vini* Oj. Macerate for 14 days, with occasional agitation; then express, and filter. Ph. U. S.) Dose, m. xx to f. ʒj to produce the peculiar effects of ergot.

VINUM FERRATUM, *V. ferri*.

VINUM FERRI, *V. chalybeatum*, *Steel wine*, *Wine of iron*, *Vinum ferratum*, *V. martiatum*, *V. Martis*, *Tinctura Martis vino'sum*, *Tinctura Martis cum vino*. (Iron, ʒj, *supertertrate of potass.* in powder, ʒvj, *distilled water* Oij or q. s., *proof spirit* f. ʒxxx. Rub the iron and supertertrate of potass together, and expose them to the air in a flat vessel, moistened with a fluidounce of water for a fortnight; agitating every day with a spatula, and sprinkling them with water, to keep them moist. Then dry with a gentle heat, and mix with ʒxxx of distilled water. Filter the fluid and add the spirit. Ph. L.) Tonic. Dose, f. ʒj to f. ʒiv.

It is sometimes made by adding two pints of wine to two ounces of iron filings:—macerating and filtering.

VINUM GENTIANÆ COMPOSITUM, *V. amarum*, *Compound wine of Gentian*, *Infusum amarum vino'sum*, *Vinum amarum cum spiritu vini*, *Wine bitters*. (Rad. *gentian luteæ* ʒss, cort. cinchon. offic. ʒj, cort. aurant. ʒj, *canellæ all*

3j, alcohol. dilut. f. 3iv, vini alb. Hispanic. Oliss. Ph. E.) Dose, f. 3j to f. 3vj.

VINUM HIPPOCRATICUM, Claret—v. Hordeaceum, Cerevisia.

VINUM IPECACUANHÆ, *Ipecacuan'ha wine*. (*Ipecacuan*. cont. 3ij, vini Oj.) Macerate for 14 days, express, and filter. Emetic, and diaphoretic. Dose, as an emetic, f. 3iv to f. 3x.

VINUM DE KINÂ KINÂ COMPOSITUM, *V. cincho-næ compositum*, Compound bark wine, (F.) *Vin de quinquina composé*. (Cort. cinchon. pulv. libss, quassia, cort. Winteran., cort. aurant. sicca, aa 3ss, alcohol (12° to 22° Beaumé) Oj. Macerate for 24 hours; and add vini albi Ovj. Macerate for four days, and filter. Ph. P.) Tonic, febrifuge, and stomachic. Dose, f. 3ss to f. 3ij.

VINUM MARTIATUM, V. ferri—v. Martis, V. ferri—v. Nicotianæ tabaci, V. tabaci—v. Opiatum fermentatione paratum, Laudanum abbatis Rousseau.

VINUM OPII, *Wine of Opium*, *Vinum de opio compositum*, *Laudanum liquidum* Sydenhæmi, *Laudanum liquidum* Hoffmanni, *Tinctura Thebaïca*, &c., *Ford's laudanum*. (Opii in pulv. 3ij; cinnam. cont.; caryophyll. cont. aa 3j; vini Oj. Macerate for 14 days; express and filter.—Ph. U. S.) Narcotic. Dose, gtt. xv to f. 3j.

VINUM DE OPIO COMPOSITUM, V. opii—v. Picatum, Pissites.

VINUM QUINIAE, *Wine of Quinia*. (Wine Bij, sulphate of quinia gr. x. Mix.) Dose, f. 3iss or more; according as it is used for a stomachic, or to arrest ague. A *Vinum Cinchoniz* may be made in the same way.

VINUM RHEI, V. R. palmati, *Rhubarb Wine*, *Tinctura Rhubarbari Vinosæ*, *Vinum Rhubarbari*, *Elixir Rhei dulcè*, E. R. *Compositum*. (Rad. rhei cont. 3ij, canellæ cont. 3j, alcohol. dilut. f. 3ij, vini Oj. Macerate for 14 days; express and filter.—Ph. U. S.) Laxative and stimulant. Dose, f. 3iv to f. 3iss.

VINUM RHEI PALMATI, V. Rhej—v. Rhenanum, see Wine—v. Rhubarbari, V. rhei palmati—v. Rubrum Portugallicum, see Wine.

VINUM TABACI, *Vinum Nicotianæ Tabaci*, *Tobacco Wine*. (Tabac. 3j, vini Oj. Macerate for 14 days; express and strain. Ph. U. S.) Narcotic, diuretic, and antispasmodic. In dropsical cases, colica pictorum, and ileus. Not used. Dose, gtt. xx to xxxvj.

VINUM VERATRI, V. V. albi, *Wine of White Hellebore*. (Veratri cont. 3iv; Vini Oj. Macerate for 14 days, express and filter.—Ph. U. S.) In cutaneous affections, and in gout. Dose, ten minims.

VINUM VERATRI ALBI, V. Veratri.

VIOL, Stuprum.

VIOLA, *Viola odorata*, *Ion*, *Matronalis*, *Violaria*, the *Sweet Violet*, (F.) *Violette à bouquets*, *V. odorante*. The flowers of the sweet violet have a pleasant, peculiar odour, and scarcely any taste. They are slightly laxative.

VIOLA CANINA. The *Dog Violet*. The root of this plant is emetic and cathartic. Dose, ʒj.

VIOLA IPECACUANHA, see *Ipecacuanha*—v. Lutea, *Cheiranthus cheiri*—v. Odorata, *Viola*—v. Palustris, *Pinguicula vulgaris*.

VIOLA PEDATA, *Viola* (Ph. U. S.) This indigenous violet, which grows from New England to Carolina, is regarded by some as a useful demulcent in pectoral affections.

VIOLA TRICOLOR, *Heart's ease*, *Pansies*, *Jaſcea*, *Herba Trinitatis*, (F.) *Pensée*, *P. sauvage*. The decoction of this beautiful little plant has been recommended in diseases of the skin, &c. Its roots are, also, emetic and cathartic.

VIOLARIA, *Viola*.

VIOLET, DOG, *Viola canina*—v. Sweet, *Viola*.

VIOLETTE À BOUQUETS, *Viola*—v. *Odorante*, *Viola*—v. *des Sorciers*, *Vinca minor*.

VIOLIER JAUNE, *Cheiranthus cheiri*.

VIORNA, *Clematis vitalba*.

VIPER, EGYPTIAN, *Aspis*—v. Grass, *Scorzonera*.

VIPERA, *Coluber berus*.

VIPERARIA, *Aristolochia serpentaria*, *Scorzonera*.

VIPERINA VIRGINIANA, *Aristolochia serpentaria*.

VIR, Penis.

VIRGA, Penis—v. *Cereæ*, *Bougie*.

VIRGINAL, Vulva.

VIRGINIA, MINERAL WATERS OF.

There are several celebrated mineral springs in Virginia, on the western side of the Blue Ridge. Two Thermal springs exist in Bath county. The *Warm Spring*, as it is called, issues with a bold stream, sufficient to turn a mill, and to keep the water of its basin at the temperature of 97°. The *Hot Spring* is a few miles from the Warm. Its temperature is 107°. They are both slightly sulphureous. The *Sweet Springs* are at the eastern foot of the Alleghany, in Botetourt county; and 42 miles from the Warm Springs. The water has a temperature of 70°, and is highly impregnated with carbonic acid. The *White Sulphur*, as well as the *Red Sulphur*, and *Salt Sulphur Springs*, are also much celebrated. The Red Spring is affirmed to exert a sedative influence on the pulse, diminishing the number of its beats. About 15 miles from Staunton is *Stribling's Springs*—a sulphuretted water; and near Warrenton, in Fauquier county, there is a sulphureous water, called Lee's Springs, which is much frequented.

VIRGIN'S BOWER, COMMON, *Clematis vitalba*—v. Bower, upright, *Clematis recta*.

VIRGIN'S MILK, *Lac Virginis*, *Lac Virginale*, (F.) *Lait virginal*. A tincture of Benjamin or of any other balsam, precipitated by the addition of water, which gives it a milky appearance. Also, subacetate of lead precipitated by water. It has been used as a cosmetic to remove freckles, &c.

VIRGO, Girl—v. Aurea, *Solidago virgaurea*.

VIRGULA, Penis.

VIRIDE ÆRIS, Cupri subacetat.

VIRILE, Penis.

VIRILITY, Adult age.

VIROSUS, Virulent.

VIRTUE, Faculty.

VIRULENT, *Virulentus*, *Viro'sus*, from *virus*. That which is of the nature of a virus or which is caused by a virus.

VIRUS, from *vis*, 'force.' A Latin word, which signifies poison; but which, in medicine, has a somewhat different acceptation. By it is understood—a principle, unknown in its nature and inappreciable by the senses, which is the agent for the transmission of infectious diseases. Thus we speak of the *variolic*, *vaccine*, and *syphilitic virus*. *Virus* differs from *venom*, in the latter being a secretion natural to certain

animals, whilst the former is always the result of a morbid process;—a *morbid poison*.

VIRUS, Ichor, Poison, Sanies—*v. Vaccine*, see *Vaccina*—*v. Vitale*, *Sperm*.

VIS, Force—*v. Adhæsiōis*, Cohesion (force of)—*v. Attractionis*, Cohesion (force of)—*v. Cohæsiōis*, Cohesion (force of)—*v. Conservatrix*, *V. medicatrix naturæ*—*v. Elastica*. Elasticity—*v. Insita*, Irritability—*v. Irritabilitatis*, Irritability.

VIS MEDICATRIX NATURÆ, *Vis conservatrix*, *Autocrati'a*, (q. v.) *Autonom'i'a*, *Autocratoria Physiatri'cæ*, *Physiocrat'i'a*. A term, employed, by some, to express that instinctive, healing power in an animal or vegetable, by virtue of which it can repair injuries inflicted upon it, or remove disease.

VIS MOR'TUA. Under this name, Haller included the mechanical properties of membrane,—flexibility, extensibility, elasticity, &c. which are totally independent of the vital properties. They remain some time after the complete extinction of life in all its functions; seem to be connected with the mechanical arrangement of particles and the chymical composition of the substance in which they reside, and not to be affected until the progress of decomposition has become sensible.

VIS PLASTICA, Plastic force—*v. Reproductiva*, Plastic force—*v. Vitæ*, Irritability—*v. Vitalis*, Irritability.

VISCERA, Entrails.

VISCERAL, Splanchnic.

VISCERES, Entrails.

VISCONIA, *Physconia*.

VISCON ALBUM, *Mist'letoe*, *Ixos*, *Ix'ia*, *Dabach*, (F.) *Gai*. A parasitic plant, which grows on a number of trees. *Family*, *Caprifoliacæ*. *Sex. Syst.* *Diœcia Tetrandria*. That of the oak—*Viscum querc'num*—has been most celebrated, but it does not differ from the others. It was, at one time, much used in epilepsy and other neuroses;—the wood or leaves being given in powder, in the dose of ʒss or ʒi. The berries, also, called *Pommes hemorroidales*, from their supposed virtues, are drastic; and, when applied externally, maturative.

VISIO, Pupil.

VISION, *Vis'io*, *Visus*, from *videre*, *visum*, 'to see,' *Opsis*, (F.) *Vue*. The action of seeing; The sight. The sight is one of the five senses, and the eye is its organ. By it we distinguish colours and appreciate most of the physical qualities of external objects. The eye is composed of different transparent media, whose curvatures and refractive powers are so combined as to render insensible the aberrations of sphericity and refrangibility, and to concentrate the numerous rays proceeding from more or less distant objects. These rays traverse, successively, the transparent cornea, the aqueous humour, the crystalline, the vitreous humour, and strike upon the retina, on which they impress the figure of the object whence they have emanated; and, in order that no obscurity may arise from the reflections, that might otherwise occur, the interior of the eye is lined by a membrane—the choroid—which is, itself, covered internally by a dark pigment. This absorbs the light, like the dark pigment in the interior of telescopes, and thus obviates confusion. As the rays proceeding from an object, must cross each other in their course to

the retina, it follows, that those, proceeding from the upper part of an object, must fall upon the lower part of the retina, and conversely. So that the object must be impressed upon the retina, in an inverted position; yet experience teaches us to appreciate the position accurately.

VISION, COLOURED, Chromopsia—*v. Double*, Diplopia.

VISUAL, *Visu'dlis*. Same etymon. That which concerns the sight or belongs to vision.

The **VISUAL ANGLE** is the angle formed by the crossing of two rays,—proceeding from opposite points of any body,—in their passage through the pupil. It is by the size of this angle, that we judge, to a certain extent, of the size of objects.

VISUS, Vision—*v. Acrior*, *Nyctalopia*—*v. Coloratus*, *Chromopsia*—*v. Debilitas*, *Asthenopia*—*v. Dinidiatus*, *Hemipopia*—*v. Diurnus*, *Hemeralopia*—*v. Duplicatus*, *Diplopia*—*v. Juvenum*, *Myopia*—*v. Nocturnus*, *Nyctalopia*—*v. Senilis*, *Presbytia*.

VITA, Life.

VITAL PROPERTIES. See *Properties, vital*.

VITAL PRINCIPLE. The principle which, when applied to matter, as in organized bodies, controls its manifestations and properties, and distinguishes organized matter from the inorganic. We know nothing of this principle, except in its connexion with organization.

VITALBA, *Clematis vitalba*.

VITELLINE, *Vitellinus*, from *vitellus*, 'the yolk of an egg.'

VITELLINE DISC, *Proligerous Disc*—*v. Fluid*, see *Vesicula umbilicalis*—*v. Pedicle*, see *Vesicula umbilicalis*—*v. Pouch*, *Vesicula umbilicalis*—*v. Vessels*, *Omphalo-mesenteric*.

VITELLINE PEDICLE is the pedicle, which attaches the umbilical vesicle to the embryo. See *Vesicula Umbilicalis*.

VITELLO-MESENTERIC, *Omphalo-mesenteric*.

VITELLUM OVI. See *Ovum*.

VITEX, *V. Agnus Castus*, *Agnus Castus*, (F.) *Gattilier*, *Petit Poivre*, *Poivre sauvage*. *Family*, *Pyrenacæ*. *Sex. Syst.* *Didynamia Angiosperma*. The *Chaste Tree*. The seeds, when fresh, have a fragrant smell and an acid, aromatic taste. Formerly, they were celebrated as antaphrodisiacs.

VITI SALTUS, *Chorea*.

VITIATIO, *Stuprum*.

VITILIGINES, *Ephelides*.

VITILIGO, *Lepra*—*v. Albus*, *Lepra alba*—*v. Melas*, *Lepra nigricans*—*v. Nigra*, *Lepra nigricans*.

VITIS ALBA SYLVESTRIS, *Bryonia alba*—*v. Apyrena*, see *V. Corinthiaca*.

VITIS CORINTH'IACA. *Family* of the Vines. *Sex. Syst.* *Pentandria Monogynia*. This plant affords the *Uvæ passæ minores*, *Passæ Corinthiæ*, *Passulæ minores*, *Uvæ Corinthiæ*, or *Currants*, (F.) *Raisins de Corinthe*. They are the dried fruit of the *Vitis Corinthiaca* or *Vitis apyrena*; and are similar, in their properties, to the raisin.

VITIS IDÆA PALUSTRIS, *Vaccinium oxycoccos*.

VITIS VINIFERA, *Am'pelos*, *A. Enoph'oros*. The *Grape vine*, the *Vine*. (F.) *Vigne*. Vine leaves and the tendrils have an astringent taste, and were formerly used in diarrhœa, hemorrhage, &c. The juice or sap, called *Lacryma*, has been recommended in calculous dis-

orders and in cases of chronic ophthalmia. The juice of the unripe fruit is called *Verjuice*, (q. v.) The *Grape*, *Uva*, *Botrys*, *Staph'ylē*, (F.) *Raisin*, when ripe, is a wholesome, delicious fruit; and, when dried, it forms the *Uvæ passæ majores*, *Pass'ulæ majores*, *Uvæ passæ solē siccat'æ*, *Raisins*. These are inodorous; and, to the taste, subacidulous, sweet, and mucilaginous. They are demulcent and nutritive.

VITUM SCROPHULOSUM, Scrofula.

VITRARIA, Parietaria.

VITREUS, Hyaloid.

VITRINE AUDITIVE, (F.) from *vitrum*, 'glass,' *En'd'olymph*. The fluid contained in the *membranous labyrinth* of the ear, so called from its resemblance to the *vitreous* humour of the eye.

VITRIOL, Ferri sulphas—v. Blue, Cupri sulphas—v. Cæruleum, Cupri sulphas—v. Green, Ferri sulphas—v. Roman, Cupri sulphas—v. White, Zinci sulphas.

VITRIOLUM ALBUM, Zinci sulphas—v. Ammoniacale, Ammoniae sulphas—v. Cupri, Cupri sulphas—v. Cyprium, Cupri sulphas—v. Ferri, Ferri sulphas—v. Goslariense, Zinci sulphas—v. Viride, Ferri sulphas—v. Martis, Ferri sulphas—v. Romanum, Cupri sulphas—v. Veneris, Cupri sulphas—v. Zinci, Zinci sulphas.

VITRUM, *Hyalos*, *Glass*, *Brancia*, (F.) *Verre*, from *videre*, 'to see.' Glass, coarsely powdered, has been sometimes used to remove specks of the cornea.

Powdered glass has been regarded, but erroneously, as a poison. It acts only mechanically.

The saline scum, which swims on glass when first made, has been used in tooth-powders. It is called *Sandiver*, *Sel de verre*, *Glass Gull*, *Fel v'tri*, &c.

VITRUM HYPOCLEPTICUM, Separatorium—v. Sublimatorium, Aludel.

VITTA, *Bandelette*, a Caul.

VIVERRA CIVETTA. See Civetta.

VIVIP'AROUS, from *vivus*, 'alive,' and *pario*, 'I bring forth.' An epithet applied to animals whose young are brought forth detached, without requiring to be hatched, as in the *Oviparous*.

VIVISECTION, *Vivisectio*, from *vivus*, 'alive,' and *secare*, *sectum*, 'to cut.' The act of opening or dissecting living animals.

VOICE, *Vox*, *Audē*, *Phonē*, (F.) *Voix*, from *vocare*, 'to name, to call.' An appreciable sound, produced by the air, when driven from the lungs, throwing the inferior ligaments of the glottis into vibration. The function, by which this is effected, has been called *Phon'ation*. It is a function of animal life; and, in animals, is limited to the production of the *simple* or *instinctive voice*, as well as in the idiot; but, in intellectual man, becomes much more complicated and articulated,—an evidence of his intellectual superiority.

ARTICULATED VOICE or Speech, *Loque'la*, *Lalia*, *Phrasis*, (F.) *Parole*, *Voix articulée*, is the voice, as produced by the glottis, modified by the motions of the tongue, lip, and other parts of the mouth. Most physiologists agree in regarding the glottis or the space between the thyro-arytenoid ligaments plus the ligaments themselves, as the part where vocal sounds are formed; but the mechanism of this formation is a matter of dispute. The greater

part of individuals regard the glottis and its ligaments, with the *vocal tube*—or the space which the sound has to traverse after it is produced in the glottis—as a reed instrument, like the clarinet;—the inferior ligaments of the glottis constituting the reed. In speech, as ordinarily effected, the tongue, lips, teeth, &c. are concerned; but there are some authentic cases on record, where it has been accomplished after the tongue has been removed. In such cases, the articulated voice must have been produced in the glottis, alone or aided by an obscure action of the parts above it.

VOICE, BLEATING, Egophony—v. *Cavernous*, *Pectoriloquy*.

VOICE, CONVULSIVE, *Voix Convulsive*, (F.) *Vox Convuls'va*. A neurosis of the voice, consisting in the production of discordant sounds—acute and grave—which cannot be brought to the natural tones by any effort of volition. It seems to be caused by disordered contraction of the muscles of the larynx.

VOICE, GOAT'S, Egophony—v. *Laryngeal*, *Laryngophony*—v. *Tracheal*, *Laryngophony*.

VOIE, Way.

VOIES DIGESTIVES, Ways, digestive—v. *Lacrymales*, *Lachrymal passages*—v. *Premières*, Ways, digestive—v. *Secondes*, Ways, second—v. *Urinaires*, *Urinary passages*.

VOILE DU PALAIS, Velum pendulum palati—v. *Médullaire inférieure*, Velum medullare inferius—v. *Médullaire supérieure*, Valvula Viuessenii.

VOIX, Voice—v. *Articulée*, Voice, articulated—v. *Bronchique*, Resonance.

VOLA, Palm.

VOLATICA, Lichen.

VOLATILIZATION, *Volatilizad'tio*; from *volare*, 'to fly.' The operation of reducing volatilizable substances into gas or vapour.

VOLSELLA, Acanthobolus, Forceps, Madisterium—v. *Patini*, *Valet à Patin*.

VOLTAISM, Galvanism.

VOLVULUS, Ileus—v. *Intestinorum*, Intussusception.

VOMENDI CONAMEN INANE, Vomiturition.

VOMER, in Lat. 'a ploughshare,' *Os Vomeris*, *Ard'trum*, *Os maxill'æ superioris undec'imum*. One of the bones of the face, so called from its resemblance. It is an azygous bone, forming the posterior part of the septum narium. It is thin, flat, and quadrilateral; and is articulated, below, to the superior maxillary and palatine bones; and above, to the sphenoid, ethmoid, and cornets of Bertin. It is developed by a single point of ossification.

VOMICA, from *vom'ere*, 'to vomit,' 'to cast up.' (F.) *Vomique*, *Crachement de pus*. A term, used by some authors for any encysted collection of purulent matter in the interior of a viscus. The acceptance is commonly, however, restricted to purulent collections in the lungs, encysted or not, which may be discharged by the mouth, by breaking into the bronchial tubes. Two kinds of vomicae are distinguished; the one, caused by the softening or breaking down of pulmonary tubercles; the other, of much more rare occurrence, formed by a circumscribed abscess of the lungs. Instead of opening into the bronchia, the abscess is sometimes discharged into the cavity of the pleura, causing empyema.

VOMICINE, Brucia.

VOMIQUE, Vomica.

VOMIQUEUR, *Strychnos nux vomica*.

VOMISSEMENT, Vomiting—*v. de Sang*, Hæmatemesis.

VOMIT, BLACK, Fever, yellow—*v. Black*, Melæna.

VOMITIF, Emetic.

VOMITINE, Emetine.

VOMITING, *Vomitus*, *Eromi'tio*, *And'tropē*, *Em'esis* *Vomi'tio*, *Palmus vomitus*, *Ægritu'do ventriculi*, *Sickness of the Stomach*, (F.) *Vomissement*, from *vomere*, 'to cast up.' The act by which solids and liquids, contained in the stomach, are ejected by the mouth. Vomiting is the effect of some special irritation of the nerves of the stomach. It is not accomplished solely by the contraction of the stomach, as was, for a long time, believed. That organ, indeed, assists in the process;—the main cause is the compression exerted upon the parietes of the viscus by the diaphragm and abdominal muscles. Vomiting is a symptom, common to numerous diseases. At times, it is sympathetic, as in affections of the kidney, uterus, brain, &c. At others, it is symptomatic, as in gastritis, peritonitis, &c. When very troublesome, it may often be palliated by effervescent draughts, aromatics, sinapisms or blisters to the epigastric region, &c.

VOMITING OF BLOOD, Hæmatemesis.

VOMITO NEGRO, Fever, yellow—*v. Prieto*, Fever, yellow.

VOMITORIUM, Emetic.

VOMITURITION, *Vomituri'tio*, *Emesia*, *Dysemesia*, *Vomen'di cona'men ina'nē*, *Retching*. Same etymon. Ineffectual efforts to vomit. Some authors mean, by this term, the vomiting of but little matter, or that which occurs almost without effort. The first acceptance is the most general.

VOMITUS, Vomiting—*v. Cruentus*, Hæmatemesis—*v. Navigantium*, *Nausea marina*—*v. Niger*, Fever, yellow—*v. Pituitosus*, *Blennemesis*—*v. Sanguinis*, Hæmatemesis.

VOÛTE, Vault—*v. Médullaire*, *Corpus callosum*—*v. à Trois piliers*, *Fornix*.

VOX, Voice—*v. Convulsiva*, *Voix convulsive*—*v. Rauca*, *Raucedo*.

VUE, Vision—*v. Courte*, *Myopia*—*v. Diurne*, *Hemeralopia*—*v. Faible*, *Amblyopia*—*v. Longue*, *Presbytia*—*v. Louche*, *Strabismus*—*v. Nocturne*, *Nyctalopia*.

VULGA, Vulva.

VULNERAIRE, Vulnerary—*v. Suisse*, see *Falltranck*.

VULNERARIUS, Traumatic.

VULNERARY, *Vulnerarius*; from *vulus*, *vulneris* 'a wound.' (F.) *Vulnéraire*. A name applied by the ancients, to medicines, which they considered capable of favouring the consolidation of wounds. The property has been ascribed to various plants.

VULNUS, Wound—*v. Laceratum*, see *Laceration*—*v. Simplex*, *Cut*.

VULTUEUX, (F.) *Vultuosus*. Corvisart has used the expression, *Face vultueuse*, *Facies vultuosa*,—for the face, when it is more florid and swollen than in the natural state. This appearance, which is observed in active aneurism of the heart, according to Corvisart, is owing to the afflux of blood into the arterial capillaries, and hence differs from the livid and swollen appearance caused by the accumulation of blood in the venous capillaries, constituting the *Face injectée*.

VULTUS, Face.

VULVA, Uterus. See *Vulva*.

VULVA, from *ratae*, 'a door,' *Hortus*, *Cunus*, *Puden'dum mulie'brē*, *Choiros*, *Arum*, *Bucca*, *Bulga*, *Cadur'cus*, *Custos*, *Femen*, *An'nus*, *Femur summum*, *Folliculus*, *Fundus*, *Gremium*, *Hiat'us*, *Lan'u'm*, *Navis*, *Oppid'ulum*, *Specus*, *Virginal*, *Vulga*, *Cymba*, *Sultus*, *Clitor'ium*, *Ostium*, *Sulcus*, *Amphicaustis*, *Concha*, *Porcus*, *Porta*, *Interfemineum*, *Muliebria*, *Fossa magna mulie'bris*, *Episeion*, *Eschara*, *Hor'tulus cupidinis*, *Boubal'ios*, *Byssos*, *Cava*, *Caver'ua*, *Delphys*, *Delta*, *Fovea*, *Gynac'cum*, the female pudendum; the female organs of Generation. (F.) *Vulvæ*. A longitudinal opening between the projecting parts of the external organs of generation in the female, extending from the mons veneris to the perineum, and which is called, also, *Fossa magna*. Some anatomists mean, by this term, the whole of the external genital organs of the female;—mons veneris; labia majora, and the cleft or vestibule, separating them; the clitoris; nymphæ; meatus urinarius; entrance of the vagina; with the hymen or the caruncula myrtiliformes, fossa navicularis and fourchette.

VULVA, *Fora'men commu'nē ant'erioris*, *Iter ad infundib'ulum*, *Iter ad tertium ventric'ulum*. An opening, situate at the junction of the optic thalami, and immediately beneath the anterior crus of the fornix.

VULVAIRE, *Chenopodium vulvaria*.

VULVAR, *Vulv'ris*, from *vulva*. That which relates to the vulva. Chaussier gives this name to the external pudic arteries, because they are distributed to the vulva.

VULVARIA, *Chenopodium vulvaria*.

VULVE, Vulva.

VULVO-UTERINE CANAL, Vagina.

W.

WAD, Graphites.

WAISTCOAT, STRAIT, *Indu'cula*, (F.) *Camisole*, *Gilet de force*. A dress, used for restraining maniacs, or those labouring under violent delirium. It has long sleeves, which are tied behind the body, so that the arms cannot be extricated from them. It ought, of course, to be made of very resisting materials.

WAKE-ROBIN, *Arum maculatum*.

WALKING, *Gressus*, *Inces'sus*, *Deambulatio*, *Ambulatio*, *Badisis*, (F.) *La marche*. The action by which we change place, by means of a succession of steps in the same direction. In walking forwards, the centre of gravity is constantly altered; and a series of small, parabolic curves is described on the heads of the thigh bones, the extent of which is regulated by volition, under the guidance of vision.

WALLACHIA, MINERAL WATERS OF.

There are many excellent sulphureous springs in this country, especially those at Bobotsch, Fineschti, Sibitschiudi Suz, Bräsa, Otschin, Serboneschte, Kimpalungi, Kosia, and Olo-neschti. Chalybeate and saline springs have also been found at Sibitschiudi Suz—Siller.

WALLFLOWER, *Cheiranthus cheiri*.

WALLRUE, *Asplenium ruta muraria*.

WALNUT, *Juglans regia*—w. White, *Juglans cinerea*.

WALTON, MINERAL WATERS OF. A mineral spring near Tewkesbury, in Gloucestershire, England. It is an acidulous chalybeate.

WANT, from past participle of Sax. *þanian*, 'to wane'; 'to fall away.' 'Need of that which is necessary.' (F.) *Besoin*. This word is sometimes used to express the imperious necessity which compels us to take food, drink, &c. (See Hunger and Thirst.) In a more general sense, it means the impressions transmitted, by the organs to the brain, when it is necessary that they should act; these wants are called *instinctive desires* and *internal sensations* or *stimuli*. Such are the desires to eat, drink, void the urine, &c. &c.

WANT in the sense of *Indigence*, (L.) *Egestas*, *Indigentia*, is the cause of a number of diseases.

WARD'S ESSENCE FOR THE HEAD-ACHE, *Linimentum camphoræ compositum*.

WARM SPRINGS, see Virginia, Mineral Waters of.

WART, *Verruca*—w. Corneous, *Cornu*.

WASH, BLACK, see *Hydrargyri submuriæ*—w. Preventive, *Lotion*, *Hannay's*—w. White, *Liquor plumbi subacetatis dilutus*.

WASP, *Vespa*, *Sphex*, (F.) *Guêpe*. A genus of gregarious insects, like the bee and the ant. They are armed with a sting, which pours a poisonous fluid into the puncture made by it. (See Poisons, *Table of*.) The best application is the *Sp. ammoniac aromaticus*, or some preparation of ammonia.

WASSERBURG, MINERAL WATERS OF. Wasserburg is a town of Bavaria, seated on the Inn, 28 miles east of Munich. The water, called also *Aqua Agatii*, contains carbonic acid; carbonates of lime and magnesia; sulphates of lime and magnesia; chloride of sodium, carbonate of soda and oxide of iron.

WASSERCUR, *Hydrosudotherapia*.

WATER, Sax. *hwæter*, *Aqua*, *Hydor*, *ὕδωρ*, *Alma*, (F.) *Eau*. Water was at one time, regarded as a simple element. It is now known to consist of eight parts by weight of oxygen, and one of hydrogen. It freezes at 32°, and boils at 212°, of Fahrenheit; and is taken as the unit in all tables of the specific gravity of solid and liquid substances.—Water, as we meet with it, is very different in its state of purity; generally, it contains small quantities of saline matter; at other times, as in sea water and mineral waters, it is largely impregnated. The characters of water, as met with under ordinary circumstances, are well compared by Celsus, "*Aqua levissima pluvialis est; deinde fontana, tum ex flumine, tum ex puteo: post hæc ex nive, aut glacie: gravior his ex lacu, gravissima ex pulvere.*" Pure water is one of the best diluents that can be used. When cold, and especially when iced, it is one of the most useful refrige-

rants; and, in the form of the cold, tepid, and warm bath, it is serviceable in numerous diseases.

WATER OF AIX LA CHAPPELLE, see *Aix-la-Chapelle*—w. Allflower, *Urine*, cows'—w. Barley, *Decoctum Hordei*—w. of Bitter Almonds, *Aqua Amygdalarum concentrata*—w. Brash, *Pyrosis*—w. Camphor, *Mistura Camphoræ*—w. Canker, *Cancer aquaticus*—w. Carui, strong, *Spiritus carui*—w. Cinnamon, *Aqua cinnamomi*—w. Cinnamon, strong, *Spiritus cinnamomi*.

WATERS DISTILLED, *Aquæ destillatæ*—w. First, *Primitiæ*.

WATER, DISTILLED, *Aqua destillata*, (F.) *Eau distillée*, *Holy Water*, is generally ordered in extemporaneous prescriptions, but is rarely used. In some cases, however, it is absolutely necessary—as water, containing any saline impregnation—hard water, for example—decomposes certain substances. Distilled water has been recommended as a diet-drink in cancerous affections; and it is used in the religious ceremonies of the Catholic church. In the *Pharmacopœia* of the United States, (1842) it is directed to be made as follows.—Take of *Water*, ten gallons. First distil two pints, and throw them away; then distil eight gallons. Keep the distilled water in glass bottles.

WATER, EPILEPTIC OF LANGIUS, *Langii aqua epileptica*—w. Fennel, *Aqua Fœniculi*—w. Flag, yellow, *Iris pseudacorus*—w. Holy, *Water*, distilled—w. Honey, see *Mel*—w. in the Head, *Hydrocephalus*—w. Hungary, *Spiritus rosmarini*—w. Jags, see *Varicella*.

WATER, LAKE, *Aqua ex lacu*, (F.) *Eau de lac*, is apt to be impure, from decayed animal and vegetable matter. A great deal will, however, depend upon the magnitude of the collection, and the degree of stagnation.

WATER, LAUREL, see *Prunus lauro-cerasus*—w. Lavender, *Spiritus lavandulæ*—w. Lime, *Liquor calcis*—w. Lime, compound, *Liquor calcis compositus*—w. Magnesia, carbonated, *Magnesia*, fluid—w. Magnesia, aerated, *Magnesia*, fluid.

WATER, MARSH, *Aqua paludosa*, (F.) *Eau de Marais*, is the most impure of all. It is generally more stagnant, and of course more loaded with decomposing animal and vegetable matters.

WATER, MINERAL, *Aqua mineralis*, *A. salubris*, *A. medica*, *Fons salutaris*, *F. medicatus*, *F. soterius*, *Aqua soteria*, (F.) *Eau minérale*. Water, holding in solution different saline and gaseous substances, in sufficient quantity to be possessed of medicinal properties, or of a temperature different from that of the ordinary springs of the country.

Mineral waters may be divided into four classes:—1. *Gaseous*, or *Acidulous*. 2. *Chalybeate*. 3. *Saline*. 4. *Sulphureous*. These may be *thermal* or *cold*, *natural* or *artificial*. Many of these divisions, however, run into each other; some of the substances, which they hold dissolved, belonging to one class as well as to another.

1. *Gaseous*, *Acidulous* or *Carbonated Mineral Waters*, *Aquæ minerales acidulæ*, (F.) *Eaux minérales gazeuses ou acides*. The waters, referred to this class, are those that contain carbonic acid gas in such quantity as to communicate to it certain sensible qualities. Waters, impregnated with free carbonic acid, sparkle when drawn from the spring, or when poured

into a glass. They have a sharp, acidulous taste; but become vapid from exposure to the air. Along with the carbonic acid, there are generally present portions of saline, earthy or metallic matter, chiefly carbonates of lime, magnesia, and iron. Waters, highly impregnated with carbonic acid gas, are grateful to the stomach; increase the appetite, and are diuretic; hence, their utility in dyspepsia, hypochondriasis, and gout. Their properties are, of course, modified by the saline matter that may be also contained in them. The most celebrated amongst the acidulous waters are those of Bar, Chateldon, Saint Myon, Mont d'Or, Langeac, Seltzer, Schlangenbad, Sultzmat, Pyrmont, Spa, Carlsbad, Cheltenham, Scarborough, Saratoga, Ballston, and the Sweet Springs of Virginia.

2. *Chalybeate or Ferruginous Mineral Waters*, *Aque minérales ferrugineæ*, (F.) *Eaux minérales ferrugineuses*, contain iron—sulphate, muriate or carbonate, generally the latter—held in solution by an excess of acid. Chalybeate waters have a peculiar styptic taste. They are transparent, when taken from the spring; but, when exposed for some time to the air, a pellicle forms on the surface, and a deposit of the iron takes place. Chalybeate waters are used as tonics in debility of all kinds; in all cases, in fact, where iron is considered to be indicated. They are the most numerous of all the classes of mineral waters. In the present Dictionary, those only are specified which have some celebrity; yet there are upwards of ninety; whilst there are upwards of sixty of the saline, and upwards of thirty-five of the sulphureous. The most celebrated chalybeates are those of Tunbridge, Scarborough, Spa, Bussang, Forges, Vichy, Pyrmont, Passy, Provins, and Vals.

3. *Saline Mineral Waters*, *Aque minérales salinæ*, *Amna alcalizata* (Paracelsus,) (F.) *Eaux minérales salines*. Waters, holding in solution different saline substances, in greater quantity than the acidulous waters. They differ in properties, according to the salts contained in them. The salts usually present, are sulphates, chlorides, and carbonates; and the bases, with which

the acids forming these are combined, are soda, magnesia, and lime. Saline mineral waters are usually aperient; and the most noted are those of Seltzer, Sedlitz, Balaruc, Bourbonne-les-Bains, Baden, Epsom, Cheltenham, &c.

To this class may also be added *Sea water*.

4. *Sulphureous Mineral Waters*, *Aque minérales sulphuræ*; when warm, termed *Theriothermæ*, *Fontes sulphurei calidi*, (F.) *Eaux minérales sulfureuses*, *Eaux sulfurées*, *E. sulfureuses*, *E. hépétiques*, &c. These waters owe their distinguishing character to an impregnation of sulphuretted hydrogen, and are at once recognised by their peculiar, fetid smell, resembling that of rotten eggs. They usually contain saline substances, which modify their powers. From the action of the sulphuretted hydrogen, they are employed in cutaneous affections; and, from the combined action of this and the saline matter, they are valuable agents in diseases of the digestive organs. They are also employed in cutaneous eruptions; and the warm sulphur baths have been especially celebrated in such cases, as well as in rheumatic affections. The most renowned sulphureous waters are those of Barèges, Bagnères de-Luchon, Cauterets, Bonnes, Aix in Savoy, Aix-la-Chapelle, Enghien, Harrowgate, Moffat, Virginia Springs, &c.

Some springs, as those of Bath, Buxton, Dax, Matlock, Warm and Hot Springs of Virginia, &c., are almost pure; *Thermal Mineral Waters*. They are valuable agents in rheumatic affections; the warmth being equable during the whole period the individual is immersed in them; which cannot be the case in the artificial thermal bath.

ARTIFICIAL MINERAL WATERS, (F.) *Eaux minérales artificielles ou factices*. These are imitations of the natural; and some of them—as the factitious Cheltenham water, and Sedlitz water—answer the purposes of the natural water tolerably well. The acidulous and chalybeate waters are, however, most easily imitated.

The following Table, by Dr. Pereira, exhibits the composition of some of the principal mineral waters.

FIXED CONSTITUENTS

ENTERING INTO THE COMPOSITION OF SOME OF THE MORE CELEBRATED

MINERAL SPRINGS.

PROPORTIONS IN 10,000 PARTS OF WATER.

NOTE.—In reducing the analyses contained in this Table to a uniform measure, in order to render them susceptible of direct comparison with each other, the old English gallon is assumed to be as = 58,338 grains; the wine pint = 7305 grs.; the imperial gallon = 70,000 grs.; and the German 16-ounce measure = 7368 grs.

The different salts have been reduced to their elementary constituents by Wollaston's scale of chemical equivalents.

WATER, NUTMEG, *Spiritus myristicæ*—w. Par-
nep, creeping, Sium—w. Pennyroyal, spirituo-
us, *Spiritus Pulegii*—w. Peppermint, *Aqua*
Menthæ piperitæ—w. Qualm, *Pyrosis*.

WATER, RAIN, *Aqua pluvialis*, (F.) *Eau de*
pluie, when collected at a distance from houses
or other elevated objects, is the purest natural
water, and has the least specific gravity. The
only bodies which it usually holds in solution,
are carbonic acid, and minute traces of carbo-
nate of lime and chloride of calcium.

WATER, RIVER, *Aqua fluvialis*, is derived
from the conflux of numerous springs and rain
water. It is, generally, pretty pure.

WATER, ROSE, *Aqua Rosæ*.

WATER, SEA, *Aqua Mari'na*, *Humor Dor'idis*,
(F.) *Eau de Mer*. This contains chloride of
sodium, magnesium and calcium, and sulphate
of magnesia. It is cathartic and forms the usual
glyster at sea. It makes an excellent tonic bath;
superior in most cases—especially in scrofula—
to the fresh water bath.

WATER, SEYDSCHUTZ, Sedlitz water.

WATER, SNOW, *Aqua ni'd'ua*, (F.) *Eau de*
neige, has usually been deemed unwholesome.
It exactly resembles rain water, in composition,
and is equally salubrious.

WATER, SPEARMINT, *Aqua menthæ viridis*.

WATER, SPRING, *Aqua fonta'na*, *Hydropegæ*,
(F.) *Eau de fontaine*, contains, in addition to the
substances detected in rain water, more or less
sulphate of lime. When this is to such an ex-
tent as to curdle soap, the water is said to be
hard; if not, *soft*. Hard water is, of course,
inferior to soft, for domestic and medicinal pur-
poses.

WATER, STYPTIC, Sydenham's *Solutio sulphatis*
cupri composita—w. Tar, see *Pinus sylvestris*.

WATER, WELL, *Aqua putealis*, (F.) *Eau de*
puit, *Eau de source*, is the same as spring water,
but liable to impregnation, owing to the land
springs filtering into the wells, and conveying
impurities into them.

WATTWEILER, MINERAL WATERS
OF. Wattweiler is a small town in the depart-
ment of Haut-Rhin, at the foot of the Vosges.
The waters are acidulous chalybeates, and con-
tain carbonates of iron, lime, and soda; chloride
of sodium, and free carbonic acid.

WAX, MYRTLE. A wax obtained from the
fruit of *Myr'ca cerifera*. It has been pre-
scribed in dysentery.

WAX, YELLOW AND WHITE, *Cera flava et alba*.

WAXING KERNELS, *Crescen'tia*, (F.)
Croisances, *Croissants*, *Glandes de croissance*.
A popular term for small tumours, formed by
an enlargement of the lymphatic glands—in
the groins of children, particularly. They
have been looked upon as connected with the
growth of the body, hence their name.

WAY, Saxon *pæz*, *Via*, *Passage*, *Odos* (F.)
Voie. A name given to different canals.

DIGESTIVE WAYS OR PASSAGES, *Primæ Viæ*,
(F.) *Voies digestives*, *Premières voies*, are the
series of hollow organs of digestion, composed
of mouth, œsophagus, stomach, small and large
intestines. The term is often restricted to the
first three of these.

SECOND WAYS OF PASSAGES, *Secundæ viæ* (F.)
Sécondes voies comprise the chyloferous, lym-
phatic and blood-vessels.

WEANING, from Saxon *penan*, 'to wean,'
Ab lacta'tio, *Apogalactis'mus*, (F.) *Sévrage*. The

act of depriving the infant, permanently, of the
breast, in order to feed it on other and more
solid nourishment.

WEANING BRASH, see Brash, weaning.

WEB, MUSCULAR, *Panniculus carnosus*.

WEB-EYE, *Caligo*.

WEDGED, (D.) *wegghe*, *Inclu'sus*, *In-*
hærens, (F.) *Enclavée*. The head of the fœtus
is said to be wedged in the pelvis, when it re-
mains fixed notwithstanding the uterine efforts.

The condition is called *Incunec'tio*, *Spheno'sis*,
(F.) *Enclavement*. See Paragomphosis.

WEED IN THE BREAST, *Mastodynia*
apostematosa.

WEED, SILVER, *Potentilla anserina*.

WEIGHT, from Saxon *pægan*, 'to weigh,'
(F.) *Pésanteur*. A sensation of heaviness or
pressure over the whole body, or over a part:
—the stomach or head for example.

WEIGHTS AND MEASURES, *Pon'dera*
et Mensu'rae, (F.) *Poids et Mesures*. The im-
portance of possessing a uniform system of
weights and measures has impressed the scien-
tific of all countries, and numerous endeavours
have been made to accomplish the object. It
is, however, a matter of considerable difficulty,
and one not likely to be attained. The new
French measures are upon decidedly the best
footing, but they are not adopted out of France.
The greatest diversity prevails over Europe in
the measures both of weight and capacity.
Some of the following tables will show, that
every subdivision of the pound, as well as the
pound itself, differs in England and in France.

WEIGHTS.

Troy Weight, as used by the British Apothecaries.

The pound	lb	} contains {	12 ounces.
The ounce	℥		8 drachms.
The drachm	ʒ		3 scruples.
The scruple	ʒ		20 grains.
The grain	gr.		

These, and the signs by which they are de-
noted, are the same in all the British Pharma-
copœias, as well as in the American.

lb.	Oz.	Dr'ms.	Scrups.	Grs.
1	12	96	288	5760
	1	8	24	480
		1	3	60
			1	20

Poids de Marc.

The pound	} contains {	16 ounces.
The ounce		8 drachms.
The drachm		3 scruples.
The scruple		24 grains.
The grain		

Avoirdupois.

Pound.	Ounces.	Drachms.	Troy grains.
lb. 1	= 16	= 256	= 7000
	oz. 1	= 16	= 4375
		dr. 1	= 27,34375

The avoirdupois drachm is sometimes divided
into three scruples, and the scruple into ten
grains. The pound of 7680 grains avoird-
upois = 7000 grains troy, and hence 1 grain
troy = 1.097 grain avoirdupois.

The *Poids de Marc* is that employed by the
French Pharmaciens, when the new weights
are not.

The following Tables exhibit the relative
value of the old French and English weights.

Poids de Marc.	Troy Wt.	Avoird.	Troy grs.
1 pd. (livre)	= 1.31268 lb	= 1.089143 lb	= 7.561
1 oz. (once)	= .934504 oz	= 1.080143 oz	= 472.5025
1 dr. (gros.)	= .954504 dr		= 59.0703125
1 gr.	=		= .220421

Troy.	Poids de Marc.	French grains.
1 pound. =	0.76180 lb. =	7561
1 ounce. =	1.01574 once =	585.083
1 drachm. =	1.01574 gros =	73.135
1 grain. =		1.219
Avoirdupois.	Poids de Marc.	French grains.
1 pound =	0.925803 lb. =	8532.3
1 ounce =	0.925803 once =	533.27

To convert French grains into Troy grains, divide by	1.2189
Troy grains into French grains multiply by	
French ounces into Troy ounces, divide by	1.015734
Troy ounces into French ounces, multiply by	
To convert French pounds (poids de marc) into Troy pounds, multiply by	1.31368
Troy pounds into French pounds, divide by

VALUES OF THE GRECIAN, ROMAN, AND ARABIAN WEIGHTS AND MEASURES IN POIDS DE MARC.

1. Weights of the Ancient Greeks.

	lbs.	oz.	dr.	gr.
The talent	=	54	2	5 24
The mina	=		14	3 40
The drachm	=			1 11
The obolus	=			13
The ceration	=			4
The chalcus	=			2
The septon	=			¼

2. *Weights of the Ancient Romans.*

	oz.	dr.	gr.
The pound (libra)	10	6	48
The ounce (uncia)		7	16
The duella		2	29
The sicilicus		1	58
The sextula		1	14
The consular denier, denarius		1	2
The imperial denier or drachm, drachma			65
The victoriatus			37
The scriptulum or scruple			21
The obolus			11
The siliqua			4

The Greeks divided their obolus into *chalci* and *lepta*; some divided it into 6 *chalci*, and each *chalcus* into 7 *lepta*; others into 8 *chalci*, and every *chalcus* into 8 *lepta* or *minuta*.

3. *Weights said to be of the Arabians, Modern Greeks, and Latins of the barbarous periods of the Middle Ages.*

A spoonful			1	52
The colanos or reclanarium			1	28
A small spoonful or flagerina, or cyanes			1	11
The smallest spoonful or fahaliel				42

Besides the weights and measures already mentioned, employed by the moderns, there are

some modes of estimating the quantities of substances by approximation. For example:—

A *glassful* or *cupful*, ((F.) *Verre*) is reckoned to contain 4 or 5 fluidounces.

A *wine-glassful*, $1\frac{1}{2}$ ounce, or two ounces.

A *table-spoonful*, ((F.) *Cuiller à bouche*) about half an ounce.

A *coffee* or *dessert-spoonful*, about 3 drachms.

A *tea-spoonful*, a fluidrachm.

A *handful*, *manipulus*; ((F.) *Poignée*.)

The *Pugillus* is as much as can be held by the three fingers. ((F.) *Pincée*.)

These last quantities are occasionally prescribed by the French practitioners. Their weights must, of course, vary, according to the article. The authors of the Parisian codex have valued them, as regards certain substances.

	oz.	dr.
A <i>Manipulus</i> of barley weighs	3	24
“ linseed	1	4
“ linseed meal	3	3
“ dried mallow leaves	1	3
“ dried chicory leaves	1	0
“ flowers of the tilia	1	24

	dr.	scr.	gr.
A <i>Pugillus</i> of camomile flower weighs	2		
“ arnica	1	2	
“ marsh-mallow	1	1	
“ mallow			60
“ fennel seeds	1	61	
“ aniseed	2	4	

A *hen's egg*, newly laid, weighs about 2 ounces and 2 drachms:—when deprived of its shell, 2 ounces. The *white* weighs 1 ounce, 2 drachms, and 57 grains: the *yolk*, 5 drachms and 15 grains.

WELK, *Gutta rosea*.

WEMDING, MINERAL WATERS OF, These waters are situate about four leagues from Donawert in Bavaria. They contain sulphuretted hydrogen; carbonates of lime, magnesia, and soda; sulphates of lime and magnesia; a little chloride of calcium, and oxide of iron; and are much used in asthenic diseases.

WEN, Sax. þen, *Lu'pia*, *Tumour* (q. v.) (F.) *Loupe*. A name given to circumscribed, indolent tumours, without inflammation or change of colour of the skin. They may be met with in almost every part of the body. Their magnitude, as well as nature, is very variable. The term is sometimes given to an encysted tumour, and to BRONCHOCELE, (q. v.)

WESTERN ISLANDS, Azores.

WEST INDIES, (CLIMATE OF.) The climate of the West Indies has long been regarded as favourable to the consumptive. In confirmed consumption, it appears, however, to be positively injurious. As a prophylactic for those predisposed to consumption, it is generally favourable. The nature of the patient's constitution, in regard to the effects of elevated temperature, has always to be taken into account. In diseases, that are benefited by warm climates, the West Indies afford an appropriate residence. The islands in which the invalid can best obtain all the advantages of the climate, are Jamaica, Barbadoes, St. Vincents, Antigua, St. Kitts, and Santa Cruz.

WHEAT, *Triticum*—w. Indian, *Zea mays*—w. Turkey, *Zea mays*.

WHELK, *Acne*.

WHELK, *Chin*, *Sycosis*.

WHEY, *Serum lactis*—w. Rennet, see *Serum lactis*—w. Tamarind, see *Tamarindus*.

WHISKEY. See Spirit. A spirituous liquor obtained from oats, potatoes, &c. by distillation.

WHISTLING, *Sifflement*.

WHITE, Flake. Plumbi subcarbonas—w. Leg, Phlegmatia dolens—w. Root, Asclepias tuberosa—w. Spanish, Bismuth, subnitrate of—w. Swelling, Hydrarthrus—w. Swelling of lying-in women, Phlegmatia dolens—w. Sulphur, see Virginia, Mineral waters of—w. Wood, Liriodendron.

WHITES, THE, Leucorrhœa.

WHITLOW, Paronychia.

WHOOPIINGCOUGH, Pertussis.

WHORTLEBERRY, Vaccinium myrtillus, Vaccinium vitis Idæa—w. Bears', Arbutus uva ursi.

WHORTS, BLACK, Vaccinium myrtillus.

WIDOW-WAIL, Cneorum tricoccum, Daphne Alpina.

WIESBADEN, MINERAL WATERS OF. See Wiesbaden.

WIESSAU, MINERAL WATERS OF. These waters are situate about four leagues from the Convent of Waldsassen in Bavaria. They contain carbonic acid; carbonates of lime and magnesia; chlorides of calcium, magnesium, and aluminum; carbonate of soda, and much oxide of iron. The Bavarians consider them to resemble the waters of Pyrmont.

WILD, Sax. pilb, (D.) Wild. An epithet given to the countenance, when not in harmony with the condition of the individual, and indicating strong, mental emotion. A *wild look*, (F.) *Physionomie égarée*.

WILDUNGEN, MINERAL WATERS OF. Wildungen is situate a few miles from Cassel in Germany. In its neighbourhood are several mineral springs; the chief of which, according to Stucke, contain a bituminous matter: chloride of sodium and sulphate of soda; carbonate and sulphate of lime, &c. They are used, chiefly, as refrigerants.

WILLOW, Salix—w. Herb, common, Lythrum salicaria—w. Herb, purple, Lythrum salicaria—w. Red, Cornus sericea—w. Rose, Cornus sericea—w. Sweet, Myrica gale.

WIND, Sax. pinb, Ventus, Anemos, (F.) Vent. Winds exert considerable influence on the animal economy; acting by their temperature, which necessarily modifies that of the circumambient air, as well as by their moisture or dryness; and by the emanations of different kinds, which they transport to greater or less distances. The winds, which blow over a considerable extent of country, are dry and serene; those which come from the ocean, are moist and chilly.

WIND DROPSY, Emphysema—w. Flower, Anemone—w. Pipe, Trachea—w. Root, Asclepias tuberosa.

WINDY, Flatulentus, Flatulent, (F.) Ventreux. That which causes wind or flatulence; also, that which is caused by wind or flatulence;—as *windy food, windy colic, &c.*

WINE, Sax. pin, (G.) Wein, originally, perhaps, from *ovos, (Enos, Vinum, (F.) Vin.* A name, given by chymists to all liquors that have become spirituous by fermentation. The term is generally, however, restricted to the fermented juice of the grape; or of fruits, the product of whose fermentation resembles, in most respects, that of the juice of the grape. Wine is composed of alcohol; saccharine

matter; malic acid; tartaric acid; bitartrate of potass; acetic acid; an extractive colouring matter, more or less bitter, and partly resinous; and sometimes of an aromatic substance. The extractive colouring matter is chiefly met with in red wines. All these constituents, except the alcohol, are found ready formed in the grape. The alcohol proceeds from the decomposition of the saccharine matter. A part of the acetic acid is also formed during fermentation.

The following Table, drawn up by Mr. Brande, exhibits the quantity of spirit in different kinds of wine and liquors. It is proper, however, to remark, that many of these wines are prepared for the London market, and are more brandied or "reinforced," than the same varieties sold in the United States. This is strikingly the case with port. Dr. Henderson, too, has remarked, that some of the wines analyzed by Mr. Brande, were mixed with a considerable quantity of adventitious alcohol. Dr. Henderson's additions and corrections have the letter H. affixed.

The only wine recommended in some pharmacopœias, is the *Sherry*, *Vinum*, *Vinum album Hispanicum*. It is a *dry wine*; the least varia-

(d) 12.91 H.

ble in its properties, and agrees best with the dyspeptic. Other wines, used officially are, —the *Canary or Sack wine*, *Vinum Canari num*; *Mountain wine*, *Vinum album montanum*; *Tent wine*; *Rhenish wine*, *Vinum Rhena num*; and *Port wine*, the *Vinum rubrum Portugallicum*.

The wines, habitually drunk, are almost innumerable. Those that are sweet, or contain a large portion of free, saccharine matter, are decidedly the least wholesome to the dyspeptic.

When wine is good, and of a proper age, it is tonic and nutritive; when new, flatulent and cathartic;—disagreeing with the stomach and bowels. In Medicine, it is a valuable tonic in the last stages of typhus, when the skin is not too hot and dry. Its use, however, requires great caution; and when once commenced under proper circumstances, it cannot be suddenly dropped without mischief. It is, perhaps, the best permanent stimulus in the catalogue of the *materia medica*.

WINE, AMINEAN, *Aminæum vinum*—w. of Aloe, *Vinum aloes*—w. Antimonial, *Vinum antimonii tartarizati*—w. Antiscorbutic, *Vinum antiscorbuticum*—w. Aromatic, *Vinum aromaticum*—w. Bark, compound, *Vinum de kinâ kinâ compositum*—w. Barley, *Cerevisia*—w. Bitter, diuretic, *Vinum diureticum amarum*.

WINE BITTERS, *Vinum gentiana comp.* The formulæ for these may be various. The following is as good and agreeable as any. (*Rad. gentian. lbj, cort. aurant. 3x, sem. cardam. cont. 3iv, cinnam. cort. 3iv, wine, foreign or domestic, three gallons and a half.* Tonic and stomachic.

WINE, CEDAR, *Cedrinum vinum*—w. Chian, *Chium vinum*—w. of Colchicum, *Vinum colchici*—w. of Colchicum seed, *Vinum colechiciseminis*—w. of Ergot, *Vinum ergotæ*—w. of Gentian, compound, *Vinum gentianæ compositum*—w. of Hellebore, white, *Vinum veratri*—w. Ipecacuanha, *Vinum ipecacuanhæ*—w. of Iron, *Vinum ferri*—w. Medicated, *Vinum medicinale*—w. of Opium, *Vinum opii*—w. Pullet, *Poulet, vin de*—w. of Quinia, *Vinum quiniæ*—w. Rhubarb, *Vinum rhej palmati*—w. Steel, *Vinum ferri*—w. Tobacco, *Vinum tabaci*—w. of Wormwood, *Vinum absinthites*.

WINTER-BARK TREE, *Wintera aromatica*—w. Berry, Virginia, *Prinos*—w. Cough, Bronchitis, chronic—w. Green, round-leaved, *Pyrola*.

WINTERA, see *Wintera aromatica*.

WINTERA AROMATICA, *Drymis Winteri*. The *Winter Bark Tree*. The Bark, *Wintera* (Ph. U. S.) *Cortex Winteranus*, *Cortex Winteranus Magellanicus*, *Cortex Magellanicus*, (F.) *Écorce de Winter*, *Cannelle poivrée*, is very much allied in its properties to the *Canella alba*, (q. v.)

WISBADEN, MINERAL WATERS OF. Wisbaden is a town of Germany, about 6 miles north of Mainz, and 22 west of Frankfort. It has been long celebrated for its hot springs; and is much frequented. There are numerous cold and thermal springs,—the former containing sulphohydric acid; the latter being saline and acidulous. The temperature of the hot springs varies from 117° to 160° Fahr.

WISMUTHUM, Bismuth.

WOLFSBANE, Aconitum.

WOLFSCLAW, Lycopodium.

WOMANHOOD, Mulieritas.

WOMB, Uterus—w. Falling down of the,

Prolapsus uteri—w. Grain, Ergot—w. Lacera-
tion of the Uterus, rupture of the—w. Tympa-
ny of the, *Physometra*.

WOODBINE, COMMON, *Lonicera pericly-
menum*.

WOOD-LICE, *Onisci aselli*.

WOODROOF, SWEET-SCENTED, *As-
perula odorata*.

WOODS, SUDORIFIC, (F.) *Bois sudori-
fiques*. This term is applied, collectively, to the
guaiacum, *sassafras*, *china*, and *sarsaparilla*;
which are often used together to form the sud-
orific decoction.

WOODSORREL, *Oxalis acetosella*.

WORM-BARK TREE, *Geoffræa inermis*—
w. Cakes, Story's, see Cakes, worm, Story's—
w. Disease, Helminthiasis—w. Goosefoot, *Chen-
opodium anthelminticum*—w. Grass, peren-
nial, *Spigelia Marilandica*—w. Guinea, *Dra-
cunculus*.

WORM LOZENGES, CHING'S. Empirical pre-
parations, which consist of yellow and brown
lozenges. The former are directed to be taken
in the evening; the latter on the following
morning. The *Yellow Lozenges*. (*Saffron*, 3ss,
water Oj; boil, and strain: and add of *white pa-
nacea of mercury* (calomel washed in spirit of
wine) lbj, *white sugar* 23 lbs, *mucilage of gum
tragacanth*, q. s., to make a mass. Divide; so
that each lozenge contains a grain of the pa-
nacea.) The *Brown Lozenges*. (*Panacea* 3vij,
resin of jalap lbijss, *white sugar* lbix, *mucilage
of gum tragac.* q. s. Each lozenge to contain
gr. ss of the panacea.)

WORM, SEED, *Artemisia santonica*, *Chenopo-
dium anthelminticum*—w. Weed, Corsican,
Corallina Corsicana—w. Weed, white, *Coral-
lina*—w. Wood, common, *Artemisia absinthium*
—w. Wood, creeping, *Artemisia rupestris*—w.
Wood, Lesser, *Artemisia Pontica*—w. Wood,
Roman, *Artemisia Pontica*—w. Wood, sea,
Artemisia maritima—w. Wood, silky, *Arte-
misia glacialis*.

WORMI'NA OSSA, *Ossa epactalia*, *Ossa
triquetra*, *Ossa triangulæria* Blai'sii, *Claves cal-
varie*, (F.) *Os Wormiens*, *Clefs du crâne*, *Os
épactaux*, *Os surnuméraires*, (Ch.) *Os intercalés*,
Os triangulaires. Small bones, which are some-
times observable in the sutures of the bones of
the cranium, of which they form a part. They
were called *Wormiana*, from Olaus Wormius,
who is said to have first described them. They
had been previously, however, mentioned by
Gunterus Adernachus, a physician at Stras-
burg. The ossa *Wormiana* exist more com-
monly in the sutures of the vault of the skull;
especially in the lambdoidal, sagittal, and squa-
mous. They are uncommon at the base of the
skull. Their size is very variable, and shape
irregular. Their structure and development
are similar to those of the other bones of the
cranium; and, like them, they are bounded by
sutures.

WORMS, originally from (L.) *Vermes*, *Intes-
tinal Worms*, *Entozoa*, *Entozodia*, *Enterozoa*,
Endozoa, *Vermes intestini*, *Enthelminthes*, *Hel-
minthi*, *Helminthia Alvi*, and *H. Podicis*, (F.)
Vers, *Vers intestinaux*, *Entozoaires*. Animals,
whose common character is that of existing
only in other animals, and hence their name
entozoa, from *εντος*, 'within,' and *ζωον*, 'ani-

mal.' They are met with, not only in the
natural cavities, but even in the tissue of
the organs. Cuvier, Rudolphi, Brera, Brem-
ser, Laënnec, and others have endeavoured
to class them,—some according to their shape;
others, according to their anatomical charac-
ters.

The following table exhibits the entozoa,
which have been met with in the human body,
and their usual habitat.

Entozoa.	Where Found.
<i>Tricocephalus dispar</i> , <i>Oxyuris vermicularis</i> , <i>Ascaris lumbricoides</i> , <i>Bothriocephalus latus</i> , <i>Tænia solium</i> , <i>Ditrachyrceras rudis</i> , <i>Diplosoma crenata</i> , <i>Spiroptera hominis</i> , <i>Dactylius aculeatus</i> , <i>Distoma hepaticum</i> , <i>Strongylus gigas</i> , <i>Filaria oculi</i> , <i>Acephalocystis endogena</i> , <i>Echinococcus hominis</i> ,	Intestines.
<i>Polystoma pinguicola</i> , <i>Filaria bronchialis</i> ,	
<i>Trichina spiralis</i> , <i>Cysticercus cellulosæ</i> ,	Urinary Bladder.
<i>Acephalocystis multifida</i> , <i>Filaria medinensis</i> ,	
	Gall Bladder.
	Kidney.
	Eye.
	Liver.
	Liver, Spleen, and Omentum.
	Ovary.
	Bronchial glands.
	Muscles.
	Brain.
	Cellular texture.

The most common of these are;—the *Ox-
yures vermiculares*, *Ascarides lumbricoides*,
and *Tænia*, which are found in the intestines.
The origin of these worms is extremely singu-
lar and more favourable than any other fact to
the hypothesis of spontaneous generation in
the lowest tribes of animated nature. They
certainly do not resemble any worms out of
the body. They are most commonly met with
in children improperly fed; but their presence
cannot be positively detected by any symptom,
except that of the discharge of the worms
themselves in the evacuations. They may, of
course, give rise to every kind of irritation in
the intestinal tube, and to sympathetic distur-
bance in most of the other functions; but all
these signs may be produced by intestinal irri-
tation resulting from other causes.

Anthelmintics or *vermifuges*, employed, as the
name imports, for their removal, may be of two
kinds—*mechanical*, and *true*. To the first class
—the *mechanical*—belong *Emetics*, *Purgatives*,
Mucuna, *powdered Tin*, &c. To the latter—the
true anthelmintics—*Turpentine*, *Chenopodium
Anthelminticum*, *Pink-root*, *Semina Santonici*, &c.
Of these the best is turpentine. See *Oleum
Terebinthinæ*. The great object, however, is to
prevent their generation. This must be done
by generous diet, fresh air, and tonics where
necessary.

WORT, Sax. *ȝȳrt*, *mustum*. (F.) *Mout de la
Bière*. An infusion of malt. This has been re-
commended in scurvy. One measure of ground
malt is added to three equal measures of boiling
water. The mixture must be well stirred, and
left to stand covered three or four hours. Dose,

one to four pints, daily. It has, also, been recommended in other cases, where a strong putrescent disposition appeared to prevail in the fluids, as in cancerous and phagedenic ulcers. It is not now employed.

WOUND, Sax. *puno*, *Vulnus*, *Plaga*, *Trauma*, *Tresis*, *Tresis Vulnus*, *Blabē*, *Tymmā*, (F.) *Plaie*, *Blessure*. A solution of continuity in the soft parts, produced by some mechanical agent. Wounds present innumerable differences, as regards their situation; the parts interested; their direction; size; shape; the nature of the instrument or agent by which they are produced; their more or less simple or complex character, duration, &c. A wound is called *incised*, (F.) *Coupure*, *Incision*, when made by a cutting instrument;—*punctured*, (F.) *Piqure*, when made by a pointed instrument;—*lacerated*, (F.) *Déchirure*, *Plaie par arrachement*, when the

parts are lacerated or torn by the wounding body; *poisoned*, *Cellulitis venenata*, *Necrosis*, (F.) *Plaie envenimée*, when some virulent or venomous substance has been introduced;—and *contused*, (F.) *Plaie contuse*, when produced by a blunt body. *Gunshot wounds*, *Sclopeto-plagæ*, (F.) *Plaies d'armes à feu ou d'arquebuse*, *Coup de feu*, belong to the last division.

WRACK, BLADDER, YELLOW, *Fucus vesiculosus*—w Sea, *Fucus vesiculosus*.

WRENCH, Sprain.

WRINKLE, Sax. *pyncle*, *Fuga*, *Rytis*, (F.) *Ride*. A furrow or fold in the skin of the face, forehead, vagina, &c.

WRIST, Carpus.

WRIST-DROP. The paralysis of the muscles of the forearm, induced by the poison of lead.

WRONG HEIR, Cancellus.

X.

XALAPPA, *Convolvulus jalapa*.

XANTHIUM, X. *strumarium*, *Barda'na minor*, *Lappa minor*. The lesser Burdock. (F.) *Lampourde*, *Petit Glouteron*, *Petite Bardane*. This herb, as one of its names imports, was once esteemed in the cure of scrofula. The seeds have been administered in cutaneous affections.

XANTHOP'SIA, from *ξανθος*, 'yellow,' and *οψις*, 'vision.' Yellow vision,—as sometimes occurs in jaundice.

XANTHORRHIZA, *Xanthorrhiza apiifolia*.

XANTHORRHIZA APIIFOLIA, *Xanthorrhiza*, X. *simplicissima*, X. *Marbois'ca*, *Xanthorrhiza*, *Tinctoria*, *Yellow Root*, *Parsley-leaved Yellow Root*. The root of this American plant—*Xanthorrhiza*, (Ph. U. S.) is a strong and pleasant bitter; and, in the dose of two scruples, sits easy upon the stomach.

XANTHOS, Yellow.

XANTHOXYLUM CLAVA HERCULIS, *Prickly Ash*, *Toothache Tree*, (F.) *Clavaler à feuilles de frêne*, *Frêne épineux*. The bark—*Xanthoxylum*, (Ph. U. S.)—is a very strong stimulant and powerful sialogogue. It has been given, internally, in rheumatism. Another species—the *Xanthoxylum frazinifolium*, *Xanthoxylum frazin'cum*,—possesses active powers. A spirituous infusion of the bark has been highly recommended in cases of violent colic. The fresh juice, expressed from the roots of the xanthoxylum, is said to afford relief in the dry-bellyache of the West Indies. A decoction of the bark is, sometimes, used as a wash to foul ulcers.

XANTICA, Carminatives.

XANTOLINA, *Artemisia santonica*.

XERANSIS, Arefaction, Drying.

XERANTIA, Siccantia.

XERA'SIA. Same etymon, from *ξηρος*, 'dry.'

A disease of the hairs, which become dry, cease to grow, and resemble down covered with dust.—Galen.

XERION, Catapasma.

XEROCOLLYRIUM, from *ξηρος*, 'dry,' and *κολλυριον*, 'a collyrium,' *Collyrium siccum*. A dry collyrium.

XEROMYCTERIA, from *ξηρος*, 'dry,' and *μυκτις*, 'the nose.' Dryness of the nose.

XEROM'YRON, *Unguentum siccum*; from *ξηρος*, 'dry,' and *μυρον*, 'an ointment.' A dry ointment.—Gorræus.

XEROPHAGIA, from *ξηρος*, 'dry,' and *φαγω*, 'I eat.' Excessive use of dry aliment. A kind of regimen to which the ancient athletæ subjected themselves, with the view of increasing their strength.

XEROPHTHALMIA, *Ophthalmia sicca*; from *ξηρος*, 'dry,' and *οφθαλμία*, 'inflammation of the eye.' A dry inflammation of the eye, without discharge. Also, Lippitudo, (q. v.)

XEROTRIBIA. See Friction.

XIPHOD'YMUS, Thoraco-gastrodidymus.

XIPHOID, *Xiphoides*, *Ensiformis*, from *ξίφος*, 'a sword,' and *ειδος*, 'shape.' The *Cartilago Xiphoides*, C. *Xiphoides*, C. *Ensiformis*, *Ensiform cartilage*, *Furcul'la inferior*, *Mucronatum os*, *Mucronata Cartilago*, *Chondros*, (F.) *Appendice on cartilage xiphoides*, *Appendice sous-sternale*, *Palette*. The name of the appendix which terminates the sternum beneath; and which is so called from some resemblance to a sword.

XIPHOID LIGAMENT, *Costo-xiphoid L.* (F.) *Ligament xiphoidien on costo-xiphoidien*, is a small, very thin, ligamentous fasciculus, which passes from the cartilage of prolongation of the 7th rib to the anterior surface of the xiphoid cartilage, into which it is inserted by its fibres decussating with those of the opposite ligament.

XIPHOP'AGES, *Didymus Symphyo-epigas'trius*; from *ξίφος*, 'a sword,' and *πυγνυι*, 'I fix.' A monstrosity, in which twins are united by the epigastrium, as in the case of the Siamese Twins.

XYLO-ALOES, *Agallochum*—x. *Balsamum*, see *Amyris opobalsamum*—x. *Cassia*, *Laurus cassia*—x. *Cinnamomum*, *Laurus cinnamomum*.

XYRIS, *Iris fœtidissima*.

XYSMA, *Rasura*, *Scobs*.

XYSMOS, *Rasura*.

XYSTERA, *Rasporium*.

XYSTOS, *Linteum*.

Y.

YAM. This esculent root is principally obtained from three species of *Dioscorea*,—the *alta*, *bulbifera*, and *sativa*. They grow spontaneously in both the Indies, and their roots are eaten, promiscuously, as the potato is with us. Their taste is somewhat like the potato.

YARD, Penis,

YARROW, COMMON, *Achillea millefolium*.

YAUPON, *Ilex vomitoria*.

YAWNING, from Sax. *æonan*, *Chasmē*, *Chasmos*, *Hiatus*, *Oscitatio*, *Clonus pandiculationis*, *mazilla-rum*, *Gaping*, (F.) *Baillement*. Yawning consists of a deep inspiration, with considerable separation of the jaws; executed slowly and in an involuntary manner, and followed by a prolonged and more or less sonorous expiration. This respiratory movement is preceded by a feeling of oppression in the epigastric region, and in the muscles of respiration and mastication. Yawning has been conceived to be owing to torpor in the pulmonary circulation; the causes producing it being commonly *ennui*, fatigue, sleepiness, monotonous sounds, hunger, sympathy, &c. Yawning often precedes the invasion of certain intermittents, attacks of hysteria, &c., and it may, by its frequency, and obstinacy, become a true disease.

YAWS, *Frambæsia*.

YELLOW, *Flavus*, *Lu'teus*, *Xanthos*, from past participle of Sax. *gewelan*, 'to burn.' One of the seven primitive colours.

YELLOW LIGAMENTS, (F.) *Ligamens jaunes*,

occupy the spaces between the vertebral plates (q. v.) from the interval, which separates the second vertebra from the third, to that which separates the last vertebra from the sacrum. They are so called, in consequence of their colour.

YEST, Yeast, Sax. *ȝeft*, from *ȝft*, 'a storm,' *ȝftig*, 'stormy;' *Cerevisiæ Fermentum*, *Spuma Cerevisiæ*, *Barm*, (F.) *Levure*, *Levure de la Bière*. The scum, which collects on the surface of beer whilst fermenting. Yeast is antiseptic and tonic. It has been much extolled in putrid fevers,—a table spoonful being given as a dose, in porter, wine, &c. It is, also, applied, in the form of cataplasm, to foul ulcers. In all these cases, it acts by virtue of the generation of carbonic acid gas.

YEUX ARDENS, Ardent eyes—y. *d'Écrevisse*. *Cancrorum chele*.

YEW TREE, *Taxus baccata*.

YLECH, *Ilech*.

YLATER, *Ilech*.

YOLK OF EGG. See *Ovum*.

YOUTH, *Adolescence*.

YOPON, *Ilex vomitoria*.

YPSELOGLOSSUS, *Basioglossus*.

YRIDES, *Orpiment*.

YSAMBRA, *Pedigambra*. An ancient Spanish poison, of which hellebore formed the greatest part.

YUCCA, *Jatropha manihot*.

Y-WER-A. See *Spirit*.

Z.

ZACCHARUM, *Saccharum*.

ZÆL, *Borosail*.

ZAFFRAN, *Crocus*.

ZAMIA INTEGRIFOLIA, see *Arrowroot*—z. *Pumila*, see *Arrowroot*.

ZANNA. A kind of Arinenian bole, used by the ancients as a desiccative. It was also called *Zurnacha*.

ZANTHORRIZA APIIFOLIA, *Xanthorrhiza apiifolia*.

ZANTHOXYLUM CLAVA HERCULIS, *Xanthoxylum clava Herculis*.

ZAPANIA NODIFLORA, *Anacoluppa*.

ZARNACHA, *Zanna*.

ZARSA, *Smilax sarsaparilla*.

ZARZAPARILLA, *Smilax sarsaparilla*.

ZEÀ MAYS, *Indian Corn*, *Corn*, *Turkey Wheat*, *Maize*, *Ador*, *Indian Wheat*, (F.) *Graine de Turquie*, *Blé d'Inde*, *Blé d'Espagne*, *Blé d'Italie*, *Blé de Turquie*. A native of America, and much used over the whole of the continent, as an article of diet. It is ground for the same purposes as wheat, and forms an excellent bread.

ZEDOARIA, *Kæmpferia rotunda*.

ZEDOIRE ROND, *Kæmpferia rotunda*.

ZEDOARY, *Kæmpferia rotunda*.

ZELOSIS, *Zelotypia*.

ZELOTYPÏA, from *ζηλος*, 'love,' and *τυπος*, 'form,' 'model;' *Zelo'sis*. It has been proposed to apply this name to the violent mental affection, produced by the acknowledged or pre-

sumed infidelity of a beloved object; and to the consequences of such affection;—melancholy, mania, &c.

ZEMA, *Decoction*.

ZEN'ICON, *Ζενικον*. Ancient name of a Celtic poison, used for poisoning arrows.

ZEPHACH, *Peritonæum*.

ZERMA, *Zerna*.

ZERNA, *Zerna*. Amongst the barbarous Latin writers it signified ulcerated impetigo, *Impetigo ulcerata*.

ZESIS, *Effervescence*.

ZEST. See *Citrus medica*.

ZIBETHUM, *Civetta*.

ZIGNITES, *Zingrites*.

ZINC, *Zincum*, *Zinkum*, *Speltrum*, *Tutenag*, *Zinchum*, *Zint*, *Stannum Indicum*. Perhaps formed etymologically from (G.) *Zin*, 'Tin.' A metal, obtained from calamine and blende. Its colour is bluish-white; lustre of the fresh surface considerable, but soon dulled, from the facility with which it oxidates; hard; texture striated. S. G. 7.190. Melts at 700° Fah.; burns with a bright flame in a higher temperature, and is volatilized in the form of a white, flocculent oxyd. Its use, in medicine, is in the formation of the following preparations.

ZINC, BUTTER OF, *Zinci chloridum*—z. *Chloride of*, *Zinci chloridum*—z. *Ferrohydrocyanate of*, *Zinci cyanuretum*—z. *Flowers of*, *Zinci oxydum*—z. *Iodide of*, see *Iodine*—z. *Hydro-*

cyanate of, Zinci cyanuretum—z. Oxyd of, Zinci oxydum—z. Sulphate of, Zinci sulphas.

ZINCHUM, Zincum.

ZINCI ACETAS, *Acetate of Zinc*. (*Plumbi acet. ℞j, zinc. granul. ℥ix, aquæ destillat. Oij.*) Dissolve the acetate of lead in the water, and filter. Add the zinc to the solution, and agitate them occasionally together, in a stopped bottle, for five or six hours, or until the liquid yields no precipitate, with a solution of iodide of potassium. Filter the liquor, evaporate it with a moderate heat to one fifth, and set it aside to crystallize. Pour off the liquid, and dry the crystals on bibulous paper.

Should the crystals be coloured, dissolve them in distilled water, and having heated the solution, drop into it, while hot, a filtered solution of chlorinated lime, until it ceases to let fall sesquioxide of iron: filter the liquor, acidulate it with a few drops of acetic acid, evaporate, and crystallize.—*Ph. U. S.*

Frequently used as a gently astringent wash in ophthalmia, and other local inflammations; and as an injection in gonorrhœa.

ZINCI CARBONAS IMPURUS, *Calamina*—z. Carbonas præparatus, *Calamina præparata*.

ZINCI CHLORIDUM, *Z. chloruretum*, *Zincum chloridum*, *Z. muriaticum (oxydatum)*, *Chloride or Chloruret of Zinc*. (*Zinc. in frustulis, ℥ijss, acid. nitric., cretæ præparat. aa ℥j, acid. muriat. q. s.*) To the zinc, in a porcelain vessel, add gradually sufficient muriatic acid to dissolve it; strain, add the nitric acid, and evaporate to dryness. Dissolve the dry mass in water, add the chalk, allow the mixture to stand for 24 hours, filter, and again evaporate to dryness.—*Ph. U. S.*) It is very deliquescent in the air, forming the *Butter of Zinc*, *Butyrum Zinci*.

Chloride of Zinc is a powerful escharotic.

ZINCI CHLORURETUM, *Z. chloridum*.

ZINCI CYANURETUM, *Hydrocyanas Zinci*, *Zincum Cyanogenatum*, *Z. Borussicum*, *Z. Zoëticum*, *Hydrocyanate of Zinc*. This salt is formed by adding sulphate of zinc to hydrocyanate of potassa so long as any precipitate is thrown down. When dried and calcined at a low heat, the product is a mixture of cyanuret of zinc and of potassium. It has been recommended in nervous cardialgia. Dose, from one-sixteenth to one-twelfth of a grain.

It is chiefly used as a caustic; one part of the chloride being mixed with 4, 3 or 2 parts of flour, according to the desired strength, and a few drops of water being added to form a paste.

ZINCI FERROHYDROCYANAS, *Cyanuretum Ferrozinicum*, *Zincum Ferrohydrocyanicum*, *Ferrohydrocyanate of Zinc*. Made by the mutual decomposition of boiling hot solutions of sulphate of zinc and ferrocyanate of potassa. It has been recommended in the same cases as the last preparation.

ZINCI HYDROCYANAS, *Zinci cyanuretum*.

ZINCI OXYDUM, *Zincum calcinatum*, *Oxyd of Zinc*, *Flowers of Zinc*, *Nihil album*, *Lana Philosophorum*, *Nihil griseum*, *Pompholyx*. Procured by burning zinc in a long, deep crucible, placed so as to collect the sublimate. Also, in the following manner: *Zinci sulph. ℞j, ammon. carbon. ℥vjss, aquæ destillat. cong. iij.* Dissolve the sulphate of zinc and carbonate of ammonia separately in twelve pints of the distilled water; strain the solutions, and mix them. Wash the precipitate frequently with water, and expose

it to a strong heat, so as to drive off the carbonic acid.—*Ph. U. S.* It is tonic; antispasmodic; externally, detergent and desiccative. Employed in epilepsy, chorea, &c. For its external use, see Ung. Zinci.

ZINCI OXYDUM IMPURUM, *Tutia*.

ZINCI SULPHAS, *Sulphate of Zinc*, *Zincum Vitrioldatum*, *Vitriolum album*, *White Vitriol*, *V. Goslarien'se*, *V. Zinci*, *Sulphas Zin'cium*, *Gilla Vitrioli*, *Gilla Theophrasti*, *Sal vomitorium vitrioli*, *Chalcant'hum album*, *White Copperas*, *Sal Vitrioli*. (*Zinc. in frustul. ℥iv, acid. sulphuric. ℥vj, aquæ destillat. Oiv.*) To the zinc and water, previously introduced into a glass vessel, add by degrees the sulphuric acid, and, when the effervescence shall have ceased, filter the solution through paper; then boil it down till a pellicle begins to form, and set aside to crystallize.—*Ph. U. S.*) The sulphate of zinc is inodorous; taste, styptic; it is in white, semi-transparent, efflorescent crystals; soluble in three parts of water at 60°. It is emetic, tonic, antispasmodic, and, externally, astringent. A nostrum, sold under the name—*Antipertus'sis*—and, as its title imports, given in whooping-cough, contains this salt as its chief ingredient. It is emetic. Dose, as an emetic, gr. x to ℥ss; as a tonic, gr. j to ij. Used externally as a collyrium, gr. j to water f. ℥j.

ZINCUM BORUSSICUM, *Zinci cyanuretum*—z. *Calcinatum*, *Zinci oxydum*—z. *Chloratum*, *Zinci chloridum*—z. *Cyanogenatum*, *Zinci cyanuretum*—z. *Ferrohydrocyanicum*, *Zinci ferrohydrocyanas*—z. *Iodatum*, see *Iodine*—z. *Muriaticum*, *Zinci chloridum*—z. *Vitriolatum*, *Zinci sulphas*—z. *Zooticum*, *Zinci cyanuretum*.

ZINGIBER GERMANICUM, *Arum maculatum*—z. *Officinale*, *Amomum zingiber*.

ZINKUM, *Zincum*.

ZINT, *Zincum*.

ZINZIBER, *Amomum zingiber*.

ZIPHAC, *Peritonæum*.

ZIZA'NIA AQUATICA, *Wild Rice*; called by the Indians, *Menomene*, grows abundantly on the marshy margins of the northern lakes, and waters of the upper branches of the Mississippi. The grain resembles oats. It furnishes the northern savages, and the Canadian traders and hunters, with their annual supplies of grain.

ZIZIPHUM, *Jujube*.

ZINGRITES, *Zigni'tes*. A stone, resembling glass, to which the ancients attributed marvellous properties.

ZOANTHROP'IA, from ζῷον, 'an animal,' and ἀνθρωπος, 'a man.' A species of monomania, in which the patient believes himself transformed into an animal. Lycanthropia and cynanthropia belong to this species of monomania.

ZOARA, *Insomnia*.

ZOE, *Life*.

ZOMOS, *Consommé*, *Jus*.

ZONA, *Herpes zoster*—z. *Castitatis*, *Hymen*—z. *Igneæ*, *Herpes zoster*.

ZONA TENDINO'SA. The whitish circle around the auriculo-ventricular orifice of the right side of the heart.

ZONA SERPIGINOSA, *Herpes zoster*—z. *Virginitatis*, *Hymen*.

ZONE, *Cingulum*.

ZONULA CILIARIS, see *Ciliary*—z. *ciliaris*, *Ciliary zone*—z. *Hildani*, *Cingulum Hildani*—z. *Zinnii*, see *Ciliary*.

ZOOCHYMY, Hyglogy.

ZOOG'ENY, *Zoogen'ia*, from ζῶον, 'animal,' and γενεῖς, 'generation.' The doctrine of animal formation.

ZOOGENIUM, Azote.

ZOOHEMATINE, Hæmatine.

ZOOMAGNETISMUS, Magnetism, animal.

ZOON, Animal.

ZOONOM'IA, from ζῶον, 'animal,' and νόμος, 'law.' The laws which govern the organic actions of animals in general. *Animal Physiology*, *Zoophysiologia*.

ZOOPHYSIOLOGIA, Zoonomia.

ZOOSIS, Animation.

ZOOSPERMES, Spermatozoa.

ZOOT'OMY, from ζῶον, 'an animal,' and τέμνω, 'I cut.' *Theriot'omy*, *Anatom'ia compar'ia*, *Comparative Anatomy*. The anatomy of animals.

ZOPYRON, Fomites.

ZOSTER, Herpes zoster.

ZOSTERA MARINA, Pila marina.

ZOZAR, Saccharum.

ZUCARO, Saccharum.

ZUCHAR, Saccharum.

ZUCHARUM, Saccharum.

ZUCHRA, Saccharum.

ZULAPIUM, Julep.

ZYGOMA, Malæ os.

ZYGOMATIC, *Zygomat'icus*. That which relates to the *zygoma* or cheek bone.

ZYGOMATIC FOSSA is the space included between the posterior margin of the outer ala of the pterygoid process and the crista, which descends from the malar tuberosity to the superior alveolar margin.

ZYGOMATIC PROCESS, *Malar process*, *Jugal process*, arises from the outer surface of the temporal bone, by two roots; one of which is transverse, (*Condyle du temporal*, Ch.) and the other longitudinal: between them is the glenoid cavity. The process passes forwards, and

is articulated with the posterior angle of the os malæ, with which it forms a bony bridge, called the *Zygomat'ic arch*, (F.) *Arcade Zygomatique*. The cavity, beneath this bridge, is sometimes called *Zygoma*.

ZYGOMATIC MUSCLES are two in number. 1. The *Zygomat'icus major*, *Zygomato-labial*, (Ch.) *Distort'or Oris*, (F.) *Muscle grand zygomatique*, which is situate obliquely at the fore part and sides of the face. It is a small, rounded muscle; arises from the outer surface of the os malæ, and is inserted at the commissure of the lips, which it raises and draws outwards. It acts principally in laughing. 2. The *Zygomat'icus minor*, *Petit Zygomato-labial*, (Ch.) (F.) *Petit Zygomatique*, does not always exist. It is situate on the inner side of the last; arises from the outer surface of the os malæ, and is inserted at the corner of the mouth, or rather into the upper lip, which it raises and draws outwards.

ZYGOMATIC SUTURE is placed between the zygomatic parts of the temporal and cheek bones; and slants obliquely downwards and backwards.

ZYGOMATIQUE GRAND, *Zygomat'icus major*—z. *Petit*, *Zygomat'icus minor*.

ZYGOMATO-LABIAL, *Zygomat'icus major*—z. *Labial*, *petit*, *Zygomat'icus major*—z. *Maxillaire*, *Masseter*—z. *Oriculaire*, *Anterior auris*.

ZYGOPHYLLUM FAGABO, (F.) *Fabagelle*. A Syrian and Mauritanic plant, possessed of an acrid and bitter taste. It has vermifuge properties. The Arabs believe that the recently expressed juice of the *V. Zygo-phyl-lum simplex* is capable of removing specks from the cornea.

ZYME, Ferment.

ZYMOMA, Ferment.

ZYMOSIS, Fermentation.

ZYTHOGALA, Posset.

ZYTOS, Cerevisia.

THE END.

TO THE MEDICAL PROFESSION.

LEA AND BLANCHARD present a condensed list of Books published and preparing for publication by them, and would refer to the other pages of their catalogue for a more detailed account. The prices, and all other information in relation to them, will be given on application, free of postage. Being extensively engaged in the publication of Medical and Scientific works, it will be their effort to furnish them at prices lower than formerly, and as low as they can be afforded consistent with correct and well-executed editions. The latest editions will always be furnished; and, to their present extensive list, they will add, from time to time, such other good works as the wants of the profession may call for. Their publications may be found at all the principal Bookstores throughout the Union.

Anatomical Atlas, by Smith and Horner, imperial 8vo., nearly 650 figures.
 Arnot's Elements of Physics, new edition, in 1 vol. 8vo., 4-4 closely printed pages.
 American Medical Journal, published quarterly at \$5 a year.
 Abercrombie on the Stomach, 1 vol. 8vo., 320 pages.
 Abercrombie on the Brain, a new edition, 1 vol. 8vo., 324 pages.
 Alison's Outlines of Pathology, in 1 vol. 8vo., 420 pages.
 Ashwell on the Diseases of Females, complete in one large vol. 8vo.
 Andral on the Blood, 120 pages, 8vo.
 Bird's Natural Philosophy, 1 vol. 8vo., preparing.
 Budd on the Liver, 1 vol. 8vo., preparing.
 Bell on the Teeth, with plates, 1 vol. 8vo., 351 pages.
 Backland's Geology and Mineralogy, 2 vols. 8vo., with numerous plates and maps.
 Berzelius on the Kidneys and Urine, 1 vol. small 8vo., 179 pages.
 Bridgewater Treatises, with numerous illustrations, 7 vols. 8vo., 32-7 pages.
 Bartlett on Fevers, &c., 1 vol. 8vo., 393 pages.
 Bartlett on the Philosophy of Medicine, 1 vol. 8vo., 312 pages.
 Brigham on Mental Excitement and Cultivation, 1 vol. 12mo., 204 pages.
 Billing's Principles of Medicine, 1 vol. 8vo., 304 pages.
 Brodie on Urinary Organs, 1 vol. 8vo., 214 pages.
 Brodie on the Joints, 1 vol. 8vo., 216 pages.
 Brodie's Surgical Lectures, 1 vol. 8vo., at press.
 Chapman on Thoracic and Abdominal Viscera, 1 vol. 8vo., 334 pages.
 Chapman on Fevers, Dropsy, Gout, &c., 1 vol. 8vo., 450 pages.
 Chitt's Medical Jurisprudence, 1 vol. 8vo., 509 large pages.
 Carpenter's Human Physiology, 1 vol. 8vo., 618 pages, with cuts.
 Carpenter's General and Comparative Physiology, 1 vol. 8vo., preparing.
 Carpenter's Vegetable Physiology, 1 vol. 12mo., with cuts, 300 pages.
 Carpenter's Animal Physiology, to be published hereafter.
 Cooper, Sir Astley, his work on Hernia, imperial 8vo., with plates, 425 pages.
 Cooper on Dislocations and Fractures, 1 vol. 8vo., with cuts, 499 pages.
 Cooper on the Testis and Thymus Gland, 1 vol. imperial 8vo., many plates.
 Cooper on the Anatomy and Diseases of the Breast, 1 vol. 8vo., plates, at press.
 Condie on Diseases of Children, 1 vol. 8vo., 651 pages.
 Costello's Cyclopædia of Practical Surgery, to be published hereafter.
 Churchill on Females, 3d American edition, 1 vol. 8vo., 572 large pages.
 Churchill's Theory and Practice of Midwifery, 1 vol. 8vo., 519 pages, with cuts.
 Cyclopædia of Practical Medicine, by Forbes, &c. Edited by Dunglison, in 4 large super-royal vols.
 Carson's Medical Formulary, in preparation.
 Dewees's System of Midwifery, with plates, 10th edit., 660 pages.
 Dewees on Children, 8th edition, 642 pages.
 Dewees on Females, with plates, 8th edition, 532 pages.
 Dunglison's Physiology, 5th edition, 2 vols. 8vo., 1304 pages, with 300 cuts.
 Dunglison's Therapeutics and Materia Medica, a new work, 2 vols. 8vo., 1004 pages.
 Dunglison's Medical Dictionary, 4th edition, 1 vol. 8vo., 771 very large pages.
 Dunglison's New Remedies, 5th edition, 1843, 615 pages.
 Dunglison on Human Health, in 1 vol. 8vo., 464 pages.
 Dunglison's Practice of Medicine, 2d edition, 2 vols. 8vo., 1322 pages.
 Dunglison's Medical Student, a new edition, 1 vol. 12mo., 312 pages.
 Drutt's Modern Surgery, 1 vol. 8vo., 534 pages, 2d edition, many cuts.
 Ellis's Medical Formulary, 7th edition, 1 vol. 8vo., 262 pages.

Elliotson's Mesmeric Cases, 8vo., 56 pages.
 Esquirol's Great Work on Insanity, translated by Hunt, 1 vol. 8vo., nearly ready.
 Fownes's Elementary Chemistry, preparing.
 Fergusson's Practical Surgery, 1 vol. 8vo., 629 pages.
 Graham's Chemistry, with cuts, 1 vol. 8vo., 750 pages.
 Goddard's Dissector's Companion, in preparation.
 Gregory's Chemistry, 1 vol. 8vo., preparing.
 Guthrie on the Bladder and Urethra, 1 vol. 8vo., at press.
 Hoblyn's Dictionary of Medical Terms, by Hays, 1 vol. 12mo., at press.
 Harris on the Maxillary Sinus, 1 vol. small 8vo., 165 pages.
 Horner's Special Anatomy, 2 vols. 8vo., 6th edition, 1114 pages.
 Hodge on the Mechanism of Parturition, in 1 vol. 4to., with many plates, (preparing.)
 Hope on the Heart, 1 vol. 8vo., 572 pages.
 Harrison on the Nervous System, 1 vol. 8vo., 292 pages.
 Jones and Todd on the Ear, 1 vol., preparing.
 Kirby on Animals, many plates, 1 vol. 8vo., 519 pages.

NOW AT PRESS,

ESQUIROL'S GREAT WORK ON INSANITY.

MENTAL MALADIES,
CONSIDERED IN RELATION TO
MEDICINE, HYGIENE, AND MEDICAL JURISPRUDENCE.
By **E. ESQUIROL,**

Principal Physician of the "Maison Royale des Aliénés de Charenton," &c. &c.

TRANSLATED, WITH ADDITIONS,
By **E. K. HUNT, M. D.,**
In One Volume, 8vo.

This great work has long been considered as the highest authority on the important points of which it treats. The notes and additions of the Translator, Dr. Hunt, will be numerous and valuable, bringing the scientific and medical parts of the treatise up to the day of publication, and embodying the results of the milder and improved American practice in the treatment of the insane.

NOW READY,

ASHWELL ON THE DISEASES OF FEMALES.

A PRACTICAL TREATISE
ON THE
DISEASES PECULIAR TO WOMEN,
ILLUSTRATED BY CASES

DERIVED FROM HOSPITAL AND PRIVATE PRACTICE.

By **SAMUEL ASHWELL, M. D.,**

Member of the Royal College of Physicians; Obstetric Physician and Lecturer to Guy's Hospital, &c.

WITH ADDITIONS,
By **PAUL BECK GODDARD, M. D.**
In One Vol. 8vo.

CONTENTS.—PART I.—FUNCTIONAL DISEASES.

Introductory Remarks on the Functional Affections of the Female System.—Chlorosis, and Illustrative Cases.—Amenorrhœa, and Illustrative Cases.—Emmenagogues.—Dysmenorrhœa, and Illustrative Cases.—Formulæ of Remedies.—Profuse Menstruation.—Menorrhagia, and Illustrative Cases.—Leucorrhœa, and Illustrative Cases.—Inflammation of the Cervix Uteri, and Illustrative Cases.—Formulæ of Remedies.—Affections attendant on the decline of the Catamenial Function.—Hysteria.—Fritable Uterus or Hysteralgia, and Illustrative Cases.

PART II.—ORGANIC DISEASES.

Of the Organic Diseases of the Internal and External Female Genitals.—General Remarks on the History and Symptoms, Diagnosis, Pathology and Prognosis of the Organic Diseases of the Uterine System.—Of the Tumours of the Walls of the Uterus, characterized by Induration.—On Premature Labour in Pregnancy complicated with Organic Diseases, and Illustrative Cases.—Organic Diseases of the Os and Cervix Uteri.—Congestion of the Uterus.—Acute Metritis.—Chronic Metritis.—Cancer of the Uterus, and Illustrative Cases.—Simple Ulceration of the Cervix and Os Uteri.—Corroding Ulcer of the Uterus.—Cauliflower Excrecence of the Uterus.—Occlusion and Rigidity of the Cervix Uteri, and Illustrative Cases.

PART III.

Organic Diseases of the Mucous Membrane of the Cavity of the Uterus.—Polypus of the Uterus, and illustrative Cases.—Displacements of the Uterus.—Diseases of the Ovaries.—Of the Diseases of the External Organs of Generation in the Female.

APPENDIX.

On the Morbid consequences of undue Lactation, with Illustrative Cases.—Case of Pregnancy complicated with Abdominal Tumours.—Induction of Premature Labour, &c. &c.

A NEW EDITION OF
CHURCHILL ON FEMALES.

THE DISEASES OF FEMALES;
INCLUDING THOSE OF
PREGNANCY AND CHILDBED,

By **FLEETWOOD CHURCHILL, M.D.,**

Author of "Theory and Practice of Midwifery," &c. &c.

THIRD AMERICAN, FROM THE SECOND LONDON EDITION.

With Illustrations. Edited, with Notes,

By **ROBERT M. HUSTON, M. D., &c. &c.**

In One Volume, 8vo.

"In complying with the demand of the profession in this country for a *third edition*, the Editor has much pleasure in the opportunity thus afforded of presenting the work in its more perfect form. All the additional references and illustrations contained in the English copy, are retained in this."

A MAGNIFICENT AND CHEAP WORK.
SMITH & HORNER'S ANATOMICAL ATLAS.

Just Published, Price Five Dollars in Parts.

—
AN
ANATOMICAL ATLAS
ILLUSTRATIVE OF THE STRUCTURE OF THE HUMAN BODY.

BY HENRY H. SMITH, M.D.,

Fellow of the College of Physicians, &c.

UNDER THE SUPERVISION OF

WILLIAM E. HORNER, M.D.,

Professor of Anatomy in the University of Pennsylvania.

In One large Volume, Imperial Octavo.

This work is but just completed, having been delayed over the time intended by the great difficulty in giving to the illustrations the desired finish and perfection. It consists of five parts, whose contents are as follows:

PART I. The Bones and Ligaments, with one hundred and thirty engravings.

PART II. The Muscular and Dermoid Systems, with ninety-one engravings.

PART III. The Organs of Digestion and Generation, with one hundred and ninety-one engravings.

PART IV. The Organs of Respiration and Circulation, with ninety-eight engravings.

PART V. The Nervous System and the Senses, with one hundred and twenty-six engravings.

Forming altogether a complete System of Anatomical Plates, of nearly

SIX HUNDRED AND FIFTY FIGURES,

executed in the best style of art, and making one large imperial octavo volume. Those who do not want it in parts can have the work bound in extra cloth or sheep at an extra cost.

This work possesses novelty both in the design and the execution. It is the first attempt to apply engraving on wood, on a large scale, to the illustration of human anatomy, and the beauty of the parts issued induces the publishers to flatter themselves with the hope of the perfect success of their undertaking. The plan of the work is at once novel and convenient. Each page is perfect in itself, the references being immediately under the figures, so that the eye takes in the whole at a glance, and obviates the necessity of continual reference backwards and forwards. The cuts are selected from the best and most accurate sources; and, where necessary, original drawings have been made from the admirable Anatomical Collection of the University of Pennsylvania. It embraces all the late beautiful discoveries arising from the use of the microscope in the investigation of the minute structure of the tissues.

In the getting up of this very complete work, the publishers have spared neither pains nor expense, and they now present it to the profession, with the full confidence that it will be deemed all that is wanted in a scientific and artistic point of view, while, at the same time, its very low price places it within the reach of all.

It is particularly adapted to supply the place of skeletons or subjects, as the profession will see by examining the list of plates now annexed.

—
“These figures are well selected, and present a complete and accurate representation of that wonderful fabric, the human body. The plan of this Atlas, which renders it so peculiarly convenient for the student, and its superb artistical execution, have been already pointed out. We must congratulate the student upon the completion of this atlas, as it is the most convenient work of the kind that has yet appeared; and, we must add, the very beautiful manner in which it is ‘got up’ is so creditable to the country as to be flattering to our national pride.”—*American Medical Journal.*

“This is an exquisite volume, and a beautiful specimen of art. We have numerous Anatomical Atlases, but we will venture to say that none equal it in cheapness, and none surpass it in faithfulness and spirit. We strongly recommend to our friends, both urban and suburban, the purchase of this excellent work, for which both editor and publisher deserve the thanks of the profession.”—*Medical Examiner.*

“We would strongly recommend it, not only to the student, but also to the working practitioner, who, although grown rusty in the toils of his harness, still has the desire, and often the necessity, of refreshing his knowledge in this fundamental part of the science of medicine.”—*New York Journal of Medicine and Surg.*

“The plan of this Atlas is admirable, and its execution superior to any thing of the kind before published in this country. It is a real labour-saving affair, and we regard its publication as the greatest boon that could be conferred on the student of anatomy. It will be equally valuable to the practitioner, by affording him an easy means of recalling the details learned in the dissecting room, and which are soon forgotten.”—*American Medical Journal.*

“It is a beautiful as well as particularly useful design, which should be extensively patronized by physicians, surgeons and medical students.”—*Boston Med. and Surg. Journal.*

“It has been the aim of the author of the Atlas to comprise in it the valuable points of all previous works, to embrace the latest microscopical observations on the anatomy of the tissues, and by placing it at a moderate price to enable all to acquire it who may need its assistance in the dissecting or operating room, or other field of practice.”—*Western Journal of Med. and Surgery.*

“These numbers complete the series of this beautiful work, which fully merits the praise bestowed upon the earlier numbers. We regard all the engravings as possessing an accuracy only equalled by their beauty, and cordially recommend the work to all engaged in the study of anatomy.”—*New York Journal of Medicine and Surgery.*

“A more elegant work than the one before us could not easily be placed by a physician upon the table of his student.”—*Western Journal of Medicine and Surgery.*

“We were much pleased with Part I, but the Second Part gratifies us still more, both as regards the attractive nature of the subject, (The Dermoid and Muscular Systems,) and the beautiful artistical execution of the illustrations. We have here delineated the most accurate microscopic views of some of the tissues, as, for instance, the cellular and adipose tissues, the epidermis, rete mucosum and cutis vera, the sebaceous and perspiratory organs of the skin, the perspiratory glands and hairs of the skin, and the hair and nails. Then follows the general anatomy of the muscles, and, lastly, their separate definitions. We would recommend this Anatomical Atlas to our readers in the very strongest terms.”—*New York Journal of Medicine and Surgery.*

 412 Side view of the thyroid cartilage.
 413 Posterior of the arytenoid cartilage.
 414 Anterior of the arytenoid cartilage.
 415 Epiglottis cartilage. 416 Cricoid cartilage.
 417 Ligaments of the larynx.
 418 Side view of the same.
 419 The thyroid gland.
 420 Internal surface of the larynx.
 421 Crico-thyroid muscles.
 422 Crico-arytenoid muscles.
 423 Articulations of the larynx.
 424 Vertical section of the larynx.
 425 The vocal ligaments. 426 Thymus gland.
 427 Front view of the lungs.
 428 Back view of the lungs.
 429 The trachea and bronchia.
 430 Lungs, heart, &c.
 431 First appearance of the blood-vessels.
 432 Capillary vessels magnified.
 433 Another view of the same.
 434 Blood globules.
 435 Another view of the same.
 436 The mediastina.
 437 Parenchyma of the lung.
 438 The heart and pericardium.
 439 Anterior view of the heart.
 440 Posterior view of the heart.
 441 Anterior view of its muscular structure.
 442 Posterior view of the same.
 443 Interior of the right ventricle.
 444 Interior of the left ventricle.
 445 Mitral valve, the size of life.
 446 The auriculo-ventricular valves.
 447 Section of the ventricles.
 448 The arteries from the arch of the aorta.
 449 The arteries of the neck, the size of life.
- 450 The external carotid artery.
 451 A front view of arteries of head and neck.
 452 The internal maxillary artery.
 453 Vertebral and carotid arteries with the aorta.
 454 Axillary and brachial arteries.
 455 The brachial artery.
 456 Its division at the elbow.
 457 One of the anomalies of the brachial artery.
 458 Radial and ulnar arteries.
 459 Another view of the same.
 460 The arcus sublimis and profundus.
 461 The aorta in its entire length.
 462 Arteries of the stomach and liver.
 463 Superior mesenteric artery.
 464 Inferior mesenteric artery.
 465 Abdominal aorta.
 466 Primitive iliac and femoral arteries.
 467 Perineal arteries of the male.
 468 Position of the arteries in the inguinal canal.
 469 Internal iliac artery. 470 Femoral artery.
 471 Gluteal and ischiatic arteries.
 472 Branches of the ischiatic artery.
 473 Popliteal artery.
 474 Anterior tibial artery.
 475 Posterior tibial artery.
 476 Superficial arteries on the top of the foot.
 477 Deep-seated arteries on the top of the foot.
 478 Posterior tibial artery at the ankle.
 479 The plantar arteries.
 480 Arteries and veins of the face and neck.
 481 Great vessels from the heart.
 482 External jugular vein.
 483 Lateral view of the vertebral sinuses.
 484 Posterior view of the vertebral sinuses.
 485 Anterior view of the vertebral sinuses.
 486 Superficial veins of the arm.
 487 The same at the elbow.

488 The veins of the hand.
489 The great veins of the trunk.
490 Positions of the arteries and veins of the trunk.
491 The venæ cavæ. 492 The vena portarum.
493 Deep veins of the back of the leg.
494 Positions of the veins to the arteries in the arm. 495 Superficial veins of the thigh.
496 Saphena vein.
497 Superficial veins of the leg.
498 Lymphatics of the upper extremity.

- Fig.
499 The lymphatics and glands of the axilla.
500 The femoral and aortic lymphatics.
501 The lymphatics of the small intestines.
502 The thoracic duct.
503 The lymphatics of the groin.
504 Superficial lymphatics of the thigh.
505 Lymphatics of the jejunum.
506 Deep lymphatics of the thigh.
507 Superficial lymphatics of the leg.
508 Deep lymphatics of the leg.

PART V.—THE NERVOUS SYSTEM AND SENSES.

- 509 Dura mater cerebri and spinalis.
510 Anterior view of brain and spinal marrow.
511 Anterior view of the spinal marrow, &c.
512 Lateral view of the spinal marrow, &c. &
513 Posterior view of the spinal marrow, &c.
514 Decussation of Mitischelli.
515 Origins of the spinal nerves.
516 Anterior view of spinal marrow and nerves.
517 Posterior view of spinal marrow and nerves.
518 Anterior spinal commissure.
519 Posterior spinal commissure.
520 Transverse section of the spinal marrow.
521 Dura mater and sinuses.
522 Sinuses laid open.
523 Sinuses at the base of the cranium.
524 Pons Varolii, cerebellum, &c.
525 Superior face of the cerebellum.
526 Inferior face of the cerebellum.
527 Another view of the cerebellum.
528 View of the arbor vitæ, &c.
529 Posterior view of the medulla oblongata.
530 A vertical section of the cerebellum.
531 Another section of the cerebellum.
532 Convolutions of the cerebrum.
533 The cerebrum entire.
534 A section of its base.
535 The corpus callosum entire.
536 Diverging fibres of the cerebrum, &c.
537 Vertical section of the head.
538 Section of the corpus callosum.
539 Longitudinal section of the brain.
540 View of a dissection by Gall.
541 The commissures of the brain.
542 Lateral ventricles.
543 Corpora striata-fornix, &c.
544 Fifth ventricle and lyra.
545 Another view of the lateral ventricles.
546 Another view of the ventricles.
547 Origins of the 4th and 5th pairs of nerves.
548 The circle of Willis.
549 A side view of the nose.
550 The nasal cartilages.
551 Bones and cartilages of the nose.
552 Oval cartilages, &c.
553 Schneiderian membrane.
554 External parietes of the left nostril.
555 Arteries of the nose.
556 Pituitary membrane injected.
557 Posterior nares. 558 Front view of the eye.
559 Side view of the eye.
560 Posterior view of the eyelids, &c.
561 Glandulæ palpebrarum.
562 Lachrymal canals.
563 Muscles of the eyeball.
564 Side view of the eyeball.
565 Longitudinal section of the eyeball.
566 Horizontal section of the eyeball.
567 Anterior view of a transverse section.
568 Posterior view of a transverse section.
569 Choroid coat injected.
570 Veins of the choroid coat.
571 The iris. 572 The retina and lens.
573 External view of the same.
574 Vessels in the conjunctiva.
575 Retina, injected and magnified.
576 Iris, highly magnified.
577 Vitreous humour and lens.
578 Crystalline adult lens.
579 Lens of the fœtus, magnified.
580 Side view of the lens.
581 Membrana pupillaris.
582 Another view of the same.
583 Posterior view of the same.
584 A view of the left ear.
585 Its sebaceous follicles.
586 Cartilages of the ear.
587 The same with its muscles.
588 The cranial side of the ear.
589 Meatus auditorius externus, &c.
590 Labyrinth and bones of the ear.
591 Full view of the malleus. 592 The incus.
593 Another view of the malleus.
594 A front view of the stapes.
595 Magnified view of the stapes.
596 Magnified view of the incus.
597 Cellular structure of the malleus.
598 Magnified view of the labyrinth.
599 Natural size of the labyrinth.
600 Labyrinth laid open and magnified.
601 Labyrinth, natural size.
602 Labyrinth of a fœtus.
603 Another view of the same.
604 Nerves of the labyrinth.
605 A view of the vestibule, &c.
606 Its soft parts, &c.
607 An ampulla and nerve.
608 Plan of the cochlea.
609 Lamina spiralis, &c.
610 The auditory nerve.
611 Nerve on the lamina spiralis.
612 Arrangement of the cochlea.
613 Veins of the cochlea, highly magnified.
614 Opening of the Eustachian tube in the throat.
615 Portio mollis of the seventh pair of nerves.
616 The olfactory nerves.
617 The optic and seven other pairs of nerves.
618 Third, fourth and sixth pairs of nerves.
619 Distribution of the fifth pair.
620 The facial nerve.
621 The hypo-glossal nerves.
622 A plan of the eighth pair of nerves.
623 The distribution of the eighth pair.
624 The great sympathetic nerve.
625 The brachial plexus.
626 Nerves of the front of the arm.
627 Nerves of the back of the arm.
628 Lumbar and ischiatic nerves.
629 Posterior branches to the hip, &c.
630 Anterior crural nerve.
631 Anterior tibial nerve.
632 Branches of the popliteal nerve.
633 Posterior tibial nerve on the leg.
634 Posterior tibial nerve on the foot.

NOW READY.
TAYLOR'S MEDICAL JURISPRUDENCE.

MEDICAL JURISPRUDENCE,

By **ALFRED S. TAYLOR,**

Lecturer on Medical Jurisprudence and Chemistry at Guy's Hospital, &c.

With numerous Notes and Additions, and references to American practice and law.

By **R. E. GRIFFITH, M. D.**

In One Volume, 8vo.

Contents.—POISONING—WOUNDS—INFANTICIDE—DROWNING—HANGING—STRANGULATION—SUFFOCATION—LIGHTNING—COLD—STARVATION—RAPE—PREGNANCY—DELIVERY—BIRTH—INHERITANCE—LEGITIMACY—INSANITY, &c. &c.

"The promise of the first parts was so full, and the ability displayed was so unquestionable, that all who felt jealous of the honour of our national medical literature hailed with delight the appearance of a comprehensive and original work of English growth, on one of the most important and difficult departments of our science. Everywhere, indeed, we find evidences of extensive reading and laborious research; the copious literature, both of France and Germany, on the subject of Medical Jurisprudence, is laid under frequent contribution, and we have the pleasure of meeting with the accumulated stores of science and experience on this branch of knowledge, it may be said of the whole world, condensed and made accessible in this admirable volume. It is, in fact, not only the fullest and most satisfactory book we have ever consulted on the subject of which it treats, but it is also one of the most masterly books we have ever perused. So much precise individual knowledge, under guidance of judgment and critical powers of so high an order, as meet us in every page of Mr. Taylor's work, we have rarely encountered."—*London Med. Gazette*.

"We recommend Mr. Taylor's work as the ablest, most comprehensive, and, above all, the most practically useful book which exists on the subject of legal medicine. Any man of sound judgment, who has mastered the contents of Taylor's 'Medical Jurisprudence,' may go into a court of law with the most perfect confidence of being able to acquit himself creditably."—*Medico-Chirurgical Review*.

"The work of Mr. Taylor may be regarded as a full systematic treatise on the subject of Medical Jurisprudence. It certainly presents a very excellent view, which may be named both full and condensed, of the present state of knowledge on Medical Jurisprudence. The author has illustrated many of the doubtful points of the science by good and interesting cases. He has, in general, shown much judgment in the examination of the difficult and ambiguous cases; but the whole treatise is so ably prepared that we have no hesitation in recommending it as a very useful guide to the student."—*Edinburgh Med. and Surg. Journal*.

"The most elaborate and complete work that has yet appeared. It contains an immense quantity of cases, lately tried, which entitles it to be considered now what Beck was in his day."—*Dublin Medical Journal*.

"Medical Jurisprudence ought to be a prominent branch of the studies of every lawyer; but what books shall they read? We have seen none so calculated to serve the purpose of a text-book as this manual. Mr. Taylor possesses the happy art of expressing himself on a scientific topic in intelligible language. Its size fits it to be a circuit companion."—*Law Times*.

ALSO, NOW READY,
MILLER'S PRINCIPLES OF SURGERY.

THE PRINCIPLES OF SURGERY.

By **JAMES MILLER, F. R. S. E., F. R. C. S. E.,**

Professor of Surgery in the University of Edinburgh, &c.

In One neat 8vo. Volume,

To match in size with Fergusson's Operative Surgery.

"No one can peruse this work without the conviction that he has been addressed by an accomplished surgeon, endowed with no mean literary skill or doubtful good sense, and who knows how to grace or illumine his subjects with the later lights of our rapidly advancing physiology. The book deserves a strong recommendation, and must secure itself a general perusal."—*Medical Times*.

BARTLETT'S PHILOSOPHY OF MEDICINE.

AN ESSAY ON
THE PHILOSOPHY OF MEDICAL SCIENCE.

IN TWO PARTS.

"I trust that I have got hold of my pitcher by the right handle."—*John Joachim Becher.*

By **ELISHA BARTLETT, M. D.,**

Professor of the Theory and Practice of Medicine in the University of Maryland.

In One neat Octavo Volume.

"We have not room in the present number of our journal, for such a notice of this philosophical and elegant work, as its merits justly demand. It is evidently destined to create quite a sensation in the medical world; and we shall therefore give an extended analysis of its contents, accompanied by some comments in our January number. In the mean time, we advise all our readers to purchase and carefully read it."—*N. Y. Journal of Medicine*.

 Gentlemen who receive this Catalogue would much oblige the Publishers, if, after reading it, they would hand it, or the following eight pages, to their friends.

THE EXPLORING EXPEDITION.

LEA AND BLANCHARD,
PHILADELPHIA,

ARE PREPARING FOR PUBLICATION, AND WILL SHORTLY ISSUE,

THE NARRATIVE OF THE UNITED STATES EXPLORING EXPEDITION DURING THE YEARS

1838, 1839, 1840, 1841, AND 1842.

By CHARLES WILKES, U. S. N.,

COMMANDER OF THE EXPEDITION, ETC., ETC.

In Five Octavo Volumes, of about 2500 Pages; with over 300 Cuts,
and Maps.

As the history of the only Expedition yet commissioned by our Government to explore foreign countries, this work must present features of unusual interest to every American. Much curiosity has been excited respecting this enterprise, from the length of time during which it was in preparation, and from the various conflicting reports which were circulated during its protracted absence.

The Squadron—six vessels—sailed from Norfolk in August, 1838, and after making important observations on the voyage, via Madeira, arrived at Rio, when their investigations were successfully prosecuted. Sailing thence for Cape Horn, they examined the commercial capabilities of Rio Negro. Arriving at Cape Horn, two of the vessels were dispatched to investigate Palmer's Land, and other Antarctic Regions; whence, after encountering great danger, they returned safely, and sailed with the whole Squadron for Valparaiso and Callao. After making important observations on the West Coast of South America, regarding the commerce, political history, &c., of that portion of America, they sailed for Sydney, cruising among the numerous groups of islands of the Pacific Archipelago, where the results were peculiarly important, as connected with the commerce and Whale Fishery of our country, as well as the aid they were able to bring to the various missionary establishments engaged in the introduction of Christianity and civilization. After remaining some time at Sydney, pursuing important investigations, they sailed for the Antarctic Regions, leaving behind them the corps of Naturalists to explore that singular country, the observations on which will be found of great interest. The Squadron then proceeding South, made the brilliant discovery of the ANTARCTIC CONTINENT, on the 19th January, 1840, in 166° east longitude, along which they coasted, in a westerly direction, to 95° east, a distance of 1500 miles. On the return of the vessels, they touched at New Zealand, when the Naturalists were again taken on board. They next proceeded to the Friendly Islands of Cook, the Feejee Group, and reached the Sandwich Islands late in the fall, which precluded them from going to the North-West Coast that season. The Paumotu, Samoan, and King's Mills group of islands were visited, and a particular examination made of the Island of Hawaii, its interesting craters and volcanic eruptions. In the spring, the Squadron proceeded to the Oregon Territory, now exciting so much interest in a political point of view; it was thoroughly examined in regard to its commercial and agricultural prospects, &c. Here the Peacock was lost on the dangerous bar of the Columbia river. After the Oregon, Upper California was examined. The Expedition now returned to the Sandwich Islands, and thence sailed for Manila and Singapore, touching at the Philippine Islands, and passing through the Sooloo Sea, the channels of which being correctly ascertained, will greatly benefit the important navigation to China.

Touching at the Cape of Good Hope and Rio, this important and successful Exploring Expedition finally, on the 10th of June, 1842, arrived at New York, after an absence of three years and ten months.

During the whole Voyage, every opportunity was taken to procure information, investigate unknown or little frequented parts of those seas now reached by our commerce, and thoroughly to institute scientific investigations of all kinds. To illustrate these, a vast number of drawings and maps have been executed; but the chief objects in view were of a practical nature. Numerous regulations have been made with the rulers of various islands, to secure the safety of our commerce, now daily increasing in those seas. In short, every thing has been done which lay in the power of officers or men to make the Expedition redound to the interest and honour of the Country; and in the volumes to be issued will be found its history and embodiment.

RANKE'S HISTORY OF THE OTTOMAN AND SPANISH EMPIRES.

TRANSLATED FROM THE GERMAN

By **WALTER K. KELLY, Esq.**

In One Part, Paper, at Seventy-five Cents.

This book completes the uniform series of Professor Rankè's Historical Works. When bound with the History of the Popes, this forms the "Sovereigns and Nations of Southern Europe, in the 16th and 17th Centuries."

POSTHUMOUS MEMOIRS OF HIS OWN TIMES;

BY SIR NICHOLAS W. WRAXALL.

In Two Parts, Paper, at 75 cents each, or One Volume Octavo, Cloth.

**NEW LETTERS TO SIR HORACE MANN,
FROM 1760 TO 1785.**

BY HORACE WALPOLE.

In Four Parts, Paper, at One Dollar each, or Two Volumes, Octavo, Extra Cloth.

These volumes comprise letters never before published, and which have but recently been brought to light.

**HISTORY OF THE CRUSADES,
FOR THE RECOVERY AND POSSESSION OF THE HOLY LAND,
BY CHARLES MILLS.**

In One Part, Paper, Price One Dollar.

**THE HISTORY OF CHIVALRY;
OR, KNIGHTHOOD AND ITS TIMES.
BY CHARLES MILLS.**

In One Part, Paper, Price One Dollar. The two works in One Volume, Octavo, Cloth.

L. & B. have also in preparation, for the Library, Horace Walpole's Memoirs of the Reign of George III., of which they have received an early copy—Wraxall's Historical Memoirs of his own Times—Browning's History of the Huguenots—Proctor's History of Italy, and many other valuable and standard works.

They have for sale a few copies of

WALPOLE'S EARLY LETTERS IN 4 Vols. 8vo.

GRAHAME'S UNITED STATES.

LEA & BLANCHARD WILL SHORTLY PUBLISH

**THE HISTORY OF THE UNITED STATES
OF NORTH AMERICA,**

FROM THE PLANTATION OF THE BRITISH COLONIES TILL THEIR REVOLT
AND DECLARATION OF INDEPENDENCE.

By **JAMES GRAHAME, Esq.**

In Four beautiful Octavo Volumes.

This work cost the author twelve years of unremitting toil and labor, during which he examined thoroughly all the English and European Libraries which could throw light on his subject. It was published in 1836, and met with but little approbation from the English public on account of the strong feeling which it manifests in favour of the colonies. Mr. Grahame continued revising and emending it till his death in 1842, shortly after which all his MSS. and papers were sent by his son to Harvard College. President Quincy, Judge Story, Professor Jared Sparks, and other gentlemen connected with the University have accordingly undertaken the task of revising an edition of the work to be presented to the American public in a style as nearly as possible resembling that of the English edition.

TAYLOR'S MEDICAL JURISPRUDENCE may be had bound
in Law Sheep for the legal profession. See Advertisement at page 12.

MISCELLANEOUS BOOKS.

LEA & BLANCHARD publish, and have for sale, the following valuable works in various departments of Literature and Science.

- American Ornithology; by Prince Charles Buonaparte. In 4 vols. folio, half-bound.
- Arnot's Elements of Physics, a new edition. In 1 vol. 8vo., sheep.
- Boz's Complete Works. In 7 vols. 8vo., extra cloth, with numerous plates.
- Same work, common edition, in paper.
- Benthamiana; Extracts from Bentham, with a Memoir and Essay on his Theories. In 1 vol.
- Browne's Religio Medici, and its sequel Christian Morals. In 1 vol. 8vo., extra cloth.
- Bulwer's Miscellanies, 2 vols. 12mo., cloth.
- Bolmar's French Series, consisting of—A Selection of One Hundred Perrin's Fables, with a Key to the Pronunciation; A Series of Colloquial Phrases; The First Eight Books of Fénelon's Telemachus; Key to the same; A Treatise on all the French Verbs, Regular and Irregular. The whole forming 5 small volumes, halfbound, to match.
- Butler's Atlas of Ancient Geography. In 1 vol. large 8vo., half-bound, coloured.
- Butler's Geographia Classica; new and revised edition, 1 vol. 8vo.
- Bridgewater Treatises; the whole complete in 7 vols. 8vo., various bindings; containing—Roget's Animal and Vegetable Physiology, in 2 vols., with many cuts; Kirby on the History, Habits and Instincts of Animals, 1 vol., with plates; Prout on Chemistry; Chalmers on the Moral Condition of Man; Whewell on Astronomy; Bell on the Hand; Kidd on the Physical Condition of Man; Buckland's Geology, 2 vols., with numerous plates and maps. Of these may be had separately—Kirby on Animals, 1 vol. 8vo.; Roget's Animal and Vegetable Physiology, 2 vols. 8vo.; Buckland's Geology, 2 vols. 8vo.
- Brougham on the French Revolution. In 1 vol. 12mo., cloth or paper.
- Brougham's Historical Sketches of Statesmen who flourished under George III. Complete in 5 vols. 12mo., extra cloth.
- Speeches, selected, with Historical Introductions by himself. In 2 large 8vo. vols., extra cloth or law sheep.
- Barnaby Rudge, by "Boz," fine edition, in 1 vol. 8vo., extra cloth, with plates and numerous cuts.
- Same work, common edition, in paper, with cuts. Price only 50 cents.
- Brewster's Treatise on Optics, with numerous cuts; Edited, with an appendix, by A. D. Bache, L.L.D. In 1 vol. 12mo., half-bound.
- Babbage's "Fragment," the 9th Bridgewater Treatise, 1 vol. 8vo.
- Complete Cook; edited by Sanderson. 1 vol. 12mo., sewed; price only 25 cents.
- Complete Confectioner; by Parkinson. 1 vol. 12mo., sewed; price only 25 cents.
- N.B.—These two useful little works may be had in one neat 12mo. volume, done up in cloth for 50 cents.
- Complete Florist; 1 vol. 12mo., paper: 25 cents.
- Complete Gardener, do. price 25 cents.
- Complete Gardener and Florist; 1 vol., cloth: 50 cents.
- Curiosity Shop; by Boz. In 1 vol. 8vo., extra cloth, with over 100 plates and cuts.
- Same work, cheap edition, paper, numerous cuts; price, 50 cents.
- Campbell's Complete Poetical Works, with a Memoir, by Irving; and an Essay, by Jeffreys; with a portrait and numerous illustrations. In 1 vol. crown 8vo., beautifully done up in cloth gilt or extra white calf.
- Cooper's Naval History of the United States. In 2 vols. 8vo., with 2 maps, cloth, second edition.
- Switzerland, 2 vols. 12mo., paper.
- Novels and Tales. In 23 vols., sheep gilt, 12mo., or 47 vols., paper.
- Ned Myers, 1 vol., paper: 37½ cents.
- Wyandotté, 2 vols., paper: 50 cents.
- Wing-and-Wing, 2 vols., paper: 50 cts.
- The Spy, 2 vols., paper: 50 cents.
- The Pioneers; 2 vols. do. do.
- The Pilot, a Tale of the Sea; do. do. do.
- The Prairie; 2 vols. do. do.
- Lionel Lincoln, 2 vols. do. do.
- Last of the Mohicans; 2 vols., paper.
- The Red Rover; 2 vols. do. do.
- Wept of the Wish-ton-Wish; 2 vols.
- Water Witch, 2 vols. do. do.
- The Bravo, 2 vols., paper: do.
- The Travelling Bachelor, 2 vols. do.
- The Heidenmauer, 2 vols. do.
- Peregrination; 2 vols. do. do.
- Homeward Bound, 2 vols. do.
- Home as Found; 2 vols. do. do.
- Headman, 2 vols. do. do.
- Monikins, 2 vols. do. do.
- The Pathfinder, 2 vols. do. do.
- Mercedes of Castile; 2 vols., paper: 50 cents.
- The Deerslayer, 2 vols. do. do.
- The Two Admirals; 2 vols. do. do.
- Sea Tales, including The Pilot, Red Rover, Water Witch, Homeward Bound, Two Admirals, and Wing and Wing. In 6 vols. 12mo., cloth.
- Leather Stocking Tales, including The Prairie, The Pioneers, Last of the Mohicans, Pathfinder, and Deerslayer. In 5 vols. 12mo., extra cloth.
- Carey's Essay on Wages. In 1 vol. 8vo., cloth.
- Carey on the Laws of Wealth; 3 vols. 8vo., cloth.
- on the Credit System.
- Calavar, by Dr. Bird; 2 vols. 12mo., cloth.
- Clater's Every Man his own Horse-Doctor, now at press; 1 vol. 12mo.; a cheap work.
- Davidson, Margaret, (Memoirs and Writings of,) by Irving. In 1 vol. 12mo., extra cloth, or paper, 50 cents.
- Lucretia, Poetical Remains, by Miss Sedgwick. In 1 vol. 12mo., extra cloth, or in paper, 50 cents.
- Mrs., Selections from the Writings of. In 1 vol. 12mo., extra cloth, or in paper, 50 cents.
- Destiny, or The Chief's Daughter, a Novel, by Miss Ferrier. In 1 vol. 12mo., paper; price 40 cents.
- Dick Turpin the Highwayman, or Rookwood, by William Harrison Ainsworth: 8vo., paper, with illustrations: price 25 cents.
- The ENCYCLOPEDIA OF GEOGRAPHY; comprising a complete description of the Earth, Physical, Statistical, Commercial and Political; exhibiting its relation to the Heavenly bodies,—its physical structure—the natural history of each country,—and the Industry, Commerce, Political Institutions, and Civil and Social State

WATSON'S PRACTICE OF MEDICINE.

L. & B. HAVE LATELY PUBLISHED

LECTURES

ON THE PRINCIPLES AND PRACTICE OF PHYSIC.

DELIVERED AT KING'S COLLEGE, LONDON.

By THOMAS WATSON, M.D.,

Fellow of the Royal College of Physicians, Physician to the Middlesex Hospital, &c. &c.

In One large Octavo Volume, of over *nine hundred* unusually large pages, strongly bound in leather, containing *Ninety Lectures*. Offered to the public at a very low price.

This volume, although so short a time before the medical public of this country, has met with almost unprecedented approbation from all classes of the profession, teachers, practitioners and students, in every section of the country, and has been favourably noticed by all the medical journals.

The publishers submit the following notice of its approval from the Professor of the University of Pennsylvania, and from some of the journals, foreign and domestic, which have borne testimony to its excellence.

Phila., Sept. 27th, 1844.

Watson's Practice of Physic, in my opinion, is among the most comprehensive works on the subject extant, replete with curious and important matter, and written with great perspicuity and felicity of manner. As calculated to do much good, I cordially recommend it to that portion of the profession in this country who may be influenced by my judgment.

N. CHAPMAN, M.D.,

Professor of the Practice and Theory of Medicine in the University of Pennsylvania.

"We know of no other work better calculated for being placed in the hands of the student, and for a text book, and as such we are sure it will be very extensively adopted. On every important point, the author seems to have posted up his knowledge to the day."—*American Medical Journal*.

"In the Lectures of Dr. Watson, now republished here in a large and closely printed volume, in small type, of nearly a thousand pages, we have a body of doctrine and practice of medicine well calculated, by its intrinsic soundness and correctness of style, to instruct the student and younger practitioner, and improve members of the profession of every age."—*Bulletin of Medical Science*.

"We know not, indeed, of any work of the same size that contains a greater amount of useful and interesting matter. We are satisfied, indeed, that no physician, well read and observing as he may be, can rise from its perusal without having added largely to his stock of valuable information."—*Medical Examiner*.

"We regard these lectures as the best exposition of their subjects of any we remember to have read. The author is assuredly master of his art. His has been a life of observation and study, and in this work he has given us the matured results of these mental efforts."—*New Orleans Medical Journal*.

"Open this huge, well-furnished volume where we may, the eye immediately rests on something that carries value on its front. We are impressed at once with the strength and depth of the lecturer's views. He gains on our admiration in proportion to the extent of our acquaintance with his profound researches. Whoever owns this book, will have an acknowledged treasure if the combined wisdom of the highest authorities is appreciated."—*Boston Med. and Surg. Journal*.

"One of the most practically useful books that ever was presented to the student—indeed, a more admirable summary of general and special pathology, and of the

application of therapeutics to diseases, we are free to say has not appeared for very many years. The lecturer proceeds through the whole classification of human ills, *a capite ad calcem*, showing at every step an extensive knowledge of his subject, with the ability of communicating his precise ideas, in a style remarkable for its clearness and simplicity."—*N. Y. Journal of Medicine and Surgery*.

"The style is correct and pleasing, and the matter worth the attention of all practitioners, young and old."—*Western Lancet*.

"We are free to state that a careful examination of this volume has satisfied us that it merits all the commendation bestowed on it in this country and at home. It is a work adapted to the wants of young practitioners, combining, as it does, sound principles and substantial practice. It is not too much to say, that it is a representative of the actual state of medicine as taught and practised by the most eminent physicians of the present day, and as such we would advise every one about embarking in the practice of physic to provide himself with a copy of it."—*Western Journal of Med. and Surgery*.

"The medical literature of this country has been enriched by a work of standard excellence, which we can proudly hold up to our brethren of other countries as a representative of the natural state of British medicine, as professed and practised by our most enlightened physicians. And, for our own parts, we are not only willing that our characters as scientific physicians and skilful practitioners may be deduced from the doctrines contained in this book, but we hesitate not to declare our belief, that for sound, trustworthy principles, and substantial, good practice, it cannot be paralleled by any similar production in any other country. * * * * We would advise no one to set himself down in practice, unprovided with a copy."—*British and Foreign Medical Review*.

WORKS BY PROFESSOR DUNGLISON.

LEA & BLANCHARD publish and have for sale the following valuable Medical Works by Professor Robley Dunglison.

HUMAN PHYSIOLOGY,

WITH UPWARDS OF THREE HUNDRED ILLUSTRATIONS,

By ROBLEY DUNGLISON, M.D.,

PROFESSOR OF THE INSTITUTES OF MEDICINE, &c. IN JEFFERSON MEDICAL COLLEGE, PHILADA.;
ATTENDING PHYSICIAN AND LECTURER ON CLINICAL MEDICINE AT THE PHILADA. MEDICAL HOSPITAL;
SECRETARY TO THE AMERICAN PHILOSOPHICAL SOCIETY, &c. &c.

FIFTH EDITION, GREATLY MODIFIED AND IMPROVED.

IN TWO VOLUMES, OF 1304 LARGE OCTAVO PAGES.

In presenting this new and much improved edition of Professor Dunglison's standard work on Physiology, the Publishers beg to state, that "although only a short time has elapsed since the publication of the fourth edition of this work, the labours of Physiologists have been so numerous, diversified, and important, as to demand material modifications and additions in the present edition, and that no little time and industry have been bestowed by the author to introduce these, and to digest the various materials contained in the *ex professo* treatises, as well as the various Journals of this country and of Europe.

"To this edition nearly ninety wood-cuts have been added to elucidate either topics that had been already treated of in the previous editions, or such as are new in this; most of the old cuts have been retouched, and many replaced by others that are superior. Altogether, the author has endeavoured to make the work a just and impartial record of Physiologic science, and to render it worthy a continuance of that favour which has been so liberally extended to it." The size of the volumes has been materially increased, by the addition of over eighty pages, and the illustrations are far superior to those of any former edition.

THE PRACTICE OF MEDICINE,

OR A TREATISE ON

SPECIAL PATHOLOGY AND THERAPEUTICS.

BY ROBLEY DUNGLISON, M.D.,

CONTAINING

THE DISEASES OF THE ALIMENTARY CANAL, THE DISEASES OF THE CIRCULATORY APPARATUS, DISEASES OF THE GLANDULAR ORGANS, DISEASES OF THE ORGANS OF THE SENSES, DISEASES OF THE RESPIRATORY ORGANS, DISEASES OF THE GLANDIFORM GANGLIONS, DISEASES OF THE NERVOUS SYSTEM, DISEASES OF THE ORGANS OF REPRODUCTION, DISEASES INVOLVING VARIOUS ORGANS, &c. &c.

In Two Volumes, Octavo.

This work has been introduced as a text-book in many of the Medical colleges, and the general favour with which it has been received, is a guarantee of its value to the practitioner and student.

"In the volumes before us, Dr. Dunglison has proved that his acquaintance with the present facts and doctrines, wheresoever originating, is most extensive and intimate, and the judgment, skill, and impartiality with which the materials of the work have been collected, weighed, arranged, and exposed, are strikingly manifested in every chapter. Great care is everywhere taken to indicate the source of information, and under the head of treatment, formulæ of the most appropriate remedies are everywhere introduced. In conclusion, we congratulate the students and junior practitioners of America, on possessing in the present volumes, a work of standard merit, to which they may confidently refer in their doubts and difficulties."—*British and Foreign Medical Review* for July, 1842.

"Since the foregoing observations were written, we have received a second edition of Dunglison's work, a sufficient indication of the high character it has already attained in America, and justly attained."—*British and Foreign Medical Review* for October, 1841.

"We hail the appearance of this work, which has just been issued from the prolific press of Messrs. Lea & Blanchard, of Philadelphia, with no ordinary degree of pleasure. Comprised in two large and closely printed volumes, it exhibits a more full, accurate, and comprehensive digest of the existing state of medicine than any other treatise with which we are acquainted in the English language. It discusses many topics—some of them of great practical importance, which are entirely omitted in the writings of Eberle, Dewees, Hosack, Graves, Stokes, McIntosh, and Gregory; and it cannot fail, therefore, to be of great value, not only to the student, but to the practitioner, as it affords him ready access to information of which he stands in daily need in the exercise of his profession. It has been the desire of the author, well known as one of the most abundant writers of the age, to render his work strictly practical; and to this end he has been induced, whenever opportunity offered, to incorporate the results of his own experience with that of his scientific brethren in America and Europe. To the former, ample justice seems to have been done throughout. We believe this constitutes the seventh work which Professor Dunglison has published within the last ten years; and, when we reflect upon the large amount of labour and reflection which must have been necessary in their preparation, it is amazing how he could have accomplished so much in so short a time."—*Louisville Journal*.

NEW REMEDIES,

PHARMACEUTICALLY AND THERAPEUTICALLY CONSIDERED.

By ROBLEY DUNGLISON, M.D.,

In One Volume, Octavo—over 600 pages, the Fourth Edition.

A NEW EDITION OF
THE STANDARD MEDICAL DICTIONARY.

A DICTIONARY OF MEDICAL SCIENCE:

CONTAINING

A CONCISE ACCOUNT OF THE VARIOUS SUBJECTS AND TERMS, WITH THE FRENCH AND OTHER SYNONYMES, NOTICES OF CLIMATE AND OF CELEBRATED MINERAL WATERS, FORMULÆ FOR VARIOUS OFFICIAL AND EMPIRICAL PREPARATIONS, ETC.

Fourth Edition, Extensively Modified and Improved.

By ROBLEY DUNGLISON, M.D.,

In One Volume, Royal Octavo.

"The present undertaking was suggested by the frequent complaints made by the author's pupils, that they were unable to meet with information on numerous topics of professional inquiry—especially of recent introduction—in the medical dictionaries accessible to them.

"It may, indeed, be correctly affirmed, that we have no dictionary of medical subjects and terms which can be looked upon as adapted to the state of the science. In proof of this the author need but to remark, that the present edition will be found to contain at least two thousand subjects and terms not embraced in the last edition, and to have experienced numerous modifications.

"The author's object has not been to make the work a mere lexicon or dictionary of terms, but to afford, under each, a condensed view of its various medical relations, and thus to render the work an epitome of the existing condition of medical science.

"To execute such a work requires great erudition, unwearied industry, and extensive research; and we know no one who could bring to the task higher qualifications of this description than Professor Dunglison."—*American Medical Journal*.

THERAPEUTICS AND MATERIA MEDICA.

GENERAL THERAPEUTICS AND MATERIA MEDICA,
ADAPTED FOR A MEDICAL TEXT-BOOK.

By ROBLEY DUNGLISON, M.D.,

In Two Volumes, Octavo.

"The subject of Materia Medica has been handled by our author with more than usual judgment. The greater part of treatises on that subject are, in effect, expositions of the natural and chemical history of the substances used in medicine, with very brief notices at all of the indications they are capable of fulfilling, and the general principles of Therapeutics. Dr. Dunglison, very wisely, in our opinion, has reversed all this, and given his principal attention to the articles of the Materia Medica as *medicines*. . . . In conclusion, we strongly recommend these volumes to our readers. No medical student on either side of the Atlantic should be without them."—*Forbes' British and Foreign Medical Review*.

LATELY PUBLISHED,
DUNGLISON ON HUMAN HEALTH.

HUMAN HEALTH;

OR, THE INFLUENCE OF ATMOSPHERE AND LOCALITY, CHANGE OF AIR
AND CLIMATE, SEASONS, FOOD, CLOTHING, BATHING AND
MINERAL SPRINGS, EXERCISE, SLEEP, CORPOREAL
AND INTELLECTUAL PURSUITS, &c. &c. ON
HEALTHY MAN:

CONSTITUTING

ELEMENTS OF HYGIÈNE.

By ROBLEY DUNGLISON, M.D.,

A NEW EDITION WITH MANY MODIFICATIONS AND ADDITIONS.

In One Volume, 8vo.

"We have just received the new edition of this learned work on the 'Elements of Hygiene.' Dr. Dunglison is one of the most industrious and voluminous authors of the day. How he finds time to amass and arrange the immense amount of matter contained in his various works, is almost above the comprehension of men possessing but ordinary talents and industry. Such labour deserves immortality."—*St. Louis Med. and Surg. Journal*.

A NEW EDITION OF
THE MEDICAL STUDENT;
OR, AIDS TO THE STUDY OF MEDICINE.

A REVISED AND MODIFIED EDITION.

By ROBLEY DUNGLISON, M.D.,

In One neat 12mo. Volume.

"In effect, the author's aim is to teach the tyro what he ought to, and how he may study to the best advantage both before and after he has attained the dignity of a medical diploma; and while he gives him much good advice in an agreeable manner and enforced by happy illustrations, he endeavours to simplify his labours by presenting him with 'a glossary of the prefixes, suffixes and radicals of many of the terms legitimately compounded,' of medical technology, a vocabulary of terms used in prescribing and other useful information."—*American Medical Journal*.

THE CYCLOPÆDIA OF PRACTICAL MEDICINE.

TO BE READY IN MARCH.

Forming Four magnificent super-royal Octavo Volumes of about 3200 unusually large double-columned pages, printed on beautiful white paper, with a new and clear type, done up in strong sheep binding, or neat extra cloth; or, in Twenty-four Parts, at Fifty Cents each.

LEA & BLANCHARD ARE NOW ISSUING

THE CYCLOPÆDIA OF PRACTICAL MEDICINE:

COMPRISING

TREATISES ON THE

NATURE AND TREATMENT OF DISEASES,
MATERIA MEDICA AND THERAPEUTICS,
DISEASES OF WOMEN AND CHILDREN,
MEDICAL JURISPRUDENCE, &c. &c.

EDITED BY

JOHN FORBES, M. D., F. R. S.,
ALEXANDER TWEEDIE, M. D., F. R. S.,

AND

JOHN CONOLLY, M. D.

REVISED, WITH ADDITIONS,

By ROBLEY DUNGLISON, M. D.

This work is printed on good paper with a new and clear type, and forms
FOUR VERY LARGE SUPER-ROYAL OCTAVO VOLUMES,
with over three thousand unusually large pages, in double columns.

This work has now been in the course of publication for about ten months, and is nearly completed, twenty-two numbers having been issued, and the whole will be completed early in March.

The parts already published contain the following valuable articles by distinguished authors:

CONTENTS OF PART I.

Abdomen. Exploration of the. Dr. Forbes.
Abortion. Dr. Lee.
Abscess. Internal. Dr. Tweedie.
Abstinence. Dr. Marshall Hall.
Achor. Dr. Todd.
Acne. Dr. Todd.
Acrodynia. Dr. Dunglison.
Acupuncture. Dr. Elliotson.
Age. Dr. Roget.
Air. Change of. Sir James Clarke.
Alopecia. Dr. Todd.
Alteratives. Dr. Conolly.
Amaurosis. Dr. Jacob.
Amenorrhœa. Dr. Locock.
Anæmia. Dr. Marshall Hall.
Anasarca. Dr. Darwall.
Angina Pectoris. Dr. Forbes.
Anodynes. Dr. Whiting.
Anthelmintics. Dr. A. T. Thomson.
Anthracion. Dr. Dunglison.
Antiphlogistic Regimen. Dr. Barlow.
Antispasmodics. Dr. A. T. Thomson.
Aorta. Aneurism of. Dr. Hope.

CONTENTS OF PART II.

Apoplexy. Cerebral. Dr. Clutterbuck.
Pulmonary. Dr. Townsend.
Arteritis. Dr. Hope.
Ascites. Dr. Darwall.
Artisans. Diseases of. Dr. Darwall.
Asphyxia. Dr. Roget.
" of the New Born. Dr. Dunglison.
Asthma. Dr. Forbes.
Astringents. Dr. A. T. Thomson.
Atrophy. Dr. Townsend.
Auscultation. Dr. Forbes.
Barbers. Dr. Scott.
Bathing. Dr. Forbes.

CONTENTS OF PART III.

Bathing (*continued*). Dr. Forbes.
Beriberi. Dr. Scott.
Blood. Determination of. Dr. Barlow.
" Morbid States of. Dr. Marshall Hall.
Blood-letting. Dr. Marshall Hall.
Brain. Inflammation of the.
Meningitis. Dr. Quain.
Cerebritis. Dr. Adair Crawford.
Bronchial Glands. Diseases of the. Dr. Dunglison.
Bronchitis. Acute and Chronic. Dr. Williams.
" Summer. Dr. Dunglison.
Bronchocele. Dr. And. Crawford.
Bullæ. Dr. Todd.
Cachexia. Dr. Dunglison.
Calculi. Dr. T. Thomson.
Calculous Diseases. Dr. Cumin.
Cataplexy. Dr. Joy.
Catarrh. Dr. Williams.
Cathartics. Dr. A. T. Thomson.
Chest. Exploration of the. Dr. Forbes.
Chicken Pox. Dr. Gregory.
Chlorosis. Dr. Marshall Hall.
Cholera. Common and Epidemic. Dr. Brown.

CONTENTS OF PART IV.

Cholera. Epidemic. (*continued*). Dr. Brown.
" Infantum. Dr. Dunglison.
Chorea. Dr. And. Crawford.
Cirrhosis of the Lung. Dr. Dunglison.
Climate. Dr. Clark.
Cold. Dr. Whiting.
Colic. Drs. Whiting and Tweedie.
Colica Pictorum. Dr. Whiting.
Colon. Torpor of the. Dr. Dunglison.
Coma. Dr. Adair Crawford.
Combustion. Spontaneous. Dr. Apjohn.
Congestion of Blood. Dr. Barlow.
Constipation. Drs. Hastings and Streeten.

Contents of Cyclopædia of Practical Medicine.

Contagion, Dr. Brown.
Convalescence, Dr. Tweedie.
Convulsions, Dr. Adair Crawford.
" Infantile, Dr. Locock.
" Puerperal, Dr. Locock.
Coryza, Dr. Williams.
Counter Irritation, Dr. Williams.
Croup, Dr. Cheyne.

CONTENTS OF PART V.

Croup, (*continued*), Dr. Cheyne.
Cyanosis, Dr. Crampton.
Cystitis, Dr. Cumin.
Dead, Persons found, Dr. Beatty.
Delirium, Dr. Pritchard.
" Tremens, Drs. Carter and Dunglison.
Dengue, Dr. Dunglison.
Dentition, Disorders of, Dr. Joy.
Derivation, Dr. Stokes.
Diabetes, Dr. Bardsley.
Diagnosis, Dr. Marshall Hall.
Diaphoretics, Dr. A. T. Thomson.
Diarrhœa, Drs. Crampton and Forbes.
" Adipous, Dr. Dunglison.
Dietetics, Dr. Paris.

CONTENTS OF PART VI.

Dietetics, (*continued*), Dr. Paris.
Disease, Dr. Conolly.
Disinfectants, Dr. Dunglison.
Disinfection, Dr. Brown.
Diuretics, Dr. A. T. Thomson.
Dropsy, Dr. Darwall.
Dysentery, Dr. Brown.
Dysmenorrhœa, Dr. Locock.
Dysphagia, Dr. Stokes.
Dyspnœa, Dr. Williams.
Dysuria, Dr. Cumin.
Ecthyma, Dr. Todd.
Eczema, Dr. Joy.
Education, Physical, Dr. Barlow.
Electricity, Dr. Apjohn.
Elephantiasis, Dr. Joy.
Emetics, Dr. A. T. Thomson.
Emmenagogues, Dr. A. T. Thomson.

CONTENTS OF PART VII.

Emphysema, Dr. R. Townsend.
" of the Lungs, Dr. R. Townsend.
Empyema, Dr. R. Townsend.
Endemic diseases, Dr. Hancock.
Enteritis, Drs. Stokes and Dunglison.
Ephelis, Dr. Todd.
Epidemics, Dr. Hancock.
Epilepsy, Dr. Cheyne.
Epistaxis, Dr. Kerr.
Erethismus Mercurialis, Dr. Burder.
Erysipelas, Dr. Tweedie.
Erythema, Dr. Joy.
Eutrophic, Dr. Dunglison.
Exanthemata, Dr. Tweedie.
Expectorants, Dr. A. T. Thomson.
Expectoration, Dr. Williams.
Favus, Dr. A. T. Thomson.
Feigned diseases, Drs. Scott, Forbes and Marshall.

CONTENTS OF PART VIII.

Feigned diseases, (*continued*), Drs. Scott, Forbes and Marshall.
Fever, general doctrine of, Dr. Tweedie.
" Continued, and its modifications, Dr. Tweedie.
" Typhus, Dr. Tweedie.
" Epidemic Gastric, Dr. Cheyne.
" Intermittent, Dr. Brown.
" Remittent, Dr. Brown.
" Malignant Remittent, Dr. Dunglison.
" Infantile, Dr. Joy.
" Hectic, Dr. Brown.
" Puerperal, Dr. Lee.
" Yellow, Dr. Gillkrest.

CONTENTS OF PART IX.

Fever, Yellow, (*continued*), Dr. Gillkrest.
Fungus Hæmatodes, Dr. Kerr.
Galvanism, Drs. Apjohn and Dunglison.
Gastritis, Dr. Stokes.
Gastrodynia, Dr. Barlow.
Gastro-Enteritis, Dr. Stokes.
Glanders, Dr. Dunglison.
Glossitis, Dr. Kerr.

Glottis, Spasm of the, Dr. Joy.
Gout, Dr. Barlow.
Hæmatemesis, Dr. Goldie.
Hæmoptysis, Dr. Law.
Headache, Dr. Burder.
Heart, Diseases of the, Dr. Hope.
" Dilatation of the, Dr. Hope.
" Displacement of the, Dr. Townsend.
" Fatty and greasy degeneration of the, Dr. Hope.
" Hypertrophy of the, Dr. Hope.

CONTENTS OF PART X.

Heart, Hypertrophy of the, (*continued*), Dr. Hope.
" Malformations of the, Dr. Williams.
" Polypus of the, Dr. Dunglison.
" Rupture of the, Dr. Townsend.
" Diseases of the Valves of the, Dr. Hope.
Hæmorrhage, Dr. Watson.
Hæmorrhoids, Dr. Burne.
Hereditary transmission of disease, Dr. Brown.
Herpes, Dr. A. T. Thomson.
Hiccup, Dr. Ash.
Hooping Cough, Dr. Johnson.
Hydatids, Dr. Kerr.
Hydrocephalus, Dr. Joy.
Hydropericardium, Dr. Darwall.
Hydrophobia, Dr. Bardsley.

CONTENTS OF PART XI.

Hydrophobia, (*continued*), Dr. Bardsley.
Hydrothorax, Dr. Darwall.
Hyperæsthesia, Dr. Dunglison.
Hypertrophy, Dr. Townsend.
Hypochondriasis, Dr. Pritchard.
Hysteria, Dr. Conolly.
Ichthyosis, Dr. Thomson.
Identity, Dr. Montgomery.
Impetigo, Dr. A. T. Thomson.
Impotence, Dr. Beatty.
Incubus, Dr. Williams.
Indigestion, Dr. Todd.

CONTENTS OF PART XII.

Indigestion, (*continued*), Dr. Todd.
Induration, Dr. Carswell.
Infanticide, Dr. Arrowsmith.
Infection, Dr. Brown.
Inflammation, Drs. Adair Crawford and Tweedie.

CONTENTS OF PART XIII.

Influenza, Dr. Hancock.
Insanity, Dr. Pritchard.
Intussusception, Dr. Dunglison.
Irritation, Dr. Williams.
Jaundice, Dr. Burder.
" of the Infant, Dr. Dunglison.
Kidneys, diseases of, Dr. Carter.
Lactation, Dr. Locock.
Laryngitis, Dr. Cheyne.
" Chronic, Dr. Dunglison.
Latent diseases, Dr. Christison.
Lepra, Dr. Houghton.
Leucorrhœa, Dr. Locock.
Lichen, Dr. Houghton.
Liver, Diseases of the, Dr. Stokes.

CONTENTS OF PART XIV.

Liver, Diseases of the, (*continued*), Dr. Venables.
" Inflammation of the, Dr. Stokes.
Malaria and Miasma, Dr. Brown.
Medicine, History of, Dr. Bostock.
" American, before the Revolution, Dr. J. B. Beck.
" State of in the 19th century, Dr. Alison.
" Practical, Principles of, Dr. Conolly.

CONTENTS OF PART XV.

Medicine, Practical, Principles of, Dr. Conolly.
Melana, Dr. Goldie.
Melanosis, Dr. Carswell.
Menorrhagia, Dr. Locock.
Menstruation, Pathology of, Dr. Locock.
Miliaria, Dr. Tweedie.
Milk Sickness, Dr. Dunglison.
Mind, Soundness and Unsoundness of, Drs. Pritchard and Dunglison.
Molluscum, Dr. Dunglison.
Mortification, Dr. Carswell.
Narcotics, Dr. A. T. Thomson.

Contents of Cyclopædia of Practical Medicine.

Nauseants, Dr. Dunglison.
Nephralgia and Nephritis, Dr. Carter.
Neuralgia, Dr. Elliotson.
Noli-Mc-Tangere or Lupus, Dr. Houghton.
Nyctalopia, Dr. Grant.

CONTENTS OF PART XVI.

Nyctidopia, (*continued*.) Dr. Grant.
Obesity, Dr. Williams.
Oedema, Dr. Darwall.
Ophthalmia, Drs. Jacobs and Dunglison.
Oxalgia and Otitis, Dr. Burne.
Ovaria, Diseases of the, Dr. Lee.
Palpitation, Drs. Hope and Dunglison.
Pancreas, diseases of the, Dr. Carter.
Paralysis, Dr. Todd.
Parotitis, Dr. Kerr.
Parturients, Dr. Dunglison.
Pellagra, Dr. Kerr.
Pemphigus, Dr. Corrigan.
Perforation of the Hollow Viscera, Dr. Carswell.
Pericarditis, Dr. Hope.
Peritonitis, Drs. McAdam and Stokes.

CONTENTS OF PART XVII.

Peritonitis, (*continued*.) Dr. Stokes.
Phlegmasia Doleus, Dr. Lee.
Pityriasis, Dr. Cumin.
Plague, Dr. Brown.
Plethora, Dr. Barlow.
Pleurisy, Dr. Law.
Plica Polonica, Dr. Corrigan.
Pneumonia, Dr. Williams.
Pneumothorax, Dr. Houghton.
Porrigi, Dr. A. T. Thomson.

CONTENTS OF PART XVIII.

Porrigi, (*continued*.) Dr. A. T. Thomson.
Pregnancy and Delivery, signs of, Dr. Montgomery.
Prognosis, Dr. Ash.
Prurigo, Dr. A. T. Thomson.
Pseudo-Morbid Appearances, Dr. Todd.
Erosion, Dr. Cumin.
Ptyalism, Dr. Dunglison.
Puerperal Diseases, Dr. Marshall Hall.
Pulse, Dr. Bostock.
Purpura, Dr. Goldie.
Pus, Dr. Tweedie.
Pyrosis, Dr. Kerr.
Rays, Dr. Beatty.

CONTENTS OF PART XIX.

Refrigerants, Dr. A. T. Thomson.

Rheumatism, Drs. Barlow and Dunglison.
Rickets, Dr. Cumin.
Roseola, Dr. Tweedie.
Rubecula, Dr. Montgomery.
Rupia, Dr. Corrigan.
Scabies, Dr. Houghton.
Scarlatina, Dr. Tweedie.
Scirrhus, Dr. Carswell.
Scorbutus, Dr. Kerr.
Scrofula, Dr. Cumin.

CONTENTS OF PART XX.

Scrofula, (*continued*.) Dr. Cumin.
Sedatives, Drs. A. T. Thomson and Dunglison.
Sex, Doubtful, Dr. Beatty.
Small Pox, Dr. Gregory.
Softening of Organs, Dr. Carswell.
Somnambulism and Animal Magnetism, Dr. Pritchard.
Spermatorrhœa, Dr. Dunglison.
Spinal Marrow, Diseases of the, Dr. Todd.
Spleen, Diseases of the, Drs. Bigsby and Dunglison.
Statistics, Medical, Drs. Hawkins and Dunglison.
Stethoscope, Dr. Williams.
Stimulants, Dr. A. T. Thomson.
Stomach, Organic Diseases of, Dr. Houghton.

CONTENTS OF PART XXI.

Stomach, Organic Diseases of, (*continued*.) Dr. Houghton and Dunglison.
Stomatitis, Dr. Dunglison.
Strophulus, Dr. Dunglison.
Succession of Inheritance, Legitimacy, Dr. Montgomery.
Suppuration, Dr. Todd.
Survivorship, Dr. Beatty.
Sycosis, Dr. Cumin.
Symptomatology, Dr. Marshall Hall.
Syncope, Dr. Ash.
Tabes Mesenterica, Dr. Joy.
Temperament, Dr. Pritchard.
Tetanus, Dr. Dunglison.
Tetanus, Dr. Symonds.
Throat, Diseases of the, Dr. Tweedie.
Tissue Adventitious.
Tonics, Dr. A. T. Thomson.

CONTENTS OF PART XXII.

Tonics, (*continued*.) Dr. A. T. Thomson.
Toothache, Dr. Dunglison.
Toxicology, Drs. Apjohn and Dunglison.
Transformations, Dr. Duesbury.
Transfusion, Dr. Kay.
Tubercle, Dr. Carswell.
Tubercular Phthisis, Dr. Clark.

"We rejoice that this work is to be placed within the reach of the profession in this country, it being unquestionably one of very great value to the practitioner. This estimate of it has not been formed from a hasty examination, but after an intimate acquaintance derived from frequent consultation of it during the past nine or ten years. The editors are practitioners of established reputation, and the list of contributors embraces many of the most eminent professors and teachers of London, Edinburgh, Dublin and Glasgow. It is, indeed, the great merit of this work that the principal articles have been furnished by practitioners who have not only devoted especial attention to the diseases about which they have written, but have also enjoyed opportunities for an extensive practical acquaintance with them,—and whose reputation carries the assurance of their competency justly to appreciate the opinions of others, while it stamps their own doctrines with high and just authority."—*American Medical Journal*.

"Do young physicians generally know what a treasure is offered to them in Dr. Dunglison's revised edition? Without wishing to be thought inopportune, we cannot very well refrain from urging upon them the claims of this highly meritorious undertaking."—*Boston Medical and Surgical Journal*.

"It has been to us, both as learner and teacher, a work for ready and frequent reference, one in which modern English Medicine is exhibited in the most advantageous light, and with adaptations to various tastes and expectations. The Publishers can be safely relied on as both able and willing to carry this undertaking through with all possible expedition."—*Medical Examiner*.

"Such a work as this has long been wanting in this country. British medicine ought to have set itself forth in this way much sooner. We have often wondered that the medical profession and the enterprising publishers of Great Britain did not, long ere this, enter upon such an undertaking as a Cyclopædia of Practical Medicine."—*London Medical Gazette*.

"The Cyclopædia of Practical Medicine, a work which does honour to our country, and to which one is proud to see the names of so many provincial physicians attached."—*Dr. Hastings' Address to Provincial Medical and Surgical Association*.

"Of the medical publications of the past year, one may be more particularly noticed, as partaking, from its extent and the number of contributors, somewhat of the nature of a national undertaking, namely, the 'Cyclopædia of Practical Medicine.' It accomplishes what has been noticed as most desirable, by presenting, on several important topics of medical inquiry, full, comprehensive, and well-digested expositions, showing the present state of our knowledge on each. In this country, a work of this kind was much wanted: and that now supplied cannot but be deemed an important acquisition. The difficulties of the undertaking were not slight, and it required great energies to surmount them. These energies, however, were possessed by the able and distinguished editors, who, with diligence and labour such as few can know or appreciate, have succeeded in concentrating in a work of moderate size, a body of practical knowledge of great extent and usefulness."—*Dr. Barlow's Address to the Med. and Surg. Association*.

"This Cyclopædia is pronounced on all hands to be one of the most valuable medical publications of the day. It is meant to be a library of Practical Medicine. As a work of reference it is invaluable. Among the contributors to its pages it numbers many of the most experienced and learned physicians of the age, and as a whole it forms a compendium of medical science and practice from which practitioners and students may draw the richest instruction."—*Western Journ. of Med. and Surgery.*

"In our last number we noticed the publication of this splendid work by Lea and Blanchard. We have since received three additional parts, an examination of which has confirmed us in our first impression, that as a work of reference for the practitioner—as a cyclopædia of practical medicine—it is admirably adapted to the wants of the American profession. In fact, it might advantageously find a place in the library of any gentleman, who has leisure and taste for looking somewhat into the nature, causes, and cure of diseases."—*Western Journal of Med. and Surgery.*

"The favourable opinion which we expressed on former occasions from the specimens then before us, is in no degree lessened by a further acquaintance with its scope and execution."—*Medical Examiner.*

"In conversation with practising physicians, we have been gratified to find that this work comes fully up to the high expectations formed of it from the complimentary notices of the Journals, and that as a work of reference it is regarded as superior to any thing hitherto published on Practical Medicine."—*Western Journal of Med. and Surgery.*

* * In reply to the numerous inquiries made to them respecting Tweedie's Library of Practical Medicine, the Publishers beg leave to state that its place is supplied, in a great measure, by the Cyclopædia of Practical Medicine, a work much more extended in its plan and execution. The works are entirely distinct and by different authors. The "Library" consists of essays on diseases, systematically arranged. The "Cyclopædia" embraces these subjects treated in a more extended manner, together with numerous interesting essays on all important points of Medical Jurisprudence, Materia Medica and Therapeutics, Obstetrics, History of Medicine, &c., &c. by the first physicians of England, the whole arranged alphabetically for easier reference.

JUST PUBLISHED, CHAPMAN ON FEVERS, &c.

LECTURES ON THE MORE IMPORTANT
ERUPTIVE FEVERS, HÆMORRHAGES AND
DROPSIES, AND ON GOUT AND RHEUMATISM,
DELIVERED IN THE UNIVERSITY OF PENNSYLVANIA.

By N. CHAPMAN, M. D.,

Professor of the Theory and Practice of Medicine, &c. &c.

In one neat octavo volume.

This volume contains Lectures on the following subjects:

EXANTHEMATOUS FEVERS.

Variola, or Small Pox; Inoculated Small Pox; Varicella, or Chicken Pox; Variolæ Vaccinæ, or Vaccinia, or Cow-pock; Varioloid Disease; Rubella, Morbilli, or Measles; Scarlatina vel Febris Rubra—Scarlet Fever.

HÆMORRHAGES.

Hæmoptysis, Spitting of Blood; Hæmorrhagæ Narium, or Hæmorrhage from the Nose; Hæmatemesis, or Vomiting of Blood; Hæmaturia, or Voiding of Bloody Urine; Hæmorrhagia Uterina, or Uterine Hæmorrhage; Hæmorrhoids or Hæmorrhoids; Cutaneous Hæmorrhage; Purpura Hæmorrhagica.

DROPSIES.

Ascites; Encysted Dropsy; Hydrothorax; Hydrops Pericardii; Hydrocephalus Internus, acute, subacute, and chronic; Anasarca; with a Disquisition on the Management of the whole.

GOUT, RHEUMATISM. &c. &c.

THEY HAVE ALSO FOR SALE

LECTURES ON THE MORE IMPORTANT DISEASES
OF THE

THORACIC AND ABDOMINAL VISCERA.

DELIVERED IN THE UNIVERSITY OF PENNSYLVANIA.

By N. CHAPMAN, M. D.

Professor of the Theory and Practice of Medicine, &c.

In one volume, octavo.

LEA & BLANCHARD PUBLISH AND HAVE FOR SALE,
HORNER'S ANATOMY.

SPECIAL ANATOMY AND HISTOLOGY.

BY WILLIAM E. HORNER, M. D.,

Professor of Anatomy in the University of Pennsylvania, Member of the Imperial Medico-Chirurgical Academy of St. Petersburg, of the Am. Philosophical Society, &c. &c.

Sixth edition, in two volumes, 8vo.

"Another edition of this standard work of Professor Horner has made its appearance to which many additions have been made, and upon which much labour has been bestowed by the author. The additions are chiefly in the department of Histology, or Elementary Anatomy, and so important are they that the Professor has added the term to the title of his work. Every part of this edition seems to have undergone the most careful revision, and its readers may rest assured of having the science of Anatomy fully brought up to the present day."—*Am. Med. Journal*.

**GRAHAM'S CHEMISTRY,
THE ELEMENTS OF CHEMISTRY,**

Including the application of the Science to the Arts.

WITH NUMEROUS ILLUSTRATIONS.

BY THOMAS GRAHAM, F. R. S., L. and E. D.

Professor of Chemistry in University College, London, &c. &c.

WITH NOTES AND ADDITIONS

BY ROBERT BRIDGES, M. D., &c. &c.

In One Vol. Octavo.

The great advancement recently made in all branches of chemical investigation renders necessary a new text book which shall clearly elucidate the numerous discoveries, especially in the department connected with organic Chemistry and Physiology, in which such gigantic strides have been made during the last few years. The present treatise is considered by eminent judges to fulfil all these indications, and to be peculiarly adapted to the wants of the medical student and practitioner. In adapting it to the wants of the American profession, the editor has endeavoured to render his portion of the work worthy the exalted reputation of the first chemist of England. It is already introduced as a text book in many of the Colleges, and has universal approbation.

"Professor Graham's work is one of the best, if not the best, of all English text books, and is of such recent date as to embrace all the latest discoveries. The appearance of a correct and amended American Edition, under the care of Dr. Bridges, will prove an acceptable thing to both teachers and students of Chemistry in this country."—*Silliman's Journal*.

PEREIRA'S MATERIA MEDICA.

WITH NEAR THREE HUNDRED ENGRAVINGS ON WOOD.

**THE ELEMENTS OF
MATERIA MEDICA AND THERAPEUTICS.**

COMPREHENDING THE NATURAL HISTORY, PREPARATION, PROPERTIES,

COMPOSITION, EFFECTS, AND USES OF MEDICINES.

BY JONATHAN PEREIRA, M. D., F. R. S. and L. S.

From the Second London Edition, enlarged and improved.

WITH NOTES AND ADDITIONS

By JOSEPH CARSON, M. D.

In Two Vols. Octavo.

The object of the author has been to supply the Medical Student with a Class Book on Materia Medica, containing a faithful outline of this Department of Medicine which should embrace a concise account of the most important discoveries in Natural History, Chemistry, Physiology and Therapeutics, in so far as they pertain to Pharmacology, and treat the subjects in the order of their natural historical relations.

This great *Library or Cyclopædia of Materia Medica* has been fully revised by DR. JOSEPH CARSON, professor of Materia Medica and Pharmacy in the "College of Pharmacy," and forms Two Volumes, octavo, of near 1600 large and closely-printed pages. It may be fully relied upon as a permanent and standard work for the country,—embodying, as it does, full references to the U. S. Pharmacopœia and an account of the Medical Plants indigenous to the United States.

FERGUSON'S PRACTICAL SURGERY.

A SYSTEM OF PRACTICAL SURGERY,

BY WILLIAM FERGUSON, F. R. S. E.,

Professor of Surgery in King's College, London; Surgeon to King's College Hospital, &c. &c.

WITH TWO HUNDRED AND FORTY-SIX ILLUSTRATIONS.

Engraved by Gilbert, after drawings by Bagg.

WITH NOTES AND ADDITIONAL ILLUSTRATIONS

BY GEORGE W. NORRIS, M. D.,

In one volume octavo.

The publishers commend this work to the attention of the Profession as combining cheapness and elegance with a clear, sound, and practical treatment of every subject in surgical science. No pains or expense have been spared to present it in a style equal, if not superior to the London edition, and to match the editions of "Wilson's Anatomy," "Churchill's System of Midwifery," and "Carpenter's Human Physiology." It is now extensively used as a text book.

LEA AND BLANCHARD ARE PREPARING FOR PUBLICATION
A MANUAL OF ELEMENTARY CHEMISTRY,
THEORETICAL AND PRACTICAL.
By GEORGE FOWNES, PH. D.
WITH NUMEROUS WOOD ENGRAVINGS,
And Notes and Additions by
ROBERT BRIDGES, M. D.,
Professor of Chemistry in the "Philadelphia Medical Association," &c. &c.
In one vol. royal 12mo.

HOBLYN'S DICTIONARY.

**A DICTIONARY OF TERMS USED IN MEDICINE
AND THE COLLATERAL SCIENCES,**
FOR THE USE OF STUDENTS.

BY RICHARD D. HOBLYN, M. D., &c.
From the Second London Edition, with numerous additions.
BY ISAAC HAYS, M. D., &c.
In One Volume, royal 12mo.

GUTHRIE ON THE ANATOMY OF THE BLADDER AND THE URETHRA,
AND THE
TREATMENT OF THE OBSTRUCTIONS TO WHICH THOSE PASSAGES ARE LIABLE.
From the Third London Edition,
In one volume, 8vo.

ALSO,
ANOTHER VOLUME OF THE SPLENDID SERIES OF THE
WORKS OF SIR ASTLEY COOPER.

COOPER ON THE ANATOMY AND DISEASES OF THE BREAST.

The whole to form one large and beautiful imperial octavo volume, with numerous plates in the best style of Lithography, and printed and bound to match the volumes on Hernia and the Testis already issued.

L. & B. HAVE LATELY PUBLISHED
CARPENTER'S PHYSIOLOGY.

PRINCIPLES OF HUMAN PHYSIOLOGY.

With their chief applications to Pathology, Hygiene, and Forensic Medicine. Especially designed for the use of Students.

With over One Hundred beautiful Illustrations on Wood.

BY WILLIAM B. CARPENTER, M. D.,

Lecturer on Physiology in the Bristol Medical School.

FIRST AMERICAN EDITION, WITH NOTES BY THE AUTHOR, AND NOTES AND ADDITIONS

BY MEREDITH CLYMER, M. D.,

In one volume, octavo.

 This edition of Carpenter's Physiology has been most carefully prepared by Dr. Clymer, at the request of Professor Jackson, for his lectures at the University of Pennsylvania.

ALISONS PATHOLOGY.

A NEW WORK.

**OUTLINES OF PATHOLOGY AND
PRACTICE OF MEDICINE.**

BY WILLIAM PULTENEY ALISON, M. D.,

Professor of the Practice of Medicine in the University of Edinburgh, &c. &c.

In three Parts—Part I.—Preliminary Observations—Part II.—Inflammatory and Febrile Diseases, and
Part III., Chronic or Non-Febrile Diseases.

In one volume octavo.

**For numerous other works not detailed, see the Two following
Pages.**

WORKS
IN THE VARIOUS DEPARTMENTS
OF
MEDICINE AND SURGERY:
PUBLISHED

BY
LEA & BLANCHARD.

ANATOMY.

ANATOMICAL ATLAS, illustrative of the Structure of the Human Body; with over Six Hundred Illustrations; the most complete work of the kind ever issued,—beautifully executed, in One Volume Imperial Octavo; by H. H. Smith, M.D., under the supervision of Professor W. E. Horner.

HORNER'S Special Anatomy and His-

tology; 6th edition, much improved. 2 vols. 8vo., 1114 pages.

WILSON'S Human Anatomy; a new edition (the second) revised, with additions by Dr. Goddard: 207 beautiful cuts. 8vo., 608 pages.

WILSON'S Dissector, or Practical and Surgical Anatomy; with additions by Goddard—106 cuts. Royal 12mo., 444 pages.

PHYSIOLOGY.

CARPENTER'S Human Physiology; with notes and additions by Meredith Clymer, and over 100 cuts—in 8vo., 618 pages.

DUNGLISON'S Human Physiology; the fifth edition, with numerous additions and 300 cuts—in 2 vols. 8vo., 1304 pages.

HARRISON on the Nervous System; 8vo., 292 pages.

MÜLLER'S Elements of Physiology by Baly, arranged by Bell—8vo., 886 pages.

ROGET'S Outlines of Physiology—8vo., 516 pages.

PATHOLOGY.

ABERCROMBIE on the Brain. 3d edit. on the Stomach. 4th edit.

ALISON'S Outlines of Pathology. 8vo., 424 pages.

ANDRAL on the Blood in Disease. 130 pages, 8vo.

BELL on the Teeth, with plates—8vo., 350 pages.

BERZELIUS on the Kidneys and Urine. 8vo., 178 pages.

BARTLETT on the Fevers of the United States—8vo., 394 pages.

BILLINGS' Principles of Medicine—8vo., 304 pages.

BRODIE on the Urinary Organs. 8vo., 214 pages.

BRODIE on the Diseases of the Joints. 8vo., 216 pages.

CHAPMAN on Thoracic and Abdominal Viscera. 8vo., 384 pages.

CHAPMAN on Eruptive Fevers, &c. 8vo., 448 pages.

HOPE'S Treatise on the Diseases of the

Heart and Great Vessels, with additions by Pennock. 8vo., 572 pages.

JONES and TODD on the Diseases of the Ear, edited by Dr. Hays; with numerous cuts. 8vo., pages—preparing.

LAWRENCE'S Treatise on the Diseases of the Eye, with additions by Hays, and numerous cuts. 8vo., 778 pages.

PROUT'S Treatise on Stomach and Renal Diseases, with coloured plates. 8vo., 466 pages.

PHILIP'S Treatise on Protracted Indigestion. 8vo., 240 pages.

RICORD'S Treatise on Venereal Diseases. 8vo., 256 pages.

WALSHE'S Diagnosis of the Diseases of the Lungs. 12mo., 310 pages.

WILSON on the Diseases of the Skin. 8vo., 370 pages.

WILLIAMS' Principles and Pathology, with additions by Clymer. 8vo., 384 pages.

WILLIAMS on the Respiratory Organs, edited by Clymer. 8vo., 508 pages.

PRACTICE OF MEDICINE.

ASHWELL on the Diseases of Females, by Goddard. 1 vol. 8vo., pages—nearly ready.

CONDIE'S Practical Treatise on the Diseases of Children. 1 vol. 8vo., 650 pages.

CHURCHILL on the Diseases of Females, including those of Pregnancy and Childbed; with additions by Huston. 8vo., 596 pages. 3d edition.

COATES' Popular Medicine. 8vo., 514 pp.

LEA AND BLANCHARD'S PUBLICATIONS.

DEWEES on the Diseases of Children. 8th edition; 8vo., 548 pages.

DEWEES on the Diseases of Females. 8vo., with plates, 532 pages.

DUNGLISON'S Practice of Medicine. Second edition, in 2 volumes 8vo., 1322 pages.

TWEEDIE'S Library of Practical Medicine. Second edition, revised; in 3 vols. large 8vo., 2016 pages.

Any one of the five volumes of the first edition can be had separate.

WATSON on the Principles and Practice of Physic. 8vo., 920 large pages.

SURGERY.

COOPER'S (Sir Astley) Treatise on Hernia, with lithographic plates. Imperial 8vo., 428 pages.

COOPER (Sir Astley) on the Testis and Thymus Gland, with lithographic plates. Imperial 8vo., 1 vol.

COOPER (Sir Astley) on Dislocations and Fractures, with numerous cuts, and a Memoir and Portrait. 8vo., 500 pages.

DRUITT'S Modern Surgery. Second edition, with 153 cuts; 8vo., 568 pages.

FERGUSON'S System of Practical Surgery, edited by Norris, with 246 cuts. 8vo., 630 pages.

HARRIS on the Maxillary Sinus. 8vo., 164 pages.

LAWRENCE'S Treatise on Ruptures. 8vo., 480 pages.

MAURY'S Dental Surgery, with numerous plates and cuts. 8vo., 286 pages.

ROBERTSON on the Teeth. 8vo., 230 pages.

THERAPEUTICS AND MATERIA MEDICA.

DUNGLISON'S Therapeutics and Materia Medica; a new work. 2 vols. 8vo., 1004 pages.

DUNGLISON'S Treatise on New Remedies. Fifth edition, 8vo., 616 pages.

ELLIS' Medical Formulary, by Morton. Seventh edition, 8vo., 262 pages.

PEREIRA'S Elements of Materia Medica and Therapeutics; edited by Carson, with 280 cuts. 2 vols. 8vo., 1566 pages.

OBSTETRICS.

CHURCHILL on the Theory and Practice of Midwifery, by Huston; 116 cuts. 8vo., 520 pages.

DEWEES' System of Midwifery, with plates. Tenth edition, 8vo., 660 pages.

RIGBY'S System of Midwifery, with cuts. 8vo., 492 pages.

RAMSBOTHAM on Parturition, with figures in lithography. Imperial 8vo., 458 pages.

CHEMISTRY, MEDICAL PHYSICS AND HYGIENE.

ARNOTT'S Elements of Physics, with numerous cuts. One volume 8vo., 520 pages.

DUNGLISON on Human Health; a

second edition revised, with additions. 8vo., 464 pages.

GRAHAM'S Elements of Chemistry, by Bridges, with numerous cuts. 8vo., 750 pp.

MEDICAL JURISPRUDENCE AND MEDICAL EDUCATION.

CHITTY'S Medical Jurisprudence.—8vo., 510 pages.

DUNGLISON'S Medical Student; a new edition, large 12mo.

TRAILL'S Medical Jurisprudence.—8vo., 234 pages.

TAYLOR'S Medical Jurisprudence, by Griffith. 1 vol. 8vo., 540 very large pages.

DICTIONARIES AND JOURNALS.

AMERICAN JOURNAL OF THE MEDICAL SCIENCES; edited by Dr. Isaac Hays, published Quarterly at Five Dollars a Year.

CYCLOPÆDIA OF PRACTICAL MEDICINE; comprising Treatises on the nature and treatment of Diseases, including those of *Women and Children, Materia Medica, Therapeutics, Medical Jurisprudence*, &c., &c. Edited by Forbes, Tweedie, Conolly and Dunglison. 4 large Su-

per-Royal Octavo Volumes. About 3000 pages in double columns.

DUNGLISON'S Medical Dictionary; 4th edition, containing over 40,000 words and synonyms; large 8vo., of 772 pages, double columns.

MEDICAL NEWS AND LIBRARY. Published Monthly at One Dollar a Year.

SELECT MEDICAL ESSAYS; by Drs. Dunglison, Chapman and others.—2 vols. 8vo., 1150 pages.

THE AMERICAN JOURNAL OF THE MEDICAL SCIENCES.

LEA & BLANCHARD are the Publishers of the American Journal of the Medical Sciences, Edited by ISAAC HAYS, M.D., Surgeon to Wall's Hospital, Physician to the Philadelphia Orphan Asylum, Member of the Am. Philos. Soc., &c. &c. &c., assisted by numerous collaborators in every section of the Union. This Journal was commenced TWENTY-FIVE YEARS AGO, and it is therefore the oldest Medical Journal now existing in the United States, and its permanency may be considered as established. It was originally edited by Dr. Chapman, who has been a constant contributor to its pages; and, for the last eighteen years, it has been under the editorial direction of Dr. Isaac Hays. The pages of this Journal contain the records of the experience of the most distinguished members of the Profession in every part of the Union.

CONTENTS OF THE NO. FOR JANUARY, 1845.

MEMOIRS AND CASES.—ART. I. Cases of Strangulated Hernia, with some remarks principally intended to show the necessity of an early resort to the operation. By John C. Warren, M.D. II. On the Pathology of Remittent Fever. By John A. Swett, M.D. III. On the treatment of Yellow Fever. By F. Wurdemann, M.D. IV. On the Pulse of the Insane, by Phiny Earle, M.D. V. Temporary Protrusion of the Eyeball, with loss of Vision, from rheumatic inflammation. By Isaac G. Porter, M.D. VI. On Obstetrical Asphyxiation. By L. S. Jones, M.D. VII. Tumour of the Neck, of extraordinary size, successfully removed. By P. C. Spencer, M.D. [With two wood cuts] VIII. Surgical Cases. By Edwin Hall, M.D. IX. Cases of Strangulated Hernia. By A. B. Shipman, M.D.

REVIEWS.—X. *Pouchet* on the Fecundation of the Mammiferæ. *Raciborski* on Puberty and the Critical Age in Women, and of the Periodical Discharge of Ova, &c. *Bischoff* on the Proof of the Periodical Ripening and Separation of the Ova of Mammalia and Man, independent of Oötus. XI. *Chadwick* on Intermittent in Fowls.

BIBLIOGRAPHICAL NOTICES.—XII. 1. The Twentieth Annual Report of the Officers of the Retreat for the Insane at Hartford. 2. Eighth Annual Report of the Physician and Superintendent of the Vermont Asylum for the Insane. 3. Report of the Superintendent of the Boston Lunatic Hospital, and Physician of the Public Institutions of South Boston.—XIII. 1. Reports of the state of the Kent County Lunatic Asylum. 2. Statements of the Visiting Committee of the County Lunatic Asylum, near Gloucester. 3. The Report of the Committee of Visitors of the Lunatic Asylum for the County of Leicester. 4. Thirty-third Annual Report of the General Lunatic Asylum, near Nottingham. 5. Reports of the Medical Officers of the Lunatic Asylum for the County of Lancaster. 6. Fifty-ninth, Sixty-fourth and Sixty-Eighth Reports of the Visiting Justices of the County Lunatic Asylum at Hanwell. XIV. *Zeis* on the Plastic Surgery of Celsus; on Organic Adhesions; and on Inverted Toe-Nail. XV. *Watman* on Means of Preventing the Rapid Occurrence of Fatal Symptoms in the Accidental Introduction of Air into the Veins. XVI. *Hufeland* on a New Series of Subcutaneous Operations. XVII. *Hufeland's* Enchiridion Medicum. XVIII. Summary of the Transactions of the College of Physicians of Philadelphia. March to October, 1844. XIX. *Chapman* on the more important Eruptive Fevers, Hemorrhages and Dropsies, and on Gout and Rheumatism.

SUMMARY OF THE IMPROVEMENTS AND DISCOVERIES IN THE MEDICAL SCIENCES.

ANATOMY AND PHYSIOLOGY.—1. *Scherer* on the Coloration of the Blood. 2. *Robert de Lamballe* on the Structure of the Uterus. 3. *Müller* on the products of the oxidation of Protein in the Animal Organism. 4. *Moreau* on the causes which determine the Sex in Generation. 5. *Magendie* on the Influence of Heat and of Stoves on Animal Life. 6. *Bernard and Barreswil* on Alimentary Substances. 7. *Schwan* on the importance of Bile in the Living Animal Organism. 8. *Elaguere* on Gunshot Wound of the Anterior Cerebral Lobes. 9. *Boudet* on the Chemical Composition of the Pulmonary Parenchyma and of Tubercles.

MATERIA MEDICA AND PHARMACY.—10. *Sedlitz* on Cotton as a Dressing to Blisters. 11. *Devay* on the mode of preparing the Valerianate of Zinc. 12. *Bouchardat* on Croton Oil Plaster. 13. *Milott* on the Lithoniptic action of the Gastric Juice. 14. *Gumprecht* on Cortex Frangulæ. 15. *Scheidemandel* on the mode of preparing some Narcotic Extracts in small quantities. 16. *Burton* on a new method of making Medicated Tinctures. 17. *Hoffman* on Cirrhosis of the Liver in Asthmatic Affections.

MEDICAL PATHOLOGY AND THERAPEUTICS AND PRACTICAL MEDICINE.—18. *Lossitte* on Small-pox in persons who had been Vaccinated. 19. *Bertini and Bellingiere* on Nitrate of Silver in Chronic Diarrhœa. 20. *Bellingiere* on Balsam of Copaiba in Chronic Bronchitis. 21. *Druitt* on the uses of Pure Tannin. 22. *Fourcault* on the causes of Albuminuria. 23. *Meyer's* Researches on Albuminuria. 24. *Rees* on the Pathology and Treatment of the Mortuus Brightii, and various forms of Anæmia. 25. *Gregory* on Deaths from Small-pox after Vaccination, in London. 26. *Devay* on Valerianate of Zinc in Nervous Affections. 27. *Perini* on a singular case of Encephalitis. 28. *Salvagnoli* on Analysis of the Blood of Persons Exposed to Malaria. 29. *Eslerien* on the Passage of Metallic Mercury into the Blood and Solid Tissues. 30. *Lamothe* on Epilepsy caused by a Foreign Body in the Ear, and cured by its removal. 31. Symptoms of Acute Pleurisy, caused by Intestinal Worms. 32. *J. and J. H. Smith* on Sulphate of Iron combined with an Alkaline Carbonate, an Antidote for Prussic Acid. 33. *Mac Donnell* on the Diagnosis of Empyema. 34. *Mondiere* on a Tænia evacuated through an opening in the Abdominal Parietes. 35. *Trousseau* on the Signs of Asphyxiation in Young Children.

SURGICAL PATHOLOGY AND THERAPEUTICS AND OPERATIVE SURGERY.—36. *Syme* on treatment of Obstinate Stricture of the Urethra. 37. *Reybard* on Suture of the Intestine. 38. *Bodiniere* on the Nature and Source of the Liquid which flows from the Ear producing Edema of the Scalp. 39. *Danville* on Gunshot Wound, where the charge passed from the Navel to the Back without fatal consequences. 40. *Sandham* on mode of Reducing Partial Displacement of the Semi-lunar Cartilages of the Knee-joint. 41. *Porter* on Operation for the Radical Cure of Hydrocele. 42. Two cases of Luxation of the Iliac Bone upon the Sacrum. 43. Singular cause of Error in Diagnosis of Affections of the Knee. 44. *Daniell* on Warty Excrescences near the Verge of the Anus. 45. *Daniell* on Enormous Steatoma removed from the Shoulder. 46. *Jefferson* on Operations for Removal of Ovarian Tumours. 47. *Bird* on Removal of a Diseased Ovary. 48. *Wiesel* on Ununited Fracture Successfully Treated by Acupuncture. 49. *Monin* on Luxation of the Forearm forwards without fracture of the Olecranon. 50. *Segalas* on Influence of Traumatic Lesions of the Spinal Cord on Diseases of the Urinary Passages. 51. *Wilbrand* on the Treatment of Syphilis by Tartar-emetic. 52. *Barbieri's* case of Recovery from Wound with Hernia of the Lung. 53. *Syme* on Popliteal Aneurism in a Child. 54. *Rognetta* on Epidemic Erysipelas. 55. *Inman* on Mortality attending the operation of Tying the Large Arteries. 56. *Tanzetti* on Fibrous Tumour of the Parotid. 57. *Vidal* on New Operation for Varicocele. 58. *Inman* on Mortality attending the Operation for Hernia. 59. *Laugier* on Immoveable Bandages of Starched Paper for the Treatment of Fractures of the Limbs. 60. *Coz* on Gunshot Wound of the Chest—evacuation of the ball per anum. 61. *Wilde* on Discharges from the Penis. 62. *Syme* on Bursal Swelling of the Wrist and Palm of the Hand.

OPHTHALMOLOGY.—63. *Morant* on Epidemic Ophthalmia. 64. *Bernard's* Method of Curing Lachrymal Fistulæ and Chronic Lachrymations reputed incurable. 65. *Dabrymple* on Cyst attached to the Anterior Surface of the Iris.

MIDWIFERY.—66. *Fraei* on Cæsarian operation performed with success both for the mother and child; rupture of the uterus and of the abdominal parietes thirteen months subsequently, during a second pregnancy; delivery of the fœtus through this spontaneous opening; complete recovery of the mother. 67. *Fischer's* case of Gravid Uterus passing into the Sac of an old Inguinal Hernia.—Cæsarian Section. 68. *Aubinais* on Polypus of the Uterus adherent to the Placenta Successfully Removed. 69. *Ginestet* on the Juice of the Urtica Urens in Uterine Hemorrhage. 70. *Darby* on Proapsed Uterus—Pregnancy. 71. *Lee* on Dropsy of the Amnion. 72. *Lee* on the Causes and Treatment of Uterine Hemorrhage, in the latter months of pregnancy. 73. *Lee* on Retained Placenta. 74. *Lisfranc* on Diagnosis of Inverted Uterus and Polypus. 75. *Murphy's* Statistics of Obstetric Practice.

MEDICAL JURISPRUDENCE AND TOXICOLOGY.—76. *Olivier* on Arsenic in the Earth of Cemeteries. 77. *Ramsay* on Aconitum Napellus. 78. *Jacob* on Poisoning by Euphorbia Lathyrus. 79. Rupture of the Omentum. 80. *Lisfranc's* opinion on some Disputed Points in Obstetrical Medical Jurisprudence. 81. Hereditary Insanity, how far, in cases of alleged unsoundness of mind, it may be pleaded. 82. *Simpson* on Relative Weight and Size of the Male and Female at Birth. 83. Copper Tanks at St. Helena. 84. Trial for Murder. 85. Case of Suicide. 86. Recent English Law Cases. 87. Obituary of Dr. Abercrombie.

AMERICAN INTELLIGENCE.—Original Communications.—*Horne* on the Preservation of the Human Body for Anatomical Purposes. Proceedings of the Association of Medical Superintendents of American Institutions for the Insane. *Perkins's* Cases of Congestive Fever.

DOMESTIC SUMMARY.—*Fourgaud* on Mortality among Children in St. Louis. *Le Conte* on Extraordinary Effects of a Stroke of Lightning. *Boyles* on Removal of a Diseased Ovary. *Herrick* on Rupture of the Spleen. *Marthens* on Fracture during Pregnancy. *Buck and Watson* on Opium a Hazardous Remedy in Strangulated Hernia. Yellow Fever at Woodville, Miss. *Davis* on Colon Strangulated by the Meso-colon. *Clark* on Discharge of a Lumbricus from the Male Urethra. *McDonnell's* cases of Extirpation of Diseased Ovaria. New Works. Death of Dr. Forry.

PUBLISHERS' NOTICE.

IN presenting the first number for the year of THE AMERICAN JOURNAL OF THE MEDICAL SCIENCES, the Publishers must offer their thanks to the profession for the increased favour extended to this long-established periodical, now the oldest Medical Journal in the Union. As an evidence of this patronage it may be stated, that notwithstanding an enlarged edition was printed for last year, at the present time not a single copy of the January or October numbers can be supplied.

It is intended to continue the work as heretofore, with about 264 large pages, quarterly, with such cuts and plates as are essential to illustrate the different papers; and *particular attention* is invited to that portion embracing

THE RETROSPECT FOR THE QUARTER,

Presenting, as it does, the most copious Summary of the Improvements and Discoveries in Medicine and Surgery, from all the various Journals published abroad and at home.

With a view of extending the circulation of the Journal, the publishers are now furnishing, with it—

A MONTHLY PERIODICAL, FREE OF CHARGE,

to such subscribers as remit Five Dollars in advance.

Attention is solicited to the following terms:—

Those persons who remit Five Dollars by the first of March, will receive not only The Medical Journal for 1845, but the Medical News and Library for 1845, free from any further charge.

For Ten Dollars they will furnish the Journal for 1845 and 1846, and the News for 1844, 1845 and 1846 free from any further charge.

Subscribers who have not yet paid for the year 1844, are particularly requested to remit at once, and are informed that if Ten Dollars are remitted at once it will be placed to their credit for the Journal for 1844 and 1845, and the News for the same years sent free of charge.

No such terms can be made except to subscribers who remit *in advance, free of postage, and direct to the Publishers.*

Agents can furnish the News *gratis* to be sent by mail, only in cases where the subscription, Five Dollars, for the Journal, is *paid in advance*; under no other circumstances will they send The News gratis.

Early orders are solicited, as very few more copies of the Journal will be printed than are actually subscribed for, and subscribers may be disappointed in obtaining the early Numbers of the year, as was the case in the last volume.

The Medical News and Library for 1845 will contain, in addition to the News of the month,

THE SURGICAL LECTURES OF SIR BENJAMIN BRODIE;

Thus following Watson's Practice of Physic, (which occupied the Library portion of the News for 1843 and 1844,) with a work on Surgery of great practical value, and by one of the first and most authoritative surgeons of the day. The pages of the Lectures will be so arranged that, when complete, they can be bound in a volume.

The News and Library will be issued monthly, and contain 32 pages, and go by mail as a newspaper. Price One Dollar a year, payable in advance, and in current funds, free of postage.

Postmasters are at liberty to frank remittances in payment for subscriptions.

The Publishers beg to present the Contents of the Journal for January 1845, which will be found on the preceding page.

 This paper may be delivered to any physician if declined by the person to whom it is addressed or if they have removed—and Postmasters and others will particularly oblige the publishers by furnishing a list of the Physicians and Lawyers of their county or neighbourhood. In addition to the business it may bring to the office, a copy of "The Complete Florist," or such other volume, will be sent by mail gratis for any ten or more names furnished free of cost.

Philadelphia, January, 1845.
